Subject: File No. S7-2026-15 From: Kim Dietrich I am an individual investor and believe quarterly reporting protects individual investors like myself. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. Please do not change the quarterly reporting requirements. Thank you for the opportunity to comment.

Kim Everett — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kim Everett Affiliation: Jun. 16, 2026 Absolutely no on rhe semi annual reporting. More transparentcy not less. Investors deserve quarterly reporting.

Kim J Dotiwalla — Jun 16, 2026
Subject: S7-2026-15 From: Kim J Dotiwalla Affiliation: Jun. 16, 2026 Good Morning,

I strongly request that my investment be FILED quarterly as a check and balance against greed and corruption. The ENRON failure was disastrous, laws were placed for a reason, stiff consequences

create safety rails that work well.

I can't afford to lose a dime and this quarterly review of my filed investment gives me the confidence and trust to grow my life's savings. It holds accountable the CFO and CEO by placing something just as precious to them on the scale for balance….years of their lives in jail.

Absolute Nonsense trying to change this law after history has handed you all the lesson.

Thank you for maintaining the law.
Mr Dotiwalla

Kim Person — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kim Person Affiliation: Jun. 16, 2026 Kim Person - Virginia and I do NOT support this change. Quarterly reports protect average individual investors and by eliminating this one check on nefarious corporate actors by protecting any and all changes in corporate structure, massive declines in revenue or profit. This move hurts the general public by allowing companies to effectively “dupe” their shareholders. I strongly disagree with this move. The SEC must protect individual investors therefore we must maintain quarterly reports.

Kim Person

Kim Rabon — Jun 16, 2026
Subject: S7-2026-15 From: Kim Rabon Affiliation: Jun. 16, 2026 Why fix it if it isn't broke. We need more transparency for corporations, not less. Walmart is a good example. The Waltons make so much money, but pay their employees so little that they must depend on government help. This is so wrong!
Keep them reporting more often.

Kira Steinberg — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Kira Steinberg Affiliation: Jun. 16, 2026 Hi SEC - I'm Kira Steinberg, a financial analyst in Atlanta, GA and a retail investor [both through retirement accounts and other investments].

It is important to me that companies are required to report quarterly rather than twice a year, as this increases rigor & transparency. As a retail investor, I rely on regulation & systems of governance like this one to ensure I can trust a company with my assets, especially as I do not have the time or resources that a larger investing firm does for independent, timely research. I appreciate that this would be an opt-in adjustment, but that does not meet the standard of transparency that is important to me.

Thank you for your consideration.

Kirsten Englund — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kirsten Englund Affiliation: Jun. 16, 2026 Dear SEC Representatives,

Longer reporting periods is more time for out-right mistakes and fraud to happen. We DON'T need that! Please don't let that happen. Stay on the ball with 3 month reporting periods.

Kristen Ryan — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kristen Ryan Affiliation: Jun. 16, 2026 Companies need to be held accountable by continuing quarterly reports. It’s a mistake to change it; too easy for them to pull something shady if only 2 x a year!

Kristen Tower — Jun 16, 2026
Subject: S7-2026-15 Comment From: Kristen Tower Affiliation: Jun. 16, 2026 Kristen Tower
Supply Chain Supervisor
Oshkosh, Wi

In order to keep check and balances in line for not only stockholders but also for the general financial market consistent quarterly reporting is needed to ensure a business is performing at the levels their stock and overall business is valued at in the market. We do need companies on the verge of financial distress attempting to overstate their success in order to dupe the public and their investors.

Kristi Keilen — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Kristi Keilen Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Main Street Americans need more disclosure from public companies, not less!
Consumers should be able to access accurate and timely information regarding investment decisions and it should not be held back to benefit others or mislead everyday people.
Thank you for your consideration.

Kristi Waterworth — Jun 16, 2026
Subject: S7-2026-15 Comments From: Kristi Waterworth Affiliation: Jun. 16, 2026 Although it might seem logical to allow companies to report less in a bid to increase efficiency, this is going to create a massive disservice to shareholders, for whom the 10-Q is their window into the operations of those companies they're investing in. If anything, they should be reporting more often, but quarterly does seem like a reasonable compromise. Please do not allow companies to deny shareholders the transparency they deserve.

Thanks
Kristi Waterworth

Kristin Wenderlich — Jun 16, 2026

Kristina Coleman — Jun 16, 2026
Subject: S7-2026-15 From: Kristina Coleman Affiliation: Jun. 16, 2026 Keep the current quarterly guidelines!

Kristina Eddy — Jun 16, 2026
Subject: File No. S7-2026-15 From: Kristina Eddy I oppose allowing companies to officially report to investors less often. I work for The Motley Fool, helping create content about individual stocks and investing in general. Our readers love to hear about and dig in on what’s happening with companies and stocks, and individual investors everywhere can only benefit from having a lot of information

about the companies they invest in or are considering investing in. They've got the tools to process the information and are – rightly -- eager to learn as much as they can before deciding where to invest their money. Allowing companies to reduce their public reporting would create larger gaps in knowledge, as the reports could stretch to every six months, and this would increase uncertainty and speculation as investors wait for the company's official report. Quarterly reporting makes sense and seems to be something companies are able to handle efficiently.

Kristine Harjes Motley Fool employee — Jun 16, 2026
Subject: File No. S7-2026-15 From: Kristine Harjes I am a professional venture capital investor and have been investing in public equities since 2014. I write to oppose this proposal. My day job involves evaluating early-stage private companies, which means I spend considerable time benchmarking private businesses against public market comparables. Quarterly filings are foundational to that work -- not because I need four data points a year to feel busy, but because trends only become visible over multiple standardized reporting periods. A single semiannual snapshot tells you where a company landed; a series of quarterly filings tells you whether it's accelerating, decelerating, or masking something. The SEC's stated rationale is that quarterly reporting pressures executives into short-term thinking. That hypothesis has already been tested, and it was proven false. When the U.K. dropped mandatory quarterly reporting in 2014 after a seven-year experiment, researchers at the CFA Institute tracked capital expenditures, R&D, and long-term investment before and after the change. They found no effect on corporate investment behavior in either direction. The short-termism didn't abate. The information available to ordinary investors did diminish. If the Commission genuinely wants to reduce executive short-termism, the evidence points to compensation structure and incentive misalignment as the operative levers -- not how often companies file. What concerns me most is the asymmetry of who bears the cost here. Institutional investors have analyst networks, alternative data, and direct access to management teams. Individual investors -- including me, in my personal portfolio -- rely on standardized filings on a predictable schedule. Moving to semiannual reporting doesn't eliminate the information; it just delays and concentrates it in ways that benefit those who already have other sources. The Commission should withdraw this proposal. If burden reduction is the goal, there are better places to look than the disclosure cadence that underpins investor confidence in public markets.

KEEP QUARTERLY REPORTING.

L.N. Tauer — Jun 16, 2026
Subject: S7-2026-15 Comment From: L.N. Tauer Affiliation: Jun. 16, 2026 Regularly communicated information is crucial for managing investments, whether personal or commercial. Cutting the required reporting from quarterly to semi-annually steals an investor's ability to make good financial decisions, especially in the short term, and it tips the investment advantage heavily in company insiders' favor. Reports MUST remain QUARTERLY.

Lynne Tauer
Retired Paralegal

La Nette Young — Jun 16, 2026
Subject: Comment on S7-2026-15 From: La Nette Young Affiliation: Jun. 16, 2026 LaNette Young, retired from corporate management. Currently in Lubbock, Texas. Please do not implement changes that will affect my retirement. It's hard enough to live comfortably,
which means paying bills and buying groceries and gas. We can't go on cruises or foreign travel, oreven very long road trips with prices like they are, so please don't do anything that would deplete our quality of life. Thank you for your consideration.

Yahoo Mail: Search, Organize, Conquer

La-Shell Riester — Jun 16, 2026
Subject: Comment on S7-2026-15 From: La-Shell Riester Affiliation: Jun. 16, 2026 I prefer quarterly reports. How else am I to know where my money is, or is that the reason behind fewer reports? I can't afford to lose any
more than I've already lost.

La-Shell Riester

Lacount Anderson — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Lacount Anderson Affiliation: Jun. 16, 2026 This country needs transparency more than ever. I do not support reporting twice per year.

LaCount Anderson

Lauren Beeks — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Lauren Beeks Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission: The SEC has a stated mission of protecting investors, maintaining fair, orderly, and efficient markets. This is taken directly from your website. Allowing companies to reduce their burden of reporting to their investors is quite contrary to that stated goal. Companies that enjoy the privilege of being publicly traded and succeeding with the help of individual people's support should be held to the highest standards of transparency and information. I am an individual investor. I direct all of my own investments. I am proud of the work I have done to invest in quality companies and grow the wealth that my family has. This safety net of investments allows my family and I to continually contribute to the success of the American economy with our spending. Do not blind the common person for the benefit of the ultra-wealthy, whether in their jobs or to benefit their insider knowldge. This is a short-sided plan that will contribute ultimaltely to even more widespread corruption and the eventual collapse of our economy.

Lauren Santa Ana — Jun 16, 2026
Subject: S7-2026-15 Comment From: Lauren Santa Ana Affiliation: Jun. 16, 2026 Please do not change this rule!! Transparency in business is important. Especially for investors.

Laurie Lettner — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Laurie Lettner Affiliation: Jun. 16, 2026 Dear Commissioners,
My name is Laurie Lettner, and I am writing to you as an individual investor. I have my own money invested in the stock market, and I rely on the current rules to make safe decisions.
I am strongly against the new proposal that would let public companies stop reporting their finances every three months and only report twice a year. While you say this will save companies time and money, I believe it will hurt regular investors like me.
Here is why I need you to keep the old rules:
1. I need fresh news to protect my savings When I invest my hard-earned money, I need to know how a company is doing right now. If I have to wait six months for a report, I won't know if the company is losing money or facing big problems until it might be too late to sell. The current three-month schedule helps me spot trouble early.
2. It hurts smaller companies I might want to buyBig, famous companies get lots of free news coverage. But if I want to invest in smaller, newer companies, those quarterly reports are often the onlyway I can see their financial health. If they stop reporting every quarter, it becomes much harder for me to know if those companies are a good investment.
3. It makes the whole market less trustworthy Many parts of the economy, like banks and insurance companies, use these quarterly updates to do their jobs. If companies stop sharing this data regularly, it could make the whole financial system shaky and expensive for everyone.
4. Trust matters The United States has always had very high standards for telling the truth to investors. If we lower these standards now, it might make people lose trust in the U.S. stock market. I want our market to stay strong and transparent so I feel safe investing here.
My Request: Please do not change the rule. Keep requiring companies to file reports four times a year. My safety as an investor should be more important than making it easier for companies to do paperwork.
Thank you for listening to a real investor who wants to protect their future.
Sincerely,
Laurie Lettner

Lesley Chamberlain — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Lesley Chamberlain Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission: I rely on quarterly reports to make decisions regarding my investments. Not only will less transparency erode the trust of investors, but it will make us less likely to take informed risks that ultimately can help us grow and move forward as a country. Providing fewer investor reports is a very bad idea, and I hope that once you have considered the ramifications seriously, you, too, will reach this conclusion.

Lesley Lymburner — Jun 16, 2026
Subject: S7-2026-15 From: Lesley Lymburner Affiliation: Jun. 16, 2026 Quarterly reporting needs to remain in place. With all the mega millionaires and billionaires in power controlling every American life in one way or another, accountability is more crucial than ever before. While Americans struggle to survive paycheck to paycheck under stressful circumstances such as finding affordable healthcare and housing we see many companies thriving. Please don't change the rules to help the few and do the right thing by keeping the quarterly reviews in place.

Leslie Cunningham — Jun 16, 2026
Subject: S7-2026-15 Comment From: Leslie Cunningham Affiliation: Jun. 16, 2026 Quarterly reporting is essential to keeping corporations honest and allows shareholders to make informed decisions regarding their investments. Our economy is heading towards a very dark period and hiding the financial reality companies are facing is only going to worsen the problem.

Leslie Hellebuyck — Jun 16, 2026

Disabled. This is unacceptable,keep the ruling every three months. I'm on a fixed budget and if my prices go up on food,clothing or just basic needs. This will be hard for me just to get what I need. Thank You for your time.

Leslie Ramsden — Jun 16, 2026
Subject: S7-2026-15 Comment From: Leslie Ramsden Affiliation: Jun. 16, 2026 I am a 63 year-old individual investor, a woman, recently retired. I personally invest, and our personal portfolio is heavily dependent on the stock market to make sure we can stay Retired and make sure we are provided for. The only way I can analyze an individual stock is to use the financial information that is supposed to be provided to shareholders. If you allow companies to delay reporting of losses, that only benefits corporations. How does that benefit the citizens of the United States? This could take down our country. Individual acts like this from government bodies that are supposed to be protecting our citizens but instead are protecting corporations is criminal. Shame on you for even considering this. And do not allow this to pass.
Leslie Ramsden.
Washington state citizen.

Libby Stanton — Jun 16, 2026
Subject: S7-2026-15 Comment From: Libby Stanton Affiliation: Jun. 16, 2026 Libby Stanton, Retired Senior wants to know what the upside is for consumers who make our economy run? Who benefits from this proposed change and who could possibly be hurt? Why is it necessary? If we want our country to be strong economically we must put in place the kind of guardrails that will enable consumers and business to thrive alike. I do not see any mutual benefit in changing disclosures quarterly to semi annually. Consumers will be the last to know when things go south. So, no.

Unless someone like you cares a whole awful lot, nothing's going to get better. It's not. ~ The Lorax

Subject: S7-2026-15 From: lindy felix Affiliation: Jun. 16, 2026 what a hideous and amazingly non-democratic thing to put these HUGE PROFIT MARAUDERS in a place of having it easier to cheat us all. make them report quarterly and prison for wrong doing. I am Lindy Felix, librarian/health therapist, from Lexington Va, and I am so sorry to keep reading and finding out about exclusions to lawfulness by wrongdoing greedy corportations.

LISA — Jun 16, 2026
Subject: Comment on S7-2026-15 From: LISA Affiliation: Jun. 16, 2026 I'm retired after over 40 years supporting the Air Force as an engineering contractor. Quarterly reporting is a must to support and protect the savings of Americans. This proposed change seems to be tilted towards supporting corporations over individual investors. Those of us in my stage of life don't have an opportunity to earn more money to contribute to our retirement savings. Please, I implore you to not change the quarterly reporting requirement.

Thank you,
Lisa Pealer

Dublin, OH

Lisa Buono almost 40 year veteran of securities industry — Jun 16, 2026
Subject: File No. S7-2026-15 From: Lisa Buono I was shocked to learn of this proposal - it is completely nonsensical. Our securities markets run on a 24/7 news cycle and the idea of real, auditable, accountable information to be cut back from quarterly to semi-annually runs completely counter to a modern information-based economy. With current technology, filing a 10Q could not be easier. This proposal runs against the interests of the average investor and will serve to reduce transparency. Other than continuing to slash and burn any regulation "just because," I am at a loss as to how this benefits what the SEC was created to protect.

Lisa Butler — Jun 16, 2026
Subject: S7-2026-15 From: Lisa Butler Affiliation: Jun. 16, 2026 Keep the quarterly requirement for reporting to the SEC. Do not make it easier for dishonest and unlawful agents to disguise or hide their illegal actions.

Lisa Frohmann — Jun 16, 2026
Subject: S7-2026-15 Comment From: Lisa Frohmann Affiliation: Jun. 16, 2026 My name is Lisa Frohmann. I am a recently retired university professor. It is very important to continue quarterly reports because accountability limits fraud, even though this is optional, large corporations set the structure and smaller companies will follow. The supposed savings are small and will not revert to the average American. With the gap between rich and poor increasing the more tools the average person and small time investors has to increase is essential and fair given the increase in corporate profits.

Sent from my iPhone

Lisa Gallagher — Jun 16, 2026
Subject: S7-2026-15 Comment From: Lisa Gallagher Affiliation: Jun. 16, 2026 Quarterly reporting means that businesses are held accountable for poor decisions in a more timely manner – which also allows them to pivot and try to correct the poor decisions in a timely manner. Right now, I had to liquidate all assets as part of a nursing home Medicaid application to pay for my husband's care. I will be continuing to work well into my 70s and will again be able to invest once the application is approved, so I can save more for my retirement. It will be essential to be able to trust the companies into which I invest since in part, my ability to retire and succeed financially will depend on their decisions. I would like to see businesses held just as accountable as I'm being held in this Medicaid nursing home application, where they look back five years at every line item and continue to ask for more information over a nine months span of time. Why are companies with leaders whose job is to oversee financial success to be held less accountable than a psychologist who has worked her whole life to be in the lower middle class?

Sincerely,
Lisa Gallagher, Massachusetts

Lisa Haddox-Heston — Jun 16, 2026
Subject: S7-2026-15 Comment From: Lisa Haddox-Heston Affiliation: Jun. 16, 2026 Quarterly reporting is necessary for the investors to monitor their accounts. Six month reporting could result in losses that cannot be overcome with strategic movement of funds.

Lisa Horn — Jun 16, 2026
Subject: S7-2026-15 From: Lisa Horn Affiliation: Jun. 16, 2026 This reporting must remain quarterly. The risk of fraud is too great.

Loretta Brady — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Loretta Brady Affiliation: Jun. 16, 2026 I have been an investor for twenty five years and have built my retirement through sustained workplace contributions. The proposed move to twice annual reporting from quarterly reporting for companies will reduce my portfolio valuation by at least a third when calculated using models based on historic twice annual reporting. I additionally worry in an era of corporate laissez faire governance that investors will be disadvantaged without greater insight into balance sheets. Please do not roll back the basic reporting standards that have sustained a strong market in the face of volatility. Regular

savers and investors like myself deserve to be able to rely on the returns they have planned around.

Loretta Brady

LORI KELLY — Jun 16, 2026
Subject: S7-2026-15 Comment From: LORI KELLY Affiliation: Jun. 16, 2026 This move will likely raise anxieties among modest investors who will now be cut out from more frequent quarterly reports to adjust their share purchases. Why tamper with a system of reporting that benefits all by making information available in a more frequent,I.e., quarterly manner?

Sent from my iPhone

Lori Merrick — Jun 16, 2026
Subject: S7-2026-15 Comment From: Lori Merrick Affiliation: Jun. 16, 2026 I think changing to allow six month reporting is extremely unsafe for the average investor.

Under the new rule, there is a lot of time for insiders to quietly sell their shares to people before bad news tanks the stock.

This proposed ruling allows more time for fraud to grow. All major modern accounting scandals were enabled by gaps in financial disclosure (Enron. WorldCom. Madoff). Quarterly filings don't prevent fraud, but they dramatically shorten the window in which it can grow before someone outside the company can see it.

I am a retiree and rely on quarterly reports to make decisions about my retirement savings. Allowing reporting only every six months would be an irresponsible change and I strongly oppose it.

Mrs. Lori Merrick, Retiree,
West Chester, PA

Lynn Marie Crofton — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Lynn Marie Crofton Affiliation: Jun. 16, 2026 Following a thorough evaluation of our current reporting protocols and after careful consideration of the proposed modification to a semi-annual schedule, a definitive decision has been made. It has been determined that maintaining our established quarterly reporting frequency is paramount to ensuring continuous and granular oversight of our operations. This cadence is critical for providing timely insights into performance, facilitating proactive identification of trends and challenges, and enabling agile, data-driven strategic adjustments. A shift to a less frequent reporting cycle could potentially impact our capacity for rapid response to evolving market dynamics or internal operational shifts. Therefore, we will uphold the current quarterly reporting framework to preserve our robust analytical capabilities and strategic responsiveness. We kindly request that all teams continue to adhere to this established schedule for all forthcoming reports.

Lynn Millward — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Lynn Millward Affiliation: Jun. 16, 2026 Keep Quarterly Reporting! It helps keep business honest and investors safe!
Markets across the world that demand quarterly reporting command the richest valuations. While markets that settle for reporting only twice a year trade cheap, at a discount.
Accurate and timely financial information is the lifeblood of financial markets. Quarterly reporting enhances investor decision making, increases market efficiency, and lowers the cost of capital. Reducing the frequency of reporting risk curtailing investment. European companies that switched to semi-annual reporting saw their trading liquidity fall while those that kept quarterly reporting did not.

Subject: S7-2026-15 Comment From: Lynn Rennewanz Affiliation: Jun. 16, 2026 Keep the companies in line by reporting quarterly. This helps investors know what's going on and who to trust. If you breakdown trust we dont have anything...

Lynn Richard — Jun 16, 2026
Subject: S7-2026-15 From: Lynn Richard Affiliation: Jun. 16, 2026 I'd like to express concern over the proposed change to six monthly reporting of publicly traded company financials.

The current quarterly reporting with certification by each CEO provides frequent and detailed accountability for investors awareness. Extending these required reporting furthers the accountability of corporations to the very people investing in those companies. The current frequency of reporting was established as a correction to previous poor practice.

Please record and support this submitted request to reject this latest suggestion to lessen accountability on the very companies and CEOs responsible for investments by their shareholders.

Regards,

Lynn A. Richard-

Lynne Gaither — Jun 16, 2026
Subject: S7-2026-15 Comment From: Lynne Gaither Affiliation: Jun. 16, 2026 To whom it may concern:

I am writing to strongly oppose SEC Proposal S7-2026-15. Reducing the financial reporting requirements for public companies from quarterly to semi-annually is a massive step backward for market transparency. As a regular investor, I rely on timely, up-to-date financial data to make informed decisions and manage my risk. Allowing companies to hide their books for six months at a time leaves everyday retail investors completely in the dark while giving corporate insiders an unfair advantage. Please reject this proposal and maintain the current quarterly reporting standards. Thank you for your consideration in this matter.

Lynne gaither

M Wright — Jun 16, 2026
Subject: File No. S7-2026-15 From: M Wright This is a bad idea that needs to be quashed. Prior to this rule enactment, and main reason for enactment, companies publicly traded were only required to report on an annual basis. Unscrupulous companies neglected / refused to show regular reporting of company financials to investors leading to investors and even employees relying on bad or even misleading data to base their investments. It was Enron which tanked so badly the employees and investors lost everything. Company went under, never paid anything towards the losses, no one went to prison for financial crimes and only the top management and lawyers came out with money in their pockets. Quarterly financial reporting was put into law, with legal penalties for top management for failure to report. This was NOT an onerous burden on companies with legal and financial teams. The top management is pushing for this relaxation of the rules because they're bloody lazy. They want to do even less work for the massive salaries they pull in, and be less accountable for their actions. This law resulted in more transparency into the financial health of companies, something that investors and employees should be able to see in order to make better informed decisions about their personal financial status. Do not relax these reporting requirements because big business is lobbying for this. Do the right thing and reject this proposed change.

Marcos Bello — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Marcos Bello Affiliation: Jun. 16, 2026 In an era defined by AI, record productivity per employee, and major advances in automation, the argument that communication must slow down feels increasingly disconnected from reality, even disingenuous. We are operating in the fastest communication environment in history.

Please consider that a consequence of changing SEC reporting guidelines may be a shift toward monthly reporting, which would force C-suites, boards, and senior leaders to spend even more time looking backward rather than focusing on long-term strategy and forward-looking growth.

The current reporting cadence should remain in place. Instead of slowing communication, we should take advantage of the most efficient and transparent reporting environment businesses have ever had.

Marcy Smith — Jun 16, 2026
Subject: S7-2026-15 Comment From: Marcy Smith Affiliation: Jun. 16, 2026 As a CPA, quarterly reporting is a must! Company financials can go sour so quick without someone watching and beng held responsible for their actions.

Marge Pfleiderer — Jun 16, 2026
Subject: S7-2026-15 From: Marge Pfleiderer Affiliation: Jun. 16, 2026 Marge Pfleiderer
Retired. Florida. Quarterly reporting is the norm, and for very good reason. The people who handle my investments rely on that reporting to be more detailed and accurately responsive with my money. The money that I rely on in retirement.
Additionally, you don't have to look too far back for examples of major corporations cheating on their reporting. The less often they have to do it the easier cheating is - and the greater the damage. There is no upside to most Americans for reducing the reporting requirements.

Margie Borsi — Jun 16, 2026

Mari Rovira — Jun 16, 2026
Subject: S7-2026-15 From: Mari Rovira Affiliation: Jun. 16, 2026 It is important to have them continue the Quarterly reporting and reviewing in order to maintain honesty of all financial transactions. As we have seen in previous months, dishonesty exists in all sectors of life. And many have learned to manipulate the system and get away with it, due to their professional background.
Thank you,
Mary R. Sales, Norfolk, VA.

Mari R

Maria — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Maria Affiliation: Jun. 16, 2026 My name is Maria Brown and I live in Syracuse, NY. Like many Americans, my retirement accounts are invested in the stock market. Some I manage myself and some are managed by an investment company. I am concerned that less frequent reporting will impair our ability to react to changes in the market and ultimately impair my ability to save for retirement.

We all know there's a reason for the current reporting schedule. Regulations exist to protect the consumer. Longer periods between required reporting allow companies to hide their financial losses and make it more difficult for regulators to identify problems. This change will make everyone's lives more difficult except for people who have dishonest intentions.

Maria Alvarez de Anda — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Maria Alvarez de Anda Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

Marilyn Petty — Jun 16, 2026
Subject: S7-2026-15 Comment From: Marilyn Petty Affiliation: Jun. 16, 2026 We are deeply concerned by practices that appear to create an imbalanced playing field for consumers. It is fundamentally unjust when individuals are deprived of the comprehensive and accurate information essential for making sound decisions. A genuinely ethical and sustainable business ecosystem requires absolute transparency, where all pertinent details about products, services, and their terms are readily and openly available. Without such critical insight, consumers are left unable to properly evaluate options, compare alternatives, or assess potential risks, leading to choices that may not serve their best interests. This systemic lack of clarity not only erodes consumer confidence but also undermines fair competition and the integrity of the market. We firmly believe that fostering an environment built on candid disclosure is paramount for cultivating trust and ensuring equitable participation for all.

Marilyn Petty

Mark Muraida — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mark Muraida Affiliation: Jun. 16, 2026 Quarterly reporting is a staple of fiduciary duty to the public and shareholders. Any hiding of financials should be considered fraud. There is no reason for this to even be considered by the SEC and just goes to show the normal people that corporations rule the government if it were to pass. Stand up for those who have no lobby interests!

Sent from my iPhone

Mark Peterson — Jun 16, 2026
Subject: S7-2026-15 From: Mark Peterson Affiliation: Jun. 16, 2026 Billionaire CEOs want to get away with more fraud, waste and abuse. SEC needs to be more vigilant, not less. So, keep the quarterly reports.

Get Outlook for Android

Mark Peterson The Motley Fool Community - Major USAF Retired, — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mark Peterson Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. Reg FD moved toward a more level playing field. This proposal moves away from it. As the WallStreetBets comment letter put it: "The companies we trade are not being held back from greatness by the obligation to file four reports a year. ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well."

Mark Pombo — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Mark Pombo Affiliation: Jun. 16, 2026 We all know that Wall Street will push every shady practice they think they can get away with. Of course, they should be held to quarterly reports. It's not even a question, unless you support corruption and white collar

crime.

Mark Rachlitz — Jun 16, 2026
Subject: S7-2026-15 From: Mark Rachlitz Affiliation: Jun. 16, 2026 CEO wage are usually based on the corporations profits. So if they are cutting the corners, say from environmental regulations, their salary will go up and be a red flag for investigation by the SEC. Keep the quarterly financial disclosures for corporate CEOs. If not it will show SEC is not and independent governing body. Then you will have to justify your impartiality and explain why you are not holding Corporation leaders accountable.

Mark Shaw — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mark Shaw Affiliation: Jun. 16, 2026 My names is Mark, Im a licensed CPA. I think it would be a huge mistake to move from quarterly reporting to a less frequent schedule like semi-annual or annual. Investors benefit greatly from 10 Q reports and there is no good reason why larger publicly traded companies should not be able to assemble this information for their shareholders (though I could see the rationale for small caps to be excused from this expensive regulatory burden). In the age where technology makes information easier to compile than ever, and in a world where everything moves at a breakneck pace, it seems completely backward to be moving to a less frequent reporting schedule. If anything, companies should be able to leverage recent technologies to make the issuance of these quarterly reports easier and less expensive than ever.

Thank you for your time.

Best regards,

Mark Shaw

Marria Model — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Marria Model Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Public companies have provided investors and traders with high quality, detailed information every quarter for over 50 years. A new SEC proposal would stop that. While insiders and big institutional investors will still get that information from CEOs and corporations, the retail investors would be the last to find out. This new proposal would allow for fraud and corruption to go unchecked for 6 months. That's a major blind spot. This is non transparent behavior that leads to mistrust.

Mars Halek — Jun 16, 2026
Subject: S7-2026-15 From: Mars Halek Affiliation: Jun. 16, 2026 I am mostly retired, trying to live on my investments. I know that quarterly reports have become the lifeblood of investors at all levels. Their reports are the only time we pretty much know for sure how the companies we put our money into, or are thinking of putting our money into, are doing. Prior to Sarbanes-Oxley, I at one point held a little bit of Enron stock, the company whose fraud against stockholders was the motivation for that law. Thank God it was only a little, because I watched it dwindle to nothing, then disappear from existence. Audited, binding reports, not too far apart, help keep public companies honest. They are essential in these times. They may be expensive but they don't hold the economy back; they keep it going. They may be paid for with our shareholder money, but they are insurance for the rest of our invested funds, which many of us also need to live on.

Keep companies reporting quarterly and in compliance with Sarbanes-Oxley.

Sincerely,

Thomas Marshalek, Retired
Bloomington, Indiana

Mary — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Mary Affiliation: Jun. 16, 2026 My name is Mary Columbo Reichert. I am a 65-year-old retired hospital chaplain living in Northeast Georgia. The majority of my income comes from savings I and my family have made during our working years. This income stream is even more important now, when the federal government is threatening traditional safety nets like social security. It is also a time when I am less able to control my income stream as I no longer receive a paycheck from an employer. Corporate accountability is vital to me. It allows corporations to retain or regain credibility and provides an increased sense of security that fiduciary responsibilities are honored. I ask you to keep the corporate quarterly reporting requirement in place.

Respectfully,

Mary Columbo Reichert

Mary — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mary Affiliation: Jun. 16, 2026 Investors have the right to quarterly statements on their accounts. They are entitled to accurate and clear reports on how these companies are handling their investments.

Mary — Jun 16, 2026
Subject: S7-2026-15 From: Mary Affiliation: Jun. 16, 2026 Every investor deserves quarterly statements on how their investments are doing.

Mary — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mary Keep quarterly reports, there is absolutely no good reason to change this.

Mary Adam — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mary Adam I oppose this reporting change from quarterly to semiannual. Individual investors would be harmed. Timely disclosure is imperative.

Mary Adams — Jun 16, 2026
Subject: S7-2026-15 From: Mary Adams Affiliation: Jun. 16, 2026 Keep these reports quaterly. I rely on this to impact my decisions on the stock market. And, ir keeps these companies paying more attention. Following the present awful admoniostration it will be necessary to demand more accountable than they have been. Manhy of them are in on the grift. Mary Adams, Bethlehem, PA

mary Adams — Jun 16, 2026
Subject: S7-2026-15 Comment From: mary Adams Affiliation: Jun. 16, 2026 Intelligent decisions are based on timely access to factual data. With increasing reliance on AI there needs to be more analysis of data provided quarterly not less. Other countries have already tried removing quarterly and proved it ineffective.

Mary Ann Edson-Plumb — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Mary Ann Edson-Plumb Affiliation: Jun. 16, 2026 As a retired person in California, I have spent years maximizing my investments. This change will make that harder to do and make companies less responsive to their shareholders. There is no reason whatsoever to make this change.

Companies already try to shut out and obfuscate with their smaller investors. Kids get 4 report cards a year, why shouldn't companies? History shows that companies do a better job when they have to report more frequently. Internally, they are surely reporting monthly, so this data should be easy to report.

Mary Ann Edson-Plumb

Mary Ann Massarini Stanger — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mary Ann Massarini Stanger Affiliation: Jun. 16, 2026 I have a master's degree in Library and Information Science. The fact that OUR government's SEC wants to drop quarterly reporting is a red flag to me and other private citizens. Daylight reveals but darkness hides. Quarterly reporting was established for a reason; removing this screams that this SEC does not want the public to know what is going on behind the scenes in companies and what the impact will be on our investments. KEEP QUARTERLY REPORTING for OUR benefit. Thank you.

Mary A. Stanger

Mary Anne Modrak — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Mary Anne Modrak Affiliation: Jun. 16, 2026 I am in retirement. Given the questionable solvency of Social Security many people will be relying on their IRA's. The ability to evaluate companies quarterly allows for course corrections while semi-annual reports does not and can result in major financial losses. Please do not change this rule.
Mary Anne Modrak, retired. Conklin, Nzy

Mary Joyce — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Mary Joyce Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
"I'm a recently retired investor and I rely on quarterly reports to make decisions about my investments and retirement savings" is genuinely valuable on the record. I find it hard to believe that these companies find quarterly reporting a hardship. They make billions. Why not protect the small guy, eliminate the fraud, keep the transparency. This is just a hard NO!
Our government really needs to start working for the people and not the businesses. You need to be held more accountable for your decisions that affect mainstream hard working Americans that barely scrape by. I can only wonder if the SEC has an underlying agenda that they/you would benefit from by doing this. Fraud is on the rise or better said ,being discovered and you are asking to hide it potentially. Please this is no financial burden on the companies. They are profiting and if not, maybe they should SELL. DO NOT PASS THIS INITIATIVE.

Mary Kay Sobota — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Mary Kay Sobota Affiliation: Jun. 16, 2026 Quarterly reports are critical for the health of our economy. Failure to retain quarterly reports will destroy every American’s financial position and you cannot allow that to happen!

Mary Mayer Zins none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mary Mayer Zins I am an individual investor in stocks within my Traditional IRA, my ROTH IRA and my taxable brokerage accounts. I highly value the quarterly reports of the companies in which I have, or are considering, investments. The success of my investments is directly related to the information I have through quarterly reports. The conference calls explaining the reports are even more enlightening and would not happen except for the

requirement that a report be issued. These directly impact the quality of my life in retirement. The SEC must not reduce my chances for successful investing by reducing the information by which I judge the companies I own. Too many retirees are struggling to support themselves in our economy as inflation rages. Do not add to our burden by keeping us in the dark.

Mary McMenamin — Jun 16, 2026

Mary Petersen — Jun 16, 2026
Subject: S7-2026-15 From: Mary Petersen Affiliation: Jun. 16, 2026 My name is Mary Petersen, I have investment income that I depend on to stay in my home . Keeping reporting quarterly is more secure for everyone .Investors suffered huge losses when CEOs can lie about the strength of their companies. Let's be honest so we can all survive. As a taxpayer ,I don't like bailing out cheating lying CEOs, it's just not fair.

Mary R — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mary R I do not think it is wise for the SEC to allow companies to change from quarterly reporting to semi-annual reporting. Companies have proven time and again in our history that they cannot be trusted to consistently follow the laws pertaining to them or act in the best interests of the American people (i.e. not doing things that will actively harm citizens), unless they are compelled by governments, be they local, state, or federal. The Federal Government has a responsibility to ensure the safety of Americans, and that includes their fiscal safety. Do not do this. Keep Quarterly Reporting.

Mary Riche — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mary Riche Affiliation: Jun. 16, 2026 I am a retired person, I have very right to see quarterly statements on my investments, what you are proposing is wrong. It smacks of corruption. This is a dangerous path.

matt ching — Jun 16, 2026
Subject: S7-2026-15 Comment From: matt ching Affiliation: Jun. 16, 2026 The SEC is supposed to protect American citizens, not enable corporations to hide their information. We as individual investors rely on this information to make informed decisions about our future and demand transparency. Markets are worthless without integrity as is everything else in society. Do what is right for our country and maintain that integrity.

Matt Juliano — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Matt Juliano Affiliation: Jun. 16, 2026 Subject: Preserving Quarterly Reporting Standards

Dear Securities and Exchange Commission,

I am writing to express my strong support for the continued requirement of quarterly reporting for public companies. As a catastrophe field adjuster, I understand the critical importance of timely and transparent financial disclosures. Maintaining this reporting cadence provides essential insights into

a company's ongoing performance and financial health. Furthermore, it allows stakeholders, including investors and regulators, to make informed decisions based on the most current information available. The consistency of quarterly reports has proven invaluable for assessing risk and stability. I urge you to uphold this vital reporting practice.

Sincerely,

Matt Juliano
Catastrophe Field Adjuster

Matt Krafthefer — Jun 16, 2026
Subject: Keep Quarterly Reviews Mandatory From: Matt Krafthefer Affiliation: Jun. 16, 2026 This is ridiculous. In a time when the Executive Branch is accusing so many of fraud, this decision just opens the window for more. Short term gains made by businesses opting out of quarterly review will cost in the long term. Furthermore, it offers unethical leadership to get a head start on taking the money and running. Businesses then become imbecilic in the eyes of their clients. The suggested rule to change to a semi-annual review is just foolish.

Transparency allows for fair competition and greater enticement for ethical investment. We need to show the people, fellow businesses, and the world that our businesses are worthy of investment and are honest through transparency. We need to continue with mandatory quarterly review.

Sincerely,
Matt Krafthefer

Matthew B. Cheeley — Jun 16, 2026
Subject: S7-2026-15 Comment From: Matthew B. Cheeley Affiliation: Jun. 16, 2026 The question is, would those of you who propose this would except this as a standard you would have to live by. Too many people making rules that they don't ever have to live by. I want to know what's going on as much as possible. Please keep the requirements as is and not every 6 months.

Matthew Baldea — Jun 16, 2026
Subject: File No. S7-2026-15 From: Matthew Baldea As a retail investor, we absolutely want more reporting, not less. There is no good, truthful reason to switch to semi annual reporting from quarterly. Last time this happened it helped influence a crash. I’m asking on behalf of myself and family that you either keep the reporting schedule as it is, or increase the amount of reporting. Thank you for your time.

Matthew Bennett — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Matthew Bennett Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Rule S7-2026-15 disproportionately benefits insiders and large institutions, enabling them to minimize transparency and maximize the harm done to the investing public. When you put the majority of investors at risk to limit the burdens and overhead of reporting on those who should be transparent, you're only helping fill the pockets of millionaires and billionaires. Perhaps that's the point, and that's exactly why I oppose this rule.

Matthew Everett — Jun 16, 2026
Subject: S7-2026-15 Comment From: Matthew Everett Affiliation: Jun. 16, 2026 Quarterly reporting keeps investors educated. Keep the going.

Matthew Gallelli — Jun 16, 2026
Subject: S7-2026-15 From: Matthew Gallelli Affiliation: Jun. 16, 2026 KEEP IT QUARTERLY! Quarterly reporting keeps public companies honest. Since Enron in 2002, every CEO must personally certify their numbers every quarter, with federal prison on the line for signing a lie. Right now, the SEC is proposing %2semi-annual%2 reporting, cutting those certified filings to twice a year. Half the jail risk for shady CEOs. Double the risk for our savings.

Media Labbauf — Jun 16, 2026
Subject: File No. S7-2026-15 From: Media Labbauf As a person who has been investing in the equity markets for the past 35 years, I am very concerned about the proposal to cut in half the retail investor's access to information about the publicly traded companies. By allowing public companies to switch from quarterly to semiannual financial reporting, it reduces timely transparency and access to information we as investors need to make sound investment decisions that will ultimately effect our livelihood. Semiannual reporting doubles the information gap between insiders and ordinary shareholders - and this gap increases uncertainty and volatility for small investors like me. This proposal does not provide a fair level of playing field for retail investors, nor it is to the best interest of investors - we need more information from companies we own or are considering to invest in, not less! Please do not abandon the quarterly reporting, we the average investors rely heavily on them to make sound investment decisions throughout the year. Thank you for championing for us little people!

Please keep the reporting requirements quarterly! Margarett Williams
(Retired) Illinois

Megan May Manager in higher ed — Jun 16, 2026
Subject: File No. S7-2026-15 From: Megan May Megan May, engineer leader, Indianapolis. Quarterly reports filed with the Securities and Exchange Commission (SEC) are important because they provide consumers and investors with timely information about a company's financial health and overall performance. Rather than waiting for an annual report, stakeholders can review quarterly updates to understand how a company is performing throughout the year. This transparency helps individuals make informed decisions about investing, purchasing products, or doing business with a company. These reports also promote accountability by requiring companies to disclose significant financial results, risks, and operational changes on a regular basis. Consumers benefit from knowing whether a company is facing financial difficulties, legal challenges, or other issues that could affect its ability to deliver products and services. Regular disclosures help prevent companies from withholding important information and encourage honest communication with the public. In addition, quarterly reporting contributes to fair and efficient financial markets. When accurate information is made available to everyone at the same time, investors can evaluate companies based on reliable data rather than rumors or insider knowledge. This level of transparency builds trust in the marketplace and helps protect consumers and investors from making decisions based on incomplete or misleading information.

Melanie Bowen — Jun 16, 2026
Subject: S7-2026-15 Comment From: Melanie Bowen Affiliation: Jun. 16, 2026 This is a horrible idea. It gives power to bad actors allowing more financial fraud. The US deserves protections from this kind of behavior which is why this protections were put into place to begin with. We don't need issues with the banks, we don't need to do more company bailouts, we don't need industries having more rights than individuals! STOP this!!

Regards,
Melanie Bowen

Melody Ginter — Jun 16, 2026
Subject: S7-2026-15 Comment From: Melody Ginter Affiliation: Jun. 16, 2026 STOP trying to screw the American citizens. Quit being lying, cheating, money grubbing sleaze(whores)! Keep the books open and accessible to scrutiny.

Melvin O. Ryder, Jr. Retired Aerospace Engineer/ Private Investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: Melvin O. Ryder, Jr. I am opposed to the proposed reporting change from quarterly to semi-annually for the obvious reason that less information decreases my chances at success as an investor relative to the institutional investors. Furthermore it has been demonstrated in the U.K. that this reporting change has essentially no effect on company business behavior. Therefore it appears that the proposed change would be a huge step in the wrong direction with regards to company transparency for private investors while skewing the playing field

in favor of the institutional investors.

Mercedes Franklin — Jun 16, 2026

Michael Payne — Jun 16, 2026
Subject: S7-2026-15 Comment From: Michael Payne Affiliation: Jun. 16, 2026 After the long and well documented history of corruption committed on the behalf of and by CEO's, Banks, energy companies… basically any large publicly traded company in the USA and their owned politicians, the proposal to make it even easier for these same entities to steal by weakening their reporting requirements is asinine. After all of the corruption concerning taxation created to benefit these same entities along with their politician enablers, and to do this at the same god ****ed time the most corrupt president/administration/partisan congressional majority is grifting on levels not seen in generations, is well, madness. However, why don't you just do it? Make it even easier for your corrupt paymasters to get even richer and hasten the revolution that's gonna crush this batch of corrupt MF'ers for good? You think social media and culture wars can distract a man from being robbed by the list of people I highlighted above, and that is true. But culture wars, and social media will never distract a man from an empty stomach. That much has been true for as long as civilizations have existed on this planet. So you clowns better wake the F up and quick because there's a lot of very, very, very hungry people who are tired of this crap.

Subject: S7-2026-15 Comment From: Michele DeArment Affiliation: Jun. 16, 2026 Quarterly reporting is necessary. Please keep this requirement.

Michele Dorsey — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Michele Dorsey Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
The SEC’s primary mission is to protect investors, maintain fair and transparent markets, and promote capital formation—not to expand access to opaque, illiquid investments that many retail investors do not fully understand.
Private market investments often lack the disclosure, transparency, liquidity, and valuation safeguards required in public markets. Allowing broader access could expose everyday Americans and retirement savers to higher fees, greater risks, and limited ability to access their own money when needed.
Investor protection should not be sacrificed to create new profit opportunities for Wall Street. The SEC should strengthen transparency and accountability, not weaken the safeguards that have protected retail investors for decades.

