I respectfully urge the Commission to prioritize transparency, investor protection, accountability, and market integrity as it evaluates this proposal.
Thank you for your consideration.
Respectfully,
Eric L. Baker
Atlanta, Georgia
Investor and Business Executive

Eric Jenkins — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Eric Jenkins Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Saving money in this economical climate means nothing if we can't make money. The "side hustle" of today isn't for fun or glamour, but survival. Stocks and investments are currently my only savings and I've only got prayers for retirement. If anything, I just want to be able to rely on something in case anything happens, and making it harder to do that for anyone should not be made into law.
Thank you for your time.

Eric Kreitzer — Jun 17, 2026
Subject: S7-2026-15 From: Eric Kreitzer Affiliation: Jun. 17, 2026 We need stricter reporting and accountability for C suite officers of publicly traded companies.

Eric Schwartz — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Eric Schwartz Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I would like to make it absolutely clear that I am against changing the quarterly reporting rule as proposed by the Securities and Exchanges Commission. As a long time investor, I rely on accurate, consistent, and reliable data to ensure that my hard earned money is invested in companies that keep the economy strong and stable. A reduction in the frequency of company reports will have the consequences of hampering the growth of my investments thereby negatively impacting overall

consumer confidence in the markets. Respectfully, I would request that the SEC not implement this reporting change.
Thank you,
Eric Schwartz

Eric Simpson None — Jun 17, 2026
Subject: File No. S7-2026-15 From: Eric Simpson I agree with the argument that the change to every 6 months reporting will create more ambiguity than is good for individual investors. I don’t believe that businesses will start viewing things in a more long term perspective despite the change. Quarterly reporting should be here to stay

---

Eric Sims — Jun 17, 2026
Subject: S7-2026-15 Comment From: Eric Sims Affiliation: Jun. 17, 2026 Does this mean I get to hide my tax information for six months? How about a person with a criminal history trying to get a job in a secure area? Or a terrorist trying to come into the country? There is no good reason for a corporation to hide its books from the people who want to make sure they aren't hiding something that could possibly negatively effect investors, purchasers and people that corporation owes money to.

F M — Jun 17, 2026
Subject: S7-2026-15 Comment From: F M Affiliation: Jun. 17, 2026 My father retired from the USAF after 25 years of service. He then moved his family back to his hometown and instead of crossing a strike zone for the desegregation of schools that he approved of to be a teacher, he went to work for Sears. UGHHH you already think you know where I am going. He worked diligently for Sears for the next 30 years. He went to folks homes to measure for fences and kitchen remodels; he worked in the store selling appliances, cabinets, etc. He worked hard and honestly. He passed before he could see the devastating theft of pensions and the vampiristic sucking of the company coffers until they were so far in the hole it was unsalvageable. It is despicable that those in charge of these company purchases are allowed to exert such financial malfeasance over and over again WITHOUT jail time

in a gen pop institution. Same for JoAnns and many other fine businesses.

How do you allow them to borrow against the books of a company they are purchasing and then allow them to drain the company AND ADD the purchase debt to the books right before they close down a quality business and put so many hard-working people out of work? All while filling their pockets on the way out the door! Criminal! Do NOT allow the hiding of the books, in fact, turn it 180 and make them show every detail of an acquisitions of their past purchases and how they salvaged a business. Make them show every detail through returning a "troubled" entity back to a profitable one---without destroying it and the hard-working people that make it what it is for them to play such financial follies with to only line their own pockets and move on to the next victim business! Stop allowing this immoral lack of financial responsibility to be borne on the backs of the workforce!

Filipe Paini Bezerra — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Filipe Paini Bezerra Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
When I think about ending quarterly reporting, what stands out to me is how much it would take away from investors. Those reports are one of the few reliable moments when companies have to open the books and show what's really going on. Without them, transparency drops fast, and investors are left guessing instead of evaluating.
Quarterly updates also force consistent accountability. They keep management honest, disciplined, and aware that their decisions will be reviewed in the near term—not a year later when it's too late to course-correct. Remove that structure, and problems can stay hidden until they become crises.
And honestly, less information doesn't just hurt trust—it raises risk. Higher risk means more volatility, more uncertainty, and ultimately a higher cost of capital for the very companies asking for fewer rules.
To me, quarterly reporting isn't a burden. It's the minimum level of respect companies owe the people who invest in them. Taking it away would shift power toward insiders and leave everyone else in the dark.

Frank Klostermann — Jun 17, 2026
Subject: S7-2026-15 Comment From: Frank Klostermann Affiliation: Jun. 17, 2026 Keep Quarterly

Reporting so that we know what corporate executives and major stockholders are doing, and how corporations are doing financially on a timely basis. A lot can happen in 6 months if the public investors are kept in the dark. Disclosure is extremely important especially with the current Administration and Congress that seems to thrive on insider trading, deregulation, and lack of transparency.

Frank Lucas — Jun 17, 2026
Subject: S7-2026-15 From: Frank Lucas Affiliation: Jun. 17, 2026 Although I had no involvement in the original reporting requirement, I believe maintaining quarterly reporting is the best option; offering better tracking of revenue.

Fred L. Ogden — Jun 17, 2026
Subject: S7-2026-15 Comment From: Fred L. Ogden Affiliation: Jun. 17, 2026 Dear Sir/Madam,

I am an investor, managing my retirement funds. I am not yet retired, but am near retirement. In reality, I wish that I had instantaneous information on every company that I researched. The older the information, the less valuable it is to me and every other investor. The proposal to change reporting requirements from quarterly to semi-annually does me and other investors a tremendous disservice. Semi-annual information is less than half as valuable as quarterly information. The options market clearly shows how this is true. Do your job! Do not increase the reporting requirement period. We should be looking at means to increase the frequency of reporting, not decreasing it!
Sincerely yours,
F. Ogden

Geoff Petroleum Engineer — Jun 17, 2026
Subject: File No. S7-2026-15 From: Geoff I have been investing for almost 30 years. While it has been fairly smooth for the most part, there have been years where things went sideways regarding the market: the dot . com era, the housing crisis, COVID. The market has recovered from each. With possible new reporting rules extending financial corporate disclosure to 6 months from three, I believe the market will take this poorly and react in a way that my 30 years of compounding interest will take a severe and unrecoverable hit. These investments are for my retirement as based on what the extremely corrupt government wish to do with our Social Security and Medicare, nothing will be left and I will have to fall back on the money I have saved. Now with this change, that hard work that I have put in will be on the chopping block in a way that will ruin many people. Coporate results are what gauge stock market success, and by moving those reporting requirements apart more, then volatility and rumors will make the values of these companies worse. Well, except for congressmen and presidents who insider trade. For the hard working American, this change will spell disaster for our retirement future.

Geoff Phelps — Jun 17, 2026
Subject: S7-2026-15 From: Geoff Phelps Affiliation: Jun. 17, 2026 Seriously? The Securities and Exchange Commission wants to give senior executives wiggle room on the issue of being truthful in the issuance of their companies financial statements? Oh, that'll do wonders for the public's confidence in the financial markets.

If you are an SEC executive and you endorse this proposition, you should be forced to resign. Real accountability is the only reason we, the public, can have any confidence in financial statements. A THOUSAND TIMES, NO!

Please do not eliminate quarterly reporting for public companies. This information is vital to maintaining fair markets, as we studied thoroughly in my Accounting Bachelors and Masters programs at the University of Illinois.

Ginger Dean-Boukhari — Jun 17, 2026
Subject: S7-2026-15 Comment From: Ginger Dean-Boukhari Affiliation: Jun. 17, 2026 Ginger

Boukhari- retired teacher, Robert Boukhari- retired restaurant manager. We both are horrified at this new stupid only twice yearly business earnings report. How do we know about the success or failings of companies or stocks we are invested into? It could become insolvent and we wouldn't even know until too late to take our money out! It needs to stay as quarterly reporting. Why is the Trump administration doing this? To help dishonest companies cover up their mistakes or crimes.

Sent from my iPhone

Ginger Goode — Jun 17, 2026
Subject: S7-2026-15 Comment From: Ginger Goode Affiliation: Jun. 17, 2026 Individuals that are self-employed subcontractor type jobs are required by the federal government to file taxes, tax reports every quarter why should the larger corporations not be required
to do the same. It's hard enough as it is nowadays to keep track of what is going on with the large businesses they need to keep that accountability

Grace Ha-Kim — Jun 17, 2026
Subject: Decreased reporting to the SEC??? From: Grace Ha-Kim Affiliation: Jun. 17, 2026 To whom it may concern

It is becoming increasingly clear that any and all safeguards for Americans are slowly being stripped away, and this potential move by the SEC to return back to companies reporting twice a year versus quarterly, is just another attempt to take advantage of Americans.

If companies want our money and investment, then they need to do the work and practice the transparency that makes the whole trading and investment system fair. By decreasing the number of reports each year, the SEC is asking that investments be managed nearly blind for half the year. Please side with the people who essentially support the market not the companies that take the money and then complain about the work to prove their worthiness of investment and continued investment

Grace Kim

Grace Kent — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Grace Kent Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Americans are very busy and they are depending on your actions to be better served. We need to be informed fairly and the people deserve transparency when it comes to money making decisions. I do not support the proposal. Americans deserve better and we should be informed when the markets are making so much off our hard work.

Sincerely,
Grace Kent

Subject: Comment on S7-2026-15 From: Gwen Lehman Affiliation: Jun. 17, 2026 Gwen, retired. Minnesota. I can't afford to lose any more money than I already have since Trump has been president. All my bills are higher, gas, groceries cost of living. Can't afford any more money loss.

GWEN TIDWELL — Jun 17, 2026
Subject: S7-2026-15 Comment From: GWEN TIDWELL Affiliation: Jun. 17, 2026 Quarterly reporting needs to stay in place. We have understandably lost trust in too many things and changing quarterly reports to less frequent reports is opening the door to fraud and hidden actions. Please keep quarterly reports to help the public awareness.

H M — Jun 17, 2026
Subject: S7-2026-15 From: H M Affiliation: Jun. 17, 2026 Comments TO THE SEC on PROPOSED changes to corporate reporting. SCHEDULE.

We need to keep the PERFORMANCE reporting on the QUARTERLY SCHEDULE.
TOO MUCH CAN CHANGE THE PERFORMANCE RESULTS IF WE DO NOT KEEP THE INFORMATION FLOWING TO INVESTORS. THE INFORMATION FLOW KEEPS THE CORPORATIONS FROM CONCEALING BAD RESULTS AND HELPS KEEP CORPORATIONS "FROM HIDING BAD PERFORMANCE DECISIONS " FROM THE OPEN OBSERVATION OF INDIVIDUAL INVESTORS.

H W — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: H W Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
This proposal will only increase the divide of the haves vs have-nots, those who wield power vs those who are systematically disenfranchised, and overall promotes greed vs a mindset that prioritizes a healthy, livable society.
I am disgusted, but not surprised. This country is actively making life worse for average Americans with policies like these.

Hair Harmonics — Jun 17, 2026
Subject: S7-2026-15 From: Hair Harmonics Affiliation: Jun. 17, 2026 Hello SEC Commissioners,
My name is Laura Sullivan. I am a small business owner in NW Washington.
I lived through the Enron travesty. It harmed my husband and I financially, and it absolutely destroyed the lives of people we knew.
This is another case of Republicans trying to weaken the laws that were put in place explicitly because of their corrupt behavior. Do not give in to their pressure. If their behavior is legal, they should have no problem with quarterly reporting. Anything less will weaken the necessary oversight. There is no advantage to the American citizens if you make it easier for these people to break the law for profit. Please exercise your responsibility to protect the citizens of the United States.

Haylee Higgins — Jun 17, 2026
Subject: S7-2026-15 Comment From: Haylee Higgins Affiliation: Jun. 17, 2026 My name is Haylee Higgins and I am a legal assistant who previously worked in state government. You're trying to legalize misleading smaller shareholders so that rich and powerful people (majority shareholders) can have early access to information and do insider trading. It is so blatantly obvious that is what you're trying to do. Will you feel good about yourselves when everyday people lose thousands from their retirement accounts because they weren't properly informed on the state of their investments? I am 30 and I am desperately trying to save enough to be able to retire someday, and this rule would undoubtedly set myself and thousands of others in my position back significantly in that goal. I urge you to think about all the Americans who are only a few years from retirement age, who truly cannot afford the potential losses as it would force them to have to postpone their retirement and continue working until they could make that money back. Shame on you.

Heather Sloan — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Heather Sloan Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I have been a victim of identity theft, fraud, attempted murder, murder of family members and at this rate if I die they will off my two youngest if not all 4 just to keep crimes done against me with political and big institutions doing insider trading. They are plucking off people like me to maintain power. I got insider scoops from the legal prosepectuses that are mandatory and thats how I discovered part of the financial crimes done against me. Thru email for they had my mail handled by a bribed off mail office in mound, MN.
You obviously are about crimjnals and crimes and cover ups if you vote for this! Stop fooling yourselves thinking institutions and big money investors are the only ones to be accounted for. My grandparents invested their money n were scammed thinking that these institutions law offices and courts and law enforcement officers of needed which they never thought that what has happened to me and my children would happen! They invested with trust and felt a advisor at wealth enhancement management group had their investment s in faithful regards. They thought the government handled fraud n embezzlement. However when the government is part of it , speaking of Minnesota, however this is a wolrd wide problem! , then I wouldnt of known that there was more money they were frauding from me and embezzlement along with fraud murder sex trafficking and human eating snd harvesting continue on.
So please stop being a idiot and do what's right. If sec is pushing this then its a no brainer you are infiltrated in crime and covering your own ass.

Holly M. Berkowitz — Jun 17, 2026
Subject: S7-2026-15 From: Holly M. Berkowitz Affiliation: Jun. 17, 2026 I am very saddened and afraid for my children's and nations futures…… because so many persons and private corporations seem dishonest.

That has made America unsafe, no longer a destination or a place to be.

However, America has much good also. So I will try to enjoy the good.

Honey Her — Jun 17, 2026
Subject: Comment on S-7-2026-15 From: Honey Her Affiliation: Jun. 17, 2026 Honey Her, Analyst, Sacramento. Quarterly reporting is better in general for public transparency. Business trades, losses, and investments should be available to help the public opinion in doing business with them. The image of a company and their ethics matters to people. We want to trust that a business is doing what it says it's doing and it has similar morales that align with ours. Especially if you invest in the market yourself you want to see historical progress of a company and know what risks they've encountered or have currently. By being a valued customer of a business, some people may want to

see that they are giving back to the community. All these things can only be provided by consistently issuing quarterly files so the public can follow along & continue their investments and trust in companies they do business with.

Hope — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Hope Affiliation: Jun. 17, 2026 I have worked very hard to save for my retirement. It is important to keep an eye on quarterly reports. This is a no brainer. Nothing to hide!!

Subject: File No. S7-2026-15 From: Isaiah VonBraun-Bond This will only hurt and starve the economy leading people to revolt against you further harming your interests and costing you potentially billions and leading to a erosion of public trust and a complete loss of global economic power as china continues to pass us. The past is gone. Move on and upward to where profits and gains are, not loss of the past.

Ivan Sanchez Diaz — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Ivan Sanchez Diaz Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
The new proposed rule goes against the interest of investors. It is important for any and all investors to recieve information regarding the financial standing of companies. 6 month is too long of a gap for investors to not be aware of the standing of a company. Quarterly reports provide more frequent and detailed information for investors to make sound decisions.
I am firmly against the change to a semi-annual filing and support staying with the current system.

Ivan Sanchez Diaz

Ivan V — Jun 17, 2026
Subject: S7-2026-15 Comment From: Ivan V Affiliation: Jun. 17, 2026 Please do not change. Companies already make us lose enough money by hiding their intentions. This will only screw the small investors further.
Small investors make up the majority in number however, not the most in money. So they rich over rule by voted by dollars.
I lost over 90% of my retirement because of false misleading information and when the truth came out I was screwed cause the stocks dropped so fast and all the big investors had already sold. Please don't let them squeeze out the little we make by hiding further their actions by cutting their reporting to 6 months

Please excuse any typo and autocorrect.

J. Henderson — Jun 17, 2026
Subject: File No. S7-2026-15 From: J. Henderson Reducing financial reporting to twice a year would weaken market transparency and undermine investor confidence. Frequent disclosures help ensure that companies remain accountable and that investors can make informed decisions based on timely, accurate data. Cutting reporting frequency creates longer periods of opacity, increasing the risk of undisclosed problems, earnings manipulation, and delayed recognition of material events. In a market that depends on trust and clear information flow, reducing transparency would harm both investors and the integrity of U.S. capital markets.

J. Wesley Helms — Jun 17, 2026
Subject: Comment on S7-2026-15 From: J. Wesley Helms Affiliation: Jun. 17, 2026 We need more oversight of corporate handling of the public trust and investors money - not less. Without this oversight there will always be grifters and thieves that will play the system at the expense of the small investor.

JACK BAVARO — Jun 17, 2026
Subject: S7-2026-15 From: JACK BAVARO Affiliation: Jun. 17, 2026 To Whom it may Concern,

Enron and Arthur Andersen hurt millions of people financially, many have never recovered from their cheating. With over 100K jobs lost between the TWO Companies and estimated $300B in financial, retirement and investor losses, this cannot happen again.

Businesses need to be regulated as they have been under quarterly reporting and accountability of Sarbane Oxley. We cannot go backwards in time when bad actors found ways to cheat and with the introduction SIX Regulations it has not prevented massive public growth and profits by corporations as evidenced by record high levels of the Stock Market trading.

There is NO reason other than to allow bad actors unregulated methods to cheat their investors and employees with laxed regulations.

I strongly recommend keeping all sections of SOX in place ESPECIALLY 302 quarterly reporting in place, along with Section 404 in-depth Annual Reporting.
Best Regards,

Jack Bavaro

James Dabinett — Jun 17, 2026
Subject: File No. S7-2026-15 From: James Dabinett The public thrives on transparency. The only people that benefit from a lack of transparency are those with something to hide. Something bad they know is coming, but don't want anyone else to know until it's too late. Companies have shown, time and again, that if they aren't held to account by an independent 3rd party, they will do whatever they can, legally or otherwise, to take money from investors and pocket it for the executives, especially when the company has something horrible looming. The public needs transparency to make proper and informed decisions and the companies need them to remain accountable. Those that thrive will continue to do so. Those on the way out will only take themselves out and NOT other investors (as much) when they are required to submit quarterlies.

James Frost — Jun 17, 2026
Subject: S7-2026-15 Comment From: James Frost Affiliation: Jun. 17, 2026 Bi-annual reporting only benefits insiders and harms the average investors.

James Gennert Systems Engineer — Jun 17, 2026
Subject: File No. S7-2026-15 From: James Gennert I want quarterly reporting because it gives me more frequent, more actionable, and more accurate information about a company’s performance which directly affects my ability to make good investing decisions.

James Hann — Jun 17, 2026
Subject: S7-2026-15 Comment From: James Hann Affiliation: Jun. 17, 2026 This is not a Republican or Democratic issue. American investors, like me, depend on monthly and quarterly reports in order to make timely and informed investment decisions. Quarterly reposting should be the MINIMUM required reporting procedure for both public and private companies. Anything less diminishes the transparency of American commercial and industrial leadership of the world.

James R. Hann
16286 Landauer St, Basehor, KS 66007

James Harvey — Jun 17, 2026
Subject: Comment on S7-2026-15 From: James Harvey Affiliation: Jun. 17, 2026 Keep quarterly financial reporting but eliminate quarterly earnings guidance. Quarterly reporting itself provides transparency that we need, but a middle-ground approach could be:

* Quarterly financial statements remain mandatory.
* Annual and multi-year strategic guidance replaces quarterly guidance.
* Executive compensation tied to 3–5 year performance.
* Greater disclosure of long-term investments (R&D, workforce development, capital projects).

Preserve market transparency while reducing the incentive to optimize for the next 90 days.

James Harvey
Software Experience Designer
PwC, Tampa, Fl

James Heironimus — Jun 17, 2026
Subject: S7-2026-15 Comment From: James Heironimus Affiliation: Jun. 17, 2026 Quarterly reporting is an appropriate and functional system for our nation and its businesses. Less frequent assessment inappropriately drops needed guardrails. Do not change our functional and necessary quarterly system.

James Heironimus
Howard, OH

James Hill — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: James Hill Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission: I don't see it as a fair advantage to let insiders and big institutional investors still get quarterly updates 6 months before regular citizens do. Seems like another way to make the market help the people who need it the least. It's shameful and shows how much of a problem wealth inequality is making life harder for everyday Americans. I hope you take my comment seriously i have very little hope with people in power of doing the right thing. I hope to be proved wrong. Thank you.
J.R.

James Hoffmann — Jun 17, 2026
Subject: S7-2026-15 From: James Hoffmann Affiliation: Jun. 17, 2026 The quarterly report must remain in tact. Now more than ever billionaires are getting away with murder while the working class is getting beat down. We don't need another Enron debacle where
people lost their entire life savings. Do your job and protect the citizens. Stand against Trump and his cronies and do what is right for the people.

James

James Malone — Jun 17, 2026
Subject: S7-2026-15 Comment From: James Malone Affiliation: Jun. 17, 2026 James A Malone III Retired
Keep it Quarterly on the reporting. It's VERY IMPORTANT to all of us to know just how things are going with the monies we've invested into the markets. Taking that quarterly window AWAY and changing the reporting to twice a year from four times a year, will devastate a whole lot of people with the lack of a timely response to the the market changes. Why are we constantly going BACKWARDS instead of forwards?

James McCarthy — Jun 17, 2026
Subject: Comment on S7-2026-15 From: James McCarthy Affiliation: Jun. 17, 2026 Don't do it. A free press and real accountability is necessary for the ability to see how well publicly traded companies are run BEFORE I give them my money!! Don't do it!!!!!

Sent from my iPhone

James McMichael — Jun 17, 2026
Subject: Comment on S7-2026-15 From: James McMichael Affiliation: Jun. 17, 2026 Quarterly reporting needs to be mandatory as it provides transparency to market and promotes market efficiency through more frequent disclosures and Q&A sessions.

While some may argue it is onerous and expensive particularly for smaller companies
Or that it makes the markets/management focus too much on the short term and increases volatility around earnings without the releases transparency would decline leading to lower overall valuations.

James Mueller CFA — Jun 17, 2026
Subject: File No. S7-2026-15 From: James Mueller I am opposed to the proposed change to allow companies to reduce how often they report their financial and business health from four times a year to two times a year. Individual investors are already at a disadvantage when it comes to information about companies. They do not have the resources in time or money to do all the secondary research that institutional investors do (such as channel checks, visiting management, etc.). The quarterly reporting cadence goes a long way to leveling the playing field, just as Reg FD did over two decades ago. It gives information about the health of a business, information needed by investors if they want to stay informed about what they own. If a business starts getting into financial distress, that information can often be gleaned from the quarterly reports. By allowing the company to report less often, the investor knows less and can be hurt more when the information finally comes to light. Research by the CFA Institute shows that the proposed reason for this change is flawed. Letting companies report less often does not lead to longer-term thinking on the part of management. This proposed change is in the wrong direction, going toward less information for everyone. Less information is not the solution to anything.

JAMES PALIOTTA — Jun 17, 2026
Subject: S7-2026-15 Comment From: JAMES PALIOTTA Affiliation: Jun. 17, 2026 James Paliotta-

Retired. Totally against this because I believe it opens the door for fraud and insider trading by the corporate officers and Board of Directors. Shareholders need transparency of company financial position to keep an eye on their investments in making decisions on whether to keep, buy more or sell their stock.

Janet McKenzie — Jun 17, 2026
Subject: S7-2026-15 From: Janet McKenzie Affiliation: Jun. 17, 2026 Janet McKenzie, retired BWC OH Auditor, Emporia, VA.
The havoc and pain of large financial losses experienced by multiple thousands, maybe millions, of average Americans due to their innocent investing in large companies with great "prospectus" results through their pension funds only to lose it all through criminal actions of CEOs who fleece the public for their own gain in cases like Enron was devastating. This Rule increases the opportunity of making them culpable legally for their actions. With fraud increasing on every front, this rule should not be cut back but firmly held on to. It gives the legal system more power to punish the guilty for the harm they caused to so many!
PLEASE HOLD FIRM!

Janet Palmer — Jun 17, 2026
Subject: S7-2026-15 Comment From: Janet Palmer Affiliation: Jun. 17, 2026 Corporations need reporting to run their businesses so quarterly reporting is not burdensome. AI can be very helpful in gathering and assembly of the data. Do not lessen the reins on transparency.

Janice Shields — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Janice Shields Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
This is decision would hinder the investors and also companies could hide financial distress if reporting is not documented quarterly. This puts investors at a disadvantage because by the time the report comes out in 6 months there could already be financial loss. Also insider trading is possible within these companies because of the time it takes for the annual report to be made public , someone within the company who has the knowledge could make insider trading. We need transparency when it comes to investing. Rolling it back does not benefit the very people who invest their money into companies. There is no point in rolling back regulations. Things are good the way they are. Any changes that loosen reporting quarterly is obviously plain corruption. I disagree with regulatory changes.

Janice Vassar — Jun 17, 2026
Subject: S7-2026-15 Comment From: Janice Vassar Affiliation: Jun. 17, 2026 To SEC Rules Committee:

I am asking you to maintain the current schedule of quarterly reporting. Quartery reporting maintains accounability, especially in times of volitility and change, such as the COVID epidemic and with the growth of AI.

Transparency is important to me and other investors.

Regards,
Janice Vassar, Champlin, MN

Subject: S7-2026-15 Comment From: Jarrod Smith Affiliation: Jun. 17, 2026 My name is Jarrod Smith and I'm a university professor.

The idea that we should reduce the frequency of earnings reports, in light of what we saw in 2007-9 is an affront to logic. This proposal does nothing to benefit Main Street investors, make our market more transparent, or less risky. Quite the opposite. This only benefits Wall Street insiders while exposing everybody to more risk due to reduced transparency about what is going on inside our investments. Quite frankly the idea is offensive and irresponsible. Leave quarterly reporting as it is.

Jarrod

Jasmine Tokuda — Jun 17, 2026
Subject: S7-2026-15 Comment From: Jasmine Tokuda Affiliation: Jun. 17, 2026 The quarterly reports are a road map for investors. Why make it harder for them to navigate the market? This might have the effect of people moving their investments from the stock market to other financial instruments.

Jason Bennett — Jun 17, 2026

Jason Markantes — Jun 17, 2026
Subject: File No. S7-2026-15 From: Jason Markantes I am writing to strongly oppose the proposed change to reporting requirements. Quarterly reporting protects everyday investors like me. Switching to semiannual reporting doesn't just cut down on corporate paperwork—it doubles the information gap between insiders and regular shareholders. That six-month blackout period is exactly where volatility, uncertainty, and mistrust thrive. The excuse of fixing "short-termism" doesn't hold up. The CFA Institute studied this exact move in the U.K. market and found that changing reporting frequency did absolutely nothing to improve corporate investment behavior. The SEC is asking retail investors to pay a huge price—less transparency—for a corporate benefit that the data proves won't even happen. Worse, the companies most likely to skip quarterly reports are the smaller ones that need the most oversight. They already operate with less scrutiny, and reducing their reporting makes them harder to monitor and harder to trust. Regulation FD was meant to level the playing field for us; this proposal drags us completely backward. What exact problem are we even trying to fix here? The WallStreetBets comment letter nailed it: "The companies we trade are not being held back from greatness by the obligation to file four reports a year. ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well." Transparency builds confidence. Please don't degrade market integrity in an attempt to save corporations a little convenience. I strongly urge you to reject this proposal.

Jason Shelton — Jun 17, 2026

Jaudon Cox — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jaudon Cox Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
The foundation of a fair market is equal access to timely and accurate information. Large institutional investors, hedge funds, and investment firms have access to extensive research teams, alternative data sources, and industry contacts that individual investors do not. Quarterly reporting is one of the few mechanisms that ensures all investors receive important company information on a regular and transparent basis.

Reducing reporting requirements from quarterly to semiannual disclosures would widen the information gap between Wall Street and Main Street. Retail investors would be forced to make investment decisions with less current information while sophisticated market participants continue to gather insights through private research and resources unavailable to the average American. Transparency should be increased, not reduced. Public companies benefit from access to public capital markets, and in return they should provide timely and consistent information to all shareholders. Less frequent reporting risks undermining investor confidence and could make markets less fair for ordinary Americans who are trying to build wealth through responsible investing. Lastly, a market where the wealthy and well-connected have more information than ordinary investors is not a free and fair market—it is a privileged market.

Jay McCarson — Jun 17, 2026

Jayce Childs — Jun 17, 2026
Subject: File No. S7-2026-15 From: Jayce Childs This amendment should NOT be passed.

Professional investors may have the tools and insider knowledge to be able to keep track of how a company is doing with less frequent updates, but private, amateur individuals who are relying on investments to maybe one day have a sliver of a chance of some goal like amassing enough to purchase a home, or retire do not. We need every scrap of information we can get. This rule only benefits companies—not humans. It is outrageous that we seem to be assigning feelings and fairness to businesses. Keep 10-Q as is. A new 10-S will only continue to harm humans, and benefits corporations. And I'd like to just point out that if companies continue draining every cent they can from humans, we average folks are not going to have any pennies left to invest at all. Let's see quarterly growth when you have no customers and no investors.

JAYNE SMITH — Jun 17, 2026
Subject: S7-2026-15 Comment From: JAYNE SMITH Affiliation: Jun. 17, 2026 Mandated attestation and reporting is essential to keep transparency and accountability in place as a protection for all publicly held companies' shareholders. Also, please consider revisiting
stock option awards for top tier executives. There needs to be a mechanism put in place to prevent these awards from diluting the companies' value of other holders' stake in the company. These should only be approved by vote of the shareholders and note just
the board. Jayne Smith Custodian of Records

Re: Comment on Proposed Rule, Semiannual Reporting (File No. S7-2026-15; Release Nos. 33-11414; 34-105368)

Dear Ms. Countryman:

I write in support of the Commission's proposal to permit Exchange Act reporting companies to satisfy their interim reporting obligations on a new semiannual Form 10-S in lieu of the quarterly Form 10-Q.1 I am the founder and financial advisor at Treveri Capital LLC, and I have spent more than twenty years in the financial markets as a floor broker, as a vice president of sales at a major wirehouse, and now as an independent fiduciary serving individual investors. I review issuer disclosures regularly in the course of that work. My comments reflect that practitioner's vantage point rather than the perspective of any single issuer.

The proposal is, at its core, a modest and sensible expansion of issuer choice, and it serves a goal I share as a fiduciary, encouraging more companies to enter the public markets and to remain in them so that ordinary investors can participate in their growth. It does not abolish interim reporting, and it does not weaken the antifraud regime, the Form 8-K current reporting framework, or Regulation FD. It simply allows a company and its investors to choose the interim reporting cadence that fits the company's size, stage, and shareholder base. I believe that choice is overdue, that the benefits are tangible and well documented, and that the principal objection, a

1Semiannual Reporting, Release Nos. 33-11414; 34-105368; 39-2563; IC-36140, File No. S7-2026-15, RIN 3235-AN58 (May 5, 2026), 91 Fed. Reg. 24968 (May 7, 2026). Except where otherwise noted, the cost and burden estimates in this letter are drawn from the Commission's Economic Analysis in that release.

possible widening of information gaps, is real but limited and largely self-correcting. I address the supporting considerations first and then turn candidly to that concern.

I. Choice, Not Mandate: Let the Market Set the Cadence

The central virtue of the proposal is that it returns a decision to the parties best positioned to make it. A pre-revenue biotechnology firm whose value turns on clinical milestones does not communicate the same way as a mature consumer bank, yet both are bound today to an identical quarterly rhythm. Allowing each issuer to elect its frequency annually lets the cadence follow the business rather than the other way around. This is not a novel concept in our markets. Companies already decide whether to split their stock, and a celebrated few, Berkshire Hathaway among them, have famously declined to do so for decades without any loss of investor confidence. The market absorbs that variation easily and prices the security accordingly.

Critics worry that issuers will rush to report less. The available evidence points the other way. When the United Kingdom removed its quarterly reporting mandate in 2014, only about nine percent of firms actually stopped reporting quarterly.2 The overwhelming majority kept the quarterly cadence because their investors and analysts expected it, and the firms judged the expense worthwhile. That is precisely the outcome a choice-based regime should produce. Companies whose shareholders value frequent data will continue to supply it, because trading interest, analyst coverage, and access to capital reward them for doing so. Companies whose shareholders do not need it can redirect the savings to the business. The daily reality of trading volume and investor demand will discipline the decision far more efficiently than a uniform federal rule.

II. Lower Cost, Especially for Smaller and Newer Issuers

The compliance savings are not trivial, and they fall most heavily where they matter most. The Commission's own analysis estimates that preparing three quarterly reports costs an average

2Suresh Nallareddy, Robert Pozen & Shivaram Rajgopal, Consequences of Mandatory Quarterly Reporting: The UK Experience, Columbia Business School Research Paper No. 17-33 (2017) (finding that only approximately 9 percent of UK firms ceased quarterly reporting after the 2014 removal of the mandate, and that reporting frequency had no material effect on levels of corporate investment); see also Robert C. Pozen, Suresh Nallareddy & Shivaram Rajgopal, Impact of Reporting Frequency on UK Public Companies, CFA Institute Research Foundation (2017), available at https://ssrn.com/abstract=2977466.

issuer roughly $330,000 per year, against roughly $132,000 for a semiannual report.3 Across the issuers the Commission expects to switch, that is on the order of $394 million in aggregate annual savings.4 For a large-cap company those figures are background noise. For an emerging growth company or a smaller reporting company they can represent the difference between funding another engineer, another trial, or another product line and not doing so.

Lowering that fixed cost matters beyond any single balance sheet, though it should be kept in proportion. The number of U.S. public companies has fallen markedly since its mid-1990s peak, and capable firms now stay private far longer than they once did. The largest driver of that shift is the abundance of late-stage private capital, which lets a company raise enormous sums without ever facing public-market discipline, and no reporting reform will change that by itself. What the Commission can address is the part within its control. The recurring cost of being public does not scale down for a smaller issuer the way its revenue does, so the same obligation that is trivial for a large company is a real constraint for a small one. A semiannual option will not pull a company public on its own, and I do not suggest otherwise. It removes one disincentive at the margin, and it removes it precisely where the burden bites hardest. For the retail investors a fiduciary like me serves, anything that widens the universe of investable public companies, even modestly, helps counter a market in which the fastest growth is increasingly captured in private hands before ordinary savers can reach it.

III. Relief from Short-Term Pressure

A quarterly cadence does not merely cost money. It shapes behavior. Survey research has long found that a large majority of executives will sacrifice a measure of long-term value to hit a short-term earnings target.5 Theoretical work reaches a compatible conclusion, showing that

3Semiannual Reporting, supra note 1, Economic Analysis (estimating average annual direct compliance costs of approximately $330,000 per issuer for three quarterly reports on Form 10-Q, against approximately $132,000 per issuer for a semiannual report on proposed Form 10-S).

4Id. (assuming, for purposes of computing aggregate effects, that 20 percent of roughly 5,976 affected issuers, or 1,195 issuers, would elect semiannual reporting, the Commission estimates aggregate annual cost savings of approximately $394,350,000 against approximately $158,821,000 in aggregate annual costs).

5John R. Graham, Campbell R. Harvey & Shiva Rajgopal, The Economic Implications of Corporate Financial Reporting, 40 J. Acct. & Econ. 3 (2005) (reporting, based on a survey of roughly 400 executives, that a substantial majority would sacrifice a small amount of long-term value to meet short-term earnings benchmarks).

more frequent mandatory reporting can itself intensify managerial short-termism.6 When management's calendar is organized around defending a number every ninety days, the temptation to defer maintenance, trim research, or manage earnings is structural rather than personal.
This is, after all, a principal reason so many founders prefer to remain private. They want to run the business for the customer and the long arc of the enterprise, not to perform for a quarterly audience. The proposal lets a public company recover some of that orientation without leaving the public markets. The point is not that quarterly information is worthless. It is that the optimal reporting frequency is a judgment, and the firm and its owners are better placed to make that judgment than a one-size rule written for every issuer at once.
IV. A Measured Step on the Cost of Being Public
There is a broader policy dimension as well, and it is one of proportion as much as principle. Regulatory cost is not free, and it is not evenly borne. A fixed compliance obligation falls hardest on the smallest and youngest issuers, which have the fewest people to absorb it, because the cost does not shrink as the company does. Over time, costs of that kind tilt the decision at the margin toward staying private rather than going public. This proposal will not reverse that tide on its own, and I do not claim that it will. It is one sensible step, the removal of a single recurring cost that the modern disclosure system has, in large part, already made redundant. The Commission has framed the proposal in just those terms, as part of the Chairman's stated agenda to make initial public offerings attractive again and to encourage companies to go and stay public.7 Properly understood, the change is not a loosening of investor protection. The substantive protections remain fully intact. It is the pruning of a procedural redundancy, undertaken where its cost is least justified and most keenly felt.
That last point deserves emphasis because it answers the instinct that less reporting must mean less protection. Since semiannual reporting was last permitted in 1970, the Commission has built an entire architecture of timely disclosure around it. Form 8-K now compels disclosure of material events within four business days, Regulation FD bars selective disclosure, and earnings
6Frank Gigler, Chandra Kanodia, Haresh Sapra & Raghu Venugopalan, How Frequent Financial Reporting Can Cause Managerial Short-Termism: An Analysis of the Costs and Benefits of Increasing Reporting Frequency, 52 J. Acct. Rsch. 357 (2014).
7Statement on Proposing Release for Semiannual Reporting, Chairman Paul S. Atkins (May 5, 2026) (describing the proposal as part of the Chairman's “Make IPOs Great Again” agenda to incentivize companies to go and stay public).

releases furnished under Item 2.02 are widely available. Investors today are not waiting six months to learn what matters. They learn of material developments promptly, through channels

that did not exist when quarterly reporting became mandatory.

V. A Fair Word on the Principal Concern

Less frequent reporting can widen the information gap between disclosures. Research finds that information asymmetry tends to grow across a reporting period until the next filing resets it, and that semiannual cadences are associated with somewhat greater asymmetry than quarterly ones.[8] In practice this can mean larger price gaps and longer price drift, because news that would have been priced in gradually instead arrives in fewer, larger steps. A related concern is that accountability is delayed, since investors receive fewer interim signals with which to monitor management. Both concerns are genuine, and the Commission is right to study them.

They are, however, bounded and largely manageable. The asymmetry concern is itself a function of the same information gap, not a separate harm, and it is mitigated wherever alternative data, analyst coverage, and active trading interest exist, which is to say in the very names where it would otherwise matter most. Just as important, the regime is elective. An issuer whose shareholders would punish a wider information gap will simply keep reporting quarterly, exactly as the UK experience predicts. The companies likely to elect semiannual reporting are disproportionately those whose value is not revealed quarter to quarter in the first place. The concern is real at the margin, but it does not outweigh the benefits, and the choice architecture of the proposal channels issuers toward the cadence their own investors demand.

VI. Conclusion

Taken together, the case for the proposal is strong. It restores a sensible choice to issuers and their investors, it lowers a fixed cost that bears most heavily on the smaller and newer companies our markets need, it relieves a quarterly pressure that demonstrably distorts management behavior, and it does all of this without disturbing the timely, antifraud-backed disclosures that genuinely protect investors. The chief objection, a wider information gap, is real but limited, and the elective design of the rule lets the market correct for it issuer by issuer. For these reasons I respectfully urge the Commission to adopt the proposed amendments. I thank the staff for the care evident in the release and appreciate the opportunity to comment.

Jeff Sebastian — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Jeff Sebastian Affiliation: Jun. 17, 2026 Jeff, small business owner, MD. In a world where we have access to every piece of information, why would we want less info from the companies that we are investing in? It may save those companies from some extra work, but consumers need this info to make accurate investing decisions.

As a publicly traded company, they have an obligation to make data available to the public.

Narrow the gap between insider trading and average Joe investor, not make it further apart!

Regards,

Jeff Sebastian

Jennifer Eastes — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Eastes Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Recent proposed changes at the SEC to reduce reporting by public companies holds the potential to severely limit the information retail investors receive from companies. While companies should be taking a longer term view in their business planning, they cannot be trusted to do so. Quarterly reporting is one way that companies have some form of accountability.

there seems to be a real move to disadvantage retail investors. Recent changes to index funds to allow no waiting period for IPOs is also going to leave retail investors holding the bag. The SEC needs to do more to protect the market, not less.

Jennifer Hart — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Hart Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
My investments are my only retirement security; I NEED to be able to see what's going on EVERY quarter in order to make the best and most timely decisions regarding my investments: It is my future!

Jennifer Hatfield — Jun 17, 2026
Subject: S7-2026-15 From: Jennifer Hatfield Affiliation: Jun. 17, 2026 Jennifer Fairman Hatfield . I am a retired estste planning office manager. I see how the rich take unfair advantage of tax loopholes so they pay less than the hourly wage employees. Keep pressure on the CEOs to be honest.

Jennifer Hutcherson — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Jennifer Hutcherson Affiliation: Jun. 17, 2026 In a world where technology is advancing at an unprecedented pace and access to information has never been greater, why are we considering moving backward on transparency? Financial markets function best when investors have timely access to information. Reducing reporting requirements from quarterly to twice yearly seems less like progress and more like a step back to a less transparent era.

While other nations continue to modernize, innovate, and strengthen their competitive positions, we risk handicapping ourselves by providing investors with less information and less accountability. We already struggle to remain competitive in areas such as education and other key performance metrics. Should we also weaken the financial transparency that helps support investor confidence and economic growth?

If history suggests that reduced disclosure can lead to lower valuations and weaker returns, especially for ordinary investors, then this proposal deserves serious scrutiny. Progress should mean leveraging technology to provide better information, not less.

Jermal Lecounte — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jermal Lecounte Affiliation: Jun. 17, 2026 Subject: Opposing the Proposed Elimination of Quarterly Disclosures (Form 10-Q)
To Whom It May Concern,
I am writing to express my strong opposition to the SEC's proposal to allow companies to switch to semiannual reporting.
Market statistics, financial conditions, and economic data change constantly. Waiting six months for an update would severely distort market reality and turn data-driven investing into guesswork. Retail

investors rely heavily on regular, 90-day checkpoints to accurately track market volatility, assess risk, and maintain the most precise picture possible of a company's financial health.
Reducing the frequency of these disclosures will only widen the information gap between institutional insiders and everyday investors. I urge the Commission to maintain the current quarterly reporting standard to ensure a fair, transparent, and accurate market for all.
Sincerely,
Jermal Lecounte

Jerry Sandefur — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jerry Sandefur Affiliation: Jun. 17, 2026 Subject: My view on Rule S7-2026-15
To the Securities and Exchange Commission:
Honestly, I think this rule is a big step in the wrong direction and I hope you'll hear me out.
Trust in big corporations and financial elites is already fragile at best. Dialing back transparency and making it harder to hold people accountable is only going to make that worse—and I don't think any of us want that. It sends a message that the system is rigged, even if that's not the intention.
For regular retail investors like me, the information gap is the real problem. We don't have analyst teams or insider connections. If companies don't have to share as much, we're basically flying blind. That doesn't level the playing field—it tips it even further toward the big guys. And the result? We'd feel forced to pay expensive money managers just to avoid getting burned, which is ironic when tech has finally made it possible for ordinary people to manage their own money pretty well.
I also want to flag something I think gets overlooked: younger investors and minorities. A lot of us have jumped into the markets in the last 5 -10 years, and clearly it's not about getting rich quick (we've stuck around for 5+ yesrs now). It's more like—what else are we supposed to do? With AI changing everything and job security feeling shaky, investing feels like one of the only ways to build some kind of safety net. But when you make the markets more opaque, it just adds to the anxiety. It feels like another door slamming shut, and honestly, that stings. It really makes one think, "Is that

their intent?"
We're already seeing faith in institutions drop fast. Please don't accelerate that. Keep the rules clear and transparent—it helps us help ourselves, and it's better for everyone in the long run.
Thanks for reading.
Jerry Sandefur

Jesse G — Jun 17, 2026
Subject: S7-2026-15 Comment From: Jesse G Affiliation: Jun. 17, 2026 We've all seen what deregulation causes. 2000, 2008, 2020, and now.. Deregulation, allowing companies to escape scrutiny, never ends well.

Companies should be subjected to MORE mandatory reporting, not less. IN addition to quarterly reporting they should be required to disclose negative news within 2 weeks of discovery, and they need to be held to projections. Insiders should only be allowed to sell stock or exercize stock options for a period of two weeks starting two weeks after every disclosure. (So weeks 3-4 after disclosure) so that they can't quietly sell stock before bad news hits, or before the market has had a chance to adjust.

Start holding big companies accountable.

Jesse Gilleland — Jun 17, 2026

Subject: S7-2026-15 Comment From: Jesse Gilleland Affiliation: Jun. 17, 2026 We've all seen what deregulation causes. 2000, 2008, 2020, and now.. Deregulation, allowing companies to escape scrutiny, never ends well.

Companies should be subjected to MORE mandatory reporting, not less. IN addition to quarterly reporting they should be required to disclose negative news within 2 weeks of discovery, and they need to be held to projections. Insiders should only be allowed to sell stock or exercize stock options for a period of two weeks starting two weeks after every disclosure. (So weeks 3-4 after disclosure) so that they can't quietly sell stock before bad news hits, or before the market has had a chance to adjust.

Start holding big companies accountable.

Jesse Kircher — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jesse Kircher Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Do not allow companies to extend the reporting time frame. As an investor, I have a right to have earnings and losses reported in a timely manner, so I can withdraw my cash if I so choose. Allowing corporations to fleece investors is a wrong direction to go in. Please stand on the right side of this issue, and keep the current reporting regulations. Thank you for your consideration.

Jesse Schmidt — Jun 17, 2026
Subject: S7-2026-15 Comment From: Jesse Schmidt Affiliation: Jun. 17, 2026 Quarterly reports keep shareholders informed. The only reason to not require them is keep shareholders in the dark. The law should not be changed on this.

Jessica Miller

Jessie Allen — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jessie Allen Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Quarterly disclosures are a tool that I read via electronic mail. I am not an expert in investing, just an average American who is trying to do the best thing for my future self. I only have access to limited information. I read and make decisions based on the data I read.
I would ather know more than less information. Please do not take away this standard tool.
Thank you-
Jessie

Jessie Lee — Jun 17, 2026
Subject: S7-2026-15 From: Jessie Lee Affiliation: Jun. 17, 2026 We have the instantaneous ability to view the stock market all 24 hours of the day, making quarterly reporting already a generous bare minimum. How about we INCREASE reporting to monthly, so investors and market watchers can more accurately chart the patterns and trends? As an employee, I have mandatory BIWEEKLY meetings with my manager, to submit progress reports on my performance. Reducing reporting by

half clearly leaves the public to question, Just what are they planning on hiding? We the people will always demand MORE transparency, and should any of these dubious characters/proven robber barons attempt to skirt that obligation, then they only demonstrate the kleptocracy in plain sight that we will keep pushing to stop and dismantle. I did not work my entire life making an honest dollar for 40-60 hours a week just to live in this obscene decay in laws that keep tilting towards the few avaricious up top who extract, hoard, and control all that was produced from OUR painstaking labor. Do the right thing as regulators who shape our lives, to retain sustainable wellness and financial security for We The People. Do not succumb to yet another policy overhaul whose sole function is to bypass accountability—Do not feed into this corrupt, un-American, neo-feudalist coup.

JL Johnston

Jesus Silva — Jun 17, 2026
Subject: S7-2026-15 From: Jesus Silva Affiliation: Jun. 17, 2026 The fact that we are quarterly is the kindness we extend to large companies. It should be constant accountability, but we extend quarterly to not put a burden on the people who are responsible for massive portfolios. But how can we possibly expect the people making decisions to make responsible trustworthy decisions based on five month old data. All this will do is shield the mega rich from accountability because there is no way they could have known to ask for the right days to solve problems they didn't know were brewing. As a C-Suite IT director, I personally do not know all the ways my operating decisions are going to impact HR or legal or even the general workforce, until I have reviewed the service needs of the people affected. That includes the financial impact of the decisions I make.

Jo Ann — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Jo Ann Affiliation: Jun. 17, 2026 Jo Ann Kennedy. The quartly reporting needs to stay in place to ensure transparency, verified data and reduce fraud. Quarterly reporting allows for the current valuation of a company and provides check points that reduces insider trading. It also establishes regular shareholders the ability to participate in the stock market.

Jo Anne Wasson Honeywell — Jun 17, 2026
Subject: S7-2026-15 Comment From: Jo Anne Wasson Honeywell Affiliation: Jun. 17, 2026 Keep the Quarterly reporting. Every company should have accountability for the way there company is run CEO's are NOT ABOVE THE LAW.

Jo Hafford — Jun 17, 2026
Subject: S7-2026-15 Comment From: Jo Hafford Affiliation: Jun. 17, 2026 My name is Jo Hafford, and my father once ran the largest independent financial advisory firm north of Boston. He sold the business after I decided not to follow in his footsteps because we both saw the freight train coming with the last round of deregulation - Graham-Leach-Bliley. Without fail, every time reporting and regulatory standards for equities have been relaxed,the major banks, accounting firms, and trading houses on Wall Street have immediately demonstrated why they can't be trusted and why those rules must not be relaxed. This is no different. Imagine if Enron had three more months before the house of cards can crashing down. Or Bear Stearns. Is there any reason to believe those leaders would have suddenly grown a conscience rather than use that extra three months as runway to shovel more ill gotten gains into their pockets? Institutional investors have the resources to do their own digging, but retail investors do not and for millions of Americans whose primary exposure to these investments is their retirement savings, it's impossible to know if fund companies are doing proper due diligence in the absence of quarterly reporting or just relying on the same good ol boys network that has time and again imperiled the entire global economy, and should not be trusted to do the same here. There is no good reason to eliminate this requirement. No one invests better with less information, and the amount saved by publicly traded company is less than a rounding error. Do not do this.

Jo Wurz — Jun 17, 2026

Joann Me — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Joann Me Affiliation: Jun. 17, 2026 Please, for the sake of our country and it's citizens, please continue Quarterly Reporting.

We have been bombarded with ever increasing prices and the cost of daily life, most of us without a corresponding increase in income.

Although I am retired now, I started my career late and I am still making payments on my school loan to the tune of $2300 a month.
My mortgage has increased from $1011/month just 5 years ago to over $1,200/month now thanks to tax and insurance increases.

In addition to those costs, a large tree fell on the back of my house destroying it in Jan. 2021.
They started rebuilding it that May. In June, June 24 actually, my husband had a cardiac event and subsequently passed away leaving me widowed.

All these increased costs during the time period right after my spouse died, leaving me to manage all the household expenses on one income. An income that is not adequate since I am retired. I cannot even go back to work because I allowed my board certification to expire thinking I would no longer need it and the cost to study and recertify was in the thousands. That basically removes me from any position consideration. Physically I am no longer able to work in a regular setting . To to out off, the construction company bolted out before finishing the repairs and I am living in an unfinished construction zone. Hiring someone to fix or finish what they left undone has become impossible.
It is impossible for me to continue drawing from the little retirement fund I have left to live this way.

Please SEC, continue Quarterly Reporting requirements!
I appreciate your attention to this matter.
Thank you.

Joann D'Aprile-Lubrano, D.O.
Kingsport, TN

JoAnne Matty — Jun 17, 2026
Subject: S7-2026-15 Comment From: JoAnne Matty Affiliation: Jun. 17, 2026 To Whom It May Concern:
I'm an investor and I rely on quarterly reports to make decisions about my retirement savings. I rely on quarterly information to make those decisions, and longer gaps create an unfair advantage for corporate insiders. Besides, "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates. And finally, the savings to companies aren't worth the cost to me. My investments will take the biggest hit, not corporations.

Respectfully,
JoAnne Matty

Subject: S7-2026-15 Comment From: Jody Hartzell Affiliation: Jun. 17, 2026 You need to listen to the citizens of this great country. It is very important for filings to be made quarterly. Enough can happen in a three month period let alone a six month period. This nation deserves transparency in our corporations!

Judy Zoeller

Jody Saylor — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Jody Saylor Affiliation: Jun. 17, 2026 To whom it may concern:

Quarterly reporting must be maintained. In an era of global accessibility and instant information flow, the expectation of transparency has never been higher — reducing disclosure frequency would move us in exactly the wrong direction.

The move away from frequent reporting in the 1950s and 60s demonstrated exactly what happens when investors are left in the dark. Markets didn't thrive — they struggled. There's no reason to believe the outcome would be different today, and every reason to believe it would be worse given how quickly information — and misinformation — now travels.

Quarterly reporting isn't a burden on companies. It's the foundation of the trust that makes public markets function.

Joe Velasco — Jun 17, 2026
Subject: S7-2026-15 Comment From: Joe Velasco Affiliation: Jun. 17, 2026 The proposed change erodes overall market efficiency as pricing will stray further away from corporate performance and be MORE driven by speculation. Change will also increase the advantage people with insider knowledge have in the marketplace, since their knowledge can be leveraged over a longer period of time before public disclosure. Quarterly reporting offers a reasonable balance between the overhead of reporting, and the necessity of transparency to drive market decisions. Shifting to a 6 month cadence would be like deciding that an aircraft with airspeed and altimeters that only update every 2 minutes, should operated on 4 minute cycle. The difference can drive massively harmful assumptions.

Joe@headstrong.net — Jun 17, 2026
Subject: S7-2026-15 Comment From: Joe@headstrong.net Affiliation: Jun. 17, 2026 Please continue to require quarterly reporting. Retail stock buyers need this information.

John Beach — Jun 17, 2026
Subject: Comment on S7-2026-15 From: John Beach Affiliation: Jun. 17, 2026 Retain quarterly reporting. America under Donald tRUMP is messed up enough with his emphasis on enacting many changes in the financial field and this change in reporting frequency is not an action that will be a good thing for the people of America who are already being treated as second class people. The quarterly reporting has worked well since it was begun and a change back to a semi-annual reporting of the 50’s, 60’s will have devastating effects on the American population. RETAIN QUARTERLY REPORTING !!!!

numbers are going in the right direction. I believeinformation and transparency are key to a more secure investing environment. The most important asset in any investment is the ability to keep track of it closely like the day traitors wanna know what's going on with their investments. Maybe required email reporting and if not an extra fee for the paperwork to be sent by usps. I believe less oversight reporting undermine's confidence in the system. Please vote to keep the scheduled quarterly statements coming…… best regards , John Jay Brown.

JOHN LINDSTROM — Jun 17, 2026
Subject: Comment on S7-2026-15 From: JOHN LINDSTROM Affiliation: Jun. 17, 2026 To the SEC,

As an individual investor, it is critical to have continuous reporting of information. We as shareholders are the owners of the corporations and need to be able to make decisions based on constant and accurate reporting from corporate executives. Quarterly reporting helps ensure that we have the needed information to make the best decisions for ourselves and the companies we own. Therefore, I strongly urge the SEC to not return to semi-annual reporting by the companies. There were good reasons it was ended more than 70 years ago, and with the ability today to control, skew and misinform via instant technology it is critical quarterly reporting remain.

Sent from my iPhone

John M — Jun 17, 2026
Subject: Comment on S7-2026-15 From: John M Affiliation: Jun. 17, 2026 Please keep company reporting quarterly, keep it relevant! In this fast paced economy, things change quickly based on events good and bad. Reporting quarterly keeps the status relevant and hopefully accurate. John Morgan — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: John Morgan Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
As an individual investor, I am writing to oppose proposals to shift corporate reporting from a quarterly to a semi-annual cycle.
Quarterly reports are often my primary window into a company's actual performance. Reducing that frequency would leave retail investors like me relying on stale data for months at a time, while insiders and well-resourced institutions retain access to more current information through other channels. This asymmetry would put ordinary shareholders at a significant disadvantage when making buy, hold, or sell decisions.
I'm also concerned about overvaluation risk. Stock prices can drift further from fundamentals when timely earnings checkpoints are removed, inflating bubbles that may not correct until a six-month report reveals the truth—often abruptly and at investors' expense.
Fraud risk is equally troubling. Quarterly filings create regular accountability checkpoints. Extending that interval gives bad actors more time and more cover to misstate financials before detection.
I urge the Commission to preserve quarterly reporting to protect investors like me and maintain trust in U.S. markets.
Respectfully,
John Morgan

John Nowosad — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: John Nowosad Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission: Quarterly disclosures are important because they inform the retail investor about the current revenue and profits that a company is making. Why would the SEC want to require less reporting from corporations? Your purpose is to protect the retail investor's interests and Quarterly disclosure are apart of that because they are of interest to the retail investor. For what purpose would the SEC purpose such an idea in the first place? This is very suspicious. I do not blindly invest and this proposal would blindly the retail invest for six months. Do you have a problem with the retail investors making money. This proposal is in the opposition direction of what should be proposed. All this being said I believe more profit and revenue reporting should occur for the largest corporations and if the reporting requirements are too much for small starting companies then they can report less but only be allowed to trade their stock on certain days of the week. Therefore if they want to report less then they get limited trading hours.

John Vanderkin — Jun 17, 2026
Subject: S7-2026-15 Comment From: John Vanderkin Affiliation: Jun. 17, 2026 I strongly oppose an option to lift the quarterly filing requirement. As an investor, I use this timely information to make

investment decisions.

Additionally, removing the quarterly requirement creates a large opportunity for corporations to hide information that will have a large negative impact on individual investors.

The costs of quarterly filing do not outweigh the negative impact this change would have. Keep the quarterly filing requirement in place and enforced.

John Vanderkin
Retired, former VP Operations for an IT support company

John Vanover — Jun 17, 2026
Subject: S7-2026-15 From: John Vanover Affiliation: Jun. 17, 2026 John Vanover, retired, 77 years old, in Alaska. The whole idea of semi annual versus quarterly reporting is stressful!!
Semi annual reports require too much time to elapse between investor decisions. What is happening directly affects investor decisions. Semi annual reports don't allow the "average" investor to keep up. Thank you for your time.

John Vanover

Jonathan Bowie — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Jonathan Bowie Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Retail investors need public quarterly filings because, unlike institutional investors with access to management teams, private briefings, and armies of analysts, they rely almost entirely on public disclosures to make informed buy, hold, or sell decisions. Without the 10-Q, a retail investor has no reliable, standardized way to assess whether a company's revenue is growing or shrinking, whether margins are compressing, how much debt is on the balance sheet, or whether management's narrative in earnings calls is actually supported by the underlying numbers. The quarterly cadence matters specifically because a full or half year is too long a company can deteriorate significantly in two or three quarters, and without interim disclosures, retail investors would be the last to know, effectively subsidizing better-informed insiders and institutions. In short, quarterly filings are the primary leveling mechanism that gives everyday investors a fighting chance in a market otherwise tilted toward those with privileged access to information.

Joseph Lowery — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Joseph Lowery Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission,
Please don't go through with the new proposal. It would keep investors like me from knowing vital investing information. I rely on the information that is provided to make informed investment decisions.

Joseph Ray — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Joseph Ray Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:

This proposal is very alarming from my perspective. Historically, providing less data and transparency to the public doesn't lead to positive outcomes for anything, rather it produces the opposite effect.
I have been investing and trading for over a decade now and one of the key pieces of information I rely on is quarterly reports. Without those reports I am left in the dark.

In this age of exponential growth and progress it feels like a major step backwards to be returning to standards that existed over 50 years ago. Positive developments and risks can appear at a moments notice, if anything we should be receiving more data, not less.

Thank you for your time, I ask that you strongly reconsider allowing this proposal to go through as it will lead to a major negative disruption in the markets.

Joseph Sofranko — Jun 17, 2026
Subject: S7-2026-15 From: Joseph Sofranko Affiliation: Jun. 17, 2026 Keep it reporting quarterly. Do not allow repeat executive corruption!

Joseph Stephen — Jun 17, 2026
Subject: S7-2026-15 Comment From: Joseph Stephen Affiliation: Jun. 17, 2026 Quarterly reporting is important to keep companies honest. Every time reporting requirements are relaxed, companies tend to break the law. We had the Wall Street crash precisely because of corporate dishonesty. Do not relax the rules on quarterly reporting.

Joyce Lee — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Joyce Lee Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
As an individual investor, I oppose the SEC proposal to reduce the frequency of public company reporting from quarterly to semiannual. Regular financial disclosures help me make informed decisions and provide transparency into a company’s performance and risks. Reducing reporting requirements would leave investors with less timely information and make it harder to identify financial problems before they become serious. While I understand the goal of reducing costs for companies, investor protection and market transparency should remain a priority. Public companies benefit from access to capital markets and should continue providing quarterly updates to the investing public.

JR Graham — Jun 17, 2026
Subject: S7-2026-15 From: JR Graham Affiliation: Jun. 17, 2026 The Enron scandal ruined the lives of many hard-working men and women who saw their pensions disappear through greed. I don't believe quarterly reporting is too onerous for any entity. Like any required reporting, it is planned for and produced on time. I like the quarterly format much better than semi-annual or annual because it will reveal issues and get them rectified in a very timely manner. Having written and compiled quarterly reports, I know it can feel like one is always writing them with no break. That is how it

should be. The bigger the company, the bigger the team writing the reports. It is just a part of doing business. Employees have been promised their pensions and have added their own sweat into them. They deserve to know that their company is sound and so are their pensions.
Janet Graham

Julia Rapczynski — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Julia Rapczynski Affiliation: Jun. 17, 2026 To Whom It May Concern,

I am writing to express my strong support for maintaining the current quarterly reporting requirements.

I am a mental health therapist in Northern Vermont and have been investing for 35 years. Working in community mental health, I have relied on these investments to secure my retirement. It is vital that no changes are made that would jeopardize the retirement funds of individual investors like myself. Altering these protections would be unfair and unethical.

I urge you to keep the existing reporting structures in place to ensure continued transparency and security for all investors.

Sincerely,

Julia Rapczynski

Subject: S7-2026-15 Comment From: Julie Ochoa Affiliation: Jun. 17, 2026 There should not be any six month waiting. This is ridiculous. This is absolute corruption. Do your job! The leasing of America needs to stop

Respectfully Submitted,
Julie Ochoa, M.S.

Julie Ray Taxpayer and Investor — Jun 17, 2026
Subject: File No. S7-2026-15 From: Julie Ray To those voting to change the current quarterly reporting to semi annual… I am strongly opposed to this proposal. As an investor not privy to insider information, I feel having to wait 6 months for a report, puts the small investor like me, at a great disadvantage. I understand there is a cost to compiling these reports, but in this age of technology, it is minimal and not really a valid argument. To force the retail sector to make “critical financial and informed decisions” without access to this information in a timely matter is unacceptable. Please do not pass this!

Julie Shelton — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Julie Shelton Affiliation: Jun. 17, 2026 Quarterly reporting is necessary for multiple reasons: It allows investors the information to make better decisions; it prevents corporations from hiding unscrupulous or poor decisions; it
gives a better picture of what is actually going on with a corporation's practices and finances, allowing investors more information and keeping them safer from losing money. The fact that this is even being considered, after the reasons the rule was created
in the first place, points to the current administration's penchant for deception and grift at the sake of the common man's interests. The quarterly reporting must continue to keep investor money safe.

Julie Small The Motley Fool Community — Jun 17, 2026
Subject: File No. S7-2026-15 From: Julie Small The companies we trade are not being held back from greatness by the obligation to file four reports a year. The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well. Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize.

Julie Spear — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Julie Spear Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I am a retail investor, making decisions about the future of my retirement fund by relying on accurate and timely financial data supplied by corporations.
Reducing quarterly reporting to just twice a year protects insiders and leaves the general public vulnerable to major financial changes they cannot see until it is too late.
I do not want to lose my retirement savings because of a weakening of SEC rules! I urge you to continue to require mandatory quarterly reporting.

Julie Swindells — Jun 17, 2026
Subject: S7-2026-15 From: Julie Swindells Affiliation: Jun. 17, 2026 Many of us have to submit quarterly tax paperwork to IRS, this should be the same timeframe for CEO’s to be held accountable to submit quarterly reporting.

Karen Osborn — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Karen Osborn Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I oppose this proposed rule because I believe it would ultimately harm individual investors rather than protect them. The proposal appears likely to increase complexity, reduce market efficiency, and create additional costs that will eventually be passed on to everyday investors.
As a retail investor, I rely on fair, competitive, and transparent markets. Regulations should encourage investment, innovation, and broad participation while protecting investors from fraud and abuse. This proposal risks creating unintended consequences that could limit investment opportunities, increase compliance burdens, and make it more difficult for investors to achieve their financial goals.
I encourage the SEC to carefully consider the potential impact on ordinary investors and to pursue alternatives that strengthen investor protections without reducing market access, competition, or efficiency.
Stop hurting Americans!
Karen

Karen Russman — Jun 17, 2026
Subject: S7-2026-15 Comment From: Karen Russman Affiliation: Jun. 17, 2026 Quarterly reporting was instituted for a reason after scandals like Enron to help protect consumers. There is no valid reason to change it to semiannually except to benefit big business and decrease oversight.

Karen Russo — Jun 17, 2026
Subject: S7-2026-15 Comment From: Karen Russo Affiliation: Jun. 17, 2026 Quarterly reporting should always stay. Companies, humans are all about corruption and greed currently and making them less responsible for showing their books will only increase the likelihood of corruption. People in the US are tried of companies being more important than the humans they serve.

Sent from my iPad

Karen Trainor — Jun 17, 2026
Subject: S7-2026-15 Comment From: Karen Trainor Affiliation: Jun. 17, 2026 There is no logical reason for extending the SEC review of a publicly traded company's records. People have the right to know the stability of their investments, how the company is being managed, income vs debt ratio

and the salaries and perks given to those responsible for financial oversight. People rely on their investments to fund daily living, education, healthcare and retirement therefore they need to have reliable and current reckoning of continued or potential growth and losses or failures. Extending the review to 6 months puts investors at significant risk and could eventually impact their ability to sustain themselves and their families. Investors need to be able to quickly adjust their investment strategies and corporations need timely reviews to reduce corruption.

Karen Trainor
Retired, Cushman & Wakefield, Procurement Manager

Karen Vinyard — Jun 17, 2026
Subject: S7-2026-15 From: Karen Vinyard Affiliation: Jun. 17, 2026 Karen Vinyard, retired In Florida, please leave reporting to quarterly, we the public deserve more oversight, NOT LESS! We need to know who's ripping us off. We need quarterly reports to help keep lying cheats honest.
Quarterly reporting is a necessity, leave it alone.
Shut the windows of opportunity for their lies, cheating, hiding assets, and stealing our money, all the while they're getting so much richer, they are laughing at us poor peasants down on the lower rungs of life trying to scrape out a living on their scraps.

Karen Walker — Jun 17, 2026
Subject: S7-2026-15 Comment From: Karen Walker Affiliation: Jun. 17, 2026 My father was the auditor who put his name to public financial records of publicly traded companies, so the necessity of keeping current and finding problems before they become so big that companies feel the need to hide them isn't lost on me as an investor. Remember Enron and Arthur Andersen. Keep mandatory reporting quarterly so my CalSTRS pension managers and my financial advisor can do their jobs diligently. Respectfully, Karen Walker, independent small business owner, retired teacher and California voter

Karen Youngman — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Karen Youngman Affiliation: Jun. 17, 2026 Karen Youngman, retired IT professional. HILLSBOROUGH NJ.

This is scary to me. I retired almost a year ago. Slightly early as I am dealing with a medical diagnosis. Since I retired the cost of everything has skyrocketed. My property taxes up 24%! Energy bills are astronomical. I actually look at my Quarterly Statements. If I don't see them often enough I can't react fast enough and may lose money that I can't afford to. I need one more year for Medicare eligibility, I have more medical expenses than I used to. Do what's right for the people, there is not enough of that going around anymore. My investments are my lifeline. Who knows what will happen with SS.
History already showed this isn't a good idea

Karin Williams — Jun 17, 2026
Subject: File No. S7-2026-15 From: Karin Williams As an individual investor, I oppose this change. Under the proposed rule, individual investors would have less information with which to make informed decisions. At this time in history, when AI is making accounting and reporting easier, less costly and less burdensome than ever before, there is no reason to change reporting requirements for public companies. AI is making it easier for large investment firms to analyze markets and make decisions. With AI-driven trading, markets will move faster than ever before. Small investors need the transparency provided by quarterly reporting to keep pace.

Karissa Stinson — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Karissa Stinson Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Please keep things as open as they currently are and fight the SECs proposal.

Karl Boerger — Jun 17, 2026

Karl Stoll — Jun 17, 2026
Subject: S7-2026-15 Comment From: Karl Stoll Affiliation: Jun. 17, 2026 This is irresponsible and obviously with none of the investors interests in mind. A lot can change over half a year.

Karla Mugler — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Karla Mugler Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I am old enough to remember when the SEC provided reporting only every six months. My father was an economics professor at Kent State University who was frugal and started to invest some of my parents' savings in the stock market. Once the reports were provided quarterly, he had much more information to go on, as he researched companies and invested. While my parents did not amass a fortune--university professors didn't earn much from the 1950s through the 1970s, he exposed us to the importance of investing in companies that were making a difference to society. The more information he had, the better decisions he was able to make regarding where to invest or move his funds.
My husband and I have investments in real estate, the stock market, and in bonds. We want to have the most current information that is possible to make decisions about where we place our funds. This proposal would NOT be the least bit helpful to us. The stock market has grown over the past 50 years and is much healthier today because of the investment of a range of people--not just business tycoons. One wouldn't want a physician to only check on a diabetic or cardiac patient every six months--blood sugar levels, EKGs, and other tests are done at least quarterly as a matter of course to insure that the patient stays healthy. We want to see the health of our investments on a quarterly basis, too, so that if adjustments are prudent, we can make them.
Do Not implement this proposal!
Karla Treckel Mugler, Ph.D.

Katherine Saldana — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Katherine Saldana Affiliation: Jun. 17, 2026 Hello,

I am writing to formally express my strong opposition to the proposed changes regarding quarterly reporting requirements. As a professional in research coordination at a Children's Hospital and a diligent private investor, I believe that frequent and transparent reporting is essential for maintaining a clear understanding of the current business sector.

Consistent quarterly updates are vital to ensure that underperformance is not obscured and to prevent the market from becoming artificially inflated. Maintaining these rigorous standards is crucial for investor protection and overall market integrity.

I appreciate your time and consideration of these concerns.

Best regards,

Katherine Saldana

Katherine Smith-Brooks — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Katherine Smith-Brooks Affiliation: Jun. 17, 2026 Washington wants to let every public company stop reporting its results each quarter and disclose just twice a year. We tried this once, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of your life savings. KEEP QUARTERLY!

History makes it obvious that quarterly financial reporting supports stronger economic growth. My personal perspective is based on my experience of meeting with my 403b investment professional quarterly. We use the information to determine if we need to rebalance any parts of my portfolio. As a result, as a retired educator, I've been able to have a more secure retirement that I would have if I had if I had to rely on my low yield pension that has not kept up with inflation. I hope that the SEC will see the importance of retaining the current system of quarterly reports to the average investor. Thank you for considering my remarks.

Kathleen Bunting Hoey — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Kathleen Bunting Hoey Affiliation: Jun. 17, 2026 Do not change the reporting requirement to twice a year rather than quarterly. It encourages fraud and malfeasance. We tried it before and it was a disaster

Keaton Williams — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Keaton Williams Affiliation: Jun. 17, 2026 My name is Keaton Williams , and I am a retail investor and small business owner from Kentucky. I strongly support maintaining quarterly reporting requirements for publicly traded companies.

Quarterly reporting provides transparency and accountability that helps ordinary investors make informed decisions. As someone who invests for my family's future and retirement, I rely on timely financial information to understand how companies are performing and whether management is meeting its commitments.

Reducing reporting frequency would make it more difficult for investors to evaluate companies, increase information gaps between large institutional investors and individual investors, and potentially reduce confidence in U.S. markets. Quarterly reports help create a level playing field by ensuring that important financial information is available to everyone on a regular basis.

While I understand concerns about short-term thinking, I believe the solution is encouraging long-term corporate leadership rather than reducing transparency. Public companies benefit from access to public capital, and regular disclosure is an important responsibility that comes with that privilege.

Please preserve quarterly reporting requirements to maintain transparency, investor confidence, and fair access to information for all market participants.

Kenny Brewer — Jun 17, 2026
Subject: S7-2026-15 Comment From: Kenny Brewer Affiliation: Jun. 17, 2026 To Secretary SEC,

I am writing to express my concerns regarding the potential public impact of your recent decisions. While this may not affect you personally, I urge you to consider the consequences of what appears to be a self-interested approach.

True due diligence is essential, and the current course of action suggests a lack of it. It seems as though a more convenient, rather than effective, path is being taken. If the task has become unmanageable, I suggest hiring adequate assistance and utilizing the budget for its intended purpose rather than for personal gain.

I ask that you be honest with us and provide an explanation as to why you believe this approach is appropriate. We deserve transparency on this matter.

Best regards,

Ken Brewer

Lane S — Jun 17, 2026
Subject: Individual Investor Opposition on File Number S7-2026-15 – Semiannual Reporting Proposal From: Lane S Affiliation: Jun. 17, 2026 Re: File Number S7-2026-15 – Semiannual Reporting Proposal

I am an individual retail investor and I oppose the proposal to allow public companies to replace quarterly reporting with semiannual reporting.

As a self-directed investor, quarterly Form 10-Q reports are one of the most important tools available to me. They provide timely, standardized, and comparable financial information that helps me evaluate the companies in which I invest.

Large institutional investors have access to analysts, management meetings, industry research, and alternative sources of information that most retail investors do not. Quarterly reporting helps level the playing field by ensuring that all investors receive meaningful financial information on a regular schedule.

Reducing the reporting frequency to every six months would decrease transparency and delay the public disclosure of important changes in a company's financial condition, risks, and operating performance. While companies would still be required to report material events, investors would receive less comprehensive and less consistent information.

I believe the benefits of quarterly reporting to market transparency, investor confidence, and informed decision-making outweigh the compliance costs associated with preparing quarterly reports.

For these reasons, I urge the Commission to retain the current quarterly reporting requirements.

Respectfully,

Lane M. Stout

Laura Kelton — Jun 17, 2026
Subject: S7-2026-15 Comment From: Laura Kelton Affiliation: Jun. 17, 2026 Laura Kelton, business owner. Transparency is everything. Corporations have had to dislose quarterly reports forever. Why so secret now. NO, the SEC has no standing authority to change the underlining principle of public transparency. Who bought the SEC off. Why is it important that the public sits in the dark now? Reporting quarterly keeps things honest. Real time information is how business work. The SEC knows this fact. Why would the SEC want to change this practice?

LAURA KLEIN — Jun 17, 2026
Subject: S7-2026-15 From: LAURA KLEIN Affiliation: Jun. 17, 2026 I would like the SEC to maintain the current standard of having CEO's sign papers saying that they have audited and know the numbers are correct - 4X/ year, instead of twice a year. They should and must personally certify their numbers every quarter, with federal prison on the line for signing a lie. This was changed in 2002 after the Enron debacle and should NOT be reduced. What has changed in these 24 years? Nothing. The signature every three months is a deterrant and a safeguard. Keep these current standards.

I have investments and don't want what happened in very recent history to happen again.

Lauren Turigliatto — Jun 17, 2026
Subject: S7-2026-15 Comment From: Lauren Turigliatto Affiliation: Jun. 17, 2026 To Whom It May Concern,

Trust in this country is at an all-time low. Individual investors need and deserve as much transparency as the companies they're invested in can supply. Closing that window from four to two times per year does exactly the opposite. It makes businesses look like they have something to hide, that they want more time to do something shady without anyone outside being the wiser - who would want to invest in that?

If that is other's position, as it is mine, then this will weaken the markets and our economy. I am a solo entrepreneur and teacher and every cent I make counts. I won't support lack of transparency where my money is concerned, especially my future savings.

The stock market is risky enough. Don't make matters worse with this proposal and keep the quarterly structure.

Sincerely,
Lauren Turigliatto

Lauretta Doyle — Jun 17, 2026
Subject: S7-2026-15 Comment From: Lauretta Doyle Affiliation: Jun. 17, 2026 Quarterly reporting is necessary for accountability. All businesses should adhere to the same rules. There is enough corruption without making it easier for the top one percent to prey on those less financially stable. Open government includes accountability for all players.

Laurie — Jun 17, 2026
Subject: S7-2026-15 From: Laurie Affiliation: Jun. 17, 2026 To Whom in May Concern,

As an attorney who teaches business ethics and the power of the Sarbanes-Oxley Act to undergraduate and graduate students at a major university, I can tell you how important mandatory, signed reporting requirements are. In fact, I don't think they're strong enough; I think there should be monthly not quarterly reporting! But lowering it to two times per year is a farce.

Filed reports, signed by corporate leaders who attest to their accuracy, cannot be replaced by typical financial document preparation done in the course of business. The accountability of that signature, of that filing, is key to ensuring proper financial and accounting practices are followed and truthful numbers are shared. The accountability that goes along with these filings ensures that laws are not broken, or if they are, that people and businesses can and will be held to the law.

Requirements such as this act are a deterrent for bad behavior, which these companies have already proven they will do time and time again if they know they can get away with it. Sadly, corporate leaders can and will cheat if they are allowed to. Lowering required filings which leaders certify contain no material untruthful facts are critical. As of April 2024, corporate penalties reached the trillion-dollar mark. According to Good Jobs First:

"Regulatory fines, criminal penalties, and class-action settlements paid by corporations in the United States since 2000 have now surpassed $1 trillion. Total payouts for corporate misconduct grew from around $7 billion per year in the early 2000s to more than $50 billion annually in recent years, according to a new report by Good Jobs First. This amounts to a seven-fold increase in current dollars — a 300% increase in constant dollars."

The High Cost of Misconduct: Corporate Penalties Reach the Trillion-Dollar Mark
goodjobsfirst.org

Investors and the public alike have a right to know that companies are acting within the law. After all, in today's economy, where corporations run every aspect of our lives and every penny that we make and spend, their behavior impacts us all.

With today's technology, including the power of AI-based tools, it is not burdensome to fulfill the quarterly requirements to report. Any company that states these requirements are unduly burdensome is hiding their true motivation.

The only people who would oppose this and advocate for less frequent reporting requirements are those who do not want to be fined and held accountable! If you are a CEO, CFO, or board member running a company ethically you have nothing to fear when you share and file this information. But if

you know that you are taking shortcuts and outright lying on your financial statements, as we have seen COUNTLESS MAJOR CORPORATIONS DO IN THE PAST, of course you would fight this level of accountability.

We cannot afford future corporate ethical lapses bringing down economies throughout the world, as we have seen in the past.

At the end of the day, corporate fraud is paid for by every day working people. We get nothing in return and we bare the cost of their bad behavior. No, we are not going back to that. We are watching what happens here, do the right thing.

Laurie Salame
US citizen, attorney, and taxpayer

Laurie — Jun 17, 2026
Subject: S7-2026-15 From: Laurie Affiliation: Jun. 17, 2026 To foster a robust environment of transparency and responsible corporate citizenship, we are proposing the implementation of a comprehensive, mandatory quarterly reporting framework for all companies. This initiative is designed to significantly enhance accountability by requiring detailed submissions that extend beyond traditional financial metrics. These reports should encompass critical areas such as environmental impact, social responsibility, labor practices, governance structures, and progress towards stated sustainability and ethical objectives. Building upon our foundational efforts, this rigorous and consistent oversight will empower stakeholders to make informed decisions, drive continuous improvement, and ensure that all entities are held to the highest standards of integrity and public trust.

Laurie

Laurie Birch — Jun 17, 2026
Subject: S7-2026-15 From: Laurie Birch Affiliation: Jun. 17, 2026 I am writing to express my strong opposition to the proposed rule change. I believe there is no need to alter the current regulations, and I urge the SEC to prioritize the protection of the public over the interests of executive management.

Having followed the actions of this agency since the era of Richard Nixon and Spiro Agnew, I recall a time when the SEC held businesses accountable. Today, it appears that publicly traded companies prioritize shareholders at the expense of their employees and the general public, while CEO

compensation has reached disproportionate levels compared to the average worker.

Your responsibility is to ensure that big businesses operate on a level playing field and adhere to the rules, rather than providing exemptions for corporate leadership. I ask that you uphold your duty to protect "we the people."

Sincerely,

Laurie Birch

Leon Mathew — Jun 17, 2026
Subject: File No. S7-2026-15 From: Leon Mathew To the Securities and Exchange Commission: I am writing to express my strong opposition to any proposal that reduces the frequency of public company financial reporting from quarterly to semiannual. Moving to a six-month reporting cycle is a step backward that harms investors and weakens market integrity. Quarterly reporting must be maintained for the following critical reasons: Mitigating Information Asymmetry: A six-month gap in financial visibility creates an information vacuum. This disproportionately harms retail investors while giving corporate insiders and institutional high-frequency traders an unfair advantage, leading to increased market volatility when data is finally released. Ensuring Timely Accountability: In today's fast-paced, technology-driven market, six months is an eternity. Quarterly reports force management to remain disciplined and provide timely course corrections. Semiannual reporting would allow material operational decay or financial mismanagement to go unnoticed for half a year. Maintaining Global Competitiveness: The transparency of U.S. capital markets is the gold standard that attracts global capital. Reducing disclosure requirements diminishes that premium, eroding trust in the reliability and dynamism of our markets. The argument that quarterly reporting promotes "short-termism" is a flawed excuse for reducing corporate accountability. Investors require more timely data to make informed decisions, not less. The Commission must uphold its core mandate of investor protection by rejecting this proposal and maintaining the quarterly reporting standard. Sincerely, Leon Mathew

Lesley Cooper — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lesley Cooper Affiliation: Jun. 17, 2026 Lesley Cooper
President, Cooper Design, LLC
Little Rock, AR

This rollback will negatively impact me as an investor and further diminish my faith in the market. I have been a faithful investor for 40 years and lately I have seen dangerous changes to the way the market has been managed. This has made me reluctant to invest further and I've started pulling back my investments and liquidating so that I can invest in safer ways. There is no reason I can see to take us back to a less transparent way of doing business unless it is to obfuscate and manipulate the market and investors. You must consider how this will impact all investors. Quarterly reporting is important for investors to feel comfortable about furthering their investments. Make choices that represent everyone, not just those with deep pockets who are clearly trying to hide market manipulation.

Leslie Cimino — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Leslie Cimino Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission,
Responsible and judicious retail investing depends on transparent quarterly disclosures. Companies who are deserving of my hard-earned investment dollars should respect the intelligence and freedoms of the retail investor. Each leg is dependent on the other: My dollars. Their disclosures. Your regulations keeping the machine humming. The result? Flourishing companies, secure investors, and trust in the federal government. It's not hard.
As average Americans, do we really need to spell this out for you? Do the ethical, moral, and right thing. Greed never wins!

Leslie Gillette — Jun 17, 2026
Subject: S7-2026-15 Comment From: Leslie Gillette Affiliation: Jun. 17, 2026 Please keep the reporting on a quarterly basis for the sake of your integrity and our trust.

Leslie Millar — Jun 17, 2026
Subject: S7-2026-15 Comment From: Leslie Millar Affiliation: Jun. 17, 2026 Why give companies a greater opportunity to hide problems or fraud? Unless those companies have powerful friends in congress and can use this longer stretch of time to perpetuate corruption. No! To changing the current rule. Protect the American public.

We as small investors are totally against this move. We don't make large $$'s but it potentially could really hurt us.

Lidia Ciamarra — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lidia Ciamarra Affiliation: Jun. 17, 2026 Lidia Ciamarra, retired, Westchester County, New York.
As a retiree after working for the past 45 years to build a nest egg for my golden retirement years it would be devasting to reduce my hard earned savings in investments by 1/3 of its value.
Why would the SEC choose to screw the investor.
Isn't the purpose of the SEC to protect the consumer from fraud & corporate shenanigans. Isn't it prudent to monitor closely, without being tyrannical. If it ain't broke don't fix it!

Lila Outland — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lila Outland Affiliation: Jun. 17, 2026 Why go back to something that did not work twice before!

Lina Baron — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Lina Baron Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
My view on Rule S7-2026-15 is that this is a significant rollback of investor protections. If adopted, it would represent the biggest rollback of investor disclosure requirements in little over 50 years.

My core concern is that less frequent reporting means that we, the investors will go longer without visibility into a company's financial health — potentially six months between updates instead of three. Many things can happen and we may loose money in our investments.
We need the accountability, now more than ever. Please consider how this affects investors over the company's demands, the burden lays on them to secure our investments.
Regards,
Lina

Linda — Jun 17, 2026
Subject: S7-2026-15 Comment From: Linda Affiliation: Jun. 17, 2026 My name is Linda. I'm retired and live in California. I vehemently disagree with changing the reporting timelines. If anything, public companies need to be more transparent! Fraud and insider trading need to be weeded out not given a longer leash. The average American needs more respect. This idea does the opposite.

Linda Tedesco — Jun 17, 2026
Subject: S7-2026-15 Comment From: Linda Tedesco Affiliation: Jun. 17, 2026 Linda Tedesco, RD, CDN. (Dietitian)As someone who has been investing for 40 years I believe quarterly reporting is necessary to be aware of what exactly is going on. I do not think it is fair to hide for six months. I recently found mail from six months ago and was not happy to discover poor results. This was partly my fault as mail was misplaced but if it never arrived for those six months, nothing I could do if I wanted. I suppose there's thoughts of checking online. Although I use a computer for work and my cellphone, I have so many investments and they are in too many places (I know, I know-I am gradually consolidating) for me to delve into how things are doing. And if left entirely to my investment specialists… only one ever contacts me routinely. Another periodically and the rest basically never do- (2 at Merrill Lynch's and 1 another well known). Leaves me to contact them and if I don't know what is going on that's even less chance. Please consider keeping things the same.

Lisa Adair — Jun 17, 2026
Subject: S7-2026-15 Comment From: Lisa Adair Affiliation: Jun. 17, 2026 Lisa Adair, Sr. Corporate Paralegal.

As someone who has regularly handled SEC filings for various public companies large and small, I know this supposed "savings" to the company is de minimis, at best, and a flimsy, slimy smoke screen at worst; and only serves to provide too much shadow to the actual operations, actions of key holders, and financial security of the company. Quarterly reporting is simply the cost of doing business. If companies are trying to cut costs perhaps less Lear jets and million dollar bonuses, even when the company does poorly should be on the chopping block. Everyone else has had to eat their peas lately.

Today's murky environment on business in general and trading specifically coming from the tops of Washington DC on down to the smallest CEO SCREAMS "Dont do this!!!!" This strips the very protections the Truth in Securities laws of the 1930s promised investers, and without them, we absolutely will return to those days.

Companies that have nothing to hide and wish to be above board will also be against this proposal. The SEC, who's charter is to protect the invester absolutely should be against this.

Let me make it simple: when my son was 5 years old, he came downstairs and said, "Hey mom, you dont need to check on me for the next 30 minutes, ok?".

Your reaction to reading that should be the same thing here. X7

Lisa Adair

Lisa Avron — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Lisa Avron Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Reject Rule S7-2026-15. People rely on timely, accurate quarterly disclosures to make informed investment and financial decisions. Quarterly reports provide ongoing visibility into a company’s recent performance, cash flows, liquidity and risks that annual reports alone cannot show. They let people detect trends, respond to material changes, and compare companies on a consistent, near-term basis. Without reliable interim financial data, information asymmetries grow: retail investors and other market participants would be less able to evaluate management’s execution, assess short-term solvency or judge whether new developments materially affect valuation. That increases risk, reduces market efficiency, and can harm confidence in public markets.
Please preserve the availability and integrity of quarterly reporting and avoid removing disclosures that investors depend on to understand a company’s current financial condition, operating results, and known material risks. Maintaining robust, comparable, and timely interim information supports fair, transparent markets and enables ordinary investors to make reasoned decisions.
REJECT this new proposal. Less frequent reporting obscures rapid deterioration in financial condition (e.g., liquidity squeezes, covenant breaches), making it harder for markets and regulators

to detect and respond to emerging systemic threats. Reject a second Great Recession.

Lisa Bishop — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lisa Bishop Affiliation: Jun. 17, 2026 I appreciate quarterly reporting for transparency and tracking of my investments. I do NOT support going back to pre-1970's semi-annual reporting!

Lisa C Dukes Motley Fool Community — Jun 17, 2026
Subject: File No. S7-2026-15 From: Lisa C Dukes I am submitting this comment as an individual investor who is strongly opposed to the proposed rule change under S7-2026-15. I am retired and certainly not wealthy. Other than my small social security income, my spouse and I are entirely dependent on returns on investments made during my 45-year career as an engineer. Quarterly reporting protects people like me. Moving to twice-yearly disclosure doubles the window during which insiders, institutional analysts, and large funds are the only groups who have access to information that people like me will never have access to. That six month gap is where investor mistrust, volatility, and uncertainty will happen. Organizations that support the idea believe that quarterly reporting pressures management into sacrificing long-term value for near-term results. I'm familiar with the argument and I don't believe it. There is no evidence to support it. The CFA Institute studied this exact policy change in the U.K. market and found that reporting frequency had no measurable effect on corporate investment behavior. The SEC would be accepting a real impact (less transparency for ordinary shareholders) in exchange for a benefit that does not exist. This is an extract from the summary of that CFA paper, entitled IMPACT OF REPORTING FREQUENCY ON UK PUBLIC COMPANIES: "Most importantly, this study found that the initiation of required quarterly reporting in 2007 had no material impact on the investment decisions of UK public companies. As discussed in Section 2A, the study measured this impact by examining, before and after these changes in reporting requirements, the companies' capital expenditures; spending on research and development; and spending on property, plant, and equipment. By contrast, the initiation of mandatory quarterly reporting in 2007 was associated with significant changes in other areas. An increasing number of companies published more qualitative than quantitative quarterly reports and gave managerial guidance about future company earnings or sales. At the same time, there was an increase in analyst coverage of public companies and an improvement in the accuracy of analyst forecasts of company earnings. When quarterly reporting was no longer required of UK companies in 2014, less than 10% stopped issuing quarterly reports (as of the end of 2015). Again, there was no statistically significant difference between the levels of corporate investment of the UK companies that stopped quarterly reporting and those that continued quarterly reporting. However, there was a general decline in the analyst coverage of stoppers and less of such decline for companies continuing to report quarterly. Companies that stopped quarterly reporting manifested two characteristics: They were relatively small by market capitalization, and they did not issue managerial guidance during the period of mandatory quarterly reporting. Energy companies were the most prevalent stoppers, followed by utilities." I'm also concerned about which companies this would affect most. The companies most likely to opt out are the ones where oversight is most important. These are the smaller companies with the least analyst coverage, the smallest investor relations teams, and the fewest eyes on them. They are already the hardest to monitor. Reducing

their disclosure obligations doesn't make them easier to own, it makes them much easier to mismanage. Reg FD was a step forward in creating a more level playing field for all investors, especially those like me. This proposal is most certainly a step in the opposite direction. And what problem is this even solving? The entire S&P 500 files quarterly, and it's at an all-time high. If quarterly reporting were holding American companies back (and it is clear that it's not), we would easily be able to see it happening. We certainly do not. I urge the Commission to reject this proposal and preserve the quarterly reporting standard that investors like me depend on.

Lisa Cooper — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lisa Cooper Affiliation: Jun. 17, 2026 Corporations are already raping the Americans; semi-annual reporting would allow this even more. With the current administration threatening to reduce or eliminate social security that leaves our nest egg to fall back on and without that where will that leave those of us who worked our whole lives to enjoy our final years in retirement?

The criminal activity and endorsement of this administration has to end. They are getting more wealthy off of our backs while each day is getting more difficult for the average American to make it financially.

Lisa Farris — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Lisa Farris Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Subject: My view on Rule S7-2026-15
I am writing as a retail investor and a woman approaching retirement within the next six to seven years. Timely, reliable public company information is essential to how I evaluate risk and make informed financial decisions.
Quarterly disclosures help me understand whether a company is executing, whether its financial condition is changing, and whether new risks are emerging. They also help keep the market fair for individual investors who do not have the same access to analysts, data tools, or institutional resources.
Moving from quarterly to semiannual reporting would create longer blind spots for retail investors. Six months is too long to wait for required updates on revenue trends, margins, cash flow, debt, risk factors, and management performance.
I recognize that companies may want to reduce reporting burdens, but investor protection should come first. The SEC should not remove vital information that ordinary investors rely on to make responsible decisions.
Please do not adopt Rule S7-2026-15 as proposed. Quarterly reporting should remain required for public companies.
Sincerely,
Lisa Farris

Lisa Graziano — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lisa Graziano Affiliation: Jun. 17, 2026 Keep Quarterly Reporting.
Lisa Graziano
Education Administrator
Illinois
If this system of investments chooses to revert to archaic rules I'll gladly cash in all investments and find alternative ways to safeguard my retirement. I won't be alone in this. We've build a system that has sold us the idea that our retirement is in our hands, that we can't rely on social security as we age out of the workforce. Us in our 50's are real time walking our Boomer parents through unbelievably high costs of assisted living for poor care. And now you want to roll back safeguards to keep companies transparent with our investments? Are you bat **** crazy? Keep Quarterly Reporting.

Lisa Guzek — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lisa Guzek Affiliation: Jun. 17, 2026 Hello,

Please keep the reporting quarterly.

Quarterly reporting is one of the cornerstones of transparent capital markets. It provides timely information, protects investors,
improves market efficiency, and holds management accountable. Rather than reducing disclosure, regulators should encourage companies to communicate quarterly results in ways that support both transparency and long-term value creation.

Subject: S7-2026-15 Comment From: Lisa Lisa Affiliation: Jun. 17, 2026 Its a very bad idea to change fincial reporting from quarterly to every 6 months! Too much lack of transparency & opportunity for fraud & shenanigans. KEEP IT QUARTERLY!

Lisa Martin — Jun 17, 2026
Subject: File No. S7-2026-15 From: Lisa Martin Keep quarterly reports. People investing hard earned savings in this economy deserve that. This would be like cutting services and could be used to try and hide what is truly happening to individual investors and the bigger picture. From a recent retiree who has always relied on quarterly reports.

Lisa McConaughey — Jun 17, 2026
Subject: S7-2026-15 From: Lisa McConaughey Affiliation: Jun. 17, 2026 I am a retiree and I need quarterly reports. Resist this get out of jail free card for dishonest CEOs.

LISA MORRIS — Jun 17, 2026
Subject: Comment on S7-2026-15 From: LISA MORRIS Affiliation: Jun. 17, 2026 To the Securities

and Exchange Commission:

The mandate for quarterly financial reporting, established by the SEC in 1970, has served as the bedrock of the United States capital markets for over half a century. While proposals to shift to a semiannual reporting model are framed as a mechanism to reduce compliance costs and mitigate short-termism, the preservation of mandatory quarterly disclosures is essential to maintaining market integrity, protecting retail investors, and ensuring efficient capital allocation. I urge the Commission to maintain the current quarterly framework based on four critical pillars:

1. Mitigating Information Asymmetry and Insider Trading Extending the reporting window from three months to six months creates a prolonged "information vacuum". During these multi-month gaps, corporate insiders possess material, non-public operational data while public investors trade in the dark. This asymmetry significantly escalates the risk of insider trading, necessitates aggressively longer blackout windows for employees, and invites front-running by institutional firms with private access to management. Timely disclosure is the ultimate equalizer in a fair market.

2. Protecting the "Main Street" Retail Investor A reduction in reporting frequency disproportionately impacts retail investors. Institutional investors possess the resources to employ data teams, track alternative web/supply-chain metrics, and secure direct corporate engagement. Retail investors, conversely, rely heavily on formalized, regulated, and verified periodic SEC filings to make informed decisions. Stripping away two quarters of audited or reviewed financial snapshots effectively blindfolds everyday investors.

3. Preventing Price Distortion and Lowering Cost of Capital Continuous price discovery requires a steady stream of verifiable financial data. Six-month gaps make it incredibly difficult for the market to price risk accurately, especially for cyclical, seasonal, or high-growth sectors. Academic and economic consensus demonstrates that robust transparency lowers a company’s cost of capital; when investors face higher uncertainty and risk, they demand a higher return on equity, which ultimately harms liquidity and increases transaction costs.

4. Enhancing Corporate Accountability and Fraud Deterrence Regular, quarterly oversight enforces structural discipline within public companies. The rigorous process of preparing quarterly closings forces internal boards, audit committees, and independent auditors to identify, escalate, and correct operational weaknesses or accounting irregularities in real-time. Leaving a business unchecked for half a fiscal year provides a broader window for operational decay or financial manipulation to go unnoticed until the damage is catastrophic.

Conclusion The depth, liquidity, and global dominance of the U.S. financial system—totaling tens of trillions of dollars—are fundamentally rooted in investor trust, strict disclosure mandates, and radical transparency. Diluting the frequency of periodic reporting under the guise of administrative relief sacrifices investor protection for executive convenience. To protect the fundamental architecture of our public markets, the SEC must preserve mandatory quarterly reporting.

Sincerely,
Lisa Morris

Lizabeth Fogarty — Jun 17, 2026
Subject: S7-2026-15 Comment From: Lizabeth Fogarty Affiliation: Jun. 17, 2026 Having helped prepare quarterly reports for 8 years at a publicly traded company I can tell you how valuable that report g was to run the company (I was a financial analyst who worded directly for the executive VP and also prepared data for the CEI) as well as keep investors apprised of key financial data needed to support their personal investment decisions. A change from quarterly would allow more financial chicanery and hides required truths that could deceive the investing public as well as affect their financial well being. Changing would do more harm than good.

I would be willing to discuss what I saw as my role in direct and final review and preparation of required docs, K10 and annual reports, if you wanted more info how I believe my role gives support to my statements.

Lizabeth Wright — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Lizabeth Wright Affiliation: Jun. 17, 2026 Small investors like me rely on quarterly reporting to make investment decisions that will have a major effect on how long our retirement savings will last. Semi-annual reporting will allow companies to hide potential problems from investors, including evidence of fraud. The SEC is supposed to help protect investors and promote confidence in our stock market. But this rule change would favor the big institutional investors and insiders over the small investor. Insiders and institutions will still get timely information through their internal research channels, but retail investors will be flying in the dark much of the time. Any cost savings to companies is not worth the cost to individual investors.

Please keep the rule requiring quarterly reporting.

Loretta Thompson — Jun 17, 2026
Subject: S7-2026-15 From: Loretta Thompson Affiliation: Jun. 17, 2026 My name is Loretta C Thompson. I am disabled and retired and live in South Carolina. My veteran husband is also disabled and retired. Part of our monthly income is a pension he receives from a former employer that would be subject to this new ruling you are considering. This pension is contingent on his former employer staying in business. I have just read that the SEC is planning on doing away with the quarterly filings of businesses affected by the Enron scandal; allowing semi-annual filings. In my judgment, this only allows an executive to have more time to defraud the public and get out of the country before the next filing is due. This is a bad idea and it has the appearance of favoritism toward the very wealthy. The appearance of wrongdoing is the reality in many minds and MUST be avoided at all costs. To move forward with this proposal will deeply affect the level of confidence the American people have placed in you since 2002. I urge you to reconsider this and let the American people know that you have not only heard our concerns, but that you understand and agree that this proposal was not well thought out and will not be put in place. Keep the quarterly filings.

Regards,
Loretta Thompson

Louis Devault — Jun 17, 2026
Subject: S7-2026-15 From: Louis Devault Affiliation: Jun. 17, 2026 a few qualifiers if a company is licensed they are under government license! Many exist and operate as partners public to private partnerships involve tax abatements and quite often receive direct subsidy! I appreciate your promises but let me tell you this because i know it is true This whole earth is being subdued now by a shadow government they are the hidden layer of worthless bastard sons of god who are at the benevolence valve of every nation we pay taxes and they exist as contractors who get paid to deliver services! It is the ultimate usury and oppression! God owes such souls a judgement day and it is very close now closer than ever! This creation will pass away in intense heat and if the folks who followed this wealth formula are dead guess what God will resurrect judge these bastards and throw them into the fire with all their other brethren who hijacked God's or Yahweh's creation for their own worthless self sanctifying souls! You do realize this universe the whole of it will be judged and all these false rulers and their followers will be done away with!. I personally cannot wait until I no longer sense their perverse presence and influence over the universe!
There is a righteous kingdom yet to come and the usurpers will be cast into the fire!
books like the bible and Enoch commentaries are quite clear about this final judgement and no one will be able to buy or cajole their way out from under God's gaze! They act as if believers are nuts but I tell you truly their faith is in vain, if God does not come back, take the universe and Judge all the usurpers of His creation! The filings need to happen especially if the companies are subject to any form of tax subsidy or abatement! Believe me when I tell you the fraud and waste within a great nation is palpable! Doge and the AI programs installed within the digital accounting systems have put the sec to shame! recent discoveries in minisotta and ohio of fraudulent healthcare billings and practices are now delivering indictments even to the state regulators! Every nation is subject to taking out the trash! Pay a bounty to regulators and law enforcement for carrying out this accountability or the profane use of public funds, or it will continue to perpetuate itself!

Margaret Crewz — Jun 17, 2026
Subject: Comment on S7-2026-15 opposition to reducing quarterly corporate reporting requirements From: Margaret Crewz Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:

I am writing to express my opposition to any proposal that would reduce or eliminate quarterly reporting requirements for publicly traded corporations.

Quarterly reporting provides investors with timely, transparent, and consistent information about a company's financial performance and operations. Regular disclosures help maintain market integrity, support informed investment decisions, and promote accountability to shareholders.

While I understand concerns about administrative burdens on companies, I believe the benefits of transparency outweigh those costs. Reducing the frequency of reporting could decrease investor confidence, limit access to important information, and make it more difficult for individual investors to evaluate corporate performance.

I encourage the SEC to maintain the current quarterly reporting framework and continue prioritizing transparency and investor protection.

Thank you for considering my comments.

MARI BOHMAN — Jun 17, 2026
Subject: Comment on S7-2026-15 From: MARI BOHMAN Affiliation: Jun. 17, 2026 Mari Bohman, retired. Marshfield, Wisconsin. I began working at 16 years of age. Worked 20 years in medical field, branched out to education and non-profit work for more than forty years of paying personal taxes. Saved with husband and was fortunate to have employer-based retirement programs available as well. Individuals and families need to have the ability to invest if they are then able to retire and continue supporting themselves without direct government assistance. We need openess from investment entities in order to be able to reach our goals.
We have watched our congressional representatives who we elected circumvent fairness and pad their own coffers. To lose quarterly reporting makes investments even more of a gamble. Please protect what is left of the middle class. Thank you.

Maria Artime — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Maria Artime Affiliation: Jun. 17, 2026 I strongly disagree with eliminating quarterly financial reporting. We need this to maintain transparency. Sincerely, Maria Artime.

Marian Hoecker-Hahn — Jun 17, 2026
Subject: S7-2026-15 Comment From: Marian Hoecker-Hahn Affiliation: Jun. 17, 2026 Marian

Hoecker-Hahn Retired
I am vehemently opposed to semi annual reporting. Quarterly reporting is a better safe guard for the average person.
Personally I know numerous folks who lost so much in 2008. I was one day away from loosing 30% of my only wealth.
As a former bank employee who had to review SEC Rules annually, I believe in the strictness of financial institute Oversight.

Thoroughly Disgusted by the greed of the oligarchs
and this current administration.
Marian

Mark — Jun 17, 2026
Subject: S7-2026-15 From: Mark Affiliation: Jun. 17, 2026 It isn't possible to do your research and due diligence without quarterly reports. Only a corrupt administration would even consider such a move that stabs the average investor in the back. What if Elizabeth Holmes ran with the ball for six months, instead of 3 at Theranos? Think Bernie Madoff as well. Trump wants this because he's a shady businessman that has scammed his University and his Charity, and got caught on quarterly

reports. It would be easier for him and for all his CEO buddies to game the system if they didn't have to verify their books quarterly. Think back and realize why they shifted to quarterly reporting in the first place. Because of transparency. The current system is rife with insider trading, pump and dump schemes, the grift, and now a puppet SEC it seems. Please don't tilt the table any more and make it harder on the average investor, or the "Reddit wave" might be the permanent way to go for us. Mark Nosich, A&P Mechanic, Tulsa.

Martin J. Deely

Martina Ross — Jun 17, 2026
Subject: S7-2026-15 Comment From: Martina Ross Affiliation: Jun. 17, 2026 My name is Martina Ross. I'm an electrical engineer and I oppose any proposal that would reduce the frequency of required public financial reporting from quarterly to semiannual disclosures.

As an individual investor, timely access to information is essential for making informed decisions. Public markets function best when information is broadly available, transparent, and released on a consistent schedule. Reducing reporting frequency would increase the period during which retail investors have limited visibility into a company's financial condition, performance, and risks.

While large institutional investors and company insiders often have access to extensive analysis, management interactions, and other resources, ordinary investors rely heavily on public filings. Extending the reporting interval from three months to six months would widen the information gap between professional market participants and the public.

Quarterly reporting has been a cornerstone of market transparency for decades. If the SEC wishes to reduce unnecessary compliance burdens, it should pursue reforms that preserve investors' access to timely financial information rather than reducing disclosure frequency.

For these reasons, I urge the SEC to maintain quarterly reporting requirements.