The SEC must remain steadfast in its commitment to protecting Main Street retailinvestors and preserving the integrity, transparency, and fairness of our financial markets.

Michele Furst — Jun 16, 2026
Subject: S7-2026-15 Comment From: Michele Furst Affiliation: Jun. 16, 2026 I think it’s critical to retain quarterly reporting! There are far too many people who would take advantage of extended time, and that will impact the life savings of millions of Americans.

Sincerely, Michele Furst

Michelle Hiestand — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Michelle Hiestand Affiliation: Jun. 16, 2026 To whom it may concern:
I am requesting that the SEC keep required quarterly reporting. Investors have a right to know what the companies they have chosen to put their money behind are doing and forecasting for the year. Most publicly traded companies are staffed for this and have experts in their area to make the work efficient. Changing back to 1955 standards is unacceptable. With the push for advancement of AI, quarterly filings should be quicker and easier. Don't let companies hide their results!

Michelle Krisan — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Michelle Krisan Affiliation: Jun. 16, 2026 Michelle Krisan. Semi retired . This matters to myself, my family and everyone . This has been tried and is disaster. It's reducing our money to ruin. It shouldn't be allowed to happen. It amounts to deliberate destruction of what works and it's our right to have quarterly reports!

Michelle Mendoza — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Michelle Mendoza Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Reducing reporting requirements so that companies are only required to file reports twice a year would disadvantage investors because situations can deteriorate quickly and investors would not have information to make informed decisions timely. The role of the SEC is to protect investors, not give companies a pass at the expense of investors. More timely information is always better when assessing a companies position and results.
Quarterly reporting requirements need to be maintained and not reduced to twice a year.

Michelle Murphy — Jun 16, 2026
Subject: S7-2026-15 From: Michelle Murphy Affiliation: Jun. 16, 2026 Quarterly reporting is important to investors because it provides
timely transparency into a company's financial health. As a retail
investor, quarterly reports help me make informed decisions about my
retirement savings. Research shows quarterly reporting contributes to
the stability of the U.S. stock market and give insight into the
company's budget, revenue, profit and losses through a certain period
of time. Continue the quarterly reporting!

Sara Murphy
Reno, Nevada.

Michelle Schmidt — Jun 16, 2026

Mike Hicks — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mike Hicks Affiliation: Jun. 16, 2026 Quarterly reporting is the bare minimum! Insane risk to our economic stability to do it less often. The frequency should be kept exactly as is, no loopholes or exceptions. Thank you.

Mike Hoskins The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mike Hoskins I write in opposition to File No. S7-2026-15, the proposal to move public companies from quarterly to semiannual reporting. I am an individual retail investor. I do my own research on companies I invest in and I make my own decisions. For me, more information leads to more informed decisions and less information leads to less informed

decisions. Quarterly reporting protects individual investors like me. Semiannual reporting doubles the information gap between insiders and ordinary shareholders like me. That gap is where volatility, uncertainty, and mistrust grow. The concern about short-termism in the File doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors like me – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it. It's unclear to me what problem is being solved by the proposed solution. As the WallStreetBets comment letter put it: "The companies we trade are not being held back from greatness by the obligation to file four reports a year. The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well." Respectfully submitted.

Mike Kissau — Jun 16, 2026
Subject: S7-2026-15 From: Mike Kissau Affiliation: Jun. 16, 2026 Corporations need to continue the practice of having their CEOs sign off on financial
statements QUARTERLY. There have been too many times when those same CEOs have lied to shareholders to enrich themselves. Know that the American public is sick of Congress allowing this behavior. Your job is to represent tALL of your constituents, not the wealthy ones who donate in exchange for your votes.

Mike Miedlo — Jun 16, 2026

Mike Mills — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mike Mills Affiliation: Jun. 16, 2026 Quarterly works fine. Quarterly provides transparency. Quarterly spreads the dividends out. Quarterly allows the retail investor to timely analyze the company. Quarterly keeps the company honest. Do NOT go to semi-annual reporting.

Sent from my iPhone

Mike Minetti — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mike Minetti Affiliation: Jun. 16, 2026 I feel like with quarterly reporting it’s already hard enough to discern how a company is doing without being an insider. If this is changed to 6 months it would give any public company the right to delay bad news and give

insiders more time to dump shares based on information they know, but we (the public) do not. You will probably be inundated with lobbyists trying to explain why this would be a good thing. That is the reason you should know this is a horrible idea! Please keep United States retail investors informed. This is important. Rank & file securities owners have the right to know how their investments are doing in real time. Six months is a long time to wear a blindfold. Please do the right thing by the general public on this issue. Thank you.

Michael Minetti • Hallandale, FL.

Mike Mulligan The Motley Fool — Jun 16, 2026
Subject: File No. S7-2026-15 From: Mike Mulligan Quarterly reports allow for a more open and thorough look at our investments. Losing this frequency will only reduce trust in the companies being invested in.

MONA REIMERS — Jun 16, 2026
Subject: Comment on S7-2026-15 From: MONA REIMERS Affiliation: Jun. 16, 2026 It isn't a burden for companies to know their financial status. And if they want people to trust their worth and invest/stay invested, they should demonstrate their willingness, and capable accounting and reporting. They should know it constantly. Data is available in seconds with today's technology.

If they can't compute their data in a few weeks, they shouldn't be publicly traded.

Mona Reimers, Retired

Mona Schechner — Jun 16, 2026
Subject: S7-2026-15 Comment From: Mona Schechner Affiliation: Jun. 16, 2026 I want to know how the companies I invest in, with my IRA & personal portfolio, are performing on a regularly quarterly basis. A six month reporting period has the potential to hide serious issues from public scrutiny. Totally unacceptable.

Sent from my iPhone

Monica Ashpole — Jun 16, 2026

Subject: S7-2026-15 Comment From: Monica Ashpole Affiliation: Jun. 16, 2026 I am writing to advocate for a transition from quarterly to monthly reporting. While quarterly reporting has long been the standard for business, military, and fiscal operations, it was established during an era of handwritten ledgers and typewriters. In the modern digital age, we have the tools to provide more frequent updates.

As an investor and fractional owner, I believe external reporting is imperative for transparency and accountability. Frequent reporting requirements are essential to accurately gauge how a company is being managed. Increasing the frequency to a monthly basis would provide shareholders with the necessary insight into internal operations.

Thank you for your time and consideration of this matter.

Respectfully,

Monica Lee Ashpole, BSCM, GRI, GIA

Monica M — Jun 16, 2026
Subject: S7-2026-15 From: Monica M Affiliation: Jun. 16, 2026 I'm writing to support continued use of quarterly reporting as a way of keeping CEOs accountable. I think the only improvement to this system would be to require accountability for the social,
infrastructure, and environmental impact on the communities in which they operate, in addition to accountability to their stockholders. It has become clear since the 1980s that stockholder accountability alone is insufficient to protect communities against
corporations keeping profits for themselves and their stockholders, while passing numerous costs on to the community at large. Thank you for your consideration of these concerns.

---

Nancy Chaffee — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Nancy Chaffee Affiliation: Jun. 16, 2026 Transparency and facts matter. Quarterly reporting provides information for investors and people managing money. The richest markets in the world use quarterly reporting while those who use semiannual reporting do not see the financial returns we do. We tried semiannual reporting from 1955 to 1970 with less than optimal results. Predictions for a return to semiannual reporting show it could cost a devaluation of

people's investments to the tune of over $30,000 per $100,000 of investment. As a retired healthcare professional who was self employed for half of my career and made sound investments to be able to retire comfortably, I will not appreciate losing my nest egg if moving to semiannual reporting comes to fruition. This is not a smart plan. Do not change to semiannual reporting.

Natasha Pereira — Jun 16, 2026
Subject: File No. S7-2026-15 From: Natasha Pereira More frequent financial reporting enables me as an investor to have a better view of the financial health of the company and its stock. Twice yearly seems too far apart in such a market where volatility and speed of decision-making matter.

Nathan Grift — Jun 16, 2026
Subject: File No. S7-2026-15 From: Nathan Grift Some companies are seasonal and this would make it significantly harder to understand how they work.

Nathan Ouderkirk The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Nathan Ouderkirk The last thing individual investors need is less info on the companies they invest in, less protection against fraud and mismanagement. Please keep the standard quarterly reporting as it is, and do not reduce it to only twice a year.

Nathan Stilgenbauer — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Nathan Stilgenbauer Affiliation: Jun. 16, 2026 To the

Securities and Exchange Commission: This proposed rule is an unnecessary and blatantly corrupt attempt to create a wider gap between the working class and elites.

Nathan Vonada — Jun 16, 2026
Subject: File No. S7-2026-15 From: Nathan Vonada This is the worst idea I have heard in a while. Shareholders are the owners of the business, and we deserve more information, not less. I do not buy the argument that preparing a 10-Q is a burden. If the company is not already tracking that data, they have other problems. Nor do I think it promotes short-term thinking. Media speculation, rumors, online posts, etc. all fuel hype. 10-Qs ground our thinking in reality. Those are the only really trustworthy information we get.

Naved — Jun 16, 2026
Subject: S7-2026-15 Comment From: Naved Affiliation: Jun. 16, 2026 The SEC under the Trump administration is a farce!!! Your mandate is to protect investors by having companies make timely, transparent disclosure. Not by giving them opportunities to hide! Keep the 10k filing as is!!!

Neal Washburn — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Neal Washburn Affiliation: Jun. 16, 2026 From Neal Washburn, Escondido, CA
As an individual investor approaching retirement, I am concerned about the Securities and Exchange Commission's proposal to allow public companies to replace quarterly reporting with semiannual reporting.
My retirement savings depend heavily on investments in publicly traded companies through retirement accounts, mutual funds, and exchange-traded funds. Like millions of Americans, I rely on timely, accurate, and consistent financial reporting to understand the health and performance of the companies in which I am invested.
The SEC was created to protect investors and promote fair, orderly, and efficient markets. Quarterly reporting has long been a cornerstone of that mission.
Supporters of semiannual reporting argue that it will reduce compliance costs and encourage management to focus on long-term strategy rather than quarterly results. While those goals are worthwhile, they should not come at the expense of transparency and accountability. The SEC itself acknowledges that the proposal would reduce the frequency of required disclosures from three quarterly reports to a single semiannual report plus the annual report. (SEC)
For individual investors, less frequent reporting means longer periods without complete financial information. In today's rapidly changing economic environment, six months can be a very long time. Significant changes in revenue, profitability, debt levels, cash flow, or business risks can occur between reporting periods. Investors deserve timely visibility into those developments.
Quarterly reports also help level the playing field between large institutional investors and individual investors. Institutional investors often have access to management meetings, analyst coverage, sophisticated research tools, and extensive market resources. Ordinary investors rely heavily on SEC filings as a trusted source of information. Reducing reporting frequency would disproportionately affect those of us who do not have access to those additional resources.
Furthermore, quarterly reporting promotes accountability. Knowing that financial results will be reviewed and disclosed every three months encourages management teams to maintain strong internal controls and communicate openly with shareholders. Less frequent reporting may unintentionally reduce that discipline.

The proposal is intended to encourage companies to remain public by reducing regulatory burdens. However, public companies benefit from access to public capital markets, and regular disclosure is part of the responsibility that comes with that privilege. Transparency is not merely a compliance cost; it is a fundamental component of investor confidence.
As someone who depends on retirement savings accumulated over decades of work, I would rather have more information than less. Investor confidence is built on transparency, and transparency requires timely reporting.
I respectfully urge the SEC to maintain the current quarterly reporting requirements. While there may be opportunities to simplify filings, eliminate unnecessary disclosures, or reduce administrative burdens, the frequency of reporting should remain unchanged. Protecting investors should remain the Commission's highest priority.
Sincerely,
Neal Washburn
Retirement Investor
Escondido, CA

Nicholas Bersani None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Nicholas Bersani Reducing to only two reporting periods to stakeholders drastically impacts stakeholder transparency to information and the ability to monitor company progress that they have ownership in. I do not agree with this proposal to change.

Nicholas Callais — Jun 16, 2026
Subject: S7-2026-15 Comment From: Nicholas Callais Affiliation: Jun. 16, 2026 Hi!

Nick Callais here. Professional investor.

The US stock market is the envy of the world with the lion share of foreign capital and domestic capital flowing in here. Changing that dynamic only weakens trust in U.S. equities. If quarterly reporting is an issue for short term decisions, then how do we lead the western world in nearly every advanced industry, and market liquidity for retail investors, etc.

This will surely do far more damage than any incremental reporting benefit for our multi billion dollar market cap firms that probably have AI and software doing the hard and costly reporting work.

Further, companies are private for longer, not because of quarterly reporting, but the overall regulation burden and lack of a need of public markets for capital. This 6 month period doesn't change any dynamics or increase # of public firms. It only increases risks of fraud and insider dumping before you and I know about it half a year later.

If it ain't broke, don't fix it. And our stock market is the envy of the world for trust and transparency today. You will lose that by a lot.

It's not 1922 anymore, the world is more likely to have more transparency in financial markets in the future, not less. Let's keep it that way please.

Thank you.
Nick

Warm regards,
Nick

Nicholas Chivily — Jun 16, 2026
Subject: File No. S7-2026-15 From: Nicholas Chivily This is a horrible idea. It's my money that's invested. I shouldn't have the government enabling less information, much less acting as the protector of large business interests versus those of the individuals. We should be for greater transparency to be able to make more informed decisions.

Nicholas Dumas — Jun 16, 2026
Subject: File Number S7-2026-15. Proposed Semiannual Reporting Rule opposition Public Comment Letter From: Nicholas Dumas Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

I write in strong opposition to the proposed rule amendments under File No. S7-2026-15, which would permit public companies to substitute semiannual reports (Form 10-S) for the current mandatory quarterly reports (Form 10-Q). While the proposal is framed as a deregulatory measure that reduces compliance burden and encourages long-term thinking, I submit that its practical effect will be to structurally disadvantage ordinary American investors — including the tens of millions of workers whose retirement savings are held in 401(k) plans, IRAs, and defined-contribution accounts — while consolidating informational advantages among the institutional elite who already operate with resources and access most Americans will never have.

I am an individual investor and small business owner. My wife and I hold retirement assets in a Roth IRA and a Traditional IRA rollover in Fidelity and Vanguard platforms.
I do not have access to management briefings, private analyst channels, or institutional research services. What I have — what every ordinary investor has — is the mandatory public filing system the SEC has maintained since the 1970s. This proposal would erode the most level playing field that system provides.

1. Quarterly Reporting Is Not a Burden on Investors — It Is a Protection

The proposal characterizes the quarterly reporting cadence as a treadmill that incentivizes short-termism at the expense of long-range strategic planning. That argument belongs to corporate management, not to investors. From an investor's perspective, quarterly filings are not noise — they are the minimum data cadence necessary to detect deterioration, misrepresentation, or material change in a company's financial condition before that information is privately absorbed by those with privileged access.

The quarterly Form 10-Q exists because experience has shown, repeatedly, that longer disclosure gaps create windows for misfortune and misconduct alike. The conglomerate boom of the 1960s — which preceded mandatory quarterly reporting — demonstrated what happens when investors receive audited financial information too infrequently to identify compounding problems. The SEC rightly responded by tightening disclosure cadence. That was not an error in need of correction fifty years later. It was a lesson learned at ordinary investors' expense.

II. "Optional" Semiannual Reporting Is Not Neutral — It Creates a Two-Tier Market

The proposal presents the change as voluntary, and some have argued that because quarterly reporting remains permissible, no investor is harmed. This reasoning is superficial. The moment a significant portion of public companies migrate to semiannual reporting, a structural bifurcation emerges in the market:

-- Companies that report quarterly--- signal to the market that they are willing to be held to higher transparency standards. They attract more analyst coverage, tighter bid-ask spreads, and greater institutional confidence — advantages that compound over time.

--Companies that elect semiannual reporting-- create a six-month information vacuum between mandatory disclosures. That vacuum will not stay empty. Information will flow — but it will flow through private channels accessible only to sophisticated market participants: bank group calls, underwriter due diligence sessions, large-investor meetings, and bilateral communications that never reach a Form 8-K. The SEC's own rules under Regulation FD prohibit selective disclosure, but enforcement is imperfect, and the structural pressure toward private information transfer increases

directly with the length of mandatory disclosure gaps.

The result is predictable: those with access to management will know more, sooner. Those without — workers invested through 401(k) plans, retail investors, smaller pension funds — will not. They will buy, hold, and sell based on a materially thinner information set than the counterparties on the other side of their trades. The proposal does not reduce the total information circulating in the market. It reduces the mandatory information that must be made available to everyone simultaneously. That distinction is everything.

III. 401(k) Holders and Retirement Savers Bear Concentrated Risk

The United States defined-contribution retirement system now holds approximately $12.5 trillion in assets. The overwhelming majority of those assets are invested by individuals — through employer 401(k) plans, rollover IRAs, and similar vehicles — who have no meaningful ability to conduct independent due diligence on the companies in which their savings are invested. They depend on fund managers who, in turn, depend on timely, mandatory public disclosure to price risk and allocate capital appropriately.

A six-month information gap does not affect all investors equally. Institutional investors with the resources to deploy alternative data — satellite imagery of supply chains, credit card transaction aggregates, proprietary survey panels — will fill the gap with private intelligence. Workers with 401(k) balances of $50,000 or $200,000 will not. They will absorb the pricing errors that result from the information asymmetry their fund managers cannot fully overcome.

This is not a theoretical concern. It is the documented structural dynamic of every market where mandatory disclosure has been weakened: those with private access to information profit at the expense of those without it, and the mechanism is not fraud — it is the legal exploitation of an information gap that public policy deliberately created.

IV. The International Comparison Does Not Support the Proposal

Proponents point to the European Union and the United Kingdom as evidence that semiannual reporting is compatible with robust capital markets. This comparison deserves scrutiny.

The EU and UK operate under comprehensive market abuse frameworks, insider trading enforcement regimes, and disclosure requirements — including ad hoc disclosure obligations — that partially compensate for less frequent periodic filings. The U.S. equivalent, the Form 8-K current event reporting system, is a poor substitute. It is triggered by specific enumerated events and does not impose on companies the obligation to make continuous qualitative and quantitative disclosures about operating trends, segment performance, or management discussion that the Form 10-Q

currently requires.

Adopting the reporting *frequency* of European markets without adopting the compensatory continuous disclosure *obligations* of those markets is not convergence — it is selective harmonization in the direction of less accountability.

V. The Proposal Rewards the Wrong Incentives

The stated rationale — reducing short-termism — would be more persuasively addressed by reforming executive compensation structures, extending capital gains holding periods for preferential tax treatment, or modifying guidance practices. None of those reforms are on the table. What is on the table is reducing mandatory disclosure, which does not address the root cause of short-termism but does remove transparency that protects investors.

If companies wish to reduce the quarterly earnings treadmill, they may stop providing quarterly earnings guidance. Many already have. That requires no SEC rulemaking. The voluntary nature of earnings guidance has not prevented the emergence of long-term focused corporate cultures at companies like Berkshire Hathaway, Costco, or Amazon. Reporting frequency is not the driver of short-termism. Disclosure of mandatory audited financials every ninety days is not what causes management teams to chase quarterly beats. The incentive structure of compensation packages does that.

VI. Request

I respectfully urge the Commission to:

1. ! Reject the proposed semiannual reporting option as written, on the grounds that it structurally increases information asymmetry to the detriment of retail investors and retirement savers who have no access to alternative disclosure channels.

2. --If the Commission proceeds-, ! require as a condition of any semiannual election that companies adopt robust compensatory continuous disclosure obligations — including mandatory quarterly earnings releases filed as Exchange Act reports (not merely furnished), and enhanced 8-K triggers for material operating developments — before any semiannual election becomes effective.

3. -Conduct a thorough economic analysis-, prior to any final rule, of the expected distributional effects of this proposal on retail investor returns, 401(k) account balances, and bid-ask spreads for companies electing semiannual reporting — and make that analysis available for public comment before finalization.

The Commission's mandate under the Securities Exchange Act of 1934 is to protect investors, maintain fair and orderly markets, and facilitate capital formation — in that order. This proposal, as written, advances the third objective at the expense of the first. Ordinary Americans — those who cannot afford a Bloomberg terminal, a private equity fund relationship, or a team of financial analysts — are counting on this Commission to hold the line on the transparency protections they cannot secure for themselves.

Respectfully submitted,

Nicholas L Dumas

Nicholas J Van Dyke — Jun 16, 2026
Subject: File No. S7-2026-15 From: Nicholas J Van Dyke Keep public companies reporting on a quarterly basis. Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Regulation Fair Disclosure (Reg FD) moved toward a more level playing field. This proposal moves away from it.

Norman Harebottle — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Norman Harebottle Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission: Investors like me, and privately held companies like the one I work for, all use quarterly reporting as a check against the rhetoric of politics. The loss of this transparency will result in damage to the economy, the very thing that the Federal Reserve and the SEC should both be concerned about. You cannot hide forever from the American public the negative impacts that this administrations foreign and monetary policy changes are having on the economy. The best thing now is radical transparency to the American public so that affairs can be corrected before violent revolution is the end of this American experiment. Freedom isn't just won by the death of an enemy in combat, or the loss of one's life in war, it is won in the back rooms and quiet chambers of power when we send the message that we do actually believe in the ideals that this nation were founded upon. If in this 250th year of this country, we cannot reflect on those ideals and move forward in pursuit of them, I am afraid this nation is most utterly lost. Do the right thing, for the right reason, not because it is easy, but because it is hard.

Olivia Neal — Jun 16, 2026
Subject: S7-2026-15 Comment From: Olivia Neal Affiliation: Jun. 16, 2026 Public markets function best when information is distributed consistently and predictably. Quarterly reporting has served that purpose for decades. If reporting is reduced to twice per year, investors may demand a higher risk premium to compensate for longer periods of uncertainty. That can increase capital costs, reduce market efficiency, and potentially make U.S. markets less attractive compared to other global markets. Maintaining quarterly reporting supports liquidity, price discovery, and confidence in public companies.

I am an independent contractor and I am sick of bailing all these rich elites out while everyone else is stuck struggling and covering all the fraud with our taxs! No more bailouts or deception! We want transparency and not at their convenience!! I demand to keep the audits quarterly.

Thank you

Gloria Robbins

OR — Jun 16, 2026
Subject: File No. S7-2026-15 From: OR Quarterly reports keep regular investors informed. Switching to semiannual reports widens the information gap between insiders and everyone else, which fuels volatility and mistrust. Research from the CFA Institute shows that reporting less often doesn't reduce short-termism, so the SEC would be giving up transparency for no real benefit. The companies most likely to stop quarterly reporting are smaller, less-scrutinized firms—the ones where oversight matters most. This move reverses the progress made under Reg FD. As one WallStreetBets comment put it, companies aren't being held back by filing four reports a year; the entire S&P 500 does it while hitting all-time highs.

Outlook — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Outlook Affiliation: Jun. 16, 2026 Dear [Recipient Name/ Team],

We are writing to convey our significant concerns regarding recent developments, which have unfortunately led to a considerable erosion of trust within our working relationship. This sentiment stems from [briefly and generally indicate areas, e.g., past inconsistencies, perceived lack of transparency, or unfulfilled commitments], making clear and reliable communication more critical than ever.

Regarding the reporting frequency, we want to strongly advocate for the preservation of the existing quarterly schedule. This cadence is not arbitrary; it is meticulously aligned with our strategic planning cycles, allows for comprehensive data analysis, and provides the necessary time for meaningful insights and actionable decision-making without creating undue administrative burden. Moving to a more frequent reporting cycle would, in our view, likely lead to a dilution of focus, increased overhead, and potentially less strategic depth in the analysis, without offering demonstrable benefits that outweigh these disadvantages.

We therefore urge you to maintain the current quarterly reporting framework. We believe this stability is essential not only for operational efficiency but also for fostering an environment where clarity, consistency, and a foundation of mutual trust can be actively rebuilt and sustained moving forward.

Sincerely,
[Your Name/Team]

P Castaneda — Jun 16, 2026
Subject: File No. S7-2026-15 From: P Castaneda I am writing to strongly oppose the proposed rule that would permit public companies to replace quarterly financial reporting with semiannual reporting. This proposal would significantly reduce market transparency at a time when millions of Americans are actively participating in the financial markets through retirement accounts, college savings plans, and personal investment portfolios. Individual investors rely on timely, standardized financial disclosures to evaluate company performance, assess risk, and make informed decisions. Extending the period between required financial reports from three months to six months would leave investors operating with less information for longer periods of time. While large institutional investors often have access to extensive research resources, direct communication with management teams, and sophisticated analytical tools, everyday investors depend heavily on public disclosures. Reducing the frequency of required reporting risks widening the information gap between institutional and retail investors and undermines the principle that all market participants should have access to the same material information. Quarterly reporting serves an important accountability function. It provides regular opportunities for shareholders to evaluate management performance, identify deteriorating financial conditions, and respond to emerging risks before they

become crises. History has repeatedly shown that transparency and timely disclosure are among the most effective tools for protecting investors and maintaining confidence in the capital markets. The argument that reducing reporting frequency will lessen short-term pressures on corporate management should not outweigh the public's need for reliable and timely financial information. Public companies benefit from access to capital markets and should continue to meet the corresponding obligation of providing regular, transparent disclosures to investors. The SEC's mission is to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation. Reducing disclosure requirements moves in the opposite direction of those goals. Less frequent reporting means less transparency, less accountability, and greater risk for the investing public. I respectfully urge the Commission to reject this proposal and preserve quarterly reporting requirements. America's capital markets are strongest when investors have timely access to the information they need to make informed decisions. The interests of everyday investors should remain at the center of SEC policymaking. Thank you for your consideration

Paddy Rassbach — Jun 16, 2026
Subject: S7-2026-15 Comment From: Paddy Rassbach Affiliation: Jun. 16, 2026 It's my concern that only doing every 6 months reporting as opposed to quarterly means more Bad actors are going to be able to get in and get out without being captured. Between the unlimited funding Allowed by citizens united and the dark money already being poured into campaigns more frequent as opposed to less frequent reporting would be my my preference. And I am saying this as an upcoming candidate, I'm not just suggesting other campaigns have to report quarterly I am making the commitment that my own campaign will do that.

Paige Humphreys — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Paige Humphreys Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Quarterly disclosures help me and my broker better navigate my future and retirement. I'm a single mother and this willl impact me greatly if you stop quarterly disclosures. Please continue to help people like me plan our retirement futures.

Thank You,

Paige Humphreys

Pam Caviness — Jun 16, 2026
Subject: S7-2026-15 Comment From: Pam Caviness Affiliation: Jun. 16, 2026 We need more transparency, not less.

Pam Claywell — Jun 16, 2026
Subject: S7-2026-15 Comment From: Pam Claywell Affiliation: Jun. 16, 2026 The future of this country depends on transparency in all areas of commerce and economic interactions. The regulations need to protect the integrity of these, not give the ability to hide behind them. Corruption has run wild…the system cannot sustain itself with corruption run amok. If the public does not invest because it is unreliable… it will fail.

Pam Ellis — Jun 16, 2026
Subject: S7-2026-15 Comment From: Pam Ellis Affiliation: Jun. 16, 2026 That’s fraud through and through and no way that should be allowed

Patricia Cassidy — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Patricia Cassidy Affiliation: Jun. 16, 2026 My name is Patricia. From a very young age, 16, when I got my first job my father told me to start saving for my retirement. And I did. I have been building a portfolio that recognized that social security would not provide enough retirement income to me.

Now you want to reduce your public accountability by lessening reporting. There is no good reason for that. Your share holders have a right to know your status. Without accountability there is no reason to believe you will act in shareholders’ best interests. Remember Lehman Bros?

You must continue to report. Congress should require you to continue to report. We do not want to live in a black box country where information is unavailable to the people investing.

Do the right thing.

Patrick Rusch Financial Advisor, Investment Designers — Jun 16, 2026
Subject: File No. S7-2026-15 From: Patrick Rusch This is not the right decision. We've seen other countries go to fewer reporting periods and it doesn't in fact force companies to think longer term with their actions. It more than likely helps them keep things quiet for longer that investors should know about. A quarterly reporting cycle needs to be maintained, expecially in a world for things aren't slowing down. Think of the change and innovation that happens now every 3 months when it comes to AI and other advancing technology. Reporting less is counterintuitive to a world of every increasing change. Plus, the US economy and markets have been booming for roughly 16 years now, so I would dare to bet that reporting 4 times per year isn't a hinderance. This move would only hurt the everyday retail investor who already needs to summon more resources just to stay updated.

Patty McNew — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Patty McNew Affiliation: Jun. 16, 2026 Opposition to Elimination of Mandatory Quarterly Reporting Requirements

I am writing as a retired American to express my strong opposition to any proposal that would eliminate the requirement for publicly traded companies to provide quarterly financial reports.

I am not a professional investor, corporate executive, financial analyst, or lawyer. I am a retiree whose limited annual income consists if Social Security benefits and a pension earned through

decades of work. Like millions of Americans, however, I also have savings and investments that help provide financial security in retirement. The value of those investments affects my ability to pay for housing, healthcare, insurance, transportation, and other necessities.

As a retiree, I depend heavily on the integrity and transparency of our financial markets. Unlike younger workers, I do not have decades to recover from major market losses caused by inadequate disclosure, poor corporate governance, or surprises that could have been identified earlier through regular reporting. The requirement that public companies provide quarterly financial information is one of the safeguards that helps protect investors like me.

Quarterly reporting promotes transparency and accountability. Public companies are entrusted with billions of dollars belonging not only to wealthy investors but also to retirees, pension funds, teachers, firefighters, veterans, and ordinary citizens. Investors deserve timely information about how these companies are performing. Waiting a full year between comprehensive reports would leave investors in the dark for far too long.

The argument that quarterly reporting encourages excessive focus on short-term results may have some merit in certain circumstances. However, eliminating quarterly reporting is the wrong solution. Less information does not produce better markets. It simply creates larger information gaps. Those gaps are most harmful to individual investors who do not have access to private research teams, industry experts, or direct communication with corporate management.

Large institutional investors often have substantial resources to gather information independently. They can hire analysts, conduct extensive research, and maintain ongoing relationships with company executives. Individual retirees cannot. We rely on publicly available information filed with the SEC to understand what is happening with the companies in which our retirement savings are invested.

If quarterly reports are eliminated, information advantages will shift even further toward insiders and large institutions. That outcome would undermine confidence in the fairness of our markets. Investors should not have to depend on rumors, media speculation, analyst estimates, or selective corporate disclosures to understand the financial condition of public companies.

Quarterly reports also provide an important early warning system. Companies can experience significant changes in their business, finances, debt levels, cash flow, customer demand, litigation exposure, or competitive position within a matter of months. Regular reporting allows investors to identify emerging problems before they become crises.

As someone living on a relatively fixed income, I pay close attention to risks that could affect my savings. Unexpected losses can have serious consequences. A younger investor may have twenty or thirty years to recover from a major decline in asset values. Retirees often do not have that luxury. Transparency and timely disclosure help reduce the likelihood that investors will be blindsided by significant developments.

Furthermore, quarterly reporting strengthens corporate discipline. The requirement to regularly disclose financial results encourages management teams to maintain effective internal controls and provides boards of directors with ongoing opportunities to review performance and address concerns. These benefits extend beyond investors and contribute to overall market integrity.

I am also concerned that eliminating quarterly reporting could damage confidence in U.S. capital markets. The United States has long been recognized as having some of the world's strongest investor protections and disclosure requirements. Those protections are one reason investors

around the world trust American markets. Weakening disclosure standards could reduce that trust and ultimately increase the cost of capital for American businesses.

Many retirees, including myself, have spent decades contributing to pension systems, retirement accounts, and investment funds. We have followed the rules, worked hard, paid taxes, and saved responsibly. We depend on regulators to ensure that markets remain fair, transparent, and worthy of public trust.

The SEC's mission includes protecting investors. In my view, eliminating quarterly reporting would move in the opposite direction. While reducing unnecessary regulatory burdens may be a worthwhile objective, those burdens should not be reduced at the expense of transparency and investor protection.

If reforms are needed, I encourage the Commission to consider simplifying reporting requirements or reducing duplicative disclosures rather than eliminating quarterly reports altogether. Investors need timely, reliable information to make informed decisions, and retirees are among those who depend most on such protections.

I respectfully urge the Commission to reject any proposal that would eliminate mandatory quarterly reporting requirements for public companies.

Thank you for considering my comments and for your continued work on behalf of investors and the integrity of our financial markets.

Respectfully submitted,

Patricia McNew

Paul Dent — Jun 16, 2026
Subject: File No. S7-2026-15 From: Paul Dent As an individual investor, I depend on obtaining the 10-Q quarterly on the public companies that I own and/or follow. This reporting provides me with information that is standardized and certified, and companies have been providing this information without problems for years. There is no reason to reduce this reporting, other than that it will allow companies to be less transparent with their investors, particularly small ones like me. In addition to the financial data, the one section that is most beneficial is the Management's Discussion and Analysis, as that is where companies must report on material changes/trends - very useful at times. Please don't sell out the little guys! Thank you. Paul Dent

Paula Mack — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Paula Mack Affiliation: Jun. 16, 2026 I'm an attorney and I have friends that work for the SEC so I'm not going to say a whole lot here except that you know that this is absolutely one of the worst ideas that any governmental entity has come up with in a while. The whole point of quarterly reporting is to protect the consumer. I do not support this. These are

precarious times in which corporations already have way too much control in this country. To the point that democracy is almost annihilated. You are made up of attorneys. Start thinking like them and remember what your jobs are. If you think for one second that the board of directors of any company at this point is going to act ethically, then it is very clear that you are motivated by a team of people that shouldn't be in Washington, DC to begin with, and that would be the president of the United States and the characters he chose to be on a cabinet.

Paula Mack — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Paula Mack Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission: I oppose this measure. We have enough fraud in this country and the last thing we need to do is go back to bi-annual reporting. Insiders will always have the advantage and thinking for one second that the board of directors of any corporation is going to act ethically without your eyes on them requiring quarterly reporting is absurd. Every time we starve an agency or eliminate a protective barrier, The average consumer/investment pays the price.

Paula p — Jun 16, 2026
Subject: S7-2026-15 From: Paula p Affiliation: Jun. 16, 2026 It is time to stop catering to corporate greed. Everyday Americans have been harmed by the greed of corporations that are not held accountable, making CEO and CFO accountable by requiring them to certify their books quarterly is something they should be doing willingly because that is their job, however, we know that is not the case because they have repeatedly used the defense of “I didn’t know “! The SEC requiring them to certify for their companies books quarterly is in my opinion still not strong enough, but it is certainly better than twice a year which is the proposal. A lot of damage and harm can occur to middle class people in 6 months, don’t let that happen. Keep the quarterly certification in place.

Pavani Chilamakuri Principal Risk Officer, EBRD, London — Jun 16, 2026
Subject: File No. S7-2026-15 From: Pavani Chilamakuri Hello, Reducing the number of public-company reports from four times a year to just two reduces transparency to investors. It could also promote companies to hide losses and cook the books. This is not acceptable. As investors, we are part-owners of the firms we hold shares in and we must have a say. We advocate transparency and we insist on four reports from public companies so that we are kept informed throughout. Two reports per year is insufficient to monitor what's going on with the firm's finances. Also, it adds to the volatility if companies only report twice a year, and we don't need high volatility. Thanks.

Peter Hail — Jun 16, 2026
Subject: File No. S7-2026-15 From: Peter Hail I am writing to comment on File No. S7-2026-15, the proposal to move public companies from quarterly to semiannual reporting. I am personally against it. I am a private investor, managing various stocks as part of my retirement savings and income. Reviewing financial disclosures from public companies is critical to making intelligent and timely decisions in managing my holdings. It seems more and more difficult these days to get frequent, unbiased financial and corporate direction information. Companies need clear standards of disclosure offered at frequent intervals. This must come from the SEC, as corporate self-regulation can only cloud the data needed by private investors. I would encourage you to consider the needs of the public over that of the corporations. Thank you.

Peter Kelly — Jun 16, 2026
Subject: S7-2026-15 Comment From: Peter Kelly Affiliation: Jun. 16, 2026 Maintain quarterly reporting; the general public should have the same information as, private entities.

Peter1 — Jun 16, 2026
Subject: S7-2026-15 Comment From: Peter1 Affiliation: Jun. 16, 2026 I am looking for those people to contact me at peter1365948c@gmail.com to discuss their future. Are you interested in advancing but going to slow? I have learned a great amount from God and the internet, libraries and school. Here is how you can tell. I realize that I know nothing about everything. Let's talk about how to accelerate your learning to succeed a vast multitude of times more than you can without me. I work for free out of love of God and simplicity. If you choose to think with me, contact me. I can show you an expansion of business, engineering, and religious coordinated ideas to begin with or focus on one particular subject of your concern. Life revolves around God in the world of mankind in all countries leading to heaven. Everyone has their own country inside their soul. Hopefully it is the intent of the meaning of the Catholic Church of the 12 Apostles in the tribes of Israel spread all over the world and even the universe and heaven. Avoid hell at all costs. This means you must have no money and own more than you can imagine. Give everything to the poor and you will receive a multitude of galaxies or more. Keep giving what you have received from Jesus through FAITH away to the poor, and you will always receive far more than you can imagine...
Study transportation systems. Wisdom is mobile beyond all motion. The scientific speed of light is zero compared to the speed of prayer to Jesus. God is in heaven and in the universe. God is everywhere except Jesus is not in hell with Satan because hell is lack of God.
After examining 5 to 500000 modes of transportation and which countries have them, consider the many types of fuel if you wish or concentrate on the most useful ones at the lowest price. Consider what money is and how it is made. What is everything worth? It is what one believes. Who controls the laws of taxes and liberties? Who controls the media of your mind? Finally put the Bible, especially the Gospel firmly summarized in your mind and keep refining it.
Study all the materials of importance to you. What is precious is abundant. Don't be afraid to think how to use the air, water, and all the elements in Chemistry realizing that they are theories. All human theory is subject to error and used as tools. This goes for all the Science at Universities too. Make up your own science if it helps you realize it is not real. God is real. Jesus is the Son of God and God the Son. Let's learn how to talk to people all over the world without trying to control them. Put God in control. He already controls life. Let God ever more fully control everything. God is love and life.
Hurt no one. Love everyone. Seek to please God to be happy. Follow your God given conscience. Share it with all.

As a recipient of this information you are obligated to comply with all applicable U.S. export laws and regulations. Actually, this message is meaningless because American & International laws require

you to report any & all criminal activities & you will be held liable as a participant in those crimes after the fact if you do not report an email that indicates criminal activities. Do you understand now that you can be a criminal if you don't report criminal activities? Replying to this email indicates you have read and accept the previous terms and conditions. Even though this email is intended to only go to the named addressee(s), IF you think criminal activities are being perpetrated by the sender or the addressee(s), failure to report the "suspected" criminal activities to the proper authorities in a timely manner may cause you to be charged with a crime. Do not delete this email if you suspect it contains information that is criminal even if you are one of the addressees. Even though some senders tell you to delete any emails where you are not one of the addressee(s) and not to copy, share or forward this email, again, if you do so that may cause you to become involved in that criminal activity.

Phil Livingston — Jun 16, 2026
Subject: File No. S7-2026-15 From: Phil Livingston Cutting the information I receive on the companies that I invest in, from quarterly to semiannual is not a good idea. This very thing has been tried in the UK and to didn't go well.

Phil Walsh — Jun 16, 2026
Subject: S7-2026-15 Comment From: Phil Walsh Affiliation: Jun. 16, 2026 Quarterly reporting protects consumers.

Philip Bloohm — Jun 16, 2026
Subject: File No. S7-2026-15 From: Philip Bloohm Removing the requirement for quarterly reporting removes the transparency with the shareholders of that company. Shareholders are owners and should have more information, not less information, increasing the gap between reporting lessens the information available to those investors. Having to make quarterly reports does not interfere with that company's ability to strive and there is no proof that these quarterly reports hinder a company in any way. Wall Street has come a long way from the 1900's when only privileged individuals had access to the markets to now when most can trade without commissions and have access to nearly the same information as the institutions. A choice to allow semi-annual reporting is a move in the wrong direction. Those companies that opt out of the quarterly reporting requirement are likely the companies that should be required to report quarterly.

Philip costantini — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Philip costantini Affiliation: Jun. 16, 2026 Leave the system alone. I like to see each quarter what my investments are doing and are worth. I want to be able to make a buy/sale decision earlier than every 6 months. If making the change reduces value of stocks then you can't do that to all the small investors!

Philip Crovatto — Jun 16, 2026
Subject: S7-2026-15 Comment From: Philip Crovatto Affiliation: Jun. 16, 2026 I believe it is the responsibility of all publicly traded companies to explain the financial condition of the company

quarterly so that all investors can make decisions from an informed position. Personally, I think shareholders should get the information before the general market.

Philipp Emma — Jun 16, 2026
Subject: S7-2026-15 Comment From: Philipp Emma Affiliation: Jun. 16, 2026 Quarter reports are me essay for accurate and trustable accounting of a companies success or failure. It would leave investors blind as to how thier investment is performing. In these times where financial information is being so easily manipulated it is necessary for more frequent disclosures and filings. Please allow this to stay quarterly.

Phillip Colflesh Individual investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: Phillip Colflesh With today's constantly changing economical, political and environmental conditions, quarterly reporting to investors and perspective stock holders is necessary public information. Upper leadership positions of companies vary and company directives may change that affect one's perspective on investing. Changing financial reports to twice a year would be a disservice to the public.

Phillip Herron — Jun 16, 2026
Subject: File No. S7-2026-15 From: Phillip Herron Please do not change from quarterly financial reporting. Quarterly reporting provides just the right cadence for individual investors to follow the companies in which they own shares. Quarterly reporting provides more transparency which is always a good thing. Semi-annual reporting could even introduce more speculation and volatility into the market since the investment community would have less regular company information to consider.

pz — Jun 16, 2026
Subject: S7-2026-15 Comment From: pz Affiliation: Jun. 16, 2026 Pablo Zurzolo , retired CMO, TDSynnex corp. Having worked for a public company for 30 years, I understand the quarterly pressure to perform and the expense and burden of frequent reporting.
I also know that especially in the technology industry, a 6 month lag in results can actually hide material strategy errors that you can't recover from and that investors should know about as much as insiders and the board. It also allows you to benchmark
against competition to see if your strategy is on track. I don't believe that changing it to twice a year has any benefit, as you still have to track everything as you did before and investors will ask for quarter over quarter information to see the trendline
regardless.

The only thing you save is some paperwork... How about fewer or simpler reports on the same schedule vs less frequency???

Quino Alonzo — Jun 16, 2026
Subject: File No. S7-2026-15 From: Quino Alonzo Research suggests that shortening corporate reporting cycles does not encourage long-term decision-making among leaders of publicly traded companies. Instead, it can obscure whether their strategies are actually working. For example, while three data points may indicate a trend, I would rather see that trend develop over nine months than over eighteen. Publicly traded companies are often compared to large cargo ships because changing course takes time. Therefore, knowing whether or not that course is leading to a successful outcome for the business is better for investors to see over nine months rather than eighteen. Additionally, for smaller companies, reducing their reporting requirements makes them harder to monitor and less likely to own given their already inherent volatility. Furthermore, we have seen companies hide bad their financial behavior with the current quarterly reporting system. How much worse would it be if it were reduced to biannually? I, as an individual investor who is part of The Motley Fool Community, surely does not wish to find out!

R — Jun 16, 2026
Subject: S7-2026-15 Comment From: R Affiliation: Jun. 16, 2026 Stop the stealing... The data they are hiding hurts retail investors . Your agency is supposed to be about transparency.