What in your derivatives minded s*** brain Do you think holding the back information for 6 months is a smart thing to do? They're making hand over fist with the way things are. Why are you making it more difficult for people to play in the market?

Marvin Rawlings — Jun 17, 2026
Subject: S7-2026-15 From: Marvin Rawlings Affiliation: Jun. 17, 2026 We must maintain the quarterly requirement!

"The Master in the art of living makes little distinction between his work and his play... He hardly knows which is which. He simply pursues his vision of excellence in whatever he does, leaving others to decide whether he is working or playing. To him he is always doing both."

Mary — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Mary Affiliation: Jun. 17, 2026 To Whom I May Concern,

Do not try to gaslight us into believing that this is in our best interests. We have already tried this and the results are clear; less reporting and transparency leads to lower returns on investment for the majority of people. Banks and Wall Street firms have entire teams dedicated to doing this work. The only benefit would be to the publicly traded companies who aren't doing well and want a longer period over which they can keep consumers and investors in the dark. You work for ALL Americans, not just the rich ones. Life savings and retirement savings are at risk if you take this action! Please put the best interests of the many ahead of the interests of the companies. We appreciate your consideration.

Sincerely,
Mary McLaughlin

Subject: Comment on S7-2026-15 From: Mary Clare Becker Henry Affiliation: Jun. 17, 2026 None of us need less transparency. These entities are as crooked as a dog's hind leg. Let's keep control of this. It will affect all of us & be in our best interest to keep them under clean
she scrutiny. We retired people cannot afford to put out any more money to these crooks. Our bills are extraordinary enough as it is. Mary Henry New Freedom, York Co. PA.

Thank you for your time and attention to this matter.

Sincerely,

Mary

Mary Cole — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Mary Cole Affiliation: Jun. 17, 2026 I support keeping the Securities and Exchange Commission's (SEC) requirement for quarterly reporting by public companies.
Quarterly reviews and reports provide investors with timely information about a company's financial health, performance, and risks. Most individual investors do not have access to private information or teams of analysts. They rely on regular disclosures to make informed decisions about their savings, retirement accounts, and investments.
Reducing the frequency of reporting could create longer periods where important information is unavailable to the public. This may increase uncertainty, reduce market transparency, and potentially give an advantage to insiders or large institutional investors who have greater access to company management and industry information.
Quarterly reporting also promotes accountability. Company executives know they must regularly explain their performance and financial results to shareholders and the public. This helps build trust in U.S. capital markets and supports fair and efficient markets.
While reporting requirements should be streamlined where possible to reduce unnecessary costs, the benefits of quarterly reviews and disclosures outweigh the burdens. Regular reporting helps protect investors, improves transparency, and strengthens confidence in the financial system.
For these reasons, the SEC should continue to require quarterly reviews and reporting for public companies.

Matthew Robinson — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Matthew Robinson Affiliation: Jun. 17, 2026 Matthew Reynolds, pre-licensed real estate, Bexar County, Texas. I strongly oppose changing investment reporting from a monthly basis to a quarterly basis because it significantly reduces my ability to understand, monitor, and responsibly manage my family's finances.

As an individual investor, I am not a hedge fund manager, financial analyst, or institutional investor with access to sophisticated reporting tools and dedicated staff. The primary way I stay informed about my investments is through the reports and statements provided to me. Monthly reporting gives me regular visibility into my financial position and allows me to make informed decisions based on current information rather than waiting months to understand what is happening with my money.

My investments represent real-world goals and responsibilities. They are not abstract numbers on a spreadsheet. They represent my retirement, my children's future, emergency savings, housing decisions, healthcare expenses, and the overall financial security of my family. Because these investments have such a direct impact on our lives, I believe I should have timely access to information about their performance.

A quarterly reporting schedule creates long periods where I am effectively operating with limited information. Three months is a significant amount of time in financial markets. During that period,

market conditions can change dramatically. Economic data can shift, interest rates can move, geopolitical events can occur, and investment positions can experience substantial gains or losses. Waiting an entire quarter to receive formal reporting means that I may spend months without a clear understanding of how my assets are performing relative to my goals.

Monthly reporting helps me identify trends early. If an investment strategy is underperforming, if asset allocation has drifted from its target, or if my overall financial plan needs adjustment, monthly information allows me to recognize those issues before they become larger problems. Quarterly reporting delays that awareness and reduces my ability to respond thoughtfully and proactively.

Regular reporting also serves an important psychological purpose. Investing requires discipline and long-term thinking. Monthly reports help me stay engaged with my financial plan and reinforce confidence that my investments are being monitored appropriately. When information is withheld for longer periods, uncertainty increases. I am left wondering whether performance is on track, whether adjustments are needed, or whether risks are developing that I cannot see.

For investors managing significant life events, monthly reporting becomes even more important. Families preparing for a home purchase, retirement, college expenses, medical costs, relocation, or other major financial decisions often need current information about their available assets. Quarterly reporting can make planning more difficult because the information being relied upon may already be weeks or months out of date by the time it is reviewed.

Additionally, monthly reporting promotes accountability. When performance and account activity are reviewed regularly, errors, unexpected fees, unauthorized transactions, or administrative mistakes are more likely to be identified quickly. The longer the reporting interval, the longer potential problems may go unnoticed.

I understand that some may argue that less frequent reporting encourages investors to focus on long-term results rather than short-term market fluctuations. While long-term investing is important, reducing access to information is not the appropriate way to encourage patience. Investors should have the freedom to decide how closely they monitor their finances. Those who prefer a long-term perspective can simply review their accounts less frequently. However, investors who rely on monthly reporting should not lose access to information that helps them make informed decisions.

Ultimately, monthly reporting respects the principle that investors deserve timely information about their own assets. It supports transparency, accountability, financial planning, and informed decision-making. Quarterly reporting unnecessarily reduces visibility into investments that represent years of work, savings, and financial sacrifice.

For these reasons, I believe monthly reporting better serves individual investors and provides a level of transparency and accountability that quarterly reporting cannot match.

Matthew Sproul — Jun 17, 2026
Subject: S7-2026-15 From: Matthew Sproul Affiliation: Jun. 17, 2026 This completely destroyed my father's life. He's 81 years old now and still working. Trying to make up for the losses that he had from that company's disastrous procedures and crooked CEOs. We cannot allow this to happen to anybody else. This needs to stay in place as a matter of fact needs to go further. We need to go back to the day of when 80 ma Bell was broken up because some of these companies are getting

way too big. Have way too much control over everything? BlackRock vanguard State Street own too much stuff and they are controlling our lives and it needs to stop before we have another issue where they take over the world instead of just screwing people over on a daily basis.

Maureen Binder — Jun 17, 2026
Subject: S7-2026-15 From: Maureen Binder Affiliation: Jun. 17, 2026 Maureen Binder, retired banker. In banking, when securing funds for the bank, a double custody rule is in effect, one person has the key the other has the combination and they both sign a time log that that custody has been kept. Quarterly reporting is much the same, it closes a window in time to ensure proper, accurate accounting is being reported and signed off by the people that are held accountable. Reverting to an antiquated system puts every investor in jeopardy of losing or having diminished funds, many investors have their retirement in those funds, remember Enron. Do your jobs to protect the investors not the CEOs,CFOs, and those trying to find a way to diminish the integrity of the quarterly reporting system for every company in the United States and their interests abroad.
You at the SEC must do your jobs to protect the investors.

Maureen Grady — Jun 17, 2026

Subject: Comment on S7-2026-15 From: Melani Luedtke-Taylor Affiliation: Jun. 17, 2026 Melani Taylor, Omaha, NE

The data is clear. The track record for investors is clear. The success of this policy is clear, not only for the United States, but for every country that deploys it.

If the SEC still honors its mission to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation than you can not change this policy just to placate corporations. It truly is that simple.

Don't fail your mission.

Melanie — Jun 17, 2026
Subject: S7-2026-15 From: Melanie Affiliation: Jun. 17, 2026 Keep the SEC Quartely Reporting. We need better laws and rulings to expose and eradicate fraud at every level in our government. Keeping information from the public just gives companies more time to hide, manipulate and re-direct funds that have and will be spent at the taxpayer's expense.

Melanie Bengtson — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Melanie Bengtson Affiliation: Jun. 17, 2026 I am commenting on the SEC’s attempt to turn the clock back to the 1950s requiring semiannual reporting instead of quarterly reporting. My name is Melanie Bengtson, I live in Wellington, NV, and I am a retired federal government employee. Being retired and relying on my savings including IRAs and annuities, I find it alarming that the SEC is pushing this change. It reduces the accountability of the organizations in which I have invested. I am also tired of seeing the SEC taking down more and more guardrails which were placed in order to protect investors. I am also tired of having to bail out companies who skirt the rules and behave irresponsibly with my and millions of others’ savings. Stop pandering to the very organizations you are supposed to be regulating.

Melanie Buchanan — Jun 17, 2026
Subject: S7-2026-15 Comment From: Melanie Buchanan Affiliation: Jun. 17, 2026 This idea is another way to screw over every day people to benefit the oligarchs. Protect every day consumers.

Melinda Angle — Jun 17, 2026
Subject: File No. S7-2026-15 From: Melinda Angle I am distressed that the SEC would consider allowing companies to report their information on a semi annual and not quarterly basis - if anything we should require them to report more! Greater Opacity undermines investor confidence and does not give individual investors enough continuous information to make informed decisions about the companies they invest in. I cannot believe the SEC would propose this foolish idea. It is enraging and borders on the corrupt. You work for us—To ensure investor protection! Not corporate convenience. Shame on you. This will have lasting effects on the robustness of the US market. If I have a choice between an American company who has been given a free pass to not check in and justify their choices and outlook to investors on a quarterly basis and another company that does, likely outside the US? I know where my money is now going to go.

Melinda Ingersoll — Jun 17, 2026
Subject: S7-2026-15 Comment From: Melinda Ingersoll Affiliation: Jun. 17, 2026 This proposed rule is just another way to propagate the ability to cheat and defraud the public. It only demonstrates the lengths that those who support it will go to illegally enable cheating
and stealing from stockholders and the public. It is dishonest and a terrible idea. Don't make this change!

Melinda Michaels — Jun 17, 2026
Subject: S7-2026-15 Comment From: Melinda Michaels Affiliation: Jun. 17, 2026 Hello!

I hope this message finds you well. I am Melinda M.,a small business owner who invests regularly. Quarterly earnings is extremely important to help me make financial decisions that impact my livelihood and the future of my family. I have also worked in several industries where monthly and quarterly reporting were essential to checks and balances, minimizing financial errors and corruption. I have seen others manipulate "the numbers" and destroy investments for their personal gain, lasting up to years without reprimand. Keep everything the same and hold public companies accountable, even more so now than ever.

Kindly,

Melinda

Melinda Roell — Jun 17, 2026
Subject: S7-2026-15 Comment From: Melinda Roell Affiliation: Jun. 17, 2026 Melinda Roell, retired. Quarterly reporting should remain the standard. Businesses require quarterly taxes and should also report business status quarterly. It should keep business leadership on top of what's going on in their company.

Melinda Smith — Jun 17, 2026
Subject: S7-2026-15 Comment From: Melinda Smith Affiliation: Jun. 17, 2026 As a retiree, I live on my investment income. If the company is hiding/withholding information that is crucial to my investment in their business, I think it is equivalent to them picking my pocket. I respectfully request quarterly reports remain the standard.

Thank you for considering my opinion.

Melinda Smith

Melissa Auten — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Melissa Auten Affiliation: Jun. 17, 2026 It’s a proven fact that reducing reporting to twice a year costs investors money. The only people who benefit are corporations. As a retired person, I rely on my investments to live. Do not reduce reporting required for corporations, which could affect so many people‘s life savings. You are supposed to work for the people not for corporations.

Melissa Auten

Melissa Briones — Jun 17, 2026
Subject: S7-2026-15 Comment From: Melissa Briones Affiliation: Jun. 17, 2026 I think history has proven that corporations cheat us...the commoners...as often as they can. Why would anyone think it is a good idea to give them LESS oversight. This is not America first. This is CORPORATIONS first. America is the people. Y'all need to get your mind right.

Melissa Cate — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Melissa Cate Affiliation: Jun. 17, 2026 The cost to companies should come significantly down with agentic AI.

As an investor, I believe quarterly reports are the bare minimum. That's 4 plot points per year that are solid numbers, everything else is conjecture, puffery, guesses, and telling people only what you want them to know.

If a company thinks the compliance costs of being PUBLICLY owned and traded are too much, they should not go public.

Michael Behrens — Jun 17, 2026

Subject: My view on Rule S7-2026-15 From: Michael Behrens Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Moving to a 6 month reporting period for disproportionately affect household investors. These investors, such as myself already have limited views into the market and face constant challenges with the data we do find.
Wall Street is well known for taking a wrecking ball to any regulations that might give any insight into their operations, the operations of companies and the consistency we see in existing regulations being unenforced.
At a time when there is unprecendented amounts of off balance sheet money, circular financing, private equity mark to myth, dark pools it is dumbfounding that the SEC would consider requiring even less reporting.
The SEC and Wall Street already attempting to put short selling reporting requirements to the firing squad, when there is obvious, consistent and patently illegal activities occuring, it appears that once again the SEC is choosing to turn a blind eye to the detriment of household investors.
The only purpose this serves, after a 50 year history is to hide the bad debt that has piled up in the vague hope it will all sort itself out and we, the investors can trust the data we're given.
Household investors already don't trust the reporting mechanisms, removing them even further will likely lead to more volatility, more dislocation and serves only to protect those companies and institutional players that have acted rashly, without forethought, due diligence or proper risk management controls.
This will further erode trust of international investors into US markets given they can rely on at least some reasonable if some times problematic regulatory agencies in their own countries.
This rule will result in investments leaving the US for more stable, more responsible equity and capital markets.
In short, at the current time and in the current state, this isn't another nail in the coffin, it is running out of coffin to put nails into.
As an international investors, I will not hesistate to move my investments elsewhere.
Regards,
Michael Behrens, Household Investor, Canada

Michael Burby — Jun 17, 2026

Michael Loop — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Michael Loop Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I don't believe leaving investors blind to the Financials of a company at any point is ridiculous. Transparency should remain as it is, they should not have a safety net vs. The investors putting

there efforts into that company.

Michael Lyles — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Michael Lyles Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission: transparency matters! Stop with the games.

Michael Maslakowski — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Michael Maslakowski Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission,
Information asymmetry is already a detrimental part of retail investing. This is a risk that is little understood by retail investors. It effects the public perception, journals and reporter's ability to give accurate valuations and targets without expensive data sets. Retail investors are exposed to the product of this data regardless of if they read it or not.
Investing carries risks, but this serves no benefit than to increase the volatility of the market itself. We learn 100 years ago why we must keep corporations accountable and should not be doomed to repeat the mistakes.

Michael Matson — Jun 17, 2026
Subject: S7-2026-15 From: Michael Matson Affiliation: Jun. 17, 2026 Quarterly if not monthly. Reporting should be automated and require little to no labor for distribution. Less frequent oversight is no provent. Thank You.

Michael McLaurin — Jun 17, 2026
Subject: S7-2026-15 From: Michael McLaurin Affiliation: Jun. 17, 2026 The tools and mechanisms to provide accurate information exist. The methodology for clarity in reporting performance does as well. Hiding the facts or denying them when they are not aligned with corporate or political interests, appears to have found a home in this current climate. Quarterly reports allow each investor the opportunity to make decisions and navigate the minefield that has emerged in this age of market volatility. Quarterly reports, at least, provide ‘speed bumps’ along the way.

Subject: S7-2026-15 Comment From: Michael Powers Affiliation: Jun. 17, 2026 Insiders already have such an advantage being 3+ months ahead on critical information. The most important part of an effective democracy is transparency and that extends to a democracy's economy.

Michael Preis Retired Professor of Marketing, University of Illinois at Urbana-Champaign — Jun 17, 2026
Subject: File No. S7-2026-15 From: Michael Preis Reducing the information available to shareholders is a bad idea. Real world evidence from Great Britain shows that eliminating quarterly reports does not result in greater focus on long term results. Furthermore, I am a part-owner of each company in which I own stock; owners are entitled to more information not less. If owners want management to focus more on long-term growth they can elect directors that will take the company in that direction. Transparency is important in business governance, just as it is in government. Do not eliminate the requirement for quarterly reporting to shareholders.

Michael Reyes — Jun 17, 2026

Subject: Comment on S7-2026-15 From: Michelle Poolet Affiliation: Jun. 17, 2026 Michelle Poolet, Owner/Operator, Colorado.

Why would the SEC want to eliminate half the reporting periods that it has now? I can only think of one reason, and that's to withhold valuable information from the investing public. I think this is a very, very bad idea. Due to recent activities perpetrated by the current administration, we - investors and business owners both - have to stay on top of what's going on with the economy. Limiting reporting is not the way to do that. I vote NO, maintain quarterly reporting.

Warm regards,
Michelle on mobile

Mitchell Carson — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Mitchell Carson Affiliation: Jun. 17, 2026 Publicly traded companies should always report earnings on a per-quarter basis. They've already tallied the books, so this should be no burden on them. The SEC helps keep these companies "honest". By giving companies longer periods between reporting, you're opening Pandora's Box - it fosters the ability for these companies to cheat the system. My perspective: Leave something that isn't broken well enough alone. Reporting every 3 months is the bare minimum protocol to follow.

I once worked for a company who prided themselves on handing out stock options to everyone (even the janitors) as a form of bonus compensation. Hard times hit and the CEO boasted that he was taking a 100% pay cut - to the tune of $300k. Sounded good until the very next day he exercised over $32 million in stock options. A few months later, he got caught with his hand in the cookie jar - insider trading. That man managed to get the entire company de-listed from the NASDAQ. The result? All of our bonus compensation became worthless overnight. With this in mind, I tend to believe that reporting once every quarter isn't enough!

Thank you for listening in,
-Mitchell Carson

Mitchell Neumann — Jun 17, 2026

Subject: S7-2026-15 Comment From: mojah63 Affiliation: Jun. 17, 2026 Mr P Meara semi retired engineer. Quaretly singed statements of a public traded company is vital for me to understand my investments health. It's not a trivial matter. Thank you for your attention to this matter.

Molly Dindia — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Molly Dindia Affiliation: Jun. 17, 2026 This change to reporting must not go forward. Folks are struggling day to day getting by. Yet, maybe we can save and invest and possibly live OK in retirement? Oh , no? They are coming for that too? I don't think so.
My name is Mirally. I'm a Physician Assistant in Cleveland Ohio. Rolling back transparency and accountability cannot possibly benefit the American people. This looks like a tailor made strategy to help only the wealthiest corporations and their boards: If the SEC continues down this path of taking from average people, and gifting to the wealthy, the money will run out. There will eventually be nothing left to take from people and the ultra greedy, ultra wealthy will have to start taking from among their own. And THAT is when the world will be faced with actual apocalyptic threat. These incredibly greedy, inhumane factions won't just stop on their own. They need to be regulated and forced to operate in ways that do less harm.
STOP THIS
KEEP QUARTERLY REPORTING

Molly Nawrocki, CPA CFP — Jun 17, 2026
Subject: File No. S7-2026-15 From: Molly Nawrocki, CPA CFP I am strongly opposed to this change. Quarterly reporting protects investors by maintaining transparency, while shifting to semiannual reporting widens the information gap, increasing uncertainty, volatility, and mistrust—especially in smaller, less-scrutinized companies where oversight is already limited. Evidence does not support the claim that reducing reporting frequency improves long-term corporate behavior, making this proposal a step backward from the level playing field without solving any clear problem.

Molly Rajski — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Molly Rajski Affiliation: Jun. 17, 2026 Quarterly keeps companies and the market accountable. 6 months can hide a massive amount of risk and sin we should not be willing to afford to accept. Why is this even being discussed and considered?

Monica Johnson — Jun 17, 2026
Subject: S7-2026-15 Comment From: Monica Johnson Affiliation: Jun. 17, 2026 Monica Johnson, Project Manager: Quarterly reporting is needed for transparency. The public has fewer and fewer safeguards for investments, especially with the rollback on consumer safety. With computers and data analysts at every company, this is not a hardship. It's a way to be secretive and enable potentially fraudulent behavior that could take years to uncover and give little real recourse to those harmed.

Morgan Braun — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Morgan Braun Affiliation: Jun. 17, 2026 I'm Morgan Braun, an analyst at an airline in the DFW area of North Texas. Quarterly reporting ensures transparency and accountability. Please ensure SEC reporting continues in a quarterly fashion. Thank you.

Ms C.Ann Beard — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Ms C.Ann Beard Affiliation: Jun. 17, 2026 Cynthia Ann Beard, Noblesville, IN.

Please do not reduce the required financial reporting from 4 to 2 times per year. Small shareholders and the public need protection. Don't cave
in to big money!! Help the people!!! Without government oversight, the people have no protection.

History shows how the country fared worse before when they tried this. Learn from history.

Don't pander to 1%ers and big money and leave the rest
of us twisting in the wind.

Please be responsible and do the right thing. Leave politics out of this.

Subject: Comment on S7-2026-15 From: Nancy Affiliation: Jun. 17, 2026 We need transparency in our public companies. Quarterly reports are what the majority of invested Americans depend on, semi annual reports in this fast paced environment is too long and I feel provides more secrecy opportunities to cover up negative activities

---

Nancy — Jun 17, 2026
Subject: S7-2026-15 Comment From: Nancy Affiliation: Jun. 17, 2026 As a former Associate Director with extensive corporate finance experience at both Fortune 500 companies and smaller businesses, I have participated firsthand in quarterly certification processes with senior executives. What I can say with confidence is this: it is not a burden. Everyone involved took it seriously, and rightfully so.

The argument that quarterly certification creates unnecessary work misunderstands how well-run companies operate. This information is not generated solely for regulators — companies need it for their own financial management. Certification does not add work; it adds accountability to work that is already being done.

What it does add, critically, is a meaningful check against the many ways companies can — and do — pressure employees to manipulate numbers. Having been inside these processes, I can attest that quarterly reporting with executive certification creates a genuine deterrent against that kind of pressure and provides a reliable mechanism for catching problems before they escalate.

Retail investors depend on the accuracy of this information. They do not have access to the private briefings, analyst relationships, or early warning signals available to institutional players. Quarterly certification with executive accountability is one of the few structural protections they have.

Eliminating this requirement would not reduce regulatory burden — it would reduce transparency and investor protection. We have seen where that leads. The Enron collapse was not an anomaly; it was the predictable result of inadequate oversight and unchecked pressure on financial reporting. Repealing quarterly certification requirements risks returning us to precisely that environment, and it is ordinary investors who will pay the price.

Nancy Lindemood

Nicholas Fucello — Jun 17, 2026
Subject: S7-2026-15 Comment From: Nicholas Fucello Affiliation: Jun. 17, 2026 Bad policy. It will lead to corruption for the little guy. Keep the reporting at every 3 months.

Nicholas Shipp — Jun 17, 2026
Subject: File No. S7-2026-15 From: Nicholas Shipp This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it. Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize.

Nicholas Timm — Jun 17, 2026
Subject: S7-2026-15 From: Nicholas Timm Affiliation: Jun. 17, 2026 I got burned bad by Enron. Corporate accounting is laughable: stockholders (us) get a chance to vote in a Russian election. There is only one candidate chosen by the board and management. Not much protection with that. Signing a document four times a year can’t be that burdensome. CEOs are, after all, paid to be running the company and that would necessitate knowledge of its financials.

Nico Baez — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Nico Baez Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission: This proposed rule would favor a higher class standing rather than everyday people, all of whom rely on this critical information in order to accurately gauge what company has a good P/E ratio, what their Beta is, what their 5 year charts look like. Eliminating this would be like cutting off all water to an area that is burning. Reconsider very carefully the consequences that come with this decisions, both for the the high class and the lower class. Its bigger than just the 1%.

Nicola Hill — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Nicola Hill Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
It is a historically bad idea for the economy as a whole to allow companies to delay daylighting important information to investors. This is not going to fix what is already broken.

Nicolas Jorden — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Nicolas Jorden Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
If quarterly reporting is removed, there will be no limits to corrupt forces on insider trading and market manipulation. The people deserve a fair and equal representation on the market, including IRAs and other accounts, which will be revoked by these policies.

Nicolas Lira — Jun 17, 2026
Subject: S7-2026-15 From: Nicolas Lira Affiliation: Jun. 17, 2026 Do not institute this proposed change. Continue required quarterly reporting. Quarterly reporting is vital for maintaining trust in the American market. It is a benchmark set by the government for decades. This regulation insures publicly traded companies are accountable and transparent about their financial health with the public at least 4 times per year.

Nicolas Lira, DMA
Raleigh, NC

Nicole McCoy — Jun 17, 2026
Subject: S7-2026-15 From: Nicole McCoy Affiliation: Jun. 17, 2026 To whom it may concern,

My name is Nicole McCoy of Little Rock,, Arkansas. I work as a Senior Insights Manager for a major market research firm.

We the people are tired of having to fight to hold people accountable. We have laws and regulations on place for a reason. While we definitely need to so more to fight, we certainly do not need to keep slashing what we already have in place which seems to be a key goal of this administration.

Quarterly reporting is absolutely necessary to help prevent fraud and corruption. There is so much of that already. Ripping away accountability will cause even more. How could this even be an option right now? Seriously.

We should be putting laws in place to help prevent fraud at every single level, including the President. This is unacceptable.

Please do what is RIGHT.

Respectfully,

Nicole McCoy
Little Rock, AR

Nicole McFarland — Jun 17, 2026
Subject: S7-2026-15 Comment From: Nicole McFarland Affiliation: Jun. 17, 2026 The point of the SEC is to keep Corporations from scamming the public and the government, so why would you mess up a good thing and make it easier for them to hide their misdeeds?

Nicole Nash — Jun 17, 2026
Subject: S7-2026-15 Comment From: Nicole Nash Affiliation: Jun. 17, 2026 You owe it to the American people who work hard for their money to ensure they know what is going on with it. We invest in American businesses - the least you can do is ensure you are using our money responsibility. I didn't work since I was 18 to have my money become worthless.

Niesha Nahkala — Jun 17, 2026
Subject: S7-2026-15 Comment From: Niesha Nahkala Affiliation: Jun. 17, 2026 Accountability requires quarterly reports . No if, ands, or buts. Totally crazy that this is even brought up. We do not live in a 50s world. We can't go back either.

Nikita — Jun 17, 2026
Subject: S7-2026-15 Comment From: Nikita Affiliation: Jun. 17, 2026 Making quarterly SEC reporting optional is a bad deal for retail investors because it reduces transparency and gives large institutions an even bigger advantage. Most retail investors rely on public filings to understand how a company is performing, while hedge funds and large firms have access to additional research and data sources. Less frequent reporting also makes it easier for management to hide problems and increases the risk of surprises when information finally comes out. In the end, fewer disclosures mean less accountability, more uncertainty, and a less level playing field for everyday investors.

Nikola Prendergast Lucas — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Nikola Prendergast Lucas Affiliation: Jun. 17, 2026 This is disastrous for personal investors and will further diminish the economy in this country widening the economic gap. Quarterly reporting is essential to decision making.

Nina — Jun 17, 2026
Subject: S7-2026-15 Comment From: Nina Affiliation: Jun. 17, 2026 Accountability only works if we hold people accountable. Allowing longer periods between reviews defeats the purpose.

Sent from Nina Abbott’s iPhone

Nina — Jun 17, 2026
Subject: File No. S7-2026-15 From: Nina Hello, I’m writing to voice my opposition to the SEC’s proposal to move from quarterly reporting to reporting every six months. I find it deeply unfair that individual investors will be kept in the dark while insiders and institutional investors will have access to information that will give them an advantage when it comes to investing. As wages stagnate, it is becoming increasingly important for me and people in my income bracket to know how to invest so that we can have a safe and comfortable retirement. I feel this new rule would jeopardize that. And after the 2008 financial meltdown, as well as the Enron disaster, Wall Street only needs more transparency, certainly not less. Thank you for taking the time to read my comments. Please do consider regular earners such as myself who are working hard to ensure a safe financial future.

Nina Gonzales — Jun 17, 2026
Subject: S7-2026-15 From: Nina Gonzales Affiliation: Jun. 17, 2026 With Trump around are you freaken INSANE!!!! No, absolutely not! The People have suffered enough then and even more now. We are not stupid like "Trump," likes to suppose. We will seek Prison Time For Those Who Continually Hurt The People, The Economy to oppress us as if we are disposable slave labor.

NITIN SAWHNEY — Jun 17, 2026
Subject: S7-2026-15 From: NITIN SAWHNEY Affiliation: Jun. 17, 2026 Hi, my name is Nitin. I live in Maryland. I'm a US citizen. I think quarterly financial reporting by corporations are important to maintain market stability. Without such disclosures event based volatility could increase dramatically and be harmful to individual small investors.

Pamala Swinnea — Jun 17, 2026
Subject: S7-2026-15 Comment From: Pamala Swinnea Affiliation: Jun. 17, 2026 I watched Enron collapse here in Texas when I was an accounting student. Biannual reporting does not period match with the accounting cycles of state and Federal governments for tax liabilities and fiduciary installments. Estimated tax payments are quarterly. Social Security Administration and Medicare are expecting quarterly payments to be made timely from payrolls.

During the 2008-2009 housing crisis, I saw big banks unable to timely pay the escrow funded property taxes of borrowers. Repeatedly batches were created, only to remain unpaid because they were “unfunded”. Internal liquidity was compromised and that is something that never should have happened with other people’s money! Major US banks used tax services to process these payments.

I also watched employers fail to pay fiduciary payments of payroll deductions over to US TREASURY…and hide this on their books, saying they had paid things that they had not. So much for the matching principle for FASB compliance! Transactions are supposed to be recorded as they happen. Liabilities are either short term (1 year or less) or long term (> 1 year).

Biannual reporting only gives companies time to hide and shell game their funds and liabilities, to hide their true financial position. With the advent of AI accounting technology, any savings achieved will be nominal, but the damage to investors could be devastating!

Pat Barlow

Pat Bennett — Jun 17, 2026
Subject: S7-2026-15 From: Pat Bennett Affiliation: Jun. 17, 2026 My name is Patricia Bennett.

I am a Common Law Lawyer & I'm writing from California.

This matters to me because for the last 13-15 years, I have studied codes, statutes, treaties, the Constitution, the bill of rights, Corpus Juris Secundum & other bodies of Law. I have read the Cestui Que Vie Trust act of 1666. I know about the Certificate of Live birth fraud which has been placed up on the American people.

I have personally served time in jail because of this fraud & had to pay "restitution" for 5 years because of it.

I know when I got convicted, the court filled out Government Services Administration bid bonds,

performance bonds & surety bonds, using my name & social security number, without my consent, which is FRAUD!

Therefore, since government agents take an oath to uphold the constitution, EVERY SINGLE one of them need to be held accountable to We, the People. We need MORE accountability, not less!

Pat Cash — Jun 17, 2026
Subject: S7-2026-15 Comment From: Pat Cash Affiliation: Jun. 17, 2026 The only reason to change the sec rules is so that companies can hide. As someone who is retired and dependent upon my investments, I want quarterly financial reports.

Peace,

Pat Tetreault — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Pat Tetreault Affiliation: Jun. 17, 2026 Do the right thing and keep these companies accountable. Quarterly reports are reasonable. Stop catering to billionaires and consider what's best for everyday people who were forced to have privatized

retirement and rely on investments instead of pensions (like Congress has).

Pat Young — Jun 17, 2026
Subject: S7-2026-15 Comment From: Pat Young Affiliation: Jun. 17, 2026 bad idea. i am whole-heartedly against changing the reporting window. more time between reporting means less time to fix any problems (read: fraud) that arrises and more time for fraudsters to work the system. the reporting system has worked up until now - there's no reason to change it, the savings would be minimal. if, indeed, the current administration wants to "drain the swamp", changing the window will only make it worse, not better.
Patricia Young
Retired television producer

Patrice Fletcher — Jun 17, 2026
Subject: S7-2026-15 From: Patrice Fletcher Affiliation: Jun. 17, 2026 Quarterly reporting protects everyone, including the CEOs.

Patrice Fletcher
Chicago

Patrice Heimlich — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Patrice Heimlich Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Insider trading seems to be at an all time high. Now these new proposals on reduced reporting seek to make that even easier. Companies should have no problem releasing quarterly reports. That makes for a more honest and transparent market. Don't we want that? Investing is for everyone and you know it. So many average people are just realizing it and apparently that is a problem for corporate and "accreditated" investors? With speculative markets like ai, reduced reporting makes crashes harder when the news does come out and only hurts the small investors when those in the know already pulled out. Companies have the time and money to report quarterly and there should be no excuses or alternative options. Thank you.

PATRICIA ANN PAULK — Jun 17, 2026

Patricia Cleveland Educator — Jun 17, 2026
Subject: File No. S7-2026-15 From: Patricia Cleveland My name is Patricia Cleveland and I am an educator. Corporations, their CEO and boards already play too many games and are too selfish and greedy. If the rule changes to allow them to only report once a year thus opens hard working Americans up to even more fraud by corporate America. Keep the rule like it is! Stop bending the knee to the greedy selfish billionaires and trillionaires.

Patricia Davidson — Jun 17, 2026
Subject: Comment on S7-2026-15: URGING YOU TO KEEP QUARTERLY REPORTING From: Patricia Davidson Affiliation: Jun. 17, 2026 Dear Commissioners of the Securities and Exchange Commission:

I am writing to urge you to maintain quarterly reporting for business entities that have been required to do so.

I practiced law at a major law firm before becoming a judicial officer, and I represented major corporations as well as small businesses. I am also an investor.

I am convinced that quarterly reporting is important for the health of American business and financial institutions--not just important for the well-being and fairness to investors and consumers.

Please help our economy stay strong. Do not weaken the protections that the SEC regulations have provided.

I strongly urge you to keep the reporting quarterly to support our country's economic health and prosperity.

Respectfully,

Patricia Davidson
Retired Attorney
Columbus, Ohio

Patricia Davis — Jun 17, 2026
Subject: S7-2026-15 Comment From: Patricia Davis Affiliation: Jun. 17, 2026 No! Leave reporting at 3 months like it has been for over a century!

Patricia ("Patt") Davis
Dennys65girl@gmail.com

Patricia DeBruhl — Jun 17, 2026
Subject: File No. S7-2026-15 From: Patricia DeBruhl I don't agree with changing the reporting from quarterly to bi-annually. Consumers need more frequent reporting.

Patricia DeSanto — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Patricia DeSanto Affiliation: Jun. 17, 2026 I am not a financial analyst. I have a limited understanding of all of this investment business. The one thing I do know is this decision is pure evil.
I am a 71 1/2 year old widow recently retired female. I spent 49 1/2 years serving the public as RN. I only started putting money away for my self the last 22 years of my career after a divorce. I'm not sure I have near enough to last me to the end of my life, and I certainly cannot afford to lose 1/3 of my current balance. Why would you make a decision like this? People need to know quarterly what their investments are doing so they can make changes when necessary. Six months is a long time to hide from people what their investments are doing. By doing this, you will destroy a lot of lives.. We are looking for more transparency, not less.
Thank you for taking the time to read this comment.

Patricia Schoene — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Patricia Schoene Affiliation: Jun. 17, 2026 I am a 76 year old retired public school educator financially dependent on our investments and social security. In my life time, I have seen how lax regulations have led to financial recessions and worse. The investment markets need to be subject to close scrutiny to protect the financial well being of all investors. Right now it seems the current administration is overseeing a winner-take-all economy without regard to the working people of this country. Teachers, public servants of all kinds, have been modestly rewarded financially for their service to our society as a whole. The financial crises of 2007-08 was a result of lax regulation and investors passing the risk on to other unsuspecting individuals. This is a broad account of how financial markets were operating. But from my vantage point, the economy as a whole is structured to benefit a smaller and smaller portion of our population. The inequality in this country is really unsustainable in a functioning democracy. The SEC should maintain the current accounting system so financial planners, who people like me depend on for advice in investing, should have current, up to date information. Stop trying to go backwards.

Patricia Schoene

PATRICIA WILLIAMSON — Jun 17, 2026
Subject: Comment on S7-2026-15 From: PATRICIA WILLIAMSON Affiliation: Jun. 17, 2026

Washington wants to let every public company stop reporting its results each quarter and disclose just twice a year. We tried this once, between 1955-1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of our life savings.

Patti Reed Retired former business owner — Jun 17, 2026
Subject: File No. S7-2026-15 From: Patti Reed As a former business owner I believe that reporting should continue to be made quarterly. We must insist on accountability and transparency, especially in these volatile and worrying times. Too much damage can go undetected and devastate innocent, hardworking, everyday folks who need, expect and deserve for you dear SEC to PLEASE look out for us. Insist on Quarterly reporting. Thank you for your time.

Patti Roesner — Jun 17, 2026
Subject: S7-2026-15 From: Patti Roesner Affiliation: Jun. 17, 2026 My name is Patricia Roesner. I am a retired medical worker. I am writing in opposition to S7-2026-15. As a retail investor I believe Sarbanes-Oxley's requirement of quarterly reporting and executive sign-off is vital to keeping public companies honest. The new rules will cut that protection in half.
I believe the 8-K and press releases lack the accountability that is needed as they carry no auditory review.
Quarterly Certification costs an honest executive nothing to sign; It exposes fraud. Reducing it by half could cost me everything. Why roll them back?
It is concerning that the SEC itself seems to recognize and admit that the 8-K is weaker by asking how to patch the gap in protection. My answer is not a patch, but to keep the quarterly certification in place, as is. It’s working. Why change it?
These safeguards were put in place after Enron for a reason. What has changed since then that calls for reduced accountability?
Please continue the quarterly certification and ensure that no executive can claim “I didn’t know,” and that no boardroom in America is above or beyond the law.

Take that away, and I will not be able to continue living independently. Stop giving all of the economic advantages to those who don't need them.

Patty Satalia — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Patty Satalia Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
As an ordinary retail investor, I strongly oppose any effort to reduce financial reporting requirements from quarterly to semiannual disclosures. Quarterly earnings reports are one of the few tools that give individual investors timely access to the same basic information available to large institutions

and professional analysts. Reducing the frequency of those reports would make markets less transparent, delay the disclosure of important financial developments, and leave ordinary investors with fewer opportunities to make informed decisions about their savings and retirement accounts. Supporters argue that less frequent reporting will reduce burdens on companies and encourage long-term thinking. But as a retail investor, I have to ask: who actually benefits from receiving less information? It certainly isn't the millions of Americans who invest through retirement plans, college savings accounts, or personal brokerage accounts. Public companies are entrusted with shareholder capital, and shareholders deserve regular accountability. When transparency decreases, those with the greatest resources and access to information gain an advantage, while ordinary investors are left waiting longer to learn whether the companies they own are thriving or struggling. The SEC's mission is to protect investors, maintain fair markets, and promote transparency. Reducing disclosure requirements moves in the opposite direction.

Patty Schneider Gibson — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Patty Schneider Gibson Affiliation: Jun. 17, 2026 Patricia Schneider Gibson, Occupational Therapist, Saint Louis Missouri. Paul Harms — Jun 17, 2026
Subject: File No. S7-2026-15 From: Paul Harms I agree with Motley Fool that "…individual investors deserve more transparency, not less." As discussed in the Motley Fool online article, this change was tested in the U.K., and companies did not invest more long term, and executives did not stop seeking short-term profits. Individual investors do not have the resources of institutional investors. We need the standardized, certified, and directly-comparable-across-company 10Q to keep informed about our business investments. The "Management's Discussion and Analysis" section is important to understand the business trends. Quarterly reporting of balance sheets gives a critical view of companies in distress. Highlights: Quarterly reporting protects individual investors. Reporting frequency has no measurable effect on corporate investment behavior, according to research from the CFA Institute. Smaller less-covered companies would be harder to monitor without quarterly reports. This proposal moves away from Reg FD, which led to a more level playing field.

Subject: S7-2026-15 Comment From: Paul RealShady Affiliation: Jun. 17, 2026 Paul R, software engineer.

Are you trying to create another Enron or bear steals situation? Quarterly reporting will become less burden with ai tooling. If anything we should be requiring more frequent reporting to reduce trading with inside information possibilities.

If the reporting is burdensome then perhaps come up with adjustments to the burdensome parts, but don’t move to a twice a year reporting schedule.

This change would only serve to move information about companies to be inaccessible to all but the uber connected elites who have lines to the companies.

Paul Rosenthal — Jun 17, 2026

Paula Mandell — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Paula Mandell Affiliation: Jun. 17, 2026 Submitted by Paula Mandell
Retired
Miami, Florida

As a retiree who lives off, in part, my retirement funds, I stand to lose considerably if reporting becomes semiannual. Semiannual reporting between 1955 and 1970 provided less transparency, and lower returns and lower valuations.

Valuations have increased substantially since reporting changed to quarterly. This one bad idea that will further impoverish people who are already struggling to be able to someday retire.

I unequivocally do not support this proposed change.

Pen Campbell — Jun 17, 2026
Subject: S7-2026-15 Comment From: Pen Campbell Affiliation: Jun. 17, 2026 My name is Penelope Campbell. I am a retired teacher, a recent widow who relies on quarterly reports to make decisions about my investments that will support me for the rest of my life and hopefully pass on to our children a nest egg my husband and I worked to establish. These proposed longer gaps in reporting

will not benefit me or my children. They will only create an unfair advantage for corporate insiders. The minor savings to companies are not worth the cost to me, my children, and other investors. Please retain the current system of quarterly reporting.

Peta Hoyes — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Peta Hoyes Affiliation: Jun. 17, 2026 As an individual investor, transparency and frequency in company reporting is everything. Increasing frequency from semi annually to quarterly has helped protect investments in US markets historically. Generally speaking, most average individual investors don’t have access to company information like institutional investors. So we rely heavily on quarterly reporting. This would be a continuation of the Rollbacks of the rules of reporting and transparency are what caused some of our most devastating economic crises of the last 2 decades. Sadly, the Federal government appears to be doing the same thing again in other arenas allowing companies to do IPOs (NASDAQ) without meeting historical standards. All of these actions taken together only serve a certain level of investor class, and bilk

another who have lower access to information and ability to buy in early. Peta Hoyes, Individual Investor, NYC

Peter Levitan — Jun 17, 2026
Subject: S7-2026-15 From: Peter Levitan Affiliation: Jun. 17, 2026 As a retired ordinary investor and a former legal and finance executive and law school professor, relying on my investments for retirement finances, I believe regular quarterly reporting is essential for investor protection and confidence, corporate accountability, and national economic stability. To weaken that protection, confidence, and accountability, as the pending proposal would do, would be disastrous.

Peter Levitan
Los Angeles, CA

Peter Pasterz — Jun 17, 2026
Subject: S7-2026-15 Comment From: Peter Pasterz Affiliation: Jun. 17, 2026 My name is Peter Pasterz. I object to this reduction in financial reporting time frame from quarterly to semi-annually. If anything, we need more frequent public reporting, not less. As a small, individual investor, and not a Wall Street insider, this is really the only official view of a company's position. This only works to help hide malfeasence and any purported cost savings would not go directly to investors.

Please reject this proposal.

Peter Sherman BCE, llc — Jun 17, 2026
Subject: File No. S7-2026-15 From: Peter Sherman I am strongly opposed to the proposed change in S7-2026-15 of eliminating quarterly filings in favor of semi-annual reporting requirements. As an individual investor, I highly value the information provided by quarterly filings and deserve the protection provided by them. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to

own. This proposal is a move in the wrong direction. Regulation FD moved toward a more level playing field. This proposal moves away from it. Per the WallStreetBets comment letter: "The companies we trade are not being held back from greatness by the obligation to file four reports a year. ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well." Thank you

Phyllis Wilkes — Jun 17, 2026
Subject: S7-2026-15 From: Phyllis Wilkes Affiliation: Jun. 17, 2026 We are writing to express profound concern regarding any potential adjustments to the current regulatory framework mandating frequent financial disclosures, such as quarterly reporting. These standards are not merely bureaucratic formalities but serve as foundational pillars for maintaining integrity and transparency within our financial markets.

The existing requirement for regular financial updates significantly enhances corporate accountability, compelling companies to operate with greater openness. This constant scrutiny allows investors, analysts, and the public to remain well-informed about a company's financial health and operational performance, fostering a more equitable and trustworthy economic environment. The costs associated with such reporting are primarily absorbed by the corporations themselves, presenting a minimal direct burden to the government while yielding immense public benefit in the form of market stability and investor confidence.

Weakening these safeguards could have severe and far-reaching consequences, particularly for the most vulnerable stakeholders. These provisions are crucial in protecting ordinary individuals—including retirees, small-scale investors, and employees—from the devastating impact of corporate mismanagement, accounting irregularities, or outright fraud. We have witnessed firsthand the tragic repercussions when such protections are insufficient, with countless individuals losing their life savings due to the reckless actions or deceptive practices of corporate leadership.

It is imperative that the responsibility for robust and timely financial transparency remains firmly with corporations. Any move to dilute these reporting requirements risks inadvertently creating an environment ripe for less scrupulous practices, ultimately eroding public trust and undermining the stability of our economic system. Upholding these standards is not just about compliance; it is fundamentally about safeguarding the financial well-being of our citizens and ensuring a fair market where corporate leaders are held accountable for their actions.

Please stay with mandatory quarterly report outs. Private companies report it internally on a monthly basis. Public should at least do it quarterly.
Thank

Please excuse brevity. Sent from my iPhone

President and VP — Jun 17, 2026
Subject: Comment on S7-2026-15 From: President and VP Affiliation: Jun. 17, 2026 DO NOT allow public companies to stop reporting their financial results quarterly and revert to disclosing just twice a year. We tried this once, between 1955 and 1970. Reliable fiscal transparency is imperative for the vast majority of small dollar investors who depend on healthy increases of their portfolio. The same applies to pension funds. If returns slow significantly, millions of Americans will be thrown into a lower economic situation and may rely increasingly on government assistance. When we had semiannual financial reporting, we had lower returns and lower valuations. For an ordinary investor like me, a return to those days could mean losing a third, or even half, of my investments.

Robert Miller

Rae Ann Herman — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Rae Ann Herman Affiliation: Jun. 17, 2026 My name is Rae Ann Herman, and I am a retired school teacher in Miamisburg, Ohio. I taught English and Language Arts in a medium-sized suburban school district, loving what I did, but certainly not making a wage commensurate with my educational background and the time spent out of the classroom preparing for the work I would do IN the classroom. Nevertheless, I was able scrimp and save enough to get my daughter through college with no student loan debt and to build a nice nest egg. It would certainly be a kick in the teeth to now have that savings depleted by a third or more! Please leave the reporting requirements alone and continue to have companies report their earnings and transactions quarterly. Haven’t we lost enough money and benefits? Thank you for your request for citizen input.

Rae Naomi — Jun 17, 2026
Subject: S7-2026-15 From: Rae Naomi Affiliation: Jun. 17, 2026 Those who knowingly create false statements need to be punished for creating the falsehoods. Just because someone has a lot of money does not make it right for them to get essentially a get out of jail free card. If it was someone stealing from a store, that person would be tried and jailed. If a person does wrong, they usually are

corrected.
This matters to me because this adds to the greed that is plaguing America and those who steal or create fraud should be punished. When they aren't, it gives a bad example and makes people think that they could get away with anything.

Rand Barrett — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Rand Barrett Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission: I believe that going from quarterly to semi-annual reporting will

disadvantage smaller investors and advantage large investors. We have already seen an explosion of what is essentially insider trading on platforms like Kalshi and Polymarket. By allowing companies to withhold information for longer periods the opportunity for people with inside knowledge to exploit that information will only become greater. In addition, this will create the appearance that the SEC is fully controlled by a political administration that has been widely characterized as kleptocratic. This alone will damage public trust and significantly increase future political pressure on SEC decision makers. I hope that SEC makes a proper decision that considers long-term consequences.

Respectfully, Rand Barrett

Raymond Wagner — Jun 17, 2026
Subject: S7-2026-15 Comment From: Raymond Wagner Affiliation: Jun. 17, 2026 The system works as it is. Companies with public, retail investment need to be transparent to individual stockholders. People need to have more information to make sound investment decisions, not less.

RC Financial Services Employee — Jun 17, 2026
Subject: File No. S7-2026-15 From: RC I am compelled to submit a comment on this proposed ruling (rare occasion). I have been working at financial services companies for over 16 years. And have been investing in stocks for more than 25 years (since the internet bubble). It is unbelievable and unrealistic that the SEC would propose the easing of financial info reporting - knowing - I repeat - knowing - that companies would welcome any opportunity to not disclose info that may not benefit their cause. The result of less transparency is that investors, shareholders, and "Main St" are placed at much greater disadvantage by finding out much later about financial mishaps - that eventually impact the livelihood of so many folks. Does the SEC have the capacity to learn from most past scenarios where economic messes were caused by inadequate/insufficient disclosure by the financial industry ? This proposed rule change is based on absolutely no common sense. And the so-called benefits of "deregulation" cannot be a justifiable defense for proposing this rule change.

Re B — Jun 17, 2026

Donaldsin Development and Design, llc
Owner/CEO
Kalispell,MT

Dear SEC,
This action would undoubtedly create more opportunities for CEO’s to flat out lie to stockholders, employees and the public about the true health of a corporation and it’s financial standing.
This change has no logical reason to improve reporting of a company’s health to all parties effected by the truth being told.
“NO!” to semi-annual signatures!!! Keep it at quarterly.

Richard Engle — Jun 17, 2026
Subject: S7-2026-15 From: Richard Engle Affiliation: Jun. 17, 2026 This is so stupid. How much are you getting paid to change the law? KEEP THE LAW AS IS. The opportunity to cheat is still there as the law is . DONT make it any easier.

Richard Joyce — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Richard Joyce Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
I wish to make my opinion known on this issue.

I oppose this rule. Period.

Changing to a semiannual reporting structure takes information out of my hands that I need to make long term decisions regarding my retirement portfolio and brokerage accounts.
It also could allow companies to hide legitimate data that shows their company failing.
The argument that quarterly reporting forces companies to look at short-term metrics versus a long term outlook is not a problem with the current reporting system but a problem with how said companies are run.
Not to mention the proposed rule change would give institutional investors an advantage over retail investors.

Please do all your retail investors a solid and do NOT pass this rule.
Continue to require quarterly reports.

Richard Joyce

Richard Kuipers — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Richard Kuipers Affiliation: Jun. 17, 2026 Please provide fact based reasoning why it would benefit investors to do away with the current roles.

What the SEC is proposing is a step back in every sense of the word.

RK Mahendran — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: RK Mahendran Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Regular quarterly reporting increases transparency and helps retail investors get a much more accurate and timely view into a business, its financials, and its strategy. The quarterly filings accompanied earnings calls are a great way to hear from management on the business, along with pressure testing from analysts during the Q&A portion. Given retail investors lack the access to management teams and investor conferences, this proposal would disproportionately hurt us. Quarterly reporting is one of the bedrocks of the American equity markets and taking it away would not serve anyone except perhaps, malfeasance at the corporate level.

Robb Del Casale — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Robb Del Casale Affiliation: Jun. 17, 2026 Keep the Corporations’ and Companies’reporting’s being done on a QUARTERLY basis!

Transparency is good for EVERYONE.

Stop catering to the oligarchs!

Robb

Robbie Low — Jun 17, 2026
Subject: S7-2026-15 Comment From: Robbie Low Affiliation: Jun. 17, 2026 I am a small time investor who needs to analyze how businesses are doing. I need time to plan. Stop the insanity that would allow big businesses to profit off of investments by regular people. Keep the reporting quarterly. Don’t help businesses screw over the public.

Robbie Paul — Jun 17, 2026
Subject: S7-2026-15 Comment From: Robbie Paul Affiliation: Jun. 17, 2026 I am against this. I have investments. And my experience as a CPA says monthly reporting would be best. But my practical side will tolerate quarterly reports. sheesh. Stop messing with citizens that aren't corporations.....

Robbin Boyle — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Robbin Boyle Affiliation: Jun. 17, 2026 The Foxes are in charge of the hen house.
The SEC has been captured by the Heritage Foundation. A global economic collapse is on the way.. .skipping over 1955 and straught to to 1929!

Robert — Jun 17, 2026
Subject: S7-2026-15 Comment From: Robert Affiliation: Jun. 17, 2026 One primary reason the United States is home to the largest capital market in the world is that our securities regulation regime is designed to prevent the big players and those in whose businesses investors are invited to invest from cheating or manipulating information for their own benefit. We do this better than anyone else. Ending quarterly reporting is the first step to dismantling protection for investors. This is antithetical to the main mission of federal regulation of the securities market. It will make some big players well off and make things worse for the rest of us.