R D Buckeye — Jun 16, 2026
Subject: S7-2026-15 From: R D Buckeye Affiliation: Jun. 16, 2026 That's right give insider trading an extra 3 months. The system is already rigged against the retail investor the proposal just makes it worse.

Ralph Williams none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Ralph Williams I am writing to comment on File No. S7-2026-15, the proposal to move public companies from quarterly to semiannual reporting. I am strongly opposed to the proposal to allow public companies to abandon quarterly reporting in favor of semiannual disclosures. By this proposal, the commission is limiting my access to information about the companies I invest in, or am researching to discover whether I should invest. I am a self-directed investor, and have no other source of information other than what is publicly available through quarterly reports. I would strongly prefer more information, easier access to information, and more information publicly shared. This allows me to make better choices. The FEC seems not to want me to make good investing choices, and to limit that information to insiders. I understand this proposal seeks to limit "short termism," a supposed tendency to make the quarterly results look good, while ignoring long-term effects. My background within a Fortune 500 company, with access to top

management, tells me that the SEC is trying to improve a non-existent problem. Our top management (like most companies) were thinking years in advance. I personally put together the proposal for a 25-year purchasing plan. Quarterly and annual reports weren't business drivers, they were a way to keep investors informed. I agree strongly with the comment by the small investor organization wallstreetbets: "If quarterly reporting is crushing American capitalism, American capitalism is hiding it well." I believe the Commission is barking up the wrong tree with this proposal.

Ramsey_Jd — Jun 16, 2026
Subject: S7-2026-15 Comment From: Ramsey_Jd Affiliation: Jun. 16, 2026 Jake Agathen, Marketing Campaign Manager:

As an investor, I find it unacceptable to remove quarterly reporting. This will absolutely have a negative impact and the public needs to know all the up to date information when making investment choices.

Randall Odegard — Jun 16, 2026
Subject: File No. S7-2026-15 From: Randall Odegard I have been an investor in the stock market for more than 35 years. This is a bad idea to move away from quarterly results from companies who are publicly listed on US stock exchanges. Companies have filed quarterly results for many many years. It should continue that public companies file quarterly results. Especially now with mergers/Buyouts/ Share purchases. Without quarterly results, this will prevent investors in listed companies, from knowing important details about the companies they are investing their hard earned money into.

Randall Ray — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Randall Ray Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

Randall Sheets — Jun 16, 2026
Subject: S7-2026-15 From: Randall Sheets Affiliation: Jun. 16, 2026 Absolutely essential to prevent fraud. More CEO's deserve prison time for deliberately defrauding investors. Perhaps, monthly reporting might reduce the amount of fraud. In other words increase the reporting to catch the problem earlier.
Randall Sheets

Randall Todhunter Retired IT manager for the transportation industry — Jun 16, 2026
Subject: File No. S7-2026-15 From: Randall Todhunter I am strongly against the proposed change. As an investor, I rely on regular, quarterly reports to provide me with legal, formal information about each of the public companies in which I invest. If that is changed to be only every six months, I am basically flying blind for an extra six months out of every year. I recognize that it is an expense for a company to prepare a public financial report every six months. But, as an owner of the company, via purchasing stock in it, I feel they owe it to me to provide a quarterly update of how they are doing. If they want me to invest in them, I need to get regular, quarterly, updates on exactly how they are doing. I encourage you to keep the reporting requirement at every quarter.

Randy Chevrier — Jun 16, 2026
Subject: File No. S7-2026-15 From: Randy Chevrier I respectfully urge the Securities and Exchange Commission (SEC) to refrain from amending reporting regulations that would permit companies to submit only semiannual reports to shareholders as referenced in file S7-2026-15. As a long-term, buy-and-hold investor who actively reads filings and owns individual stocks, I firmly believe that quarterly reports provide investors with timely, standardized information. This timely information fosters transparency, which is essential for building confidence in U.S. capital markets. Conversely, less information generally exacerbates uncertainty and volatility. Furthermore, quarterly reports contribute to a more level playing field for individual investors. While we may not have access to expert networks, alternative data services, extensive research teams, or frequent management access as institutions do, we possess the 10-Q, one of the few equal-access sources of information available to every investor. Without it, individual investors become second-class shareholders. The 10-Q plays a crucial role in accurately pricing securities in the markets. Delayed reporting can lead to unexpected surprises and diminish investor confidence. It is important to note that 10-Qs are no longer a significant financial burden on companies. Modern accounting systems have already evolved to produce quarterly financial statements, thereby reducing the compliance burden on large public companies compared to decades ago. Any potential cost savings would be outweighed by the diminished investor protection. As a recently retired investor, I rely on current information to monitor our retirement investments and manage risk effectively. Less frequent reporting hinders oversight, and I can only envision that millions of retirees would concur with this sentiment. If the Securities

and Exchange Commission (SEC) believes that reporting burdens are excessive for very small public companies, it is advisable to consider targeted relief for small issuers rather than reducing disclosure requirements for all public companies. For instance, I have held Apple Inc. (AAPL) for several decades, and their accounting costs are negligible on their income statement. However, I review their financials every quarter to ensure that management is continuing to operate my company as promised and that it remains a suitable investment in our retirement fund. Removing this requirement would compel me to reconsider my individual ownership in my preferred public company and make owning any public company a more risky endeavor. Furthermore, the fact that this proposal has not been publicized highlights the disconnect that individual investors face without the 10-Q. I learned about this potential change as a member of the Motley Fool, one of the most prominent advocates for individual investors during one of the most significant market expansions in history. It is unreasonable to believe that 50 years of the 10-Q have negatively impacted public companies. Therefore, it is crucial to retain the 10-Q and maintain market access for all individuals who are willing to read them.

Raqqya Adside-West — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Raqqya Adside-West Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:

I am against Rule S7-2026-15 because a lack of quarterly reporting means a lack of transparency. Defrauding and misleading investors is already illegal, and the act of withholding information that may inform investing decisions is definitely misleading. I have a right to know the performance of my own investments, and 4 times a year is such a low and reasonable number to ask for. Any attempt to lessen it comes across as a way to hide things from investors for the sole benefit of corporations. It is the SEC's job to protect us, so please do your job by scrapping Rule S7-2026-15.

Raquel Perry — Jun 16, 2026
Subject: S7-2026-15 Comment From: Raquel Perry Affiliation: Jun. 16, 2026 Dear SEC:

Quarterly reporting is needed to protect against fraud. This rule must not be changed. Please ensure quarterly reporting remains in place.

Rule S7-2026-15 Is an abomination for hard working people in America. It should not be allowed. We need more transparency from corporations not less. Especially if they are publicly traded. Don't allow this to go forward.

Raye Smith — Jun 16, 2026
Subject: S7-2026-15 Comment From: Raye Smith Affiliation: Jun. 16, 2026 Keep on reporting quarterly.

Raymond Cook Jr none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Raymond Cook Jr 1. Quarterly reporting protects individual investors such as myself. Semiannual reporting will double the information gap between insiders and ordinary shareholders, allowing volatility, uncertainty, and mistrust to grow. 2. The short-termism

diagnosis doesn't justify this change. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the will not manifest. 3. The companies most likely to opt out are the ones where oversight matters most. Reducing their reporting requirements makes them harder to monitor. 4. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it. 5. Uncertainty and volatility are beating at the door with our current administration. Don't add to the chaos.

Raymond Donnelly — Jun 16, 2026

Rhonda Reese Purtee — Jun 16, 2026
Subject: S7-2026-15 Comment From: Rhonda Reese Purtee Affiliation: Jun. 16, 2026 The relationship between investor and corporation is not a trust relationship based on goodwill, faith, and righteousness. It is a transactional relationship based on validated facts, audited financials, and maximum visibility. The only reason to reduce visibility & oversight is to facilitate a greater imbalance that further tilts the benefits toward the corporation and increases risk to the investor. I regularly see the negative results of integrity gaps and manipulation by market pros & corporations on the lives of regular folks, doing their very best to live prudently & responsibly. Quarterly reporting is the minimum requirement that corporations must be obliged to provide.

Regards
Rhonda Reese Purtee
Lead Pastor

Subject: S7-2026-15 Comment From: Richard Affiliation: Jun. 16, 2026 Transparency & accountability are vital. There's too much dishonesty in the market already.

Richard Amado — Jun 16, 2026
Subject: File No. S7-2026-15 From: Richard Amado I oppose reducing the reporting requirement for publicly traded companies from quarterly (four times a year) to semi-annually (2 times a year).

Quarterly reporting is important to investors who want to know how the company in which they hold stock, or intend to hold stock, is performing. Quarterly benchmarks are also frequently used in businesses to manage their own performance and pursue long and short term goals. Compiling these reports is no longer a time consuming burden due to the wide spread use of electronic tracking and reporting tools.

RICHARD AND JODI OLIVER — Jun 16, 2026
Subject: S7-2026-15 From: RICHARD AND JODI OLIVER Affiliation: Jun. 16, 2026 Dr. Jodi Holcomb (DVM)
MD
How much corruption do you think the People can and will…stand? Is this your goal - to be a third world country with third world values? This is NOT what WE THE PEOPLE signed up for.
Keep Quarterly Reporting. PLEASE.

Richard Durante Sr none — Jun 16, 2026
Subject: File No. S7-2026-15 From: Richard Durante Sr As an individual investor for many years and a Motley Fool for the same I would strongly oppose reporting of financials of public companies to just twice a year. We need more information not less about how our investments are doing.

Richard Esthay — Jun 16, 2026
Subject: S7-2026-15 Comment From: Richard Esthay Affiliation: Jun. 16, 2026 I wish to express my opposition to the new SEC proposal that would let bussiness go dark for six months at a time. While the executives, lawyers, and big institutional investors still know exactly how the business is doing. Don't allow this to happen. 😡

Richard F. Ofeldt — Jun 16, 2026
Subject: File No. S7-2026-15 From: Richard F. Ofeldt I understand that the SEC wants to allow public companies to switch from quarterly to semiannual financial reporting – reducing the information that invetors receive from the businesses we own from four times a year to two. I strongly believe that this is a bad move for individual investors – it makes it more difficult to determine how a company is performing and allow crooks to hide issues longer and therefore undermines trust. Please do NOT move forward with this change.

Richard Foulkes — Jun 16, 2026
Subject: S7-2026-15 Comment From: Richard Foulkes Affiliation: Jun. 16, 2026 In an era of Ai there is no excuse for leaving investors in the dark for 3 months past the quarterly standard. It invites suspicion of nefarious dealing before an investor would have realized to add or subtract funds.

RICK MASHISKA — Jun 16, 2026
Subject: S7-2026-15 From: RICK MASHISKA Affiliation: Jun. 16, 2026 Does the gov not realize that holding CEOs accountable has worked for 20+ years? As a student of accounting and a former cost center manager for the DOJ, I hope Congress comes to their senses and realizes that you cannot dregulate industries steeped in greed. Personal accountability for CEOs has proven to be effective!

Rick Schrenker — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Rick Schrenker Affiliation: Jun. 16, 2026 Continuing to rip up social contracts between the various classes in a society has never turned out well. When working people see their life savings decimated by rule changes that benefit the privileged few, they only put up with it for so long before acting in response. This has bern history's lesson for a millennium.

We have lived in a relatively peaceful state for only a few decades. The issue facing the SEC is the degree to which it feels it can move the needle without destabilizing the social equilibrium. It's really that simple.

The Declaration of Independence put it succinctly:

"Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security … "

i do not want to see us descend into civil war. The business of America IS NOT BUSINESS. It is the construction of an alwaysximperfect but always striving for pefect community bonded by the words cited immediately prior to those quoted above:

“We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.--That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed … “

Please hold this in mind as you make your decision regarding quarterly versus semi-annual reporting, or any decision impacting the community that is this nation, for that matter.

Ridlon Kiphart — Jun 16, 2026
Subject: File No. S7-2026-15 From: Ridlon Kiphart It is crucial to both opacity and trust that financial reporting of public companies continue on a quarterly basis. There is real world evidence that reducing reporting to a semi annual basis does not increase nor improve longer term, C-suite driven corporate planning. In addition, quarterly reporting is very important to retail investors as a primary source of decision data that helps to (somewhat) level the playing field between retail investors and institutional investors. There is every reason to continue reporting on a quarterly basis.

Rigo Guerrero — Jun 16, 2026
Subject: S7-2026-15 Comment From: Rigo Guerrero Affiliation: Jun. 16, 2026 In order to make educated investments, we investors-consumers need quarterly reporting.

Robb W — Jun 16, 2026
Subject: S7-2026-15 Comment From: Robb W Affiliation: Jun. 16, 2026 Robert Wijnhausen, VP of Quality, Guild Mortgage.

As someone who invests, the quarterly reporting requirement is incredibly important for many reasons:
updated information to keep me current on the companies who are either using my money or are companies I wish to invest in based on said reporting.
It allows me to make better choices with my money and retirement funds.
This is something companies are doing, internally, already. Reporting to the public is not a cost-heavy maneuver, unless they aren't reporting honestly. And that's at the heart of my opposition to this change; loosening the reins in any way opens the door to institutionalized shady practices that some companies WILL take advantage of (have we forgotten Enron already?).
Quarterly public disclosure allows the retail traders to lose less ground to the insiders, as well. The field is already tilted against the retail trader. This makes it even more lopsided. For that reason, and all the others, this change simply cannot be made.

Thank you

"If you think technology can solve your security problems, then you don't understand the problems and you don't understand the technology."
~Bruce Schneier

Robbie Kohart — Jun 16, 2026
Subject: S7-2026-15 Comment From: Robbie Kohart Affiliation: Jun. 16, 2026 Quarterly reporting is key to the financial health of not only the invested public but also to the companies doing the reporting. Robert Miller — Jun 16, 2026
Subject: S7-2026-15 From: Robert Miller Affiliation: Jun. 16, 2026 Robert Miller, Construction Inspector, MD. This matters because it holds companies accountable to their shareholders. As the country moves completely away from pensions to investment retirement plans more Americans across all walks of life are risking their entire future on corporation benevolence. That is inherently flawed, as corporations have no moral obligations. Rather than extending reporting, the SEC should be shortening it to monthly. While a six month review may serve the wealthy few on the corporate board, it can devastate the general shareholder membership. When the greater mass of investors fall, so shall the nation.

Robert Tichy — Jun 16, 2026
Subject: File No. S7-2026-15 From: Robert Tichy Removal of the requirement to file 10-Q is a mistake. Already the SEC lost control over the factuality, intention, disingenuousness of what C-Suite executives can say about their companies on social media; to remove the requirement to file a TRUTHFUL and accurate 10-Q is to make markets even more susceptible to unregulated commentary, aka "rumor and snake oil". It is the job of the SEC to require truthful filings and to

enforce via actions against filings that are false. Removing those events just makes everything less truthful and invetsors will gradually lose more and more confidence in what US markets represent to the world.

Ron Walker — Jun 16, 2026
Subject: : File #: S7-2026-15 Maintaining Quarterly Reporting From: Ron Walker Affiliation: Jun. 16, 2026 Subject: Input on SEC Proposal: Maintaining Quarterly Reporting Requirements
File Number: S7-26-18

Dear SEC Office of the Secretary,

I am writing to provide my public comment on the Commission's recent proposal to permit optional semiannual reporting for public companies.

As a market participant, I strongly advocate for the retention of mandatory quarterly reporting (Form 10-Q). Quarterly disclosures are essential for maintaining market transparency, detecting emerging financial risks, and ensuring corporate management remains continuously accountable to shareholders. While reducing reporting frequency might decrease administrative costs for some public companies, doing so for all risks sacrificing the timely flow of critical data that investors rely on for sound decision-making.

I urge the Commission to ensure that regular quarterly financial updates remain the standard, or that companies opting to continue quarterly reports face no regulatory disadvantages.

Sincerely,
Ronald K. Walker, DDS

Phoenix, AZ 85048

Rosann Ferri — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Rosann Ferri Affiliation: Jun. 16, 2026 As a concerned investor, and a registered nurse based in Port St. Lucie, FL, I am writing to express profound concern regarding any potential proposals to alter corporate financial reporting requirements from quarterly to semi-annual. For individuals diligently managing their retirement portfolios, the consistent availability of timely and comprehensive financial information is absolutely critical for making informed and effective investment decisions.

Reducing the frequency of mandatory corporate disclosures to just twice a year would severely compromise investors' capacity to accurately monitor the financial health and performance of companies. In today's rapidly evolving economic landscape, relying on data that could be up to six months old introduces an unacceptable level of risk. Decisions based on such outdated figures could lead to significant financial missteps, thereby jeopardizing long-term investment strategies and eroding market confidence. This diminishment of transparency would undoubtedly create considerable uncertainty, rendering it exceptionally challenging for investors to manage their assets prudently.

Moreover, a shift away from quarterly reporting could undermine the foundational principles of market integrity and corporate accountability. It risks obscuring vital operational and financial trends, which are indispensable for both individual investors and professional market analysts. Historical evidence and established practices have consistently affirmed that regular, frequent reporting is a cornerstone of robust capital markets, providing the necessary oversight and data points for fair and informed participation. Less frequent reporting has been repeatedly linked to reduced market efficiency and has proven detrimental to the interests of shareholders.

Therefore, I strongly advocate for the preservation of mandatory quarterly financial reporting. Maintaining these current standards is essential to uphold transparency, facilitate truly informed investment choices, and safeguard the financial interests of all shareholders and the broader investment community. This measure is crucial for fostering a trustworthy and efficient investment environment.

Rose Brenner — Jun 16, 2026
Subject: S7-2026-15 From: Rose Brenner Affiliation: Jun. 16, 2026 It’s important to require quarterly reports to keep on top of how well or poorly the corporation is being managed. Internally, they would be foolish to go six months without evaluating their financial health- and as they will be tracking their financials as they have always done- reporting those results should remain quarterly as they’ve been required for decades now. Investors have a right to see what is happening, so they have the information necessary to make good financial decisions regarding those investments. If changes need to be made to get a corporation back on track it’s vital information for all to have access to these reports in a timely manner.

Subject: S7-2026-15 Comment From: roselps2 Affiliation: Jun. 16, 2026 Seriously? Do We The People need to be slammed even more? No, this is not a "Government " proposal change, but the GREED is! As a tax payer, as a US citizen, the days of fraud, decite, and just rampant greed are over. If your business cannot operate profitability without have to be dishonest about it, then your business deserves to fail. Taxpayers are done with having the burden dumped upon our shoulders. This proposed SEC ruling would allow companies to hide their dishonesty, hide their corruption, and ultimately this will all fall upon the taxpayers. The amount of fraud that has been discovered across the United States in the last 2 years will ultimately prove miniscule to the amount that will finally be exposed. Allowing such a rule change will allow even more dishonest, greedy people to steal money from anyone and everyone. My name is Steven Phelps, I am a retired business owner. I look at what has become of this world, this day and age, and wonder, Just who benefits from such a bad change thus ruling would eventually create. Strike it down, tell the individuals/companies who are asking for this to be honest.

Ross Keegan — Jun 16, 2026
Subject: File No. S7-2026-15 From: Ross Keegan Allowing companies to move to semi annual financial reporting versus quarterly is detrimental to the individual investors like myself. This change would allow companies to hide information for an extra that could potentially swing stock prices violently in one direction or another. It also presents the opportunity for more fraud within publicly traded companies as they will not have to be as transparent with the direction of the company through their fiscal years. More information on a regular basis holds publicly traded companies accountable to their shareholders and allows for individual investors to make more informed decisions on their portfolios.

Ross Polk — Jun 16, 2026

Russ Hunt — Jun 16, 2026
Subject: S7-2026-15 Comment From: Russ Hunt Affiliation: Jun. 16, 2026 Quarterly reporting for corporations should be continued. Longer times between reporting extends the window for insider trading and lengthens the time fraud can go on undetected. I worked in corporate accounting and finance for several years at a fortune 100 company and can tell you that the cost difference between quarterly and semi-annual reporting would be minimal. If you are being told otherwise, you are being misled. As a stockholder in numerous corporations, I want them held accountable for reporting financial results to me and my fellow shareholders on a quarterly basis.

Russel J Hunt
Aurora, IL

RUSSELL CARLSON — Jun 16, 2026
Subject: S7-2026-15 Comment From: RUSSELL CARLSON Affiliation: Jun. 16, 2026 Russell Carlson (retired engineer) - please maintain the quarterly reporting. This is needed to help make investment decisions. Financial data is getting much easier for companies to maintain and present, especially with the improvements in AI. Quarterly reporting should be a minimum.

Sahil Panchal — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Sahil Panchal Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
This change decreases transparency in the markets and hurts the ability of investors to hedge against failing companies. Let's keep some semblance of transparency in the stock markets instead of turning it into a giant casino. This rule only helps large corporations hide their failings where the

free markets would actually punish them for delivering bad outcomes for investors and consumers.

Sallie Bowen — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Sallie Bowen Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Bad idea. A lot can change within a short period of time in the market for publicly traded companies. Disclosures on a quarterly basis help investors stay better informed.
Investors don't need more hurdles to climb over for informed decisions, information is key!!

Sally Smith — Jun 16, 2026
Subject: File No. S7-2026-15 From: Sally Smith Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it.

Sally T Selner Common citizen and owner of stocks — Jun 16, 2026
Subject: File No. S7-2026-15 From: Sally T Selner Stop your move to allow only 2 financial reports per year by publicly traded companies. We who own these companies need more information not less. It seems those who regulate this are not serving the owners of these companies companies but only the big guys. Cut it out and give us all the transparency we deserve and why you exist

corruption

Sam S — Jun 16, 2026
Subject: S7-2026-15 Comment From: Sam S Affiliation: Jun. 16, 2026 Sam Schwing, Sr PM, Accounting, Credit & Finance MBA. This is definitely necessary quarterly. It's reckless to allow this to come to fruition. There is already not enough regulation & backing away from accountability. Last thing that's needed is less oversight specially because of the current administration.

Sam Snyder — Jun 16, 2026
Subject: Public Comment for File Number S7-2026-18 From: Anonymous Affiliation: Jun. 16, 2026 To whom it may concern,

I recently read in regards to the above mentioned proposed rule that based on page 130 " the Commission proposed to amend the rules related to periodic reporting under the Exchange Act to allow certain reporting companies to meet their interim reporting obligations either by filing quarterly reports or semiannual reports at the election of the company.296 If adopted as proposed, a reporting company that elects semiannual reporting would file one semiannual report and one annual report for each fiscal year, filing its interim report on a new semiannual form within 40 or 45 days (depending on filer status) after the fiscal year’s first semiannual period end."

I am opposed to this change! It would seriously impact the retail investor. As a retail investor and relying heavily on our 401Ks and IRAs for retirement, we are in need of up to date information regarding issues, which may effect a company. It is bad enough that current information is already stale and we are getting 3 months delayed data. It would make it extremely difficult to gauge the health of a company and any progress, if it were delayed 6 months.
In this day and age of technology, the SEC should be requiring more up to date requirements and reporting, not pushing it backwards.

Thank-you
Sam Snyder

Samuel Bar — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Samuel Bar Affiliation: Jun. 16, 2026 Quarterly reporting provides the market more timely data for investment decisions, particularly in the retail investor market. While larger hedge funds have access to private data that can help them determine business cycles, most investors do not have access to anything beyond what the companies have to report. If they only do so twice a year, retail investors will be at an even greater disadvantage. Keep the rules in place that have allowed for all the growth and market trust of the past 70 years.

Samuel Bar

Samuel Leyzerov — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Samuel Leyzerov Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
It is ridiculous to believe that limiting scrutiny on corporations in this day and age would result in any positive result. Already, fraud is rampant across all levels of government and organizations and the only people who would benefit from this rule are the fraudsters, maniputers, and con-men who stretch the truth until it breaks. Do not let retail investors be abused.

Samuel Mensah — Jun 16, 2026
Subject: S7-2026-15 Comment From: Samuel Mensah Affiliation: Jun. 16, 2026 Quarterly reporting isn't bureaucracy—it's fraud prevention. Stretch it to six months and bad actors get twice as long to cook the books before anyone notices.
Cost savings" don't matter when retirees lose everything to scams that fester in the dark. Less transparency doesn't reduce fraud—it incubates it. Kill this idea now.

Sam’s Comcast — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Sam’s Comcast Affiliation: Jun. 16, 2026 Please keep the reporting quarterly. I’m a 60 yo and nearly retired. Why fix what isn’t broken?

Thank you.

Sandra — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Sandra Affiliation: Jun. 16, 2026 Quarterly Reporting is necessary to keep
Companies honest. They are using our money and we have the right to know what they are up to in a timely manner. 3 months is long enough and is customary to report to SEC and us what's happening with our investments. Our families could lose our entire life savings and futures if companies are allowed to block us viewing what they are doing for a 6 month period of time.

If everyone loses faith in the stock market due to limited reporting investors leave to find safer options to invest in. Please keep the 3 month window.

Sara Allison — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Sara Allison Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
As a small business accountant, I know the importance that quarterly reports play in business decisions and in noticing problems sooner rather than later. Reporting less often is just a way for those on the inside to fudge things up without outside scrutiny to enforce accountability and therefore hurt the investments of retail individuals and small businesses. As a side note the entity where we invest our money should be, at a minimum, held to the same standards that the rest of the individuals and small businesses are. If anything, they should should have more stringent reporting standards, not less.

Sarah Ann Overs — Jun 16, 2026
Subject: S7-2026-15 From: Sarah Ann Overs Affiliation: Jun. 16, 2026 My name is Sarah Overs and I am a retired widow who has been accountable for my actions everyday of my life! I pay particular attention when my actions involve other people,whether they are my direct responsibility or not. In the case of this proposed SEC ruling I am vehemently opposed. Noone has any business holding these positions if they are not willing to take accountability for the actions they are in charge of directly or indirectly. As a CEO I would want to be aware at the minimum quarterly as to what has transpired. As a consumer I rely on these reports for important decisions on my investments,as I am sure a vast number of others do also. This is at best a minimal responsibility, and a tool for checks and balances that should be the upheld as is and not changed to just 2x per year. We are in a fast paced and ever changing financial and business climate, these things should be monitored closely and their should be consequences for when the ball is dropped. This will also influence voting a big fat no for those who continue to push for this irresponsible legislation. It is the politicians job to protect the public as a whole not to make a handful of CEO's jobs less accountable.

Sarah Keohane Williamson, CEO, FCLTGlobal — Jun 16, 2026
June 16, 2026
Securities and Exchange Commission
Re: File No. S7-2026-15 — Proposed Amendments to Permit Optional Semiannual Reporting by Public Companies
Dear Chairman Atkins and Commissioners:
FCLTGlobal respectfully submits this comment in response to the Securities and Exchange Commission's proposed rule amendments that would permit public companies to elect semiannual reporting in lieu of quarterly reporting (Release No. 33-11414, File No. S7-2026-15).
FCLTGlobal is a nonprofit research organization whose mission is to mobilize companies and investors to focus capital on the long term. Our membership spans asset owners, asset managers, and corporations domiciled in countries around the world that support a longer-term framing in corporate and investment decision-making
This proposal is a meaningful step toward reducing structural short-termism in U.S. public capital markets — a problem FCLTGlobal has studied and documented over more than a decade. We offer the comments below to both affirm the proposal's direction and to identify several considerations.
1. Long-term Investment is Critical in Both Public and Private Capital Markets
The quarterly cycle in the United States reinforces a systematic bias toward short-term decision-making that is costly to companies, investors, and the broader economy. FCLTGlobal's foundational research found that 88 percent of executives agree that operating with longer time horizons would improve financial performance.1 Yet the same

executives reported feeling constrained by a market infrastructure built around the 90-day interval.

Quarterly reporting creates a cadence that organizes management attention, investor expectations, and media coverage around three-month intervals. Even where companies resist the temptation to manage around quarterly targets, the surrounding ecosystem of analyst consensus models and earnings calls reinforces a short-term orientation that is difficult to overlook.

The investment case against short-termism is equally compelling. McKinsey research found that from 2001 to 2014, long-term oriented firms cumulatively grew revenues on average 47 percent more than other firms, with less volatility, and realized earnings growth

1 FCLTGlobal. “Rising to the Challenge of Short-Termism.” FCLTGlobal. September 28, 2016. https://www.fcltglobal.org/resource/rising-to-the-challenge-of-short-termism/.

36 percent higher over the same period.2 Structural reforms that give companies room to operate on longer planning horizons can both protect investors and support capital formation.

The Impact of Private Markets

The operating environment has also changed substantially since the quarterly reporting requirement was last examined. The U.S. private markets have expanded dramatically in scale and sophistication over the past two decades. Private equity, private credit, and venture capital now deploy capital across a far wider range of industry sectors and company stages than was true when quarterly reporting norms were established.

Critically, companies operating within these private market structures face no mandatory quarterly disclosure requirements and are subject to materially lower reporting burdens than their public-market counterparts. The resulting asymmetry has become a structural force shaping the IPO decision.

This outcome narrows the investment universe available to retail and institutional investors operating in public markets. Reducing the reporting burden through optional semiannual filing recalibrates the cost-benefit equation in a way that makes public market participation more competitive with private alternatives.

2. In Support of the Proposed Framework

When the Commission previously solicited comment on quarterly reporting standards in 2018 and 2019, FCLTGlobal submitted formal recommendations that included permitting companies to choose between a quarterly schedule and a half-yearly reporting model, provided they adopt a higher standard for interim disclosure of material information.3 The Commission's current proposal reflects that approach, and we are pleased to see it move forward.

An opt-in framework is the right mechanism for this reform. Different companies operate on different business cycles; a mandatory shift for all companies would be both unnecessary and potentially counterproductive. By contrast, an optional framework allows companies and their boards to make disclosure frequency decisions that reflect their operating models, in dialogue with their investors. It also reduces the disincentive for companies considering going public.

We also note that this approach aligns U.S. markets with practice in other jurisdictions. The United Kingdom and European Union have, for some time, permitted companies to report at a lower frequency, complemented by requirements for timely disclosure of material events. Experience in those markets does not support the concern that reduced reporting frequency leads to a deterioration in transparency. What it does suggest is that

2 FCLTGlobal, and McKinsey Global Institute. “Measuring the Economic Impact of Short-Termism.” FCLTGlobal. February 8, 2017. https://www.fcltglobal.org/resource/measuring-the-economic-impact-of-short-termism/.

3 FCLTGlobal. “FCLTGlobal Weighs in on Quarterly IR Communications with the SEC.” FCLTGlobal. August 15, 2025. https://www.fcltglobal.org/resource/fcltglobal-weighs-in-on-quarterly-ir-communications-with-the-sec/.

investor protection can be maintained when companies are not forced to organize all external communication around artificial 90-day intervals.

A 2023 study of Japanese firms demonstrated that when companies were required to report quarterly, managers systematically reduced R&D spending and adjusted operations to meet near-term targets.4 Parallel findings emerged in Europe: research published in The Accounting Review found that firms subject to mandatory quarterly disclosure engaged in short-term manipulation, saw brief performance improvements, and then experienced subsequent deterioration.5

3. Key Considerations to Strengthen the Framework

We offer the following observations to help ensure the framework achieves its objectives:

Addressing Investor Concerns About Information Asymmetry

We recognize that a meaningful segment of the investor community has expressed concern that reduced reporting frequency will widen the information gap between companies and their shareholders, increase capital costs, and introduce greater volatility. However, we believe these concerns are best addressed through the design of the framework rather than rejection of the proposal. The opt-in structure ensures companies elect semiannual reporting only where their boards and investor base support it, and robust continuous disclosure requirements for material events can ensure investors receive timely, relevant information regardless of the base reporting cadence (more below).

Enhanced Material Event Disclosure

Any reduction in mandatory reporting frequency must be paired with rigorous requirements for continuous disclosure of material developments. Investors relying on semiannual reports rather than quarterly reports must be assured that significant events that a reasonable investor would consider important will reach the market promptly. We recommend that the Commission provide explicit guidance on the heightened expectation for Form 8-K and related material event disclosures that should accompany an election to file semiannual reports.

Distinguishing Reporting from Guidance

It is critical, in the Commission's final rule and any accompanying interpretive guidance, to maintain a clear distinction between mandatory reporting (the retrospective disclosure of historical financial performance) and voluntary earnings guidance (forward-looking projections of near-term results).

4 Keita Haga, Akinobu Shuto, and Takuya Iwasaki, “Does Mandatory Quarterly Reporting Induce Managerial Myopic Behavior? Evidence from Japan,” Journal of Contemporary Accounting & Economics 19, no. 3 (2023), https://www.sciencedirect.com/science/article/abs/pii/S1544612323005147.

5 Jürgen Ernstberger, Benedikt Link, Michael Stich, and Oliver Vogler, “The Real Effects of Mandatory Quarterly Reporting,” The Accounting Review 92, no. 5 (September 2017): 33–60, https://doi.org/10.2308/accr-51705.

Quarterly guidance and quarterly reporting create a self-perpetuating cycle. FCLTGlobal's research has consistently shown that it is quarterly EPS guidance that most directly drives short-term corporate behavior.6 Companies playing the quarterly guidance game attract transient, short-term-oriented investors, face pressure to manage around self-imposed short-term targets, and underinvest in R&D, talent, and other long-term value drivers. The share of S&P 500 companies issuing quarterly EPS guidance has already declined substantially (from nearly 50 percent of large-cap companies in 2004 to approximately 21

percent in 2024)7 as management teams have recognized the practice's costs. More than 75 percent of institutional investors surveyed by FCLTGlobal indicated that companies should move away from quarterly guidance, and fewer than 7 percent said they wanted guidance on any metric for periods of less than one year.8

A company that elects semiannual reporting but continues to issue short-term EPS guidance will capture only limited benefit from reduced reporting frequency. Conversely, a company that eliminates quarterly guidance while maintaining quarterly reporting may realize significant gains in its long-term investor base and strategic flexibility. The Commission should make clear that the proposal addresses reporting frequency, and that the SEC does not expect or encourage short-term guidance but welcomes companies to provide investors with a long-term strategic framework — a forward-looking articulation of the company's three-to-five-year objectives, KPIs, and capital allocation priorities

Alternative Reporting Formats as a Complement to Reduced Frequency

FCLTGlobal has previously recommended that the Commission explore alternative reporting formats as a complement to any change in reporting frequency, including year-to-date cumulative reporting and trailing twelve-month presentations. These formats maintain continuity of information for investors while reducing the quarter-to-quarter variance that can distort business decisions. We encourage the Commission to consider how Form 10-S could incorporate or permit such formats, giving companies flexibility not only in when they report but in how they present performance trends.

4. Conclusion

FCLTGlobal supports the Commission's proposed amendments permitting optional semiannual reporting. The proposal reflects a well-grounded recognition that the existing quarterly reporting mandate imposes structural costs on long-term investment and that a one-size-fits-all approach does not serve all companies or investors equally.

Since the quarterly reporting standard was last examined, private markets have grown into a formidable alternative operating without comparable disclosure obligations. The proposal offers an opportunity to reduce that asymmetry and to make public markets more

attractive to the companies and long-term investors who have been drifting toward private alternatives.

Well-designed disclosure frameworks are foundational to efficient capital markets. The critical factor is not how frequently companies report, but whether the information investors receive helps them make well-informed, long-term decisions. The Commission's proposal moves the framework in that direction.

We welcome the opportunity to discuss these issues further and are glad to make our research available to Commission staff.

Saul London — Jun 16, 2026
Subject: File No. S7-2026-15 From: Saul London Please maintain the quarterly reporting requirement. Quarterly reporting is working. Quarterly reporting gives more information to investors and makes it clear when a company is getting into trouble. Thank you.

Savannah Esworthy The Motley Fool Editorial Lead — Jun 16, 2026
Subject: File No. S7-2026-15 From: Savannah Esworthy My name is Savannah Esworthy, and I serve as an Editorial Lead at The Motley Fool, a financial media company that has spent more than three decades helping individual investors make better decisions with their money. In that role, I oversee a large team of writers and editors who cover public companies, industries, and markets for millions of retail investors in the United States and abroad. Our work depends on timely, high-quality disclosures from public companies, and our readers' financial outcomes depend on those disclosures even more. I am writing to respectfully urge the Commission not to adopt the proposal to allow public companies to move from quarterly to semiannual reporting. Reducing the frequency of periodic reports would materially disadvantage individual investors relative to corporate insiders and professional market participants, widening an information gap that Regulation FD and decades of disclosure policy have sought to narrow. Quarterly reporting is one of the few tools that helps ordinary shareholders keep pace with those who have greater access and resources. When companies report only twice a year, more of the meaningful information about their performance, risks, and capital allocation decisions will be conveyed first through selective channels: conferences, private meetings, and other venues that are inherently less accessible to the typical retail investor. That is precisely the environment in which volatility, uncertainty, and mistrust tend to grow. The proposed change is also not supported by the evidence on "short-termism." Proponents have suggested that fewer required reports will encourage longer-term corporate behavior. However, research on similar changes in the U.K. market has found no meaningful link between reporting frequency and corporate investment horizons. In other words, the proposal accepts a clear and concrete cost—less transparency for individual investors—for a hoped-for benefit that empirical evidence suggests is unlikely to materialize. From the vantage point of an editorial operations leader, I see daily how quarterly 10-Qs and related disclosures underpin informed financial journalism and, by extension, informed investing. Our writers and analysts rely on these recurring, standardized snapshots of company performance to identify trends, flag emerging risks, and call out inconsistencies between a company's narrative and its numbers. When those snapshots arrive only twice a year, coverage will inevitably become more backward-looking, and it will become harder for individual investors to react promptly to material changes in a business's trajectory. The companies

most likely to take advantage of reduced reporting obligations are also the ones where robust oversight is especially important. Smaller and less widely followed issuers already operate under lighter market scrutiny. If they are permitted to move from quarterly to semiannual reporting, the practical result will be longer periods in which investors lack standardized, comparable data and must instead rely on management's selective communication. That does not make these businesses easier to understand or own; it makes them more opaque. This proposal also runs counter to the spirit of prior Commission efforts to promote fairness in the markets. Regulation FD was designed to move the system toward a more level informational playing field. Allowing issuers to report only twice a year moves in the opposite direction—toward a market in which well-connected participants can trade on fresher information while ordinary shareholders must wait months for the next comprehensive update. I recognize and appreciate the Commission's interest in reducing unnecessary burdens on public companies. But any recalibration of those burdens should, in my view, preserve and strengthen the core protections that periodic reporting provides to individual investors. If the Commission believes that aspects of the reporting regime are unduly costly or encourage an unhealthy focus on short-term metrics, there are more targeted alternatives available, such as refining specific line-item requirements, modernizing formats and technology, or offering relief in limited circumstances where investor protection is less directly implicated. In my work at The Motley Fool, I am in daily contact with freelance contributors, staff writers, and editors who represent a broad cross-section of individual investors. Many of them are long-term shareholders who embrace volatility and focus on multi-year outcomes. They do not view quarterly reports as an obstacle to long-term thinking. On the contrary, they rely on them as a discipline that forces management teams to communicate regularly and candidly about their progress toward long-term goals. For these reasons, I respectfully urge the Commission to maintain quarterly reporting as the standard for U.S. public companies and not to adopt the proposed shift to semiannual reporting. At a minimum, if the Commission proceeds, I encourage you to substantially narrow the scope of any such relief and to incorporate safeguards that preserve timely, standardized information for the individual investors who increasingly power our public markets. Thank you for the opportunity to comment on this important proposal and for your continued work to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation.

Scott Hollingsworth — Jun 16, 2026
Subject: File No. S7-2026-15 From: Scott Hollingsworth Please do not reduce the reporting requirements from quarterly to semi annual. Providing less information is harmful to investors. As an investor (and by extension, business owner) I rely on reporting tools to make decisions. Less frequent information negatively affects an investors ability to understand the business and make informed decisions. Regular, transparent communication from a business is important and reducing reporting requirements weakens the connection between companies and their owners. This change would not ease the pressure to manage quarter to quarter. Short-term management is short sighted and how investors behave or react to quarterly information is separate and apart from the release of the information itself. Taking the reports away doesn't make anyone more patient. It just makes everyone less informed. Thank you.

Selena Maranjian contractor/writer for The Motley Fool — Jun 16, 2026
Subject: File No. S7-2026-15 From: Selena Maranjian I write to strongly oppose the proposed rule

change. It doesn't look like it will improve anything -- our IPO volume, for example, has been rising, apparently unencumbered by reporting frequency requirements. Indeed, America's quarterly reporting system is a big plus, as it offers investors MORE information than nations requiring only semiannual reports. A lot can happen with a company from quarter to quarter, and this rule will only serve to give investors less information. Many investors are depending on these investments for retirement income, too -- why short-change them? I respectfully urge the Commission to preserve quarterly reporting and the 10-Q. Thank you.

Serena Robison — Jun 16, 2026
Subject: S7-2026-15 Comment From: Serena Robison Affiliation: Jun. 16, 2026 My name is Serena Robison and I am 71 year old retiree who has investments.
I oppose extending the required reporting period from three months to six months. As an individual investor, I rely on timely financial disclosures to make informed decisions about the companies in which I invest. Doubling the reporting interval would reduce transparency and leave investors with less current information about a company's financial condition, risks, and performance.

More frequent reporting promotes accountability and helps maintain confidence in the markets. A six-month reporting cycle could increase uncertainty, allow significant problems to go undisclosed for longer periods, and make it more difficult for investors to accurately assess the value of their holdings. Timely reporting is essential to fair and efficient markets and helps protect individual investors like me.

Seth Hammond — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Seth Hammond Affiliation: Jun. 16, 2026 My name is Seth Hammond. I am working as a consultant for small business doing government contracts. I live in Miami, FL. I have been an investor for over half my life, starting at an early age, and this transparency is important to me. Public companies need to be accountable and transparent with their earnings for investors. Changing this rule is awful for the public.

Seth Rockswell — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Seth Rockswell Affiliation: Jun. 16, 2026 I strongly oppose the SEC proposal to reduce public company reporting from quarterly to semiannual disclosures. This proposal moves our capital markets in exactly the wrong direction. The future of finance is not built on less information. It is built on more information, more transparency, and more accountability. We live in an era of real time data, artificial intelligence, cloud computing, and instantaneous global communication. Asking investors to wait six months for meaningful financial disclosures is an antiquated aproach that belongs to a previous century, not the next one.
The SEC should be investing its time, energy, and resources into creating a future of information abundance, not information scarcity. The goal should be radical transparency, broader access to corporate data, and more frequent reporting, not less. Markets function best when information flows freely and efficiently. Investors, employees, retirees, and the public deserve timely access to the facts that affect their financial decisions.
Reducing disclosure frequency creates larger information gaps, increases uncertainty, and concentrates informational advantages in the hands of insiders and sophisticated institutions. It weakens accountability and undermines confidence in our markets.
The Commissions mission is to protect investors and maintain fair, orderly, and efficient markets. The path forward is not fewer disclosures. The path forward is an information rich marketplace where transparency is expanded, reporting is modernized, and investors have access to more timely data than ever before.
Do not lead Americas capital markets backward into an era of information rationing. Lead them forward into an era of information transparency, investor empowerment, and market acountability.

Best always,

Scott Ebsen

Sharon Baker — Jun 16, 2026
Subject: File No. S7-2026-15 From: Sharon Baker Sharon Baker, retired teacher, Farmersville, Texas This matters to me not only for myself, but for my children and all young people trying to get by in this economy. The American middle class and working poor are losing ground: everything is against them. Our taxes are still high as we stretch every penny as far as possible. Meanwhile, the uber rich have their already laughable tax rate being lowered again. Our cost of living is soaring as prices for necessities continue to rise. Americans are still losing in earnings. Multi-billionaires and their corporations are rolling in the dough while laughable wages are thrown to the people who are making them richer: their employees. The Trump administration continues to demean the working class and working poor, insinuating that these little people are just not trying hard enough. Meanwhile, they engage in such practices such as insider trading, slush funds, side deals, and out-and-out bribes. Trump just said the quiet part out loud (bless him): the war that he started supposedly about Iran creating nuclear weapons (extremely doubtful due to President Obama's agreement with them) is all about the oil. The petroleum industry pays a lot of our elected leaders for favorable terms while gas prices soar. But that's not enough. WIC, school lunches, Medicaid, child care, USAID, and the Affordable Care Act are brushed aside in deference to the uber rich. The Silent Majority is getting louder every day. With the mid-terms looming, I hope Americans see the writing on the wall, pay attention to the candidates and where their campaign contributions originate, and throw the bums out!

Sharon Beehler — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Sharon Beehler Affiliation: Jun. 16, 2026 I do not want to see quarterly reporting go away. It’s been proven by history and also in comparison to other countries that do not do quarterly reporting how much money Americans would stand to lose in their savings, most importantly, their retirement savings. I’ve already had to put off my retirement by one year so far because of inflation and I don’t want to have to put it off again because my savings have been negatively impacted by changing the transparency of quarterly reporting.

Sharon Blaha None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Sharon Blaha I strongly disagree with this proposed rule S7-2026-15. As a citizen who is responsible for managing my own finances, I rely on truth in reporting for businesses in reporting accurate and timely financial information. Decreasing the reporting frequency prevents me from being able to act in a timely manner to protect my finances from companies and CEOs who would perpetrate fraud on investors. There is a reason companies like Enron are able to steal and defraud investors, it is because they are able to hide their activities until it is too late for investors to act to protect themselves. In this day and age, it is critical to provide rapid and timely information to investors. We cannot go back to policies that were appropriate during the 1950's when US mail service was how information was relayed. Financial reporting must stay current and available at least quarterly to protect investors from fraud.

Sharon Huggins — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Sharon Huggins Affiliation: Jun. 16, 2026 Accurate, timely information matters in making informed decisions. As a retired couple, we rely on our investments to supplement our pensions and social security income. Quarterly reporting offers a more accurate picture than semi-annual reporting and allows investors to respond to market changes more accurately than less frequent reporting.
The purpose of the SEC is to protect investors and less frequent reporting fails to protect investors as well as quarterly reporting.

Sharon Opfermann — Jun 16, 2026
Subject: S7-2026-15 Comment From: Sharon Opfermann Affiliation: Jun. 16, 2026 Sharon Opfermann , retired

Most of my retirement is tied up in stocks, and it is important to know the performance of those stocks on a frequent basis. I worked for a stock held bank for 17 years and it's simply not that difficult to do quarterly reporting. This frequency is important to everyone who has money invested in stocks with the hope of building a nice nest egg.

Sharon Petroski — Jun 16, 2026
Subject: S7-2026-15 From: Sharon Petroski Affiliation: Jun. 16, 2026 Sharon Petroski, legal assistant, California. The SEC should remain on a quarterly basis, this is why. Investor transparency: Investors receive regular updates on a company's financial condition
rather than waiting six months or a full year. Market efficiency: More frequent disclosure helps stock prices reflect current information, reducing information gaps and speculation. Accountability: Management is required to regularly explain results and risks,
making it harder to hide problems for long periods. Fraud detection: Frequent reporting can help regulators, auditors, and investors identify financial irregularities sooner. Equal access to information: Public disclosures reduce the advantage of insiders
or large institutional investors who might otherwise obtain information earlier.

Sharon Shaner — Jun 16, 2026
Subject: S7-2026-15 From: Sharon Shaner Affiliation: Jun. 16, 2026 Keep the current requirements for CEOs to certify their quarterly reports. Why?

The 2008 global economic breakdown and the Great Recession. Enough said.

Do your job, protect the American people and the economy. Safe guards are in place, keep them.

Abandon your efforts to require less accountability for CEOs. Have we not learned what happens when you let companies police themselves? 2008 - Enron's defense was "I didn't know" and they created the 2008 worldwide economic collapse. So congress fixed it and required CEOs to certify every quarterly report and face prison and million dollar fines if the reports are false. The only reason to change this is to allow the bad guys to have free reign again. This is unacceptable.

After 2008, The U.S. Financial Crisis Inquiry Commission, composed of six Democratic and four Republican appointees, reported its majority findings in January 2011. It concluded that "THE CRISIS WAS AVOIDABLE and was caused by:

*Widespread FAILURES IN FINANCIAL REGULATION, including the Federal Reserve's failure to stem the tide of toxic mortgages;
*Dramatic breakdowns in corporate governance including too many FINANCIAL FIRMS ACTING RECKLESSLY AND TAKING ON TOO MUCH RISK;
*An explosive mix of excessive borrowing and risk by households and Wall Street that put the financial system on a collision course with crisis;
*Key policy makers ill prepared for the crisis, lacking a full understanding of the financial system they oversaw; and SYSTEMIC BREACHES IN ACCOUNTABILITY AND ETHICS AT ALL LEVELS ."[34]

Quarterly reporting would only benefit the corporate interests. There is a lot of trouble that could happen in a 6-month timeframe. Investment income would be severely impacted, all the assets supporting retirement funds and shareholder's income would be ruined. Neither shareholders or fund managers will benefit. Companies could be potentially harmed as well, when/if profits fall and large chunks of investment is pulled after a negative 6 months.
Please don't do this

Shawn Kennedy — Jun 16, 2026

Shelby McFaddin — Jun 16, 2026
Subject: File No. S7-2026-15 From: Shelby McFaddin It would be a grave mistake to eliminate the obligatory filing of the SEC form 10-Q. At this point, the man power required to produce these reports is not so significant that public companies are leaving gains on the table in order to keep investors informed. Further, as work becomes more efficient with the advent of agents and other autonomous assists, there's functionally no weight in that argument. Less frequent reporting means a lower volume of information in the public sphere. This creates an advantage to larger firms and research houses who can and will interface with companies in between semi annual reporting while retail investors only get information once a year. While the volatility will be condensed to twice per year compared to four times around releases, this also means that investors may not get the opportunity to act on intra-filing catalysts in a way they once could. I cannot see how the elimination of the 10-Q advantages the competition of- and free flow of information within the public markets. This move serves only the few.

shirley Buckhanon-Mouton — Jun 16, 2026
Subject: S7-2026-15 Comment From: shirley Buckhanon-Mouton Affiliation: Jun. 16, 2026 Shirley Buckhanon-Mouton
Relationship Manager
Series 6, 63, 65

I view this as just another way to keep the little man uninformed and vulnerable to being fleeced. Most of us already don't know as much or anything about the companies our retirement plans are invested in. Companies are looking to almost guarantee their profits by withholding information that might cause us to sell or get out of the market altogether. Trying to make the rich richer and the middle class poorer. We are dangerously close to modern day serfdom now, and this will speed up the process.
Investors need more disclosures written in laymen's terms, not sporadic information at a company's discretion.

Simona Combi — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Simona Combi Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
Those of us who work for wages and need to save for retirement are at the losing end of this change.
While companies will continue to give big insitutional investors and insiders this vital quarterly information, we'll be in the dark and won't have timely, accurate information to help us make good investment decisions.
This will directly impoverish most of us, while handing out a big chunk of the economy's gain to those already at a big advange.
We work hard to save in our retirement accounts only to have this potentially wipe them out. This rule undermines the transparency the market needs to function properly.
Simona Combi

Simone Brown — Jun 16, 2026
Subject: S7-2026-15 Comment From: Simone Brown Affiliation: Jun. 16, 2026 I guess corporations don't have enough, rob people of what they have left. This isn't the American way, this is more like something China would do. Just because they have lobbyist doesn't make it right, it makes it theft! America is suppose to be about capitalism, not crony capitalism, which is where we are. The only reason they want to do this, is to steal more money from people who already have less. give them more time to make shady transactions so more people will lose what little they have so we can have maybe 2 or 3 trillionaires and a bunch of starving people. The fact that this is even being proposed, Show's how corrupt our government is. Crony capitalism! The people will lose, AGAIN

Siri — Jun 16, 2026
Subject: S7-2026-15 Comment From: Siri Affiliation: Jun. 16, 2026 Keep reporting as it is. Big business and the wealthy don't need any more ways to hide what they are doing with their money.

Slade Rheaume — Jun 16, 2026

STOP ALLOWING PEOPLE WITH MONEY MAKE NEW RULES FOR THE REST OF THE WORLD! I don't want any of these companies in the market at all! STAND UP

Stephen Bandrowsky The Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Stephen Bandrowsky Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-termism diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out

are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it.

Stephen Dowling — Jun 16, 2026
Subject: File No. S7-2026-15 From: Stephen Dowling I'm very against the proposed change. There should be more information available. There is no likelihood that organizations will change their behavior solely based on providing less information. This change will primarily benefit insiders.

Stephen Grace — Jun 16, 2026
Subject: S7-2026-15 From: Stephen Grace Affiliation: Jun. 16, 2026 I strongly oppose the proposed rule S7-2026-15, which would reduce public company financial reporting from quarterly to semi-annual disclosures.

Quarterly reports provide investors, like me, with timely information and help ensure transparency, accountability, and confidence in our financial markets. With fewer required disclosures, company executives and others with access to nonpublic information could possess information for longer periods of time before it is made available to the rest of us, individual investors. This extended gap in releasing information could create more opportunities for insider trading, as well as cause an appearance of unfair advantages, undermining the public's trust and integrity of the markets.

The strength of U.S. markets has always been built on frequent information disclosure requirements. Those requirements should be maintained, or even increased, but definitely not reduced.

Regular reporting helps ensure that all investors have access to important financial information and data on a more equal basis. Not to mention, with today's fast changing world, ever changing economy, and the volatility of certain sectors, public companies' financial information should continue to be released on a regular quarterly basis to allow for a more level playing field for everyone. This same information if not required to be released but only twice a year will allow companies the opportunity to keep highly influential information, that should be transparent, from the public for longer periods of time greatly influencing individual investors investment decisions while significantly reducing the people's trust in the system.

If anything, individual investors deserve more transparency, not less. Please do not pass this semi-annual disclosure rule or law.

Sincerely,

Stephen Grace
Jackson, TN

Stephen Haddad — Jun 16, 2026
Subject: File No. S7-2026-15 From: Stephen Haddad Markets benefit from more transparency. I think less reporting is a move in the wrong direction. As an owner of these businesses, I believe four updates a year is adequate for judging performance.

Stephen Johnson — Jun 16, 2026
Subject: S7-2026-15 Comment From: Stephen Johnson Affiliation: Jun. 16, 2026 Financial transparency is key for investors to make decisions. If this is taken away from us how can we trust any company's books anymore? I think the proposal is a bad idea and must be stopped. Stephen Johnson.

Steven Larsen Managing Partner, Centricity Systems, Inc. — Jun 16, 2026
Subject: File No. S7-2026-15 From: Steven Larsen As part of the Motley Fool community, I strongly disagree with the current SEC proposal to switch quarterly reporting to semi-annual. Individual investors, such as myself, require more transparency, not less. I believe it undermines the trust in financial disclosures and health of industries and companies alike.

Steven Lowen — Jun 16, 2026
Subject: S7-2026-15 From: Steven Lowen Affiliation: Jun. 16, 2026 Quarterly Reports allow an almost constant stream of ‘Facts’ that is vital to comprehension of that entity. This, above all points out trends, opportunities, trouble spots, and specifics that need immediate attention. Investing, evaluating and anticipation is kept relevant by more frequent reporting.

Steven Lundeen — Jun 16, 2026
Subject: S7-2026-15 From: Steven Lundeen Affiliation: Jun. 16, 2026 It is ludicrous to change the reporting. To two times a year. Companies need to report to their shareholders and the public more

than twice a year.

STEVEN MOSSHAMMER — Jun 16, 2026
Subject: S7-2026-15 Comment From: STEVEN MOSSHAMMER Affiliation: Jun. 16, 2026 Keep the 3 month rule, or better yet make ít a requirement to report every month so the the share holder has a better idea of where there money is going.

Steven Shore — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Steven Shore Affiliation: Jun. 16, 2026 Reporting should absolutely remain quarterly and not revert back to the semi 1955 method.
Allows for quicker reaction times for companies and provides investors a better pulse on their investments.

I worked in academia (both public school K-12 and university) for 40 years. Reporting more often gave a much more accurate indication of progress and allowed “customers “ (students and parents where relevant too) better opportunities for early intervention when necessary! Some schools required additional monthly reports in addition to quarterly official reports.

Steven Spandorf — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Steven Spandorf Affiliation: Jun. 16, 2026 Having worked for 50 years, and made my money work for me, every dollar counts. I have watched as bad policy has stripped the dollars value to a shadow of its former self. Add to this the end result, less buying power in retirement, and reaping the results of that time and labor creates a decreasing return, an inexorable squeeze on our ability to afford the necessities of life. I struggle to understand the addition of another policy which will add to the burdens that exist in modern day life. What is apparently the return to abandoned policy for the benefit of the SEC and those least likely to be affected negatively by it, you will impoverish those least likely to be able to afford it. The only creation of this policy will be a whole new class of the poor. Scant reward for a life spent planning for the future. Steven Spandorf,MSgt, USAF (ret.)

Steven Wiggins — Jun 16, 2026
Subject: S7-2026-15 Comment From: Steven Wiggins Affiliation: Jun. 16, 2026 My name is Steve, and I am a software engineer that enjoys trading options. I read a lot of financial news, earnings reports, and other analysis that would be negatively impacted by the lack of transparency in elongating the window between reports. Quarterly reporting would be a step backwards for out

markets and its participants. In a more connected world, there is no excuse for less information from companies. If the SEC's job is to help protect investors, then the decision to go by half year would be against that interest.

---

stevet — Jun 16, 2026
Subject: S7-2026-15 From: stevet Affiliation: Jun. 16, 2026 Quarterly reporting must stay. This isn't about paperwork and expense reduction. It's about accountability. This will weaken, by half, The SECs reach and enforcement ability. For you can't enforce what you don't know about. An extra 3 months will allow time for cover ups and more audacious fraud.

This is t just about corporate accountability. This speaks mostly to the SECs accountability for performance of their mission. Politicians and administrations go every 4 years. The SEC and the results of their regulation have much longer reach. So the right thing, quarterly reporting.

Suzanne Norton — Jun 16, 2026
Subject: S7-2026-15 Comment From: Suzanne Norton Affiliation: Jun. 16, 2026 Stick with quarterly reporting. Otherwise, the average person (who doesn’t have access to insider information on the company’s financial operations) has less time to know when things have gone belly-up and therefore less time to pivot with their own finances, leading to a greater potential loss for John Q Public! This 6 month reporting idea leads to less transparency- which is no doubt what our current regime is going for…

Tadd Casper — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Tadd Casper Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
I am an active investor and I feel that the proposed rule change is detrimental to retail investors and traders. By keeping retail in the dark, it does nothing but harm them as current, up-to-date information is the only way to reliably invest. True price discovery helps everyone.
It does nothing but rug-pull and blindside investors and make them bagholders for soon-to-be depreciated assets.
The proposed changes are obvious for what they are: keeping retail unsuspecting and ignorant while insiders and privileged buyers/sellers quietly look for exits, and sets up retail as bagholders while the **** hits the fan.
Instead of helping average Americans to have agency in their own future and security, we are again being robbed.

Tamara Lewis — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Tamara Lewis Affiliation: Jun. 16, 2026 Hi. Tamara here. Registered nurse from Idaho. Started investing late due to a significant student loan debt burden. Worked my rear end off to have a portfolio I could count on in retirement. I reviewed the trends when the US previously only reported semiannually. Why would we move away from the quarterly reporting that's served our markets so well? Millions of US citizens are relying on the portfolio they've built for retirement ... It's the only thing that gets a lot of us common people into the stock market and a portfolio of any size represents decades of hard work. Mine has to support myself and my husband in retirement and the projected loss of going semiannual takes us from being able to meet our needs to definitely not. If it took the projected percentage of loss I'd go from 250k to just over 150. Combined with the projected decrease in social security this isnt sustainable for the long life span my family suggests I will have. Please, let's do what's right for the average American and stop stacking the deck against us.

Tamara Shaw — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tamara Shaw Affiliation: Jun. 16, 2026 I am a business owner myself and it’s not right holding back financials for 6 months for larger companies. The only purpose I can see is to deceive others withhold information and increase profits for themselves. It’s wrong and should not be changed. Please do not allow this to happen. It’s not fair to the investors and to the smaller companies. It provides the opportunity for deceit when there should be full disclosure and transparency.

Thank you,

Tamara Shaw

Tawnya Sterling — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tawnya Sterling Affiliation: Jun. 16, 2026 My name is Tawnya, and I have been an Independent Contractor (Rideshare), off and on, for many years.

This personally matters, to me, because it affects the lives of people, and because I care and believe, in advocating, for what IS Fair, Right and Just, not only for myself, but to and for, countless, of others.

It is SO important, to KEEP Quarterly Reporting, namely why:

* Corporate insiders would create an UNfair advantage, with longer gaps, otherwise.

* Quarterly data IS relied upon, to make choices, for countless, of others, who DO and SHOULD matter.

* Companies opting in, have their investors, who NEED frequent updates the most. Clearly, "Optional" does NOT fix the problem.

* What ISN'T worth the cost and the stakes, of countless, of others, are the savings, TO companies, Instead!

Let this BE the time: BE the Difference, The Game Changer, where ALL could Benefit and BE in the Know, NO Secrets, BE an open book, BE True!

Thank you, for your time and for choosing, to DO what is Right, Fair and Just.

Sincerely,

Tawnya Sterling

Ordinary American investor
Wilmington, NC

TheMWGeddes — Jun 16, 2026
Subject: S7-2026-15 Comment From: TheMWGeddes Affiliation: Jun. 16, 2026 Companies already hide so much in their financials. Do not give them any further opportunity to. This oversight is required to keep investors safe especially after all of the fraud we have seen in the recent past.

The SEC needs to be empowered to properly oversee these even more complex investment landscapes. Reducing accountability will only allow high risk inflated growth. Furthermore without quarterly reporting requirements there will only be the word of the company to go on to investors regarding dividends. Unless the intent is to stave off the quarterly layoffs that companies are doing i see no net positive to removing the tether that are necessary for our companies to be held to

account.

Theresa Sanderson — Jun 16, 2026
Subject: S7-2026-15 Comment From: Theresa Sanderson Affiliation: Jun. 16, 2026 Good Day,
My name is Theresa Sanderson.
Job Title:
Second Grade Teacher.
Please keep the SEC reporting requirements the same. 70% of investors are asking for this to remain the same. I guess if it changes we could all get together and protest, similar to what is developing for data centers.
There should be more than a comment period for a change like this. There should be hearings. It just looks like the government is trying to get this done before no one knows.
At least you're allowing the comments but will the SEC listen?
Respectfully,
Theresa Sanderson

Theresa Sullivan — Jun 16, 2026
Subject: S7-2026-15 From: Theresa Sullivan Affiliation: Jun. 16, 2026 it is unconscionable that you would want to make it easier for CEO's to cheat the american public...honestly...it is NOT a hardship for them to be transparent and responsible and held accountable 4 times a year...it should be every month but 4 times a year is sufficient for them to know that the SEC is watching them and they can't get away with shady deals and causing people to lose their money because they have played fast and loose. We had the bank failure which caused the housing bubble to burst...we have had too many failures to let them off the hook...The American People all too often take the fall for the CEO's misdeeds...so do not change the requirement on quarterly reporting. It is one small thing that makes a big difference to the American People and i don't care if it inconveniences them...That is their job!!! Make them do it properly.

Thank you
Theresa Sullivan

Therese Bovee McKelvey — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Therese Bovee McKelvey Affiliation: Jun. 16, 2026 I do not

support moving away from quarterly reporting to bi-annual. The reasons for requiring quarterly reporting are the same today as they were when the change was made to safeguard against the mismanagement and plundering of our investments. I do NOT support or agree with this proposed change.

Thomas D Jones — Jun 16, 2026
Subject: S7-2026-15 Comment From: Thomas D Jones Affiliation: Jun. 16, 2026 My name is Thomas Jones. I'm an engineer. I have a knack for picking out the mechanics of a system & seeing how the levers, valves, & gears function to produce an end result . I can plug in, change , or remove parts & logically extrapolate the impact on the end result. It all gives me great insight into who is behind the operation ,what they value, & their intent. Like that unusually large portion of retail in the Space X offering , I can see its purpose . I believe quarterly reporting leaves too much opportunity for insiders to leave retail investors holding the bag. There's no debate there. The evidence speaks for itself. You can imagine my thoughts on the latest initiative to insulate the plutocracy from its own crimes & **** ups. You don't have to be a lifelong reader of Batman : Detective Comics to pick up the scent of aiding & abetting . I see the current proposal to obfuscate filings for 6 months as an invitation to turn the practice into a business model. I feel my accusatory tone is fully justified by the absolute weakness of your primary argument : the "global standard" . It's like no one even tried . Your argument is undone by : " So what?"
But wait , there's more : 1) It's not a global standard 2) Where it has been implemented, we see predictable issues & deleterious effects on the market 3) In places it has been implemented, the practice is being rolled back ... You don't have to place your soft skinned hand on a burner to see what happens . In short, it is a buffer from accountability & an invitation to shenanigans ; the consequences of which are always displaced on the less fortunate .

Thomas Friedrich — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Thomas Friedrich Affiliation: Jun. 16, 2026 Greetings,
As I personally approach my retirement years, I am paying more attention to my earnings than ever before. The last thing I would want is to lose this regular reporting, leaving me with no idea what is happening to the investments I have made. Please do not remove the transparency we all depend upon. Maintain the quarterly reporting. It's our money, after all! Thank you...

Thomas L Smith — Jun 16, 2026
Subject: S7-2026-15 From: Thomas L Smith Affiliation: Jun. 16, 2026 Thomas L Smith LPN, LMP. A Nurse (LPN) for 17 years. I live in a small town in Eastern Washington. What you're proposing is letting the guys at the top positions of companies to say "I'm not responsible". That is the opposite of why they state that they make the "Big Bucks". "They make the tough decisions", so rightfully they should be responsible for their poor or worse ILLEGAL decisions. Otherwise they shouldn't be making anymore and any mid-level Manger! Allowing these corporate officers to lie, cheat, and steal from everyday Americans should be a CAPITOL PUNISHMENT! Instead they get a slap on the wrist a little time in a minimum security, country club prison. And when they get out they are still wealthier than most average Americans. If they "retire" they live better than those they stole from. If not retirement, they aquire jobs with their cronies and are allowed to start screwing over average, hard workering Amercans again. They are even sought out for this very ability! Even in Rome coorupt businessmen and politicians were publicly executed to deter this kind of behavior. Yet what you're proposing will encourage this atrocious behavior. "What are the odds I'll get caught? And even if I do, I'll make out okay and be all the richer for it when it's over!" The American people deserve better than corporations and corporate officers treating the public like shills to be fleeced at every turn. Today we have companies straight up LYING about their products. What they do, can do, can cure, and what they should be doing! If we don't start holding people accountable for their actions, and financial decisions with other people's money, then we really are done for and America won't see a 300th Anniversary! Americans deserve better management by the people and government entities in charge for looking out for our best interests!

Thomas Perez None — Jun 16, 2026
Subject: File No. S7-2026-15 From: Thomas Perez Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies we trade are not being held back from greatness by the obligation to file four reports a year. ... The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high. If quarterly reporting is crushing American capitalism, American capitalism is hiding it well.

Thomas Przybyla Retail Investor, Veteran who loves this country deeply — Jun 16, 2026
Subject: File No. S7-2026-15 From: Thomas Przybyla Reducing public company reporting from

quarterly to semiannually is a needless own-goal against markets and capitalism. Two principles that support our country's success are markets and equal opportunity. Our country executes on these principles with plenty of flaws of failures, but we pay more than lip service to them, and to reduce something that supports these values during the current socialist wave that is driven by income inequality is insane. The scenario: our current market has lots of venture capitalists and large capital allocators who have access to real time financial data for many of the private and public companies they invest in. This yields legal "insider information." The longer the lag between the public seeing what they see will undermine trust and boost the value of their behind the curtain view. That will further reduce trust between the haves and the have nots. With our first trillionaire and plenty of billionaires that under attack, our government would be foolish to further advantage them over the common man. This rule is obviously driven by laziness on both the corporations and the government's part. They want to report less and oversee less because they are lazy… don't let the rationalization of long-term focus fool you, all good corporate leadership teams are currently able to keep the long term in mind, explain that to shareholders, and then create wealth when their strategies bear fruit. Additionally, AI will help public companies put these reports together going forward so the burden will already be reduced. Our public markets, like our democracy, are currently the worst system except all the rest. In truth their capital creation and allocation is the best in the world, the envy of the world, and possibly the single greatest driver of technological progress in the world. They are also operating at a trust deficit right now. This will obviously reduce, and not increase, trust. Stop before you ruin our system and just leave the quarterly reporting. Some things in life are hard, this isn't one of them. Someone just needs to be an adult with a backbone on this one and say no, be quiet and do you job to the companies and the SEC.

Thomas Robinson — Jun 16, 2026
Subject: S7-2026-15 From: Thomas Robinson Affiliation: Jun. 16, 2026 Dear Securities and Exchange Commission Members, I strongly oppose the proposal to reduce the corporate financial reporting requirement from quarterly to semi-annually. Retail investors such as myself depend on quarterly reporting to be able to keep up with corporate performance metrics that inform our investing decisions. Retirees, of which I am one, are struggling more than ever to insure that the returns of our portfolios will be strong enough to sustain our standard of living and afford the ever increasing cost of health care in the face of projected reductions in social security benefits. Under the current quarterly rules, corporate leaders are highly accountable for accurately reporting their companies' performance. It is reported that the proposed move to semi-annual reporting would reduce this accountability significantly. This would make investing for retirement an even less attractive prospect for younger Americans who, because of the aforementioned social security cuts, need the benefits that investing can provide more than ever. In summary, reducing the reporting requirements now will make it more difficult for everyday Americans to participate in the markets successfully at a time when the K-shaped economy is rapidly destroying the middle class. I oppose the proposed reduction in reporting requirements for this reason and strongly urge you to do so as well. Thank you and best regards, Thomas Robinson Houston, Texas

Tom Noll — Jun 16, 2026
Subject: File No. S7-2026-15 From: Tom Noll We need to keep the reporting frequency at 4 times a year so investors get corporate information timely as it currently is done. Twice a year is simply too infrequent.

Tom Schiff — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tom Schiff Affiliation: Jun. 16, 2026 I urge you to keep this

quarterly. Oversight is imperative and 6 months is too long and allows for much greater potential abuse of the system. Thank you.

Tom Schiff
Florence, MA

Tom Slover Motley Fool Community — Jun 16, 2026
Subject: File No. S7-2026-15 From: Tom Slover It is a bad idea to switch from quarterly reporting for companies to semiannual reporting. Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. Our US companies are growing quite well under the current reporting system. There is no need for such a drastic change.

Tom Wiley — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tom Wiley Affiliation: Jun. 16, 2026 My name is Thomas Wiley. A regular middle class person from Buffalo NY investing on my own for retirement. Without quarterly reporting, only the insiders will be making the correct decisions. This would greatly hurt normal people.

Thomas Wiley

Tonya Bell Spry — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tonya Bell Spry Affiliation: Jun. 16, 2026 Tonya, entrepreneur. This is important to ensure your staff are not cutting into your profit and adjustments can be made before reporting periods or year end close out or tax time.

Tori Nona — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tori Nona Affiliation: Jun. 16, 2026 Greetings and hope this finds you well.

My concerns regarding the possible shifting away from quarterly reporting:

While appreciate companies wanting to reduce compliance costs and also wanting to discourage short-term management decisions, reducing vital market transparency will potentially limit the data available to investors, from which they make their investing decisions.

Fewer financial updates makes it harder to track revenue and also impacts being able detect financial trouble early.

Less frequent reporting could also cause larger price swings when longer-awaited results finally do get announced.

Thank you for your time and attention,
Victoria Levitsky
Subscriptions manager

Traci — Jun 16, 2026
Subject: S7-2026-15 Comment From: Traci Affiliation: Jun. 16, 2026 Quarterly reporting should not be optional. A well managed business is reviewing quarterly anyway. The minuscule savings is not worth the massive risk!

Sent from my iPhone

Traci Morris — Jun 16, 2026
Subject: S7-2026-15 From: Traci Morris Affiliation: Jun. 16, 2026 I oppose lowering the frequency of reporting. It feels like the needs of the corporations are being put ahead of the individuals investing in their work and products.

Any well-run business is surely keeping track of the information they are required to report on a very regular basis - it tells them how they are doing financially and if they need to make changes in their operations.

If any business is only doing this due diligence when required, only paying attention to this critical information when forced to, then it certainly seems that reducing the regularity that they must do this is likely to lead to poorer financial outcomes for the company and the investor.

Data from the years without quarterly reporting shows that reduced reporting does negatively impact investors. Certainly collecting, storing, analyzing, and sharing this information takes less effort as technology has reduced the effort to do so and increased the speed and ease of communications.

I am Traci Morris, a security technician who lives in West Virginia and works at Frederick Community College. Growing up, my family was middle class but my parents worked hard and made wise investments which helped them live their final years with little financial distress and worry.

I am aspiring to be UPPER middle class and have prioritized investing for my retirement above many other, more fun, things I could have done with the little discretionary income I may have had. I don't want to see the profits from the investments I have made, investments that I made IN these corporations so they could continue to thrive and remain profitable, lose value and impact my future.

Please continue to require corporations to report quarterly, for their financial good, the good of the investor, and the overall good of our country's financial state. We rely upon the SEC to ensure that corporations to do the right thing, the wise thing, because left to our own devices all humans have a tendency to act in their own best interests and to fool themselves in to thinking they are not. Numbers don’t lie, regular data made publicly availalbe lessens one’s ability to ignore reality and best servers both corporations and investors in the end.

Thank you for taking my words to heart.

Traci Morris

Tracy Byrne — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Tracy Byrne Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
This rule is a conflict of interest waiting to happen. Hiding financials for 6 months at a time has the potential to cripple investors. This is giving to much power to these companies and to politicians to hide whats happening in a business while people are investing blindly. We need more transparency, not less!

Tracy G — Jun 16, 2026
Subject: S7-2026-15 Comment From: Tracy G Affiliation: Jun. 16, 2026 Please do not stop the quarterly reporting! It seems every day there is less transparency from the government about things that are important to the people. We all have the same rights as the leaders in government and CEOs and CFOs do, to make decisions about our investments!! I am a disabled woman and my husband's retirements investments are how we will survive our senior years. Thank you. Tracy Goordman

Val Putnam — Jun 16, 2026

Subject: S7-2026-15 Comment From: Val Putnam Affiliation: Jun. 16, 2026 We have seen with our own eyes the corruption at the highest levels of government in broad daylight. Now imagine what we don't know. This is nothing more than an attempt to allow businesses to embrace illegal, corrupt practices with the lights out, leaving John Q Public in the dark as well. Do not eliminate Quarterly reporting. I'm a retired educator from Michigan and I'm tired of the rigged game that robs our children of a decent future in a country they can be proud of.

MVP

VALERIE JUAREZ — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: VALERIE JUAREZ Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
I am writing, to strongly oppose the proposed rule, as an individual retail investor, that would allow public companies to switch from quarterly to semiannual financial reporting.
Quarterly disclosures are crucial to how I manage and research my investments. Needing to wait six months to see a company's financial health creates a dangerous information gap with no benefit to individual investors, like myself. Corporate insiders and institutional firms will always find ways to

track performance in real-time, but everyday investors rely heavily on public quarterly data to evaluate whether a company is stable, growing, or facing sudden risks.
Six months is an eternity in modern markets. The change would allow companies to hide structural shifts, rising debt, or dropping revenue for half a year. It strips away transparency and significantly increases the risk of market volatility and insider trading. If the SEC's mission is investor protection, it should not take away the very data retail investors need to make safe, informed decisions. I urge the Commission to withdraw this proposal and maintain mandatory quarterly reporting.

Varina Lavelle — Jun 16, 2026
Subject: S7-2026-15 Comment From: Varina Lavelle Affiliation: Jun. 16, 2026 Do the right thing on this. Report quarterly! Good grief!!

WESLEY ROOT — Jun 16, 2026
Subject: S7-2026-15 Comment From: WESLEY ROOT Affiliation: Jun. 16, 2026 I am a retired & independent investor. No way this rule change should happen. It's hard enough for people like me to research a company & know their true market value & potential upside. Your job is to hold companies accountable to being honest to shareholders about their performance, not let them hide their problems at shareholders expense. We need to see quarterly reporting. Need it. This is a hard NO for me on this.

Wesley Root
Columbus, Ohio

Whitney Lard — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Whitney Lard Affiliation: Jun. 16, 2026 It is an awful, tried-before-and-failed idea that cost hundreds of thousands of people their savings. This is wanted only by those who wish to cheat the system and their investors. Stick up for MIDDLE and WORKING Americans and say NO to this absurd game the rich want to play.

Whitney Sherman — Jun 16, 2026
Subject: S7-2026-15 Comment From: Whitney Sherman Affiliation: Jun. 16, 2026 Quarterly reporting is my right as a shareholder. All shareholders need to see the same information at the same time. Eyes wide open!

William H. Johnson III Active Individual Investor — Jun 16, 2026
Subject: File No. S7-2026-15 From: William H. Johnson III I urge the SEC to reconsider its plan to reduce corporate financial disclosure periods from quarterly to semi-annually. At a time when transparency is more important that ever, this change would significantly hamper the entire disclosure process for the entire investment and financial communities. Where similar action has been attempted elsewhere there have been no positive measurable benefits from the action. Indeed, the action has simply made it more difficult assess corporate performance. It's a bad idea whose timing couldn't be worse. Respectfully submitted, Bill Johnson

William Jennings — Jun 16, 2026
Subject: S7-2026-15 From: William Jennings Affiliation: Jun. 16, 2026 Dear Esteemed Members of the SEC,

Quarterly reporting is a necessary element in the accountability function of the Corporate Official Reporting system. There has never before been a larger income disparity gap in our Republic's 250 year history. Transparency and On The Record Accountability are crucial to restoring confidence in our fiscal systems, as well as securing equal justice under the law. Slashing reporting by half is both reckless and callous, especially at a time when public confidence in critical balances of power is at an all time low. To persue such a path is callous, perilous, and without sound merit.

Subject: S7-2026-15 Comment From: William Kirkpatrick Affiliation: Jun. 16, 2026 Effectively makes insider trading easier and more profitable.

William Klawonn — Jun 16, 2026
Subject: S7-2026-15 Comment From: William Klawonn Affiliation: Jun. 16, 2026 Changing quarterly reporting to semi-annual reporting: 1. Allows public companies to keep negative information from being published for an additional 90 days; 2. Increases the potential for insider trading; 3. Enables insiders to more effectively transfer the negative impact of poor performance to retail shareholders; and 4. Reduces confidence in our markets.
I strongly oppose changing the current quarterly reporting requirement.

William Lee — Jun 16, 2026
Subject: File No. S7-2026-15 From: William Lee The SEC is already suspect of shady executives consultations! You meaning the SEC and your government cronies aka congressmen, senators etc… Will have the corporate insight to purchase stock/ bonds etc…. Way before the American citizens that you work! And truthfully none of the employees of the SEC, Congress the senate should be able to purchase stocks or bonds because you are engaged in insider trading and marketing as soon as you do so!! But yet you commit the crime of insider trading every time you purchase stocks or bonds!!! Bernie Madoff and Martha Stewart went to prison for the very same crime!!! So I believe quarterly reports are insufficient now and going to bi-yearly reports is a slap in the face to every American citizen investor and Taxpayer who might want to start investing!! Being as we know the government officials are robbing Americans taxpayers tax dollars daily and not one charge not one imprisonment for any government official state, local or federal has been charged!! The more transparency the better trust me!!! “We the people of the United States of America” have been shit on enough by the American government!!! And I see your trying to shit on “we the people of the United States of America” again with this ignorant selfish decision of the SEC!!!!

William Lefler Software Engineer for Walt Disney — Jun 16, 2026
Subject: File No. S7-2026-15 From: William Lefler I am a member of the Motley Fool Community, and an investor in over 100 companies. As an investor I need MORE information from the companies I invest in, not LESS. I am asking the SEC to NOT to allow public companies to switch from quarterly to semiannual financial reporting.

William Litsinger — Jun 16, 2026

Zac Stein — Jun 16, 2026
Subject: S7-2026-15 Comment From: Zac Stein Affiliation: Jun. 16, 2026 As a retail investor with a portfolio in the $7.5k-$10k range that I've worked a long time for, this isn't ok. Especially now that there's a 24 hour stock market 5 days per week, and a 24 hour news cycle 24/7. This would effectively make something like investing in bonds no safer than betting on blackjack. If this passes, I and many other traders on the lower end of the totem pole(so 99% of us) are likely to significantly divest from the market. The President moves the market with his mouth in all the wrong ways. I'd rather go to sleep and wake up with the same amount of money than wake up to less because Trump decided to pop off about destroying some new country overnight. Having money is better than chasing yield and losing all of your money. And as long as savings accounts continue to exist

that pay out around 4% APY, that's not really bad at all considering you don't really have to think or worry about it. It's close to the same amount CDs pay out right now but without a lockup period...

Zach Young — Jun 16, 2026
Subject: My view on Rule S7-2026-15 From: Zach Young Affiliation: Jun. 16, 2026 To the Securities and Exchange Commission:
The SEC requiring companies to report less often would have catastrophic effects on investors. Without access to the most current information it can be very difficult to make informed decisions about investing, and brings it closer to gambling than an informed strategic financial decision.
If anything, publicly trades companies should be required to report more frequently. With the current state of the economy in the U.S., and the fact that members of congress already get access to privileged information about many publicly traded companies, not to mention their potential to aid these companies to make their stocks more profitable, retail investors are already at a massive disadvantage. I implore you, do not step on the necks of many already struggling investors, average working class Americans. Side with the american citizens rather than these rich companies.

Zidane Markey — Jun 16, 2026
Subject: Comment on S7-2026-15 From: Zidane Markey Affiliation: Jun. 16, 2026 Hello, my name is Zidane Markey. I am a mid 20s blue collar worker who works six days a week putting food on the table. Buying a house is outside of my five year plan, buying a new car is almost suicide if you aren't paying attention, merely renting an apartment and eating food is not possible for most Americans without two incomes. ****, must we mention the dismantling of the consumer financial protection bureau?

According to keepitquarterly.com switching to twice annual reporting will tank stocks by roughly 30-50%. I don't trust numbers from an organization trying to protect stock market values, we all know who that really serves at the end of the day. Though, if you've got the Shareholders™ worried enough to make them pay massive sums of money to convince me otherwise then you're onto something good.

Short term quarterly gains has been the culprit of so much en ****tification of the world around us. It's about time the assholes at the top feel the stiff kick in the balls the last 5 years have been for us millennials. Please do what it takes to level the playing field so I can buy a ****ing house when the dust clears.

Ed Carroll — Jun 15, 2026
Subject: S7-2026-15 From: Ed Carroll Affiliation: Jun. 15, 2026 Dear SEC reviewers,

As someone who follows the market and gets prospectus mailings on an almost daily basis, I want to continue to read the quarterly data. Quarterly reports give a good picture of what is happening inside a corporation. I think quarterly data gives investors a good chance to evaluate the actions of the board and the CEO while there is time to ask questions. Given the faster pace that money and investments move in the 21st century, I think that for honesty's sake that monthly reports would be even better than quarterly reports but quarterly will do for now. Less than quarterly reporting will mean far less time to review the data and fewer opportunities to ask questions about the data. Do not hide the data or the results of CEO and Board decisions for six months at a time. Hiding the data for six months at a time is a clear harm to investors and to informed decision-making.

Sincerely,
Ed

Leah Himmelhoch — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Leah Himmelhoch Affiliation: Jun. 15, 2026 My name is Dr. Leah R. Himmelhoch. I am a Professor at Hobart & William Smith Colleges in Geneva, NY. I am writing to insist that we keep Quarterly Reporting in place for our retirement accounts. Evidence indicates that semi-annual reporting leads to a deleterious outcome for retirement accounts. My retirement account has been hit hard at several points over the past few decades — every time I creep towards a $1,000,000 mark, a Republican-led initiative or action trashes my years of investment and I have to start the slow climb back to where it was before the adverse event. I have lost so much money already because of predictably bad policy! I have worked too hard for too long — and have endured too many foolish decisions and/or market-adverse bad acts — to sit back and watch yet another verifiably destructive decision drain my retirement accounts AGAIN. My field DELIBERATELY (and unjustly) underpays its graduate students as it is. When I earned my PhD and finally entered the academic job market, I was already verifiably & permanently 'behind' the average lifetime earnings of an individual of equal or less education who had NOT earned a PhD — but I was more willing to endure this financial impact because I knew that an educator's retirement benefits tended to be excellent. If you eliminate quarterly reporting my retirement accounts will once again be harmed… and for what reason? Because of an entirely predictable, foolish decision?! Why do it? I realize the 1% does not care one bit about regular people, but eliminating quarterly reporting will also harm the wealth of the 1%! Don't be foolish. Don't be short-sighted. Don't kill our wealth. Do your job and preserve our wealth, our lifetime efforts, and the US's economic well-being.

4FreeeAmerica — Jun 15, 2026
Subject: S7-2026-15 From: 4FreeeAmerica Affiliation: Jun. 15, 2026 Government's purpose and grant of authority is to protect the rights of the people. Therefore it must protect against corporations whose interests are served in ways that, left unchecked would infringe on these rights. Corporations do not have rights, they have privileges. They are overseen by government representatives of the people. If government reps do not monitor closely corporations that have harmed the people in the past, they are failing in their primary duty. Companies that have a history of working to benefit the people may receive favor (less tight/difficult restrictions and oversight demands) from governmental reps. The history is clear. These corporations must have tight management by government.

Respectfully,

Tom Olson

7 One6 — Jun 15, 2026
Subject: S7-2026-15 Comment From: 7 One6 Affiliation: Jun. 15, 2026 **Subject:** Public Comment: Deep Concerns Regarding the Shift to Biannual Financial Reporting
Dear Members of the Commission,
I am writing to you today as a concerned citizen and an individual deeply invested in the health, transparency, and stability of our financial markets. While I understand that arguments have been made in favor of moving from quarterly (10-Q) to biannual (six-month) reporting to reduce administrative burdens or curb "short-termism," I urge you to consider the severe, unintended consequences this shift would have on everyday people—specifically, retail investors and the vital training and education ecosystems that support them.
Eliminating quarterly reports does not level the playing field; it significantly disadvantages the public in several critical ways:

1. Crippling Retail Education and Market Literacy

Retail investment training is built on the foundation of **real-time, real-world data analysis**. Educators and training programs teach everyday citizens how to read balance sheets, analyze cash flow, and evaluate corporate health using recent, relevant financial statements.
* **The Impact:** A six-month reporting gap turns fresh financial training into historical archeology. By the time a biannual report is released, the market dynamics have entirely changed, making it incredibly difficult for retail investors to practice and apply fundamental analysis in a meaningful way.

2. Widening the Information Gap
The argument for reducing reporting frequency claims to protect companies, but in reality, it starves the public of information while institutional players remain entirely unaffected.

* **The Impact:** Large institutional firms do not rely solely on public filings; they have access to proprietary alternative data, credit card tracking, supply chain metrics, and direct access to corporate management. Quarterly reports are the primary mechanism that bridges the gap between Wall Street and Main Street. Removing them means retail training programs will be teaching students to fly blind, while institutions continue to operate with a full radar.

3. Masking Corporate Distress and Increasing Risk

For a retail investor, learning how to spot "red flags"—such as a sudden drop in cash reserves, inventory pileups, or ballooning debt—is a core survival skill.
* **The Impact:** Six months is an eternity in the modern business cycle. A company can go from thriving to the brink of insolvency in a single quarter. If companies only report biannually, retail investors could easily put their hard-earned savings into a company based on data that is five months out of date, only to be blindsided by massive structural failure. Training programs cannot teach effective risk management when the underlying data is inherently stale.