Robert Dorsey, Attorney

Robert Kelly — Jun 17, 2026
Subject: S7-2026-15 Comment From: Robert Kelly Affiliation: Jun. 17, 2026 The importance of SEC filings like quarterly reports and supporting conference calls are extremely important to us retail investors. The transparency it provides stockholders, of which I am a long term investor in a handful of companies, serves to educate on business challenges and opportunities. You can't have investors, including mutual fund managers, effectively reduced to throwing darts in a dark room. Protct investor, not politician, interests.

Robert Kelly, individual investor, KS

Robert Korb — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Robert Korb Affiliation: Jun. 17, 2026 NO! More transparency is needed. Not less. I am 73 and semi- retired in Virginia. I rely on my lifetime of investments and social security to maintain a reasonable standard of living after a 45 full years of work. There is historical perspective on this and the lesson is clear: Less transparency and less regulation will result in corporate profit taking and decisions that will ultimately devalue my portfolio. A DECISION TO REMOVE QUARTERLY REPORTING OS VERY LIKELY TO HAVE A NEGATIVE MATERIAL EFFECT ON THE LIFE OF MYSELF AND MY FAMILY. Please stop this now and maintain the quarterly reporting as it is. The is NO NEED to make this change at this point in our collective history.

Robert Korb

Robert LaMorte — Jun 17, 2026
Subject: S7-2026-15 From: Robert LaMorte Affiliation: Jun. 17, 2026 Enough is enough! Corruption is not the answer to corruption! We have a set of regulations in place that have worked effectively for a long time! Keep your filthy hands off!

---

Robert Walker — Jun 17, 2026
Subject: S7-2026-15 Comment From: Robert Walker Affiliation: Jun. 17, 2026 This removes what transparency there is in the system forcing investors to fly blindly and creates an informational void. Those within the protective bubble are the only ones who benefit from this void. This removes the aspect of fair trade and transparency. If adopted, it will take us further away from capitalism and move us closer to an oligarcial society.

A better option which would create more transparency would be to require monthly reporting. With modernized systems in place and not the antiquated systems of 100 years ago, it is viable and provides 3x the transparency as quarterly reporting.

Robert

Robert Wall — Jun 17, 2026
Subject: S7-2026-15 Comment From: Robert Wall Affiliation: Jun. 17, 2026 Robert Wall:Retail CSR, Author, Digital Designer

There are enough unfortunate loopholes, exploits, and such for the unscrupulous as it is. What is being proposed would create an information gap that is vital to mid to small-sized, well-informed investors and proper client-first management. This would allow blind spots for issues to be hidden from even the SEC, if you're not realizing the potential for disaster that this would allow its gravely concerning. Please step back and think about the worst-case scenario. Please remember that "almost" every single rule and regulation exists because at least one person did it or thought about it enough to realize that although improbable it was possible.

Robert Waring — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Robert Waring Affiliation: Jun. 17, 2026 Why revert to a system that did not work then, and will not be as meaningful as the reporting system we presently have?
It only serves corporate interests, not your constituents.

Roni Ires — Jun 17, 2026
Subject: S7-2026-15 From: Roni Ires Affiliation: Jun. 17, 2026 Don't decrease our protections against corrupt CEOs. We need quarterly reporting! I am a regular working class person with big concerns about this proposed change.

Ronnie — Jun 17, 2026
Subject: S7-2026-15 Comment From: Ronnie Affiliation: Jun. 17, 2026 I am writing to respectfully advocate for the continuation of quarterly investment reporting. For a significant number of investors, particularly those in retirement or relying on fixed incomes, consistent and predictable access to detailed financial performance updates is absolutely essential.

As a retired individual myself, I depend on these regular reports to effectively monitor market conditions, assess the stability of my investments, and make informed decisions to safeguard my long-term financial well-being. Quarterly statements provide a critical balance, enabling thorough oversight without creating an undue burden of constant monitoring, which is especially important for those managing their finances after concluding their careers.

Maintaining this reporting frequency is paramount for prudent financial planning, proactive risk management, and mitigating the potential impact of market volatility on retirees' portfolios. It equips investors with the necessary tools to track their assets diligently and protect against significant downturns.

Therefore, I urge you to consider the substantial benefits of retaining quarterly investment reporting for all stakeholders, particularly those within the retired community.

Sincerely,

R. Drage
(Retired SFC, U.S. Army; Retired Nurse)

Subject: Comment on S7-2026-15 From: Ronnie Crockett Affiliation: Jun. 17, 2026 Ronnie Crockett - Lead Technical Business Manager - Atlanta, GA.

Reporting needs to remain quarterly! We need full transparency and frequency in reporting allows for that. We need to learn from our history and not go backwards.

Ronnie H. Jimenez None — Jun 17, 2026
Subject: File No. S7-2026-15 From: Ronnie H. Jimenez Sir, It has come to my attention that a proposal is now on the table to allow companies to elect to reduce the number of public-company reports from four times a year to just two. I totally disagree with this. All companies should be required to report their result quarterly. Anything less than this would keep individual investors in the dark. It is imperative that we be able to analyze their reports quarterly. As a retiree, it gives me the opportunity to be able to adjust my portfolio quarterly if applicable.

RUTH PATIENCE'MIDCAP — Jun 17, 2026
Subject: S7-2026-15 From: RUTH PATIENCE'MIDCAP Affiliation: Jun. 17, 2026 We advocate for the continued requirement of quarterly financial reporting for publicly traded companies. This practice is fundamental to maintaining transparency and robust investor confidence within our financial

markets.

Regular disclosure of financial results provides crucial insights that enable shareholders, analysts, and the wider public to make informed decisions. It ensures a consistent flow of information regarding a company's operational performance, financial health, and strategic trajectory, fostering an environment of accountability for corporate leadership.

Eliminating or significantly reducing these reporting mandates could lead to diminished oversight, create an information vacuum for investors, and potentially introduce increased volatility and uncertainty into the market. Quarterly updates serve as essential checkpoints that promote corporate discipline, facilitate the timely identification of emerging trends or potential risks, and reinforce a commitment to both short-term performance and long-term value creation.

Upholding strong quarterly reporting standards is paramount for fostering a fair, efficient, and transparent financial ecosystem that ultimately benefits all stakeholders.

Ruth Robison — Jun 17, 2026
Subject: S7-2026-15 From: Ruth Robison Affiliation: Jun. 17, 2026 My name is Ruth Robison. I live in Hilo, Hawaii. I am retired. Ryan Mcpartlan — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Ryan Mcpartlan Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Longer reporting windows mean that there is more time for bubbles to form and is bad for Americans. With modern tools it should be easier, not harder, to increase transparency.

Ryan Moore — Jun 17, 2026
Subject: S7-2026-15 From: Ryan Moore Affiliation: Jun. 17, 2026 I'm Ryan Moore, a contractor working in airfield maintenance. Please retain quarterly reporting and ensure that we are holding corporations accountable. It has been proven time after time that corporate self-regulation dies not work and has destructive consequences.

Ryan Oosthuysen — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Ryan Oosthuysen Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
If you buy shares in a company ; your buying an asset.

normally you like to check up on things you own. Imagine buying a house but not being allowed to check up on the inside of it?

You need to know how your asset is performing; it's the right of ownership.

Quarterly reports allow for that check of asset performance and are a bare minimum and need to remain in place.

By removing that check on performance you are removing the incentive to buy shares. If you cannot assess the performance of an asset you may as well by playing monopoly.

Monopoly is a game ; running the wealthiest economy on the planet is not a game .

R Oosthuysen

Ryan Weiss — Jun 17, 2026
Subject: S7-2026-15 From: Ryan Weiss Affiliation: Jun. 17, 2026 If it's because you don't have enough staff to process, okay. Otherwise, this should always be mandatory at this level. If it's twice a year, fine, but double the fines.

Sam Moody — Jun 17, 2026
Subject: S7-2026-15 Comment From: Sam Moody Affiliation: Jun. 17, 2026 It is insane to not require quarterly financial disclosure on publicly traded companies. It is irresponsible to the public that this is even being considered. Unscrupulous company executives could o tail favorable financing terms, do business with unsuspecting companies and go bankrupt before their various vendors would know. The employees, rank and file, pension plans could be jeopardized without them knowing. How would IRS know if their tax payments were correct? How would their debt holders know if their balloon notes would have enough cash to honor them? This is loaded with issues that could destroy our economy.

Samantha Carr — Jun 17, 2026
Subject: S7-2026-15 From: Samantha Carr Affiliation: Jun. 17, 2026 Do NOT short change Americans by cutting out much needed oversight for keeping companies honest. Do NOT cut quarterly reporting.

Samuel Monk — Jun 17, 2026
Subject: S7-2026-15 From: Samuel Monk Affiliation: Jun. 17, 2026 A quarterly report keeps those who are responsible for corporate integrity and compliance reminded that with position comes responsibility. Analysts and investors rely on honest and timely reporting. “Locks keep honest people honest.”

Sandra Boone — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Sandra Boone Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
It's important in a democracy to keep transparent. Our country has enough problems already and you're considering taking this critical information away?? You will lose investors supporting our country's businesses by doing this. It creates an overwhelming LACK OF TRUST in the stockmarket and The SECURITIES AND EXCHANGE COMMISSION!!!! What else do you have up your sleeve!!!!

You are trying to take away our INDEPENDENCE ONCE AGAIN and make it harder for us to make the right choices!!!! Of course, this will be privlidged information for select people!!! Why are you even considering this!!! We need good people behind us that look out for us, not people who keep information to themselves!!!! Do you want the country to go down Hill even more???? Our country is built on a DEMOCRACY.!!!! This just makes me beyond angry!!!! We hear so many LIES now from our government it PREVENTS US from having any kind of FAITH IN OUR COUNTRY!!!! HOW DO YOU EVEN SLEEP AT NIGHT????

sandra cook — Jun 17, 2026
Subject: S7-2026-15 From: sandra cook Affiliation: Jun. 17, 2026 Sandra Cook. Retired medical office manager/nurse, Pensacola, FL.
Please continue cto hold the SEC accountable quarterly. There is no reason to decrease accountability with other people's monies and livelihood. It's not that hard or time-consuming to do what is correct and legal. To remove that opens opportunity for illegal, immoral and corrupt actions. If it is too difficult, replace them with others who arent trying to cover up.

Sandra Cook

Sandra Grata — Jun 17, 2026
Subject: S7-2026-15 Comment From: Sandra Grata Affiliation: Jun. 17, 2026 Please do NOT discontinue quarterly reporting in favor of six month reporting.

I invested wisely during my career, and this is a source of income for me. Companies should be required to report at MINUMUM quarterly.

Thank you,
SM Grata

Sara A Elkins — Jun 17, 2026
Subject: File No. S7-2026-15 From: Sara A Elkins I am old enough to remember the disaster of Enron and their CEO"s that caused their corporation to fail. Concerned people read about Enron"s many staff that had paid into pension plans for decades and close to retirement were left with nothing and too old to start over. Only because of this economic disaster that shook the U.S. economy was the new requirement made to CEO"s of large companies to file their financials quarterly. If that requirement is watered down to twice a year there will likely be more Enrons and the economic fallout will be even worse. If this change happens during the Trump years it will be seen as an economic failure of his White House team and a failure of the GOP leaders in Congress..

Sara Grimm — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Sara Grimm Affiliation: Jun. 17, 2026 The U.S. reported quarterly while winning wars, landing on the moon, and building the most valuable stock market on Earth. The corporate myopia blamed on quarterly reporting is, in the words

of one finance scholar, simply not supported by the evidence. If it isn't broken, don't break it. Sara G.

Sarah Goode Public School Educator — Jun 17, 2026
Subject: File No. S7-2026-15 From: Sarah Goode I believe that the proposed semi-annual reporting should be tabled. Quarterly reporting was enacted to allow more transparency with the hope that increased transparency could support more steady growth. Quarterly reporting has been successful in its aspirations. Semi-annual reporting would curb those successes: lessening transparency, and increasing volatility. Please maintain quarterly reporting. Thank you for the freedom to comment.

Sarah Lopes — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Sarah Lopes Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
This proposed change has overwhelmingly negative consequences. 99% of Donald Trump's ideas are bad, and this falls into that category. It's quite clear that the motivation is to allow a small group of insiders to manipulate and plunder the market while the masses are left in the dark. Please say "no."

Sarah S — Jun 17, 2026
Subject: S7-2026-15 Comment From: Sarah S Affiliation: Jun. 17, 2026 Every investor needs to be treated the same no one should have inside information. This is getting more and more ridiculous all the time. I am not a person of glossy words but I know right from wrong and it is wrong for the wealthy to get information that the average investor does not get. Thank you

---

Sarah Young — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Sarah Young Affiliation: Jun. 17, 2026 I'm sure there are many reasons that the wealthy and those working in the financial sector would like less reporting and less transparency, but I hope that the SEC will do the right thing and protect the US economy and the public. If we have learned anything in the past several years, it is that our institutions are not corruption-proof. The untold damage that has been done to out government, our trusted watchdogs, and governing bodies and institutions will take years to discover and repair. We need safeguards in place as we cannot inherently trust those at the top to do the right thing. Please do not roll back and destroy the protections and transparency that have strengthened our economy. We need someone keeping them honest.

Sarah Young, disappointed and heartbroken citizen

Subject: S7-2026-15 From: Shari Adkisson Affiliation: Jun. 17, 2026 We must maintain the quarterly reporting as it gives execs less mandated reporting allowing for less accountability Shari Adkisson 2000 1st St # N4 Alamogordo NM

Shari Trefethen — Jun 17, 2026
Subject: S7-2026-15 Comment From: Shari Trefethen Affiliation: Jun. 17, 2026 Quarterly reporting continues to benefit the largest number of people and entities with honest goals and intentions. Changing to longer gaps between reporting,1) has already been tested elsewhere in the world and the results have shown the actual compliance savings are modest, 2) results in degraded information flowing to ordinary investors and consumers (people the SEC is supposed to protect), 3) creates an unfair advantage for corporate insiders.
"Optional" isn’t helpful because companies that opt in are often the ones whose investors most need frequent updates. The savings to companies aren't worth the cost to me and investors like me. There are better ways to reduce reporting burden that don't degrade transparency for the average investor.

I rely on quarterly information to make decisions about my investment portfolio.
KEEP REPORTING QUARTERLY!!!
Thank you, Shari Trefethen

Sharla Stanek — Jun 17, 2026
Subject: S7-2026-15 Comment From: Sharla Stanek Affiliation: Jun. 17, 2026 Hello
I oppose this bill.
This bill, moving the reporting to 6 months, will allow More time for fraud to grow.
Enron. WorldCom. Madoff. The run-up to 2008. Every major modern accounting scandal was enabled by gaps and opacity in financial disclosure. Quarterly filings don't prevent fraud, but they dramatically shorten the window in which it can fester before someone outside the company can see it. What if Enron only had to cook their books twice a year?
Also the savings is minimal.
Sharla Stanek

Sharon E. Conway — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Sharon E. Conway Affiliation: Jun. 17, 2026 My name is

Sharon E. Conway and I live and work in The Woodlands, Texas. I am an attorney with over 35 years of experience. I currently own my own law firm, but I have previously been in-house counsel for a publicly-traded company.

Quarterly reports are ESSENTIAL. They help not only original investors, but also internal staff as well as potential investors to understand how that business is doing. Removing the quarterly reports takes away too much information from both current and potential investors – information they are entitled to in order to make sound decisions regarding that investment. Regulators also need this information to help root out corruption (though I am well aware that the current administration is a fan of corruption, since we see them engaged in it daily).

Quarterly reports are NECESSARY and IMPORTANT. Removing this requirement would cause significant harm and many investors will get burned. Do not remove the quarterly report requirement.

Sheri Russell — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Sheri Russell Affiliation: Jun. 17, 2026 Sheri Russell-Benabou, CFO Carson City Nevada. There is a reason for all regulations, and going backwards is not the way. This will create a trust issue with the stock market and there will be a crash! Getting information quarterly allows stockholders to monitor their ownership and make investment decisions. Without that information, I for one would not be investing in the stock market. Make the quarterly reporting more streamlined, but underlying information would still be subject to audit as it is now. This is how you continue to hold companies accountable. Deregulation doesn't mean tossing them all out the window, to me it means streamlining the process. What are we getting out of this? investor confidence. Okay, that is very important. So then, how can we make it simpler and still provide information while relieving some of the burden to the company. Going backwards to 1955 rules is like saying, let's go back to using a typewriter or an 8 track tape. There are reasons that rules and technology progress. Maybe quarterly reporting doesn't need the same level of audit, or maybe the size of the company, or the dollar valuation of the stock dictates the level of audit? Quarterly reporting allows for some level of investor confidence, and without it, the stock market will crash. There are many other investment vehicles.

Sheri Russell-Benabou

Shine Rogers — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Shine Rogers Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Please reconsider your proposed rule to reduce reporting requirements and public posted financials. "Retail" Main Street investors are already severely handicapped; without Bloomberg advanced data and news, delayed data feeds without fees, order fill that favors the brokerages, and a host of other aspects that radically increase the risk to small investors in favor of buisness and brokerages. We need more transparency, data that is not delayed or manipulated, and more frequent financial updates, not less, if anything. In this modern age companies know exactly where they are to the penny at any moment and have computer reporting to show it, they should be required to provide investors with mor up to date information than they already do, given the current rules were created a generation ago when the collation of the information was much more difficult to produce.

thank you.

Souhail Chakri — Jun 17, 2026
Subject: File No. S7-2026-15 From: Souhail Chakri More information is always better, why let companies hide more?

SPD — Jun 17, 2026

Subject: S7-2026-15 From: SPD Affiliation: Jun. 17, 2026 To the SEC,
Having been responsible for SEC reporting for most of my career, the value and importance of current information to the public can't be dismissed.

Frequent reporting incorporates the internal process in preparing the reports for multiple reviews, analysis and verification of the data. Accuracy is improved when publications are reviewed at the multiple levels. Quarterly reporting keeps executive levels involved more frequently.

Please maintain the quarterly reporting. It is the responsible thing for maintaining high standards.

Regards,
Sallie Diederich
Retired CPA & Management Consultant to Financial Services Industry

Spring Gates — Jun 17, 2026
Subject: S7-2026-15 Comment From: Spring Gates Affiliation: Jun. 17, 2026 Spring Gates, BSN, RN - Medically Retired Cath Lab Nurse
There is no sound financial reason why businesses should not report quarterly, as they have been doing. This gives investors, big and small, a window into what is going on with the companies they

are putting their hard earned money into. By removing this quarterly reporting, investors are left without the information they need to determine if they wish to keep investing in that company (companies) or not. Insiders may be able to divest themselves before the public is aware of any problems and are then left holding a bag of worthless stock. This hardly seems like a fair and equitable way to treat people who have invested in the company (companies), no matter how much that is. I, and many others, urge you to reconsider this change in policy.

Spring Gates

STACY NORRIS — Jun 17, 2026
Subject: S7-2026-15 Comment From: STACY NORRIS Affiliation: Jun. 17, 2026 Stacy Norris; retired teacher; I am heavily invested in the stock and bond markets through my state employee pension plan.
In matters of finance, there cannot be too much or too frequent transparency. Irregularities need to be caught sooner, rather than later, to be minimized and attributed to the culpable people or perhaps even to technical glitches.
Investors and investment firms themselves deserve vigorous and timely oversight.
A three month delay in the discovery of embezzlement, malfeasance, or technical/system failure can make the difference between a recoverable loss or salvageable business/retirement investment and irrevocable damage/failure.

Stephanie Heinrichs — Jun 17, 2026
Subject: S7-2026-15 Comment From: Stephanie Heinrichs Affiliation: Jun. 17, 2026 This is an obvious attempt to get away with illicit deals and corruption by allowing time to doctor records, and I am not falling for it. If I could have them reporting everything WEEKLY I would, but at the VERY least quarterly. Who would allow this? This is blatant corruptive insanity!

Stephanie James — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Stephanie James Affiliation: Jun. 17, 2026 I am writing to express my strong opposition to the Commission's recent proposed amendments aimed at scaling back the mandatory reporting framework and dismantling established investor notification and market display mechanisms. While the stated goal of these proposals is to reduce regulatory burdens and facilitate capital formation, the practical effect will be a severe degradation of information transparency, market clarity, and foundational protections for individual retail investors like myself.
As a retail investor, I rely heavily on consistent, structured, and predictable information to make informed financial decisions. The proposed shift toward a "private ordering" model—specifically the implementation of voluntary semiannual reporting on the proposed Form 10-S in lieu of standard quarterly Form 10-Q filings—represents a dangerous step backward for market transparency. Limiting corporate updates to a six-month cadence means retail investors will be left trading in the dark for extended blocks of time. Institutional investors and corporate insiders possess sophisticated tools and networks to glean real-time corporate health data; individual retail investors do not. Eliminating mandatory quarterly updates effectively institutionalizes an information asymmetry that disadvantages everyday market participants.
Furthermore, I am deeply concerned by the tandem proposals within Regulation NMS to rescind Rule 611 (the Order Protection Rule) and Rule 610(e) (the locked/crossed market provisions). Removing the requirement to prevent locked or crossed markets directly harms the clarity of displayed market data. Allowing these fragmented quotes to be broadcast under the Vendor Display Rule will introduce massive confusion into retail order routing. It compromises our ability to easily see and secure the true best available prices, undermining the public's confidence in the integrity of everyday trading infrastructure.
The SEC's primary mandate must remain the protection of investors and the maintenance of fair, orderly, and efficient markets. Relieving corporations of timely reporting burdens and reducing intermarket price protections at the direct expense of retail visibility does not fulfill that mandate.
For these reasons, I urge the Commission to reject these rollbacks, preserve the mandatory quarterly reporting framework, and maintain robust, centralized price display rules that ensure retail investors have an equal, transparent playing field.
Thank you for your time and your consideration of these comments.

Steve FLEISCHUT — Jun 17, 2026
Subject: File Number S7-2026-15 From: Steve FLEISCHUT Affiliation: Jun. 17, 2026 SEC,

As an individual investor, I rely on quarterly 10-Q filings to make informed decisions about my portfolio. These reports provide audited, legally certified information that voluntary corporate communications simply cannot replace. Reducing filing frequency to semi-annual would cut in half the verified financial data available to retail investors like me — precisely the investors who own the majority of shares in smaller public companies most likely to adopt the new option. I urge the Commission to reject this proposal and preserve the investor protections that quarterly reporting provides.

Best,
Steve

stuport — Jun 17, 2026
Subject: Comment on S7-2026-15 From: stuport Affiliation: Jun. 17, 2026 As a stockholder in dozens of U.S. companies it is ludicrous not to provide stockholders the quarterly information needed to make timely financial decisions. With the benefit of ai, reporting should be more often, not less. Without frequent updating I believe this could further serve mainly the interests of those whose wealth likely affords them an information advantage. Shame on those who are pushing for this regressive measure.

Susan Aldrich — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Susan Aldrich Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission: Proposed changes

I disagree with the proposed changes to rollback financial reporting to less disclosure and only reporting twice a year versus quarterly. Also why is insider trading by tRump, his family, the cabinet, the senators, the representatives and anyone else being held accountable. The SEC has no problem jailing Martha Stewart for insider trading why are the previously mentioned individuals not being held accountable. Is the SECowned by tRump and maga now? WhenI had a financial license we made sure all rules were followed. Please advise the change in accountability and why the change.
Thank you

Susan Niles — Jun 17, 2026
Subject: Comment on Semi Annual Reporting - S7-2026-15 From: Susan Niles Affiliation: Jun. 17, 2026 I do not support changes to quarterly reporting!

We cannot afford the impacts to our savings you will create with this change! It's been tried before and investment professionals agree it's a bad idea for investors!

Reducing reporting frequency devastates small investors by stripping away the timely financial data they need to safely protect their life savings.
The key negative impacts include:
Hidden Financial Traps: Six-month reporting gaps allow corporate financial trouble to brew undetected. Small investors can lose their entire life savings before a problem ever becomes public. Severe Market Crashes: Less frequent data causes massive, sudden stock price drops on earnings days. These unexpected crashes wipe out retirement portfolios instantly without warning. Unfair Institutional Advantage: Wall Street funds employ armies of analysts to dig up private corporate data. Retail investors rely solely on public reports, leaving them trading completely blind. Exploitation by Insiders: Longer public blackout periods give corporate insiders more time to sell off their own stock. They protect their wealth while leaving everyday savers holding worthless shares. q

Sue Taylor

Susan Tidwell — Jun 17, 2026
Subject: S7-2026-15 Comment From: Susan Tidwell Affiliation: Jun. 17, 2026 I am Susan Tidwell, widowed, retired, and living in middle Tennessee. I oppose the change from required quarterly reporting to bi-annual reporting. I have been an investor in the stock market for 30+ years, thereby being a supporter of the financial growth and stability of our country's economy.

I deserve and require at least quarterly financial reporting in order to make informed decisions concerning my current and future investments. It is hard enough making the decision to trust and invest with the limited information we currently receive. I would be hesitant to remain invested and would not make further investments in the stock market if reporting changes to bi-annually.

I hereby request that this proposal be voted against by the SEC members.

Susan Twomey — Jun 17, 2026
Subject: S7-2026-15 From: Susan Twomey Affiliation: Jun. 17, 2026 There is already a lack of transparency with finances, massive fraud, failure to disclose, and down right theft. It may feel like a burden to the SEC, but this country has given us enough burdens to bear, most especially during 45 and now 47. He is robbing the taxpayers blind. We need and demand accountability. Signed:
Susan Twomey

Terry Holtz — Jun 17, 2026
Subject: S7-2026-15 From: Terry Holtz Affiliation: Jun. 17, 2026 The individual who say these rules aren't need because they are too costly are the individuals that will be costing the general public even more after they steal and corrupt the system again the follow guardrails are needed even more today

Executive accountability
The rules require top executives to personally certify that financial reports are accurate.
That makes it harder for CEOs to claim ignorance when fraud occurs.
In the Enron scandal, prosecutors argued that senior leadership, including Kenneth Lay and Jeffrey Skilling, bore responsibility for misleading investors. Certification requirements strengthen that chain of accountability.
Investor confidence and market integrity
Strong disclosure and internal-control rules help investors trust public-company financial statements.
If those safeguards are weakened, the risk of accounting manipulation rises, potentially increasing the cost of capital and reducing confidence in U.S. markets.
Fraud prevention rather than punishment after the fact
Internal-control and certification requirements are designed to detect problems early.
Preventing fraudulent reporting is generally less costly than investigating scandals, prosecuting executives, and dealing with bankruptcies after investors and employees have already suffered losses.

Terry Provost — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Terry Provost Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Stop stop your Rule S7-2026-15 as it disenfranchises retaile investors from having same rights to information access and/or make sensible fair/competive trade decisions in favor of big institutional investment organizations who don't rely on quarterly reports bc they have constant access to publicly held companies' leaders to protect their investments or sell off shares well before any reports are available now. So the lease SEC shall do is require continued quarterly disclosures for retail investors to have sense of companies leadership ROI and companies health for decisions as well.

Thomas Snarski — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: Thomas Snarski Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
case for it centers on reducing short-termism. Proponents — including a now well-known 2018 op-ed by Jamie Dimon and Warren Buffett, echoed by BlackRock's Larry Fink and referenced by Trump — argue that quarterly reporting compels executives to sacrifice long-term value creation in favor of hitting short-term numbers. There's also a cost argument: smaller companies in particular bear real compliance costs for quarterly filings that big institutional investors may not even need, since those investors often get more frequent disclosure through other channels anyway. Supporters also point out this mirrors how the US actually arrived at quarterly reporting in the first place — most NYSE companies were voluntarily reporting quarterly before it became mandatory in 1970 — so making semiannual optional just lets the market sort itself again rather than forcing one cadence on everyone.
The case for it centers on reducing short-termism. Tim Peters — Jun 17, 2026
Subject: S7-2026-15 Comment From: Tim Peters Affiliation: Jun. 17, 2026 What is the harm in keeping quarterly reporting? It hurts no one and helps to hold companies accountable more often. All companies track their finances on a monthly basis so reporting every third check is no hindrance to them. Reducing the reporting period does nothing but open up the honest investors to losses due to insider trading and grift. Enron was not a one-off accident. Quarterly reporting was added after that fiasco to prevent recurrence. Remove that rule now and the issues associated with Enron will repeat, sooner rather than later.
Thank you,
Tim Peters
Recently retired Manager

Tim Schaefer — Jun 17, 2026
Subject: S7-2026-15 From: Tim Schaefer Affiliation: Jun. 17, 2026 HEY SEC: Quarterly reporting is ESSENTIAL for WE THE PEOPLE! REMEMBER FOR WHOM YOU WORK! Quarterly reports are necessary to provide consistent, transparent, and timely data about a company's financial health. However, the SEC has proposed making these filings optional, permitting companies to report semiannually. WE THE PEOPLE argue mandatory frequency remains essential for investor protection and market stability.

I am writing in opposition to changing the rules around quarterly reporting. We have seen time and again, deregulation lead to negative results for our economy. Case in point the Great Recession of 2008. The unregulated free market leads to increasing greed and poor decisions that harm all in society. The negative impacts of this change will far outweigh the benefits. Best, Tim Torkilsen, Lutz, Fl

Tom cole — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Tom cole Affiliation: Jun. 17, 2026 For the average citizen, investing in public companies carries significant risks which are almost entirely managed by a company's reporting. History teaches us that when we are dependent on these reports, frequency, truth and accuracy are critical factors investors need to be assured of in order to make good decisions. Extending the period between reports will result in decreased accurate speculation making the American public more vulnerable to the inevitable skewed unofficial information being presented by other information sources.
Coupling the rise of artificial intelligence use in creating reports while increasing the period between required, accurate financial disclosures creates an environment ripe for abuse.
Turning back the clock to semi annual reports is a wrong move and clearly suggests a corrupt collusion between regulators and the regulated.
In fact, with the advances of computer technology and digitized information since quarterly reporting was first mandated, regulators should be pushing for more frequent reporting since the data is more readily available than in the past.
Loosening reporting requirements by extended report periods is a very bad idea.

Please protect American investors and reject extending the reporting periods.

Tonya Vanover — Jun 17, 2026
Subject: S7-2026-15 From: Tonya Vanover Affiliation: Jun. 17, 2026 As a single female in NE Houston the idea that the mandate for quarterly reporting isn't necessary is absurd. The CEOs of our nation should be just as accountable as everyone else. As it is the CEOs and 1% are already allowed to pay little taxes if any compared to the 99%. Money and assets change hands with the tides of an individuals interest; personally, ethically, politically, socially, profitably, and/or more.

The removal of this accountability primes the growth of the slippery slopes already in place for those free of responsibility to report income. In addition our nation could benefit greatly if everyone was held to the same tax code regardless of their amount of reported income.

Besides if they don't report their financial activity there'd be fewer opportunities to determine how or if their activities are in the interest of their organization or of their behind the scene transactions.

Ms Vanover

Tracy C Mason — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Tracy C Mason Affiliation: Jun. 17, 2026 Dear SEC ruling decision makers,
My name is Tracy Mason. I am an Assistant Dean at George Mason University's College of Science in Fairfax, VA. I have a modest portfolio and rely on a number of combined investment funds for my financial future. I also had the opportunity to work in a few large organizations required to report progress on a quarterly basis (Exxon Mobil and Apple Inc.) As an investor, I appreciate the ability to see investment progress on a quarterly basis. I meet with a variety of partnering firms who support our research and students, and it's helpful to see their transparent quarterly earnings reports when confirming partnership feasibility.

Quarterly earnings reports are also important to a company's workforce at large to also have such transparency. Globalized business and industry is moving faster than it did in the 1970's when reporting was only semi annual, and thanks to technology, it should be even easier to provide such data, even more frequently to investors and employees as a motivator and transparent indicator of company health.

PLEASE KEEP QUARTERLY REPORTING. Less frequent transparency hurts investors and employees.

Thank you for reviewing my feedback.

Kind regards,

Tracy Mason

Tracy Marrott — Jun 17, 2026

ttajbarr — Jun 17, 2026
Subject: Comment on S7-2026-15 From: ttajbarr Affiliation: Jun. 17, 2026 To the SEC, Congress, and all who will have a say in this matter,

We the People in this house respectfully ask and even implore you to Vote This Down, Just Say No!

Washington wants to let every public company stop reporting its results each quarter and disclose just twice a year. We tried this once, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor like we were with our retirement accounts (we spent over 55 years, our entire working lives, scrimping and saving to put into) a return to those days could mean losing a third, or even half, of our (and every one of us worker bees in the US) life savings. As retired disabled Boomers this could very well be absolutely devastating to the savings we spent our entire lives working for at the time in our lives when we rely on that and social security to live and still pay our bills and taxes responsibly. Our salaries were nowhere near your salaries and us little worker bee Americans cannot afford for this to happen. Please vote this down. We cannot afford to go back.

Respectfully,
Terrence (retired disabled Veteran) and Jane Barr
9153 Smoketree Drive
Jacksonville, FL 32244

V Daniel — Jun 17, 2026
Subject: Comment on S7-2026-15 From: V Daniel Affiliation: Jun. 17, 2026 We should not be left in the dark, period. When public filings go quiet, big institutions and insiders still find ways to gauge how a company is doing. It is the everyday investor, working from what is public, who gets left in the dark.

Do not let this happen again. Keep requiring quarterly reporting.

Thank you.
Virginia Daniel

V. Quinn — Jun 17, 2026
Subject: Comment on S7-2026-15 From: V. Quinn Affiliation: Jun. 17, 2026 I am writing to advocate strongly for the continued use of our quarterly reporting framework.

Based on our collective past experiences, transitioning back to a semi-annual reporting schedule would likely reintroduce significant operational challenges and diminish our strategic agility. The previous attempt at less frequent reporting demonstrated a clear correlation with delayed insights, reduced responsiveness to market shifts, and a less proactive approach to identifying and addressing key performance indicators. The extended intervals between reports often meant that critical issues were not flagged until they had grown substantially, leading to more complex and costly rectifications.

Our current quarterly cycle provides invaluable, timely data that is essential for robust decision-making, effective resource allocation, and maintaining critical oversight across all departments. This frequency allows us to:

* **Monitor progress proactively:** Identify trends and deviations early, enabling swift course correction.
* **Enhance accountability:** Keep teams engaged and accountable for shorter, more manageable periods.
* **Improve forecasting:** Leverage fresher data for more accurate future projections.
* **Foster agility:** React more quickly to both opportunities and challenges in our dynamic environment.

A return to a semi-annual approach would inevitably dilute our ability to stay informed and reactive, risking a recurrence of the inefficiencies and missed opportunities we previously navigated. I firmly believe that maintaining our quarterly reporting standard is paramount for sustaining our operational excellence and competitive edge.

Valerie Quinn

Valerie Silensky — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Valerie Silensky Affiliation: Jun. 17, 2026 I'm Aviva in DC and am strongly opposed to this regressive rule change back to an era before I was even born. We can see what happened then - and today I'd lose a third or more of money I've worked hard to earn and invest. Including my retirement funds.
Why would you change it to make things even less transparent? Transparency is a necessity. If you haven't caught the tone of ordinary people in this moment, they are wildly angry at billionaires thriving while they can't afford food or electricity or a doctor visit. Why would you make it even more opaque so the people who try so very hard will lose their hard earned money while more billionaires become trillionaires? People will figure this out and stop investing. And what happens when a people no longer trust, won't commit to investing in their society or country any longer?

The world is a fine place, and worth fighting for.
- Ernest Hemingway

Valerie Simmons — Jun 17, 2026

Vicki Hutchison — Jun 17, 2026
Subject: File No. S7-2026-15 From: Vicki Hutchison In a world with a 24/7 news cycle, 3 months is already a long time between official reports from public companies. It is imperative that we don't make this time or allow the reporting requirements to diminish. This is one of the strengths of the US stock market. The integrity of our stock market depends on timely and accurate updates from public companies. We want to be a leader and a place where both US and international companies want to be associated with. It is the responsibility of the SEC to require truthful filings and to vigorously enforce against filings that are false. Removing those events just makes “everything” less truthful by dilution and investors will gradually lose more and more confidence in what US markets represent to the world.

Vicki Personal — Jun 17, 2026

Victoria Lew — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Victoria Lew Affiliation: Jun. 17, 2026 To Whom It May Concern:

I oppose efforts to reduce public company financial reporting from quarterly to semiannual disclosures.

As a psychologist, educator, and investor, I believe that access to timely and accurate information is essential for sound decision-making. Quarterly reporting provides shareholders, employees, retirees, and the broader public with regular insight into a company's financial health and performance. These disclosures help promote transparency, accountability, and trust in our financial markets.

While I understand concerns that quarterly reporting may encourage short-term thinking, reducing the frequency of required disclosures is not the solution. Less frequent reporting would leave investors with fewer opportunities to evaluate company performance, increase information gaps between corporate insiders and the public, and potentially delay the identification of emerging financial concerns.

Research across many domains consistently demonstrates that timely feedback supports better decision-making and accountability. Financial markets are no exception. Rather than reducing transparency, efforts should focus on improving the quality, clarity, and usefulness of disclosures while minimizing unnecessary administrative burden.

Strong markets depend on informed participants. Quarterly reporting helps ensure that investors of all sizes, not just institutional investors, have access to the information they need to make educated decisions. Maintaining regular disclosure requirements supports fairness, confidence, and integrity in our financial system.

Thank you for considering my perspective.

Sincerely,

Dr. Victoria, Orlando, FL

Wayne Eastham — Jun 17, 2026
Subject: S7-2026-15 From: Wayne Eastham Affiliation: Jun. 17, 2026 I've been investing for over 30 years. I've seen companies fail, e.g., Enron. What is the reason for making company reports less transparent? Why don't you just change reports to annual if there is no reason to keep them quarterly? There must be a reason someone wants to change this. What is it? Who's getting paid off? This administration has long ago lost my confidence in protecting us smaller investors.

Linda Eastham

Wayne Rampey — Jun 17, 2026
Subject: S7-2026-15 From: Wayne Rampey Affiliation: Jun. 17, 2026 Wayne Rampey. Dallas Texas. I am adamantly against changing the current public company quarterly financial reporting requirements. As a retired business owner, past member of multiple company board of directors, I have experienced first hand the necessity of current and accurate financial information to make correct business decisions.

As an active investor in the stock market an INFORMED investor is the best investor. It is unreasonable to allow companies to mask their financial operational performance for a 6 month period, while expecting individuals or wealth management advisors to make accurate investment decisions.

Companies are aware of the reporting requirements before they go public. If they feel the public reporting requirements are too onerous, they do not have to go public.

Wdavid Winsper — Jun 17, 2026
Subject: Comment on S7-2026-15 From: Wdavid Winsper Affiliation: Jun. 17, 2026 The historical evidence couldn't be more clear. There's no benefit to investors like me in reducing the reporting requirements. Leave quarterly reporting in place.

Will Fights — Jun 17, 2026
Subject: S7-2026-15 Comment From: Will Fights Affiliation: Jun. 17, 2026 Hello, my name is Will R. Fights Jr. I am just a citizen trying to support common sense.
In this current administration, every attempt to benefit the the tip top of the chain has been done, whether it is ethical or even legal. Allowing these people twice as long between "voluntary" reporting can only allow them more time to deconstruct our 250 year old experiment and get away with it. Please don't make this proposed change.

---

willem brandt — Jun 17, 2026
Subject: File No. S7-2026-15 From: willem brandt Individual investors such as me, we are better protected when companies report on a quarterly basis instead of semiannual. A doubling of the information gap between the insiders and ordinary shareholders will result in a growing mistrust, higher volatility and uncertainty. As per the research from the CFA institute which reviewed the exact maneuver in the UK market concluded that reporting frequency has no measurable effect on corporate investment behaviour. The SEC is accepting a real cost- less transparency for individual investors-for a benefit that the evidence says simply won't materialise. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own.

William Ahearn — Jun 17, 2026
Subject: S7-2026-15 From: William Ahearn Affiliation: Jun. 17, 2026 The necessity of maintaining quarterly reports should not be underestimated. Quarterly reporting maintains accountability for investors in a manner that less frequent reporting cannot. In a time when transactions are accelerating, denying original corporate source financial information is not merely foolish, it provides opportunity for fraudulent transactions and misinformation to harm Americans. The advent of electronic data systems make reporting easier and more effective. There is no legitimate reason to decrease reporting frequency and increase the risk of fraud. Maintain sound standards that fulfill the responsibility to protect the public from greed and surreptitious financial activity.

William Eberhardt — Jun 17, 2026
Subject: Comment on S7-2026-15 From: William Eberhardt Affiliation: Jun. 17, 2026 My name is William Eberhardt. I live at 2930 Moorings Way SE, Southport NC, 28461. I want the SEC ro require quarterly reports for the top 2000 companies by market capitalization in the USA.

As funding retirement life (housing, energy, transportation, healthcare, food, helping children and grandchildren, etc) continues to be pushed to the individual's responsibility theough the decline in company defined benefit plans and the funding failure of Old Age Benefits (Social Security), it is imperative that every individual investor and their agents have access to detailed financial reporting with sufficient frequency to allow meaningful investment decision.

Quarterly reporting provides certified financial data to individual investors that would not otherwise be available in timely manner to allow the retail investors to make rational decisions. It also makes it more difficult for public companies to hide fraud or poor performance. Gutting quarterly reporting only benefits company management and the wealthy.

America is supposed to be the land of opportunity with a level playing field. Allowing companies to delay reporting certified data on performance kills the level playing field.

Do your job to protect ALL Americans.

William Eberhardt

William Emerick — Jun 17, 2026
Subject: S7-2026-15 Comment From: William Emerick Affiliation: Jun. 17, 2026 Keep the quarterly. Let’s keep some semblance of fairness.

William Lawson — Jun 17, 2026
Subject: File No. S7-2026-15 From: William Lawson The proposal assumes that quarterly reporting incentivizes short-termism among corporate managers. Regardless of whether that argument holds true for corporate executives, it misinterprets the dynamics of retail investing. Quarterly reports serve as a critical leveling mechanism between retail and institutional investors in U.S. equity markets. Institutional investors possess access to expert networks, alternative data streams, and direct management consultations that are cost-prohibitive for individual investors. For the retail market, the 10-Q is the primary source of symmetrical information. Dismantling it doesn't fix short-termism; it just blinds the public.

William Lones — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: William Lones Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
These companies need to continue having transparency in order so the public knows how financially stable they are as well as keeping them held accountable when they are violating the law.

William Martin — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: William Martin Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Already insider information has cost the public trillions in lost profits taken by others. It's already apparent that government officials are largely responsible but eliminating quarterly reporting requirements would make the impact of insider information even greater.

Stop insider trading by ANYONE under US jurisdiction including government officials and electorate, and retain quarterly reporting to help minimally level the already rocky playing field!

William Mills — Jun 17, 2026
Subject: S7-2026-15 Comment From: William Mills Affiliation: Jun. 17, 2026 As an investor with a significant amount invested in the market I am strongly against changing the reporting to semi annual. KEEP IT QUARTERLY!!

William Wiarda — Jun 17, 2026
Subject: My view on Rule S7-2026-15 From: William Wiarda Affiliation: Jun. 17, 2026 To the Securities and Exchange Commission:
Don't vote to allow companies to report their earnings twice a year. The standard now is quarterly earnings reports and to go longer than that for the sake of efficiency would allow room for a lot of mistakes. The lack of transparency would cause everyday investors saving for retirement to lose out on critical information that can make the difference in achieving their goals or missing them by a mile. The earnings reportsshould be conveyed to the public quarterly.
Thank you for your consideration
William Wiarda
Investment Advisor

Esq. Dianna Stallone — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Esq. Dianna Stallone Affiliation: Jun. 16, 2026 I am writing to oppose the proposed change to the reporting requirements. Reducing the reporting requirements will artificially shrink the savings of millions of Americans who are already struggling to make ends meet. There is NO good reason to reduce the reporting requirements.
I am 69 years old and the proposed rule change will have a seriously negative impact on my savings and retirement plan.

Steve Shelangoski — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Steve Shelangoski Affiliation: Jun. 16, 2026 Greetings
I would like to offer my opinion on changing the reporting schedule. I am a controller of a subsidiary that the parent is publicly traded in Japan. So i have more knowledge about the effort and cost of quarterly reporting. I feel it is imperative that the SEC continues quarterly requirements. There can be many changes each quarter that are either positive or negative that investors need to be made aware of to make better decisions. I am also an investor with over one million in the stock market, much of which is invested in individual companies. Please don't change the way reporting has been for the past 50 plus years.
Sincerely Steve Shelangoski

Tara Rochford — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Tara Rochford Affiliation: Jun. 16, 2026 Tara Rochford, Project Manager, IN Office of Court Services, Indianapolis, Indiana.
As a soon to retire person who has invested in American markets for over 40 years, this issue matters greatly to me because it will directly impact my ability to support myself in my post-employment decade(s). As potential cuts to both Social Security and Medicare benefits continue to loom in the not-too-distant future, it is more important than ever to protect the investment portfolios of individual investors.
Transparency in publicly traded corporations' reports of accurate and timely financial information is critical to all investors' ability to make informed decisions. A decline in access to timely information will have a disproportional negative impact on individual investors and give even more advantage to institutional investors and others who may have access to more information than semi-annual reports.
Keep SEC reporting QUARTERLY. Do not revert to a policy that has a documented impact of negatively affecting market valuations, both in our own history and as shown in current foreign markets that allow for semi-annual reporting.
We cannot risk decimating the average American investor's portfolio without risking extreme consequences on the overall economy. Investors are not asking for this change - that should be a primary indicator that it is not a good proposal.

Tara Durkin Rochford (she, her)
Optima Project Manager,
Indiana State Office of GAL/CASA

Yahoo Mail: Search, Organize, Conquer

Aaron Feldman — Jun 16, 2026

Subject: S7-2026-15 Comment From: Aaron Feldman Affiliation: Jun. 16, 2026 I am an ordinary citizen with no corporate holdings. Nonetheless I vehemently oppose the proposed rule that reduces corporate accountability.
Corporations already are allowed to participate
in our society in a hidden and destructive manner, yet are treated as "persons". Hidden corporate political donations, favorable tax rules that hide income are examples. It is obscene to yet again advantage corporate America over its citizens. Please keep
the quarterly reporting requirements. Thank you.

Yahoo Mail: Search, Organize, Conquer

Aaron Fox — Jun 16, 2026
Subject: S7-2026-15 Comment From: Aaron Fox Affiliation: Jun. 16, 2026 Please retain quarterly reporting in its current format. Further, create sanctions for purposefully evading detection of information by using non text images that are not searchable.

As a retired anti money laundering and financial crimes professional in banking and financial services, I used quarterly reporting to identify trends that indicated potential stock fraud. Every time the reporting window is widened, you create the opportunity to mask control and illicit activity by keeping changes between the reporting windows. Systems have limited history fields and bad actors know exactly what that history field count is. If the history field count is five previous points, they will create six or seven changes to hide participation. I've seen it, reported it and seen your offices take appropriate action to mitigate risk to the investing public. Don't take the tools to protect the public away.

Aaron Fox
Former AML Officer

Aarón Kettler — Jun 16, 2026
Subject: S7-2026-15 Comment From: Aarón Kettler Affiliation: Jun. 16, 2026 Any rules change that leads to less transparency is intolerable. This proposal directly affects investor's confidence in a negative way. There is no doubt that this will benefit the legions of corrupt insiders who will profit on the back of other's ignorance. Quarterly reporting is absolutely essential to securities, and removing it can only be seen as either aiding corruption, or engaging directly in corruption. There is no legitimate reason to adopt semi-annual reporting.

Please choose transparency over obfuscation.

Aaron Mercer — Jun 16, 2026
Subject: File No. S7-2026-15 From: Aaron Mercer As a member of the Motley Fool Community, and an individual investor i am urging you to not change to semi annual reporting. The SEC needs to understand that individual investors deserve more transparency, not less. Let's keep this the way it currently is and not change it.

Aaron Richards — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Aaron Richards Affiliation: Jun. 16, 2026 My name is Aaron Richards. I am a systems engineer from Nashville, Tennessee. I am writing to express concern over the proposed quarterly earnings rule change to bi-annual reporting.
I read the intelligent investor front and back during college. Learning about stocks and business was a welcomed break from my curriculum of math and equations. Using the knowledge from that book, I was able to make good investments helping build wealth for my family. Often the simplest investment strategies are the most successful, such investment advice can easily be explained in a few common sense sentences.
Such as those from Warren Buffett or other bellwethers in the turbulent market environment we have today.
It is clear that timely quarterly reporting ensures businesses listed on stock exchanges have transparency and frequent updates to their earnings outlook. Reducing to only two per year could cause drastic corrections if expectations aren't met.
I am familiar with Mr. Market's temperament, but I fear that the many other "retail" investors as they call us are not. Todays market has a great many more retail investors than the past with apps like Robinhood making it easier than ever to invest. Dramatic jumps occurring from the increased time period between reporting could lead to turbulence for all.
In the past when this was tried it failed spectacularly. I can't understand the reasoning behind this effort. It is easier than ever for a company to publish quarterly earnings. In the past they were done on paper……
Companies that say it is not are lying or complicating their financial statements or "dressing up" their reports to impress investors.
Not publishing quarterly earnings will hurt individual investors, and the market as a whole. Please do not make this change.
Rather than focusing on what may (or more than likely not) benefit companies. It would be a pleasant change to see the SEC make changes that help, protect, or improve individual investors access to market information.
Helping the little guy. Those changes or updates I could get behind. Not this.

I appreciate your attention to this matter and hope it is taken into consideration.

Regards.

Abby Vaile — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Abby Vaile Affiliation: Jun. 16, 2026 This type of reporting would be disastrous to investors!! In our modern age of computers and simplified access to data, reporting should actually become weekly, never dawn out over more time.

Adrian Iwanicki CPA Canada — Jun 16, 2026
Subject: File No. S7-2026-15 From: Adrian Iwanicki A semi-annual reporting cadence is less transparent especially when it comes to seasonality of many businesses. Six months is a long time to go in between major public asset updates which should offer timely and extensive disclosures. I believe disclosures should increase over time, not decrease for investor transparency with additional guidelines. Overall this allows for more market inefficiencies and informational gaps between institutional holders with preferred communications lines to management teams and retail investors between public informational releases.

Adrianne Alcorn — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Adrianne Alcorn Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Do the right thing. Keep the rules the way they are. Quarterly disclosures allow the investor a slim fighting chance but if its every six months more people will be screwed out of their investment and the stock market could become something that the everyday person refuses to invest in.

Adrienne Spear — Jun 16, 2026
Subject: S7-2026-15 Comment From: Adrienne Spear Affiliation: Jun. 16, 2026 Quarterly reports help with clarity and honesty.

Agnes Cleary — Jun 16, 2026
Subject: S7-2026-15 Comment From: Agnes Cleary Affiliation: Jun. 16, 2026 There are a number of reasons cited by corporations to support their proposal to eliminate quarterly reporting. None of them benefit investors. If implemented this rule change would deprive individual investors of information needed to evaluate the health of a company, spot possible malfeasance, and make long term financial decisions. Insiders would still know the full story and this knowledge creates an uneven more playing field between insiders and small investors. I believe sunshine is the best disinfectant, and timely, complete disclosure of financial information can prevent the need for disinfectant by

detecting fraud early. As for the touted "global standard", how's that working in the UK where Wirecard hid their massive fraud for years? Singapore implemented it and is now considering abolishing it because trading volume has dropped significantly & the quality of the information reported had degraded. And as for cost savings...That's the biggest fig leaf of all. The accounting & reporting cost savings would be minimal. That's the cost of doing business and I bet some smart lawyer can find a way for you to write that off as a deduction.

Aidan Acosta — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Aidan Acosta Affiliation: Jun. 16, 2026 I want to maintain 10Qs to be able to adequately evaluate performance of public companies, including those that will IPO this year, to continue to make informed decisions in a new era of (some unprofitable) AI companies and global disruption.

Al Thompson, retired Business Intelligence Analyst.

Alan Gross — Jun 16, 2026
Subject: SEC Proposal for Semi-Annual Reporting From: Alan Gross Affiliation: Jun. 16, 2026 I am against allowing semi-annual reporting.

Allowing semi-annual reporting allows the wolves much more freedom to do as they wish. The cost of quarterly reporting is minimal at best and as far as the international standard goes, how's that working for them? The SEC keeps citing the "global standard," but that standard isn't doing well in the places it was tried. The EU's lighter regime is where Wirecard's €1.9 billion fraud hid in plain sight for years before the company collapsed in 2020. The UK's 2014 shift stripped analyst coverage from mid-cap stocks, and London has been bleeding IPOs ever since. Singapore moved to semiannual reporting in 2020 and is now reconsidering, because trading volumes fell and disclosure quality dropped. The "global standard" the SEC is invoking isn't standard, isn't working, and is being walked back where it was tried.

Alanna Regan — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Alanna Regan Affiliation: Jun. 16, 2026 To: SEC

Quarterly reporting needs to be kept in place for accountability of corporations to their shareholders and also for investors to be able to make and track investments. The quarterly report is a mainstay of investing for people with retirement in the market and professional brokers alike. Additionally, reduced portfolio value for investors as a result of any change to the quarterly requirement would cause a drop in value in brokerage accounts due less transparency. This would be unfair, unethical and cause large and long term disruption to the market at large.

Alanna Regan
Suffolk County, New York

Albert Archard — Jun 16, 2026

Alexander Joseph — Jun 16, 2026
Subject: S7-2026-15 Comment From: Alexander Joseph Affiliation: Jun. 16, 2026 I do not agree with this bill.
Less transparency is never a good thing.
Businesses don't care about the retail investors well being. The only people who stand to benefit from this are the inside traders and those with the right network who will know what's happening way before the general public.

Alexander J

Alexandra Walser — Jun 16, 2026
Subject: S7-2026-15 Comment From: Alexandra Walser Affiliation: Jun. 16, 2026 Removing this reporting further discredits lawmakers, who already have trading knowledge & influence that should limit their ability to invest.
Putting up yet another barrier, hiding valuable information that would impact investor knowledge & therefore decisions, proves govt is more driven to abide possible fraud than to assist citizens in wisely and safely investing to better their own economic standing.
Do not add yet another layer of option for corruption & fraud!

Alexandra Walser

Alexandros Prodromou — Jun 16, 2026
Subject: File No. S7-2026-15 From: Alexandros Prodromou No, Semiannual Reporting doesn't make sense.

Alexis Ray — Jun 16, 2026
Subject: File No. S7-2026-15 From: Alexis Ray To whom it may concern: I'm writing to voice my opposition to the proposed semi-annual reporting rule. Transparency ensures I am able to make sound investing decisions. Reducing the number of public company reports from 4 a year to 2 has the potential to increase market volatility by decreasing trust. I'd like to make investing decisions on verified information, not speculation. Without frequent reporting I fear people will be inclined to reactive investing decisions which will lead to market destabilization. Thank you for protecting investors.

Alexis Tucker — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Alexis Tucker Affiliation: Jun. 16, 2026 The SEC needs to

continue QUARTERLY reporting. I believe it keeps the system more transparent for investors.

Alexis Tucker

Ali Legault — Jun 16, 2026
Subject: S7-2026-15 Comment From: Ali Legault Affiliation: Jun. 16, 2026 There is no logical Reason to make this change. Companies have all the systems in place to continue quarterly reporting and will, even if this change were made. A change like this will ONLY hurt investors. Do your job SEC by keeping these quarterly reports in place!

Alice Hofstad Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Alice Hofstad Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it. Our market was built on the belief that every investor deserves access to the same information at the same time. Quarterly reporting helps to get that information to the investor.

Alice Moskus — Jun 16, 2026

Amanda Orellano — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Amanda Orellano Affiliation: Jun. 16, 2026 I oppose semiannual reporting. Quarterly reporting helps to mitigate losses over time and it allows investors to keep better track of their investments. Reporting semiannually doesn't hold the corporations accountable often enough.
Amanda Orellano
Chicago IL

Amanda Rahn-Summerhays — Jun 16, 2026
Subject: S7-2026-15 Comment From: Amanda Rahn-Summerhays Affiliation: Jun. 16, 2026 It's called embezzlement. It's illegal. You're trying to make it legal. For 6 months. And then there's the whole insider trading bit. Also illegal, but with 6 months of secrecy they could do whatever they want.

Amani Event Center — Jun 16, 2026
Subject: S7-2026-15 Comment From: Amani Event Center Affiliation: Jun. 16, 2026 To SEC,

I oppose reducing or eliminating quarterly reporting requirements. As an investor, I rely on quarterly disclosures to make informed decisions. Longer gaps between reports create a greater information advantage for corporate insiders over the public.

Making quarterly reporting optional does not solve the problem, as companies whose investors most need timely information may be the least likely to provide it. Any cost savings to companies are outweighed by the loss of transparency, fairness, and investor confidence in the markets.

Sarah Martin
Citizen relying on transparency for investment for my retirement.

Amy Cuchine — Jun 16, 2026

Subject: Comment on S7-2026-15 From: Amy Cuchine Affiliation: Jun. 16, 2026 Amy Cuchine. Marketing. Montana. Quarterly reporting and transparency are essential to stable markets. Stable markets are essential to a stable country, stable growth and a stable economy. Stability is built on trust and accountability. You take away trust and accountability if reporting standards and reporting frequency are reduced. If people don't trust the markets, they will take their money to other markets. Money will be moved where it is safe and a market they feel can be trusted like Canadian markets and others. It will actually destroy capitalism in this country, not help it. It will further move the US out of dominance and financial leadership and lead to the decline of the US. How do you want history to remember you? Do you want to be remembered as those that led to the fall of the world financial leadership of our country? Already middle countries are starting to move up in their dominance, and the republic is losing a stronghold. Deregulation like this will absolutely lead to a decline. It was instituted for a reason. Look at the history.

Amy Fort — Jun 16, 2026
Subject: S7-2026-15 Comment From: Amy Fort Affiliation: Jun. 16, 2026 Quarterly reporting is a must to allow the public to have information about companies. I am approaching retirement and I rely on these reports to make decisions about some of the money I am investing. This information is the only control I have in making good decisions about when to add more funds into a certain sector. Companies won't opt to do good, fraud will increase and little folks like me will be left in the dark. Thank you. Amy Fort, Illinois . State Government employee and self employed business owner.

Subject: Comment on S7-2026-15 From: André Johnson Affiliation: Jun. 16, 2026 André Johnson, Occupational Therapist

I would be against this change and would like reporting to remain quarterly. Oversight, transparency, are priorities are critically important and removing quarterly reporting will directly affect the general public more deeply. Please reject these changes. Thank you.

Andre Wright — Jun 16, 2026
Subject: S7-2026-15 Comment From: Andre Wright Affiliation: Jun. 16, 2026 Changing quarterly reporting to 6 months would be dangerous. We have more, and more highly valued companies coming to market without the revenue to justify those valuations. SpaceX for example. They are already using the capital raised to pay off bad bets in Twitter, and xai. 6 months reporting would allow companies in this position to hide massive losses far too long!

Andrea Burton — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Andrea Burton Affiliation: Jun. 16, 2026 Leave it as is. The public is always the one that loses.

Subject: S7-2026-15 Comment From: Andree Avdoulos Affiliation: Jun. 16, 2026 My name is Andre Avdoulos and I have been a financial professional for 37 years. It is absolutely Vital to have all companies report on a quarterly basis. I don't see how it would benefit investors one bit to change to not require quarterly reporting.
Sincerely, Andre Avdoulos.

Yahoo Mail: Search, Organize, Conquer

Andres Quintana — Jun 16, 2026
Subject: File No. S7-2026-15 From: Andres Quintana Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it.

Andrew D — Jun 16, 2026
Subject: S7-2026-15 Comment From: Andrew D Affiliation: Jun. 16, 2026 Quarterly reports provide the information the stock market needs to trade honestly. Many people are employed to read and analyze these reports as well. We need to have 4 reports per year signed by the CEO attesting to the validity.

Do not reduce the number of company financial reports per year.

Andrew Falciani — Jun 16, 2026
Subject: File No. S7-2026-15 From: Andrew Falciani I believe that semi-annual reporting will result in less information for individual investors with little to no impact on expanding the corporate planning horizon (i.e., avoiding short-termism). Corporations behaving in a way that results in disingenuous quarterly reporting will do the same thing with semiannual reporting, or whatever the reporting time boundary is. The solution is for the market to decide which companies deserve investment, which is enabled by more transparency, not less. Please keep reporting at quarterly intervals.

Andrew Himmler — Jun 16, 2026
Subject: S7-2026-15 From: Andrew Himmler Affiliation: Jun. 16, 2026 Dear [Relevant Authority/ Decision-Maker],

This correspondence is submitted on behalf of Andrew Himmler a Transportation specialist based in Findlay, Ohio.

We wish to formally convey our considered perspective regarding the existing legislative framework pertinent to our industry. Our organization respectfully advocates for the continuity and preservation of the current statutes. The stability and operational predictability afforded by the prevailing regulations are invaluable for sustaining efficient operations and ensuring consistent service delivery within the transportation sector. We urge careful deliberation on any proposed changes and their potential broader implications.

Thank you for your dedicated attention to this important matter.

Sincerely,

Andrew Himmler

ANDREW J REES — Jun 16, 2026
Subject: File No. S7-2026-15 From: ANDREW J REES I am opposed to this change. This is not a benefit to investors and should not be implemented. We need more information, not less.

Andrew J. Stromfeld — Jun 16, 2026
Subject: Quarterly Reporting From: Andrew J. Stromfeld Affiliation: Jun. 16, 2026 Publicly listed and traded companies should report their financial position on a monthly basis. There should also be a separate secret poll or survey mailed to each non-executive employee asking their opinions about how they think the company is performing and/or how it could do things better.

Sincerely,

Andrew J. Stromfeld

Retired

Andrew Jay — Jun 16, 2026

Andy Stillman — Jun 16, 2026
Subject: File No. S7-2026-15 From: Andy Stillman Dear Commissioners, As guardians of the public trust and representatives of my tax dollars at work (and yours), you must please withdraw proposed Rule S7-2026-15 in keeping with your publicly-declared mission. Please continue to require quarterly reporting! As a recent retiree and an individual retail investor I rely on quarterly reporting for accurate reflections of market performance. Relaxing regulatory requirements is a bad idea. If business

leaders justify the need for falling back to semi-annual reporting by pointing to reporting costs, I'd suggest they rethink their position on public trading. A healthy corporate entity should be able to cover quarterly reporting as part of the cost of doing business. Increased opacity to investors is never a good thing. Andy Stillman

Angie Sumner — Jun 16, 2026
Subject: File No. S7-2026-15 From: Angie Sumner As a former CEO, I feel this move is absolutely ridiculous from a business standpoint. Quarterly reporting is Business 101. How can a legitimate business wait for six months before they review their financials? They are not going to do that internally but as an investor in their company they will not be required to show me what they’re doing with the money I have invested in their company? Not sure whose great idea this was, as the reasoning behind this makes absolutely no sense. Investors need transparency and an investor cannot afford to wait six months if a company is moving in a direction that they are not willing to go. We deserve the right to make our financial decisions based on quarterly reports, not semi annual

reports as it may be too late to make solid financial decisions regarding the money you have invested in that company.

Anio 13 — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Anio 13 Affiliation: Jun. 16, 2026 Annie Milne here. Retired in Naperville, Illinois.
I'd hate to see Quarterly reporting reduced to semi-annually.
It would reduce the returns that make up the bulk of our retirement savings.
Historically a bad idea.
Please DON'T!

Anne-Marie

AnneMarie Slater — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: AnneMarie Slater Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
I am very concerned that changing quarterly reports to biannual reports would have the potential to financially devestate my family. We are a single income household and we rely on a nest egg investment account as well as some retirement accounts as we plan for the future of our family. I lost a significant amount of my college fund when Worldcom crashed. Fraud like that can be avoided by holding these companies accountable and demanding transparency with investors, especially for every day investors like my family who would be less capable of recovering from the financial loss. If we delay reports, it creates more room for fraud to happen again and I don't want my kids to lose out on the investments we have made for their future too.

Annette Baruch — Jun 16, 2026
Subject: S7-2026-15 Comment From: Annette Baruch Affiliation: Jun. 16, 2026 It is wrong and hurts every American struggling financially to hear there is yet another way and another attempt to allow insider trading and obfuscation of the rules.

How much do you think the people can take, and why is this done on the back of the ordinary American?

Is there no red line for any of our corporations, leaders or public servants anymore? Shame on you. We cannot trust you anymore.

Anonymous — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 16, 2026 It is imperative that we uphold robust quarterly financial reporting requirements for all publicly traded entities. These regular disclosures form the bedrock of a transparent and equitable economic landscape, fostering essential trust and informed decision-making across the entire market.

The consistent provision of detailed financial data is not merely a regulatory compliance task; it is a vital mechanism that empowers individual investors, financial analysts, and the general public to accurately assess corporate health, identify emerging trends, and hold companies accountable. Without this frequent insight, the stability of our markets could be compromised, leading to increased volatility and a significant erosion of investor confidence.

Furthermore, maintaining these stringent reporting standards serves as a critical safeguard against potential corporate opacity and malfeasance. Diminished transparency would create an environment where significant financial developments or questionable practices, particularly within large corporations, could be deliberately obscured from public scrutiny. This lack of oversight poses a direct threat to consumer protection and could undermine the integrity of our financial systems, making it exceedingly difficult for the American public and regulatory bodies to gauge true performance or identify risks.

Therefore, we strongly advocate for the continuation and reinforcement of quarterly reporting mandates, recognizing their indispensable role in ensuring a fair, accountable, and healthy economy for all stakeholders.

Anonymous — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 16, 2026 Quarterly reporting must remain. Transparency is essential especially for the small investor. Despite what Washington says transparency about government, insider trading is virtually non existent. The small investor needs to have their portfolios protected. Public companies certainly have the manpower and financial wherewithal to continue quarterly reporting. Don't go to semi annual reporting. Investors deserve to know what is going on and lack of timely information will not benefit them but those who want to manipulate the system.

Sent from my iPhone

Anonymous — Jun 16, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 I want to retain quarterly reporting. I actively invest for my retirement and review this information for each position I hold. I find the quarterly reporting helpful, I fear a longer reporting period of semi-annually would not disclose business trends and information in a timely manner meaning I may hold on to a position too long or miss an opportunity to increase my holdings in the company. Further, I value leadership communications and transparency. I distrust companies who refuse to communicate or that withhold information. I have found when information is withheld, these companies tend to have more internal problems that lead to investor losses.

All the best,

Tess Benham

Anonymous — Jun 16, 2026
Subject: S7-2026-15 From: Anonymous Affiliation: Jun. 16, 2026 Quality depends upon oversight entities being able to inspect and analyze quarterly data. Too much can be hidden in a six-month period. Often, that interval is used for nefarious activities to keep hidden and reap profits. Quarterly reporting MUST remain!

Anonymous — Jun 16, 2026
Subject: S7-2026-15 From: Anonymous Affiliation: Jun. 16, 2026 Quarterly reporting to the SEC of corporate and business executive finances has helped to ensure that our economy is on a sure footing. There is so little control as it is over the massive concentration of wealth and power it is the least we can do to ensure that the entire system won't collapse like it did in the Depression. Just because it is currently working doesn't mean it is not needed. It is more necessary than ever before because a failure of one corporate leader or one corporation will have such a huge impact on the rest of the economy it could be catastrophic.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 I do not support eliminating quarterly reports. Investors and analysts rely on them to make investment decisions. The information will be "old & cold" if reported biannually and less valuable to the investor. It creates insider trading opportunities that are unfair to the outside investor.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 I guess corporations don't have enough, rob people of what they have left. This isn't the American way, this is more like something China would do. Just because they have lobbyist doesn't make it right, it makes it theft! America is suppose to be about capitalism, not crony capitalism, which is where we are. The only reason they want to do this, is to steal more money from people who already have less. give them more time to make shady transactions so more people will lose what little they have so we can have maybe 2 or 3 trillionaires and a bunch of starving people. The fact that this is even being proposed, Show's how corrupt our government is. Crony capitalism! The people will lose, AGAIN

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 As a retired senior, I track my bank balances every few days; helps make decisions for the future. And so I want my investments tracked at least quarterly so I can make intelligent decisions before being blindsided. Not all of us have a cushion to lessen a costly financial blow. If the companies "in charge" are privy to this info on MY accounts to use to their advantage, then I most definitely should be entitled to this info first & foremost! I can NOT believe there is any misunderstanding on the part of the SEC; there is NO benefit to investors or shareholders in delaying financial information of public companies.

Yahoo Mail: Search, Organize, Conquer

Anonymous — Jun 16, 2026
Subject: S7-2026-15l From: Anonymous Affiliation: Jun. 16, 2026 There is already a large disparity in information available to the general public vs. information available to other investors. A lot can go wrong for a company in six months time that will leave investors flying blind and at risk to predatory practices from those with insider knowledge. All countries who have implemented six month reporting periods are not faring well with it and are likely to reverse these actions. Also, these actions will not be a huge money saver for companies who already need to do their bookkeeping. The quarterly reports are a safeguard not only for investors but for the companies themselves who may need these reports and interdepartmental checks to catch problems.

Sincerely,

Dawn Coughlin

Anonymous — Jun 16, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 The SEC is not supposed to try and help corporations hide their information. If a company is PUBLICLY traded in the exchange market, then their information should be PUBLIC … as frequently and timely as possible.

Please reconsider helping the corruption grow, in the dark of secrecy. Stop this disclosure rule change.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 Jedediah Boles, Manager.

I believe quarterly reporting is invaluable to making sure companies are held accountable, at least

somewhat. If we were to move to 6 month periods, it can only benefit people that already have more information. They shouldn't need to share reports every day, but cutting what is already only 4 reports in half foes nothing to save costs, and everything to make the market even more unstable when reports come out. If anything, i would advocate for more frequent reports if a company is large enough. They can afford the workflow, and when companies are public, they shouldnt be trying to work around filing periods and instead just accept them as they are regardless of any major planning decisions.

Anonymous — Jun 16, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 To whom it may concern:

I would like to express my concern about the proposal to reduce a company's quarterly reporting requirement to twice a year.

As a new investor, I intend to leverage my portfolio for use during retirement. It is something over which I expect (and deserve) to have timely, accurate knowledge that I can use to inform my decisions.

Lengthening the time between performance disclosures would hinder my (or my financial professional's) ability to evaluate the recent activity of a company, making an accurate risk assessment more difficult to generate.
This change could potentially lead to an unnecessary financial risk for many investors like myself.

Furthermore, I fail to see how disclosing performance is an undue burden on a corporation. It would seem that board members would be proud to share a positive performance or feel an obligation to disclose a downturn. The current financial system in the US is currently under-regulated and if you further constrain the ability of the middle class to make informed financial decisions, you will be doing a disservice to the United States and it's people.

Thank you for your attention and consideration. I depend on you to make a moral decision on this matter.

Sincerely,

Hope Berry

Anonymous — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 16, 2026 My name is William Hall, living in Shreveport, Louisiana.
I am writing to object to the proposed regulations change that would allow financial reporting to become semi-annual, instead of quarterly. Such a new rule can only profit those who wish to hide information. It has been tried before, and the market suffered.
As a retired older senior citizen, my wife and I live on a fixed income. It is augmented by whatever my wife and I managed to save and invest during my 50 working years.
As we are are in our 80’s, we have increased health challenges and health expenses, and our stamina and mobility is declining. We will not be able to recover the losses of principal and income resulting from reduced public reporting and a less transparent financial market.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 As a retired person whose spouse spent a career contributing to SEC reports, I learned the value of investors having said information. NOW, is NOT the time to lessen the requirements. Those with integrity will continue to have integrity. The people pushing the 6-month reporting period cause me to wonder about their "WHY." What are they wanting to hide?

Respectfully,

R R Bone
Houston, TX

Anonymous — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 16, 2026 Keep the reporting Quarterly. I'm retired, my investments are what I rely on therefore, I need to know what is happening in the market Quarterly.

Yahoo Mail: Search, Organize, Conquer

Anonymous — Jun 16, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 At the LEAST, Quarterly Reporting should remain the norm but monthly reporting should be the standard. Reporting should be mandatory especially, when any CEO or Company Executive or Corporation buys back or sells shares.

Anonymous — Jun 16, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 16, 2026 Keep it Quarterly please. MORE information is better than LESS information. I am a self employed attorney. I invest in an IRA for my retirement, with many Funds paying quarterly dividends. I fear that eliminating quarterly reporting will have a negative impact on the dividends I earn.

Anonymous — Jun 16, 2026
Subject: File No. S7-2026-15 From: Anonymous I would like more information not less with the companies that I invest in. By only having companies state the progress in meeting their expectations semiannual undermines the trust

---

Anonymous — Jun 16, 2026
Subject: File No. S7-2026-15 From: Anonymous Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own.

Anonymous — Jun 16, 2026
Subject: File No. S7-2026-15 From: Anonymous Please keep the current public company standard reporting as quarterly and not twice per year. As an investor, I am entitled to see my investments' financials every four months, and do not wish that to change.

Anonymous #1 Investment Banker — Jun 16, 2026
Subject: File No. S7-2026-15 From: Anonymous I have a background in financial engineering and investment banking and have advised the CEOs and CFOs of hundreds of the largest global public and private companies on all sorts of financial engineering matters including some of the complex situations happening on Wall Street on any given week for a very long time. If you asked S&P500 company CEOs and CFOs many of which I have worked closely with they would say this is absolutely insane and would destroy the foundations upon which the US global financial system stands upon. Please call the CEOs of any major investment bank or global financial institution and see what they think too - it would be shocking to me if any of them would see this as a good idea certainly not any of them I've ever worked with or come across during my career professionally. It doesn't take a professional (and in my opinion even most children would understand this with a simple explanation) to see that this proposal is so catastrophically damaging to everyone that it will cause irreversible harm to US equity investors + businesses + market cap value + innovation + families and children + their parents. Here are a few reasons why someone would want to push this proposal: 1. They don't know better. Whoever is proposing this doesn't understand actions and consequences. They don't understand finance and United States finance especially at a

fundamental level. They may want to help but they don't have nearly enough experience or understanding for anyone even a little sophisticated or ethical to take them seriously. 2. They don't understand and don't have any experience doing global finance in US, Europe, Asia, Australia and other markets. They don't understand why the Chinese financial ecosystem is permanently marked as untrustworthy with companies announcing fraud every few days which causes trillions of dollars of annual damages to their economy as a result and will do the same to ours. They don't understand secondary and tertiary order effects of their actions. They don't understand actions and consequences at a basic level. 3. They don't appreciate some people building US businesses are trying to build businesses that are good for the world. They want to indiscriminately destroy businesses and equity value and it's both unclear why and it's unclear why they would want to damage many great companies and people in the process. We've got companies doing cancer research and companies who are making people's lives truly better. Why are they looking to destroy these companies' ability to access capital markets and destroy these companies' ability to generate trust with the market I don't know. 4. They want to destabilize and permanently damage trust in the US financial system. Reputation is everything. Foreign government interference may be pushing this forward - the fact that this is a thing I'm even thinking about makes this proposal even more funny. 5. They want to enable fraud across companies in the US financial market. It would be funny if the people suggesting this proposal would benefit from the increased fraud across the ecosystem. It could be someone corrupt or morally and ethically bankrupt or both. I'm honestly shocked. 6. They want to increase the amount of volatility in the market. It would be funny if they are buying vol futures to make a quick buck while causing trillion+ of damage to everyone else. 7. They want to destroy America's ability to innovate. I am not sure why they would want to do this unless they benefit from it somehow. I've seen people literally do things that were so morally and ethically and religiously bankrupt that would disgust most of humanity just to move markets a little bit to make a few million bucks. This could be a possible explanation for why someone would want to destroy America's businesses and financial reputation causing irreversible damage to our financial ecosystem and one of the key pillars upholding America's standing in the world order. I can come up with 100 more reasons easily and it would make for a fun exercise for anyone to try to come up with more reasons why this is a bad idea. This proposal is so ridiculous it sounds like an Onion article. It's like something an extremely malicious actor would propose for their own benefit. I strongly oppose this and I'm out of words. With Love and Peace Yours Truly Friendly Neighborhood #1 Investment Banker

Anonymous n/a — Jun 16, 2026
Subject: File No. S7-2026-15 From: Anonymous To The SEC regarding File No. S7-2026-15. I am against the proposal to eliminate quarterly reporting. Quarterly reports are a very important part of making sure we all have more of a level playing field, especially for those investors who do not have access to more extensive networks to be in the know. Reducing companies reporting to twice a year would only increase the gap of information that is available to individual investors and would put them at a significant disadvantage. I respectfully disagree with the Commission's rationale of this proposal. The quarterly reporting does not seem to be limiting the big players, but it will negatively affect retail investors. Thank you for considering this comment.

Anthony Hollinsworth — Jun 16, 2026
Subject: S7-2026-15 Comment From: Anthony Hollinsworth Affiliation: Jun. 16, 2026 Keep quarterly reports. It works great as is, so why change it? There is no benefit to the SEC or to shareholders, and it actually could cause harm. So why change?

Argyle Wolf-Knapp — Jun 16, 2026
Subject: S7-2026-15 From: Argyle Wolf-Knapp Affiliation: Jun. 16, 2026 My name is Argyle Wolf-Knapp, I am a retired New Orleanian. The quarterly filing requirement works pretty well. Why fix something that isn't broken? The only benefit of going to a semi-annual filing rather than a quarterly one is a reduction of paperwork in exchange for a greatly increased risk of fraud. Don't do it.

“Labor is prior to, and independent of, capital. Capital is only the fruit of labor, and could never have existed if labor had not first existed. Labor is the superior of capital, and deserves much the higher consideration.” — Abraham Lincoln

---

Ariel — Jun 16, 2026
Subject: S7-2026-15 Comment From: Ariel Affiliation: Jun. 16, 2026 This is how the rich get richer and the poor stay poorer. As a financial advisor myself, this keeps investors out of the loop on what’s going on within a company. Our portfolio managers have to assume business remains growing for 6 months without confirmation or updates. That time period is too long to guess. Reporting should remain quarterly to allow investors to monitor their investments because they are in the know instead of investing through guess work.

This is a stupid idea.

Ashton Robertson — Jun 16, 2026

Subject: My view on Rule S7-2026-15 From: Ashton Robertson Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
I am writing to express my strong opposition to proposed Rule S7-2026-15. As a dedicated state employee who relies on the long-term stability of a public retirement fund, I view this proposal to eliminate mandatory quarterly reporting as a direct threat to the financial security of working Americans and the integrity of our national markets.
The American economy is the strongest and most trusted in the world precisely because it is built on a foundation of unmatched transparency, democratic access, and rigorous accountability. For over 50 years, the requirement that public corporations open their books every 90 days has ensured that everyday citizens—and the institutional pension funds that protect public servants—can invest with confidence. Quarterly reporting is not an administrative burden; it is the bedrock of the trust that keeps our capital markets fair and competitive.
Moving to a semi-annual reporting schedule actively compromises that trust. A six-month gap creates a dangerous blind spot for individual investors and long-term retirement savers. In half a year, corporate mismanagement, surging debt, or systemic failures can easily fester in the dark.
Furthermore, this rule creates a deeply un-American, two-tiered system. Wealthy corporate insiders, Wall Street hedge funds, and massive institutional players will always possess the resources, elite connections, and access to executives required to get timely information. Everyday retail investors and public pension systems rely on public SEC filings to keep the playing field level. Stripping away quarterly reporting puts public servants and working families at an extreme disadvantage, forcing us to take on unnecessary risk with our hard-earned retirement savings.
The SEC's historical mission has been to protect investors and maintain fair, orderly, and efficient markets. This proposal does the opposite by prioritizing corporate secrecy over public transparency.
I urge the Commission to uphold the values of fairness and financial accountability that make our markets great, protect the retirements of American workers, and reject Rule S7-2026-15.

Barbara Bolden — Jun 16, 2026
Subject: S7-2026-15 Comment From: Barbara Bolden Affiliation: Jun. 16, 2026 I believe quarterly reports are important because they provide transparency and accountability. Families, investors, and the public deserve regular updates on a company's financial health and performance. These reports help people make informed decisions and identify potential problems before they become larger issues.

As a teacher approaching retirement, I also understand the importance of protecting long-term investments and retirement savings. Many retirement accounts depend on accurate and timely financial information from publicly traded companies. Quarterly reporting helps ensure that investors receive current information throughout the year rather than waiting for an annual report, which supports confidence and stability in the financial markets.

Barbara Brisco — Jun 16, 2026
Subject: S7-2026-15 From: Barbara Brisco Affiliation: Jun. 16, 2026 June 16, 2026

Dear SEC:
Please keep Quarterly Reporting mandatory, so that CEOs / CFOs must continue to personally review and certify (attest) that the Report contains no false statements of material fact on a quarterly basis.

The Quarterly Reporting Requirement keeps CEOs / CFOs honest on a quarterly basis, and unable to use the “Enron excuse” of “I didn’t know”.

The quarterly reports attach automatic liability to the CEO / CFO - and they know it.

The 8-K Form that the SEC is suggesting will suffice on alternating quarters does not hold the CEO / CFO accountable nor liable for any falsehoods on the form.
In other words, the 8-K Form doesn't come with handcuffs - as do the required Quarterly Reports - and the CEOs and CFOs know this, too.

The quarterly reporting schedule acts as a deterrent to falsifying the records, and protects investors and prospective investors, and helps to reduce fraud and expose fraudsters.

I don't think there are good reasons to remove the quarterly reporting requirements which benefits investors, as versus changing to semi-annual reporting, which could harm investors.

I know there are expenses associated with the quarterly reporting, which I am guessing is a main driver to changing the reporting frequency.

However, I do not think the expense savings outweigh the businesses' responsibility and accountability to safeguard investors / prospective investors monies.

Please keep Required Quarterly Reporting.

Cordially,

Barbara Brisco

Keep it Quarterly!

Transparency is needed to prevent scams!

Sent from my iPhone

Barbara Glover — Jun 16, 2026
Subject: S7-2026-15 Comment From: Barbara Glover Affiliation: Jun. 16, 2026 Transparency is vital to our economy. Quarterly reporting is a way to keep businesses honest on behalf of consumers and investors. If a business is operating properly then they have no reason to challenge quarterly reports. This is one way the SEC can also maintain it’s credibility with consumers.

Barbara Maskil — Jun 16, 2026
Subject: S7-2026-15 Comment From: Barbara Maskil Affiliation: Jun. 16, 2026 No, I object to this 6 month blackout period. There's enough fraud going on from big tech, big corporations and even our government, it needs to stop. The American people have been cheated enough.

Barbara Moore — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Barbara Moore Affiliation: Jun. 16, 2026 At no time should the SEC stop doing quarterly reporting. This is not only dangerous to our retirement investments it is dangerous to allow companies to play with the reality of their strength and weakness.
I'm a retired small business owner and business administrator and question the thinking behind going back to the old 1950's policy. The SEC is supposed to protect the citizens of this country and

not allow businesses to manipulate their reporting, to the disadvantage of investors.
Barbara Moore
Brevard NC

Barbara Moreau — Jun 16, 2026
Subject: File No. S7-2026-15 From: Barbara Moreau As an investor, I wish to receive quarterly updates not semi-annual updates on businesses. I believe it keeps the companies within the stock market transparent. In addition, knowledge of their ongoing profits, losses, buyouts, etc. keeps me informed. Changing the system to semi-annual would hurt investors. The system is not broken, please leave it alone.

Barbara Northimgton — Jun 16, 2026
Subject: S7-2026-15 Comment From: Barbara Northimgton Affiliation: Jun. 16, 2026 No hiding reports, no delay in reporting

Barry Weinstein — Jun 16, 2026
Subject: File No. S7-2026-15 From: Barry Weinstein The first ten years of my professional career was in a Regulatory Reporting capacity, preparing and filing with government agencies periodic financial statements of the company. Like the rest of us, corporations don't want to tell anyone what they're doing. This opacity is only good for those with their fingers in the pot. For the rest of us, it's not so good. Rolling back corporate filing requirements from quarterly to semiannually will just allow more time for information to be obfuscated. Crucial decision making, both internally and by investors will be hampered. The larger picture will not be served well. You know this is true. Americans are still looking to their leaders to do the right thing. Do the right thing.

Barry Willey — Jun 16, 2026
Subject: S7-2026-15 Comment From: Barry Willey Affiliation: Jun. 16, 2026 Requirements for quarterly reporting should remain as is. Extending the reporting time puts the investing public at a

great disadvantage. This only benefits the corporate officers and others with inside information.

Barry Willey.

Benzion Friedman — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Benzion Friedman Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
This is outrageous. The wealthy companies have so much power over stock prices, while small traders try their best to research and keep getting crushed under all these powerful people. This law specifically would allow them to not show off their true performance and leave retail investors in the dark.

Bernard clark — Jun 16, 2026
Subject: File No. S7-2026-15 From: Bernard clark I believe that it is vital that this information be to determine if these companies are financially stable to help companies and individuals to determine if they are a viable business.

Bernard Roth — Jun 16, 2026
Subject: S7-2026-15 From: Bernard Roth Affiliation: Jun. 16, 2026 Please keep quarterly financial reporting by publicly traded companies.
I am a successful investor for my retirement and I need the confidence that my investments will be based on honest corporate accounting, with no hanky panky privileges for executives.
Thanks,
Bernard Roth
Military Systems Analyst
Santa Barbara, CA

Bernd Schmid Analyst, The Motley Fool — Jun 16, 2026
Subject: File No. S7-2026-15 From: Bernd Schmid As an individual investor I rely on my companies to inform me on a regular basis with respect to how they are doing. The quarterly reporting standard has been essential for me, and I bet for many other private investors, to really stay on top and know what is going on with my companies. If in the future I will get only two reports a year, this will cause an even bigger gap between what I know is happening at my companies since they reported last time and what the actual reality is. It will very likely lead to worse investing decisions over time. Probably not only me, but every fundamentally oriented investor who buys individual companies' shares. If this were to happen, allow me to express, I would feel neglected by the authority whose has explicitely made it clear that it is out there to protect me.

Bertie — Jun 16, 2026

Beth Beyer — Jun 16, 2026

Subject: S7-2026-15 Comment From: Beth Beyer Affiliation: Jun. 16, 2026 I am in favor of keeping the quarterly reporting. Quarterly reports ensure ordinary investors and institutions receive consistent, timely information. Regular financial scrutiny deters fraud and helps investors accurately price risk, which in turn lowers the cost of equity capital. A shift to semiannual or less frequent reporting creates longer periods where insiders possess material nonpublic information, increasing the risk of insider trading. Consistent quarterly reporting has been a hallmark of U.S. public markets for over half a century, contributing to transparency, investor trust, and the success of our capital markets.
Please leave the current quarterly reporting alone.

Beth Ehrlich — Jun 16, 2026
Subject: S7-2026-15 Comment From: Beth Ehrlich Affiliation: Jun. 16, 2026 This is no legal or ethical reason for this, other than giving the rich one more option to not pay their fair share. This should be illegal.

Sent from my iPad

Beth Garrity — Jun 16, 2026
Subject: S7-2026-15 Comment From: Beth Garrity Affiliation: Jun. 16, 2026 Transparency is tremendously important and the key to the public assurance that the books are not being cooked by unscrupulous people who want profit over the reality of what the “books” might say. Anything short or accurate book keeping is grievous theft.

Beth Silvar — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Beth Silvar Affiliation: Jun. 16, 2026 I support quarterly reporting because investors should be able to rely on up to date information. I am against the proposed change.

Beth Watson — Jun 16, 2026
Subject: S7-2026-15 Comment From: Beth Watson Affiliation: Jun. 16, 2026 I don't agree expanding the reporting period to 6 months. Much can happen in 3 months that 6 months is ridiculous. One reason is it gives the bad players more time to move money around. The second one is people with less stock need more stability and maybe need access to a portion of their lively hood in a quarterly fashion. I just don't think it helps the average citizen.

Beverly none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Beverly As an individual investor, managing my own and my family's investments, I am strongly opposed to allowing publicly traded companies to cut back on the required quarterly reports that are now required by the SEC. It is important for us, as individuals and investing communities, to have access to more information about the companies we trust with our hard earned resources...not less! Please do not allow this to change! Full transparency is always on the side of truth, accuracy and thouroughness in providing this information.

Beverly Smallwood — Jun 16, 2026
Subject: File No. S7-2026-15 From: Beverly Smallwood In regard to S7-2026-15. Please note that the proposed changes to corporate reporting of earnings will be detrimental to individual investors but may also affect larger investment firms, those that control financial and retirement accounts. As an investor, I expect the SEC to establish rules and regulations that protect the investors by ensuring we have accurate and timely information on the companies we invest in. Allowing corporations to push off reporting will allow any bad conduct or fiscal problems that may occur to be hidden from investors and could cause losses that otherwise may not occur when given timely information. Informed investing is the key to building wealth and ensuring self sufficiency in retirement. Research has historically shown that less reporting does not reflect positively for investors when mismanagement and/or fraudulent events occur. The SEC should protect investors and continue quarterly reporting by public companies to ensure these companies are upholding their responsibilities. Companies that opt out of quarterly reporting are most likely the to need more oversight because they may be trying to hide some wrong doing. Please hold company leaders to a high standard of transparency for the sake of all investors! Sincerely, Beverly S.

Bhinish Shah — Jun 16, 2026
Subject: S7-2026-15 Comment From: Bhinish Shah Affiliation: Jun. 16, 2026 As a young investor I need to be able to see quarterly reports to understand how these companies are doing in response to world events, thereby understanding their vulnerabilities better

Bill Kuehn — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Bill Kuehn Affiliation: Jun. 16, 2026 Dear Regulators,

I am writing to strongly oppose any proposal that would reduce the reporting requirements for publicly traded companies from quarterly disclosures to only semiannual reporting.

My name is William Kuehn, and I am a public school teacher. Like millions of Americans, my retirement savings are invested in the financial markets through retirement accounts and pension investments. The security of my future depends on a market system built on transparency, accountability, and timely access to information.

Quarterly reporting provides investors with regular insight into company performance and helps ensure that management teams remain accountable to shareholders. Reducing the frequency of disclosures would diminish transparency and make it more difficult for investors to evaluate risks and make informed decisions.

History provides an important lesson. The United States previously operated under a less frequent reporting system between 1955 and 1970. That period was associated with lower market valuations and lower investor returns. Less transparency benefits insiders and large institutions while leaving ordinary investors at a disadvantage.

As someone whose retirement is tied directly to the strength and integrity of our financial markets, I believe maintaining quarterly reporting is essential. Strong disclosure requirements help protect investors, promote confidence in the markets, and support fair and efficient capital allocation.

I respectfully urge you to reject any proposal that would weaken quarterly reporting requirements and instead preserve the transparency and accountability that have helped make U.S. capital markets the strongest and most trusted in the world.

Thank you for your consideration.

Sincerely,

William Kuehn
Public School Teacher

Senior Vice President Finance - Arkla Gas
Controller - Reliant Energy
Vice President Finance - Centenary College of Louisiana
Vice President Financial Affairs - Ohio Northern University

As you can see I have extensive experience with public companies as well as publicly traded debt

I STRONGLY urge that you NOT drop quarterly reporting requirements. Stating the obvious, many things can happen quarter to quarter which the investor needs to know about in a timely manner. Moving to 6-month reporting will deteriorate timely sharing of information and leave transactions more to the benefit of insiders and not the general investing public. Even if there no shenanigans going on.

Thank you

Billie Jo Hopka — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Billie Jo Hopka Affiliation: Jun. 16, 2026 Wow, the absurdity of trying to change from reporting often to much less often is outrageous! I am not well versed in investing but do know math. Paying close attention to compounding interest is worth a fortune to us middle class. What makes you think this a good idea? I need proof!!

Bob DePugh — Jun 16, 2026
Subject: S7-2026-15 Comment From: Bob DePugh Affiliation: Jun. 16, 2026 I am turning 70 this fall and I've worked my whole life playing by the rules and saving a very modest amount. I've worked for 37 years at Alligator Records as Dir. of Licensing. Keep SEC accounting quarterly. I do not deserve to have my retirement income reduced so billionaires can have more of my money. It is not fair and erodes my trust in our nation as being a fair and good one. Robert N. DePugh

---

Bob Ekstam — Jun 16, 2026
Subject: S7-2026-15 Comment From: Bob Ekstam Affiliation: Jun. 16, 2026 I strongly object to shifting corporate earnings reporting from three months (quarterly) to six months. This introduces significant problems, primarily centered on reduced transparency, increased share volatility, and broader information gaps. This would make markets more unstable. Companies could legally hide material financial declines, operational failures, or governance risks for up to six months before officially notifying the market. Less frequent reporting means larger informational gaps, causing a higher likelihood of unexpected surprises that lead to violent, unpredictable stock price swings. Increased Risk of Fraud: Less frequent mandatory audits and disclosures provide management with an extended window to engage in riskier behavior or manipulate financial metrics without market correction.

Bobby Hendley — Jun 16, 2026
Subject: S7-2026-15 From: Bobby Hendley Affiliation: Jun. 16, 2026 Bobby Hendley (retired) Texas —

To drop the reporting accountability to less than quarterly is to open the floodgates that crashed our entire economy once before. It created a national havoc then that took ages from which to even begin recovering. In many ways it never fully recovered for a significant block of the population. Obviously this is being pushed by the same oligarch types as before, but there are 340,000,000 other people who do not want to return to that hellscape it caused. I strongly urge you to reject this change due to the outrageous degree of insider trading it will create for the oligarchs that are already ruining life for the vast majority of Americans.

Bobette Beck — Jun 16, 2026
Subject: S7-2026-15 Comment From: Bobette Beck Affiliation: Jun. 16, 2026 Bobbi Beck, former business owner, retired. Quarterly reporting is necessary to keep CEO's and companies honest. In our current political climate it's far too easy to cheat and not be caught, or prosecuted. It needs to end.

Bobheidersbach — Jun 16, 2026

Bonnie Pinkerton — Jun 16, 2026
Subject: S7-2026-15 Comment From: Bonnie Pinkerton Affiliation: Jun. 16, 2026 Bonnie Pinkerton Retired Teacher
This is important to me because I was way underpaid for my level of education, in order to help the

youth of our nation. Every dollar that I was able to save and invest matters to me. It is not fair that moving to 6 month reporting instead of quarterly reporting will give an advantage to those in the know and will allow a greater opportunity for those people to take part in insider trading. If anything, there should be more transparency not less.

Brandon Firkin — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Brandon Firkin Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Quarterly earnings is helpful for myself as an individual investor as I can see when market dynamics are changing and how the business is progressing or impacted from extraneous events. Semi annual reporting like in Europe is not as robust as it is in the states and is part of the reason investor confidence in those companies can be uncertain at times.

Brandy Burnett — Jun 16, 2026
Subject: S7-2026-15 Comment From: Brandy Burnett Affiliation: Jun. 16, 2026 I urge you not to become complicit in the growing trend of allowing corporations to exert significant influence over major platforms without full financial disclosure. Honesty and integrity depend on transparency, and that transparency must include openly disclosing who funds and shapes the content reaching millions of Americans.

As a lifelong SEC fan, I hold this conference to a higher standard. The values of its fans — fairness, accountability, and trust — should be reflected in how the SEC conducts its business relationships. If that standard is abandoned, you will lose not just my support, but the loyalty of fans like me.

brenda agnew — Jun 16, 2026
Subject: Comment on S7-2026-15 From: brenda agnew Affiliation: Jun. 16, 2026 I like quarterly reports! Don’t change it.

Brenda Carmichael — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Brenda Carmichael Affiliation: Jun. 16, 2026 I strongly oppose any proposal that would reduce the frequency of financial disclosures by publicly traded companies.

Quarterly reporting is one of the most important tools available to investors. Public companies are entrusted with capital from shareholders, and those shareholders deserve timely access to financial information. Reducing disclosure requirements would decrease transparency, limit accountability, and make it more difficult for investors to evaluate company performance, management decisions, and emerging risks.

Quarterly financial reports provide investors with a consistent and standardized method of monitoring revenue trends, profitability, cash flow, debt levels, operational performance, and changes in business conditions. Without regular disclosures, investors would be forced to make decisions using older information that may no longer accurately reflect a company's financial position.

Less frequent reporting would disproportionately harm retail investors. Large institutional investors possess significant financial resources, teams of analysts, industry contacts, and access to information channels that individual investors cannot match. Retail investors depend heavily on public disclosures to make informed decisions. Reducing reporting requirements would widen the information gap between institutional and individual investors, creating a less fair and less competitive marketplace.

This imbalance has broader economic consequences. Healthy capital markets depend on broad public participation and investor confidence. When transparency is reduced, individual investors may become less willing to invest in public markets, concentrating even more influence in the hands of large institutions. Excessive concentration of market power can reduce competition, weaken market efficiency, and diminish the role of individual investors in capital formation. Public markets should remain accessible and transparent for all participants, not tilted further toward those with the greatest resources.

Transparency is a cornerstone of efficient and fair capital markets. Regular reporting promotes market confidence, helps identify potential problems before they become major issues, and encourages management teams to maintain accountability to shareholders. Public companies benefit from access to public capital markets, and in return they should provide shareholders with complete financial reporting at least every quarter.

Reducing disclosure requirements would not improve investor protection. Instead, it would increase uncertainty, reduce transparency, weaken accountability, and make informed investment decisions more difficult. Investors in public companies should continue to receive full financial disclosures on a quarterly basis, and any proposal that limits access to that information should be rejected. The SEC's mission includes protecting investors, maintaining fair and orderly markets, and facilitating capital formation. Preserving robust quarterly disclosures supports all three of these objectives.

Brenda DeMaestri — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Brenda DeMaestri Affiliation: Jun. 16, 2026 Do NOT go back to reporting semi-annually. Stop being on the side of corporations and continue to protect the public who has no choice but to be in the stockmarket in order to have any chance at retiring. The ones closest to retiring in the next 5 years will be hit the hardest.

Brenda Gargis — Jun 16, 2026
Subject: S7-2026-15 Comment From: Brenda Gargis Affiliation: Jun. 16, 2026 Their books should not go dark for 6 mo this is too long to hide things. Why would they even sugguest this unless they are wanting to hide activities during this time. I also think every person involved in government position should have to show their income tax return publicly yearly. To help keep them honest.

Brenda J Peeler None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Brenda J Peeler I and my investment broker rely on quarterly information to make informed investment decision (2) longer gaps create an unfair advantage for corporate insiders (3) "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates, (4) the savings to companies aren't worth the overall cost to me.

Brenda Jones — Jun 16, 2026
Subject: S7-2026-15 From: Brenda Jones Affiliation: Jun. 16, 2026 I urge you to continue with quarterly reporting requirements as changing to bi-annual reporting only benefits corporations and will hurt investors. You must continue the current rule to promote transparency so that investors like me can make the best decisions based on the most current data. Corporations will continue to gather quarterly data for their own analysis and decision-making but then your new rule would allow them to hide that data from investors which is unfair to say the least.

Brian Nelson — Jun 16, 2026
Subject: S7-2026-15 Comment From: Brian Nelson Affiliation: Jun. 16, 2026 Transparency doesn't involve hiding data. If it is an action recommended by this Administration then it is an action which benefits the principles of the company and primary stock holders and not those out of the power loop. Those quarterly reports catch financial and management issues quickly quickly and give shareholders timely updates. We should be working towards more transparency rather than more secrecy.

Brian O'Neill Contributor to The Motley Fool — Jun 16, 2026
Subject: File No. S7-2026-15 From: Brian O'Neill Reporting quarterly earnings is a hassle. I know from first-hand experience working in Investor Relations for two public companies. Public companies work very hard to produce investor updates -- but full and fair disclosure is a pillar of our capital markets, a necessary chore. Markets are increasingly plagued with unfair information leaks. The best solution to combat unfair advantages from information leaks is more disclosure -- disclosure as often as reasonably possible -- not less. Changing public company reporting rules from quarterly to bi-annual is not a solution for more fair markets, it's a step in the wrong direction. Please do not change reporting rules from quarterly to bi-annual. Thank you.

Brian Van Dine — Jun 16, 2026
Subject: S7-2026-15 Comment From: Brian Van Dine Affiliation: Jun. 16, 2026 Consider that the way investors view the stock market is similar to how voters view choosing politicians. For the last couple of voting cycles there has been increased criticism about voting transparency and strong suspicions of widespread voting fraud. As confidence in the ability to have fair elections decreases, the whole system begins to fragment. The same is true for Wallstreet. That is precisely why insider trading is illegal . The mere perception of the masses that the system is rigged is all that is needed. That is why every SEC rule must carefully consider how best to create investor confidence in the "system?" On the surface at least, allowing companies to report less often seems to obscure data from the public which is the opposite of transparency. Especially in the age of AI where it is believed for right or wrong that AI tools give more real-time data analysis about complex systems, such a ruling may be viewed suspiciously. Whatever the SEC decides, preserve investor confidence about the integrity of the system as this concern supercedes the concerns of corporate accountants.

Brian Welch — Jun 16, 2026
Subject: S7-2026-15 From: Brian Welch Affiliation: Jun. 16, 2026 CEO’s of corporations should continue to be required to sign their companies’ financial reports quarterly. Accountability is key to protecting investors.

Without quarterly reporting, small investors have less transparency into the health of their investments. As someone who relies on investment income in retirement, this lack of transparency could cause serious loss of asset value. This experiment has been tried before and failed miserably for the individual investor. Keep it Quarterly.

BRIEN ABLES n/a — Jun 16, 2026
Subject: File No. S7-2026-15 From: BRIEN ABLES Dear Commissioners: I am writing to express my opposition to any proposal that would replace quarterly reporting requirements for publicly traded companies with a semi-annual disclosure regime. The current quarterly reporting framework plays a vital role in maintaining transparent, efficient, and fair capital markets. Investors rely on timely and consistent financial information to make informed decisions regarding the allocation of capital. Reducing the frequency of required disclosures would increase the amount of time during which investors operate with incomplete information, potentially increasing uncertainty, volatility, and information asymmetries. Quarterly reporting also promotes accountability. Public company management teams are regularly required to communicate their financial performance, operational developments, and material risks to shareholders. This cadence helps ensure that investors receive updates on emerging challenges and opportunities before they become significantly more consequential. While some argue that less frequent reporting would encourage a greater focus on long-term strategy, there is limited evidence that reducing disclosure frequency would meaningfully improve long-term corporate decision-making. By contrast, the costs to investors of diminished transparency are more immediate and tangible. Institutional investors, retail investors, analysts, and other market participants benefit from access to timely information that supports accurate valuation and efficient price discovery. Moreover, modern financial reporting systems and technology have substantially reduced the burden associated with preparing and distributing quarterly disclosures. Any modest compliance savings achieved through semi-annual reporting could be outweighed by

increased uncertainty in the marketplace and a corresponding reduction in investor confidence. The SEC's mission includes protecting investors, maintaining fair, orderly, and efficient markets, and facilitating capital formation. Quarterly reporting requirements advance all three objectives by ensuring that investors have regular access to material information and by supporting market integrity. For these reasons, I respectfully urge the Commission to maintain the existing quarterly reporting framework and reject proposals that would move publicly traded companies to a semi-annual disclosure schedule. Thank you for your consideration of these views.

Bruce Badger — Jun 16, 2026
Subject: S7-2026-15 From: Bruce Badger Affiliation: Jun. 16, 2026 Providing oversight is what lawful corporations agree to allow. Only corrupt corporations want to limit transparency.

Bruce Baker — Jun 16, 2026
Subject: S7-2026-15 From: Bruce Baker Affiliation: Jun. 16, 2026 Quarterly reporting helps ensure accountability, minimizes the likelihood of foul play, and provides reasonable time periods during which timely, corrective actions can be taken. Every tax paying American benefits indirectly, if not directly, from Quarterly rather than just twice-a-year reporting.

Bruce Bartolain none — Jun 16, 2026

Subject: File No. S7-2026-15 From: Bruce Bartolain 1. Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. 2. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. 3. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. 4. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it.

---

Byron Stuart — Jun 16, 2026
Subject: S7-2026-15 From: Byron Stuart Affiliation: Jun. 16, 2026 Quarterly reporting is essential to transparency and to the fiduciary responsibility of corporations to shareholders. It has been shown time and time again that big corporations cannot be trusted and must be held accountable for the statements they make and the Financials they disclose. Reporting twice each year is simply not enough. To protect investors and the public, reporting should be quarterly at a minimum, and with the help of AI, it can probably even be monthly in the near future.

Byron Stuart
Fort Walton Beach, FL

C Correia — Jun 16, 2026
Subject: S7-2026-15 Comment From: C Correia Affiliation: Jun. 16, 2026 To whom it may concern,

I kindly request that your organization maintains quarterly reporting. Changing this policy to every six months is an informational disadvantage for hardworking people when making important financial decisions. I am one of them, as I am a retired law enforcement officer who now works in a director's

role in a municipal government department. I implore you not to make this policy change. It is the right thing to do for the majority of Americans in ever challenging times. Critical decision making components will very likely be lost with lesser reporting to draw conclusions from. Thank you in advance for your consideration and support of We The People. Sincerely,
Christopher M. Correia 35 Royal Drive West Warwick, RI 02893

C Maria Sagar Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: C Maria Sagar I object to semiannual reporting. It keeps the investor in the dark and reduces accountability . My money is being put to work. I am entitled to know the results and how. Do not reduce the reporting frequency.