4. Forcing Reliance on Hype and Speculation

When reliable, frequent fundamental data is removed from the equation, a dangerous vacuum is created.
* **The Impact:** Without quarterly updates to anchor stock valuations in reality, retail markets will inevitably rely more heavily on social media rumors, analyst speculation, and corporate press releases. Financial training programs will be forced to shift their focus away from disciplined, data-driven investing and toward navigating high-risk volatility and sentiment tracking. This fundamentally undermines the goal of building a financially literate, stable public investor base.

Conclusion

Accountability thrives on transparency, and transparency requires consistent, timely data. Reducing financial reporting to a biannual schedule actively harms retail training initiatives, severely diminishes financial literacy, and leaves everyday citizens highly vulnerable to market manipulation and institutional advantages.
If we want a healthy, democratic market where everyday citizens can confidently invest in their futures, we must maintain the quarterly standard. I strongly urge the Commission to reject any proposals to reduce reporting frequency and to continue standing up for the transparency that retail investors rely on.
Sincerely,
Concerned Citizen

Abigail Irwin — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Abigail Irwin Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
It is madness to reduce the small amount of control and transparency the general public have to their investments when we KNOW we are up against all the powerful (wealthy or politically involved) trying to extract our wealth already and their having access to insider information - we are already the losers. Don't reduce the average American's ability to invest safely!
Take action to improve transparency and instead reduce insider trading done by the wealthy and powerful who hedge themselves in with litigation/money. Show that you are on the side of the public.

Ace Luciano — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Ace Luciano Affiliation: Jun. 15, 2026 I have been investing since I was 12 years old. As I grew older, I learned more about earnings and forecasting, and also began following some of the most prominent financial people, including Warren Buffet. I do not know a single one that believes a semi-annual report is better for companies or for investors.

Adam McGinnis — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Adam McGinnis Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
This rule was put into place to protect the market and investors from the devistation caused by the depression. Business leaders make informed decisions based on daily, weekly and monthly information. Having quarterly reports released to the public and especially the investors that already own them is how we make informed decisions on the money we make money the same way that they do. Taking this information away from the people that make up nearly 40% of investors leaves us blind as to what's happening in the companies we own. They make informed decisions and we should be doing the same. The cost of providing this information is already figured into their quarterly expenses and is well worth the value of the information they provide.

Adam Newman — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Adam Newman Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission: The only people who stand to benefit from removing quarterly reports are inside traders, going from quarterly to biannual reporting is insane

Addie Brown — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Addie Brown Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission
Creating a policy to reduce reporting timeframe and establishing a 6 month blind period for reporting are not in the best interest of the public or the economy. Why expose the public to an environment of less flow of information when transparency is a critical factor for public accountability to be enforced

and strengthened? Why increase low confidence that would create a fear of less market growth? Efforts should create more confidence investments by requiring more open and equitable communication which can potentially effect market share for investors? It appears this policy would be more adventurous to large eneties with substantial economic resources. Given the present status of the economy more openness is required to increase public confidence NOT Less which would be perceived as tipping the scales creating unfair advantages for stronger financial eneties. Create an environment that supports more accountability to the public.
Thank you for your consideration from a concerned citizen

Adele Hetzel — Jun 15, 2026
Subject: S7-2026-15 Comment From: Adele Hetzel Affiliation: Jun. 15, 2026 My investment councilors rely on quarterly information to make decision, while longer ime periods can lead to insider advantages. “optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates, this ads up to extra cost to me

Once again, corporations are using their power to weaken their accountability.

Every taxpayer is subject to penalties if they file a fraudulent tax return, why should this change for CEO's?

The SEC says current reports and press releases will fill the gap. Read the fine print & discover the 8-K may contain information, but it lacks any accountability.

With the amount of mergers & consolidation going on & the inequality of wages, this proposal is absurd. It is NOT a burden on them to provide this information, since it is part of the accounting quarterly reports anyway!

This feels like the SEC is complicit in allowing CEO's to cover up their true compensation. They would be able to shift the amount they actually earn.

These were put in place after Enron's executives claimed ignorance of their own books, so Congress

made ignorance impossible to claim. Nothing has changed to indicate this is no longer needed.

Al Jurowicz — Jun 15, 2026
Subject: S7-2026-15 Comment From: Al Jurowicz Affiliation: Jun. 15, 2026 To whole it may concern,

I know this doesn’t matter- you will do whatever serves the market and those who manipulate it best

will come out on top. I am but one voice, however, in a time where information is easily accessible to everyone- we should have MORE transparency, not less. People already have no trust in the markets and believe they are rigged moreso now than ever before. This would be a horrible decision to change to less transparency for people that are investing in these companies. People should have as much information as possible for these PUBLICLY traded companies. We do not need more insider knowledge leaked out before the public has even less access to what they already have.

Respectfully,
Albert Jurowicz Jr

Allen Crandall — Jun 15, 2026
Subject: S7-2026-15 From: Allen Crandall Affiliation: Jun. 15, 2026 I am writing to convey my profound concern regarding any initiatives that propose to reduce the current frequency of financial reporting requirements for publicly traded companies. Having personally witnessed and been affected by the devastating consequences of corporate malfeasance, specifically the Enron scandal, I believe it is imperative that we uphold and strengthen, rather than diminish, the safeguards designed to prevent such widespread economic and personal devastation.

The collapse of Enron served as a stark and painful lesson in the critical importance of transparency and accountability in financial markets. It highlighted how a lack of timely and certified information can mask systemic issues, erode investor trust, and ultimately lead to catastrophic failures that impact countless lives and the broader economy. The regulations that mandate quarterly financial reporting, along with the certification of those statements, were put in place precisely to prevent a recurrence of such events.

It is difficult to understand the rationale for altering a system that has proven effective in promoting corporate accountability and safeguarding investor interests. Quarterly reports provide essential, up-to-date information that allows investors, analysts, and the public to make informed decisions. This regular disclosure acts as a crucial deterrent against financial irregularities, enabling the early detection of potential problems and ensuring that management remains transparent and accountable for a company's financial health. There is no demonstrable evidence that the current system has imposed undue burdens that outweigh its significant benefits to market integrity and investor protection.

Weakening these established reporting obligations would, in my view, be a dangerous step backward. It would risk undermining the hard-won lessons from past crises and could inadvertently create an environment ripe for opacity and potential abuse. When a framework is demonstrably

working to maintain confidence and prevent fraud, it should be preserved and reinforced, not dismantled. The stability and trustworthiness of our financial markets depend on robust and consistent disclosure.

I urge you to consider the severe and lasting implications that any reduction in financial transparency could have. Maintaining stringent, quarterly financial reporting is not merely a bureaucratic formality; it is a fundamental pillar of investor confidence and market stability.

Sincerely,

Fordyce Crandall
Florida Resident

Alucard Taylor — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Alucard Taylor Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
For our capitalist system to run smoothly and healthy we ought to have an informed and educated consumer. These quarterly disclosures not only impact investors from hedge funds to retail investors, this affects consumer advocacy groups, government regulators and economists who rely on market data to adequately inform the public of the health of our largest institutions and the broader economy. The IRS requires quarterly filings, many state governments compile reports on a quarterly basis and this is a fair compromise for informing the public with the least burden on institutions.

Amy Craft Ahrens Small business owner — Jun 15, 2026
Subject: File No. S7-2026-15 From: Amy Craft Ahrens This new rule is a horrible idea for many reasons. Since companies can choose to continue reporting quarterly or only semi-annually, there will no longer be apples to apples comparisons for the financial professionals and the lay-person investor will have an even more difficult time benchmarking competing companies. It will just give everyone less data to work with. Also with such a long monitoring window, it will make it much harder to monitor for risk. This will also make it easier for unscrupulous company executives to hide how a company is truly performing-investors will be the last ones to know. This is a bad idea.

Amy G — Jun 15, 2026
Subject: S7-2026-15 Comment From: Amy G Affiliation: Jun. 15, 2026 Quarterly reports are crucial for people who strategically plan ahead. Please do not change the course, as it only stands to benefit large entities, not the working people or smaller companies such as mine.

Amy Hausmann — Jun 15, 2026
Subject: S7-2026-15 Comment From: Amy Hausmann Affiliation: Jun. 15, 2026 My name is Amy Hausmann. I am the executive director of a state agency in a northern state after a 25-year career in state government in another state. Please keep all required reporting quarterly. With perceived or real corruption and ethics issues at highest levels of the federal government at an all-time high, it benefits the SEC to support fair, transparent governance, or be seen as a complicit tool of a corrupt system.

(1) As an investor, I rely on quarterly information to make decisions.

(2) Extended gaps create an unfair advantage for corporate insiders and disadvantage those of us who are putting our trust in corporations to invest OUR money.

(3)The "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates.

(4) The savings to companies are not worth the cost to me as an investor.

Thank you.

Amy Hunter — Jun 15, 2026
Subject: S7-2026-15 Comment From: Amy Hunter Affiliation: Jun. 15, 2026 We as a society are already dealing with a lack of transparency, reducing the reporting period will excaerbate that problem and allow greater rates of corruption. Please keep the SEC reporting period quarterly.

Sent from my iPhone

Andrea Hall — Jun 15, 2026
Subject: S7-2026-15 From: Andrea Hall Affiliation: Jun. 15, 2026 I am writing to express my opposition to the proposal to reduce corporate financial reporting frequency from quarterly to semi-annual reporting.

Timely financial reporting is one of the most important tools available to investors, employees, consumers, and the public for evaluating the health and performance of publicly traded companies. Quarterly reporting provides regular transparency and accountability, helping ensure that markets operate on accurate and current information.

Reducing reporting frequency would increase the amount of time that investors and the public must rely on incomplete or outdated information. This could create larger information gaps, increase market volatility when results are finally disclosed, and reduce confidence in the accuracy of company valuations.

I am particularly concerned that less frequent reporting may make it easier for companies to delay disclosure of emerging financial problems, operational challenges, or significant changes in business performance. Transparency should be strengthened, not weakened, especially during a period when public trust in institutions and financial markets is already under strain.

Proponents of this change argue that it would reduce regulatory burdens and encourage long-term decision making. However, I have not seen compelling evidence that the benefits of reduced reporting outweigh the loss of transparency and accountability that quarterly reporting provides.

Public companies enjoy access to public capital markets. In exchange, they should be expected to provide regular and timely information to the investors and communities that support them. The current quarterly reporting framework has served as a cornerstone of market transparency for decades, and any proposal to weaken those disclosure requirements should meet an exceptionally high standard of justification.

For these reasons, I urge the Commission to reject the proposal and preserve quarterly reporting requirements.

Thank you for your consideration.

Sincerely,

A Hall

Andrew Moller The Motley Fool Community — Jun 15, 2026
Subject: File No. S7-2026-15 From: Andrew Moller Quarterly reporting provides transparency of a Company's results and is extremely important to individual investors and the rest of investment community. A longer period between announcing results will likely lead to more insider trading and possibly leaks of company information. Regulation FD was a great way to give all investors company results at the same time.

Andrew Naudin — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Andrew Naudin Affiliation: Jun. 15, 2026 Dear Secretary Countryman,

I am writing to express my strenuous opposition to the Securities and Exchange Commission’s (SEC) proposal to roll back corporate financial reporting and disclosure standards. Reverting to a framework reminiscent of 1955 standards poses an immediate, catastrophic threat to individual savings, market stability, and capital formation.Academic and historical financial data confirm that the opaque markets of the mid-20th century were defined by restricted information, lower asset valuations, and depressed investor returns. By dismantling the robust reporting mechanisms engineered over the last 70 years, this proposal would reintroduce systemic blind spots to our financial system. Independent risk assessments indicate that the resulting market contraction and elevated risk premiums could swiftly erase up to one-third of household retirement savings.If enacted, this rollback will severely damage our financial ecosystem in the following ways:

Severe Destruction of Household Wealth: Forcing investors into an informational vacuum directly threatens to wipe out an estimated 33% of accumulated individual savings and retirement nests.

Depressed Market Valuations: When critical corporate financial data is restricted, investors must demand higher risk premiums to compensate for the uncertainty, causing stock valuations to plummet sharply.

Stagnant Investment Returns: Opaque, low-disclosure markets historically deliver lower returns, which will permanently stunt the compounding growth necessary for long-term citizen financial security.

Erosion of Foundational Trust: Eliminating standard modern disclosures destroys the public trust required for efficient, confident, and democratic capital market participation.

Heightened Systemic Risk: Removing modern reporting baselines leaves everyday savers entirely exposed to unmitigated market volatility and undetected corporate mismanagement.

The SEC's core mission is to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation. This proposal does the exact opposite. It penalizes retail investors,

rewards opacity, and compromises the global competitiveness of U.S. capital markets. I urgently request that the Commission withdraw this retrogressive proposal and instead maintain the rigorous transparency standards necessary for a resilient, modern economy.

Thank you for your time and consideration of these critical concerns.
Sincerely,

Andrew Naudin, 2212 Camay Street, Leander, Tx 78641

Annette Howard — Jun 15, 2026
Subject: S7-2026-15 Comment From: Annette Howard Affiliation: Jun. 15, 2026 Mike Howard. Retired.
Continue with quarterly reporting. I monitor and make decisions through quarterly reports. I feel that disclosing details through quarterly reports is beneficial to investors, employees, and future job seekers. The transparency gained is worth the effort put forth by companies to compile quarterly reports,as the standard is currently accepted practice, and the costs are usual, ongoing, and beneficial. I believe six month reporting, while posing benefits to employers, can be detrimental to the groups noted above.

Annette M — Jun 15, 2026
Subject: S7-2026-15 Comment From: Annette M Affiliation: Jun. 15, 2026 I have been actively involved in the stock market throughout the last 44 years. I very much appreciate and value the quarterly reports of the companies that comprise my 403.B stock portfolio. I respectfully request that quarterly reports remain for those companies that are a part of the various U.S. Stock Exchanges.

Quarterly reports!

Anony Mouse Retired Director, Software Engineer, Investor — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anony Mouse I am strongly opposed to moving to a 6 month reporting cycle. Let us not allow fraud and hiding of bad news for 6 months. This is a terrible idea, and the history of past abuses by companies EVEN WHEN required to report every 3 months should tell you something. Let's build strong auditing tools and actually HAVE SOME TEETH.

Anonymous — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous I am opposed to changing SEC rules regarding this. Quarterly information is required to make informed decisions, longer gaps create an unfair advantage for corporate insiders and corruption is an ever-present threat, making this "optional" doesn't fix the problem because companies that are likely to opt in are probably the ones whose investors need frequent updates the most, and finally, the savings to companies aren't worth the cost to consumers/investors/taxpayers. This is a BAD IDEA that will force money into the pockets of companies desperate for cash from the retirement savings of vulnerable people. I OPPOSE THIS.

Anonymous — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous Regarding the proposal to allow public companies to elect to reduce the number of reports from quarterly to semi-annually, it should be plainly evident to any investor or owner is that reducing reporting requirements weakens the connection between companies and their owners. At its heart, investing is ownership, and owners deserve regular,

transparent communication from the business they own. Some may argue that fewer reports would reduce costs. In an age of AI and increasingly efficient, electronic-based, disclosure tools, that point is debatable, and side-steps the cost/benefit analysis. Others may argue it would ease the pressure to manage quarter to quarter and reduce short-termism and "window dressing." Short-termism, however, comes from people's reaction to information, not from the information itself. Reducing reporting by half doesn't make investors more patient, just less informed. Reducing reporting by half potentially creates a false impression of performance or of the company's risk profile. Common sense tells us that less transparency doesn’t eliminate uncertainty. It increases it. And when information finally does arrive, the surprises are likely to be bigger, the reactions sharper, and the volatility greater. Instead of halving reporting, it should be increased by 50%, to bi-monthly. Increased frequency provides more incentive to focus on managing the business, not just the numbers.

Anonymous — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous You, as the SEC, are charged with doing what is best for investors. For *protecting* investors. NOT for protecting companies who want more leniency in their reporting to investors -- to the people who actually own their companies. Please do not shorten the mandatory reporting from four times a year to twice a year. Please continue to protect Americans.

Anonymous — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous Please DO NOT pass the Semiannual reporting rule for businesses. Transparency on a frequent basis (quarterly minimum) is the key to strategic investing. Too much underhanded dealings can occur without shareholder visibility, knowledge and input. Shareholders do not want to be part of or own businesses that are not above board and do not provide regular disclosure of performance and profit track record. Twice a year is insufficient for investment decision.

Anonymous — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous I do not think that it is a good idea to allow the option for companies to reduce their number of reports from four to two. When given a choice, I'm sure that these companies will choose less reporting. Less information is never beneficial to investors. With AI, these reports should be easier than ever to complete and I see no good reason to allow less reporting, which ultimately leads to less transparency.

Anonymous — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous Accountability is key. Don't forget the lessons Enron taught! Additionally, investors are already dealing with enough corruption and insider trading. The SEC should not now allow public companies to hide behind lax reporting requirements. The argument that investors do not understand nor read quarterly reports holds no weight. Publicly traded companies want investor money, and with that comes the burden and responsibility of transparency. Investing is a relationship. The company must be transparent and timely in reporting. The investor has the responsibility to read the report and understand the financial health of the company. Let's consider the welfare of the investor, not what's expedient and easier for big

companies. Transparency is never wrong. Do not adopt rule S7-2026-15.

Anonymous — Jun 15, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 Beatrice Kiraguri, CEO of Autism Health Services - This doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates. The global standard is not working in out countries and they are either reversing course or their investors have suffered for semi annual reporting.

Subject: S7-2026-15 From: Anonymous Affiliation: Jun. 15, 2026 Hello,

I would like to voice my opinion on quarterly reporting. Please update the reporting requirements, allowing companies to submit reports every four months / three times a year, with the first triannual report period to begin in March. This way, each business year would conclude at the end of February, something that may work better for a lot of companies especially considering the December holidays. Further, submitting reports three times a year slightly relaxes the requirements. Thank you for your time and consideration.

Harold

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 I am Timothy Murphy, MD, an about-to-retire physician with some means, which I would like to keep. I have focused my energy on medicine not finances. Instead, I count on the SEC to help keep my saved money safe from reckless gambling and speculation. Quarterly reporting gives me a chance to note negative trends and stay financially safe. This proposed change does not keep investors like me safe.

Anonymous — Jun 15, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 The proposed change is a step backward, an attack on the consumer in favor of darkness rather than transparency. Investors should be able to make decisions and receive benefits based on current data, not outdated data.

Anonymous — Jun 15, 2026
Subject: S7-2026-15 comment from Scott Richie From: Anonymous Affiliation: Jun. 15, 2026 Hello,

I worked for a publicly traded company for 19 years and know how much latitude the company took while making quarterly reports to investors. The quarterly reporting held them accountable to the investors. If you change the quarterly reporting standards to twice a year, the companies will run wild with risky, ill-advised plans. Individual investors (like myself) will not be able to get reliable information to make wise investment decisions. I will be forced to pull out of the market and seek other investment opportunities. This may be what you are trying to do. If so, go ahead, but you will be removing a lot of capital from the market. I absolutely will not remain in a market that is not transparent.

Private Investor,

Scott Richie

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 With the recklessness inherent and pronounced in this CRIMINAL administration, i'd ask for MONTHLY reporting.

Sure it's extra work; but it's not *real* work. Everything is available within the systems already in place internally; they have on-demand reporting on a daily, if not by-the-minute basis.

Elon Musk is a trillionaire; he won't be alone soon.
He's just as culpable as anyone - given his thievery under DOGE plan of corpulent corruption encouraged by the pirates in the Cabinet of Crime.

DON'T GIVE THEM THE CHANCE TO ROB US YET AGAIN!

Time is all they need.
They know no bounds, and they have no allegiance.
They pay no taxes… *something* must remain in place to dissuade them from further theft and fraud….

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 Really? It is difficult to invest as a single investor. The proposal does nothing to protect individual investors from the very misinformation and misleading “grapevine” tricks to help those who are able to get information. In the current age of information, making reporting easier and cheaper, you want to shield companies from having to report. In six months a company can go under leaving the uninformed holding the bag. Shame on you if you do.

Anonymous — Jun 15, 2026
Subject: S7-2026-15 From: Anonymous Affiliation: Jun. 15, 2026 Please keep everyone accountable for the finances of others. Quarterly reporting keeps shady CEOs accountable. The reason for quarterly reports is still there and hard earned retirement investments do not need to be siphoned or cut due to reports every 6 months. This would be a protection for those with bad intentions.

Americans can no longer afford to have any investment minimized as all costs are out of line with tariffs, war, and eventual cuts to Social Security, Medicaid, and Medicare. Sherry Brown. Retired. Van Buren Arkansas

Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 15, 2026 Dear SEC,

Changing the reporting from quarterly to semi-annually only benefits those who want to conceal what's going on behind the curtain. It makes no sense. I understand that compilation of these reports could be time-consuming and costly; however, that's what automated systems are for so that really isn't a good reason or even a poor excuse.

Don't let these companies hide behind opaque glass. If quarterly reporting is good enough for Warren Buffet, it's good enough for me. Leave it alone.

Thank you.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 I am a retiree. The markets hold trillions of dollars of investments made by current retirees and for those investing to have a comfortable retirement in the future. The one thing we all need is confidence to make decisions, confidence corporations are being held to the standards required and developed in the almost 100 years since the Great Depression. We also need confidence the SEC is doing its job. Quarterly reporting is important and needed for investors to make short and long term decisions. Hiding information to protect a particular administration is a dangerous precedent no matter who is in office. Do not change quarterly reporting. Let's face it, with AI it takes a minimal amount of time to run these reports. Sincerely, DA

Subject: Comments on SEC proposed rule changes From: Anonymous Affiliation: Jun. 15, 2026 I strongly encourage the SEC to continue requiring CEOs to sign their financial reporting on a quarterly basis. Since the Enron debacle in 2002 , it is very apparent that leadership and society in general are less trustworthy, as is evident with the current discovery of fraud and fraudulent activities in every segment of government and society. Your responsibility. SEC, includes oversight of the Securities Market to prevent fraud and protect investors. It would be irresponsible in today's financial climate for less oversite of CEOs financial disclosures and signatures certifying they are truthful.

Subject: S7-2026-15 From: Anonymous Affiliation: Jun. 15, 2026 Given how much CEO's get paid relative to their employees, it seems to me that signing their quarterly reports and taking responsibility for the contents of these is NOT an onerous job. What possible justification is there to exempt them from doing their **** jobs, and for ensuring the accuracy of their reports? Isn't the job of the SEC to protect the integrity of the reporting process? Or is 'integrity' no longer the point of ANYTHING in the current regime? It certainly seems more like a regime than an administration, since it's systematically dismantling the rule of law.

This is unacceptable.
Quarterly reporting plays a critical role in maintaining transparency, market efficiency, and investor confidence. Reducing reporting requirements to a semiannual schedule similar to the pre 1955 model would leave investors with less timely information, increasing uncertainty and the potential for information misalaignment between company insiders and the public.

While concerns about compliance costs are valid, advances in accounting software and digital reporting have significantly reduced the burden compared to decades ago. Public companies benefit from access to capital markets, and providing regular financial disclosures is a more than reasonable obligation in exchange for that access.

Maintaining quarterly reporting helps investors make informed decisions, supports fair price discovery, and promotes accountability. Rather than reducing reporting frequency, efforts should focus on simplifying unnecessary disclosure requirements while preserving timely financial transparency.

Anonymous — Jun 15, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 15, 2026 In favor of semiannual reporting. Moving from quarterly to semiannual reporting would help reduce the destructive short-term thinking that dominates public companies today. The pressure to hit arbitrary 90-day targets leads to layoffs, underinvestment in employees, and cuts to R&D simply to satisfy investors that have no real skin in the game. Allowing companies more room to execute longer-term strategies IS GOOD FOR WORKERS!

Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 15, 2026 The markets that demand quarterly numbers command the richest valuations. The markets that settle for twice a year sit at a discount, right alongside where America sat during its own semi-annual era. We the people deserve to be kept informed quarterly at a minimum as to how a company is performing and therefore how our investments are doing. By going bi-annually, companies can play more with the numbers, they can hide bad decisions longer, they can hide issues/problems longer from the investors and the public. Overall this is just another bad idea.

Anonymous Retired Veteran — Jun 15, 2026
Subject: File No. S7-2026-15 From: Anonymous I am a retail investor and believe quarterly reporting remains an important component of market transparency and investor confidence. Timely financial reporting helps ensure that all investors, not just large institutions, have access to current information about a company's performance, risks, and outlook. Reducing reporting frequency to semiannual disclosures would increase the amount of time investors operate with limited information and could reduce market transparency. As an investor, I rely on quarterly reports to evaluate trends, assess management execution, identify emerging risks, and make informed investment decisions. While I understand concerns regarding compliance costs and short-term market pressures, I believe the benefits of regular disclosure outweigh those concerns, particularly for protecting individual investors and maintaining confidence in U.S. capital markets. Quarterly reporting has been a longstanding feature of the U.S. securities markets and contributes to the transparency that makes those markets attractive to investors worldwide. I encourage the Commission to preserve quarterly reporting requirements and carefully consider the potential impact that less frequent reporting could have on market efficiency, price discovery, and investor protection. Thank you for considering my comments.

Anthony Allen — Jun 15, 2026
Subject: S7-2026-15 Comment From: Anthony Allen Affiliation: Jun. 15, 2026 Let's not reward and encourage the insider trading this new rule would produce. I see no other reason to implement this new rule than to give illegal insider traders the edge.

Anthony Bleuer — Jun 15, 2026
Subject: S7-2026-15 Comment From: Anthony Bleuer Affiliation: Jun. 15, 2026 There is no reason to change this rule. Transparency is paramount to the market.

Anthony Griffin — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Anthony Griffin Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Such rules as you are suggesting setup the market for only certain people to be able to gain foresight into companies traded on the market. This rule would basically setup a insider trading market for a certain few and you would be the creator, since a few would have better information on a companies' status that the majority of people would not have.
So that would make you an insider facilitator and just as guilty as any other inside trader.

Sickening.

Anthony Lapearle — Jun 15, 2026

Antonio Pierola — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Antonio Pierola Affiliation: Jun. 15, 2026 Nothing is gained by limiting investment monitoring. We have the technology for more frequent review of market activity, monthly or weekly. Paperless, monthly reporting is preferable. Quarterly reporting is insufficient. Less frequent reporting is ill-advised.

April Block — Jun 15, 2026
Subject: Comment on S7-2026-15 From: April Block Affiliation: Jun. 15, 2026 Changes were made to the old standards for a reason. Please do not roll back protections for people investing their hard-earned money.

April Echols — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: April Echols Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
It is imperative that publicly traded companies provide the information necessary to be publicly traded in a prompt fashion. The public does not just consist of companies but people. The lack of consistent transparency allows room for corruption and illegal activities on the part of bad actors, which are many. And those actions have a outsized impact on the people who trade. Once again being publicly traded means being publicly accountable in a consistent manner, which is not twice a year as being recommended in this bill, to the people who trade in these companies.

Apryl Deily — Jun 15, 2026
Subject: S7-2026-15 Comment From: Apryl Deily Affiliation: Jun. 15, 2026 Quarterly reporting should remain. Extending the reporting period increases time fraud can continue and offers minimal savings. Investors like me depend on quarterly reporting.

Ayesha Khan — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Ayesha Khan Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:

I urge the SEC to preserve quarterly disclosure requirements for public companies. Regular quarterly reporting provides investors with timely, consistent information about a company's financial performance, risks, and business developments. Access to current information helps investors make informed decisions and promotes transparency and accountability in the public markets. Reducing or delaying these disclosures would make it more difficult for investors to evaluate companies and understand changes that may affect their investment decisions. Timely reporting helps maintain confidence in the fairness and integrity of the markets by ensuring that all investors have access to important information on a regular basis.

The SEC should continue to support transparency and investor protection by maintaining robust quarterly disclosure requirements rather than limiting access to vital information.

Barbara Pierson — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Barbara Pierson Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I am a former Internal Auditor for a U.S.-based Fortune 500 company. I remember what things were like before SOX. The C-suite executives will not act responsibly without required quarterly reporting. I know. I saw it myself back in the day. Please don't do away with this requirement.
Respectfully,
Barbara A Pierson

BARBARA REYNOLDSON — Jun 15, 2026
Subject: S7-2026-15 Comment From: BARBARA REYNOLDSON Affiliation: Jun. 15, 2026 There is no logical reason to change reporting time to biannually. Quarterly reporting has been the standard for a long time and it should stay that way. Changing to more time between reports makes it look like more insider trading can happen, which will hurt the small investors. I believe companies need both the large and small investors to succeed. Please keep quarterly
reporting as the standard.
Thank you.
Barbara Reynoldson

BARBARA SCHMICH — Jun 15, 2026
Subject: S7-2026-15 Comment From: BARBARA SCHMICH Affiliation: Jun. 15, 2026 My name is Barbara Ostipwko and I am retired. It would be illegal for me to hide, or not disclose my income until the following year. It would help regular Americans make ends meet and save money. Last tax year I received payments from the Windfall elimination repeal. Even though half of those funds were for the prior year, the tax rules compelled me to include all of those funds in one year. I really took a huge hit on taxes. Why can't the same rules apply to individuals as they do for big business and corporations. Why do they get to not disclose income for 6 months?

Barbara Smallwood — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Barbara Smallwood Affiliation: Jun. 15, 2026 I understand the SEC wants to let every public company stop reporting its results each quarter and disclose just twice a year. We tried this once, between 1955 and 1970. I'm opposed because less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of my life savings. I totally disagree. Do Not Make This Change!

B. Smallwood

BEREL LUTSKY — Jun 15, 2026
Subject: Comment on S7-2026-15 From: BEREL LUTSKY Affiliation: Jun. 15, 2026 I am Berel Lutsky, retired university professor and part owner and board member of a family owned manufacturing firm in Wisconsin. Quarterly reports are essential for a healthy business, even better if they are audited reports. It’s important for managers and shareholders to know exactly what the financial situation is, and be certain th at financial covenants are being maintained. I am on the board of a family owned manufacturing business that has grown from an $80 million/year in business in 2018 to a $205 million/year business this year, and yearly reporting to audited quarterly. We are making better decisions and the family shareholders are reaping the benefits. Publicly held companies need to maintain quarterly reporting- it’s good for business and shareholders.

Beth Taylor — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Beth Taylor Affiliation: Jun. 15, 2026 I feel compelled to articulate my profound concern and strong disagreement with the proposed initiatives. History offers invaluable, often painful, lessons, and it is crucial that we meticulously examine past precedents to prevent the recurrence of detrimental outcomes. Failure to heed these historical warnings could precipitate widespread instability.

For millions of individuals, their retirement savings represent the culmination of a lifetime of dedicated work, prudent planning, and significant personal sacrifice. These accumulated funds are not merely financial assets; they form the bedrock of their future security, dignity, and ability to afford essential needs and healthcare in their golden years. Any action that jeopardizes these painstakingly built reserves carries the potential for catastrophic, even life-threatening, implications, eroding the fundamental well-being and peace of mind of countless citizens. We must prioritize the long-term financial security of our community and avoid any measures that risk undermining this vital foundation.

Beverly Richards-Smith — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Beverly Richards-Smith Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
As a retiree with two 403(b) employee retirement accounts, I oppose this rule. I am no longer able to put money into these accounts, and I'm concerned that my retirement savings might be ravaged by poor decisions of a company in one of the funds in which my 403(b)s are invested without my knowledge. Quarterly reports allow investors to keep up with the performance of our investments and make adjustments to our portfolios before too much damage has been done. This is especially important for those of us without major investments who are living on withdrawals from our

employee accounts.
Sincerely,
Beverly Richards-Smith

BG Warden — Jun 15, 2026

Subject: S7-2026-15 Comment From: Bill and/or Mary Kaye Raddatz Affiliation: Jun. 15, 2026 Keep quaryerly reporting . Why? More time for fraud to grow.
Enron. WorldCom. Madoff. The run-up to 2008. Every major modern accounting scandal was enabled by gaps and opacity in financial disclosure. Quarterly filings don't prevent fraud, but they dramatically shorten the window in which it can fester before someone outside the company can see it. What if Enron only had to cook their books twice a year?

Bob Cantwell — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Bob Cantwell Affiliation: Jun. 15, 2026 Robert Cantwell
Retired
Cos Cob, CT

To whom it may concern,
The proposed sec rule change for voluntary quarterly reporting is bad for the public and the economy in several ways.

1. Reduced Transparency and "Information Blackouts" Longer gaps: Investors must wait six months instead of three to see official, un-audited financial health metrics. Hidden problems: Struggling companies can hide deteriorating financial conditions or operational failures for much longer before disclosing them. Delayed reactions: Market participants cannot adjust their strategies in real-time,

increasing the risk of sudden, painful stock price crashes when bad news is finally revealed.

2. Advantages for Insiders and Sophisticated Investors Information asymmetry: Corporate insiders (executives and board members) will hold a massive informational advantage over the public for extended periods. Unfair edge: Large institutional investors with direct corporate access or advanced data-scraping tools can easily outmaneuver everyday retail investors who rely strictly on public filings. Insider trading risks: The temptation and opportunity for opportunistic insider trading increase when material information remains non-public for half a year.

3. Increased Market Volatility Speculation spikes: Without official quarterly data, the market will rely heavily on rumors, unofficial leaks, and analyst guesswork. Violent price swings: When semiannual reports are finally released, the massive accumulation of six months' worth of data will cause much larger, more volatile stock price swings.

4. Voluntary Disclosures Lack Legal Teeth Earnings releases vs. filings: While companies can still put out voluntary quarterly earnings releases, these do not carry the same legal weight as formal SEC filings. Fewer protections: Voluntary releases do not require formal CEO/CFO certifications under the Sarbanes-Oxley Act, making them less reliable and harder to legally challenge if they are misleading. Selective sharing: Companies might choose to share good quarterly news voluntarily but remain completely silent if they have a bad quarter.
Thank you,

Bob Cantwell

bonnie grant — Jun 15, 2026
Subject: S7-2026-15 Comment From: bonnie grant Affiliation: Jun. 15, 2026 Dear Sir/Madam,

As a retired factory worker, Bonnie Grant, I have witnessed firsthand the profound importance of clarity and accountability in all sectors of our society. This conviction has only deepened with age, leading me to firmly believe that absolute transparency is not merely a preference, but a fundamental necessity for a healthy and equitable system.

My own grandson, for example, participates in the stock market – a complex arena where information, or the lack thereof, can dramatically impact individual livelihoods. While he navigates this landscape successfully enough, his experience underscores a critical point: without full disclosure and open access to data, the playing field becomes uneven, and opportunities for manipulation increase.

This isn't just about financial markets; it's about the very fabric of our democracy. Every American citizen, myself included, possesses an inherent right to understand the mechanisms and decisions that govern our collective future. We deserve to clearly see how systems operate, how policies are formed, and how public resources are managed. When information is obscured or withheld, trust erodes, and the foundational principles of fairness and justice are compromised.

Therefore, I unequivocally stand against any measure or practice that diminishes public transparency. I advocate strongly for policies that empower citizens with full and unfettered access

to information, ensuring that all processes are open to scrutiny. My voice, and my vote, will always be cast in favor of maximum openness and accountability.

Bonnie Gustow — Jun 15, 2026

Bradley Wright Individual Investor — Jun 15, 2026
Subject: File No. S7-2026-15 From: Bradley Wright I am 1000% opposed to creating an allowance for companies to conduct semiannual financial reporting rather than quarterly reporting. This change creates an unquantifiable negative impact on the ability of shareholders and investors to understand the businesses they hold stock in or are considering investing in. The only way to measure it is that when a quarterly report was previously due and could guide for the next 3 months, because of current reports, there will be none. No information, no guidance, no transparency to owners and stockholders for another 3 months. Literally, half of the time we previously had information, we now have only "guesses". The negative impact to the individual investor and the stockholders literally cannot be measured. The SEC should be promoting the greatest level of transparency, not decreasing it by 50%.

Bran Lo — Jun 15, 2026

Sent from my iPad

Brenda — Jun 15, 2026
Subject: S7-2026-15 Comment From: Brenda Affiliation: Jun. 15, 2026 Brenda Brown, Senior Manager
Quarterly reporting is needed to ensure that investors have a good understanding of a company's financial performance. Moving it to every six months blurs that picture; the only reason to do this is to allow bad actors more time to hide issues that would trigger changes in their stock value. The SEC has an obligation to the investing public to continue to require quarterly reporting or risk investors losing confidence in the United States stock markets.

Brent & Stacie Meredith — Jun 15, 2026
Subject: S7-2026-15 Comment From: Brent & Stacie Meredith Affiliation: Jun. 15, 2026 I do not agree with changing to a 6-month reporting period. If anything, it would be helpful for companies to be more transparent, not less. Waiting 6 months to see a potential trend start and 6 months to a year more to confirm it is not a viable way for investors to have confidence in investing in publicly traded companies. Financial companies with access to management and providing funding for upcoming needs will have clear insights into what is happening and will have an unfair advantage on whether to invest or divest their holdings that regular investors would not have. It gives significant power to Wall street and takes it from the small investor who needs better information than the talking heads on TV and social media guessing why a stock is going up or down based on market movements without data to check and analyze to determine the validity of what is said. There is too much potential for misuse and stock manipulation through rumor and innuendo with such long reporting periods.

There may be benefit to changing from quarterly reporting for some items to a longer period that are inappropriately causing trading issues because of short term seasonal factors like inventory turns but top line free cash flows, debts and purchase of assets, return on equity or assets, and things that show a companies overall health and growth need to be reported. Allowing companies to make projections on a 6 month basis may be acceptable because too many people/financial analysts focus on making or missing those projections by a few cents (depending on the size of a company) to determine whether a stock is good or not does not make sense to me.

Brent Meredith

Brent Anderson — Jun 15, 2026

Brian Anderson — Jun 15, 2026

Subject: S7-2026-15 Comment From: Brian Anderson Affiliation: Jun. 15, 2026 My name is Brian Anderson and I worked in the investment banking industry for the final third of my professional life. I have been an active investor in equities for the past quarter century. I strongly believe that publicly traded corporations should continue to be required to make audited quarterly statements. Even now, far too much bad news is only revealed at the last possible moment. If those moments are half a year apart it will only make things worse. We need timely updates to stay on top of the financial health of our investments. The current reporting rules should stay in place.

Brian Burke — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Brian Burke Affiliation: Jun. 15, 2026 Brian Burke, retired, Webster, NY

Companies should report QUARTERLY, not semiannually for the following reasons.

1. Greater transparency for investors
* Quarterly reports give investors a regular look at a company's sales, profits, debt, and other important developments.
* Waiting six months between reports would leave investors with less information and could make it harder to assess how a company is performing.
2. Helps prevent surprises and market volatility
* When information is released every three months, problems and successes are disclosed more gradually.
* With only two reports per year, investors might receive six months' worth of news all at once, potentially leading to larger stock price swings and more market uncertainty.
3. Improves management accountability
* Quarterly reporting forces company executives to regularly explain their results and answer questions from investors and analysts.
* More frequent reporting can discourage management from allowing problems to go unaddressed for long periods and gives shareholders more opportunities to evaluate leadership performance.

Brian Humphrey — Jun 15, 2026
Subject: S7-2026-15 Comment From: Brian Humphrey Affiliation: Jun. 15, 2026 I own several Monthly Dividend payers. Quarterly reporting keeps me up to date on any Corporate transactions. Moving to a 6 month reporting action would halve/severely limit my decision making process on when/what to buy or sell next.

Brian R. Humphrey
"Somewhere in America!"

Brian Klein — Jun 15, 2026
Subject: File No. S7-2026-15 From: Brian Klein Dear Secretary Countryman, I am writing as an individual retail investor to express my strong opposition to the Commission's proposal to allow public companies to opt out of quarterly reporting in favor of a semiannual cadence. At 47 years old, I have spent decades building and managing my personal investments. From my perspective, this proposal does not serve the public interest or protect ordinary investors. Instead, it serves to benefit corporate executives at the direct expense of transparency and market integrity. Quarterly reporting has been the bedrock of the U.S. financial system since 1970 for a reason: it keeps the playing field fair. Extending the mandatory reporting window to six months will create a massive information vacuum. Corporate insiders and institutional investors with direct access to management will always find ways to gauge a company's health, but everyday retail investors rely entirely on timely, standardized public disclosures to make informed decisions. Reducing the regulatory floor to semiannual reporting will not eliminate the need for quarterly data; it will simply ensure that the public is the last to see it. It increases the risk of insider trading, heightens market volatility when six months of data is suddenly dumped at once, and severely degrades the transparency required to hold public companies accountable. The SEC's primary mission is investor protection and maintaining fair, orderly, and efficient markets. This proposal violates that mission by prioritizing corporate convenience over public transparency. I urge the Commission to reject this proposal and maintain mandatory quarterly reporting. Sincerely, Brian Klein Columbus, Ohio

Brian Richards — Jun 15, 2026
Subject: File No. S7-2026-15 From: Brian Richards To the Securities and Exchange Commission: I am writing to comment on File No. S7-2026-15, the proposed rule amendments that would allow public companies to satisfy interim reporting obligations through semiannual rather than quarterly disclosures. I am a private individual investor, and I am writing in opposition to this proposal. I want to acknowledge that the SEC's stated concern about short-termism in corporate America is legitimate. Executives who sacrifice long-term value to meet a quarterly earnings target are a real problem worth addressing. My objection is not to the diagnosis but rather to the remedy. The evidence does not support the theory that quarterly reporting causes short-termism. A CFA Institute Research Foundation study examined the United Kingdom's experience with mandatory quarterly reporting, which was required starting in 2007 and then dropped in 2014. Researchers tracked corporate investment levels before and after each regulatory change and found no statistically significant difference either way. Companies that stopped reporting quarterly did not invest more in the long term. The drivers of short-termism -- executive compensation structures, board composition, incentive misalignment -- were unchanged by reporting frequency. What quarterly reporting does affect is the quality of information available to individual investors. Quarterly filings are standardized, certified, and directly comparable across companies and time periods in ways that episodic 8-K disclosures are not. There is a meaningful difference between a company voluntarily flagging a material event and a company being required to provide a comprehensive financial picture on a regular schedule. Cutting that cadence in half doubles the information gap between corporate insiders and the individual investors who own their stock -- and it is likely that the smallest, least-covered companies where that gap will widen the most. I believe this proposal moves in the opposite direction of Regulation Fair Disclosure, which required companies to share material information with all investors simultaneously rather than selectively. Reg FD said more information, more fairly shared. This proposal says less information, less often. I do not believe that serves the interests of individual investors or the integrity of public markets. I respectfully urge the Commission not to adopt this rule. Sincerely, Brian Richards

Brian White — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Brian White Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Lowering the visibilty and transparency of companies publicly traded is in no one's best interest except the companies themselves and insiders. This erodes retail investor trust in the stock market itself and punishes us for not working on wall street or for one hedge find or another. These crooks already manipulate and rig the game against us as retail investors, you are going to make it easier. Please do not worsen the gap by removng these quarterly reporting requirements. Do not take away my ability to look under the hood and check on my investments thoroughly and on a regular basis. You open the door for shenanigans and more schemes to take money from the poor and give it to the rich. It is bad enough already. Please do not make it worse.
-Brian White

Brianna Miller — Jun 15, 2026
Subject: S7-2026-15 Comment From: Brianna Miller Affiliation: Jun. 15, 2026 I rely on quarterly reporting to make informed decision on my retirement investments. With reporting being only every six month, it could allow for unfair advantage for corporate insiders. "Optional" choice for companies to opt in are often the companies whose investors need more frequent updates. The other companies who choose not to opt in are not being transparent and accountable to their investors. The savings for these big corporations are not worth the cost and loss to me as an investor.