Camille Shieff — Jun 16, 2026
Subject: File No. S7-2026-15 From: Camille Shieff We are in the midst a slide so seriously in favor of big tech, big investors, and mega corporations that making it "easier" for them to show they are in compliance with already relaxed rules of transparency and accountability that I fear the "little guys" (like me) will never be able to make informed decisions regarding our investment choices. I am a new investor and am already overwhelmed by how much it feels like I'm being distracted that I feel that allowing these reports to be filed even less frequently makes it easier for those in power to hide what they are doing. I am a business owner and cannot imagine getting reports from my managers LESS frequently and being comfortable with the job they are doing. The reports are what ease my mind that we're going in the right direction and allow me to step in and make changes when I feel that we are not.

Candace Jacobs — Jun 16, 2026
Subject: S7-2026-15 Comment From: Candace Jacobs Affiliation: Jun. 16, 2026 Too many lower to middle class Americans have their wealth and retirement locked into the stock market without the freedom of withdrawal for the market to be more disregulated. Their well being is at the mercy of the upper class and corporations who have more freedom and ability to lose when gambling with stocks.

Carla Fink — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carla Fink Affiliation: Jun. 16, 2026 I worked for a Fortune 100 company for nearly 30 years, and the quarterly reports were an important part of informing the employees as well as the public of the company's performance. It helped us understand why certain product and service decisions were being made. It's also interesting to see how companies can spin the numbers to make things look better than they are. If you give companies double the time to report, that gives them double the time to spin their stories. And we the public and investors don't know what's happening. Meanwhile, I am now a small business owner, trying to make my way in a difficult world without the big tax cuts that the big companies have. The least they could do is continue to report their financials regularly so the public and the government are aware of their activities and performance.
Carla Fink, Small business owner

Carmelo Tabone — Jun 16, 2026
Subject: File No. S7-2026-15 From: Carmelo Tabone More information not less please..... Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The

short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own.

Carmen Casey — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carmen Casey Affiliation: Jun. 16, 2026 We as the investors have a fundamental right to see what's happening with our investment as often as possible. It's always better to to address an issue early on then later. I request to continue with quarterly reporting.

Carol Tesley — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carol Tesley Affiliation: Jun. 16, 2026 I am writing to request that you continue to require public companies to
report quarterly. Companies ask that we invest in them and quarterly
reporting is how we evaluate the strength of the business and if they
have performed in a way to warrant my investment monies. I believe, as
an investor, that I should have access, in a timely manner, to the data
needed for me to make informed decisions regarding my investments. We
are living in a rapidly changing world and so much can happen in just
three months in a company's performance. Waiting 6 months is
unreasonable in this fast paced world. If companies want our investment
money, they should report to us at least quarterly.
Thank you,
Carol Tesley
Retired

Carol Turton — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Carol Turton Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

Caroline Hiatt — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Caroline Hiatt Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Information should be public and available quarterly, or smaller investors will be at a bigger disadvantage than ever. Let people have information to make informed investment decisions! Six months is way too long and conditions and companies could be unrecognizable from when the data was collected.

Carolyn Bragg — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carolyn Bragg Affiliation: Jun. 16, 2026 Consumer confidence is so low for government, big business, and companies they used to trust, that it can't go much lower!
The average consumer has enough problems without the SEC making it easier for companies to hide EVEN MORE than they do now. Don't help hide the alligators so you become one of them! Help Americans survive this era of economic crises. Show us that YOU CARE!

Carolyn Hardaway — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carolyn Hardaway Affiliation: Jun. 16, 2026 We need accountability not surprises. Keep using quarterly reporting so my finances can take care of me in my retirement.

Carolyn Hardaway

Retired Educator.

Please note my new Email address.

Carolyn Hidy — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carolyn Hidy Affiliation: Jun. 16, 2026 Please leave SEC reporting quarterly. My retirement, and millions of others', rely on competent management, which requires up-to-date information. SEC is responsible for helping manage the market with a steady hand. It is irresponsible to just suddenly cut reporting requirements in half and leave managers flying blind. I'm not sure who you think that benefits but I'm pretty sure it's related to hiding information and corruption so a few can make a lot of money in hiding, at the millions' expense. Please manage responsibly and leave SEC reporting at quarterly.

Carolyn Stevens — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carolyn Stevens Affiliation: Jun. 16, 2026 It needs to, has to, stay quarterly reporting. Large corporations can/ will hide TOO much. This will kill small businesses. For the sake of small business owners, PLEASE do not change.

Carolynn Rainey — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carolynn Rainey Affiliation: Jun. 16, 2026 I am outraged by the fact that the SEC is considering changing the required quarterly reporting; moving to a six month reporting schedule will give companies the ability to withhold information and potentially cheat hardworking American citizens out of their money. The quarterly reporting system was designed to protect ordinary citizens not organizations, and should remain in place.

Carrie Williams — Jun 16, 2026
Subject: S7-2026-15 Comment From: Carrie Williams Affiliation: Jun. 16, 2026 Quarterly reporting needs to be left as is! It is imperative to keep it as in order for everyone, especially individual investors, to be able to make informed decisions regarding their stocks. As a stockholder, I am part-owner of any company I own stock in, and therefore I deserve to know how that company is functioning financially, and be able to discern from the reports whether or not my investments are working for me, and how to properly manage my investments. Without the ability to see actual quality information on performance, earnings forecasts, and timely (meaning quarterly) analyst information, individuals stand to lose in the long run. Less information makes it harder for anyone to make important decisions regarding their holdings. This does not bode well for long-term investment strategies individual investors need in order to see growth and the ability to save for their retirement. As a retired person, the information provided by quarterly reporting is vital to myself and many others that rely on our investments to provide income. SAVE THE 10-Q REPORTING!

Cathleen King — Jun 16, 2026
Subject: File No. S7-2026-15 From: Cathleen King Transparency is compromised in this proposal. We have used quarterly reports to ensure transparency and accountability of the business processes in our country and the system is functioning properly. This is necessary and to change that is harmful to our country and individuals alike. Do not change what is not broken.

Cathleen Santosus None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Cathleen Santosus I am a new retail investor. I rely on quarterly earnings reports directly and through a variety of secondary sources to make informed investing and trading decisions. Cutting those reports in half would have an immediate and lasting detrimental effect on my ability to make informed investments. It would give institutions even greater advantage and opportunity to manipulate the market on the backs of retail investors. It takes the democratization of investing in the opposite direction by reducing people's access to company management via the earnings calls. This is not aligned with the Trump agenda related to leveling the field between everyday Americans and the elites. If implemented, it will be a stain on Trump's legacy. Don't do it. It would be a self-inflicted wound. The problem of short-term thinking the rule change

purports to address is clearly overblown. There is little to no compelling evidence that quarterly reporting has stymied innovation and value creation. Come on, man! Look at the leading sectors and companies that the administration is relying on and investing in to strengthen America. There really is very little good that can possibly come from this rule change, and plenty of assured downside. It doesn't serve the common good, and for this reason, it should not be adopted. Thank you for your attention to this comment.

Chad Long — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Chad Long Affiliation: Jun. 16, 2026 To the Securities

and Exchange Commission:

I find it difficult to identify any aspect of this proposed rule that could reasonably be considered fair. The current framework does not appear to afford me any meaningful advantage over being entirely excluded from participation. Rather, it risks reinforcing existing power imbalances, which I believe the Commission should actively oppose. This approach is overly punitive and threatens to place otherwise hardworking and law-abiding Americans at significant economic and personal disadvantage. I do not wish to live in a society where such disparities persist, and I urge the Commission to reconsider this proposal in favor of policies that promote equitable access and fairness for all.

Chad McGraw Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Chad McGraw As a stock holder, I am an owner. I expect to be kept aware of how my businesses are doing. I strongly object to allowing companies to reduce their quarterly reports to only two per year. I'd prefer we increase the frequency to monthly disclosures, even if the additional reports are more limited. Every business should know their monthly revenue, monthly operational and capital expenses, headcount, operating margin, and cost of sales. Let's increase the amount of information provided to our business owners rather than allowing it to be delivered too late to fix small problems before they become runaway trains. This is especially important now as we are hearing about massive capital expenditures in hardware which anyone can see will have a very fast depreciation cycle. Likewise, SPCX now has a valuation versus earning (P/E) which is so high, I'm not sure if even their rockets can get there. We need regular updates from management to understand their performance and direction. We need more than fluff and grand-standing. We expect the SEC to make sure we get the numbers and management update at least quarterly if not monthly. You are otherwise just making the whole financial market more opaque to the individual investor and helping large financial institutions increase their advantage over the individual investor - because they will get meetings with management, learn what is going on, and then feed themselves first. The SEC needs to protect the individual investor! I'd also suggest you encourage monthly dividends as one would see from a bond or bond ETF, even better if everything was standardized to the 1st of every month. This would minimize the effort to manage limit order prices through the traditional 3 month quarterly dividends cycle. As it stands, it's very easy to allow a high dividend payer get prematurely sold as it approaches it's record / xdiv date. Promote public disclosure and consistency rather than allowing management to avoid reporting to the owners. For instance, I'd suggest you provide a single page standardized overview template to be used as the first "data" page for every annual report, enabling a faster read and direct comparison between different companies - something more likely to be read by the majority of investors. Otherwise, most will depend on an analysts' interpretation for the same purpose.

Charles Garber — Jun 16, 2026
Subject: S7-2026-15 Comment From: Charles Garber Affiliation: Jun. 16, 2026 The idea that one would essentially turn off our ability to assess our owned stocks is ridiculous. All this does is help the people making the decisions from their mistakes and bad decisions. All of this reminds me of the derivative trading that these greedy investment firms have been practicing for the past several decades, and we know who was to blame for the Great Recession of 2008.

Charles Hughes — Jun 16, 2026
Subject: S7-2026-15 Comment From: Charles Hughes Affiliation: Jun. 16, 2026 This is a benefit for insider trading only and continues the pillaging of the public sphere.

Charles J Fontenot — Jun 16, 2026
Subject: File No. S7-2026-15 From: Charles J Fontenot Please keep the SEC quarterly filing requirements. As an individual investor, I consider the people that manage companies that I invest in to be my employees. Individual investors such as myself need to be kept informed as to what the hired leaders are doing with the companies that we own. Well managed companies don't need to hide data from investors. Poorly managed companies can potentially use the extra time to hide potentially damaging information from the public.

Charles Lohmeyer — Jun 16, 2026
Subject: File No. S7-2026-15 From: Charles Lohmeyer Dear Securities and Exchange Commission, I am writing to respectfully express my opposition to the Commission’s proposal to change the current quarterly reporting structure to a semiannual reporting framework. Quarterly reporting has long served as a critical mechanism for maintaining transparency, accountability, and timely insight into the financial health of public companies. Investors, analysts, and other stakeholders rely on this cadence to make informed decisions, assess performance trends, and identify emerging risks. Reducing the frequency of these disclosures would create longer periods of uncertainty and limit the ability of market participants to respond to material developments in a timely manner. A shift to semiannual reporting may also unintentionally weaken market discipline. Quarterly reporting encourages consistent internal controls, fosters responsible management practices, and supports a culture of regular financial review. Extending the reporting interval could diminish these benefits and increase the likelihood of surprises that undermine investor confidence. Though larger companies may continue to report quarterly, the companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting

requirements makes them harder to monitor, not easier to own. As the WallStreetBets comment letter put it: "The companies we trade are not being held back from greatness by the obligation to file four reports a year. ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well." While I understand the Commission's interest in reducing regulatory burdens, I believe that the potential costs to market transparency and investor protection outweigh the anticipated benefits. Enhancing the efficiency of the existing quarterly framework would be a more balanced approach than reducing the frequency of reporting altogether. Thank you for considering my perspective on this matter.

Cheryl Grabowski — Jun 16, 2026
Subject: S7-2026-15 From: Cheryl Grabowski Affiliation: Jun. 16, 2026 Cheryl Grabowski, Retired, FL. This matters to me because the companies need to be held accountable. We need to pay attention to history and learn from the mistakes made by the companies in their favor. Let's stop letting the haves (rich) benefit and the have nots (middle and poor) share being less. The same thing can be said, the large companies getting bigger and the people losing savings due to the rules changes to benefit the larger companies. If this change almost 70 years ago had not worked, it would have been changed much earlier than now. This should be verified at the minimum every three months to keep fraud from happening. Records should be "open book".

Subject: Comment on S7-2026-15 From: chris hamay Affiliation: Jun. 16, 2026 Christine Hamay, Project Team Leader, Shelby Township, Michigan. Quarterly reporting allows me to make important decisions on how I invest my money for my future retirement. It also holds the company I work for accountable to the public who choose to invest and or consider working with the company. Please do not change to semi annual reporting. Thank you.

Chris Lihosit — Jun 16, 2026
Subject: S7-2026-15 Comment From: Chris Lihosit Affiliation: Jun. 16, 2026 Hello SEC -

I urge you to not proceed with the change to half yearly filings. I know the agency has been stripped of its power due to DOGE, but this change is materially impacting to the retail investor. These are the people the agency is responsible protecting from corporate fraud and malfeasance. Instead of data, the retail market would need to judge performance on vibes. This would lead to higher volatility and unnecessary chaos. Respectfully, please keep the 10Q filings.

C. Lihosit - Head of Global Architecture

Chris Searcy — Jun 16, 2026

Subject: File No. S7-2026-15 From: Chris Searcy Please do not reduce reporting requirements for public companies. Investors need more information, not less.

Chris Smith — Jun 16, 2026
Subject: File No. S7-2026-15 From: Chris Smith To whom it may concern. As an individual investor I believe that companies should be more transparent about their operations and report more frequently. I believe allowing companies to report less only benefits the company and produces the opportunity for fraud. I have no concerns with people accumulating wealth by working for it.

Chris Snow — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Chris Snow Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission: To Whom It May Concern,
I am writing to express my strong support for maintaining robust, comprehensive quarterly disclosure requirements and to urge the Securities and Exchange Commission (SEC) not to reduce or eliminate these vital public reports.
As an individual market participant, quarterly disclosures (Forms 10-Q) are absolutely essential to my ability to make informed, data-driven investment decisions. Access to timely, accurate financial information allows me to evaluate corporate performance, assess shifting risks, and allocate my capital efficiently.
Reducing the frequency or depth of these disclosures would harm individual investors in several distinct ways:
Increases Information Asymmetry: Larger institutional investors often have direct access to corporate management and proprietary data feeds. Individual investors rely heavily on public SEC filings to level the playing field. Removing this information creates a dangerous gap between Wall Street and Main Street.
Hides Material Changes: In today's fast-moving economic environment, three months is a long time. A company’s financial health, debt levels, or operational risks can shift dramatically in a single quarter. Waiting six months or a year for comprehensive data would leave investors exposed to unmonitored risks.
Undermines Market Transparency: Transparency is the cornerstone of public market confidence. Any move to scale back vital public disclosures actively degrades the integrity and efficiency of our financial system.
The SEC's primary mission is to protect investors and maintain fair, orderly, and efficient markets. Taking vital information away from the public contradicts that mission. I urge the Commission to protect retail investors by preserving the current quarterly disclosure framework.
Thank you for your time and consideration of my comments.
Sincerely,
Chris Snow
Ardmore, Oklahoma

Chris Stortenbecker — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Chris Stortenbecker Affiliation: Jun. 16, 2026 Why would we change the rule after 50 years if not to disadvantage the public? What is the SEC for if not to protect the public?

Chris Sullivan — Jun 16, 2026
Subject: S7-2026-15 Comment From: Chris Sullivan Affiliation: Jun. 16, 2026 As a public company's controller, someone who has passed the CPA exams, and worked for 6+ years in public auditing, this proposed change is not only asinine but inconceivably dangerous/damaging to stake holders and the public trust. I remember an SEC that actually cared about investor protections and the public writ large and bowing to corporate pressures in this way would do more to erode trust and transparency than any other policy I have seen in the last 2 decades. Do better.

Christine Givens — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Christine Givens Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
My name is Christine Givens and I am a psychologist who works both at a college and has a private practice.
I have a retirement fund that I am building and, therefore, I STRONGLY recommend that quarterly reporting be maintained. First, I need the information for investing purposes. Flying blind for six months is NOT and option. Second, the cost of public filing is not prohibitive for companies. Finally, the UK and EU studied the move to semiannual reporting and found no meaningful improvement in long-term investment behavior. They did find more stock-price volatility and overreaction when reports finally arrived. Singapore tried it and is now reversing course because disclosure quality and trading volume both dropped. KEEP REPORTING QUARTERLY! Thank you.

Christine Herring — Jun 16, 2026

Christopher D. Lewis — Jun 16, 2026
Subject: S7-2026-15 Comment From: Christopher D. Lewis Affiliation: Jun. 16, 2026 Madams and Sirs:
Quarterly reporting is the only tool members of the general public possess to periodically approach in quality the information about publicly-traded firms that is routinely understood by those who are involved in transactions with publicly-traded firms (e.g., as employees or contractors of those firms). Without quarterly reporting, those with better access will have most of a year to leverage information that is not widely disseminated to the public. Moreover, by reducing the number of annual reporting events the SEC would allow firms to conceal from the public the seasonality of important lines of business, the impact of current events on the firm's performance, and transient cash flow troubles that may pose a significant signal of serious risk to the long-term prospects of a firm.
There is no benefit to the public of scrapping the quarterly reporting requirements with which competent managers have long demonstrated they are able to to comply. Only incompetent, corrupt, and deception-minded managers will benefit from rules changes that betray the purpose of the SEC by increasing the opacity of operations and performance of publicly-traded firms.

Most sincerely,

Christopher D. Lewis, J.D., M.P.H., M.B.A., M.Arch.

Christopher Hines Individual Investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: Christopher Hines Please, do NOT go away from 10Q filings. These provide valuable information to me and more importantly, assist with keeping executive leadership on task. Quarterly filings are not a material expense for a company and the return on the invested time is valuable to all parties. For that matter, I used to work in Financial Planning & Analysis and helped develop our 10Q. I want to know how my own employer is doing on a quarterly

basis. Do not change the cadence of public reporting!!

Christopher Hoffman — Jun 16, 2026
Subject: S7-2026-15 Comment From: Christopher Hoffman Affiliation: Jun. 16, 2026 I do not support this change to quarterly reporting. More transparency vs less is always a good thing. If implemented, this will change how I invest in companies. I will invest less and find other ways to invest my money.

Thank you.

Chris Hoffman
IT Systems Analyst

Christopher Lee Gmail. — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Christopher Lee Gmail. Affiliation: Jun. 16, 2026 My name is Christopher Lee, I work as an engineer for medical device companies in Saint Louis MO. I strongly oppose loosening the reporting frequency to just 2x per year. We need transparency for companies we invest in, and doubling the time between reporting instead of quarterly seems like a bad idea for investor data and transparency. It seems like this process was tried already in the 50s and it resulted in a loss in value for the stocks, and was reversed back to quarterly like it is now. Not sure what the benefits would be for 2x per year for investors. It seems like slightly less work for the corporations with a big downside for investors. Please don't implement this change.
-Chris

Christopher Maynard — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Christopher Maynard Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
As a suburban Ohio resident, I strongly oppose letting public companies switch to semiannual reporting. Fair markets require transparency and a level playing field.
A six-month gap is too long in today's economy. Regular citizens rely on timely, mandatory filings to monitor corporate performance and make informed decisions. Removing these safeguards creates an information vacuum that favors Wall Street insiders while leaving the public in the dark.
The SEC's mission is to protect investors. Please protect our right to know, maintain corporate accountability, and reject this proposal.
Regards,
Chris Maynard

Christopher Wilson — Jun 16, 2026
Subject: S7-2026-15 Comment From: Christopher Wilson Affiliation: Jun. 16, 2026 Chris Wilson, pastry chef. I’ve worked 60 hour weeks for 3 decades just to attempt to save, invest and prepare for retirement. Knowledge is key and with all the technology available reporting should be happening and available MORE OFTEN, not less. This is just another step to keep information and the access to financial growth away from the everyday citizens.

Sent from my iPhone

Christy Berry — Jun 16, 2026
Subject: S7-2026-15 Comment From: Christy Berry Affiliation: Jun. 16, 2026 The SEC's proposed change would create unnecessary barriers for ordinary investors, particularly public servants and educators who often rely on private investments to supplement modest salaries and retirement savings. Unlike large institutional investors, teachers, first responders, and government employees have limited opportunities to build wealth and often need flexibility when managing their investments. Reduce reporting time increases financial risk, and makes it more difficult for individuals to respond to changing personal or economic circumstances. This proposal would disproportionately affect smaller private investors while offering limited additional benefit to any except industry insiders who could easily utilize the decreased transparency to engage in nefarious action while everyday investors will have limited means to recognize or respond. The SEC has a responsibility to the American people, not just the American wealthy.

Best,

Christy Berry, MA

Subject: S7-2026-15 Comment From: Cindy Amos Affiliation: Jun. 16, 2026 Cynthia Amos, retired

Transparency is vital for those investing in and relying on the market for income. I agree with my Congressman,
Rep. Gregory Murphy, who has expressed opposition to the SEC's proposal for semiannual reporting.

Regulators should use the current policy to enforce compliance and protect fair markets. Investors rely on timely information to make informed decisions. Companies should support continuing quarterly reports to increase investor confidence.

Cindy Fish — Jun 16, 2026
Subject: S7-2026-15 Comment From: Cindy Fish Affiliation: Jun. 16, 2026 The quarterly reports should continue. I am invested in the stock market and in order to make informed decisions on what investments I make, I need the best information. If there is a 6 month lag, you are allowing businesses to keep their business information to themselves when they are on the stock market. This delay doesn't give the public the current information needed to make transactions that are in our best interest. No bank would loan money to anyone not knowing what funds without the most current financial information.
This would set them up to lose money because of financial soundness.
If they are allowed to do this, shares in businesses could be sold before the public is aware of the financial situations of businesses they may hold stock in.
This should not be allowed.

CJTurrubiate — Jun 16, 2026
Subject: S7-2026-15 Comment From: CJTurrubiate Affiliation: Jun. 16, 2026 The current amount of fail to delivers on trading data from market makers and stock brokers is a much higher priority issue that needs looking into. This change to semi annual reporting will only exacerbate the lack of focus and seemingly deliberate reporting failures already present. To the degree that they seem woefully intentional to obfuscate certain market dynamics from retail investors, and collusion on part of the SEC for continuing to allow the fail to deliver reporting data on short interest from hedge funds and market makers. They have the technology to do 0 sum instantaneous settlement, but not the technology to accurate and automatically report market data to SEC for accurate oversight to take place.

Signed,
Chris Turrubiate

Corneliuis Tillar — Jun 16, 2026
Subject: S7-2026-15 Comment From: Corneliuis Tillar Affiliation: Jun. 16, 2026 No. Stop this! The Blackout will be a tool used to extort hard working citizen.

Cory Levine — Jun 16, 2026
Subject: File No. S7-2026-15 From: Cory Levine I fundamentally disagree with changing publicly traded company’s financial reporting from four times a year to twice a year. A given company is still going to be setting goals and reporting on a quarterly basis if not more frequently internally. As an investor, I should have access to this information to be able to make decisions about if and how I will continue to support the publicly traded company.

Courtney Adkins The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Courtney Adkins Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. Less transparency for individual investors will not be beneficial. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it. WallStreetBets comment letter stated: "The companies we trade are not being held back from greatness by the obligation to file four reports a year. ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well."

cpmgrca — Jun 16, 2026
Subject: Comment on S7-2026-15 From: cpmgrca Affiliation: Jun. 16, 2026 I am Cynthia P Macdonald, a retired '34 Act Securities Attorney from Jacksonville, Florida . I am in favor of retaining the quarterly filings of Form 10Q by public companies. I reach this position based upon my career in financial regulation. My work in the securities industry began as a clerk for a small, closely held broker-dealer in the 1970s when I achieved Series 7 qualification and was given the responsibilities of trading, preparing and distributing confirmations and comparisons, preparing and maintaining position records, and settling the transactions. This was all done manually; we hadn't yet reached the age of personal computers. For a period of time I was also responsible for payroll and commissions, and maintaining the firm's books and records. In addition to the Series 7 I alsi successfully completed the Series 24, 27, and 65 examinations.For most of the 1980s I worked as a Field Supervisor for the NASD. In that capacity I was responsible for monitoring the financial compliance of assigned broker-dealers, and for conducting unannounced visits to broker-dealers. I prepared written reports of the visits which reports were presented to the NASD's District Business Conduct Committee for review and disposition, including, as necessary, enforcement action. After attending law school at night and being sworn in to the Massachusetts Bar I took on the role of

Regulatory Affairs Compliance Officer for a broker-dealer subsidiary of an insurance company, after which I went on to work as an Enforcement Attorney and Chief Licensing and Registration Attorney for the Commonwealth of Massachusetts, and was an active member of a NASAA committee. I moved on ti become the General Counsel for a NYSE member firm. My next position was Founding VP, Chief Compliance Officer and General Counsel to a broker-dealer/investment adviser subsidiary of a global Fortune 100 firm. I share this information with you to demonstrate that I am familiar with the work that goes into financial reporting, as well as the importance of disclosing to shareholders, brokers and advisers information salient to the financial, legal, administrative health of public corporations. Is quarterly reporting overly burdensome? I say no, because a large portion of what's required to be reported is produced and maintained through automation. Each quarterly report builds upon the information previously reported. For that reason I submit that quarterly reporting is less burdensome than semi-annual reporting. Finally, why in earth would we return to a reporting schedule that was determined in the past to be insufficient to protect the the financial markets and the investing public?
Thank you for the opportunity to express my concern.

Craig Chesser — Jun 16, 2026
Subject: S7-2026-15 Comment From: Craig Chesser Affiliation: Jun. 16, 2026 I am a former VP Finance with shared responsibility for QUARTERLY reporting. Doing this kept companies on their toes, and kept investors adequately informed. Going to semi-annual reporting deprives investors investors of the right to get TIMELY reporting they have always had the RIGHT to expect and gives companies is more time to HIDE PROBLEMS. It will be VERY BAD for investor confidence.

I do NOT agree with changing quarterly reporting to semi annual. History has shown that this harms shareholders' returns. Please do not make this change. Thank you. Cynthia Hemminger.

Cyndy Hemminger

Cynthia Cuellar — Jun 16, 2026
Subject: S7-2026-15 Comment From: Cynthia Cuellar Affiliation: Jun. 16, 2026 The proposal to let companies report financial results only twice a year instead of four creates a dangerous six-month "blind spot" where executives could hide bad news like lawsuits or debts and quietly sell their shares before investors find out. This longer gap also gives scammers more time to hide fraud, since quarterly reports usually force scandals to surface faster. Even though the rule is technically "optional," big companies will likely adopt it to cut costs, forcing smaller ones to follow suit until everyone reports less often, effectively making the lower standard the new normal. Ultimately, the small amount of money companies would save on paperwork isn't worth the high risk that your retirement savings or college funds could get wiped out by surprise scandals hidden in those long reporting gaps.

d H — Jun 16, 2026
Subject: S7-2026-15 Comment From: d H Affiliation: Jun. 16, 2026 David Horan, small business owner.
I can't help but think the change to six month reporting has a nefarious intent. In some instances, quarterly reporting isn't even frequent enough. This just gives insiders an even bigger advantage over the average investors. Investments are not donations, so investors have a right to know how and what the companies they've put money into are doing, and companies should have an obligation to report in a timely manner. Six months is not timely. Would anyone want an Oncologist to hold test results for six months? I don't think so. Sometimes the need to make decisions is urgent, the same thing applies to investments and you can't make informed decisions without information. A lot can happen in six months.

Dan Archey — Jun 16, 2026
Subject: S7-2026-15 Comment From: Dan Archey Affiliation: Jun. 16, 2026 The UK and EU studied the move to semiannual reporting and found no meaningful improvement in long-term investment behavior. They did find more stock-price volatility and overreaction when reports finally arrived. Singapore tried it and is now reversing course because disclosure quality and trading volume both dropped. "Short-termism" is really about how CEOs are paid and how boards measure success, not how often companies file paperwork. Hiding the data doesn't fix the underlying problem; it just hides

the consequences.

The SEC keeps citing the "global standard," but that standard isn't doing well in the places it was tried. The EU's lighter regime is where Wirecard's €1.9 billion fraud hid in plain sight for years before the company collapsed in 2020. The UK's 2014 shift stripped analyst coverage from mid-cap stocks, and London has been bleeding IPOs ever since. Singapore moved to semiannual reporting in 2020 and is now reconsidering, because trading volumes fell and disclosure quality dropped. The "global standard" the SEC is invoking isn't standard, isn't working, and is being walked back where it was tried.

Subject: S7-2026-15 From: Dana A. Affiliation: Jun. 16, 2026 Keep CEOs honest -- require quarterly reporting!!!

Dana Barooshian Accounting and Certified Fraud Examiner — Jun 16, 2026
Subject: File No. S7-2026-15 From: Dana Barooshian I am an individual investor, as well as a professional auditor and Certified Fraud Examiner skilled in reading financial statements and disclosures. I strongly oppose moving from quarterly to semi-annual reporting. It is very important to require companies to close their books quarterly, have the CEO and CFO certify with their signature, and publish the reports. In my personal investing, I rely heavily on quarter-by-quarter earnings trends to seek companies with consistent, durable earnings growth. If you implement this rule, I would immediately sell all my small- and mid-cap stocks, as they are most susceptible to undisclosed deviations from expectations, which can pummel market value. The current system works fine. Keep it in place.

Dana Crandall — Jun 16, 2026

Dana Ward — Jun 16, 2026
Subject: S7-2026-15 From: Dana Ward Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

I am writing to request that the SEC keep in place the protections afforded with the quarterly reporting. The company that prompted the rule change, Enron, filed the largest bankruptcy in United States history. They hid their true financial position.

CEOs are on notice if they sign the SEC quarterly filings knowing the financials being reported are a lie, they will exchange their mansion for a prison cell. The SEC proposal will further open up the potential for another Enron to happen.

The media needs to dig deep to determine who the person is at the SEC who came up with this proposal, and if it did not originate with an employee of the SEC, where did the directive come from?

Respectfully submitted by,

Dana Ward

Danielle Kniedler — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Danielle Kniedler Affiliation: Jun. 16, 2026 Danielle Kniedler
Self-employed in Washington, DC

Quarterly reporting provides important information for investors to make decisions. It is the SEC's responsibility to protect consumers and to uphold trade regulations for securities. The proposed change would reduce visibility of publicly-traded companies' financial health, which would be negative for investors and for the whole system. Insider trading already happens, and the proposed change takes us further in that direction. It is the SEC's responsibility to enhance transparency in the system, not to obscure it. Use your power to protect the American people, not to make it easier for the companies and institutions that you regulate to profit from the information imbalance.
Thank you.

Danielle Knoeppel [Audiology Department] — Jun 16, 2026
Subject: S7-2026-15 From: Danielle Knoeppel [Audiology Department] Affiliation: Jun. 16, 2026 To Whom It May Concern,

Changing the SEC's requirement of filing necessary forms four times a year to keep corporations honest is something I perceive as a failure of government. Rolling back accountability weakens consumer protections and encourages large corporations to slide. Many corporations do not want more exposure they want less, less oversight and fewer inquiries into their business dealings. They operate as entities that are beholden to their share holders, not to the general good. Please reconsider this plan and continue to hold their collective feet to the fire. Thank you. Danielle Knoeppel, public servant, Las Vegas, NV

Subject: S7-2026-15 From: Darlene Woodworth Affiliation: Jun. 16, 2026 You must hold CEOs responsible for telling the Truth.. there is no lack of Dishonesty already when it comes to the BIGWIG'S! So someone should be holding them to a Higher Standard.

Darryl Black — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Darryl Black Affiliation: Jun. 16, 2026 My name is Darryl Black. I am retired, and live in the village of Upper Nyack, Rockland County, New York. I am dependent on my retirement income to be able to enjoy a rather modest retirement. If the elimination of quarterly reporting were to occur, it appears I would lose roughly 40% of my savings. At this level, I would certainly run out of money well before my death based on my current life expectancy. A theme that has run through the actions of the Trump administration has been to eliminate transparency in all respects. I believe this is because Trump and his associates, including numerous members of Congress, don’t want the public to know about the rampant corruption involving insider trading. This appears to be the sole reason for the desire to reduce reporting from quarterly, to semi annually. I am vehemently opposed to such a change and I am relying on the powers that be to block this change or any change involving frequent and accurate reporting. Thank you.

Dave Prakash — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Dave Prakash Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
While I can appreciate the burden of quarterly reporting and how it affects corporate behavior, I believe this change is going to primarily serve those who wish to deceive retail investors and support insider trading. My confidence in the stock market continues to go down and so I am already shifting to alternative investments.
There's already very little integrity left in the public markets, especially after the recent changes at NASDAQ and S&P regarding passive funds which serve Elon Musk and SpaceX. They are forcing a wealth transfer from retail investors to an unprofitable company in a pump and dump scheme.
If this change to quarterly disclosures goes forward, I will continue to limit my exposure to the public markets. Buying stocks is becoming like buying OTC medications prior to FDA regulations when "medicines" contained arsenic, strychnine and heroine. You are probably ingesting poison but don't know it.
Respectfully,
Dave Prakash

Dave Stewart individual investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: Dave Stewart A CFA Institute Research & Policy Center study examined the U.K.'s decade-long experiment with mandatory quarterly reporting, required starting in

2007 and then dropped in 2014. Researchers tracked company investment levels – capital expenditures, R&D spending, property and equipment – before and after each regulatory change. What they found was that reporting frequency had no material impact on corporate investment behavior. Companies that stopped reporting quarterly results didn't invest more in the long term. Companies that started reporting quarterly results didn't invest less. What quarterly reporting did affect was the quality of information available to individual investors, including more analyst coverage, more accurate earnings forecasts, and a richer information environment for everyone trying to evaluate a business.

Dave Triolo — Jun 16, 2026

David Hein Retired — Jun 16, 2026
Subject: File No. S7-2026-15 From: David Hein Reducing the financial reporting frequency to

semiannually is a bad idea. It reduces the ability of individual investors to understand the financial health and performance of public corporations. It is obvious and completely foreseeable that companies with problems to hide will choose the less frequent reporting period. Furthermore, it also creates more pressure for insider information to be obtained and leveraged, disadvantaging individual investors. Speaking also as a former employee of a public company, who was only permitted to trade my employer's stock during a few weeks each quarter (to avoid insider trading risks), implementing semi-annual reporting would mean fewer opportunities to trade (just 2 times a year instead of 4 times a year). Bottom line, this feels like a back door way to allow fraud and financial abuse. Quarterly reporting does not seem to be holding back any company from operating well. Allowing semi-annual reporting will only reduce insight into the operation of public companies; it will make it harder for individual investors make well-informed decisions, leading to a less liquid market. It ain't broke; so don't "fix" it.

David Kulina — Jun 16, 2026
Subject: S7-2026-15 From: David Kulina Affiliation: Jun. 16, 2026 David Kulina, Registered Architect in PA: The job of government in our capitalist system is to provide the guardrails to ensure that the system stays on track. Doubling the time between reports will leave significant time gaps in which companies may go "off course" and then try to recover. The problem is that many will now have the opportunity to go so far off course; often taking chances against the odds in hopes of striking big, but leaving investors with depreciated assets when those long shots fail. Keeping the current system and time frame is crucial to avoid catastrophic failures

taxes quarterly there is no reason a publicly traded company shouldn't have to report on their earnings quarterly. Don't fix what isn't broken. - Dave Moody, Fuquay Varina NC.

Get Outlook for Android

David Nelson — Jun 16, 2026
Subject: File No. S7-2026-15 From: David Nelson I see no reason to change reporting requirements. The old saying "If it is not broke, don't fix it" certainly comes into play on this issue. What could possibly be wrong with quarterly financial reporting? It helps keep individual investors aware of what is happening with their investments somewhat contemporaneously. Waiting six months to get an update on operating results simply is too long. It would deprive investors of much needed insight into what is happening inside the companies they own.

David Nix Jr — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Nix Jr Affiliation: Jun. 16, 2026 This proposal does the opposite of what's needed! My suggestions to be taken as a starting point and any form of improvement added to it, as long as my ideas remain the building blocks and any such credit is given to me for these ideas. When it comes to business accounting, there needs to be more transparency, not less. I believe there should be mandatory transparency requirements in the form of reports, punishable by a minimum 5 year prison term for anyone convicted of lying/false reporting on such reports and a minimum 10 year prison term for anyone convicted of financial crimes tied to a publicly traded company and a fine equal to any amount the company is defrauded out of and paid both to the government to recover the costs of the trial, and to the company to help recover the amount of lost revenue and interest on such total, until such companyismade whole. This would stop approximately 98-99 percent of financial crimes due to more transparency requirements, and less ability for people to hide financial crimes due to the increased oversight and transparency. I believe this should apply to all publicly traded companies and left up to the individual company in the private sector.
Sincerely,
David Nix Jr
Marietta, GA

David O'Hern — Jun 16, 2026
Subject: File No. S7-2026-15 From: David O'Hern I am against this proposal to allow companies to file reports twice a year instead of four times a year. I understand the idea behind it, to encourage companies to focus more on the long-term rather than the short-term. However, research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. Instead, semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. So, the SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. Thus, I urge you to reject this proposal and maintain the requirement that companies file quarterly reports.

David Osborne — Jun 16, 2026
Subject: Comment on S7-2026-15 From: David Osborne Affiliation: Jun. 16, 2026 Major mistake, what’s the point in taking vital information and transparency away.

David Owens — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Owens Affiliation: Jun. 16, 2026 Do not allow companies to hide their reports from retirement investors like myself. Keep them honest. That's your job.

Dave Owens, Maintenance Technician.

David Perka — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Perka Affiliation: Jun. 16, 2026 Keep the rule as it is.

David Perkins — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Perkins Affiliation: Jun. 16, 2026 KEEP QUARTERLY REPORTING. Any extension in time only allows for misdeeds and bad reports to be hidden longer as well as allowing insider trading to go undetected giving traders more time to profit then divest without detection.

David Plummer None — Jun 16, 2026
Subject: File No. S7-2026-15 From: David Plummer I am opposed to a change from quarterly reporting to semi-annual reporting. My reason for my opposition is that, as an individual, I rely on more frequent corporate performance information to make investment decisions. Being able to make a buy decision earlier improves my ability to increase my earnings, and ultimately the tax I pay, which is good for both me and the government. Additionally, being able to make a decision to sell earlier provides me with the opportunity to reduce a potential loss.

David Ray — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Ray Affiliation: Jun. 16, 2026 quarterly is the only ethical way to do business.

David Reese — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Reese Affiliation: Jun. 16, 2026 6 months is too long it gives more time to commit fraud or embezzlement, etc. Keep the quarterly reports, that should be the maximum time allowed.

Sent from my iPhone

David S. Filippi, MD — Jun 16, 2026
Subject: File No. S7-2026-15 From: David S. Filippi, MD I invest in publically traded companies and read the 10-Q's religiously. The regulated, generally accepted and audited format, available 4 times per year, is what makes my investing possible. I don't feel I'm risking my investment on unknowns; I have timely, reliable data that I can use to make investing decisions. If companies are permitted to omit 2 reports a year, a great deal could be buried under averages and there might be a 6 month window in which there is no visibility into the company's current state - which is the most important state. Please don't put this proposal into effect.

David Schulzinger — Jun 16, 2026
Subject: S7-2026-15 Comment From: David Schulzinger Affiliation: Jun. 16, 2026 I am writing as an individual investor to express my opposition to the proposed rule S7-2026-15.

As a retail investor, I rely heavily on periodic corporate disclosures to make informed decisions about where to invest my savings. Quarterly reporting is one of the few tools available to ordinary investors that helps reduce the information gap between corporate insiders and the public. Reducing the frequency of required reporting would increase that gap and make markets less fair.

Corporate executives, directors, and large institutional investors often have access to information and resources that individual investors do not. Lengthening the time between required disclosures would provide more opportunity for insiders to understand and react to material developments before the public has access to the same information. While insider trading laws exist, timely public disclosure remains one of the most effective ways to promote market transparency and investor confidence. If anything, disclosure timing should be narrowed.

I am also not persuaded by arguments that companies should simply be allowed to opt into more frequent reporting. Investors are often most in need of timely information from companies experiencing operational challenges, financial stress, rapid growth, or significant strategic changes. Allowing less frequent reporting creates incentives for some issuers to provide less information precisely when investors would benefit most from additional transparency.

The potential compliance savings cited in support of this proposal do not outweigh the costs imposed on investors. Public markets function best when all participants have equal access to current, reliable information. Any reduction in reporting frequency may save some companies administrative expense, but it does so by transferring risk and uncertainty to shareholders.

Many Americans already see the evidence that markets are tilted in favor of insiders and well-connected individuals and politicians. Public concern regarding suspiciously timed trading activity by elected officials and other individuals with privileged access to information has only reinforced this perception. At a time when investor confidence would benefit from stronger transparency and a more level playing field, the Commission should be focused on expanding access to information rather than reducing it.

For these reasons, I respectfully urge the Commission to reject proposed rule S7-2026-15 and preserve quarterly reporting requirements for public companies.

Thank you for considering my comments.

Sincerely,

David Schulzinger

Subject: S7-2026-15 Comment From: Dean Affiliation: Jun. 16, 2026 Corporations must be held accountable
They are allowed to screw there employees, now they want to screw the investors also. I SAY NO

Dean Barsaleau — Jun 16, 2026
Subject: File No. S7-2026-15 From: Dean Barsaleau Quarterly reporting protects individual investors. The short-termism diagnosis doesn't justify this remedy. The companies most likely to opt out are the ones where oversight matters most.

Dean Philbrick — Jun 16, 2026
Subject: File No. S7-2026-15 From: Dean Philbrick The proposal relies on the theory that quarterly reporting results in short-termism by corporate managers. Research by the CFA Institute studying this same maneuver in the U.K. market found that reporting frequency has no measurable impact on corporate investment behavior. The companies that opt-out are the ones where oversight matters most. Smaller, less-followed businesses will operate with less scrutiny. Reducing reporting requirements for such companies makes them harder to monitor, not easier to own. Quarterly reporting protects small investors. Semi-annual reporting will double the information gap between ordinary shareholders and insiders. Such a gap is where volatility, uncertainty, and mistrust grow. Reg FD moved toward leveling the playing field. This proposal does the opposite.

Deana Patrick Retired, engineer — Jun 16, 2026
Subject: File No. S7-2026-15 From: Deana Patrick Quarterly reporting is the cornerstone to supporting our retirement community. While long term stability is the goal, timely visibility is key to achieving that goal. Times of high inflation, like these, significantly impact a company solvency. It is critical to make timely decision on such companies. Not to mention, that their taxes support the government infrastructure. Delayed reporting could cause a loss of tax revenue as companies delay payment and disappear before review and reporting

Debbie Hanson — Jun 16, 2026
Subject: S7-2026-15 Comment From: Debbie Hanson Affiliation: Jun. 16, 2026 I am near retirement, and under the current administration, I'm not looking forward to that with anticipation so much as with fear. Stop acting as if the only people in this country whose financial situation matters are millionaires, billionaires, and now, yes, even trillionaires. Those of us who've saved what we could from our normal salaries for our futures deserve more representatiion and reasssurance than they do. Do not give them more opportunties to make their fortunes on our backs. Hold them more accountable, not less accountable. Do not allow them to report their actions less often than they already do.

Dr. Debbie A. Hanson

Debbie McDowell-Tate — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Debbie McDowell-Tate Affiliation: Jun. 16, 2026 As a semi retired person living in Foley, Alabama the strength and transparency of my investments is paramount to my financial security both today and into the future. History has shown that less frequent reporting has lead to weaker returns and a woeful lack of transparency. Based on past performance during periods of semi annual reporting, my family would lose 38% of our retirement savings jeopardizing our financial security and increasing our need to rely on government programs. We have worked hard for decades while scrimping and saving to ensure retirement and this one act could wipe most of our efforts away.

Transparency through quarterly reporting makes for stronger returns and accomplishment of business goals. As a former CEO, our goals were reported on weekly internally and monthly to our stake holders. This process kept us accountable and on track to success. It seems that the corporations would want the same for their business success. In fact, it was the wise corporate leaders who went to quarterly reporting. Let us honor their wisdom and continue with quarterly reporting as it increases their success.

It enhances investor decision-making, increases market efficiency, and lowers the cost of capital. COMMITTEE ON CAPITAL MARKETS REGULATION · INDEPENDENT RESEARCH GROUP URGING THE SEC TO KEEP QUARTERLY REPORTING, 2026

Respectfully,

Debbie Michel

Debra Driskill

Debra Hutchins — Jun 16, 2026
Subject: S7-2026-15 Comment From: Debra Hutchins Affiliation: Jun. 16, 2026 This would give companies more time for fraud to grow.

Debra Kelly — Jun 16, 2026
Subject: S7-2026-15 Comment From: Debra Kelly Affiliation: Jun. 16, 2026 ENRON was a disaster

that should never have an opportunity to be repeated. Quarterly reporting is a minimal requirement and must be kept in place.

In addition to quarterly reporting, why can “insiders” not be blocked from trades until after quarterly reporting is public information. Give them a brief 30-day window to make trades, but, only after quarterly reporting is public. Never, never should those with insider information be allowed to trade on their information.

Personally, I don’t believe anyone on a board, or employed at the highest levels of a company that is publicly traded should be allowed to own more than 1000 shares of the company for which they have a fiduciary interest.

Sent from my iPhone

Debra Kirk — Jun 16, 2026
Subject: S7-2026-15 From: Debra Kirk Affiliation: Jun. 16, 2026 Do not change the rules on CEO quarterly reporting. Before the rule, there was rampant fraud and other illegal doings. The longer it is between reports, the more chances they have to commit crimes and cover them up. This is completely unacceptable.
I am retired and living in Houston. The Enron debacle put a major dent in the entire city’s economy and it took quite a while for the job market to recuperate. Please do not make it easy for them to do it again.
I am sick to death of CEOs getting away with all kinds of illegal activities at the expense of their employees. It is inexcusable to allow it to continue. Please do not change the rule in any way unless you make it stronger, not weaker.
And while you are at it, make some rules prohibiting hedge funds from buying up houses in America’sneighborhoods and making them unaffordable for Americans to live in. It is a major driver of the housing crisis in America. Stop making it easier for rich people to cheat the rest of America out of what little we have.

debsvd — Jun 16, 2026
Subject: Comment on S7-2026-15 From: debsvd Affiliation: Jun. 16, 2026 NO, NEVER RETURN TO BI-ANNUAL REPORTING! World economies change very quickly and in order to respond intelligently to all these changes, investors need to have AT LEAST quarterly information from our brokerages! This also keeps businesses accountable and helps the issue of hidden transactions. The history of 6-Month reporting shows us that stock prices go down and investors lose up to a third of their investments! Please help keep the market honest and thriving by keeping quarterlies necessary!
Deborah Van Drunen
Retired but keeping up our home and property!
Crete, IL.
THIS matters to me and my husband because, at 75, we no longer have TIME to make up huge losses prior to possibly needing our invested money. We are, as many our age are, facing possibly needing outside care for medical or physical disability issues. This could be someone coming in the home to help, nursing home care, rehab care, and long-term nursing care. All types of care are EXTREMELY EXPENSIVE, and we have saved & invested to be able to provide this care for ourselves! Should we lose a substantial portion of our investments, that burden would be shifted to our children, IF they were able to help, or to public aid. Our CHOICE is to provide for ourselves, and that is increasingly difficult with inflation, loss of our home value in Illinois due to high property taxes, and the high taxes we pay for all things in Illinois! We do most of the work here ourselves, drive 2010 vehicles, and live an average lifestyle in order to preserve our money. PLEASE help us stay on a self-sufficient path by requiring businesses to report their activities in a QUARTERLY BASIS to minimize fraud and keep the stock market from declining! We need a government agency ON OUR SIDE instead of working against us!!
Thank you for taking time to read about our situation!!

Denny Brewton — Jun 16, 2026
Subject: S7-2026-15 Comment From: Denny Brewton Affiliation: Jun. 16, 2026 Dear Sirs and Madams:
Lengthening the reporting period defeats the purpose of the SEC in monitoring businesses in a timely and preventative manner. Americans deserves financial transparency in the businesses that impact their daily lives. We're sick of fraud and the attempts to cover it up.

Denise L. Brewton
10302 Etheridge Road
Pensacola, Florida 32507

Derek Fisher — Jun 16, 2026
Subject: File No. S7-2026-15 From: Derek Fisher I write to respectfully urge the Commission to reconsider its proposal to reduce the frequency of mandatory periodic reporting. The proposal rests on a theory that, however intuitive, does not survive contact with the available evidence: that quarterly reporting drives short-term thinking among corporate managers, and that lengthening the reporting interval would therefore encourage longer-term investment. The real-world record points the other way. The most directly relevant evidence comes from the United Kingdom, which ran a natural experiment on precisely this question. The U.K. mandated quarterly reporting beginning in 2007 and then dropped that requirement in 2014. A study published by the CFA Institute Research and Policy Center examined corporate behavior across both transitions, tracking capital expenditures, research and development spending, and investment in property and equipment before and after each regulatory change. The finding was clear: reporting frequency had no material effect on how much companies invested. Firms that stopped reporting quarterly did not begin investing more for the long term, and firms that started reporting quarterly did not invest less. What reporting frequency did affect was the quality of information available to ordinary investors. More frequent reporting was associated with greater analyst coverage, more accurate earnings forecasts, and a richer overall information environment for anyone trying to evaluate a business. In other words, the data suggest that less frequent reporting imposes a real cost on the information available to the market while delivering none of the intended benefit. The authors of that study did not mince

words about the policy implication. If the goal is to encourage companies to think longer-term, reporting cadence is the wrong lever to pull. The actual drivers of corporate short-termism lie elsewhere: in executive compensation structures, in incentive misalignment throughout the investment chain, and in governance failures. None of these is addressed by cutting the frequency of public disclosure. As Professor Shivaram Rajgopal of Columbia Business School, a co-author of the study, put it in a recent interview, the proposal is a solution in search of a problem; managerial myopia measured over three months will simply become myopia measured over six. The Commission would accept the cost of the change without securing the benefit it seeks. There is a further consideration that deserves the Commission's particular attention: the effect on retail investors. The theory animating this proposal concerns the incentives of corporate management, but its consequences fall hardest on individual investors, and in a direction opposite to what the theory would suggest. Quarterly reports are among the most important leveling mechanisms between retail and institutional investors in U.S. equity markets. Institutional investors have access to expert networks, channel checks, alternative data sets, credit-card spending panels, and direct access to management through conferences and private meetings, resources far beyond the reach of an ordinary investor. What the retail investor has is the quarterly filing. Reducing the frequency of that filing widens, rather than narrows, the information gap that already disadvantages individuals. For these reasons, I respectfully request that the Commission reconsider the proposed reduction in reporting frequency. If the Commission's concern is genuinely with corporate short-termism, I would encourage it to direct its attention to the incentive and governance structures that the evidence identifies as the actual causes, rather than to a disclosure requirement that protects investors without measurably harming long-term investment.

dianna darner — Jun 16, 2026
Subject: Comment on S7-2026-15 From: dianna darner Affiliation: Jun. 16, 2026 Transparency is the key to good government, it provides accountability to the people.

James Madison stated that the government without public information and in this case transparency is the “prelude to a farce or tragedy”, every cent that I have invested I have earned. I have contributed money to Social Security and Medicaid Medicare through my taxes. I’m not only deserve I demand that companies be made to provide the unvarnished truth of their financial health. While there’s no guarantee that Investments will provide a positive rate of return, party spend time doing my due diligence to research and invest in companies based on their reporting data. If that data is delayed, then my financial stability is put at risk because I cannot make decisions on my positions in a timely manner. This rule change could also lead to increased lawsuits costing taxpayers millions.

Don Young — Jun 16, 2026
Subject: S7-2026-15 Comment From: Don Young Affiliation: Jun. 16, 2026 Quarterly earnings reporting should remain in place for mid cap companies and larger. The usefulness and transparency to investors and analyst is too important to compromise for corporate greed to make a few more dollars by eliminating the reports. Revealing who made such a request and why would be telling. I would bet it was not from investors or industry analysts and watch dogs. The most likely source is corporate accountants and CEO’s. It is bad enough that private equity groups corner most of the growth opportunities with no reporting at all. Why let the insiders be the only ones with data on

publicly trade companies? If the companies want public capital they owe the public regular accurate reporting other wise the knowledge paradigm is shifted towards the corporations and less fair to investors as the provider of the capital the corporations covet. If they don't want to report they can stay private and generate their own capital from profits and borrowing from banks and insurance companies.
Pink sheet and small cap. could have the option of semiannual or quarterly. Of course more Quarterly data would add to their credibility or they could save by generating semi annual data.

Earl Marsh — Jun 16, 2026
Subject: S7-2026-15 Comment From: Earl Marsh Affiliation: Jun. 16, 2026 Transparency and recent, accurate information are required to keep faith in what corporations are telling us. When organizations whose stated purpose is to generate profits for their investors want to double the time between providing data about their financial health, it erodes the trust needed to invest with confidence. I DO NOT support changing the quarterly reporting schedule to semi-annual and respectfully ask that this proposed change NOT be implemented.

Earl Niehoff — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Earl Niehoff Affiliation: Jun. 16, 2026 We need transparency in financials leave the quarterly report alone

EC Rossman — Jun 16, 2026
Subject: S7-2026-15 Comment From: EC Rossman Affiliation: Jun. 16, 2026 In the retirement planning sphere, we build everything on having accurate, timely information. Cutting public earnings reports from quarterly to every six months doesn't make things simpler for everyday investors, it just means the big institutional players stay informed while regular people saving for retirement are left in the dark longer. When someone is counting on their portfolio to carry them through retirement, a six-month information gap isn't a minor policy tweak. It's a real risk that nobody signed up for.

Edith Reichert — Jun 16, 2026
Subject: S7-2026-15 Comment From: Edith Reichert Affiliation: Jun. 16, 2026 If a bill is passed allowing corporate Am to report bi-annually, then the bill should include American citizens only

reporting their earnings every 20 years.

If you are not going to allow the American citizen to report their earnings every 20 years, corporate America can't be permitted to report it's earnings bi-annually.

Corporate America is considered Public companies while American citizens are Private. Last I looked these words up in the dictionary, their meanings didn't change.

Do Not allow or encourage a bill such as this to go into effect!

Edmund Manger — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Edmund Manger Affiliation: Jun. 16, 2026 I have recently retired. My retirement fund can only grow if the market grows. This is a dangerous time for me if reporting frequen y changes. I am a New jJersey resident.

Eduardo Acosta — Jun 16, 2026
Subject: File No. S7-2026-15 From: Eduardo Acosta There is no way that less frequent information for investors is good for them or the economy in general. I completely disagree with this idea of doing less frequent reporting. It clearly benefits corporations rather than investors particularly retail investors. We should keep reporting as is today. The role of government is primarily for the people not corporations. Less frequent reporting help corporations reduce their costs, reduce scrutiny and potentially do all kinds of financial maneuvers and only report on those well after the fact. None of that is good for individual investors. Current reporting requirements help the people make better decisions and track the progress of a corporation and make investment decisions with readily available public information. The rich and powerful will always have all kinds of ways of getting information on a company through non public means. But the quarterly reporting allows individuals and simple investors understand what is happening with a company without expensive access to information. Keep the reporting requirements as is !

Edward Ames — Jun 16, 2026

Ellen McCrea — Jun 16, 2026
Subject: S7-2026-15 From: Ellen McCrea Affiliation: Jun. 16, 2026 This Administration seems determined to remove every protection and benefit for regular working Americans and retirees while giving big corporations cover and increased freedom to cheat the consumers. There is no benefit to this change for the middle class of the US and we will remember who allowed this to happen when

we go to the polls. This is a blatant attempt to hide theft and mismangement. Those who worked hard, saved, invested and now depend on those funds to live, deserve better. There was a reason the current system was put in place and there is no reason, in this current climate of government theft, grift, and policies favoring big corporations, that this will benefit the working middle class and retirees. If the members of the SEC proceed with this, they are securing their infamous place in history as being complicit with the most corrupt presidency the US has ever had. Find some courage, be a hero instead of a scared collaborator and act in the best interest of the majority of US consumers. Give your descendants something to be proud of.

Families struggle just to make ends meet as it is. Putting your collective thumbs on the scale hurts them even more.
A cursory glance at our economic data since the 70s makes it obvious the trickle down economics just doesn't trickle down. Giving corporations more power over people is not what this country used to stand for. They should at least be honest about their earnings. If they have to hide it, that is a sure sign that "something is rotten in the state" of America.
We will be watching. They may have more money to read the system, but at least for now, we have the power of the vote. Granted that power is at risk right now because of your collective thumbs but at this point, we still have it.

Ellen Sameth — Jun 16, 2026

Subject: File No. S7-2026-15 From: Ellen Sameth Why are you even considering doing away with four reports/year? Do you not believe that investors, who own the company, are entitled to quarterly reports so that they can see what's going on with their company? I do. I find it very offensive that you want to create more opacity instead of transparency. What is your point/justification for this? I believe that cutting down the reporting requirements is in violation of 17 CFR Part 243, that looks to increase transparency not decrease it, which is what the SEC is trying to do. Please don't. Thank you, Ellen Sameth, Individual Investor

Ellen Weaver — Jun 16, 2026
Subject: S7-2026-15 From: Ellen Weaver Affiliation: Jun. 16, 2026 Dear Secretary,
The significant events that led up to the creation of quarterly reporting were catastrophic. Having quarterly reporting creates frequent accountability. Four times a year has been effective. Cutting back to two times a year places communities and environments at risk. Testing whether two times a year is as effective as four is comparable to spinning a roulette where. That risk is not something that should be measured against financial savings to companies but against safety to our environment and communities. I do not support changing this law or taking that risk.
Sincerely,
Ellen Thornam Weaver, MSN, RN, CRRN

Emelia — Jun 16, 2026
Subject: S7-2026-15 Comment From: Emelia Affiliation: Jun. 16, 2026 I know the government doesn't really care about the concerns of regular citizens in these matters, only corporations, but having to wait 6 months to find out the health of an investment as a stockholders is unacceptable.

Emily Arbogast — Jun 16, 2026
Subject: S7-2026-15 Comment From: Emily Arbogast Affiliation: Jun. 16, 2026 My name is Emily Arbogast, and I am a Development Associate based in Columbus, Ohio.

I strongly oppose any rule that would allow publicly traded companies to reduce the frequency of their financial disclosures from quarterly to semiannual reporting.

First, six months is a long time for investors to go without meaningful updates. In that period, companies can experience failed product launches, mounting debt, major litigation, or significant customer losses. Current quarterly reporting requirements help ensure that investors receive timely information. Reducing that transparency would leave ordinary investors operating with outdated information while insiders may have a clearer picture of a company's true condition.

Second, history shows that financial misconduct thrives in environments with limited transparency. Major accounting scandals such as Enron and WorldCom were enabled by delayed or obscured disclosures. While quarterly reporting cannot eliminate fraud, it helps shorten the period during which problems can remain hidden from investors and regulators.

Third, the claim that semiannual reporting would be merely "optional" is misleading. Once large companies begin reporting less frequently, competitive pressures may encourage others to do the same. Over time, investor expectations adjust, and what begins as a voluntary option can quickly become the market standard, reducing transparency across the board.

Finally, the benefits of this proposal appear minimal compared to its costs. Companies must still maintain financial records, manage internal reporting, and provide oversight to boards and executives. Any savings from fewer public filings are likely to be modest and accrue primarily to corporations, while the costs of reduced transparency are borne by ordinary investors whose retirement accounts, college savings plans, and mutual funds depend on accurate and timely information.

For these reasons, I urge regulators to preserve quarterly reporting requirements and maintain strong transparency standards that protect investors and promote confidence in our financial markets.

Thank you for considering my comment.

This is a corporate fraud gambit. It must not be allowed to happen.

Erik Newton — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Erik Newton Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission: investing and the stock market is already bias towards those in power and the 1%. The changes in transparency would only widen the wealth gap in this country and hurt our economy in the long run. The confidence in investing the common citizen has now would become even lower. Please require quarterly reporting to continue.

Erika S — Jun 16, 2026
Subject: S7-2026-15 Comment From: Erika S Affiliation: Jun. 16, 2026 Erika. Former Big 4 Senior Auditor, current Senior Accounting Consultant. This would be an incredibly poor decision.

Companies would significantly struggle to produce correct support for audits over a 6 month period, considering they can hardly do it for the current 3 month reporting period. This would significantly limit investor information and will be misleading to the general public. Implementing this will hurt Americans, except for the wealthy business owners who always benefit!!!

Erin Fleishman — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Erin Fleishman Affiliation: Jun. 16, 2026 I am writing to express my strong support for maintaining quarterly reporting requirements rather than extending to biannual reporting periods.

Investor Protection

Quarterly reports provide timely, material information necessary for informed investment decisions. Longer reporting gaps create information vacuums where stock prices can become disconnected from fundamentals, undermining investor confidence in market integrity.

Early Detection of Issues Quarterly reporting enables the early detection of financial problems—including declining margins, cash flow issues, and compliance concerns—before they compound. A six-month reporting gap would delay problem disclosure and increase systemic risk.

Market Efficiency and Price Discovery

More frequent disclosure enables accurate price discovery and reduces volatility. Less frequent reporting increases information inequality, as insiders benefit from access to non-public quarterly data while other investors remain uninformed.

Accountability Standards

Quarterly reporting maintains the transparency standard that investors expect and rely upon. It levels the playing field between those with and without access to internal financial data.

Competitive Position U.S. markets benefit from robust disclosure standards. Weakening reporting frequency places American markets at a disadvantage relative to global standards.

Quarterly reporting is an established and essential investor protection mechanism. Moving to biannual reporting would reduce transparency, delay problem detection, and undermine market confidence.

Respectfully,
Erin Englund

Felice Burns — Jun 16, 2026
Subject: Comment on Proposed Rulemaking: Opposing Semiannual Reporting / Retaining Quarterly Disclosure From: Felice Burns Affiliation: Jun. 16, 2026 Dear Secretary,

I am writing to express my strong opposition to any regulatory shifts that would allow public companies to transition from mandatory quarterly reporting (Form 10-Q) to an optional semiannual reporting schedule.

Maintaining robust, frequent disclosure is vital for the integrity of our financial markets for several reasons:

• Investor Protection and Transparency: Individual retail investors rely heavily on timely, consistent financial updates to make informed decisions. Extending the reporting window to six months creates massive information gaps, leaving regular investors in the dark for far too long.

• Market Volatility: Reducing the frequency of audited financial transparency will inherently increase market volatility. When data is only released twice a year, the market is forced to rely on rumors, speculation, or massive, unexpected adjustments, causing severe price shocks.

• Asymmetry of Information: Professional institutional investors often have resources to track corporate health through alternative data channels. Main Street investors do not. Quarterly reporting levels the playing field and ensures fair access to information.

A healthy market demands more accountability, not less. I urge the Commission to protect the interests of everyday investors by retaining the standard quarterly reporting framework.

Sincerely,

Felice Burns

Felicia M. Brown The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Felicia M. Brown Quarterly reporting protects individual investors. The short-termism diagnosis doesn't justify this remedy. The companies most likely to opt out are the ones where oversight matter most. This is the wrong direction. What, exactly is the problem?

fern jacobs — Jun 16, 2026
Subject: Comment on S7-2026-15 From: fern jacobs Affiliation: Jun. 16, 2026 I think it’s important to continue reporting on a quarterly basis. As an investor, with my retirement invested, I believe it is important to know sooner, rather than later, if there is an issue with the company requiring my selling my stock. Too much damage can occur if we wait six months between reports.

Fred — Jun 16, 2026
Subject: S7-2026-15 Comment From: Fred Affiliation: Jun. 16, 2026 Fredrick Heivilin , retired . In order to be able to research and provide good investments for my grandchildren and myself it would not be conducive to only be able to review only every 6 months. That could easily be 5 months of a company going to crap and the small amount of my money being lost in a failing company. I'm not an expert but I'm not an idiot either and it's a poor decision to hurt investors.

Fred B — Jun 16, 2026
Subject: S7-2026-15 Comment From: Fred B Affiliation: Jun. 16, 2026 Reporting is supposed to give the public s clearer idea of the state of the business so investment decisions can be based on the current state of the business. This proposal does nothing to help that effort. Why would the SEC want to let businesses hide information from the public? Please don’t make it more difficult. Leave the reporting requirements as the are.

Fred Feld — Jun 16, 2026
Subject: S7-2026-15 From: Fred Feld Affiliation: Jun. 16, 2026 I lost $40,000 from my IRA because Merrill Lynch included Enron in their "Energy Fund" that looked so attractive. Soon after Enron collapsed, Merrill Lynch discontinued this fund, so this fund would not be included in yearly reviews and evaluations by Forbes, etc. Attorneys told me that since my loss was below their $50,000

threshold, they did not want to pursue a case against Merrill Lynch. YOU MUST FULLY PROTECT NEW INVESTORS. Quit protecting the thieves. Fred Feld, DMD

Gail Collins — Jun 16, 2026
Subject: S7-2026-15 Comment From: Gail Collins Affiliation: Jun. 16, 2026 Gail Collins Lifelong Homemaker/Caregiver for my disabled son Why do I think the SEC should keep reports quarterly? (This is the second time I've written a comment. There seemed to be a problem getting it sent the first time. If you should get two copies nearly identical I apologize.) That's like asking why wear a coat when it's cold outside. It's common sense for one thing. Companies need to be held accountable for their actions. If they're allowed to go 6 months before reporting their actions and earnings it would be much harder to discover any wrongdoing before it was too late to recover what might be lost. I've not been in the business world so I'm not really familiar with the process of oversight but my common sense tells me it would be much harder to undue something that's already been done than to see it while it may be happening and stop it. That's pretty simple I know. It just seems simple to me. Do not give companies extra time to potentially let them do something illegal. That may be a little cynical. I believe from what I have seen that it's just better to help someone keep their hands clean rather than giving them a chance to do something wrong. Keep the SEC at the 3 months reporting period. 6 months is too much time for transparency to occur and to keep the companies accountable. Thank you.

GAIL DRIEBE — Jun 16, 2026
Subject: Comment on S7-2026-15 From: GAIL DRIEBE Affiliation: Jun. 16, 2026 As an investor, I need more information, not less. The SEC is very important in protecting our financial system from egomaniacal billionaires.

Gail VanBrimer — Jun 16, 2026

Subject: Comment on S7-2026-15 From: Gail VanBrimer Affiliation: Jun. 16, 2026 Quarterly reporting provides increased transparency for investors and shareholders. Historically in the US and currently in other countries, semi-annual reporting results in lower valuations and could lead to significant reduction of wealth. In an era where policy change seems to favor corporations and the ultra wealthy over the average American, less frequent reporting and reduced transparency won't benefit the little guy. Please leave quarterly reporting in place!

Gary Friend — Jun 16, 2026
Subject: S7-2026-15 From: Gary Friend Affiliation: Jun. 16, 2026 My name is Rev. Gary G. Friend II and I live in Gainesville, Florida. As a veteran, a father, and an ordained minister, I am writing because I do not agree with or understand the need for this proposed change.

Four times a year, the CEO and CFO must each put their name to the company's books, certifying they've reviewed the report and that it contains no untrue statement of a material fact. Knowingly certify a false one: up to $1 million and 10 years in federal prison. Do it willfully: up to $5 million and 20 years. The proposal cuts those certified filings from four to two. Half as many moments when anyone at the top must stake their freedom on the truth.

Enron's executives claimed ignorance of their own books, so Congress made ignorance impossible to claim. Every quarter, the CEO and CFO certify that they personally designed and evaluated the controls that surface bad news, and that they reported any weaknesses or fraud to the auditors. The law claws back executive bonuses even without proof the boss was personally involved. Halve the filings, and you halve the quarters where "I didn't know" is off the table.

The SEC says current reports and press releases will fill the gap. Read the fine print: earnings releases ride on Form 8-K as "furnished," not "filed." That category exempts them from the automatic liability filed reports carry. No outside auditor reviews them, and no certification is required even when an 8-K contains financial statements. The SEC's own proposal concedes the problem. The 8-K may contain information, but it lacks any accountability.

Sarbanes-Oxley became law on July 30, 2002. Six days later, HealthSouth's CFO tried to quit rather than certify numbers he knew were fake: "he just couldn't sign the certifications." Months later he went to federal prosecutors and became the first of fifteen executives to plead guilty in a $2.7 billion fraud. A certification costs an honest executive nothing to sign, it just exposes the fraudsters. Why roll them back?

There is no need to change the certification requirements unless the intent is to assist corporate executives to more easily commit fraud. Do not do this.

Respectfully,
Rev. Gary G. Friend II

GARY GRAHAM — Jun 16, 2026

Gmail — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Gmail Affiliation: Jun. 16, 2026 Lori Hallahan, RN. Chadds Ford PA
Changing this to quarterly will put me in the dark regarding my investments and plan for retirement in a couple of years. I have worked hard as a nurse caring for patients/families while missing my own family events/holidays. I have done this for 41 years with several more years to go. Less transparency is NEVER the best answer.

Sent from my iPhone

Gmail — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Gmail Affiliation: Jun. 16, 2026 Do not report semi-annually. Report Quarterly. Too much can happen in 6 months to call that transparency. Entire Boards can change direction. Bill Whiting, retired, Arkansas. I was close enough to see these rapid changes effect my former company. We were a 3M acre forest products company. Not to mention the effects of lending rates moving from 2% to 7% overnight due to government actions. SEC actions also move markets rapidly. Be responsible or be ousted. Don't tell me that the SEC is caving to companies that don't want to look at their finances regularly. That encourages irresponsible management. Is that the goal of the SEC?

Sent from my iPhone

Gmail — Jun 16, 2026
Subject: S7-2026-15 Comment From: Gmail Affiliation: Jun. 16, 2026 This is an horrible idea.

Other than the rich insiders, who benefits from this change?
Not the general stockholders or anyone else. No one other than
those who proposed it.

Capitalism needs light to flourish, not months of darkness.

Greg Wardwell — Jun 16, 2026

Subject: S7-2026-15 Comment From: Greg Wardwell Affiliation: Jun. 16, 2026 My name is Greg Wardwell. I'm a software engineer. I say no to changing the quarterly reporting rule.

I work hard to provide for my family and to build a retirement account that will allow me to one day spend time fully focused on my family — my wife, my kids, and someday my grandkids — not dividing time between them and work. Moving from quarterly reporting to 6-month reporting puts all that at risk. It creates a long period of secrecy where the money I work for can all disappear due to fraud.

This change does not help me, your everyday guy, build my financial future. It only helps the rich get richer at my expense.

Companies are responsible for and accountable to their investors. They owe us regular and timely performance updates so we can hold them accountable. As an investor, that means every three months. As an investor, my voice deserves to be heard in how companies are held accountable to me.

Again, I say no to changing the quarterly reporting rule.

Sincerely,
Greg Wardwell

Keep reporting at quarterly intervals at the very least. Bi-monthly reporting should be an option. There is not an enough oversight on financial institutions to allow reporting to be twice a year. Inspect what you expect!!

Gregory McClean — Jun 16, 2026
Subject: S7-2026-15 Comment From: Gregory McClean Affiliation: Jun. 16, 2026 Keep the reporting as is so we investors can watch our investments better!

Gregory McMinn (individual) (none) — Jun 16, 2026
Subject: File No. S7-2026-15 From: Gregory McMinn (individual) Maintaining the current quarterly reporting benefits shareholders interests in two important ways: 1. it forces public companies to make their valuations transparent to shareholders; and 2. this transparency provides shareholders and prospective shareholders the information they need to make timely, accurate decisions about their investments. The lag time associated with semiannual reporting would severely water down this transparency, so that, potentially, only insiders would have access to timely information, which disadvantages most shareholders. For these reasons, I opposed the suggested rule S7-2026-15.

Gregory Thome — Jun 16, 2026
Subject: File No. S7-2026-15 From: Gregory Thome Quarterly reporting should be a minimum requirement for keeping investors informed about the financial condition of a company they own. Sharing results monthly would be even better. Owners are entitled to be informed about the companies they invest in. Given the speed in which conditions can change in a global economy, semi-annual reporting is not frequent enough for investors to make informed investment decisions.

Gregory Vance Miller — Jun 16, 2026
Subject: S7-2026-15 Comment From: Gregory Vance Miller Affiliation: Jun. 16, 2026 Why would you want to do that ,KEEP IT QUARTERLY!!!!!

Gregory Miller

Gregory Zide Motley Fool Community of Investors — Jun 16, 2026
Subject: File No. S7-2026-15 From: Gregory Zide Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders and that transparency gap is where volatility, uncertainty, and mistrust grow. Research from CFA Institute , which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. Cost– less transparency for individual investors exchanged for a "benefit" that pragmatic evidence shows simply will not be created -- is a receipe for potential corruption and malfeasance. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-transparent businesses operate with much less scrutiny and the reduction of their reporting requirements makes them way harder to monitor, but not easier to own. This is the wrong direction; Reg FD moved us toward a more level playing field; this wrong-headed proposal moves us away from it. As the WallStreetBets' comment letter put it: "The companies we trade are not being held back from greatness by the obligation to file four reports a year ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well."

Gretchen Maguire — Jun 16, 2026

Subject: S7-2026-15 Comment From: Gretchen Maguire Affiliation: Jun. 16, 2026 Companies need to be transparent. This is an attempt to actually help companies deceive, bait and the insiders dump. Why not make laws to reduce grift not bolster it.

Gretchen Wagenseller — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Gretchen Wagenseller Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Openness/transparency re company information is important; therefore, changing from quarterly reporting to twice a year reporting is not in the interest of consumers.

Grieg Pedersen — Jun 16, 2026
Subject: S7-2026-15 From: Grieg Pedersen Affiliation: Jun. 16, 2026 Good morning.

As an investor with a startup or two in my portfolio, I depend on quarterly reporting to prove to me that the company is doing what it says, when it says. Without this accountability, there's a potential for management responsibility to slip in situations where one quarter of slippage could be disastrous. The greatest American growth ended and re-started with quarterly reporting. Yes, you can argue that the quarterly requirement causes short-term planning, but I don't find that to be true. Companies focused on the future remain focused; their reports include forward-looking statements and year-or-longer projections. Most of the financial detail in quarterly reports is easy to generate automatically thanks to computerized systems like the ones I created over the last four decades. The only time such reporting becomes onerous is when the company is trying to spin the data. That's what takes time. Going semi-annual will open the door to the greater corruption we see in those parts of Europe and Asia that report less often. Quite simply, it's not onerous to report quarterly if you're being honest. It's only onerous if you're lying. And let's be honest, if the company is honest, it's a chance to brag about successes and get feedback on missteps. Most software development and many engineering projects have gone agile, where projects and reporting periods are broken down into smaller parts, feedback is frequent, and gains are celebrated more often. We don't lose the long plans because all the small pieces ("stories") are made from those plans ("epics"). What we gain from agile, and what we're seeing with quarterly reporting, is that failures are smaller and shorter-lived, more swiftly corrected, and less impactful. Quarterly is good. We may even reach a point in business management where AI makes more-frequent reporting reasonable, but for now, quarterly is good. Let's keep it.

Heather G — Jun 16, 2026
Subject: S7-2026-15 Comment From: Heather G Affiliation: Jun. 16, 2026 To whom it may concern:

I am vehemently opposed to changing the reporting cycle for publicly traded companies. It MUST remain quarterly. These companies have a responsibility to provide transparency with shareholders and investors so that they can make informed investment decisions. Extending the reporting deadline opens a window for fraud and misrepresentation that could negatively impact investors and the economy. Keep the reporting period quarterly. It is not a burden on companies, the corporate structures are already in place and it is a critical information path for the public.

Kind regards, Heather Greenwell

Henri LaFrance — Jun 16, 2026
Subject: S7-2026-15 Comment From: Henri LaFrance Affiliation: Jun. 16, 2026 I disagree with

changing the reporting requirements because of the inherent risks associated with the change. I agree there is a problem that companies focus too much on short term results, but that is a symptom of a bigger problem. Changing reporting rules won't fix that problem. Today, things happen so quickly that a company's health can be compromised in minutes, hours, days. Allowing corporate leaders to not inform employees, stockholders, or the public of issues puts their livelihoods at a much higher risk. I believe this will increase corporate raiding, fraud, and bad management.

Holly A Harris — Jun 16, 2026
Subject: S7-2026-15 Comment From: Holly A Harris Affiliation: Jun. 16, 2026 There is growing concern about the lack of transparency and fairness in today's market. Just as everyday investors are beginning to better understand how the stock market can be used to build generational wealth, it appears that the rules are shifting in ways that make access, accountability, and informed decision-making more difficult.

Allowing corporations to withhold or reduce public financial reporting would be a step in the wrong direction. Investors, both current and future, deserve clear and timely access to a company's financial position. Quarterly reports provide essential transparency and help protect the integrity of the market.
Corporate financial disclosures should remain publicly available. Transparency is not optional when public investors are being asked to place their trust and money into these companies.

Honey Music — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Honey Music Affiliation: Jun. 16, 2026 Greetings,

I am a former registered principal of the NASD and a former owner of a national stock brokerage firm. Public companies need to be held publicly responsible- to other citizens and to the U.S. GNP, not just as to reporting and tucked into this idea the requirement to report quarterly like every other taxable and other entity(!)

I also believe that every public company must pay a living wage in their state(states) Wait! don't think I'm digressing, this should be written into how we standardize the raising of capital and the use of capital, this is not just a tax matter, this is a matter that affects us all and we must standardize as a country certain things that are a little too regional to be fair to everyone, everywhere as countrymen.... free market economy was not supposed to make companies that were bigger than the GNP of foreign countries, this is not how free market is supposed to work. particularly, why are we letting shareholders take dividends in public utilities while individual citizens pay higher rates that they struggle to meet? this is a transfer of wealth that does not make sense? Because then it's taxpayers we have to subsidize on the other end of a profit model? As The Gatekeepers of Capital we need to do a better job of influencing real life poor execution of distribution of profits and removing reporting is not one of them.
We need to tighten up the private placement Market because the current standard of an accredited investor is too low and changing the qualified client definition is not protecting the households. If it's not suitable for an IPO that is probably not suitable for many more individuals who are suitable on paper but all of their assets are sunk.

Thank you for receiving my input,

Honey J.Music,
Raleigh, NC

Subject: Comment on S7-2026-15 From: Hue Jacobs Affiliation: Jun. 16, 2026 As an investor this change terrifies me. I have built up a solid next egg and the thought that companies will now have ways to obfuscate transparency is alarming. Please do not implement this rule.

Hugh Nunn — Jun 16, 2026
Subject: S7-2026-15 Comment From: Hugh Nunn Affiliation: Jun. 16, 2026 My name is Hugh Nunn and I am a Program Manager at the Department of Defense, as a civilian (federal employee). I work with foreign partners to help them build stronger institutions and capacity. Institutions crumble when they do not function as designed- when the oversight is blinded. Respectfully submit that the SEC's responsibilities lie more with investors' need for timely, factual information, than with corporations' desire to to add opacity to their own reporting. The National Investor Relations Institute (NIRI) is a clearinghouse for IR professionals and member companies to access and learn best practices. I'd hope the SEC remembers the many times that boilerplate protections and standards were removed only for markets to suffer consequences that we've all shared. It's bad enough that all of the policies now support shareholder vs stakeholder values... but even the most cynical capitalist must recognize sooner or later that taking all of the things kills the whole system. The board has a chance to stick up in some small way, for oversight and the citizen investors' right to expect our corporations to act in good faith.

Sincerely,

Hugh Nunn

Best,

Hugh Nunn

Hugo Pena — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Hugo Pena Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
I rely on consistent, timely information to understand how companies are performing and to make informed decisions. Quarterly disclosures are an essential part of that process because they provide regular updates on a company's financial condition, risks, and progress throughout the year.

Without quarterly reporting, I would have to wait much longer to see how a company is actually doing. That delay would make it harder to respond to changes, compare performance over time, and evaluate whether a company is meeting expectations. Markets move quickly, and having access to up-to-date information helps ensure that all investors—not just large institutions—can make decisions based on the same level of transparency.

Quarterly disclosures also promote accountability. When companies know they must report regularly, they are more likely to stay disciplined and transparent in how they communicate with the public. Reducing the frequency of disclosures could limit visibility into important developments and make it harder to identify risks early.

For these reasons, quarterly reporting is not excessive—it is necessary. It helps maintain a fair and informed marketplace, and removing or weakening it would take away vital information that retail investors depend on.

I urge the SEC to preserve strong quarterly disclosure requirements so investors like me can continue to make informed, confident decisions.

Humberto Chemas — Jun 16, 2026
Subject: File No. S7-2026-15 From: Humberto Chemas I suggest company financial information should continue to be submitted quaterly. This fosters transparency which is one of the most important conditions to keep a healthy investment market.

Irma Pellei — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Irma Pellei Affiliation: Jun. 16, 2026 Dear SEC employees,

Cutting compliance filings from quarterly to twice per year raises the probability that retirement investments will shrink, as has happened in other countries that tried cutting reporting in half. Additionally, it will adversely impact the private sector's legal compliance employment numbers, at a time when the American economy is already strained. The number of people employed in government and private sector securities compliance is big, because it has to be big, because this is a big country whose economy two years ago was deemed "the envy of the world." Frankly, the only people who stand to benefit -- at the expense of the majority of American investors, retirees, and everyone who stands to lose employment for keeping bigwigs honest --are the top 1%, who have never had it so good. Quite frankly, Americans are sick and tired of seeing their lifelong, hard-earned wealth being transferred in every way imaginable to those whose greed cannot be sated. The current regulatory requirement of quarterly reporting must remain intact in order to keep would-be corporate malfeasors honest and the American economy stable. Just say no to the writers of the

last 100 pages of Project 2025, where they have hidden their intentions in plain sight.

Respectfully,
Irma Pellei

Irwin Flashman — Jun 16, 2026
Subject: File No. S7-2026-15 From: Irwin Flashman The SEC is proposing to cut our information in half. The agency wants to allow public companies to switch from quarterly to semiannual financial reporting – reducing our window into the businesses we own from four times a year to two. But the stated rationale doesn't hold up. This change has been tested in the real world. When the U.K. tried it, companies didn't invest more long-term. Executives didn't stop chasing short-term targets. All that changed was that individual investors had less information to work with. The Motley Fool Community of which I am a member and I believe individual investors deserve more transparency, not less. Do not make the proposed change.

Sent from my iPhone

Ivy Kilgannon — Jun 16, 2026
Subject: File No. S7-2026-15 From: Ivy Kilgannon I support continuing the requirement for quarterly reports. While I invest mostly in funds, I do have multiple individual stock positions and reviewing quarterly reports helps me understand how my money is working for me. Companies that reduce their reporting are harder to monitor and understand what is happening with the company. Research from a study done in the UK, which went through this, does NOT support that reduced reporting would encourage more long term planning. There isn't a problem that needs to be solved here - every public company is currently required to file 4 times a year and the stock market is doing great. All this will do is make it harder for retail investors to get real information regularly about what they are investing in. Please keep the requirement for quarterly reporting.

Izzy Isabela — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Izzy Isabela Affiliation: Jun. 16, 2026 Please do not change the rules about financial disclosures.

J Lock — Jun 16, 2026
Subject: Comment on S7-2026-15 From: J Lock Affiliation: Jun. 16, 2026 At any professional organization we keep weekly and even monthly records. Technology has made this even easier, a proposal to shift reporting to less frequently is a blatant shift towards the insider trading the SEC is supposed to be limiting. Previous fraud and stock market collapses introduced the quarterly minimum reporting with lesser technology. With any reasonable person at the wheel reporting frequency is actually easier and pushing away from quarterly to more frequent reporting may actually help smooth out the spikes seen with quarterly reports. Switching to semi-annual... good

men stand up to corruption, because they know its reach despoils everything in time. Don't participate in further disenfranchising the American public and your future children and or grandchildren, the good old boys club seems good until your not part of it and see the other side, or your family does.

J P — Jun 16, 2026
Subject: S7-2026-15 Comment From: J P Affiliation: Jun. 16, 2026 Is this more fraud and abuse from the US Government. Is this the SEC's way of trying to get the average Joe out of the market? or will the SEC not be happy until you decimate the American peoples hard earned retirement. One branch will strip us of our Social Security and will have you the SEC for our retirement funds being worth nothing. Is there no end to your greed? Which tech bro is behind this EPIC scam? Try for once not to look like complete douche canoes and walk this back and try to act like you care about the damage this will do to the average person and their retirement accounts.

"The thinking man must oppose all cruel customs no matter how deeply rooted in tradition or surrounded by a halo. We need a boundless ethic which will include the animals also"
Dr. Albert Schweitzer

A Poem by Mary Oliver: Messenger

My work is loving the world.
Here the sunflowers, there the hummingbird—

equal seekers of sweetness.
Here the quickening yeast there the blue plums.
Here the clam deep in the speckled sand.

Are my boots old? Is my coat torn?
Am I no longer young, and still not half-perfect? Let me
keep my mind on what matters,
which is my work,
which is mostly standing still and learning to be
astonished.
The phoebe, the delphinium.
The sheep in the pasture, and the pasture.
Which is mostly rejoicing, since all the ingredients are here,

which is gratitude, to be given a mind and a heart
and these body-clothes,
a mouth with which to give shouts of joy
to the moth and the wren, to the sleepy dug-up clam,
telling them all, over and over, how it is
that we live forever.

J. Steven Beckham — Jun 16, 2026
Subject: S7-2026-15 From: J. Steven Beckham Affiliation: Jun. 16, 2026 Quarterly reporting is one of the guardrails of economic integrity. In the long run it protects all of us. To modify or delay this requirement would create an open door for corruption.

Jackie Flynn — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jackie Flynn Comments attached Please know that our country is experiencing incredible grift and insider trading from the highest levels of every company right. There is almost zero trust of these companies and CEOs by all middle class Americans. Now is not the time to ease compliance and safeguards. If anything we Americans think there should be more accountability!

Jackie Fretz — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jackie Fretz Affiliation: Jun. 16, 2026 Less regulation and reporting only leads to more corruption. Investors deserve to be well informed and have transparency about book keeping. To have an retirement account in the US you are made to be invested in the stock market. Quit making it easier for companies to be crooked and make it harder for us to make informed decisions. This rule was made after one of the worst company implosions of the last 30 years. Implementing yhis rule change helps it happen over and over again. This is a parachute, and losing this rule is as stupid as saying they aren't needed anymore because no one has fallen to their death lately because everybody is using them.

Jackie Fretz, Resident of Connecticut.

Jackie Frosch — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jackie Frosch Affiliation: Jun. 16, 2026 Please continue to require companies to report quarterly so that we as consumers can make educated decisions on our investments. Transparency is supposed to be important in this administration; please show us that. Less frequent reporting does NOT do that. I am a retiree and currently drawing on my retirement funds that I worked hard for over many years. It is critical the SEC always keep investors first and foremost in their actions. We are watching.

Thank you.

Jackie Frosch, Retired US Citizen

Jade Masters The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jade Masters I've worked at The Motley Fool for 5 years, and the whole point of what we do is help regular people invest smarter. I'm also one of those regular people — I have my own money in the market, and I don't have access to the expert networks, private briefings, or alternative data that big institutions do. Like most retail investors, I rely on public filings to know what's actually going on with the companies I own. I think this proposal would be damaging to individual investors like myself. Moving to semiannual reporting would double the information gap between insiders and everyone else. Quarterly reports actually mean something — they're the one place where a company has to show you the full financial picture on a regular, standardized schedule. Voluntary updates and press releases don't cut it. The cadence is part of

what makes the information useful. I've heard the argument that quarterly reporting causes short-termism, but the research doesn't back up this fix. The CFA Institute looked at what actually happened when the UK dropped mandatory quarterly reporting in 2014, after requiring it since 2007. Companies didn't start investing more in the long run. Reporting frequency just didn't move that needle. What it did affect was how much useful information was available to investors like me. Dropping quarterly reports would especially impact companies that are smaller, and less-scrutinized-ones where that oversight matters most. Reg FD was about getting more information into the hands of everyday investors. This goes the other direction. I hope the SEC will reconsider.

Jaishankar Sivaraman None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jaishankar Sivaraman Do not support the view that semi annual reporting will be doing a service to individual investors. This will make companies less transparent and thus more difficult for individual investors to invest.

Jake Singer — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Jake Singer Affiliation: Jun. 16, 2026 Hello,

My name is Jake and I am a pharmacist in New York State. I was fortunate to be able to begin investing at a young age and I rely on quarterly reporting to ensure that the companies I invest in share my values and have a strong financial outlook. I strongly oppose allowing companies to revert back to semi-annual reporting. This would take powerful information out of the hands of the people and I worry that the lack of transparency would have severe negative impacts on the market for years to come. I urge you to reject the proposal to convert to semi-annual reporting.

Sincerely,
Jake

James — Jun 16, 2026

James Burns Independent retail investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: James Burns I have been a retail investor for 25 years. The amount of information available directly from publicly traded companies is limited. Reducing quarterly reports will limit my ability to make investing decisions and weaken my ability to plan for the future. I belong to the online community at The Motley Fool, and many agree with this position. More information is better for the individual investor.

James Cummings — Jun 16, 2026
Subject: S7-2026-15 Comment From: James Cummings Affiliation: Jun. 16, 2026 No, I do not support this. It brings to mind what the Bush(?) administration did with major oil corporations where they didn't have to make public their quarterly earnings. We, the public, would not longer see their obscene profits as the prices at the pump keep going up so quickly and not coming down nearly as quick. The old 'supply and demand', price spikes prior to major holidays when the public would be driving. And, how the oil corporations fought so fiercely against Hillary Clinton's proposal for an excess profits tax. Now, we the people, we the public never see those earnings, profits or the hugh bonuses being paid to executives.

That's why I don't support the SEC proposal.

Jim Cummings

Jamie Baker — Jun 16, 2026

Subject: S7-2026-15 Comment From: Jamie Baker Affiliation: Jun. 16, 2026 To Whom It May Concern,

My name is Jamie Baker, and I work as a Risk Management Analyst. I am writing to express my opposition to the proposed six-month rule.

From my perspective, this proposal would primarily benefit large financial institutions and corporations while reducing protections for individual investors. As someone who works in risk management, I believe regulatory frameworks should promote transparency, accountability, and investor confidence. Policies that weaken oversight or limit investor protections can increase risk to the public and undermine trust in our financial markets.

The SEC's mission is to protect investors, maintain fair and orderly markets, and facilitate capital formation. I encourage the Commission to carefully consider whether this proposal advances those goals or instead shifts additional power and influence toward large market participants at the expense of ordinary Americans.

I respectfully urge the Commission to reject the six-month rule and prioritize policies that strengthen investor protections and market integrity.

Sincerely,

Jamie Baker
Risk Management Analyst
Ohio

Jamie Jeffredo — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Jamie Jeffredo Affiliation: Jun. 16, 2026 Please stop taking us backwards! During America’s twice-a-year reporting, stock returns went nowhere and valuations sat far below today’s values. Transparency is necessary. Accountability is necessary.

American citizens have the right to see the performance of the stocks they have invested in. Reducing the amount of times they report merely allows for more insider trading and less options for others. Stop voting against what’s best for everyday American citizens.

Jan Lundeen Motley Fool — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jan Lundeen Please don't decrease reporting to two times a year. Less transparency is not a good thing (especially with the smaller companies).

Jan Meyer — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jan Meyer Affiliation: Jun. 16, 2026 This is an urgent message regarding
S7-2026-15

I am an investor. I remember well the financial failures of the mortgage and banking industry, Madoff, Enron, and others.

The SEC's entire job is oversight, not less oversight. This proposed rule change for corporate reporting periods, from quarterly to twice a year, is a SCAM that hurts everyone but the insiders - you, the corporate boards, lobbyists, and those at the highest levels of government who are very willing to defraud the public.

In other words, it's a con.

A shell game.

We are all watching.

Jan Meyer

Janene Follmer — Jun 16, 2026
Subject: S7-2026-15 From: Janene Follmer Affiliation: Jun. 16, 2026 Quarterly reporting is a great reminder to be honest about what those financials are stating. I know this from personal experience. My township went from annual reporting to quarterly years ago, and I immediately felt the benefit of scrutinizing the expenses every three months, instead of letting everything just flow until the end of the year. Mistakes can be corrected in a timely manner before they become egregious errors.
Janene Follmer
Liberty Township Trustee

Janet — Jun 16, 2026
Subject: S7-2026-15 Comment From: Janet Affiliation: Jun. 16, 2026 We need regular quarterly reports to understand if a company we have our money invested into is meeting its goals and if not they should be required to explain the conditions that are impeding their ability to perform. Maybe if you actually enforced existing regulations on Wall Street rather than make it even easier for them to

cheat and steal the public, voters, taxpayers would be better served.

Best regards

Janet Carpenter

Janet Barrigar — Jun 16, 2026
Subject: S7-2026-15 From: Janet Barrigar Affiliation: Jun. 16, 2026 Janet Barrigar, retired accounts payable, Michigan. Corporations are controlling too much of our economy and lives. It is time to protect the average person or We The People! CEOs are usually all about the profit and large wages for themselves and the company and then move on to the next corporation. We need to know the bottom line so they cannot hide things. There should also be an elimination of corporation funding to politicians, also, so laws cannot be enacted to encourage and/or reinforce corporate misbehavior and/or management. There should be More emphasis on workers environment, wages, and healthcare. . and our planet environment! I am tired of the middleman footing the bill!!!!!!!!!!!!!!!!!!!!!!!!!!!

Janet Battaglia — Jun 16, 2026

Janet Feldpausch — Jun 16, 2026
Subject: File No. S7-2026-15 From: Janet Feldpausch Save the 10-Q. Quarterly reporting protects individual investors, we don't need a wider gap between insiders and ordinary shareholders. The obligation to file four reports a year is not holding the companies we trade from greatness, the S&P is at an all time high. We need transparency and ease of monitoring with accountability. Reducing the reporting requirements makes them harder to monitor ----- NOT easier to own. Let's continue in the direction of Reg FD.

Janet Freed — Jun 16, 2026
Subject: S7-2026-15 From: Janet Freed Affiliation: Jun. 16, 2026 Quarterly reporting helps all shareholders! We need to be certain corporate America is looking out for our our best interests. Leave this reporting schedule as is!

Jeff Muldrow — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jeff Muldrow To keep the investing process fair for all investors, not just a select few, reports should continue to be made quarterly. Reducing the reports would breed uncertainty and mistrust, which would be terrible for U.S. stock markets.

Jeff Musiker — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Jeff Musiker Affiliation: Jun. 16, 2026 As a shareholder of a company, should be able to know what and how the company is doing. Reporting every 6 months isn't enough to judge performance

Yahoo Mail: Search, Organize, Conquer

Jeff Reilly — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jeff Reilly I am an active investor. My investment research includes reading each company's quarterly reports. I rely on timely information to make the best investment decisions for our family. SO I AM AGAINST SEMI-ANNUAL REPORTING. Semi-annual reporting would severely limit my access to timely information and it is completely unnecessary. The market is currently at an all time high so it seems quarterly reporting is not hindering our great US companies, or the stock market whatsoever.

Jefferson Alteon — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Jefferson Alteon Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
What's the point of trusting a company if they're hiding things from us? This should be completely unacceptable. It is my money that's on the line here - how am I supposed to trust it if I can't receive my report as clear as a clean glass? I should know what I am going to put my money into. To my understanding of this topic, investors will have to wait half a year just to get an update about their money, and companies will have the right to hold back information. I feel like this will create serious loophole that will be exploited, which is highly unfair for us investors. If I am wrong, What is the actual purpose of such a rule. There should be a rule that benefits both parties, instead of coming out with one where one side win and the other loses

Jennifer Aumuller — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jennifer Aumuller Affiliation: Jun. 16, 2026 My name is Jennifer, I, am a disabled American. The SEC must keep quarterly reports public. It keeps everything Honest! Transparency is of the utmost importance in this country, especially since we have a government that isn't very honest. I implore the SEC to keep this public!
Thank you.

Jennifer Betts — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jennifer Betts Affiliation: Jun. 16, 2026 Good morning,

The SEC needs to continue with quarterly reporting to maintain transparency and consistent, current data for the American people. This is important to me because, as a Speech-Language Pathologist, I am required to maintain current and accurate records of my client's needs and growth. These records are about accountability, which the SEC also must maintain, as taxpayer monies are used and must be accurately accounted. Less than quarterly reporting is unacceptable and lowers the best for what should be stringent standards.

Thank you for your time and consideration,

Jennifer Betts, M.S., CCC-SLP

Jennifer Richmond-Ananbeh — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Richmond-Ananbeh Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Because people investing in publicly traded businesses, should not have to invest their hard earned money without information on those companies. Their business dealings, their accountability, and their financial standing. EVERYTHING SHOULD BE TRANSPARENT- or they should not be allowed to be traded or invested in! PERIOD. No transparency = no investors. End of story.

Jennifer Rivera — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jennifer Rivera Affiliation: Jun. 16, 2026 The powers that this gives large corporations is absolutely insane. It appears that the government is here to serve the wealthy. Actually it doesn't just appear that way, you are doing things to HURT the average American and consolidate power to a few who will keep their foot on the average person's neck. They will employ us for a penance, take government subsidies and tax cuts, and have trouble as a CEO living on 25 million. Let's call this what it is, another corporate handout to keep as much truth hidden as possible and continue to consolidate/steal wealth for a chosen few.

Jennifer Sommer — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jennifer Sommer Affiliation: Jun. 16, 2026 Dear Commission Members,

As a lifelong investor and Californian, I always read the quarterly reports from my investment companies. This information is very important to me as a small investor.

I am firmly opposed to changing the quarterly reporting of companies. Regular reporting every three months is essential for all investors. Do not change it!

Sincerely,

Jennifer Karstedt Sommer

Jennifer Stauffer — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jennifer Stauffer Affiliation: Jun. 16, 2026 Hello!

I am a wife, and mother of two boys with special needs. Our youngest is adopted. We live in a small house in a modest neighborhood. I am opposed to the SEC moving away from quarterly reporting. I have worked since I was 12 years old, and at 64, I would like to retire soon, especially since I have health problems. I depend on the SEC reporting quarterly so I can keep up- to-date on my investments, and make personal decisions about my finances. Historically, there has been more fraud when companies have reported semi-annually. The quarterly reporting cuts down on this fraud, due to more transparency. Also, the savings to companies are not worth it to me. Please help the

American people by keeping quarterly reporting!

Respectfully,

Jennifer Stauffer,
Music Therapist

Jennifer sword — Jun 16, 2026
Subject: S7-2026-15 From: Jennifer sword Affiliation: Jun. 16, 2026 Jennifer Sword retired federal worker USPS I believe quarterly reporting should be maintained because of the visible corruption we see daily.. It should be apparent to anyone after seeing the theft that our government has allowed and pardoned there cannot be too much oversight. We need to to see the same accountability in government.

Jennifer Tuck — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Tuck Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

we need to keep this in place, we need transparency

Jenny — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jenny Affiliation: Jun. 16, 2026 Dear Commissioners,
As a person who spent almost 30 years on Wall Street, I find it dumbfounding that you would REDUCE the amount of information provided to the public. This is a terrible temptation for wrongdoing.

I am totally against this reduction in reporting, having been witness to the pressures on management to obscure bad news.

I did a lot of business overseas and the singular feature of US markets that keeps us honest are the strict disclosure rules on US companies, including timely reporting.

Do NOT eliminate quarterly reporting.

Sincerely, Jenny Hourihan

Jeremy Blevins — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jeremy Blevins Affiliation: Jun. 16, 2026 Quarterly reporting from the SEC is already too little. Switching to semi-anual would be absurd. If anything, let's have reports more frequently.

Jeremy Upton — Jun 16, 2026

Subject: S7-2026-15 From: Jeremy Upton Affiliation: Jun. 16, 2026 I would absolutely love to see it change to monthly. Unfortunately y'all believe you're above the rest of us, so I'm not holding my breath. Go ahead, provide me wrong, please! It's alright, I'm not hating on yous. Remember, the first will be last, and the last shall be first. I'll continue to pray for y'all either way. Y'all being Representatives, Senators, billionaires, especially our President. Yes, the one destroying our Constitution and murdering people. I'm ashamed to be an American at this point. How sad and pathetic the system has become.

Jeri Killett — Jun 16, 2026
Subject: S7-2026-15 From: Jeri Killett Affiliation: Jun. 16, 2026 It seems to me that Deregulation Sucks!!
Only the Rich will have every centThat is available in may it been electronic, printed paper and all the copper pennies. This will starve us, we will be over or under exposed for being out in the weather. Americans will be disenfranchised, without means: feed and shelter ourselves, vote, partake in any assembly, or protest without the fear of be arrested. We should not be Oppressed from non humanitarian actions.

Jerome Olearnick None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jerome Olearnick If this is true, allowing companies to cut the reporting from quarterly to semi-annually would be a terrible mistake. Individual investors need more information to make sound decisions not less. If history is any indicator, cutting the flow of information only creates chaos and bad investments. Do the right thing by individual investors and keep the flow of information to quarterly.

Jerry Kemp — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Jerry Kemp Affiliation: Jun. 16, 2026 Jerry Kemp Fenton MO retired. Not unless you want to start a revolution. The people will not tolerate this. Our government is working for itself and not the people. Wake up or it will all be over.
Healthcare is in the worst shape it has ever been. It angers me that in my profession As a pharmacist we have been cut to the bone. Our salaries have not kept up with inflation over the last 10 years. Why?? Because PBM’s are taking money from the American people and telling them they are saving them money. No they are not, they are funneling that money to the insurance company that owns them. What has our government done to stop it? Nothing!!!!! You will find out the worth of a neighborhood pharmacist when you have the next health crisis. Pharmacists worked through the

entire Pandemic. I put my own health ant risk going to nursing homes and outreaching the poor. I gave them the vaccine before I could even get it? Does that even make sense? For that I didn't get a dime of government money, unlike our neighbors who stayed at home and collected checks from you. This was the biggest slap in the face we have ever gotten. Now retired I need health care and the maze you have to go through to get it and the money I have to pay for it occupy my time and money. I grew up being proud to be an American. Young men today can't find jobs. They aren't able to buy a home and have a family. So therefore they have no buy in to our country. The next time You are in need do you really expect them to rally behind the red white and blue that turned its back on them? Why would they? You have marginalized young men to nothing. Enough of the greed and polarizing division of our country. You need to start putting the people first.

Subject: S7-2026-15 Comment From: Jill Frazier Affiliation: Jun. 16, 2026 Quarterly filings are fine, but I want more transparency not less. Biweekly would work

JL Frazier

Jill Gaimari — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jill Gaimari Affiliation: Jun. 16, 2026 Quarterly reporting is absolutely essential to keep the investing public and the public generally informed, and keep insider advantages and shenanigans to a minimum. Enlarging the reporting period would just invite creative manipulation of accounting to the detriment of the retail consumer, and make it harder for investors to manage their investments wisely. The crux of this is really the interests of the little guy (millions) pitted against the greedy interests of the minority, the rich and the powerful, who already hold too much sway in this society, and especially given the current administration.

Jill Gaimari, retired attorney

Jim Cauley — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jim Cauley Affiliation: Jun. 16, 2026 Dear SEC:
I am submitting this comment to oppose the proposal to allow quarterly reporting for all companies.

Quarterly Reporting helps to keep financial information current and up to date. It also pushes corporations to discover and address issues sooner.
I recognize that a focus on the short term results also has some downsides, but on the whole, quarterly reporting will do a better job of maintaining trustworthy and reliable information for investors and for corporations making decisions. Quarterly reporting has supported the growth and health of the US financial markets and stock exchanges.

Sincerely,
James Cauley

Jim Evans — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Jim Evans Affiliation: Jun. 16, 2026 More transparency by keeping quarterly reporting requirements in place is the best action currently.

Jim Puckett — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jim Puckett Affiliation: Jun. 16, 2026 Reporting was seen as a responsibility for ethical, legally binding way to assure honest accountability for proper handling of billions of dollars. To stop this now only opens the door for back room deals. The American people are getting fed up with this mentality and the rich might very well be bribing their way to more riches. But the deeper this goes the more the everyday citizens will eventually have had enough and the rich may make themselves targets. That could be avoided if things like this are stopped and there by protecting the integrity of doing what is right and ethical.

Jim Ray — Jun 16, 2026
Subject: S7-2026-15 From: Jim Ray Affiliation: Jun. 16, 2026 The SEC provides assurance to Americans that their investments in American industries are well founded, which in turn drives the American economy. We have all seen what happens when oversight is relaxed. I believe that the SEC must continue in its role as watchdog over the economic engine that drives America forward. Please don't return us to an environment wherein corporate leadership is no longer accountable. We all know what happens when that is the case.

Jim Smith — Jun 16, 2026

Do not touch our accumulated funds — that pays for us to live, to address health issues, and to safeguard against any market changes. Please deny this self-serving request!