Brittany Spielman — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Brittany Spielman Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I am a woman with a single job, no large companies, no access to shareholder meetings, no conversations in my day-to-day regarding the stock I hold in my investment portfolio.
Getting an update every 3 months allows me the chance to course-correct future investments if needed. Quarterly reports give me insight into how things are trending, how my money is doing, and whether I need to do a deeper dive before investing more of my hard-earned dollars the next go-around.
The "little guy" is already severely disadvantaged in this market where we do not have as much access to larger funds that require $2k minimum investments, where we were not taught puts or calls, where we do not generally have other massive assets in our portfolios like retail spaces or rental properties...
Large corportations can afford to pay the person or team to create a single shareholder report every 3 months so that those of us not within the company's 4 walls still have an idea of what is going on with regards to a company we own a stake in.
Thank you for your time and consideration in this matter.
Sincerely,
Brittany S.

Byron Scott Bailey none — Jun 15, 2026
Subject: File No. S7-2026-15 From: Byron Scott Bailey I am commenting on rule proposal S7-2026-15. As an everyday investor, the proposed reduction in reporting reduces the protections against potential fraud, faulty business decisions, and increases the possibility that changes can be made in operating practices for businesses that can be harmful to those outside the investment community itself who lack the resources to get the data outside of official SEC reports. This change in reporting would in my opinion, give the big Wall Street firms an additional unfair advantage to hide or misrepresent the operating information of reportees. Please consider leaving the current quarterly disclosure structure for Form 10-Q as it currently exits - every fiscal quarter. Thank you for your consideration.

CARL & SUZY DENT — Jun 15, 2026
Subject: S7-2026-15 Comment From: CARL & SUZY DENT Affiliation: Jun. 15, 2026 Hello, I am a CPA and gravely concerned about the proposed changes to the quarterly reporting rules. Accounting is about transparency. It is about honesty, and foremost it is about accuracy.
These rules changes allow businesses far too much room to deceive investors, employees, and the government about the actual fiscal condition of the company. It is tilting the playing field. It will do nothing to make anything better. And if a change doesn't
improve a situation then it seems it was just proposed to help corrupt individuals bilk even more cash. The companies will still be doing the work. This will not save money or manpower. It just allows them to hide important information from their stockholders,
their owners . Quarterly reporting should stay

Sent from AT&T Yahoo Mail on Android

Carl Atkison Citizen — Jun 15, 2026
Subject: File No. S7-2026-15 From: Carl Atkison Please do not change the filing from quarterly to semiannual. Doing so creates a greater lag in SEC scrutiny of potential economic problems or fraudulent behaviors. It also hides dealings and actions from public view for longer with minimal benefit. This report is of minimal cost and time to companies and SEC could very well use AI to analyze these to better protect the public. Even though the semiannual filing is listed as optional, companies will take advantage of this to hide questionable actions and data.

Carl Delmolino — Jun 15, 2026

Subject: S7-2026-15 Comment From: Carla Jackson Affiliation: Jun. 15, 2026 The SEC's core mission is investor protection and maintaining fair, orderly, and efficient markets. This proposed rule achieves the exact opposite. It trades public transparency for marginal corporate savings, creating a market environment where the public is left in the dark while insiders gain a massive advantage. I strongly urge the Commission to reject this proposal and maintain the mandatory quarterly reporting structure.

Respectfully,
Carla Jackson

Carla Jackson-Morris — Jun 15, 2026
Subject: S7-2026-15 Comment From: Carla Jackson-Morris Affiliation: Jun. 15, 2026 Carla Jackson-Morris, MAPC-LPC. Keep it Quarterly. There are enough illegal actions going on now. Why go to less time for large companies to find ways to escape doing the right thing for the public? The current regiment of "Checks in Balance," are needed to protect us from scrutiny, and brutal escapes for large companies to leave the public holding the bag. Clarity in business is

professional and keeps America honest, we need these reports to
negate usury and faulty business practices.

CAROL CARTER — Jun 15, 2026
Subject: Comment on S7-2026-15 From: CAROL CARTER Affiliation: Jun. 15, 2026 As a retired Foodservice Manager I am very concerned about the deregulation of rules that protect the consumer. Working with other people's money on a daily basis has made me very aware how rules protect the consumer and the business. Reporting helps to keep everyone honest and gives the business an opportunity to review "housekeeping " so to speak. If a business has to report quarterly instead of semi annually, they may try to do better because the consumer can see what is happening to their money. Gives the consumer an opportunity to possibly change what or who their investments are with. Keep the regulations in place.
Thank you, Carol Carter Foodservice Manager, retired North Huntingdon, PA 15642

Casey Keefe — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Casey Keefe Affiliation: Jun. 15, 2026 My name is Casey Keefe, I'm a Firefighter with 20 years in the Fire Service. My pension and personal accounts are all invested heavily in the U.S. stock market. Semi-annual reporting would cripple my accounts as I prepare to retire in the next 15-20 years. After multiple economic disasters in this country, my accounts are starting to recover. Do not experiment by switching to this broken system of semi-annual reporting at this critical junction. We (as a nation) have tried this before and it failed. We have had much more success with quarterly reporting. Let's stay on the proven path.

Sincerely,

Lt. Keefe

Cass G — Jun 15, 2026
Subject: S7-2026-15 Comment From: Cass G Affiliation: Jun. 15, 2026 I am a retired investor who relies on quarterly reports to make investment decisions. A 6 month gap can be disruptive in planning for income that I heavily rely on. Optional reporting would be hit or miss at best. All companies should be held to the same standards so that accurate comparisons can be made. The Sarbanes-Oxley was enacted in 2002 due to corporate scandals including Enron and

WorldCom. Changing reporting to a 6 month calendar instead of quarterly is taking a step away from laws that were enacted to prevent corporate accounting scandals. The 6 month calendar would make companies less transparent for the time between reporting, a time that could be detrimental to investors. Companies will still be keeping track internally, so the cost savings of skipping a report would be minimal.
Catherine Guzik
retired

Cassandra Goldwater — Jun 15, 2026
Subject: S7-2026-15 Comment From: Cassandra Goldwater Affiliation: Jun. 15, 2026 I am retired and need transparency in my financial assets. Stop making everything about “the deal” or the steal. We live in a democratic republic last time I checked.

Hold yourselves accountable and grow some ethics.

Catherine Raspet — Jun 15, 2026
Subject: S7-2026-15 Comment From: Catherine Raspet Affiliation: Jun. 15, 2026 This is just one more way for the system to cheat and scam the American people. Why? It is time for us to stand up and say STOP TO THIS GARBAGE. INSIDE TRADING ? IS THAT WHAT WE'RE COVERING UP BY ALLOWING THIS??? UGH!!!!!!

Catherine Thayer — Jun 15, 2026
Subject: S7-2026-15 Comment From: Catherine Thayer Affiliation: Jun. 15, 2026 As a person of retirement age, I rely on my investments. Quarterly reporting allows all of us to track and analyze our assets. It protects my future. Decreasing the amount of information available to the public makes no financial sense. The United States has had the most successful financial markets while using quarterly reporting. The SEC would be foolish to mess with a system that works well for everyone. Stick with quarterly reporting, it allows the everyday American to access information we need. Transparency matters. Catherine Thayer

Sent from my iPad

Cathy Abes — Jun 15, 2026
Subject: S7-2026-15 From: Cathy Abes Affiliation: Jun. 15, 2026 Isn't the SEC supposed to keep corporations and their CEOs accountable to their shareholders and the public? Then why has it decided to give a "gift" to them by cutting in half their income reporting? To make it easier for them to cover their tracks and keep their shady dealings secret? Your job is to prevent them from committing fraud, not enabling it. You're supposed to be accountable to us—the American people—and protecting us from unscrupulous players—so do it! For far too long, powerful people and corporations have had a cozy relationship with the government, and the result has been that the rich get insanely richer and the rest of us get less and less. At a certain point, wealth becomes an obsession and an addiction—it's not something you need; it's something you crave. Ordinary people NEED decent affordable housing, health care, education. Those are not frivolous desires, like a lavish mansion, a fleet of luxury cars, or a fancy yacht. They're necessities. Please don't allow corrupt players to game the system for their personal enrichment. Hold them accountable—for all of us!

ccc grenier — Jun 15, 2026
Subject: S7-2026-15 Comment From: ccc grenier Affiliation: Jun. 15, 2026 Quarterly Reports are not and should not be optional. If your company is as solvent as it's CEOs and share holders say it is then filing a quarterly report should be a non issue. However if
a company has something to hide like overvalued stock prices, insolvency, fraud etc then the Company, it's shareholders,CEOs should be held personally liable rather then giving them a law written by corporate lawyers to hide the above mentioned and shield
them from accountability. If the SEC can't be allowed to stand for accountability which is it's job then perhaps it's time restructure it so it can and give it the resources to do the work that we the people pay for it to do .

Chadwick Casper — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Chadwick Casper Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
The markets should be for everyone. This very clearly undermines that priority and creates more gatekeeping and barriers to access to financial tools and instruments. In an age where trust in government and institutions are at an all-time low, why would you take away transparency for the public? Instead of taking away 10-Qs, let's make them easier to file -- especially for smaller organizations. If the argument is to challenge 'short-termism', let's focus on how to change and challenge guidance that falls out of filings seasons instead of throwing away the whole process of giving the public education on how a company is doing in the short-term. The guidance and the filings do not need to be tied together.

Charla Hord — Jun 15, 2026
Subject: S7-2026-15 Comment From: Charla Hord Affiliation: Jun. 15, 2026 I am against corporations moving to biannual reporting. That will result in corporate and government insiders having an even greater advantage over private investors than they already do. Because of Trump’s tariffs, my small farm income from crops has already dropped to the point where I am making very little, if anything, by the time I pay my expenses. I am a retired person, just trying to get by on Social security and my investments. My investments are small enough, as it is, but I certainly can’t afford to lose somewhere between a third to a half of what is currently invested in stocks. I am already seriously considering selling my stocks and moving those funds to my IRA, and I would imagine that I won’t be alone. Things are already tough enough for the public, without the SEC making them even worse. Please leave corporate reporting at its current quarterly schedule. Sincerely, Charla S Hord

Charlene Thomas — Jun 15, 2026
Subject: S7-2026-15 Comment From: Charlene Thomas Affiliation: Jun. 15, 2026 Charlene Thomas here. I feel that quarterly reporting means full transparentcy in the business world. If there was a logical reason that would make a difference but this feels more like the rich wanting to change the rules once more. Low and middle income people shouldn't be afraid that something could be hidden for 3 extra months if companies are not doing well.

Charlene Underwood — Jun 15, 2026
Subject: S7-2026-15 Comment From: Charlene Underwood Affiliation: Jun. 15, 2026 Comment on Proposed Rule: Elimination of Quarterly Reporting Requirements (Form 10-S)

My name is Charlene Underwood and I am a retired senior citizen. My financial security depends almost entirely on the income and growth from my retirement accounts — money I saved over a working lifetime that I now rely on for housing, healthcare, and daily expenses. I am writing to oppose any rule that would allow public companies to reduce the frequency of their financial disclosures from quarterly to semi-annual.

I am not a Wall Street analyst. I do not have a team of accountants or lawyers reviewing company data on my behalf. What I have is access to the same public filings that every ordinary investor has — and quarterly reports are how I make informed decisions about the companies in my retirement portfolio.

Reducing reporting to twice a year does not reduce the risk that things can go wrong inside a company. It simply delays when I find out. In six months, a company can lose its biggest customer, take on crippling debt, or face a major lawsuit. Executives and large institutional investors often have the resources and relationships to detect warning signs earlier. I do not. The quarterly filing is one of the few protections that puts ordinary retirees on remotely even footing with sophisticated market players.

The argument that this rule is "voluntary" does not reassure me. Market pressure will push

companies toward less disclosure, not more. We have seen this pattern before.

I lived through the Enron collapse. I watched retirement savings — including those of people I know — evaporate when accounting fraud that had been building for years finally came to light. Transparency requirements exist precisely because history taught us what happens without them. Weakening those requirements, even gradually, risks repeating those lessons at the expense of people who can least afford to lose their savings.

The supposed savings to companies from filing fewer reports are modest. They do not flow to me. The cost of worse information does.

I urge the Commission to protect ordinary investors — including retired Americans who depend on their savings — by preserving quarterly financial reporting requirements. This is not a burden on companies. It is a basic protection for the public.

Respectfully submitted,
Charlene Underwood, West Chester, PA

Charlotte Webb — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Charlotte Webb Affiliation: Jun. 15, 2026 Charlotte Webb. Retired - Appoquinimink School District Adnin, Middletown, De
As a retiree, a good part of my income is dependent upon my investments. In addition to my personal retirement investments, my husbands pension fluctuates depending on Investments. I am good for the economy - I purchase locally and travel, most often within the United States. It is essential that we continue to use quarterly reporting . Our history shows that stocks decreased when reporting was biannual, especially for middle class people like myself. Once you lose your middle class we wull fall into a recession. Not to mention the plight of the elderly. With a decrease in savings, we will be unable to maintain our homes or get the potential necessary care in our later years. It is time that our government take the middle class into consideration. We are your teachers, law enforcers, nurses, the support systems for your community.
Thank you for your time. Please consider maintaining accountability to ensure a more prosperous country.

Chase Z — Jun 15, 2026
Subject: S7-2026-15 Comment From: Chase Z Affiliation: Jun. 15, 2026 This is clearly intended to make it easier for the gamblers to make more money off those investing for retierment and their family's future. They are already impaired enough. People NEED to believe in an economy for it to actually exist.....like Tinkerbell, that is bad enough but when the people in control of ot keep doing stuff like this while letting liars get off SEC charges for it by calling it "corporate puffery", and get aways with stealing billions as long as they cough up 15% to the government IF caught, etc, people are going to stop believing in it, and POOF it will be gone. Then, even those at the top wont be worth

anything.
In other words this is bad for everyone, even if a few will make a ton of money(on paper) for a short time until it falls apart. If anything we need to do the opposite and make it harder for these people to exploit the market. However, I seriously doubt that this is about making things better for people and has everything to do with boosting the thriving corruption market.
I have stopped believing in it already....some time ago actually, and it has only gotten worse since then with all this "AI" nonsense and the obscene amount "investment"(circular financing) going into it. Its a time bomb of failure and it will be on you if you continue to make it easier for them to exploit. Im not a "radical" as many may like to brand me. I just want to see how things work when done as intended and not corrupted by the exploitation of the many loopholes you seem to refuse to close... .and now want to open up more instead?! Cheaters win and those that play by the rules are almost guaranteed to lose. You know, whatever, go for it, Im used to being poor at this point, I seriously doubt you and your friends you are doing this for will fare as well. See ya in the bread lines!

Christina Holden Shea — Jun 15, 2026
Subject: S7-2026-15 Comment From: Christina Holden Shea Affiliation: Jun. 15, 2026 I write this in hoping that quarterly Reports stay the norm in the financial and investment industry. There have been too many times investment firms, companies and other organizations have issued fraudulent accounts taking down the average investor. Bernie Maddoff? Enron? If an Americans cannot trust the biannual reports, Americans will stop investing. Money will stay in the mattress so to speak. There is already major mistrust in corporate America and their obscene tax break. Add biannual grifting/ cooking the books and watch how mistrust grows.
In closing, again, keep the reporting quarterly.
Thank you,
Christina Holden-Shea
Union Wardrobe assistant for theater and film

Christine Belin — Jun 15, 2026
Subject: S7-2026-15 Comment From: Christine Belin Affiliation: Jun. 15, 2026 Christine Belin, Real Estate Broker, this matters because as an investor, we should be able to see and understand what is happening within publicly traded companies at all times. To both companies we may have holdings in and ones we are considering investing in. The limiting of oversight and information is simply a shady practice. A company should be able to be held accountable anytime, not just 2x a year. Quarterly reports are fiscally responsible and should be maintained for both internal and external reviews.

Christine Eberly-Bomlitz — Jun 15, 2026
Subject: S7-2026-15 Comment From: Christine Eberly-Bomlitz Affiliation: Jun. 15, 2026 We need to keep transparency and absolutely require quarterly reports.

Christopher Banks — Jun 15, 2026
Subject: S7-2026-15 Comment From: Christopher Banks Affiliation: Jun. 15, 2026 I, a citizen of the United States, and an investor in the stock market with a retirement account, am wholly against any law, regulation, or rule change that will reduce the breadth or frequency of publicly traded companies' financial reporting requirements. Those financial reports provide vital information that investors and future retirees like myself use to make informed choices about how to allocate the funds that we invest. Please do not make any rule changes lessening the frequency, breadth, or detail of required financial reports for publicly traded companies.

Sent from my iPhone

Christopher Copeland — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Christopher Copeland Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
To the layman, this reads as an attempt to do a few things, none of which are good for the average American.
One, it reads as an attempt to give insider another leg up over the rest of us by allowing more time to trade before the markets can adjust appropriately, putting the bulk of the loss on those not privy to insider information.
Second, it reads as an attempt to stall the news and evidence of recession (or worse) limiting the average American's ability to financially react and aprotect themselves.

imagine for a moment giving a better stranger a bunch of your dollars for a startup in which you will be a part owner. Although you may be a silent investor, you are still beholden to and depend on the efforts of that person, their consistency, honesty and, of course, their efficacy. You want to know how your investment is going, right? You will want forecasts to maybe help more or know that your money is safe where it is. You will want to check on this as often as one can, yes? See where this is going?
This reads to me as an attack on the lower 98%. As a capitalist state, we need the know the state of our capital. 6 month updates are insufficient and unacceptable.

Christopher Hannon — Jun 15, 2026
Subject: File No. S7-2026-15 From: Christopher Hannon In particular, we individual investors do not need less information from the public companies we invest in. This proposal is a bad idea. VOTE IT DOWN!

Christopher McCamic Insurance Auditing — Jun 15, 2026
Subject: File No. S7-2026-15 From: Christopher McCamic The idea that any significant cost savings

from lowering reporting requirements could possibly outweigh the cost of loss of transparency, frankly, beggars belief. Free markets depend on trust, transparency, and rigorous, accurate information. Keep reporting requirements rigorous. It keeps corporate America disciplined, and markets worth investing in.

Christopher McCarten — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Christopher McCarten Affiliation: Jun. 15, 2026 Christopher McCarten from Fall River, MA

I've been managing family investments for myself and a family trust my father established for the primary benefit of my son, his only grandson. My father was a financial executive for many years having worked for Reeves Soundcraft, Nautec and Celanese in NY, Industrial National Bank in RI (currently Bank of America), Credit Card Services Corp of Alexandria, VA, Max Factor in Hollywood, CA and Computers International in Los Angeles beginning in the late 1940's. He taught me to read the Wall Street Journal and review various companies stock prices and articles about their earnings reports that affected stock prices. He was a member of the American Bankers Association (ABA) and involved in Mergers & Acquisitions (M&A's) and advised that the move to quarterly reporting was of great benefit to banks, corporations and stockholders. I still recall getting my first shares of stock as a gift from as a child, shares I still own in a company I follow closely in various media outlets today as based on quarterly earnings analysis over the past several years my dividend reinvestments and additional stock purchases have led to great appreciation. Based on my lifetime experience and having first hand responsibility for my family investments as well as the family trust I can honestly say that quarterly reporting has had a strong influence on financial decisions and that without that timely purchases or divestitures of corporate stocks, whether common or preferred, as well as bonds would lead to unforeseen opportunities and potential losses that can be of significant magnitude for a range of investors and financial institutions. My recollection is that is why there was a shift to quarterly reporting to begin with. In closing, I and am sure many investors share our utmost concern that there should not be a shift away from providing much needed timely quarterly earnings reports. The information and various analysts analysis of the data are crucial for investors both large and small. Thank you for your time and due consideration in this matter. Please feel free to contact me if you so desire.

Sincerely,
Christopher McCarten

Christopher Pankhurst — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Christopher Pankhurst Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission: this is not in the interests of the majority of Americans and enables further corruption and fraudulent activities of corporations and this administration and I strongly disagree with this proposed action to reduce corporate reporting from quarterly to six monthly. I see absolutely no benefit for the average Anerican who is investing to help them prepare for retirement and other legitimate investment activities.

christy phillips — Jun 15, 2026
Subject: Comment on S7-2026-15 From: christy phillips Affiliation: Jun. 15, 2026 Keep requiring quarterly reporting and sign-off by CEOs! The stock market needs it and the investing public needs it. It was either good reason that we went back to quarterly reporting in 1970 after trying bi-annually in 1955. We MUST protect the public and investors. These companies are fully equipped to report quarterly, and close monthly for internal purposes, so this is not a hardship for them. Do NOT let them slip into not reporting AND signing-off on a quarterly basis. The integrity of the market requires it and it is with very good reason that CEOs have to sign-off. Do not let them reduce the transparency.

Sincerely,
Christy Phillips
Retired CPA and investor

Cindy Lynn Ostergard — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Cindy Lynn Ostergard Affiliation: Jun. 15, 2026 Returning to semi-annual reporting by public companies is unacceptable. It may have been practical fifty years ago, in a time when computers and digital communications were in their infancy. Still, given the sophistication of today's technology, the ONLY reason to return to the dark ages of corporate reporting is to let companies slide, hide, and bide their time before they have to be open to public scrutiny. That's right, public - as in PUBLIC corporations. With today's technology, we could actually speed up reporting to monthly.

Less frequent reporting could harm market transparency, increase volatility, grease the wheels for insider trading, erode trust in markets, and reduce capital market participation and liquidity.

I know that our current president is behind this movement. You need to have the courage and tenacity to stand up to him and, in the words of Barbara Bush, JUST SAY NO. Quarterly reporting is good for the public, and what's good for the public is good for the economy. Semi-annual reporting would allow a lot of dirty, underhanded dealing. Don't do it. Vote no.

Regards,
Cindy Lynn Ostergard

Cody Snow — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Cody Snow Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
We deserve to maintain what has been status quo for 50 years--quarterly reports on the information we need to make informed decisions about our investments in public companies. Any change to this rule is in bad faith, as there can be no reasonable justification for relaxing reporting rules that would help the average investor. The SEC represents our interests, not the interests of institutional investors who already have a powerful voice. As an American citizen, and someone who relies on the health and stability of the markets for my retirement, I fully and completely reject this proposed changed. Anyone who proceeds with these unlawful changes will be held accountable in the court of law.

Collins Kilstron — Jun 15, 2026
Subject: S7-2026-15 Comment From: Collins Kilstron Affiliation: Jun. 15, 2026 Dear Kilstron Collins,

I am writing to express profound concerns regarding the current state of information dissemination within our organization. It has become increasingly difficult to execute my responsibilities effectively and make sound professional decisions when critical data, particularly concerning the company's financial stability and operational trajectory, appears to be withheld.

As a committed stakeholder, I rely on transparent and comprehensive insights into the company’s health to plan prudently and contribute meaningfully. The perceived absence of crucial information not only fosters an environment of uncertainty but also raises significant questions about the ethical standards guiding our internal communications. Such a lack of candor fundamentally undermines the trust essential for a cohesive and productive work environment.

Deliberately obscuring or withholding vital details about the company's challenges impacts everyone and restricts our collective ability to adapt and respond effectively. For me to continue dedicating my best efforts and to make informed choices about my future within this organization, a complete and honest disclosure of the current situation is imperative.

I urge you to address these serious concerns with the urgency and transparency they demand. I anticipate a prompt and thorough clarification of the company’s position and a commitment to more open communication moving forward.

Sincerely,

Kilstron Collins

Comcast — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Comcast Affiliation: Jun. 15, 2026 Brad Jones, IT Director, Atlanta Georgia. Quarterly reporting is the minimum frequency needed to ensure public companies disclose relevant investor information in a timely manner.

Thanks,
Brad

Comcast — Jun 15, 2026
Subject: S7-2026-15 Comment From: Comcast Affiliation: Jun. 15, 2026 Danielle St Hilaire, Office Manager - Allowing these companies to decrease reporting making it more challenging for those

who look to invest effectively for their long term financial stability is another move to ensure wealth stays concentrated to the top 1% since they are the demographic most inclined to benefit from their insider information giving only them the advantage of when and what to sell. It's unfair business practice and making the bottom 90% vulnerable to financial hardship in no way benefits the economy as a whole. Stop giving greed the green light. I am against this decision wholeheartedly.

Consuelo Lambert — Jun 15, 2026
Subject: S7-2026-15 Comment From: Consuelo Lambert Affiliation: Jun. 15, 2026 From: Consuelo Lambert, retired, investor.

I'm retired now and I need quarterly reports to manage my portfolio on a timely basis. There is so much business that goes on daily and I need to know how the companies I invest in, are doing. It is only fair that small investors like myself get some information. Big investors have the upperhand and personal relationships with companies that I will never have. A lot can happen in six months. Having a quarterly report will at least put me in the loop of what's going on.

Coral Bohne — Jun 15, 2026
Subject: S7-2026-15 From: Coral Bohne Affiliation: Jun. 15, 2026 I depend on those quarterly statements to make decisions on whether I continue with a company. I can't afford too risky. Aggressive or just stupid decision making. Quarterly financials are important.

We are retired and I've been disabled for 31 years.

Please don't let the greedy and uncared run away with more of our money.

At this point my choice is start researching the laws of our countries financial investment systems and pull our retirement money and put it in a wiser country.

Courtney Nisbett East Bay Regional Park District — Jun 15, 2026
Subject: File No. S7-2026-15 From: Courtney Nisbett Hello, I am writing to respectfully express my strong opposition to the Commission’s proposal to permit public companies to replace mandatory quarterly reporting with semiannual reporting. As an active participant in the U.S. financial markets, I urge the SEC to maintain the established quarterly (Form 10-Q) reporting framework . The requirement for public companies to disclose financial and operational performance every quarter has been a cornerstone of market integrity and investor protection for over fifty years. My support for maintaining this reporting cadence is based on the following critical points:Preventing Information Asymmetry: Moving to semiannual reports would create an unacceptable six-month information blackout. This extended timeline severely disadvantages everyday retail investors, widening the gap between institutional insiders and the public . Protecting Market Stability: Regular, predictable disclosures are essential for evaluating a company's financial health. Scrapping the 10-Q requirement could exacerbate sudden stock volatility, as the market would be forced to rely more heavily on rumors, unverified leaks, and unstructured interim metrics . Ensuring Transparency and Accountability: Frequent reporting holds corporate management accountable. Removing this obligation reduces the frequency with which companies must provide certified, transparent data to their shareholders . While I understand the concerns raised about corporate compliance costs and potential short-termism, the priority of the Commission must remain investor protection and transparent capital markets. The current architecture of federal securities regulation is built on the foundational premise that mandatory periodic disclosures are vital for a fair, efficient market.I urge the Commission to abandon the proposed allowance for semiannual reporting and ensure that all public companies continue to maintain the quarterly reporting standard . Thank you for your time, consideration, and dedication to protecting the integrity of our financial markets. Sincerely Courtney Nisbett Land Surveyor East Bay Regional Park District

Cs — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Cs Affiliation: Jun. 15, 2026 This proposed change to cut back required reporting to semiannual vs the current quarterly requirement is a terrible idea. Investors need more timely information, not less. I was a corporate banker for my career (now retired) and earned an MBA from the Wharton School. The bank’s credit decisions required a sound understanding of the current state of borrowers’ financial ability to repay loans. Less timely reports means poorer understanding and will result in higher losses and higher borrowing costs. Please

reject this proposal to eliminate quarterly reporting requirements. Carolyn Lingl, VP(retired) Bank of America, Los Angeles CA

Subject: S7-2026-15 From: Daniel Abney Affiliation: Jun. 15, 2026 Daniel Abney, Self Employed Medical Therapist, Pima, Arizona.
I had too many friends and associates who suffered retirement income losses under the old minimum reporting rules when the Enron travesty happened and absolutely do not want to see rules go back to minimum reporting. Allowing that to happen would be morally indefensible.

Daniel Coulon — Jun 15, 2026
Subject: S7-2026-15 Comment From: Daniel Coulon Affiliation: Jun. 15, 2026 Quarterly reporting has been the backbone of corporate policing and public scrutiny for decades, the ONLY reason to extend this would be to hide, deceive or otherwise obfuscate the health/performance of a company for stock manipulation etc. This can not be allowed to occur.

Sent from my iPhone

Daniel Foelber — Jun 15, 2026
Subject: File No. S7-2026-15 From: Daniel Foelber Switching from quarterly to semi-annual reporting takes a step back in leveling the playing field between institutional and retail investors. Transparency is the hallmark of the U.S. stock market. It empowers U.S. citizens and foreign investors to put their hard-earned savings to work in U.S.-listed companies. Taking a sledgehammer to that cornerstone undermines trust.

Daniel Kozlowski — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Daniel Kozlowski Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I'm 39. Our generation is doing all the right things yet still struggling. If you let publicly traded companies go to semiannual reports then we're no better than China. In the early 80s that Hollywood sellout Regan made us all in charge of our own retirements instead of company run pensions. Well if I'm going to be in charge of my own retirement investments then I want to continue with quarterly reports. Or even better make them give us reports every two months so we can see exactly where money is going. The average American can barely make it to retirement in this day and age, and a semi annual report is going to make markets even more volatile and harder for Americans to retire. As I said above we might as well be a communist state with businesses taking our money and being progressively less transparent with it.

Daniel Rodriguez — Jun 15, 2026
Subject: S7-2026-15 Comment From: Daniel Rodriguez Affiliation: Jun. 15, 2026 Daniel, Head of Global Learning at a fintech company. Transparencybis one of the very few levers of power the middle class has to attempt to make money in the market. Taking that away further increases inequality which further drives the nation towards collapse.

Daniel Rodriguez
Director, Global Learning & Development

Daniel Scarborough — Jun 15, 2026
Subject: S7-2026-15 Comment From: Daniel Scarborough Affiliation: Jun. 15, 2026 I understand that quarterly reporting is a burden on companies. However I do not believe it is an undue burden. Investors deserve to know how companies are doing and with the integrated financial systems most companies have today, the numbers should be readily available. Please do not change the current reporting requirements.

Sent from my iPhone

Daniel Wurst — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Daniel Wurst Affiliation: Jun. 15, 2026 To the Securities

and Exchange Commission:
I strongly urge you not to weaken quarterly reporting requirements for public companies.
For individual investors like me, regular quarterly reports are one of the few reliable ways to evaluate the companies we invest in on a reasonably timely basis. Large institutions may have more access to management, analysts, alternative data, and sophisticated research tools. Small investors generally do not. Reducing required reporting from quarterly to semiannual would widen that information gap and make it harder for ordinary investors to make informed decisions about their retirement savings.
I understand the argument that quarterly reporting can create short-term pressure on management. However, the solution should not be to reduce transparency for investors. If companies are concerned about short-termism, the SEC could address earnings guidance practices or encourage better long-term disclosures without taking away timely financial information from the market.
Less frequent reporting would also harm the market as a whole. Public markets depend on confidence, comparability, and timely disclosure. If investors receive less information, uncertainty increases. That can lead to wider bid-ask spreads, higher volatility around reporting dates, greater risk of selective information advantages, and potentially a higher cost of capital for companies. In my view, that would make the market less fair and less attractive, especially for ordinary retirement investors.
Quarterly reporting is not perfect, but it is a core protection for investors and a foundation of market transparency. I respectfully ask the Commission to preserve mandatory quarterly reporting for public companies.
Sincerely,
Daniel Wurst

Daniel Yerger — Jun 15, 2026
Subject: S7-2026-15 Comment From: Daniel Yerger Affiliation: Jun. 15, 2026 I am writing AGAINST lengthening the financial reporting schedule from 3 to 6 months. As a retail investor and owner of a retirement plan, I need MORE information concerning companies I'm invested in, not LESS!

Darrell Rose — Jun 15, 2026
Subject: S7-2026-15 Comment From: Darrell Rose Affiliation: Jun. 15, 2026 With the advances in technology there's no reason why reporting shouldn't be done monthly. The same technology being used to" increase productivity" (ie layoff workers) and yall want to decrease transparency? That not only has no basis in reality the 6 month position is incongruent and regressive with technological advances. The government should increase not decrease reporting frequency.

To do a 6 month reporting requirement is to willingly invite another Enron, 2008 crash and all sorts of crap….it would take the public longer to figure out schemes like mark to market accounting.

The SEC would be failing its fiduciary responsibility to the public to go through with this.

Darren C. Allen — Jun 15, 2026
Subject: S7-2026-15 Comment From: Darren C. Allen Affiliation: Jun. 15, 2026 Keep companies reporting quarterly! It is essential for investors to make sound financial decisions. This allows greater transparency and accountability. I oppose any attempt to undermine this process leading to less confidence and more opportunities for fraud and deceit.

Dave Kerkove — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Dave Kerkove Affiliation: Jun. 15, 2026 My name is Linda Kerkove. As with most working people in the US, we are held accountable for all of our income reporting. If businesses are going to go without quarterly reporting, information is going to get 'lost', if you get the drift. This is no different than "Big Money" not having to pay taxes due to 'expenses and deductions' . We need fairness and accountability to all. Thank you for considering this.

Dave Morris — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Dave Morris Affiliation: Jun. 15, 2026 Dear SEC:

I am strongly opposed to going backward to the days of public companies reporting only twice a year instead of the current quarterly reporting.

Doing so would cause irreparable harm to ordinary investors, causing them to lose between 1/3 and 1/2 for their life savings.

This is just another ploy to hide the truth from the public in order to make the 1% (meaning: billionaires - and now a trillionaire) richer and the remaining 99% even less able to make ends meet.

Please do not succumb to Washington's pressure to change what already works! Vote NO on this change!

Respectfully,
Dave Morris

Dave Ritchie — Jun 15, 2026
Subject: S7-2026-15 Comment From: Dave Ritchie Affiliation: Jun. 15, 2026 My name is David Ritchie, a retired investor. By extending the reporting period, it will reduce visibility of corporate misallocation while increasing the likelihood of false reporting extending over multiple reporting cycles. This will likely prove injurious to small investors.

Regards,
David Ritchie

Dave Savukinas — Jun 15, 2026
Subject: Quarterly Reporting Rule From: Dave Savukinas Affiliation: Jun. 15, 2026 David Savukinas (retired). Moving to semiannual reporting reduces transparency into company health and activities, and increases risk to ordinary investors.

David Jobusch — Jun 15, 2026
Subject: S7-2026-15 Comment From: David Jobusch Affiliation: Jun. 15, 2026 I am a retired investor who depends on income from the stock market to support my living expenses, and I strongly object

to the proposal to reduce the frequency of corporate earnings reporting to twice annually. Regular quarterly reporting provides a critical level of transparency that allows individual investors like myself to make informed decisions in a timely manner. Reducing disclosures would significantly increase uncertainty, delay access to essential financial information, and place everyday investors at a disadvantage compared to institutional participants who may have alternative channels for insight.

Given the complexity of today's markets and my existing concerns about transparency and trust, less frequent reporting would only deepen skepticism and increase perceived risk. Timely, consistent disclosures are a cornerstone of market integrity and investor confidence, especially for retirees who cannot easily recover from financial missteps. I urge the Commission to prioritize transparency and maintain the current quarterly reporting structure to ensure fair access to information for all investors.

David Stone — Jun 15, 2026
Subject: S7-2026-15 Comment From: David Stone Affiliation: Jun. 15, 2026 Sirs and Madams, Transparency is the lubricant of the market. Modern technology simplifies transparency for publicly traded companies, assuring stockholders that leadership and governance are properly ad legally meeting their responsibilities.

The market is driven by the investment of hard-earned dollars; those investors deserve to promptly see the corporate actions that are disclosed in periodic filings. Reducing the frequency of those filings will reduce the transparency and trust needed for a prosperous stock market.

I urge the SEC to maintain current reporting requirements.

Deborah Conaway — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Deborah Conaway Affiliation: Jun. 15, 2026 Deborah Conaway, Kenna, WV, retired.

This change would seriously affect the money I have saved for my retirement. What advantage would reporting semi-annually provide to the vast majority of stockholders? Or indeed to the United States? It appears to me that the only benefit would be to the extremely wealthy, as so many of the changes this administration has made. Why does this body think that stockholders do not deserve transparency into the state of their finances? Do the facts from the previous implementation of this same reporting change mean nothing?

Deborah DeMasse — Jun 15, 2026
Subject: S7-2026-15 From: Deborah DeMasse Affiliation: Jun. 15, 2026 Deborah DeMasse, retired, Chandler, OK

make it public that corporations will now get their deceitful organized financial crimes a window to commit more crimes against the public trust and their investors! The response is simple, NO

Yahoo Mail: Search, Organize, Conquer

Deborah Gulotta — Jun 15, 2026
Subject: S7-2026-15 Comment From: Deborah Gulotta Affiliation: Jun. 15, 2026 Deborah Gulotta, Pennsylvania, retired. Every three months has been a business standard for years. Quarterly reporting give businesses the chance to make adjustments in a timely manner. It shows the public how their investments are doing and gives people the opportunity to update their portfolios, as needed. Quarterly disclose should not be changed; too much of an opportunity for unscrupulous businesses leaders to hide their methods, knowing they have 6 months before anyone will notice. In this era of embezzlement, fraud, and entitlement, we need every safeguard we have to root out the incompetent business so-called leadership.

Deborah Howard — Jun 15, 2026
Subject: S7-2026-15 Comment From: Deborah Howard Affiliation: Jun. 15, 2026 My first question is why they think it's necessary to change what has been working other than to commit fraud. If you are doing the right things you shouldn't have a problem with the current reporting system.
It matters because you are a public company and it's our rights and responsibilities as citizens to try to keep everything and everyone on as level a playing field as possible.
There has been so much corruption reported on so many levels why is the SEC trying to provide another avenue for this to occur?

Deborah Howard

Debra Wood — Jun 15, 2026
Subject: S7-2026-15 Comment From: Debra Wood Affiliation: Jun. 15, 2026 Dear Commissioners,
I write to oppose the proposal to allow public companies to shift from quarterly to semi-annual financial reporting.
Quarterly reporting is a foundational element of market transparency. Extending the reporting interval to six months would leave investors operating on stale information, increasing uncertainty and encouraging speculation rather than informed decision-making.

This change would also widen the gap between large institutional investors and everyday investors. Sophisticated market participants have access to ongoing insights through private channels and advanced analysis, while retail investors depend on regular public disclosures. Reducing the frequency of those disclosures makes markets less fair and less accessible.
Less frequent reporting would delay the visibility of emerging risks and financial problems. Timely disclosures help identify issues early; longer gaps allow them to grow unchecked, potentially leading to sharper corrections and greater harm when information finally becomes public.

Finally, U.S. markets are trusted globally because of their strong disclosure standards. Weakening those standards risks undermining investor confidence and increasing the cost of capital for companies.

There is already enough insider-trading happening in this country, those of us now retired and relying on our investments to live need to be protected, which is one of the jobs of the SEC. Longer gaps between reports would create more opportunity for problems to grow unnoticed. Regular disclosures help surface risks and irregularities sooner, while extended silence increases the chance that serious issues—or even fraud—could persist undetected until it is too late for investors to react fairly.

For these reasons, I urge the Commission to reject this proposal and maintain quarterly reporting as a core requirement.

Respectfully submitted,
Debra Wood

Subject: My view on Rule S7-2026-15 From: Derek Raad Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I am writing to express my strong opposition to SEC Proposed Rule S7-2026-15. As a retail investor, quarterly reports (10-Q) are the primary tool I use to evaluate the ongoing financial health of a company. If reporting is cut back to every six months, it becomes incredibly difficult to spot a failing business model, sudden shifts in debt, or declining revenue before major losses occur. This rule change actively harms transparency, strips everyday investors of critical data, and gives an unfair advantage to institutional insiders who have other methods of tracking company health. Please protect the public and maintain the quarterly reporting requirement.

Subject: Comment on S7-2026-15 From: Diana Crutchfield Affiliation: Jun. 15, 2026 Keep it like it is! No one trusts the US Government anyway. This is just another way to cheat the working and producing American(not the illegals and parasites who contribute nothing.) Hell no! Some of us EARNED our retirement, paid into SS without a choice, fed generations of lazy non contributing mouths so they could breed like flies! Your job should be rewarding the producers in this country who have been outnumbered by the non producers. Start a revolution in this country and DO THE RIGHT THING.

Diana Franklin The Motley Fool Community — Jun 15, 2026
Subject: File No. S7-2026-15 From: Diana Franklin Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. That gap is where volatility, uncertainty, and mistrust grow. The short-term diagnosis doesn't justify this remedy. Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. The companies most likely to opt out are the ones where oversight matters most. Smaller, less-covered businesses operate with less scrutiny. Reducing their reporting requirements makes them harder to monitor, not easier to own. This is the wrong direction. Reg FD moved toward a more level playing field. This proposal moves away from it. The companies we trade are not being held back from greatness by the obligation to file four reports a year. The entire S&P 500 files a 10-Q every quarter, and the S&P 500 is at an all-time high.

Dianne — Jun 15, 2026
Subject: S7-2026-15 Comment From: Dianne Affiliation: Jun. 15, 2026 Dianne C Jones, Retired Sr IT Administrator. Auditing is critical to integrity of a business in both the areas of financial and IT. Less reporting increases risk of errors and oversight. Many financial issues are caused by technical issues, not just human errors or intentional change. Quarterly reporting is necessary to maintain integrity and confidence in a Business. There is no benefit at all to reduce the frequency.

Dianne Jones

Dianne Agster — Jun 15, 2026

DJ Benion — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: DJ Benion Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I urge the SEC to reject any proposal that would allow public companies to withhold or obscure material information from investors and the public. Transparency is the foundation of fair and efficient markets. Investors deserve timely, accurate, and complete disclosures so they can make informed decisions and hold corporate leadership accountable.

Reducing disclosure requirements would weaken investor protections, increase market uncertainty, and erode public trust in our financial system. The SEC's mission includes protecting investors and maintaining fair, orderly, and efficient markets. Allowing companies to hide vital information runs counter to that mission.

Please preserve strong disclosure standards and ensure that public companies remain accountable through meaningful transparency and reporting requirements.

Djana Martin — Jun 15, 2026
Subject: S7-2026-15 Comment From: Djana Martin Affiliation: Jun. 15, 2026 Quarterly reporting is the standard for a reason. Extending reporting times would remove the oversight required to maintain integrity. Keep the quarterly reports!

Donna Russo — Jun 15, 2026
Subject: S7-2026-15 From: Donna Russo Affiliation: Jun. 15, 2026 Please do not adopt a semi-

annual reporting rule in favor of the current quarterly reporting rule. The SEC was created to prevent investor fraud, not to enable fraud.

You MAGA/Heritage hypocrites doubled applications for Medicaid renewal from annually to every 6 months to prevent alleged “fraud” by the poor and disabled, but now want to halve the SEC publicly-traded corporation reporting requirements from every quarter to every 6 months, doubling the risk of real, not fake, fraud. The SEC is supposed to protect investors — most of whom are worker pension funds — not corporate executives.

You are punishing the poor and those less able to push paperwork and rewarding the rich and savvy, at large risk to small and institutional investors who depend on SEC oversight for their savings. You have your priorities backwards. Scrooge would be proud — but even he reformed.

Re: Support for Maintaining Quarterly Reporting Requirements for Public Companies

Dear Commissioners:
I am writing as a retired individual investor to express strong support for the continuation of quarterly financial reporting requirements for publicly traded companies. As a resident of Lafayette, Indiana, with a Ph.D. in Biochemistry and a professional background that includes significant experience in medical device development at Abbott Laboratories and project management consulting, I have managed a substantial personal investment portfolio since my retirement. Quarterly reporting has proven essential to my ability to make informed investment decisions.

Quarterly disclosures provide timely, standardized financial information that enhances market transparency and investor confidence. In an environment characterized by rapid economic changes, technological disruption, and geopolitical uncertainties, semi-annual reporting would materially impair investors' capacity to assess company performance, liquidity, and risk exposure in a timely manner. Frequent reporting enables early identification of operational challenges, management execution, and emerging trends—factors critical to capital allocation decisions by both institutional and individual investors.

From the perspective of a retail investor who is heavily invested in the equities market, reduced reporting frequency would disproportionately disadvantage those without access to alternative information channels. Quarterly filings have historically contributed to market efficiency, deterred potential misconduct, and supported the fair and orderly operation of U.S. capital markets. Weakening these requirements risks diminishing the competitive advantage of American public markets and eroding the protections that have long benefited investors like myself.

I respectfully urge the Commission to maintain robust quarterly reporting obligations. Such requirements align with the SEC's mission to protect investors, facilitate capital formation, and promote market integrity. I appreciate the opportunity to provide this perspective and stand ready to offer additional input if helpful.

Sincerely,
Douglas R. Brandt, Ph.D.
Lafayette, Indiana

Doug Gangi — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Doug Gangi Affiliation: Jun. 15, 2026 Dear SEC -

My name is Doug Gangi and I live in Phoenix AZ. For 30 years I was a small business owner in the software industry and recently sold my business to retire and spend time with my wife. I understand you are considering a change to corporate reporting to bi-annually instead of the current requirement of quarterly. This gravely concerns me. We need more accountability and transparency in American financial institutions - including the stock market - not less. Now that I'm retired, I will be relying heavily on investments, primarily in stocks and bonds, to live on. Any changes to the system that may impact my investments in both the short and long term also directly impact my ability to survive without government assistance. I urge you not to make the change to corporate reporting.

Dustin Russell — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Dustin Russell Affiliation: Jun. 15, 2026 My name is Dustin Russell. I work for Ashley Furniture for almost 11yrs now. In today's economy its almost impossible to afford anything on a single paycheck. I only make nearly 45k a year I rely on the stock market to cover costs of living and allows me to build up finances. Taking us back to semi-annual reporting reduces my chances of having enough money in my life and making safe bets.

Dvorah Simon — Jun 15, 2026
Subject: S7-2026-15 Comment From: Dvorah Simon Affiliation: Jun. 15, 2026 I am writing as a retired psychologist with a 40+ year career including 20 years at VA treating Veterans. I'm very proud of the mission of my work. I was also happy to work at an organization with excellent retirement savings options. Quarterly reports are vital to maintaining accountability. What possible benefit is there to be becoming more opaque? I can only see disadvantages in that retirees who have spent decades accruing savings for retirement would now have less information and less basis to make choices about their investments. Keeping it quarterly is only fair. After all, what is there to hide?

Sincerely,

Deborah Simon, PhD

Dylan Donovan — Jun 15, 2026
Subject: S7-2026-15 Comment From: Dylan Donovan Affiliation: Jun. 15, 2026 Enron would have been 10 times worse if they had only needed to report semiannually. The ONLY reason to change this rule is to make it easier for corporations to hide losses/underperformance/fraud from shareholders. The fact that this is even being seriously considered, is mind boggling.

Sent from my iPhone

E D Ryder — Jun 15, 2026
Subject: File No. S7-2026-15 From: E D Ryder Re: File No. S7-2026-15 I am an elderly investor, and the mutual funds I own represent an important part of my financial security in these retirement years. As someone who relies on these investments for my financial well-being, I want the fund managers and market participants making investment decisions to have access to the most current information possible. I am concerned that reducing reporting frequency to semi-annual reporting could make important information less timely and less transparent. Investors like me benefit when fund holdings and other relevant information are disclosed regularly, allowing for better oversight and more informed decision-making. Please consider the interests of individual investors, retirees, and seniors who depend on their investments. I respectfully urge the Commission to reject the move to semi-annual reporting and maintain more frequent reporting requirements. Thank you for considering my comments.

E T — Jun 15, 2026
Subject: Comment on S7-2026-15 From: E T Affiliation: Jun. 15, 2026 We need quarterly reporting. The fact that you would suggest otherwise makes me question the integrity of the SEC and whose pocket they are in.

Get a backbone. I already get less in terms of reporting than I did 10 years ago. Why bother to send reports that don't even show returns? Only fees and what is mostly gibberish to many investors. What a waste of paper.

I used to feel like the SEC was the enforcer and would protect me. I don't feel that way anymore, unfortunately.

Add to this the average investor has no where except the stock market to invest retirement funds. No pension available, no political career to produce ill gotten gains gains.

The SEC must do better to protect investors including continuing to require quarterly reporting.

Ed Arner — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Ed Arner Affiliation: Jun. 15, 2026 Health of a company can be compared to the health of an individual. If you are serious about staying healthy as you get older, you maintain healthy habits of checking your weight, blood pressure, eyes, skin, teeth, etc as well as having regular health checks by your physician and specialists as appropriate.

Similarly, quarterly reporting has been proven statistically to be a healthy practice for companies and the market in general. The adage "Bad news does not improve with age." remains true and applies well to the health of a person as well as a company, corporation, and industry or securities market at large.

Sincerely,

Edward Arner

Eddie Sowden — Jun 15, 2026
Subject: S7-2026-15 Comment From: Eddie Sowden Affiliation: Jun. 15, 2026 Edmund Sowden, Small Business Owner and Retirement Investor
I'm a retail investor and I rely on quarterly reports to make decisions about my retirement savings. Why would anyone want to impede the ability of retirees maintaining their standard of living? The more we have to spend, the better for the economy.
(1) I rely on quarterly information to make informed financial decisions.

(2) Longer gaps create an unfair advantage for corporate insiders, allowing more time for internal fraud to occur and making it harder to discover.
(3) Optional is as bad as Self-Policing. At no time has it ever been beneficial to the public. Remember, the better we do, the better the country does. Minimal corporate savings benefits no one but the corporate entity. Cutting my retirement by 30% means my reliance on government entitlements increases. Such a reliance does not benefit our nation. Besides, Optional doesn't fix the problem because companies that opt in are often the ones whose investors most need more frequent updates.
(4) See above. The savings to corporations aren't worth the cost to the investor, the economy, or our government.
You keep citing the "global standard," but that standard isn't doing well in the places it has been tried. The EU's lighter regime is where Wirecard's €1.9 billion fraud hid in plain sight for years before the company collapsed in 2020. The UK's 2014 shift stripped analyst coverage from mid-cap stocks, and London has been bleeding IPOs ever since. Singapore moved to semiannual reporting in 2020 and is now reconsidering, because trading volumes fell and disclosure quality dropped. The "global standard" you are invoking isn't standard, isn't working, and is being walked back where it was tried. Think of the investor. We are your parents, siblings, children, and friends. Protect our investments, our savings, our retirement, and our futures.

Elizabeth Lewis — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Elizabeth Lewis Affiliation: Jun. 15, 2026 Good Morning,

On proposed rule S7-3026-15. Reporting must be more transparent not less. Corporations cannot and should not be able to hide their books for half of the year. We'll have more Enron's and other major issues as these companies cannot be trusted to tell the truth to the public on their own.

Do not take us back to the 1950s. Instead put in rules for greater transparency and bring accountability to these companies that take so much from everyone. Being a public company means your books are open to the public. If you want your books closed, then delist your company and go private.

Stand up for the people of America by supporting us not corporations.

Elizabeth Lewis

Elizabeth Lundey — Jun 15, 2026
Subject: S7-2026-15 Comment From: Elizabeth Lundey Affiliation: Jun. 15, 2026 My name is Elizabeth Lundey and I am a teacher. Maintaining quarterly reporting helps keep investors informed. Reporting fewer times a year would allow mistakes not to be revealed in a timely manner. This concerns me. The public. The investors need to know exactly what is happening with their money. Thank you.

Hidden information makes it impossible to make an informed decision.

Elizabeth Ricketson — Jun 15, 2026
Subject: S7-2026-15 Comment From: Elizabeth Ricketson Affiliation: Jun. 15, 2026 The requirement for companies to submit quarterly reports has never been considered burdensome. Allowing companies to switch to reporting twice a year or annually would result in investors being uninformed

and unable to adjust their investments in a timely manner to avoid significant losses. If some companies are providing quarterly reports, then all companies should be required to do the same. It is unnecessary to change the rule and should not happen. Is the SEC's job to protect public.

Elizabeth Robinson — Jun 15, 2026
Subject: S7-2026-15 From: Elizabeth Robinson Affiliation: Jun. 15, 2026 Elizabeth Robinson, private investor. 100% of my retirement savings is tied up in investments. Quarterly reporting increases accountability, I am at a complete loss as to why shareholders and other stakeholders would go along with reduced reporting. Quarterly reports signal issues and allow investors to make informed decisions. Whether the investor is a fund manager or an individual trying to manage their IRA.

These companies have managed to complete quarterly investment reports since Enron, it's not an unreasonable request when people own shares of a company to keep those share holders informed.

Elizabeth Sadewasser — Jun 15, 2026
Subject: S7-2026-15 Comment From: Elizabeth Sadewasser Affiliation: Jun. 15, 2026 Transparency keeps accountability in the equation and allows for quicker response and course correction when issues present. It protects the consumer against corporate self-dealing and deceptive practices.

Elizabeth Schulz — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Elizabeth Schulz Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Every day it feels like the chances regular people have at achieving financial freedom and stability are being taken away from them by the wealthy and corporations. Investing is something that anyone should have access to, on a level playing field. We now have the world's first trillionaire, yet most of us will never make ends meet, much less get to retire. Any laws relating to the stock market and investors should be made with fairness and transparency for everyone, not just the rich or corporate interests.

Emily Eldridge — Jun 15, 2026
Subject: S7-2026-15 Comment From: Emily Eldridge Affiliation: Jun. 15, 2026 My name is Emily Eldridge and I am a small business owner of an SCORP. Full transparency is always a good thing when so many people rely on their investments for their retirement and large purchases. You should feel obligated to do what's in the best interest of the public.

Emily Howe — Jun 15, 2026

Subject: My view on Rule S7-2026-15 From: Emily Howe Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Hello,
thank you for taking your time to read this opposition to the proposed Rule S7-2026-15.
As a general concern, this takes away the very essence of the trading transparency necessary to allow independent holders or individuals trading in the markets to be at a clear disadvantage, in comparison to their "insider" counterparts. The idea of the stock exchange being a free and fair market needs to be protected and upheld to the highest degree. To continue to allow the average person to be as informed as possible within reason as to not hurt a company's plans before they're executed. Rule s7-2026-15 would directly impact the ability for average people participating in the market to make informed financial decisions in their portfolios.

Emily Parker — Jun 15, 2026
Subject: S7-2026-15 Comment From: Emily Parker Affiliation: Jun. 15, 2026 I need to know how my investments are performing. I need the quarterly report to understand what my next moves will be since it is my money.

---

Eric Myra — Jun 15, 2026
Subject: File No. S7-2026-15 From: Eric Myra As an investor in publicly traded U.S. corporations, and a member of a number of informal small-investor organizations, I writing to comment on the proposed rule change that would reduce the frequency of corporate reporting of financial information and business results. When investors own a portion of a business, they deserve regular, transparent communication from that business. Reducing reporting requirements weakens the connection between companies and their owners. It has been argued that fewer reports would reduce costs. Perhaps that is true. However, in an age of AI and increasingly efficient disclosure tools, even that point is debatable. It has also been argued that it would ease the pressure to manage quarter to quarter. But short-termism comes from how people react to information, not from the information itself. Taking the reports away doesn't make anyone more patient. It just makes everyone less informed and less patient. What isn’t debatable is that less information rarely creates better-informed owners. And more poorly informed investors will often ultimately lead to less business success, since investors are less likely to put their money into companies that haven't supplied timely enough information to motivate further investment. Investors are far more likely to seek other more transparent markets in other countries in which to make their investments. Less transparency doesn’t eliminate uncertainty. It increases it. And when information finally does arrive, the surprises are likely to be bigger, the market reactions sharper, and the volatility greater; this approach does not lead to orderly markets, which are perhaps the most crucial key to attracting money and investors, both from the U.S. and from abroad. In summary, I ask that the SEC reconsider this proposed rule change and keep U.S. markets as the destination that U.S. investors and the world's investors trust to hold their assets.

Eric Salcedo — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Eric Salcedo Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Dear elected officials, please protect the people's best interest and maintain transparency by keeping quarterly reports. This matters to you constituents and their future.

Eric Weber — Jun 15, 2026
Subject: S7-2026-15 From: Eric Weber Affiliation: Jun. 15, 2026 As an investor, it’s critical to get quarterly reporting to ensure transparency. You should be doing more to increase transparency not diminish it.

This is especially important with the amount of consolidation across many industries where government has not done its job to keep a competitive landscape in many industries.

Eric Weber
Vice President of Technology
Fairfax Virginia

Eric Willis — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Eric Willis Affiliation: Jun. 15, 2026 My name is Eric Willis, and I live in Harrisburg, Pennsylvania. As a Construction Manager, I rely on accurate and timely financial information to make informed decisions regarding investments, retirement planning, and overall financial management. For this reason, I strongly support the Securities and Exchange Commission (SEC) maintaining quarterly reporting requirements for publicly traded companies. Quarterly reporting provides investors like me with regular updates on a company's financial health and performance, allowing for better-informed investment decisions.

Quarterly reporting significantly increases transparency in the financial markets. By requiring companies to disclose their financial results every three months, investors receive timely information about revenue, earnings, risks, and business developments. This regular flow of information helps prevent surprises and ensures that all investors have access to current data when evaluating investment opportunities. Greater transparency promotes confidence in the markets and helps maintain a level playing field for all participants.

Maintaining quarterly reporting also strengthens corporate accountability. Frequent reporting encourages company management to remain focused on financial performance and operational execution throughout the year rather than only at annual reporting periods. Investors can more easily identify trends, assess management effectiveness, and determine whether a company is meeting its stated goals. This ongoing accountability benefits shareholders and contributes to healthier and more efficient capital markets.

Finally, quarterly reporting allows individual investors, including professionals like myself, to respond more quickly to changing economic and business conditions. In today's rapidly evolving economy, waiting six months or a full year for updated financial information would reduce the ability of investors to make sound decisions. Quarterly disclosures provide a balance between transparency and reporting burden while ensuring that investors have access to the information necessary to evaluate risks and opportunities. For these reasons, I believe the SEC should continue to require quarterly reporting.

Erich Friesen — Jun 15, 2026
Subject: S7-2026-15 Comment From: Erich Friesen Affiliation: Jun. 15, 2026 This will great reduce information flows, and enable fraud and insider trading. This will harm investors, and reduce market transparency. Accountability is being reduced, and that always reduces market efficiency. Smart investors will move to other exchanges in EU or Asia that still have rigorous reporting requirements and therefore are more transparent.

Regards,

Erich Friesen, A.I.A.

Erik Goodwin — Jun 15, 2026
Subject: S7-2026-15 Comment From: Erik Goodwin Affiliation: Jun. 15, 2026 These are the type of

changes, that allow shenanigans to go on, creating financial crisis. Cutting reporting in half, is bad for investors, as well as the public at large and must not be allowed to happen.

Erik,US-St. Louis Peterson — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Erik,US-St. Louis Peterson Affiliation: Jun. 15, 2026 Erik Peterson, St. Louis MO Supply Chain Director. Do not revert to Dark Ages financial reporting!!! While much disparaged, quarterly financial reports are essential to ensure transparency in the financial markets. Changing the financial reporting cycle will put my assets and the assets of millions of other investors at risk and subject to an immediate revaluation due to a drastic change like this, while those with large fortunes will be able to weather the storm. Objective of this seems to be further widening the wealth gap in the US.

Sent from my iPhone

Erin M — Jun 15, 2026
Subject: Proposed SEC reporting regulation change From: Erin M Affiliation: Jun. 15, 2026 As an individual investor, I strongly oppose any reduction in the frequency of public company reporting from quarterly to semiannual disclosures. Timely and transparent financial reporting is essential to maintaining investor confidence, supporting informed investment decisions, and ensuring fair and efficient markets.

Quarterly reporting provides investors with regular insight into a company's performance, risks, and strategic direction. Reducing disclosures to only twice per year would increase information gaps, decrease transparency, and potentially disadvantage individual investors who rely on public reporting to evaluate their investments. While reporting requirements may create administrative burdens for companies, those burdens are outweighed by the benefits of accountability, transparency, and investor protection that quarterly reporting provides. For these reasons, I urge the SEC to maintain existing quarterly reporting requirements.

Erin Walsh — Jun 15, 2026
Subject: S7-2026-15 Comment From: Erin Walsh Affiliation: Jun. 15, 2026 I am Erin Walsh and I am a stay at home mom who is married to a regional manager. This is very important to me. Not reporting quarterly would exacerbate volatility in prices and the market would be less reliable. If people and companies can't trust stocks, it would destroy our country over time. Businesses could hide financials from their employees in times of trouble which would lead to employees not knowing if their job is in danger. Quarterly reports show how the market is as a whole and can show if there if a problem. This can't stand.

Evan McCormick — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Evan McCormick Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I believe that the purpose of a stock market is to provide access to free and transparent investment to all individuals participating. The importance of a well-regulated and transparent marketplace is paramount to a healthy functioning capitalist economy which helps everyone. Opacity and obfuscation are the enemies of everyone involved in the free market. This proposal would give publicly traded corporations space to obfuscate, confuse, and downright lie about their financial positions to the average investor. It also gives insiders more room to outmaneuver retail investors and people who are "playing by the rules". A "free and fair" market can only be those things for all participants if it abides by strictly enforced rules. We cannot relax rules in an environment where cheating and potentially harming the general public can often allow an individual to make a massive profit for themselves. Quarterly disclosures are a minimum standard for transparency and equality for all market participants and they should definitely be upheld.

Thank you for listening,
Evan McCormick

Evelyn Sellers — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Evelyn Sellers Affiliation: Jun. 15, 2026 Evelyn Sellers_ Retired Aerospace Manager_Los Angeles,CA. I worked in Finance for almost 40 years so I understand the need and urgency of early detection and resolution. Changing from quarterly to semi-annual earnings reporting is a dangerous and unfair process that puts all the RISKS on the investor and takes away the ability for the normal investor to make informed decisions regarding their investment (money). If delayed reporting is such a good idea why don't businesses go to internally reporting financials quarterly instead of weekly and monthly. Why, because time is money and early detection saves businesses, portfolios and saves lives. Big investment firms may be able to overcome the change by putting more people on staff but the average investor can't do that. The average investor will be flying blind for 6 months. Convenience should not cause HARM.

Gayle de Haas — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Gayle de Haas Affiliation: Jun. 15, 2026 Gayle de Haas, retired, Texas. Investors need more, not less, transparency. Eliminating quarterly reporting is less transparency and will cause more volatility in the markets. More volatility creates more risk, and will depress market prices and value. This will affect the derivative and bond markets, driving prices down and interest rates up. Individuals and businesses will face higher rates on loans. Businesses might not invest in good projects if the interest rates are too high, which will slow the economy. Revenues would fall, leading to less tax revenues to fund the government. Capital investment money could flow to other countries, which could increase the unemployment rate here. Our economy would be adversely affected. Less information is detrimental.

George Doxas — Jun 15, 2026
Subject: File No. S7-2026-15 From: George Doxas 1) Quarterly reporting protects individual investors. Semiannual reporting doubles the information gap between insiders and ordinary shareholders. 2) Research from the CFA Institute, which studied this exact maneuver in the U.K. market, shows that reporting frequency has no measurable effect on corporate investment behavior. The SEC is accepting a real cost – less transparency for individual investors – for a benefit that the evidence says simply won't materialize. 3) The companies most likely to opt out are the ones where oversight matters most. 4) Reg FD moved toward a more level playing field. This proposal moves away from it. 5) The companies we trade are not being held back from greatness by the obligation to file four reports a year

Giancarlo Delfini — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Giancarlo Delfini Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Why would you ever want less information disclosed from companies that does not make any sense to me. Transparency is a core concept in a capitalist society. Withholding information from investors only creates more opportunity for corruption and deceit. Please do not create a system that allows companies to not disclose information.

Gillian Randall — Jun 15, 2026
Subject: S7-2026-15 Comment From: Gillian Randall Affiliation: Jun. 15, 2026 Ridiculous. They only need it if they have something to hide. Enough, already!

Glenn LeHenaff — Jun 15, 2026
Subject: File No. S7-2026-15 From: Glenn LeHenaff Do not enact this rule. The loosening of reporting requirements for publicly traded companies will, in the long term, adversely affect the public's ability to effectively manage their investment portfolios. Doing so is counter to the SEC's mission statement, specifically the following passage, " The federal securities laws we oversee are based on a simple and straightforward concept: everyone should be treated fairly and have access to certain facts about investments and those who sell them." Additionally, it seems a retrograde step in this age of almost instant access to information that there is any real burden on a company's ability to issue financial reports perhaps on an even more frequent basis. The complete mission statement from the SEC website, " Mission At the Securities and Exchange Commission (SEC), we work together to make a positive impact on the U.S. economy, our capital markets, and people's lives. Since our founding in 1934 at the height of the Great Depression, we have stayed true to our mission of protecting investors, maintaining fair, orderly, and efficient markets, and facilitating capital formation. Our mission requires tireless commitment and unique expertise from our staff of dedicated public servants who care deeply about protecting the investing public and others who rely on our markets to secure their financial futures. Protecting Investors The federal securities laws we oversee are based on a simple and straightforward concept: everyone should be treated fairly and

have access to certain facts about investments and those who sell them. Companies offering securities for sale to the public must tell the truth about their business, the securities they are selling, and the investment risks. And those who sell and trade securities and offer advice to investors – such as brokers-dealers, investment advisers, and exchanges – must treat investors fairly and honestly. We protect investors by vigorously enforcing the federal securities laws to ensure truth and fairness. We deter misconduct, hold wrongdoers accountable, and provide resources to help investors evaluate their investment choices and protect themselves against fraud. Maintaining Fair, Orderly, and Efficient Markets Our U.S. capital markets are the deepest, most dynamic, and most liquid in the world. They also have evolved to become increasingly fast and extraordinarily complex. As we oversee more than $100 trillion in securities trading on U.S. equity markets annually, it is our job to be responsive and innovative in the face of significant market developments and trends. As technological advancements have changed how our securities markets operate, our ability to remain an effective regulator requires us to continuously monitor the market environment and, as appropriate, adjust and modernize our rules, regulations, and oversight tools and activities. Facilitating Capital Formation Our regulatory governance provides companies and entrepreneurs with a variety of avenues to access the U.S. economy's capital markets to help them create jobs, develop life-changing innovations and technology, and provide financial opportunities for those who invest in them. Access to capital is particularly critical for small businesses, which create approximately two-thirds of all new jobs in the U.S. economy. Learn more about what we do to facilitate ways for small businesses to raise capital and succeed. Achieving Our Mission We are steadfast in our dedication to our longstanding three-part mission as we keep pace with our ever-evolving markets and inspire the full confidence of the investing public and market participants alike. As we continue to monitor the activities of more than 28,000 entities in the securities industry, we remain dedicated to the interests of long-term investors who are entrusting their hard-earned savings to our securities markets to fund home purchases, college educations, and other important life events. Gloria Nelson — Jun 15, 2026
Subject: S7-2026-15 Comment From: Gloria Nelson Affiliation: Jun. 15, 2026 Laws/rules regarding finances have been passed for the protection of the user and/or investors. This quarterly reporting rule may not catch all the unscrupulous corporate managers, but it encourages me to maintain my investments. My financial planner and I rely on the regular corporate financial data to manage my investments. In planning my retirement future, I also need trust in the process so that investors like myself are not taken advantage of. This rule is in place to also protect the security of the national economy, similar to the FDIC regulations, the laws preventing monopolies and laws making insider trading illegal.
Therefore, I am AGAINST REDUCING THE QUARTERLY REPORTING SCHEDULE.
Sincerely,
Gloria Nelson,
East Moline, IL 61244

grant hall — Jun 15, 2026
Subject: S7-2026-15 Comment From: grant hall Affiliation: Jun. 15, 2026 I am writing to oppose any change that lengthens public reporting, any regulation that reduces the amount of reporting on the financial positions of any public company.
As a retired CPA, as an investor with investments in public companies, as a citizen concerned with the stability of the investment markets lengthening public reporting to six months is unacceptable. Quarterly financial reporting is a basis for protecting the public and dampening the opportunity for trading on inside information.
With over 50 years of experience as a CPA auditing public companies, a CFO preparing financial statements, as an investor regular, public information is essential for confidence in financial markets. This proposal fails in all counts.
Grant Hall

Greg Basgall

Greg Beddow — Jun 15, 2026
Subject: File No. S7-2026-15 From: Greg Beddow I'm writing in opposition to this proposed SEC rule change. Research when this was tried in the UK has shown that reduced reporting frequency has no effect on corporate "short-termism" behavior. In addition, every company in the S&P 500 files a 10-Q report every quarter, and the S&P 500 is at an all-time high, so it's hard to argue the current requirements are hindering American capitalism. Reduced reporting requirements increase volatility, uncertainty, and mistrust, and make it harder, not easier, for individual investors to make rational investment decisions.

I respectfully request that quarterly reports remain for those companies that are a part of the various U.S. Stock Exchanges.

-- G. Ride

Griffin Palmer — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Griffin Palmer Affiliation: Jun. 15, 2026 To whom it may concern:

I support quarterly reporting. It increases transparency and accountability.

History has shown that quarterly reporting increases valuations, while semiannual reporting dramatically reduces valuations.

I am a retiree with a quite modest retirement nest egg. A 30+ percent devaluation of my portfolio, which, history has shown, is quite possible under a semiannual regime, would be absolutely devastating.

Please leave well enough alone. Reject the proposal to mandate semiannual reporting.

Gus diZerega — Jun 15, 2026
Subject: S7-2026-15 Comment From: Gus diZerega Affiliation: Jun. 15, 2026 I ran a small business for many years although I am now retired. Trust was an essential dimension of my relationships with suppliers and customers and this change strikes at its core- "what," any reasonable person can ask, "are they hiding?" This change is a very bad idea and I oppose it 100%.

Subject: S7-2026-15 Comment From: Gwena Dotson Affiliation: Jun. 15, 2026 Gwena Dotson.
Service and Repair Technician.
As both a worker and an individual investor, I believe quarterly reporting is important for transparency and accountability. Public companies should provide regular financial updates so employees, investors, and the public can make informed decisions based on current information rather than waiting six months. Delaying reporting could give large institutions and insiders an advantage while everyday investors are left without timely access to critical financial data. Quarterly reporting helps maintain trust in the market and encourages companies to stay focused on long term financial responsibility while remaining transparent about short term performance.

H M — Jun 15, 2026
Subject: S7-2026-15 Comment From: H M Affiliation: Jun. 15, 2026 We need to keep the PERFORMANCE reporting on the QUARTERLY SCHEDULE.
TOO MUCH CAN CHANGE THE PERFORMANCE RESULTS IF WE DO NOT KEEP THE INFORMATION FLOWING TO INVESTORS. MAINTAINING FREQUENT INFORMATION FLOW KEEPS THE CORPORATIONS FROM CONCEALING BAD RESULTS AND HELPS KEEP CORPORATIONS “FROM HIDING BAD PERFORMANCE DECISIONS FROM THE OPEN OBSERVATION OF INDIVIDUAL INVESTORS.”

Heidi Lackey — Jun 15, 2026
Subject: S7-2026-15 From: Heidi Lackey Affiliation: Jun. 15, 2026 Financial reporting must continue on a QUARTERLY basis. The need to report quarterly is the only thing that keeps some companies from making unethical business decisions, because those tricks are exposed through these reports. Moving to semi-annual reporting would allow for more questionable financial decisions to be made, then "prettied up" before the reporting deadline. TL, DR - Moving to semiannual SEC reporting would make financial misdoings in the interim much easier to hide. The SEC is still against that, right? Heidi Lackey. retired Business Analyst and Financial Reporting Analyst, Maine

---

Heidi Lehman — Jun 15, 2026
Subject: S7-2026-15 Comment From: Heidi Lehman Affiliation: Jun. 15, 2026 Hello SEC my name is Heidi Lehman and I'm a Speech Pathologist and I feel like quarterly reporting is very important because it helps companies to make the right decisions. Longer reporting times lead to companies being less responsive, workers leaving the company, etc. So I am urging you to KEEP QUARTERLY REPORTING !! Thank you for your attention to this very important issue!!!!!

HEIDI THORNLOW — Jun 15, 2026

Helen Hanson — Jun 15, 2026
Subject: S7-2026-15 From: Helen Hanson Affiliation: Jun. 15, 2026 To the U.S. Securities and Exchange Commission:

I strongly urge the Commission to reject the proposed optional semiannual reporting and maintain mandatory quarterly reporting. This proposal undermines the SEC's core mandate: investor protection.

Why Quarterly Reporting Must Stay

Investor Protection: The SEC's obligation runs to investors, not issuers. Reducing disclosure frequency to lower corporate costs shifts burden to investors, increasing risk without benefit to capital formation.

Timely Risk Pricing: Quarterly reports give investors timely signals to price risk accurately. Six-month gaps force reliance on outdated data, increasing uncertainty and equity capital costs.

Fraud Detection: Quarterly reporting shortens the window fraud can go undetected. Extending it by six months benefits bad actors, harms investors.

Lower Volatility: Extended information gaps cause investor overreaction when news emerges, creating greater price swings—not reduced volatility.

Market Comparability: Different reporting frequencies make comparing companies in the same industry nearly impossible, undermining fair and efficient markets.

Insider Trading Risk: Longer gaps mean more people possess nonpublic information longer, increasing insider trading temptation.

Evidence Against the Proposal

The UK's 2013 reversal to semiannual reporting showed no increase in capital investment or research spending. The promised benefits didn't materialize.
When large-cap companies adopt semiannual reporting, smaller firms will follow to reduce costs—eroding protections across the entire market.

Better Alternative:
Streamline, Don't Eliminate
Rather than eliminating quarterly reporting, the SEC should streamline reports (making them less dense) to reduce corporate burden while maintaining transparency.

Conclusion
Individual investors strongly oppose this because they rely on quarterly financials for informed decisions. The SEC must prioritize investor protection over corporate convenience.
I request the Commission withdraw this proposal and maintain the quarterly reporting requirement that has protected investors for 55+ years.

Thank you for your consideration.

Subject: Comment on S7-2026-15 From: hiptub2 Affiliation: Jun. 15, 2026 6-15-26

Greetings.
It makes little sense to hamstring those in the markets from responding.
A regular reporting, like that which exists, is best.
I am a teacher on the cusp of retirement and cannot afford yo lose savings...not a single penny.
I have a disabled son, I am still paying off my condo, I have medical issues, and all of this requires me to be on top of the market, and those who manage my monies.
I live in one of the most expensive locals in the country - Palm Beach County. My salary is not in line with the economics of the area. We are paid some of the lowest wages (Florida teachers) of those fellow teachers in other states.
Therefore, my savings is paramount. Please keep the highly effective method of quarterly reporting currently used.

Sincerely and with great concern,

Brenda J. Breckon

Subject: S7-2026-15 Comment From: Holly McElhatton Affiliation: Jun. 15, 2026 We need to continue to have wall street reporting quarterly. Changing the status quo will limit transparency and could make fraud harder to spot.

Thank you. Holly McElhatton, MA

Holly Taylor — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Holly Taylor Affiliation: Jun. 15, 2026 1. Controlled Thermal Resources Holdings Inc. Attn: Office of the Chief Executive Officer & General Counsel
124 West 9th Street, Suite 101
Imperial, CA 92251
2. Plum Acquisition Corp. IV Attn: Board of Directors & SEC Compliance Officer
[Insert Plum IV Corporate Mailing Address if available, or route via CTR Exec Suite]
RE: NOTICE OF UN-FORECLOSED, SUPERIOR SUBSURFACE MINERAL AND GEOTHERMAL ESTATE INTEREST; IMPENDING CLOUD ON TITLE; AND MANDATED MATERIAL LIABILITY DISCLOSURE FOR FORTHCOMING FORM S-4 REGISTRATION STATEMENT (HELL'S KITCHEN PROJECT, SALTON SEA KNOWN GEOTHERMAL RESOURCE AREA, IMPERIAL COUNTY, CA)
LADIES AND GENTLEMEN:
Please be advised that the undersigned serves as the lawful, sovereign Successor-in-Interest, Trustee, and Heir to the court-ordered Olive B. Phillips Trust (established via final decree of the California Superior Court, Probate Division), and the residual hereditary real property assets of the M. Penn Phillips Company and Salton Riviera, Inc.
This letter serves as Formal Executive Notice that an internal forensic title audit and historical deed verification have identified a direct, structural intersection between the active geothermal brine well fields, planned Direct Lithium Extraction (DLE) footprints, and unitization blocks of your flagship Hell's Kitchen Project and the un-defaulted, superior subsurface mineral and geothermal rights legally held by my family's trust.
I. THE LEGAL BASIS OF THE TITLE SUPERIORITY
The Olive B. Phillips Trust holds certified, court-ordered, un-defaulted title to the subsurface estate within the project coordinates based upon the following unbroken chain of real property law:
1. Explicit Severance and Mineral Reservation: On the master deeds executing the original "Salton Riviera" layouts in Imperial County, California, the master development entity systematically severed and reserved 100% of all oil, gas, mineral, and geothermal rights to the parent corporate apex and its family successions.
2. Hereditary Trust Insulation: Following formal probate court administration, these specific, severed subsurface mineral estates were judicially ordered into the secure, asset-insulated vault of the Olive B. Phillips Trust.
3. The Surface Default Defect: Under established California Real Property and Revenue & Taxation codes, a county tax deed issued over a defaulted surface parcel only transfers what the defaulting surface taxpayer actually owned. Because the underlying minerals were cleanly severed decades prior and held by a court-ordered testamentary trust, the subsurface rights were never part of the surface tax rolls, were never in default, and have never been foreclosed upon. Any county tax auctions of surface lots in Map Books 007, 008, and 009 transferred nothing but the superficial desert crust.
II. FEDERAL SECURITIES AND SEC COMPLIANCE MANDATES
I note that on March 9, 2026, Controlled Thermal Resources ("CTR") and Plum Acquisition Corp. IV ("Plum IV") announced a definitive business combination agreement valued at an estimated $4.7 billion pro forma enterprise value, intending to list on the Nasdaq under the ticker symbol "CTRH". I further note that under Amendment No. 1 to the Business Combination Agreement executed on May 15, 2026, CTR's audited financial statements are due today, June 15, 2026, directly preceding the compilation of your joint proxy statement/prospectus on Form S-4.
Pursuant to the Securities Act of 1933, the Securities Exchange Act of 1934, and SEC Regulation S-K mandates, your entities are under an absolute, non-discretionary obligation to disclose all Material Liabilities and Substantive Clouds on Title that threaten the core asset pool or resource forecasts of the pre-IPO entity.

The existence of a certified, supreme, court-ordered testamentary trust holding title to the subterranean brines you intend to extract constitutes a prime material liability. Failure to append this title dispute to your forthcoming Form S-4 filing will expose the post-merger entity to immediate regulatory scrutiny and substantial federal disclosure non-compliance penalties.

III. FORMAL DEMANDS FOR DISCLOSURE AND ACCOUNTING

As a Pro Se claimant holding the certified physical keys to this estate, I prefer to avoid unnecessary litigation that would disrupt the timeline of your Nasdaq combination. However, to protect the assets of the Trust, I hereby demand the following actions within fourteen (14) business days of receipt of this notice:

1. Brine and Wellhead Grid Disclosure: Delivery of an operational map and engineering log outlining the exact depth, perforation intervals, and coordinates of all active, pilot, or planned production and injection wells operating within Townships and Ranges matching the Olive Trust boundary.
2. Royalty Escrow Accounting: A comprehensive accounting of all mineral royalty percentages, brine extraction credits, or land-use offsets that have been diverted to "Unknown Owner" corporate suspense accounts or escrow holdings due to the historical corporate status of the master developers.
3. Standstill and Review Conference: A direct scheduling of a title alignment conference between your chief corporate title counsel and myself to review the certified probate documents and establish a path toward a mutually beneficial Subsurface Lease and Mineral Royalty Agreement.

IV. CONCLUSION

I stand ready to provide high-quality copies of the certified court records, probate decrees, and historical deeds verifying the trust's superior position upon formal engagement from your executive legal team.

If your corporate counsel fails to acknowledge receipt and open an administrative review file within the fourteen (14) day window, I will proceed with direct public filing options—including filing a formal Notice of Severed Mineral Interest in the public land records of Imperial County and submitting a formal TCR Risk Alert to the SEC's Division of Corporation Finance to ensure public investors are protected.

Sincerely,

Holly Christine Brady Taylor
Sovereign Successor Trustee,
Penn P Thayer Trust
The Olive B. Phillips Trust

Homero Ganza — Jun 15, 2026

Subject: My view on Rule S7-2026-15 From: Homero Ganza Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:

As a retail investor, I am writing to express my strong opposition to Rule S7-2026-15. Eliminating quarterly financial reporting would severely disadvantage everyday investors like myself.

A six-month gap in information is simply too long in today's fast-moving markets. It creates a dangerous blind spot where financial risks, ballooning debt, or operational failures could hidden for half a year, leaving retail traders to take the hardest hit. Furthermore, cutting back on transparency only opens the door to market manipulation and fraud, eroding public trust in a fair trading environment.

While corporate insiders and large institutional firms will always find ways to access timely data, retail investors rely heavily on public quarterly filings to level the playing field. Please do not strip away the vital transparency we need to make informed, safe investment decisions.

Thank you for considering my feedback.

Hope Hibler — Jun 15, 2026
Subject: S7-2026-15 Comment From: Hope Hibler Affiliation: Jun. 15, 2026 Deregulating companies in any way is a TERRIBLE IDEA. If the companies don't have anything to hide, they should be willing to do quarterly. Deregulation or lack of regulation is how the 1929 collapse happened. You know who didn't feel the crushing blow of that crash, the ultra rich. They just waited for the cheap land and low stock prices. My name is Hope Hibler and I teach American History that is why this matters. PROTECT MY ASSETS from the utra rich.

I lived before the Fall — Jun 15, 2026
Subject: S7-2026-15 Comment From: I lived before the Fall Affiliation: Jun. 15, 2026 In the stock market information on how a company is doing is incredibly important. Transparency in needed. The more information, the better. Millions of people have their retirement and life savings in the stock market. Biannual reporting was tried in the past and the markets growth slowed down.

Ian Hunt — Jun 15, 2026
Subject: S7-2026-15 Comment From: Ian Hunt Affiliation: Jun. 15, 2026 Quarterly reporting is necessary for transparency, and for keeping one's finger on the pulse of an industry. A public company should not report less frequently than that.

--
Ian Hunt
ianhunt@fastmail.fm

Ian Rohwer — Jun 15, 2026
Subject: File No. S7-2026-15 From: Ian Rohwer I have been trading and managing private family wealth for more than 15 yrs. Allowing companies to report only two times a year will increase speculative trade and make necessary financial information less transparent. It is not good for the overall market and will only increase insider trading events. The reporting period is already one quarter behind. If any publicly owned company cannot produce this information within that time frame, maybe they should consider going private. Being a publicly traded company comes with responsibilities and obligations to the PUBLIC.

Ian Sandler — Jun 15, 2026

Individual Informed retiree — Jun 15, 2026
Subject: File No. S7-2026-15 From: Individual I am retired, and I have saved my entire work life for retirement. I can not afford your proposal to move to semi annual reporting to investors. KEEP REPORTING QUARTERLY! History shows that during the years between the 1950's to 1970, the only time when the market went to semi-annual reporting, the stock market performed much worse than under quarterly reporting. I want to keep transparency in the market. It enhances investor decision-making, increases market efficiency, and lowers the cost of capital. When public filings go quiet, big institutions and insiders still find ways to gauge how a company is doing. It is the everyday investor, working from what is public, who gets left in the dark, and everyday investors like me can't afford to lose a third of what took me a lifetime to save.

Individual None — Jun 15, 2026
Subject: File No. S7-2026-15 From: Individual Although the proposed rule would reduce the reporting burden on companies, it is a bad rule change. It allows companies to keep adverse information that investors and prospective investors should ha access to hidden from the public. Don't change the reporting g period from quarterly to semi-annual.

Subject: S7-2026-15 Comment From: Ishwar Seunath Affiliation: Jun. 15, 2026 My name is Ishwar Seunath-Williams. I do not believe that allowing corporations more freedom to self regulate to disagree is helpful for me as a human being in the workplace. We currently faced way too much uncertainty when it comes to corporations literally holding our lives in their hands. Last month the company I worked for fired 5000 people at the drop off a hat. If regulation like what you all are proposing passes. That means that I can be screwed and abused even more. I do not want to be abused by corporations who take and take and take this needs to not pass.

Ishwar Seunath-Williams

J JN — Jun 15, 2026
Subject: Comment on S7-2026-15 From: J JN Affiliation: Jun. 15, 2026 Quarterly reports equal informed investors and accountable corporations and money managers. With semi-annual reports, the stock market earnings and loss swings would become too dramatic and dissuade smaller investors from participating for fear of losing BIG. Do we really want to encourage people to hide their money in mattresses or in holes in their backyard again in order to keep it safe? Make choices that promote participation from as many people as possible. America works hard and everyone should be encouraged to share in the rewards of that through investment.
Jarucia Jaycox N., Educator, Everett, WA

J Manuel Ocasio — Jun 15, 2026
Subject: Comment on S7-2026-15 From: J Manuel Ocasio Affiliation: Jun. 15, 2026 Dear regulatory staff:

With the support of Artificial Intelligence and sophisticated yet affordable enterprise resource planning systems, there is no reason why publicly traded companies would be over-burdened by quarterly reporting of their financial affairs.

In fact, there are no longer the barriers or costs associated with reporting that existed when the original requirement went into effect in the 60s, when lack of technology made it particularly onerous for large, multinational organizations to meet their quarterly reporting obligations.

The change opens up the possibility that insiders will act with impunity in self dealing, as nefarious actors would have six months to execute complex self-enrichment deals at the expense of shareholders, hide material issues, or worse.

For the aforementioned reasons, I vehemently oppose changing the quarterly reporting requirements to semi annual reporting.

Sincerely,

J. Manuel Ocasio
Healthcare Executive
Phoenix, Arizona

Jacob G — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jacob G Affiliation: Jun. 15, 2026 To Whom It May Concern,

I am writing as an individual investor to express my support for maintaining quarterly reporting requirements for publicly traded companies.

As a retail investor, I rely on timely and consistent financial information to make informed investment decisions. Quarterly reporting provides transparency into a company's performance, financial condition, and emerging risks throughout the year. Reducing reporting frequency to semi-annual reports would create longer periods with limited public information, potentially increasing uncertainty and reducing confidence in the markets.

Quarterly reporting also helps ensure that all investors have access to the same information at regular intervals. Without these updates, there may be a greater reliance on informal communications, analyst estimates, and speculation, which could disadvantage smaller investors who do not have access to the same resources as large institutions.

While I understand concerns about the administrative burden placed on companies, I believe the benefits of transparency, accountability, and investor protection outweigh those costs. Public companies have a responsibility to provide investors with regular updates, and quarterly reporting has long been an important part of maintaining fair and efficient capital markets.

I respectfully encourage the SEC to continue requiring quarterly financial reporting for public companies.

Thank you for your consideration.

Sincerely,

Jacob Glazner

Subject: My view on Rule S7-2026-15 From: Jamee Bateau Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Don't allow public companies to hide vital information from us. The SEC is supposed to be protecting the public not doing things outside the public interest. You're supposed to protect people not corporations.

James Ahn The Motley Fool community — Jun 15, 2026
Subject: File No. S7-2026-15 From: James Ahn SEC, I believe it's important to keep quarterly reports. I know it's a burden to companies to report quarterly, but the cadence is set and it hasn't prevent or hindered companies from meeting targets. If anything, it ensures that there is the highest, gold standard level of scrutiny and accountability. If a company wants to commit fraud, they're going to do it. But quarterly reports aren't there to prevent fraud, but to keep individual investors properly informed on how a business is performing and track metrics, both short and long. There risk to

benefit ratio by changing quarterly to bi-annually skews unforgivably towards obscurity. We need to keep quarterly reports.