Sent from my iPhone

Joann Barry retired institutional investor and CFA — Jun 16, 2026
Subject: File No. S7-2026-15 From: Joann Barry I oppose semi-annual financial reporting and I support the current quarterly requirement. I spent more than 35 years of my career as an institutional investor and was dependent upon quarterly reporting to monitor my investments. The US markets have always enjoyed status as the most transparent, liquid markets on the global stage. Valuations reflect investor confidence in our markets, earning premium valuations relative to other markets, both developed and developing. With semi-annual reporting, I expect the premium to erode over time, approaching valuation metrics of non-US markets. If the goal of this proposal is to reduce

short-term-ism, I think the opposite will be achieved. Short-term-ism is the result of uncertainty and a low tolerance for risk. Reducing information will increase uncertainty and perceived risk. Importantly, quarterly reporting imposes 4 blackout periods per year, during which insiders in possession of material nonpublic information cannot buy or sell shares or derivatives contracts. Cutting blackout periods down to 2 times per year increases the risk of front-running the news flow, putting other investors at a disadvantage. There is nothing "broken" about the current system. This proposal looks like a solution in search of a problem. Or, cynically, it appears designed for people who want to game the system.

JoAnn Burgess — Jun 16, 2026

Jody Gayhart — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Jody Gayhart Affiliation: Jun. 16, 2026 I strongly oppose the SEC moving away from quarterly reporting because regular financial disclosures are essential to maintaining transparency and investor confidence. Quarterly reports provide timely insight into a company's financial condition, allowing investors to make informed decisions based on current facts rather than outdated information. When investors have access to consistent and reliable data, markets function more efficiently, and all shareholders, large and small, benefit from a more level playing field. Reducing the frequency of reporting would also weaken corporate accountability. Quarterly reporting requires management teams to regularly explain their performance, address challenges, and disclose material developments. Without these periodic checkpoints, problems could remain hidden for longer periods, increasing the risk of unpleasant surprises, financial mismanagement, or delayed corrective action. Investors deserve timely updates on the companies they own, not information that may be months out of date by the time it is disclosed. History has already shown that moving away from quarterly reporting is not the solution some claim it to be. Similar ideas have been proposed and tested in the past, but they failed to gain traction because

investors, analysts, and regulators recognized the value of frequent, standardized disclosures. The concerns raised then remain valid today. Reducing transparency did not improve market efficiency, and there is little evidence that it would do so now. We should learn from those past efforts rather than repeat them. Eliminating quarterly reporting risks creating information gaps, encouraging speculation and rumors, and ultimately undermining the trust that is fundamental to healthy capital markets.
Jody Gayhart

Marietta, GA

Joe — Jun 16, 2026
Subject: File No. S7-2026-15 From: Joe To the SEC: As a retail investor, I strongly oppose reducing public company reporting requirements from quarterly to semiannual reports. Quarterly reports provide important transparency and help level the playing field between everyday investors and large institutions. If companies only report twice a year, investors will have less timely information and will be forced to make decisions with less visibility into company performance. The U.S. markets are respected because of their transparency. Reducing reporting frequency would weaken investor confidence and make it harder for retail investors like me to evaluate the companies we own. I urge the SEC to maintain quarterly reporting requirements. Thank you for your consideration. Joe

---

Joe Hillebrand none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Joe Hillebrand I think the proposal to reduce the required disclosures is a terrible idea. Investors and Americans deserve more transparency, not less. This has been tried before and failed to achieve any of its stated "goals."

Joe Maurer Just an Investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: Joe Maurer Why can't each company decide how they want to report quarterly or semi-annually? I think the SEC can require a minimum of annually or semi-annually and each company can decide to report more if they choose. The people and the market will provide companies with information to make their own reporting decisions within the regulation.

Joe Slug — Jun 16, 2026
Subject: S7-2026-15 Comment From: Joe Slug Affiliation: Jun. 16, 2026 Quarterly reporting promotes transparency. The financial environment today is ripe with corruption. We need to maintain and improve transparency so quarterly reporting is critical.

Joe Tirado — Jun 16, 2026
Subject: S7-2026-15 From: Joe Tirado Affiliation: Jun. 16, 2026 Changing this from quarterly to semi-annually makes it easier to cheat!! I learned a long time ago if it ain't broke you don't fix it because that just makes a mess leave it alone the way it is!!!

John A Dysart — Jun 16, 2026
Subject: File No. S7-2026-15 From: John A Dysart At first blush, this is one of those ideas that seems like a good thing. But with deeper analysis, it is actually quite the opposite. The actual cost savings to public corporations would be minimal. Companies would not be able to reduce staffing, and if they did, it would undoubtedly result in a reduction of internal accounting controls, which would be a seriously bad thing for investors and the economy as a whole. The existing quarterly pace of financial reporting keeps company staff, processes, and systems in good working order. I come from a software development background, where one of our mantras is "if something is difficult or painful, do it more often", building on the "practice makes perfect" idea. Doing something often encourages developing the skills and systems that ultimately make the task easier improve the result. On the negative side, investors would lose fully half of the information we rely on today to judge how our investments are performing. Successful investing depends on identifying opportunities and warning signs before they manifest in security price movements. The SEC mandated 10-Q reporting improves the ability for investors to "skate to where the puck is going, not where it has been". Furthermore, the 10-Q reporting cycle helps even the playing field for smaller individual investors. Mega-scale investors and insiders already have enough advantages in the markets... the SEC should not make moves that give them even more of an edge. Finally, this idea has already proven itself to have no measurable effect on corporate investment behavior -- semi-annual reporting does not in fact encourage companies to make longer-term management decisions. Well-run companies have no problems with quarterly reporting. Every company in the S&P 500 has filed quarterly reports for decades... and last I checked, the S&P 500 is doing pretty well, up over 75% in the last five years. For these reasons, I believe that the SEC to make no changes to the existing quarterly reporting requirement for US public companies. Thank you for your consideration of my comments.

John B Stock — Jun 16, 2026
Subject: S7-2026-15 From: John B Stock Affiliation: Jun. 16, 2026 This is not the moment! The wealthy and powerful are being called a single elite by some, and are singled out for specific actions by their companies. That specificity tells me that even normally passive observers are more aggressive in their attitudes. While I have not heard any talk of specific punishment in the discussions I have heard lately, I have heard anger and even outrage.

Personally, I look for balance in our regulatory regime. However, one statement I heard recently alarmed me and stuck with me because it sounds like the 1890's or 1930's "anti-monopoly" movements. It goes something like this: "The wealthy and powerful have the best accountant's and lawyer's advice as to how to cheat the system or at least bend it to their advantage. They don't need anymore loopholes. It's the other 95% of us that are being left behind that need help"

For these reasons, I believe nowisnot the time to relax scrutiny over corporations.

John Barrett President of small business and investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: John Barrett Contrary to the argument that quarterly reports makes companies short term focused, I would suggest that quarterly earning forecasts are the problem. Showing your actual results keeps investors informed…setting short-term goals is short-term focus. More importantly, having quarterly results for public companies gives me the confidence to pay what I think a stock is worth…even late in a quarter….near the end of 6 months will have me wanting a discount for the stock due to lack of recent performance information. Finally, enforcing quarterly reporting keeps the US markets as the gold standard around the world, mostly driven by transparency and rule of law.

John Becker — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Becker Affiliation: Jun. 16, 2026 Keep It Quarterly!

John Bromels Freelance Contractor for The Motley Fool — Jun 16, 2026
Subject: File No. S7-2026-15 From: John Bromels As a financial writer and an individual stock market investor, I rely on quarterly earnings reports not only to provide timely, verified information to my readers, but also to inform my personal investment decisions. A shift from quarterly to semiannual reporting would double the information gap between insiders and ordinary shareholders. Not only does this disadvantage individual investors like me, but it fosters uncertainty and mistrust, as well as opening up stocks to more volatility as potential financial issues are hidden from investors for a longer period of time. I am strongly opposed to such a change. In many ways, this appears to be a solution in search of a problem. Both three- and six-month timeframes are considered "short-term" time horizons in the investing world. Management teams who are currently prioritizing short-

term gains by looking three months ahead to the next report will still prioritize short-term gains if they look six months ahead to the next report, while investors will need to wait twice as long for critical information that informs their long-term investment choices. However, there's no evidence it will even have this intended effect. Research from the CFA institute, which studied the impact of less-frequent reporting in the UK's stock market, showed that reporting frequency had no measurable effect on corporate investment behavior. In fact, less-frequent reporting might give management teams leeway to become more reckless, trusting that a one-time misstep will be easier to bury in six months of corporate activity than three. Every company will still need to keep track of all these numbers anyway. They may not have to report them as frequently, but they will still need to tabulate them as part of their accounting. Thus, there will be minimal expenses or time saved as a result of this change. If a CEO doesn't want to do an earnings call every three months, nothing is requiring them to do so. They could follow the lead of NVR -- one of the nation's largest homebuilding corporations -- and put out a six-page press release every quarter containing their financial statements and other key information, and call it a day. If, indeed, corporate America and the U.S. stock market are somehow being held back by the requirement to report earnings four times a year, someone ought to tell the U.S. stock market, which is currently at an all-time high after a record bull market. The S&P 500 is up 77.5% over the last five years, and more than 10% year-to-date, with every company on the index providing quarterly reports. Chairman Atkins suggests in his May 5 statement that quarterly reporting is somehow disincentivizing companies from going public. Yet SpaceX just had the largest IPO in history knowing it would be required to file quarterly reports. Meanwhile, AI companies Anthropic and OpenAI are practically racing to schedule their IPOs and begin quarterly reporting. So far in 2026, there have been 171 U.S. IPOs, a 13.3% increase from this point in 2025. Clearly, there's no shortage of interest in going public. In short, "if it ain't broke, don't fix it." Please keep requiring public companies to report quarterly earnings to the public. It's good for individual investors like me, and is clearly good for the U.S. economy as well.

John Buckvold — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Buckvold Affiliation: Jun. 16, 2026 This proposal is tbe enemy of transparency and makes a bad situation even worse. I vehemently oppose this attempt to rig the system even more. It reeks of Trump corruption!

ordinary Americans to corporations and billionaires.

John Denton — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Denton Affiliation: Jun. 16, 2026 There is absolutely no good reason to cut quarterly reporting requirements unless the SEC is deliberately rolling back requirements to screw the average investor.

There are so many reasons historically to require quarterly reporting requirements for all investors or portential investors to see. The quarterly reporting forces companies to reveal their position and finances in a way every investor should have and also acts as a forcing function to keep large publicly traded companies from hiding information that investors should know about.

If this action goes through America loses credibility in our markets, and credibility with global investors. We also are more likely to have a series of companies fail without warning. We already know there are too many companies with large loans that are likely over extended. To not have quarterly reports puts too many people at risk.

-John Denton

John Floyd — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: John Floyd Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
The way i look at it the quarterly reporting is how retail investors like myself make informed decisions. We already play on an uneven playing field as it is. Don't make it MORE UN-EVEN! What's the trouble with quarterly reporting anyway? Why do they not want to keep it that way? Are they wanting to try to hide things in the future and be sneaky? Or is it an effort thing(like it takes too much effort)? With the help of A.I. quarterly reporting should be faster and easier than ever before.

Should we rely 100% on A.I.? Of course not. A.I. can make mistakes, but A.I. can have the rough numbers and all of the info ready to be analyzed by humans with a meticulous eye. PLEASE DO NOT ALLOW THIS PROPOSAL TO GO THROUGH!!!! Its going to hurt a lot of us. So much negative impacting things can happen in 6 months.
There's my two cents, and that's all Im willing to blindly to throw in without the quarterly filings that me and so many others depend on to make informed decisions with our hard earned money.
Thanks

John Fortson — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Fortson Affiliation: Jun. 16, 2026 I am a regular, retail investor who is losing faith in the transparency and legitimacy of US equity markets. The quarterly reporting requirements are critical to ensure the stock market doesn't become a giant Ponzi scheme. Investors' faith in the US financial system already hangs by a thread; do not give them a powerful reason to flee our markets.

John Grabowski — Jun 16, 2026
Subject: Comment on S7-2026-15 From: John Grabowski Affiliation: Jun. 16, 2026 I am writing to formally express my profound concern and strong objection regarding the recently announced change to extend reporting requirements to a six-month interval.

This significant reduction in reporting frequency will inevitably lead to a substantial loss of market transparency, which is absolutely critical for all stakeholders to make informed financial decisions. Such a move risks undermining investor confidence, potentially resulting in less accurate evaluations of assets and, consequently, a decrease in the overall value of investment portfolios, including crucial retirement accounts. This outcome is particularly concerning given the current economic climate, where financial stability and clear visibility are more vital than ever, and investors are least equipped to absorb additional uncertainty.

Furthermore, it is important to acknowledge historical lessons. Similar adjustments to reporting periods, notably attempted between 1955 and 1970, proved to be detrimental and ultimately unsuccessful, contributing to market instability and investor apprehension during that era. Reintroducing a policy with such a demonstrable negative track record, without robust and compelling new justifications, appears ill-advised and risks replicating past errors.

I urge you to thoroughly reconsider this policy change. Maintaining robust and timely reporting mechanisms is fundamental to fostering a healthy, trustworthy, and efficient financial environment.

Sincerely,

John Grabowski 702-232-3809

John Keeling — Jun 16, 2026
Subject: File No. S7-2026-15 From: John Keeling I am strongly against any move from quarterly reporting to semi-annual. Institutional investors have a lot of access to information that gives them near real-time insights into company performance. Individual investors mostly rely on the 10-Q. Any public company should have sufficient financal process to make quarterly reporting efficient and not create a burden. And I suspect most will still continue to provide quarterly financial reporting to their boards. The problems with companies taking a short-term focus to manage their stock prices with each quarterly report are real. But a move away from quarterly reporting to semi-annual doesn't solve the root cause of that problem at all, but it does disadvantage the individual investor relative to institutional investors. Proper governance, incentives, and executive courage solve for any short-termism market distortions. A remedy that doesn't solve a problem and creates new problems is a bad idea. Removing the quarterly reporting requirement would no doubt result in institutional investors preying on individual investors based on the latter's information disadvantage.

John L — Jun 16, 2026

John Mamon — Jun 16, 2026
Subject: File No. S7-2026-15 From: John Mamon Please do not make this change to semiannual from quarterly. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This proposal will have to material effect on reporting entities and a sever negative effect on shareholders. Again, please do not make this change.

John Mckinzie — Jun 16, 2026

John Naglosky IV Naglosky IV — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: John Naglosky IV Naglosky IV Affiliation: Jun. 16, 2026 Securety exchange is bad for comissions because it doesn't bring joy or create a balanced economy. We need to create a united economy to create a balanced economy. Competion should only be with sports and games. Everybody is a student and teacher on this planet. Everyond should study there skills and talents that they enjoy doing. After strengthening their talents and skills into a job. The citizens should be willing to collaborate with others and work together to split payments equally. Threw out the USA and eventually the world. Instead of having 1president we need to have a group of head leaders of different type of correer groups that can work together and can colaberate. The head leaders will have to work together and work on to create a better market and nation working together from collaborting and working together. The first Sunday of each month people should pay 10% to the poor, people in need. As well as paying a certain amount of money toward social security. Once a month to make it possible for everyone to receive social security. The same go with reversing big pharma. Scientific doctors should be in charge of big pharma. To prescribe these new smart pills that have no side effects to help create a better Helthier and safer nation. Together we can support this nation to help each other to live a freer happier life. We don't need any presidents, king or queens. We just need head leaders who socialize with with other head leaders in there work department. The main head leader of the different work departments will socialize and work together to improve this nation. After 2-4 years each work group will have to vote on a new head leader. From the different work group department. People need money to work yes, but money doesn't bring love. Working together making sure everyone is safe and enjoying life brings love. Blood related or not we all are considered brothers and sisters on this planet. Our family tree starts with Adam and Eve. Lets be the first nation that works together as one. So we are ready when the Lord returns.

John Neal — Jun 16, 2026
Subject: Comment on S7-2026-15 From: John Neal Affiliation: Jun. 16, 2026 John Neal
Lowell, NC
Retired
I do not feel that we should go to just bi-annual reporting but should stay with current quarterly reporting. This I believe provides more transparency for all concerned. I believe it holds companies more accountable to their investors and I am therefore against changing what we currently have in place.
Respectfully,
John Neal

John Nickerson — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Nickerson Affiliation: Jun. 16, 2026 I thought this was a joke. The SEC completely shirked their duty 20 years ago and now they want to to let the banks hide their financial condition for 6 months at a time. This is patently ridiculous!

John Parker — Jun 16, 2026

Yahoo Mail: Search, Organize, Conquer

John Semick — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Semick Affiliation: Jun. 16, 2026 Someone needs to explain how the mandate for quarterly reporting is so onerous and difficult for the affected companies that it needs to be changed to semi-annual reporting. This would reduce financial transparency and be a disservice to shareholders and American citizens. I understand that many of these companies have made pocket-lining contributions to the president and his family & cronies, but that is precisely why the quarterly reporting should remain in place and, of course, precisely why the president and his cronies want it changed. One last thought: If the requirement is changed to a quarterly frequency, how long will it be before it’s changed to an annual, or greater, freguency?

C’mon, folks, just leave it alone. There’s nothing wrong with the status quo.

Take care,
- John Semick, THE Peoria, IL

John Snook — Jun 16, 2026
Subject: File No. S7-2026-15 From: John Snook Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it.

John Stillwell — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Stillwell Affiliation: Jun. 16, 2026 My name is John Stillwell. I think we should actually be increasing reporting frequency, not decreasing. Monthly reporting or even real time 15 minute reporting seems more appropriate to keep competition alive and health in the market. Or are you trying to help rig the system against the American people?

John Sullivan — Jun 16, 2026
Subject: S7-2026-15 Comment From: John Sullivan Affiliation: Jun. 16, 2026 My name is Michael John Sullivan, I am in cute care nurse practitioner working in critical care. As I approach my 59th birthday, making informed decisions on investments is crucial to setting the arc of fiscal security as I approach retirement. If companies are able to maintain their financial disclosures hidden for up to six months, my ability to make informed decisions on how to allocate my financial investments is significantly impacted. This impact could potentially be catastrophic in my financial planning going forward. Why the SEC would consider LESS transparent measures for fiscal reporting is absolutely astounding. My impression of the purpose of the SEC was specifically (but not exclusively) for the protection of individual such as myself. Considering actions that would make our system less transparent is patently in the sole interest of corporations who are not unnecessarily burdened with accurate and prompt reporting. This is an unnecessary measure with significant potential for real harm to real people such as myself. I would urge the SEC to place the interests of the American people over corporate interest and disallow this new measure.

Jonathan Ewanio — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jonathan Ewanio Affiliation: Jun. 16, 2026 Hello SEC,

It is a negative impact on the investing individual to change reporting requirements to every six months. Quarterly statements allows the client to see what their investment performance is and to hold the investment firm accountable. Changing this would be a detriment to the investor and allows the firm to hide behind a shadow, allows for more fraudulent activities and the projective savings are minimal compared to the damage it can enable. Please take on the fiduciary responsibility you require our advisors to adhere to and do what is right for the client!

Thank you,
Jonathan Ewanio
Compliance Officer in Financial Services

Jonathan Fillmore The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jonathan Fillmore I feel like quarterly data is helpful to me as an investor in public markets, and I rely on that data to make decisions with my money. It does not appear that halving the frequency of 10-Q will cause longer-term thinking and acting, based on the UK experience. Please do not reduce the information that I have as an individual investor, when institutional investors have so many more data sources than us already. Thanks for listening to the people!

Jonathan Gage — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Jonathan Gage Affiliation: Jun. 16, 2026 Please retain the requirement for quarterly filings. At the heart of a consumer-based economy that strives to minimize regulations on businesses is the necessity for transparency to investors on how companies are performing so that investors and prospective investors can make informed decisions on financial decisions that are now increasingly vital to individual retirement plans and other financial stability strategies. It is unfathomable to consider requiring publicly-held companies to divulge information

less frequently than it already is!

Joni GARCIA — Jun 16, 2026
Subject: S7-2026-15 Comment From: Joni GARCIA Affiliation: Jun. 16, 2026 SEC, you should keep mandatory quarterly reporting to us investors for continuous transparency, prevent fraud, and detect emerging risks early. Otherwise, we wouldn't know about ballooning debt, failed product launches, or accounting malfeasance. I want my hard-earned money to be where it should be while I'm in the trenches saving people's lives.
Joni Garcia, RN

Juan Calva — Jun 16, 2026
Subject: File No. S7-2026-15 From: Juan Calva I strongly support the #Savethe10Q initiative. Quarterly reports are an essential tool that allow individual investors to evaluate the companies we own using timely, standardized, and comparable information. Reducing the frequency of reports from quarterly to semiannual would widen the information gap between institutional investors, company executives, and individual investors. Greater transparency strengthens trust in the markets; less transparency weakens it. I understand the importance of encouraging a long-term business perspective, but limiting the information available to shareholders does not seem to be the right solution. Individual investors deserve more access to relevant information, not less. For these reasons, I respectfully ask the SEC to preserve quarterly 10-Q reporting.

Juan Turski — Jun 16, 2026

Subject: S7-2026-15 Comment From: Juan Turski Affiliation: Jun. 16, 2026 Juan Turski. Account Manager. This matters to protect transparency, prevent fraud and protect American's investments.

This is Not of Benefit to the Future of the Market, as the Rule will Only deter many Future Investors from even participating in the Market!
Thank You, Each.

Jude Bradley Independent investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: Jude Bradley As an independent investor, I'm concerned by the SEC's move toward allowing corporations semi-annual reporting. I fail to see the need for it, and it would not serve small investors at all, but would instead be a detriment to corporate transparency. I believe studies have indicated that changing to semi-annual reporting shows no advantage for corporate investors. I suggest it would prove disruptive in ways that affect small investors across the board. I manage my retirement myself and rely heavily on the quarterly reports to guide my investment strategy. Why try to fix an unbroken system? It's an unnecessary effort to simplify an accounting practice that has served us well and could potentially create unwieldy amounts of information while not allowing investors to track markers for upspirals/downspirals within a reasonable time. Thank you.

Judi Bruegger — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Judi Bruegger Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Every publicly traded company should be required to abide by the fiduciary standard under that standard this information would be disclosed the Trump administration and the FEC must mandate the fiduciary standard on all investment companies dealing with retirement accounts

Judi Jay — Jun 16, 2026
Subject: S7-2026-15 Comment From: Judi Jay Affiliation: Jun. 16, 2026 I haven't seen a valid reason to change the reporting period. Please keep it as it is!

Judi Z — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Judi Z Affiliation: Jun. 16, 2026 Why the Shift is Dangerous

Information Asymmetry: When public companies release data only twice a year, management holds all the cards. This creates a dangerous knowledge gap where ordinary investors are left in the dark compared to institutional traders or corporate insiders who may have access to alternative data.

Insider Trading: Longer gaps between reports lengthen the window where insiders possess material nonpublic information, significantly raising opportunities for market manipulation and insider trading.
Increased Volatility: In today's hyper-fast markets, withholding business data for up to six months means sudden surprises or missing metrics will likely trigger wild swings and volatility when numbers are finally disclosed.

Historical Precedent: As you noted, when the U.S. shifted from annual to semi-annual reports in 1955 before mandating quarterly disclosures in 1970, research indicates that the cost of capital was higher, indicating that investors heavily penalize lack of transparency.

Sincerely,
Judi Zdziera

Judy Tymick — Jun 16, 2026
Subject: File No. S7-2026-15 From: Judy Tymick I am opposed to changing quarterly reporting to semi annual. I am also opposed to reducing penalties for lying or misrepresenting info on these forms. CEO’s make outrageous sums of money and the least they can do is be held accountable. Information delayed to the public is more difficult to react to. At a time when the president trades 3600 times in three months, because he has access to information and then asking the public to wait 6 months is obscene. Enron should have taught us that information matters. The Trump administration is eliminating regulations, allowing corporations more freedom. There are fewer requirements for them to be good stewards. Quarterly reporting is not a big ask. Protect the public. Hold corporations accountable. Do not ease the reporting requirements, or the penalties associated with false information.

Judy Ziner — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Judy Ziner Affiliation: Jun. 16, 2026 Quarterly reporting is essential. Do not fix what ain’t broke! Keep Quarterly reporting!

Julie Hammonds — Jun 16, 2026
Subject: S7-2026-15 Comment From: Julie Hammonds Affiliation: Jun. 16, 2026 As the CFO of an Arizona-based corporation, I oppose the proposed change from quarterly reporting to reporting every 6 months. It is unnecessary and, for companies that operate above the board like mine does, ridiculous to change it. The only companies that will benefit are those that are poorly run or that are acting in contradiction to the law and want to hide that fact for as long as possible.

~Julie Hammonds

Julie Kessler — Jun 16, 2026
Subject: File No. S7-2026-15 From: Julie Kessler I am an individual investor and a member of the Motley Fool community. Please do NOT change the company reporting to semi-annual from quarterly. As an individual investor I use the quarterly reporting extensively in making decisions regarding my portfolio. Quarterly reporting: 1) protects investors by providing transparency 2) quarterly reporting has garnered trust from investors and has led to all time highs. Personally, I own some stocks that I would not have the confidence to hold without the quarterly reports as I wouldn't trust the direction that was being taken for such a long period of time and would be forced to sell without information. 3) transparency should be the goal when investing our money. Changing to a semi-annual system takes away transparency and leaves us without good information to make decision. Julie

Julie McEvilly — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Julie McEvilly Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Less transparency means more fraud. Retail investors and tax payers usually bear the cost of business fraud. These rules were designed thoughtfully to protect investors from fraud and they should not be rescinded.
It us important for investors to have access to important up to date financial and other relevant information about companies they are investing in. Otherwise they are flying blind.
Part of why the whole world invests in the US is because we protect investors. If the US becomes more corrupt and less transparent investors will pull their money and invest in more stable and secure markets. We don't want to encourage less investment in US companies.

Subject: S7-2026-15 Comment From: Jv Hoffman Affiliation: Jun. 16, 2026 Increasing the time between reporting will negatively affect my economic outlook by hindering my ability to make informed decisions

---

Jvn — Jun 16, 2026
Subject: S7-2026-15 Comment From: Jvn Affiliation: Jun. 16, 2026 Whenever rule changes such as this are proposed, the very first question should be, "Who, actually, benefits the most from this change?" This option was tried, and failed, in this country before. Regulations are not always a bad thing. Since the massive turn to deregulation 45+ years ago, this country has seen an horrible denigration of the business model that would make semi-annual reporting a disaster for the investor, while unscrupulous business operators could do irreparable financial harm to those same investors due to a gross lack of transparency and mandatory reporting. Fraud, embezzlement, and fiduciary irregularities can, and will, be hidden from investors for too long to correct it. This "experiment" has failed here, it is failing in other countries where it is being tried, so why are you considering the definition of insanity as a "better way" forward? What different outcome do you expect? Or, perhaps, you are intentionally trying to undermine, and collapse, our economy for other nefarious purposes? If companies find reporting their financials quarterly so onerous, the question of ANY investor should be "Why?". If their books are not open to their investors on a quarterly basis, which is not a burdensome expectation if there is nothing to hide, then hiding their books for another three months from their investors should not be a welcome change. It builds confidence between the investor and their investment. There is no aboveboard reason to muddy the waters for investors. Any legitimate business operation should welcome such openness to build confidence in their investors to retain them and encourage growth investment. Quarterly reporting has proven to be the "gold standard" of investments. Why would you want to lower that standard?
J. Vancura, Retiree

Kathryn L. Bacon PhD, MPH

K L — Jun 16, 2026
Subject: S7-2026-15 Comment From: K L Affiliation: Jun. 16, 2026 Please do not take away one of the few means the individual investor has to make an informed decision about his or her investments in a timely way. We rely on quarterly reporting to monitor the health of our companies and cannot depend on semi-annual reports to keep a finger on the pulse of a company's health. That can be too late to detect a developing unhealthy trend. You will be putting the small investor at a disadvantage.

K. — Jun 16, 2026
Subject: S7-2026-15 Comment From: K. Affiliation: Jun. 16, 2026 To The Chairperson of the SEC:

Self regulation is not a good mechanism to guarantee honesty and transparency. It opens the door to greater opportunities for fraud and mismanagement of retirement funds like those of hardworking groups of teachers and other public employees. Regular quarterly reporting allows investors to hold companies accountable for their performance, just like we require of our students. It is grossly naive of the SEC to believe that letting an industry govern itself is beneficial or appropriate, especially when it involves the life savings of people who can’t recover from catastrophic losses should their monies be mismanaged. As a retired educator, I disagree strongly with this proposal to make quarterly reporting optional. QUARTERLY REPORTING IS A NECESSARY TOOL TO HOLD INDIVIDUALS AND COMPANIES ACCOUNTABLE.

PLEASE do your job, SEC, and continue to keep the public safe by REQUIRING QUARTERLY REPORTING. Thank you kindly for your thoughtful attention to my concerns.

Smile, relish the sunshine, choose happiness, and ..... Enjoy an amazing Day!

K.

Kaitlyn Carmel — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kaitlyn Carmel Affiliation: Jun. 16, 2026 My name is Kaitlyn Britt and I work at Cleveland State University in Graduate studies. I believe the new rules for quarterly reporting negatively impact me as a holder of a 403B that is held by blackrock as well as fidelity. My concern is that the period of silence of 6 months or biannually would allow corporations to hide financial issues or concerns from the general public but would leave open insider trading and those in the know will benefit while I am left losing money on my retirement investments. We do not have alternative tools to prop up our retirement. We are also regular people without tight connections to the market. We rely on accurate and timely data for the investing companies used by our organizations to ensure they are moving our funds appropriately so that we do not continually suffer losses and can rely on our market-based funds for any post-work life. Wall Street does not get out of quarterly reporting to save a few bucks. The cost to me as a consumer is to great and it leaves open too many doors the fraud, abuse, and tamerping. Do not move forward with less regulation. I need to trust that my investment portfolio is logically balanced. This will challenge that

and I should not be worried about ending up on the street because I don't know the right people to trade ahead of insider markets (nor should I feel like I should have to do something illegal to survive, like get insider info). I am a first generation college student working in public service. Don't leave me penniless in retirement for the greed of others.

I bellieve that reporting should remain quarterly.

Across the world the markets that require quarterly reporting have consistently commanded the richest valuations over decades. The markets that settle for twice a year sit at a discount, where the U.S. also sat during its own short-term semi-annual era (1955-1970).
My new financial advisor recommends the continuation of quarterly reporting to help me determine changes I should consider for my short-term and mid-term investing and withdrawal planning.

For most public companies, quarterly reporting remains the standard recommendation over semi-annual reporting due to higher analyst coverage, greater investor trust, and better market liquidity.

Karen Blackwell — Jun 16, 2026
Subject: S7-2026-15 Comment From: Karen Blackwell Affiliation: Jun. 16, 2026 Quarterly reporting forces companies to be and stay transparent. In an age where technology is changing rapidly, companies are used to reporting and most have sophisticated ERP systems that make the quarterly reporting almost effortless. I have worked in corporate America for over 40 years and have implemented many of these systems. Quarterly reporting does not increase their costs but serves to keep them on their toes, stay honest with their results, and limits the ability to play games with stock prices.

Thank you,

Karen Blackwell
Retired Director of IT and Business Operations

Karen Calhoun — Jun 16, 2026
Subject: S7-2026-15 From: Karen Calhoun Affiliation: Jun. 16, 2026 The pervasive and detrimental impact of financial fraud demands immediate and comprehensive action. It is my firm conviction that enhanced measures for transparency and accountability are paramount to safeguarding our economic integrity and restoring public confidence.

I strongly advocate for the establishment of more rigorous and frequent oversight mechanisms, specifically suggesting a mandatory quarterly reporting standard across relevant sectors. Such a proactive approach would significantly bolster efforts to detect and prevent fraudulent activities before they inflict widespread damage.

Moreover, the legal framework must unequivocally reflect the gravity of these offenses. Perpetrators of fraud should be subject to substantial punitive measures, including significant custodial sentences, to serve as a powerful deterrent and to ensure justice is adequately served. Concurrently, an aggressive and dedicated process for asset recovery and victim restitution is critical. It is imperative that all feasible steps are taken to trace and return misappropriated funds to their rightful owners, thereby mitigating the financial harm suffered and reinforcing the principle that illicit gains will not be tolerated.

Karen Walker — Jun 16, 2026
Subject: S7-2026-15 Comment From: Karen Walker Affiliation: Jun. 16, 2026 Informed investing matters. Timely information matters. Investors deserve to know how companies they want to invest in are performing. DO NOT change that information frequency to anything less than quarterly. It harms the public.

Karin Sinniger Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Karin Sinniger Investors need and deserve more transparency not less. The UK went down this road and it didn't lead to UK companies being more long term minded: they just pocketed the cash savings. With AI, it is easier and cheaper than ever for companies to prepare the requisite filings, so why reduce them?

Karin Ward — Jun 16, 2026
Subject: SEC formally proposes Rule S7-2026-15 From: Karin Ward Affiliation: Jun. 16, 2026 My name is Karin Elaine Ward. I am an attorney for another federal agency. I am in favor of maintaining quarterly reporting for companies on US exchanges. The UK and EU have already studied the issue of semi-annual reporting and they found no meaningful improvement in long term investment behavior. If you are trying to encourage long term investment behavior then you need to initiate discussions with the financial industry about how to educate the American population of the long term benefits of capital investments in the stock market. My father's first job out of college was as a gym teacher in Chicago, Illinois. He then started a job as a Coca-Cola salesman just as segregation was coming to an end. He always received a portion of his salary in Coca-Cola Stock. Throughout his 25+ years with the Coca-Cola company he never touched his stock until he had to pay for my college tuition. He liquidated his Coca-Cola stock and created a portfolio under the guidance with an investment manager. With those funds my parents were able to retire in physical and financial comfort. They really had the retirement of their dreams. It was more than they ever could have dreamed of when they were growing up in segregated communities in Knoxville, TN. Part of what helped the value of my father's stock to grow were the Cola Wars between Pepsi & Coca-Cola in the 1980s and 1990s. Coca-Cola' stock doubled as the stock split and tripled which is highly unusual for a stock. The key in attaining greater value from the Coca-Cola stock besides buying low was my father's ability to just hold the stock for over 20 years. When i was in middle school, my 7th grade teacher at Plum Grove junior high in the Chicago suburbs, wanted all of her students to learn how to build stock portfolios. At the time either the New York Times or the Wall Street Journal used to have a stock portfolio contest where professional and amateur investors had an opportunity to build a $100,000 mock stock portfolio. The performance was followed for about 4 to 6 weeks and then a winner was declared. Can you imagine the bragging rights on winning that contest. As students we did not enter the contest but we could sit on teams in our classroom and we could play along to create portfolios and watch out performance for the length of the contest. And we could compare our performance to those who were competing in the contest. My whole point with this story is not to just brag about my dad but to say if you want to encourage long term investment among the American population it begins with educating the American population. I have been able to learn about stock investing in school. I have worked for an investment management company in Chicago called Holland Capital Management where I could speak with investment managers and research analysts

about their stock picks to see what they valued. I have even volunteered with the Securities and Exchange Commission after my first year of law school at Howard University school of Law. All of those experiences convince me of the value of quarterly reporting. When I worked at Holland Capital Management, not only did they pour over the quarterly reports issued by companies and participate in dog and pony shows sponsored by public companies. They also poured over the comments provided by Alan Greenspan who headed up the Fed at the time. We all know the speeches of those from the Fed are cryptic. My concern is that is you change from quarterly to semi-annual reporting then you are changing the nature of company reporting. I am concerned that company reporting may become as cryptic and challenging to decipher as fed press conferenes and speeches. I am certain you know of many ways to address long term investments but I throw my hat in the ring of encouraging greater efforts to educate the American population of the benefits of equity and bond investments.

But back to what happens when there is a change from quarterly reporting to semi-annual reporting, there is greater stock price volatility and over reaction when company reports are issued. Singapore which is a country where semi-annual reporting was implemented is currently trying to reverse course.

Compliance savings will be modest. There is a concern about legal and accounting fees as these fees only continue to rise. But those costs are modest in comparison of the cost of allowing scandals to linger and fester fro 6 months. There is a lot that can go wrong in 6 months but I suppose we know from scandals in the past whether they are Enron or Worldcom or Adelphia, the issues linger for years in plain site until the wheels come off the company and it tanks. I feel having quarterly reports helps to investigate those issues. If we move to semi-annual reporting there will be less information to determine what went wrong or what was hidden. YOur organization knows better then I do how you go about investigating a company when there is fraud or improprities, but certainly having a wealth of financial data filed with your organization must be helpful for determining what went wrong. Quarterly company reports should be maintained.

We have to be the wall that prevents a rush to the bottom when it comes to securities regulation. To argue that there is a global standard does no one any good if we do not address whether that global standard is the appropriate qualitative standard. The United States has one of the largest capital markets in the globe, for that reason so we ensure adequate oversight of the capital markets we should maintain quarterly reports. Rigourous discussion should be had regarding whether the volume of trades and capital that moves through transactions in this country is comparable for those countries who have semi annual reporting.

We have to address the reality that the 10,000 hour rule is real. Most definitely this is the least securities laden argument that you might see. But I am resolute in this concept. The more we do something the better we become at it. Practice makes perfect is the idea here. One of my favorite documentary films is Jiro Dreams of Sushi. It is the story of a Japanese World War II veteran who returns to his home after World War II and he opens a sushi restaurant. Every day he wakes up, goes to the fish market, selects his fish for day, he returns to his restaurent to prepare the meals for the day. At one point in the film, Jiro says success is doing the same thing every day. Jiro Ono is a Michelin 3 star chef. He turned 100 years old in 2025 and he continues to do the same thing every day. At some point when he passes away one of his sons will take over his restaurant. My argument with this story is that we should not do less. We should do more or at the very least remain as we have it with our current quarterly reporting process. We gain a certain expertise by doing the same thing every day. We gain expertise, skill and craftmanship when we maintain what we have created. There is a certain predictability which businesses like. We (businesses and indivdual invstors alike) are familiar with the quarterly reporting process. I worry about how people may take advantage of

the semi annual reporting process. The 10,000 hour rule is real there are no short cuts. When we reduce from quarterly reporting to semi-annual reporting we reduce the number of hours we can accrue in developing expertise in this craft. I would encourage us to maintain the quarterly reporting process. I have nature photography as hobby. This is another area where the 10,000 hour rule becomes apparent. The more nature photos i take in various types of light of various types of topographies the better i become at the craft. More in some respects is better than less.

Ultimately why do I care. Some of pondered that if there are fewer company reports it will change the trajectory of the stock market. Some state it could result in lower performance redults. As someone who spent about 20 years being underemployed in retail jobs before returning to an attorney position. I like many others have made our investments into the capital markets by relying on information contained in quarterly reports. At this point, I am investing as much as i can in the capital markets to just have a normal retirement. To be able to have a home that is paid off and to be able to take care of medical costs. I am a single female who more than likely will not marry at this stage of my life since I am in my late 50s. I have 15 years left to work and save for my retirement. Certainly I am vested in my projections. But my projections are based on a quarterly reporting process not a semi-annual process. I worry about the instability (price volatility) that will be introduced into the capital markets with a new reporting process that investment managers have to learn to manage that investors have to learn how to manage. I am concerned about this volatility when we have relative stability in our capital markets. Reliability can be good. So, I am concerned because I am an investor in the capital markets and I hope to have enough money to retire. Nothing lavish. I hope to grow my own vegetables. I hope I have a home with a yard somewhere in the Midwest with a garden. I hope to garden year round (a small greenhouse). Nothing lavish. I care because it impacts my future as well as other investors.

Sincerely, Karin E Ward

Katharine Hoover — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Katharine Hoover Affiliation: Jun. 16, 2026 Katharine Hoover, retired teacher, Oklahoma First, If the SEC continues to follow their primary mission, they will continue requiring quarterly earnings. Those times the current president was able to alter corporate earnings for borrowing purposes and for tax purposes has been discovered, in part, through quarterly reporting. I have become aware that Trump is forcing departments to acquiesce to his demands. He acts as an overlord to every federal agency. I am certain this idea of changing reporting to twice annually rather than 4 times is one that Trump is expecting to occur because it will benefit him personally. History of both methods make it clear there is value for investors and consumers. I am a retired teacher in a staunchly conservative state. It is also last in education and teacher's pay, as well as a few other areas. One area that has survived by being separate from the state is teacher retirement. However, investments effect us too, esp as the president does things that hurt revenue, social security, and whatever might help any of us. His mercurial behavior, his

demands that make no sense, his lies about everything, make this country weaker, poorer, cheaper. Don't make decisions based on what our mad-man in charge wants. I can't afford any retirement losses, please don't decide to make it harder on all the retired people. We don't have time to make it up.

Katherine Brandt — Jun 16, 2026
Subject: S7-2026-15 Comment From: Katherine Brandt Affiliation: Jun. 16, 2026 My name is Kate Brandt and I work for the City University of New York. As a 65 year old close to retirement, I will be reliant on a portfolio built on stocks. Quarterly reporting is one of the ways government can keep companies accountable to those who own these portfolios. Please do not remove laws that protect citizens, especially in this precarious economy,

Kate Brandt

Katherine Brzozowski — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Katherine Brzozowski Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
I believe the quarterly reporting of publicly traded companies is essential to a stable and healthy market. Companies owe investors a clear eyed view of their finances and businesses performance. It holds them accountable and is good for media, investors, and industry. Media write stories using this data and that helps traders make informed choices. Investors can feel secure putting money in a business because they can see the reports for themselves. And industry can see how their peers are doing and make better market choices according to trends and competition.

information is power. Don't let big business hide their books from investors.
Thank you for reading. Kat B.

Kathleen Vernacchio — Jun 16, 2026
Subject: S7-2026-15 From: Kathleen Vernacchio Affiliation: Jun. 16, 2026 Kathleen Vernacchio Homemaker

Maryland

Quarterly reports are important because they force CEOs to be accountable for the companies they oversee. Responsable individuals want to know that the companies they are investing in care enough to be vigilant about how their companies are doing business. A lot of people these days receive their correspondence electronically so I don’t see any undo burden for these reports to remain quarterly.

Kathleen Vernacchio

Kathryn Brencick — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kathryn Brencick Affiliation: Jun. 16, 2026 I'm seriously considering pulling completely out of the market because of so much insider trading. The proposed six month reporting might just put me over the edge. I think you should not approve this. Seems to benefit corporations over investors. That's my two cents. Thanks for your time.
KLB 75 yr old retired.

Kathryn Guggenmos none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Kathryn Guggenmos I do not support the proposed change allowing public companies to file financial reports twice a year instead of quarterly. The SEC's own data shows that individual investors own the majority of shares in smaller public companies, the ones most likely to take the new option. We would lose the most information about exactly the companies we own. If companies expect individual investors to trust them with their money, they should gladly provide us quarterly reports for the sake of accountability.

Kathryn J Patton Age 79, Retired RN — Jun 16, 2026
Subject: File No. S7-2026-15 From: Kathryn J Patton The NYSE’s standard is Quarterly. My investments allow me to stay in my own home which needs continual upkeep to maintain its value.

Kathryn Myers — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kathryn Myers Affiliation: Jun. 16, 2026 Are you serious? How many more ways can companies find to screw over those who invest in them. You make enough profit without screwing over investors. Keep quarterly reports! Actually, monthly would be even

better!

Thank you,
Kat Mye

Kathryn Sheppard — Jun 16, 2026

Kathy Haywood — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kathy Haywood Affiliation: Jun. 16, 2026 My assessment of the proposed strategy reveals significant concerns, particularly regarding its viability for individual investors with limited capital. Drawing from historical challenges, notably those encountered in the 1970s, I believe this approach poses undue risk for smaller portfolios. The current economic climate only exacerbates these inherent vulnerabilities, making it difficult for non-institutional investors to navigate effectively without advanced resources. Therefore, I cannot support its adoption and instead advocate for more stable, transparent investment models that better protect all participants.

Kathy MacCarthy — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kathy MacCarthy Affiliation: Jun. 16, 2026 It is important to keep SEC reporting by companies quarterly so that there is less opportunity for everyday investors to be taken advantage of by big corporations and less time for fraud to balloon into a greater disaster for investors, e.g. Enron. A lot can happen within a company in six months that should not be hidden from everyday investors. The “optional” aspect is a sham and I am sure everyone knows it would not be optional for long but rather soon become the norm for all businesses which would not be good for consumers. Any potential savings from less frequent filing would be relatively small and most likely end up in the company’s pockets and not the investor. I am retired and depend on the money I have been saving and investing all my life to continue to live a productive and fulfilling life. I have witnessed big corporation fraud and the 2008 fallout and don’t want to risk similar situations in the future. Maintain quarterly filing by public companies. It is not right that while the executives, lawyers, and big institutional investors still know exactly how the business is doing, investors like myself would be the last to find out. This is a huge disadvantage that I am sure the SEC is aware of. Thank you.
Kathy MacCarthy, Social Worker

Kaylie Simpson — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Kaylie Simpson Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
In this day and age, why on Earth would we want less transparency? The people have been demanding transparency in every aspect of our lives. For a while now. The people have spoken and you need to get on board because you do not act independently from the market, it is your job to monitor that market. There is no benefit or logic to cease doing quarterly reports. I was a bookkeeper beginning in middle school and going on for a good 10 years or so and I want a paper trail always. The people are demanding transparency and the receipts and paperwork from all of our institutions in America. Right now. We are out in the streets marching for it all the time. There is no logical reason or beneficial reason to not do any accountability reporting for 6 months at a time. That is too long, as you well know what can happen to a small business in 6 months time. It only means less accountability, lets sloppiness & fraud in the door. Why would we make CEOs less accountable right now, especially? This opens the door for not only the employees, clients, but, also the investors to be defrauded, lied to, & ripped off.
I have given you very solid reasons to reject this disgusting proposal. And of course, you do realize that every single individual that reaches out to you does so on behalf of their their community, family, & friends. I'm just the educated loudmouth of my small Alaskan town. I have 2 college degrees and lots of experience managing businesses and keeping paper trails. These companies, the large ones have more impact than the little welding shop I used to do everything for. I see no reason why they

should get away with defrauding people, and I would hope neither does this body.
If you have any logical arguments to my points, please email me at brujamuerta666@gmail.com
Thank you for your time,
Kaylie Simpson

Kelly Bushouse — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kelly Bushouse Affiliation: Jun. 16, 2026 Reducing how often companies only reduces transparency and puts consumers at greater risk for exploitation and for losing our HARD EARNED SAVINGS. The government can’t keep selling the message of “if you

work hard then you'll be able to have a fulfilling life" when we ARE working hard but can't make a livable wage because corporations and their greed for even MORE endless profits. We can barely afford to have savings, but we invest it in corporations because that's the thing we've been told to do to grow it the fastest.
We're told to work hard, save our paychecks, and invest but now you're shooting that ability in the foot. But instead, corporations are prioritized over us just so they don't have to be as transparent and we lose money.

The American government is supposed to be FOR THE PEOPLE not for corporations. And this administration clearly only cares about corporations.

Kelly Bushouse

Kenenna A. Oladokun — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kenenna A. Oladokun Affiliation: Jun. 16, 2026 Dear SEC,

My name is Kenenna A. Oladokun. I work as the Director, Young Lasallians for the Lasallian District of SFNO and I am a resident of Georgia. Over the course of my years working, I have been able to consistently put money away for retirement and have been able to see my investments grow. One key factor that has allowed my investments to grow to the extent that they have is the market transparency afforded by quarterly reporting. The transparency and information provided by quarterly reports allows investors like myself to make well informed decisions. That is why the practice of required quarterly reports must remain in place. More information is better, it makes for a more nimble market, both for companies and for investors like myself.

Thank you for time and attention to this,
Kenenna A. Oladokun

Kenneth Day — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kenneth Day Affiliation: Jun. 16, 2026 Isn't it time to STOP giving the big dogs permission to steal from the little guy? You know how this works, or doesn't work, for the least among us ! It is a continuing opportunity for wage theft. And you also know that in the name of capitalism, you and they can rationalize, anything. They have convinced themselves, and

you apparently, that to make money is the only objective in life and robbing those who actually create the labor, make the real effort to create wealth for them are somehow just cogs in the wheel of production. The opportunities for the little guys are controlled and consciously squeezed by corporations who supposedly "take the risk". The only risk nowadays is to the very life of the little guys and their families. Little health care, only costly chances for education, actual destruction of the very environment we require to have life at all. They have proven time and time again that they can't resist the temptation to enrich themselves and leave the little guy in peril everyday of their meager little lives all while convincing themselves they are just smarter at playing the game. You know too that the game is dirty! Please do not allow them the temptation and the opportunity to stack the odds in an ever greater way for themselves. It is evil!

Ker ryn — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Ker ryn Affiliation: Jun. 16, 2026 Do not let every public company stop reporting its results each quarter and disclose just twice a year. We tried this once, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of my life savings.

Kerry Newman

Kerrie — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kerrie Affiliation: Jun. 16, 2026 My name is Kerrie Ganley. I am a 58 year old former teacher and current flight attendant living in California. Quarterly reporting is essential for my husband and I to make smart financial decisions, especially as we prepare for retirement in the near future.

Best regards,
Kerrie Ganley

Kerry L Stevens — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kerry L Stevens Affiliation: Jun. 16, 2026 Kerry Stevens, teacher. Financial reports need to be kept quarterly. This rule was instituted after the Enron fiasco. Reporting twice a year allows corporations like Enron to hide bad practices that people like myself whose retirement plans are invested in the stock market have to pay. The only benefit to reporting twice a year is to corporations and their CEOS who wish to engage and corrupt financial practices that will not impact them on the same scale it will impact everyday citizens.

Kerry Moran — Jun 16, 2026
Subject: File No. S7-2026-15 From: Kerry Moran This proposal creates a problem rather than solves one. Moving to semiannual reporting reduces transparency and information flow, especially for individual investors. Research indicates it will have no measurable effect on corporate investment behavior. This is the wrong direction.

Ketan Patel — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Ketan Patel Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Quarterly reporting helps keep investments honest. Without them the books are cooked. What will soon follow is fake companies. Iay just start a company and publicly trade it to wheel in investor money at this point because it would be a scam. This is why China is winning.

Kevin Bauer — Jun 16, 2026
Subject: File No. S7-2026-15 From: Kevin Bauer Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is absolutely the wrong direction for the SEC to be moving. You exist to protect the investor.

Kevin Boyle — Jun 16, 2026

Subject: S7-2026-15 From: Kevin Boyle Affiliation: Jun. 16, 2026 There is no legitimate reason to allow this other than to assist the greediest people more opportunities to screw the average voter/ citizen.

Kevin Hebl — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kevin Hebl Affiliation: Jun. 16, 2026 Kevin J. Hebl, Retired Attorney. As a stock owner in publicly traded stock, it is important to me that financial information be publicly available on a quarterly basis. It forces management to be more responsive to stockholders, and makes it more difficult to hide poor performance. With computerized record keeping, the administrative burden to generate the necessary records is minimal. Information is power, and without quarterly disclosure, management will have even more power to distort markets and deceive the public, and enrich insiders.

Khan — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Khan Affiliation: Jun. 16, 2026 Dear SEC Commissioners,
I am writing to you as an individual retail investor to urge you to protect the current quarterly reporting system. I strongly oppose any proposal to move public
companies to a semi-annual reporting schedule. Cutting public disclosures down to just twice a year will hurt ordinary people who are trying to build up their retirement and life savings.A lot has changed since the days when six-month reporting was normal.
In today's fast-moving economy, six months is an incredibly long time to go without knowing how a company is performing. If you reduce how often companies have to share their financial health, you will make the playing field even more unfair for everyday investors.
Professional fund managers and corporate insiders will always find ways to track how a business is doing month by month. Retail investors like me do not have those resources. We rely on official quarterly filings to know what is actually happening with our

money.To give you a practical example from my own life, I rely heavily on these filings to manage my modest portfolio. Just last year, I noticed a company I owned was showing a steady, quarter-over-quarter increase in its inventory levels while its cash flow
was shrinking. Because I had access to that quarterly report, I was able to see the warning signs early, realize consumers were pulling back, and adjust my position before things took a turn for the worse. Conversely, I have used strong quarterly updates to
confidently add to my investments when a company proved it was managing its debt well. If I had to wait six months to see those changes, I would have been reacting way too late, likely losing money that I cannot afford to lose.Taking away quarterly updates
will make the stock market much more chaotic for people like me. Right now, quarterly statements allow the market to make small, steady adjustments when a company hits a bump in the road. If we only get updates twice a year, half a year of bad news or missed
targets will hit the market all at once. This will cause massive, unpredictable drops in stock prices that could wipe out a huge chunk of a regular person's portfolio overnight.Furthermore, waiting six months to see a balance sheet means corporate problems,
mistakes, or even outright fraud will go unnoticed for much longer. Regular folks will continue buying into failing or poorly managed companies simply because the true financial state of the business is hidden for half the year.The transparency of the American
market is the main reason why people trust it with their hard-earned money. Forcing regular investors to fly blind for six months at a time will destroy that trust and put our financial futures at risk. Please do not weaken these essential protections. Keep
the quarterly reporting requirement in place.Thank you for your time and for considering the perspective of everyday investors. Sincerely, An Individual Retail Investor