James B — Jun 15, 2026

James Huschka — Jun 15, 2026
Subject: File No. S7-2026-15 From: James Huschka Vanessa A. Countryman Secretary U.S. Securities and Exchange Commission 100 F Street NE Washington, D.C. 20549-1090 Re: File No. S7-2026-15 — Semiannual Reporting (Proposed Rule) Dear Ms. Countryman, I write to oppose the Commission’s proposed rule permitting companies to substitute semiannual reports on Form 10-S for quarterly Form 10-Q filings. The proposal would materially weaken the timely oversight that investors and markets rely upon and is therefore not in the public interest. Investor and market evidence. A broad survey of professional investors finds strong support for retaining mandatory quarterly reporting and significant concern that reduced frequency would increase information

asymmetries and impair market efficiency. The SEC’s own Investor Advisory Committee concluded that eliminating the quarterly mandate would deprive markets of timely material information and undermine informed investment decisions. SEC . gov Academic and empirical findings. Cross-market research comparing U.S. quarterly reporters with European semiannual reporters shows that more frequent reporting accelerates information diffusion and supports faster price normalization after earnings announcements. Research on disclosure and liquidity demonstrates that increased disclosure frequency and voluntary timely disclosure improve liquidity and firm value, indicating that more frequent mandated reporting supports lower cost of capital. National Bureau of Economic Research Oversight and fraud detection risks. Empirical work on enforcement and whistleblower programs shows that robust oversight mechanisms deter financial reporting violations and that weakening routine reporting cadence could reduce the timeliness of detection and remediation of misstatements. Policy recommendation. If the Commission seeks flexibility, any semiannual option should be narrowly tailored and conditional on demonstrable, ongoing investor protections including enhanced real-time disclosure requirements, stricter audit committee and internal control standards, and limits to eligibility for issuers with recent restatements or control deficiencies. The default should remain mandatory quarterly reporting. Thank you for considering these comments. I urge the Commission to prioritize investor protection and market integrity by preserving the quarterly reporting requirement or by adopting only a tightly constrained alternative that preserves timely oversight. Sincerely, Dr, James L Huschka Ed. D. (Minneapolis, MN)

James Kilmer — Jun 15, 2026
Subject: S7-2026-15 Comment From: James Kilmer Affiliation: Jun. 15, 2026 If anything, I'd think that longer periods of record keeping would be more difficult to manage than shorter periods. More regular submissions keep investors and shareholders informed, bring problems to light more quickly, and solutions more readily available. There's not a person, working or retired, who doesn't have to account for himself regularly, and the history of bailouts by taxpayers makes me feel like monthly rather than quarterly would be the way to go. James Kilmer, retired.

James Kirklin James Kirklin — Jun 15, 2026
Subject: File No. S7-2026-15 From: James Kirklin Just wanted to say that we need more transparency rather than less. Quarterly reports are already a dread to look through, for those that actually look, and in our information age, being mostly paperless, I would prefer just an up to date

site I can read. The main thing that worries me is less overwatch because unfortunately even Martha Stewart tried to get over. Don't believe someone won't take advantage of this change.

James Kurth — Jun 15, 2026
Subject: Comment on S7-2026-15 From: James Kurth Affiliation: Jun. 15, 2026 Good morning,
I'm see

I am sending you my opinion about changing the reporting frequency, as is represented in S7-2026-15.
I think with the rate at which data and markets move these days, quarterly reporting is a minimum timeline for reporting. I'd like to see it more frequently. Transparency is essential for investor confidence, more is better. Investor confidence is essential for strong markets, and I'm not long off of retirement age. I'd hate for my retirement account to take any substantial hits at this point.
Please take a good hard look at the history of the required quarterly reporting and remember, if companies are allowed to cut corners on compliance, they will. And then the SEC won't know about it for 6 months instead of 3.

I'm not in favor of the rule change.

Respectfully,

James Kurth

JAN wranglrjan — Jun 15, 2026
Subject: S7-2026-15 Comment From: JAN wranglrjan Affiliation: Jun. 15, 2026 Absolutely should not be done, for many reasons:
I rely on quarterly info to make informed decisions-- longer gaps will cripple that process and create an unfair advantage for corporate insiders.

Global trends, or "Everyone else is doing it", is a superficial reason at best. The intelligent thought process should be "How well is it working elsewhere?" Digging deeper shows an increased likelihood of long-term corporate fraud, hardly a good reason to proceed.

Offering this as "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates, and the actual savings to companies don't offset the long-term costs to me and the impact on my retirement savings.

Janice Cicchetti, retired

Integrity means doing the right thing even when it's not convenient"

Jane McKenzie — Jun 15, 2026
Subject: S7-2026-15 Comment From: Jane McKenzie Affiliation: Jun. 15, 2026 People need to see what's going on with their money on a quarterly basis! There is more chance that fraud could occur during a lapse of unreportings as in the May 15 stock market transfer.

Jane Turk — Jun 15, 2026
Subject: S7-2026-15 Comment From: Jane Turk Affiliation: Jun. 15, 2026 The SEC has already looked the other way on thousands of insider trading deals. Please do not make it easier for small investors like me to be cheated.

Jane Weigle — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jane Weigle Affiliation: Jun. 15, 2026 Keep and maintain quarterly SEC reporting at all costs. It tells us what is happening in the markets, in the world, to our savings, to the current status of our current administration. It impacts all of us and information is vital for the future of our country.
Richard and Jane Weigle, retired, Longmont, Colorado.

Jane Weigle

Jane Wolfe — Jun 15, 2026

Subject: Comment on S7-2026-15 From: Jane Wolfe Affiliation: Jun. 15, 2026 Absolutely not! Sometimes quarterly is not enough. As a former benefits and comp manager I saw first hand what could happen if you don’t keep an eye on the market changes. And many rely on the quarterly statement to, at the very least, make changes and corrections. I encouraged them to review the accounts monthly. It seems as if the SEC is deliberately trying to make it difficult for the average person to save money for retirement.

Janet — Jun 15, 2026

Subject: S7-2026-15 Quarterly From: Janet Affiliation: Jun. 15, 2026 Dear SEC:

My name is Janet Blair, and I am a resident of Pinehurst, North Carolina. I am writing to formally express my support for maintaining quarterly reporting requirements.

Accountability is essential to preventing market manipulation and protecting the integrity of our financial system. While the current reporting process is not perfect, quarterly reviews provide necessary transparency. Reducing the frequency of these reports would only make it easier to hide expenditures and facilitate unfair advantages for insider traders and the ultra-wealthy.

To prevent further corruption and financial instability, we must ensure rigorous oversight remains in place. I firmly vote in favor of keeping the quarterly reporting standard.

Sincerely,

Janet Blair

Janet Cadmus — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Janet Cadmus Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I'm writing to you to say that as a person, born and raised in the United States and as a proud American, who has, until recently, believed that the USA is the land of opportunity. It's becoming very clear that a very small number of men have been (quietly at first) dismantling protections to allow citizens from all walks of life to grow a successful life. It's now boldly evident and flagrant. Greed and privilege are now driving the bus. I've been working for years to slowly build protection for my future

and retirement. Now that we've been forcibly shifted over the years from pensions through work to having our retirement dependent on the stock market, the risk is already so much higher. PLEASE do not remove the basic transparency requirements of quarterly reporting from these companies. It is absolutely disheartening and irresponsible. Please hold corporations to account.

Janet Kresslein — Jun 15, 2026
Subject: File No. S7-2026-15 From: Janet Kresslein As stock holders, we are owners of the company and deserve to be informed of the financial condition/heath of the company. Six months is too long a period of time between reports as a company could have serious and significant changes within that type of period of time.

Janet Lombardo — Jun 15, 2026

Jason Middlebrooks — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jason Middlebrooks Affiliation: Jun. 15, 2026 To Whom it Concerns at the SEC,

I believe that keeping the reporting quarterly continues the transparency investors have come to rely on. Accurate and timely information is important to financial markets so the stocks can be properly priced. Delays in reporting lead to inaccuracies in pricing that will cause significant losses. Twice a year reporting will lead to a market that has violent swings due to late information being provided. Twice a year reporting allows the company to hide issues from their investors. Twice a year reporting allows insiders to profit unfairly.

Please keep the reporting quarterly to continue the transparency we currently have.

Jason Middlebrooks, Management Analyst, Plano TX

Jason Moser Senior Analyst and Advisor — Jun 15, 2026
Subject: File No. S7-2026-15 From: Jason Moser Generally speaking I'd prefer to see companies report on a quarterly basis. I understand the arguments for semi-annual reporting. Less "short-termism" seems like a reasonable argument as companies aren't beholden to meeting quarterly expectations lest they upset Wall Street. And I'm sure it would save time and money not having to go through the filing process as much. But six months is a long time to not know what's going on and it feels like that extension could open up the potential for information leaks and favoritism, not to mention some serious market reactions when reports are actually filed. And selfishly, I just really enjoy the quarterly cadence as an investor and analyst. There's always something to talk about which is a lot of fun.

Jasper Tucker — Jun 15, 2026
Subject: S7-2026-15 Comment From: Jasper Tucker Affiliation: Jun. 15, 2026 Why is ok to hide money? Or defer reporting loses/gains? The quarterly system was good enough in the 70s and should still be used.

Please DO NOT STOP the reports from becoming available each quarter (three months) of the year. These reports keep us informed of the progress (or lack thereof) of our finances. Too much can stay hidden if we only receive the information twice a year. This is why we need to get them quarterly.

The SEC is proposing to roll back financial reporting to the way it worked in 1955. Less disclosure then meant lower returns and lower valuations. A repeat could erase a third of my savings. Being an elderly, retired, widow, my attention must be held to my finances.

Thank you for being understanding for myself and for the very people in my social status.

Jeanne Johnson — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jeanne Johnson Affiliation: Jun. 15, 2026 The last thing we need from corporations right now is less transparency. From an investor point of view, quarterly reporting not only gives us a look at recent performance but also future results/health. It allows us to make informed decisions when investing because it details both the short term goals and long term strategies. If the recommended change is approved I believe it will make it harder to learn where to invest due to wider price swings and more surprises due to increased time between reporting. Personally I feel my trust in the process would definitely be negatively affected. Finally, this administration has already sided with corporations over individuals (i.e. tax policies, federally funded

investments, granting of federal contracts, deregulation, etc.) and this would be one more indication that they favor big business vs individuals. Since our elected officials are supposed to represent “the people” this would be one more of this administrations initiatives that show us they have no interest in representing all Americans!

Jeffrey Tomaszewski — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jeffrey Tomaszewski Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:

I am writing in opposition to the proposal to reduce mandatory public company financial reporting from quarterly to semiannual disclosures.

As an individual investor saving for retirement, I rely on timely and consistent financial information to evaluate the companies in which I invest. Quarterly reporting promotes transparency, market efficiency, and investor confidence by ensuring that all market participants have access to current information on a regular basis.

Reducing reporting frequency would increase the period during which investors must make decisions with less information. This could benefit insiders and large institutional investors who have greater access to management and alternative sources of information, while disadvantaging ordinary retail investors. Public markets function best when information is broadly available and distributed fairly.

Supporters of semiannual reporting argue that it may reduce short-term pressures on management. However, any reduction in compliance costs must be weighed against the potential loss of transparency, increased uncertainty, and reduced market accountability. Investors deserve regular insight into company performance, risks, liquidity, and changes in business conditions.

Quarterly reporting has been a cornerstone of U.S. capital markets for decades and has helped establish the United States as one of the most transparent and trusted investment markets in the world. Weakening disclosure requirements risks undermining that reputation and could reduce investor confidence.

I respectfully urge the Commission to maintain current quarterly reporting requirements and to prioritize transparency, market integrity, and investor protection.

Thank you for considering my comments.

Sincerely,
Jeffrey Tomaszewski
Ypsilanti, Michigan

Jennifer Ellsworth

---

jeni shaw — Jun 15, 2026
Subject: S7-2026-15 From: jeni shaw Affiliation: Jun. 15, 2026 I respectfully oppose the proposal to reduce public company financial reporting from quarterly to biannual reporting, even if accompanied by a requirement that Chief Executive Officers personally certify the reports.

The lessons of past corporate scandals, particularly the collapse of Enron, demonstrate the importance of frequent financial transparency and accountability. Thousands of employees and retirees lost substantial portions of their life savings and retirement funds because critical information regarding the company's financial condition was not accurately disclosed to investors in a timely manner. Many former employees and retirees were forced to delay retirement or return to work after suffering devastating financial losses.

Quarterly reporting provides investors, employees, retirees, pension funds, and the public with regular insight into a company's financial performance and risks. Reducing reporting frequency to twice per year would increase the time between disclosures, potentially allowing financial problems, questionable accounting practices, or other material issues to go undetected for longer periods.

While CEO certification of financial reports is a positive accountability measure, executive sign-off alone cannot replace the investor protections created by regular and timely disclosure. The financial markets function most effectively when information is available frequently, consistently, and transparently.

The experience of Enron and other corporate failures illustrates that strong disclosure requirements are essential to protecting investors and maintaining confidence in U.S. capital markets. For these reasons, I urge the Securities and Exchange Commission to retain quarterly reporting requirements and reject proposals that would reduce the frequency of financial disclosures.

Thank you for your consideration.

Jeni Shaw

Jennifer Panarelli — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Panarelli Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
My name is Jennifer Panarelli. I work for brewer walmart. I've been in retail/sales for 31 years now. I'm also a small investe in J&J. I'm a top seller of anything I've wanted to sell. Just ask TJMAXx in bangor. Ect. I took first place in 3 states at one time selling for Walgreens in bangor. Selling is my passion.(Vagisil) spray for underwear, carpets bedding, litterboxes, on the go what ever you want. Safe to use on chlothes. A spray for in the air. Yes a simple air freshener. Doesn't even have to do with anything P. I myself took a small bottle of cheap perfume. Enptyed it. Took some vagisil from the pink bottle poured it in. And some warm water. Let it sit for about half hour. And sprayed around the room a bit. Freshness. Th8s produck is formulated to be used between a women's legs. For safe and different reasons. You can't get any safer then that. I spray it in my room. Smell of freshness. Just my idea. Ect. Jennifer P

JENNIFER ROLLINS — Jun 15, 2026
Subject: S7-2026-15 From: JENNIFER ROLLINS Affiliation: Jun. 15, 2026 My name is Jennifer Rollins. I am a native Houstonian and saw first-hand the devastation of the Enron scandal. Changes to rules that hold CEOs accountable to their investors, particularly when those investors are employees, must remain in place to protect the people who enable the company’s wealth in the first place. Corporations are still businesses that employ PEOPLE, people with families, people with bills, people who agreed contractually to work hard for the common goal of the betterment of said corporation in exchange for a piece of that wealth. Do not enable bad actors by reducing oversight. History (and sadly human nature itself) tells us, the only sound policy is trust but VERIFY!

Respectfully,

Jennifer Rollins, MS, CGC

Jim Dunn — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jim Dunn Affiliation: Jun. 15, 2026 I am writing to formally express my strong support for maintaining the current quarterly reporting framework for public companies. While calls to shift to a semi-annual or annual reporting model persist under the guise of reducing "short-termism," eliminating Form 10-Q would severely harm market integrity, investor protection, and capital allocation efficiency.Quarterly reporting is the bedrock of the modern U.S. financial ecosystem for several critical reasons: Protects Retail Investors: Less frequent reporting creates long periods of informational blindness, disproportionately harming retail investors who rely on public disclosures rather than institutional access. Maintains Market Discipline: The 90-day reporting cycle forces management teams to maintain rigorous internal controls, ensuring operational deficiencies or financial distress are identified and addressed swiftly. Reduces Market Volatility: Regular, predictable information flows prevent the massive market shocks and speculative rumors that naturally manifest when data is withheld for six or twelve months. Deter Fraud and Manipulation: Frequent public scrutiny and continuous auditor engagement leave significantly less room for financial engineering or the concealment of material losses.The argument that quarterly reporting discourages long-term investment is a false dichotomy. Corporate leaders can, and should, manage for the long term while remaining transparent in the short term. The solution to short-termism lies in reforming executive compensation and investor incentives, not in reducing market transparency.The SEC's primary mandate is to protect investors and maintain fair, orderly, and efficient markets. Softening reporting requirements would actively undermine this mission, eroding the global gold standard of transparency that defines U.S. capital markets. I urge the Commission to reject any proposals to scale back quarterly reports.

Sincerely,

Jim Dunn

Jim Francus — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Jim Francus Affiliation: Jun. 15, 2026 To those at the SEC, Financial reporting needs to remain a quarterly occurrence rather than semiannually as it has been for many decades to keep investors better informed. A lot can happen in 6 months vs. 3 months that can affect investment decisions.
Respectfully,
J Francus, Valparaiso IN

Jo Young — Jun 15, 2026
Subject: S7-2026-15 Comment From: Jo Young Affiliation: Jun. 15, 2026 To Whom It May Concern,

I understand the SEC is considering doing away woth quarterly reports, which is not a great idea and will likely continue to undermine faith in the SEC's ability to protect American investors. If companies could do quarterly reporting for over 50 years, before the real rise of technology, there is absolutely no valid reason for not continuing to do so. I worked in the financial industry for half my career and this proposed change seems like a very suspicious obscuring of the facts from investors. Which matters to me as a retired individual who relies on solid information in order to prudently invest my life savings and as someone who feels chicanery is on the rise in this country. I hope the SEC stops this idea before it becomes actual regulation. Regards, Jo Young

Joanna Carpe — Jun 15, 2026
Subject: S7-2026-15 Comment From: Joanna Carpe Affiliation: Jun. 15, 2026 I'm a semi retired educator who's worked with medical students and kindergarteners. We have all been told to invest to create wealth for our retirement. The stock market has grown exponentially because so many of us trust corporations with the money we will rely on to live. Without quarterly reporting only the business will know what's going on with their finances for six months. In finance that is a lifetime. Trends change, stocks rise and fall, ceos leave, companies fail. If they want our money corporations owe us timely updates about how they are doing financially. As an educator I know information is invaluable in decision making. The public needs this information to guide our choices. Six months is too long to go without information. For most of us our investments for our retirements are a huge part of our earnings. If we lose that investment we lose the quality of retirement or the possibility to retire. Joanna Carpe

João Pires — Jun 15, 2026
Subject: File No. S7-2026-15 From: João Pires The proposal makes no sense. A comprehensive and competitive market requires that stakeholders, particularly shareholders, have access to regular, detailed information. In today's world, with the levels of volatility to which markets are subject, six-month intervals are far too long to obtain detailed information on the evolution of business. Reducing contextual costs is also not a valid excuse, because management has an obligation to promote efficient control systems that allow these costs to be kept under control. This type of regulation will penalize American stock exchanges, to the detriment of other markets, and local players will lose business and relevance.

Vanessa A. Countryman, Secretary
U.S. Securities and Exchange Commission
100 F Street, NE
Washington, DC 20549-1090

Re: Proposed Amendments to Permit Semiannual Reporting on Form 10-S in Lieu of Quarterly Reporting on Form 10-Q, and Related Amendments to Regulation S-X

Dear Ms. Countryman:

I write to oppose the Commission's proposal to permit reporting companies to satisfy their interim reporting obligations under the Securities Exchange Act of 1934 by filing semiannual reports on a new Form 10-S in lieu of quarterly reports on Form 10-Q, and to oppose the related amendments to Regulation S-X that would accommodate semiannual reporting and relax the rules governing the age of financial statements. While I appreciate the Commission's stated goals of reducing compliance burdens and discouraging short-termism, I do not believe the proposal achieves those goals at an acceptable cost to investors, market transparency, or price integrity.

I. The proposal materially reduces the information available to investors.

Quarterly reporting has been a cornerstone of U.S. public-company disclosure for roughly half a century. Moving to a semiannual baseline would cut the frequency of comprehensive interim financial disclosure in half, doubling the period during which investors must make decisions without updated audited-quality financial information, management's discussion and analysis, and disclosures about emerging trends, risks, and liquidity. A six-month information gap is a long time in modern markets. During that interval, material deterioration in a company's financial condition could go undisclosed in any comprehensive form, widening the information asymmetry between corporate insiders and ordinary investors. That asymmetry is precisely what the federal securities laws were enacted to reduce.

II. Current-report obligations are not an adequate substitute.

The Commission may suggest that reports on Form 8-K will fill the resulting gap. They will not. Form 8-K is episodic and event-driven, capturing discrete triggering events rather than the integrated financial picture and narrative analysis that a periodic report provides. Many important trends—gradual margin compression, deteriorating receivables, rising leverage, or softening demand—do not map cleanly onto any enumerated 8-K trigger and would simply go unreported

for six months. Relying on 8-Ks to compensate for less frequent periodic reporting would either leave investors underinformed or force a significant expansion of 8-K obligations that would erode the very cost savings the proposal is meant to deliver.

III. The empirical case for reduced short-termism is weak.

The proposal's premise that less frequent reporting will meaningfully curb short-termism is not well supported. Studies of markets that moved away from mandatory quarterly reporting, including the United Kingdom, have generally found only modest cost savings and no clear reduction in short-term managerial behavior. Some of that research found troubling side effects, including reduced analyst coverage and diminished liquidity, particularly for smaller issuers. Short-termism, to the extent it exists, is driven far more by compensation structures, earnings guidance practices, and investor expectations than by the statutory cadence of periodic filings. Reducing disclosure frequency is unlikely to address the underlying behavior while predictably reducing the information investors receive.

IV. Optionality introduces comparability and clarity problems.

Because the proposal would make semiannual reporting elective, the market would fragment into quarterly filers and semiannual filers. This undermines comparability across companies and over time, complicates the work of analysts and index providers, and risks confusing retail investors who may not appreciate why two otherwise similar companies disclose on different schedules. A filer's ability to switch cadence could itself become a signal that invites speculation, and changes in reporting frequency may coincide with periods when management would prefer less scrutiny.

V. Relaxing the age-of-financial-statements rules compounds the harm.

The proposed simplification of Regulation S-X staleness requirements, while administratively convenient, cuts against investor protection. To the extent the amendments permit older financial statements to be used in registered offerings and other contexts, investors may be asked to commit capital on the basis of less current information. Reduced reporting frequency and more permissive staleness rules together compound one another: the financial statements available to the market would be both less frequent and, when used, potentially more dated.
VI. Conclusion.
The modest and uncertain compliance savings the proposal offers do not justify the reduction in transparency, the wider information gaps, the comparability problems, and the documented risks to coverage and liquidity for smaller issuers. For these reasons, I respectfully urge the Commission to withdraw the proposed amendments and to retain quarterly reporting on Form 10-Q as the baseline interim reporting requirement. If the Commission nonetheless proceeds, it should at a minimum limit any election to a narrowly defined category of issuers, expand current-report obligations to backstop the information gap, require clear and prominent disclosure of a filer's
2
reporting cadence and any change to it, and retain meaningful limits on the age of financial statements used in capital-raising transactions.
Thank you for the opportunity to comment. I would be pleased to provide further information.
Respectfully submitted,
Jeo Kirchner
CFO, Kirchner CFO Services

Joe Pacheco — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Joe Pacheco Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission: If a company is publicly traded that information should be required at a minimum of quarterly for all investors Corporate investors and private equity should not get a time advantage as they already have greater access to trading capital and systems that retail investors have minimal to no access to. Withholding information is fundamentally wrong and illegal do not let another law like this get passed it is bull **** what the govt is doing to our country and this is another step in the wrong direction. Freedom of information act and CFPB need to do a better job protecting citizens against political corruption and corporate greed as they go hand in hand in our current situation in America today. Blow up the SEC and create a real govt watchdog organization that polices our politicians and their corporate relationships we have entirely far too many congressmen and senators with conflicts of interest in our govt today. Further more prosecute the issues amending today in Congress and the senate regarding insider trading.

Joe Parks — Jun 15, 2026
Subject: S7-2026-15 From: Joe Parks Affiliation: Jun. 15, 2026 Joe Parks-Retired-Ohio The very idea that shortening the reporting period is being talked about tells Americans that Corporate America is behind this! Instead of shortening the accounting period, we should expand it to once per month! With the advent of computer systems this should NOT be a problem! The corporate big wigs that are required to do this don’t actually do anything but sign that it’s true, when submitted! Their accounting departments keep all these records internally on a monthly basis, so IF they are not hiding something, send the report! Corporate America sure as hell doesn’t mind asking for more and more information from its management to keep close tabs on their company, so don’t be a Madoff and quit whining about a report you’re required to send quarterly! Even quarterly, corporate managers have plenty of time to cover up sketchy reports and screw Americans! MORE, NOT LESS!

Joey T — Jun 15, 2026
Subject: S7-2026-15 Comment From: Joey T Affiliation: Jun. 15, 2026 The Securities Exchange Commission needs to create more transparency rather than less in these highly fraudulent times. "Investor" strategies like inverse ETF's, short-selling, and exclusive margin accounts that profit immensely when humanity loses in some way are akin to the Soros "investments" that collapsed the Bank of England in 1992 due to."government inefficiencies" while profiting him billions of dollars on

the highly influential "gamble" that was taken. It happened again later with the Bank of Thailand in the same manner.

Closing off books for a 6-month period of time enables companies a longer period to shift around financials and "pencil-whip" results over a 6-month period to "float" new investors who cannot correctly view an adequate picture of a business's operations and the integrity or deception taking place by their leaders or "leaders." It also allows more time for unscrupulous investments (that effect world markets and even commodities trading) to hide for a more detrimental time period.

I am requesting you keep the current quarterly requirements as a safeguard for business integrity, financial responsibility, and timely investor influences to keep businesses accountable while operating at acceptable feedback-loop and integrity levels.

Grateful,

Joseph Talladino

John Cunningham — Jun 15, 2026
Subject: S7-2026-15 Comment From: John Cunningham Affiliation: Jun. 15, 2026 John Cunningham Live haul truck driver

Dear Commissioners,
I am writing as an individual investor to strongly oppose the SEC's proposal to allow public companies to elect semiannual reporting on Form 10-S in lieu of the longstanding quarterly reporting requirements on Form 10-Q. Quarterly reporting has served investors and U.S. capital markets well for decades by promoting transparency, accountability, and timely information. Moving away from this standard—even on an optional basis—would harm investors without delivering meaningful benefits.
First, extending the reporting period to six months would give more time for fraud, mismanagement, or operational problems to grow undetected before being disclosed. Timely quarterly filings, with their required certifications and reviews, act as an important early warning system for investors. Less frequent mandatory disclosures would widen the information gap between company insiders and the public, potentially allowing issues to compound and leading to larger surprises or losses down the line.
Second, the claimed cost savings for companies appear minimal and would not meaningfully benefit investors or the broader market. Any reductions in compliance expenses are unlikely to be passed along to shareholders through higher dividends, lower prices, or improved returns. Instead, they would primarily pad corporate profits while investors bear the cost of reduced oversight and transparency.
Third, framing this change as "optional" strikes me as a misleading trick. While companies could theoretically continue quarterly reporting, competitive and short-term pressures may encourage many to opt for the lighter semi-annual schedule. Once widespread, this could erode the overall quality and comparability of market information. Investors, particularly retail ones, would suffer from less reliable and less frequent data, even if some voluntary earnings releases continue without the rigor of SEC-mandated, certified filings.
Additional concerns include:
* Eroded investor confidence and market efficiency: Quarterly reports provide structured, audited-level disclosures (MD&A, financial statements, risk updates, and certifications) that build trust and support fair valuation. Reducing this frequency could increase information asymmetry, volatility in response to peer news, and overall market uncertainty.
* Undermining U.S. capital market leadership: The U.S. system's strong quarterly transparency has contributed to deep, liquid, and trusted markets that attract capital globally. Weakening this standard

risks diminishing that advantage compared to historical performance.
* Short-term vs. long-term balance: While some argue for less frequent reporting to reduce “short-termism,” evidence suggests quarterly disclosures have not harmed long-term corporate performance and have enhanced accountability without significant drawbacks.
I urge the SEC to reject this proposal and maintain mandatory quarterly reporting to protect investors, preserve market integrity, and uphold the high standards that make U.S. markets the world’s gold standard. Thank you for considering my comments.

Sincerely,

John Cunningham

John Douglass — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: John Douglass Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Creating more opportunities for insider trading (which is running rampant in the current administration) must be avoided.
Insider trading is unfair and hurts normal investors.

John Edmundson — Jun 15, 2026
Subject: S7-2026-15 Comment From: John Edmundson Affiliation: Jun. 15, 2026 As an individual investor with over 30 years of experience, I currently manage portfolios for my family consisting of nearly 100 different stocks. I closely follow each company’s quarterly earnings releases, listen to investor calls, and review transcripts to inform my investment decisions. I also maintain a watch list and follow the results of those companies as well.

Having previously worked for a public company, I once believed that less frequent reporting might reduce a short-term quarterly mentality. However, my experience has shown that effective leadership

manages a business properly regardless of reporting frequency. Regular updates provide essential transparency and valuable insights into a company's growth potential.

Reducing the reporting frequency to every six months would significantly limit the information available to investors and make force investors to make less informed decisions. For management teams that choose to bend the rules, a six month reporting period makes it easier for them to do so, which I believe leads to more fraud. Maintaining quarterly reporting is vital for informed decision-making and market integrity.

Sincerely,

John Edmundson

John G. Self — Jun 15, 2026
Subject: S7-2026-15 Comment From: John G. Self Affiliation: Jun. 15, 2026 This rule will well disadvantage, many retail investors. His reflection of administration who seems determined to enhance income inequality. This is bad policy and detrimental to the market.

John Lunt (A Motley Fool, AAII, Retired registered representative - investor) Col, (USAF Retd) — Jun 15, 2026
Subject: File No. S7-2026-15 From: John Lunt (A Motley Fool, AAII, Retired registered representative - investor) Efforts under S7 - 2026-26 to reduce bureaucratic costs by eliminating certain organizational reporting requirements are likely to reduce investor confidence especially during a time of inflation, budget uncertainty, and political strife to the degree that the confidence of educated investors is likely to be shaken. It is not as if systemic stability is likely to be increased by this action but rather that investors will turn to social media for information often judged to undermine stability by advancing information for which corporations are not held in any way accountable but put forth to advance an individual personal opinion. It doesn't appear wise to undermine a regulated system by potentially incorporating "jungle rules" to undermine stability.

John McDole — Jun 15, 2026
Subject: S7-2026-15 From: John McDole Affiliation: Jun. 15, 2026 Giving the greedy CEOs a free pass to loot the company is outrageous. The honist ones have no problem with the current rules. Who is paying for the rule change?

John Milan Preston — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: John Milan Preston Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission: investors deserve clarity, not hidden agendas. I stand with better markets because investing already feels risky, Sec being upfront about their finances not only helps investors make better decisions but easies the mind of the beginner investor to possibly invest more.

John Mims — Jun 15, 2026
Subject: S7-2026-15 From: John Mims Affiliation: Jun. 15, 2026 MAKE IT EVERY MONTH, NOT QUATERLY.

Yahoo Mail: Search, Organize, Conquer

John Mingus Jr. — Jun 15, 2026
Subject: File No. S7-2026-15 From: John Mingus Jr. Dear Secretary, I am writing as a retail investor to strongly oppose proposed Rule S7-2026-15. Eliminating quarterly Form 10-Q filings strips away the transparency I rely on to make safe investment decisions. Waiting six months for financial updates gives institutional hedge funds an unfair information advantage and increases the risk of market volatility. Please maintain the current 90-day quarterly reporting standard to protect common investors.

John Pierce — Jun 15, 2026
Subject: S7-2026-15 Comment From: John Pierce Affiliation: Jun. 15, 2026 Keep the reporting Quarterly. Don't create room for them to steal. This is a mega doller issue. And has been abused in the past.

John Rice Motley Fool Writer — Jun 15, 2026

Jonathan Wright — Jun 15, 2026
Subject: S7-2026-15 Comment From: Jonathan Wright Affiliation: Jun. 15, 2026 I'm Jonathan Wright and I am a software engineer. I am an investor who relies on knowledge of companies for managing my retirement. Without access to quarterly information, it will not be possible to make investment decisions. Many of us have been impacted by fraud in the financial sector since 2001, with Enron. My wife's grandparents retirement was wiped out in the fallout of this, which was supposed to be safe in retirement funds. My own career and journey started right in the middle of the great financial crisis, significantly delaying my own journey to financial stability.

Since the repeal of the remaining protections of Glass-Steagal, financial fraud has become commonplace. Corporate institutions will only follow the letter of the law (if even that) and relaxing the quarterly reporting will only give institutions more opportunities to bury important information. When we relax corporate transparency obligations, the fallout is to average individuals, not investing

insiders. Putting financial stability and retirement at risk for most Americans.

Jone Shilliday — Jun 15, 2026
Subject: File No. S7-2026-15 From: Jone Shilliday I believe the reporting should remain at 4 filings, not 2. As a small business owner I can manage the time to do it. The reporting is easy and quick. The information provided is important for tracking of how a business is doing. Thank you.

Hello SECURITY AND EXCHANGE COMMISSIONERS

I want you to keep quarterly reports. These reports are critical to me being able to make good financial investment decisions.
It is critically important that you keep these quarterly reports available.
How else can stockholders hold a company accountable without this financial tool to manage our investment decisions.

Thank you

Joseph Evans — Jun 15, 2026

Joseph Harley — Jun 15, 2026
Subject: S7-2026-15 Comment From: Joseph Harley Affiliation: Jun. 15, 2026 Business executives change strategies and tactics faster than ever due to rapid technology advancement. The transparency of quarterly reporting must be maintained.

Joseph Laumeyer — Jun 15, 2026
Subject: S7-2026-15 Comment From: Joseph Laumeyer Affiliation: Jun. 15, 2026 Dear SEC Rule Makers,

A lot changes each business quarter. share holders, employees, and the public need to know how publicly traded companies are performing. I serve at a Fortune 50 company. It’s been in the Fortune 100 for at least 20 years. Much of its success is because it reports an unflinching view of the company every quarter. These are true up moments. Companies who want lax reporting standards are more likely to fail because they are not honest with themselves or their stakeholders.

Keep the quarterly reports coming!

Thanks for listening; I anticipate you will make the honest right choice.

Sincerely,
Joseph Laumeyer

Joseph Zoltowski — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Joseph Zoltowski Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I am a CPA who firmly believes that abandoning quarterly reporting will irreparably damage America's reputation as the world's premier financial marketplace. We need to continue with the high

standards to which publicly traded companies are required to observe. Please do not alter these provisions. The SEC is the glue that holds together our system of free enterprise.

Josh Anderson — Jun 15, 2026
Subject: S7-2026-15 Comment From: Josh Anderson Affiliation: Jun. 15, 2026 My name is Josh Anderson and I am a firefighter...I understand that you are trying to change the reporting rules for publicly traded companies from every quarter to every six months. I feel that this will be doing a disservice to owners of stocks, aka company owners of these public companies by keeping us in the dark about what is actually happening with the company I own. I want there to be more transparency and for it to be mandatory, not optional. There is enough fraud and deception going on in our government, lets try and keep the public honest and as fraud free as possible too. Please do not change the reporting structure from quarterly to bi-annually.
Sincerely,

Josh Anderson

Joshua Cantrell — Jun 15, 2026
Subject: S7-2026-15 Comment From: Joshua Cantrell Affiliation: Jun. 15, 2026 Josh Cantrell, NDT Technician.

If anything, reporting should increase. Less reporting allows for greater corruption and fraud. It doesn't save an appreciable amount of money. If a company is burdened by reporting their finances then they should not be in business. Thank you for your time.

Joshua Green — Jun 15, 2026
Subject: SEC Rule Change to Lower Reporting Requirements From: Joshua Green Affiliation: Jun. 15, 2026 It’s stupid policy to lower even the little bit of transparency we have for companies that seem to only want to find each and every way to squeeze hardworking people and put more wealth in the hands of oligarchs. This move is dumb.

Joyce Compton Brown

Joyce Hicks — Jun 15, 2026
Subject: S7-2026-15 From: Joyce Hicks Affiliation: Jun. 15, 2026 Financial responsibility is paramount to investors—who happen to be THE customers! No customers—no buyers—no $$ spent to support products/businesses. Should I choose to put my money into a business, I expect it to be truthful and transparent in all business dealings/decisions. Otherwise, I run a high risk of losing. There will always be those who are upright and willing to do what is right. The opposite is

equally true. I don’t want to be the last person to know a company tanked because it chose to be less than totally honest and transparent where my $$ are concerned. The SEC SHOULD hold all under their purview at the highest standards/accountability. Period. I don’t have to tell you all this. Represent your decisions along the better/best pathway, not the lesser/least. You know the right answer.
Joyce Hicks, Retiree/Investor

Joyce N. Franklin — Jun 15, 2026
Subject: S7-2026-15 Comment From: Joyce N. Franklin Affiliation: Jun. 15, 2026 There is only one reason to change reporting quarterly to biannually: corporate fraud. No to this change. No to fraud/thieft.

Sent from my iPhone

Joyce Paul — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Joyce Paul Affiliation: Jun. 15, 2026 Do not make this change. Quarterly reporting is important. Reporting twice a year did not work before, it will not work now. This is just another way to crush the little guy. Only folks guilty of insider trading will benefit from this.

Judith Serlenga — Jun 15, 2026
Subject: S7-2026-15 Comment From: Judith Serlenga Affiliation: Jun. 15, 2026 It is important to report quarterly because too much can be hidden in six months time, it is necessary to review the financial status of a company so that it remains fiscally responsible to all interested parties. Transparency is important for honest dealings with company assets. Quarterly reporting does that and more for continued maintenance of company growth.

Sent from my iPhone

Judith Zahren — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Judith Zahren Affiliation: Jun. 15, 2026 I am writing to request that investment reporting continue to be quarterly, to allow for more timely intervention in the event that there is a significant downword trend. Changing to a six month reporting cycle could potentially wipe out my small investment portfolio, which would be a devastating blow to my income & net worth. In retirement I am discovering that none of my living expenses decreases and my monthly income does not keep up with those expenses.

Judith Zahren

Juli Reed — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Juli Reed Affiliation: Jun. 15, 2026 My name is Juli Reed. I am 65, & just converted from SSDI to SS as my sole income. I have a small amount ($300k) in the stock market . It allows me to pull $1000/month to add to my $1200/month
from my SS. If I lose up to 50% of my investment I will have to sell my home & hope I DIE before my money runs out. I would like for ANYONE VOTING FOR THIS to have to live on 24k/year before they vote. What is the end game here people? If all, or only
one of the rich folks get ALL the money & ALL the power then what? Why, when those able to afford this already have more than their descendants for 5 generations can't spend what they have, do you want the little bit of money those of us scraping by have

to just exist? Its hard to create/produce for yourself, your business, or your country when you're so stressed & tired from just keeping basic necessities you can't think! Maybe those of us who will be PROFOUNDLY & IRRIVERSABLY affected need to jointly pull
out of the market for a while till y'all get your collective heads out of your backsides & see what devastation is being created. Are you, along with our government TRYING to destroy the people of the US? Because this, in addition to all the other budget
cuts affecting those of us at the bottom end of the economic scale, certainly could be a playbook for how to do it. Do you read this & think, " haha! Poor sucker"? My father served 35 years in the USN. My brother was a Marine. My son was in the Army, my
SIL is presently in the AF. I was a certified medical coder before my job was outsourced, lost my medical insurance causing my RA to be able to destroy my ability to use my hands forcing me onto disability. My family has contributed to this country in money,
body, & soul. Do y'all WANT everyone who isnt rich to just end up on the street or die? If us poor slobs end up on the street we won't be paying taxes of any kind - property, sales, or income & THEN what? Come on, you are SUPPOSED to run things so our
country & people prosper. ALL of us not just the rich. Get it together.

Julie Hipp — Jun 15, 2026
Subject: S7-2026-15 Comment From: Julie Hipp Affiliation: Jun. 15, 2026 Julie Hipp, Retired. To

whom it may concern, This idea of taking away quarterly reports and exchanging them with every six months is absurd! This just allows big companies the opportunity to hide their growth from investors and also gives them them a chance to filter monies away from the public eyes giving them a doorway for more shenanigans! This is a very bad and dangerous idea! Thank you for your time.
Sincerely
Julie Hipp

Julie Laviolette — Jun 15, 2026

Julien Trembley — Jun 15, 2026
Subject: Financial Reporting From: Julien Trembley Affiliation: Jun. 15, 2026 Julien Trembley-Subaru of America: financial reporting as often as can reasonably be required, is absolutely necessary. Quarterly reports are not “too much work” or too much of a hassle.There are employees who handle that kind of thing, that’s literally their whole job. Fiscal accountability should be commonplace, and the SEC has already reversed too many consumer protections, and cannot be allowed to damage the American people any further. Even one reversal was too many. If you go through with this, expect to receive repercussions. We’re done. Listen to the people you serve and align your actions to their will, or suffer. You can’t hide in the age of the internet, no one can. Headquarters are 100 F Street NE, Washington, DC 20549. Anyone can obtain this information. Tread lightly. We will defend ourselves against a corrupt government any way we must. As is our constitutional right. We will not hide. We will not run.

Julien G.P. Trembley

June Amarant — Jun 15, 2026
Subject: S7-2026-15 Comment From: June Amarant Affiliation: Jun. 15, 2026 June Amarant, RN - Pennsylvania
I am against changing the quarterly reporting for these reasons.
Failed product launches, ballooning debt, lawsuits, vanishing customers. Today the law forces companies to surface that information every quarter. Under the new rule, companies can sit on it for six months at a stretch. Plenty of time for insiders to quietly sell their shares to you (or your ETF) before the bad news tanks the stock.
02
More time for fraud to grow.
Enron. WorldCom. Madoff. The run-up to 2008. Every major modern accounting scandal was enabled by gaps and opacity in financial disclosure. Quarterly filings don't prevent fraud, but they dramatically shorten the window in which it can fester before someone outside the company can see it.
Do NOT change the quarterly reporting system.

June Bowie — Jun 15, 2026
Subject: S7-2026-15 Comment From: June Bowie Affiliation: Jun. 15, 2026 June Bowie, administrative support contractor.

KEEP quarterly reporting to maintain transparency and accountability to investors! Most Americans like myself rely on quarterly reporting to make decisions about our retirement savings.

The longer that companies are allowed to delay reporting, the more stock-price volatility and overreaction will occur. Hiding data accomplishes nothing positive for investors, it just hides the consequences that the average American cannot afford to bounce back from.

k whipple — Jun 15, 2026
Subject: S7-2026-15 Comment From: k whipple Affiliation: Jun. 15, 2026 The sec needs to continue to require quarterly reporting by all registered companies in the united states. It costs little to nothing for companies to file quarterly reports. we rely on the sec to help the public keep companies accountable to their shareholders and investors.
we the people rely on these public companies to do business and for our retirement.
thank you
Katherine Whipple, 63109

K. Elizabeth Burge — Jun 15, 2026

Subject: Comment on S7-2026-15 From: K. Elizabeth Burge Affiliation: Jun. 15, 2026 My name is Elizabeth Burge, I'm a clinical social worker for a private agency in Ashland, Kentucky, and I strongly support maintaining quarterly investment reporting requirements for public companies.

I understand the SEC is considering allowing public companies to stop reporting financial results every quarter and instead disclose information only twice a year. America has already experimented with this approach between 1955 and 1970. During that period, lower transparency was associated with lower market valuations and weaker returns for investors.

For ordinary investors like me, this is not an abstract policy debate. A diversified, layered personal investment portfolio is often the primary retirement vehicle available to working-class families as pensions and company-owned investment plans dry up. Reduced transparency in investments historically leads to lower valuations, and ultimately reduced retirement savings.

Price-to-earnings (P/E) ratios matter because a stock's price is fundamentally tied to the company's earnings multiplied by its P/E ratio. When investors have less information and demand a lower P/E multiple, stock prices fall even if earnings remain unchanged.

If the U.S. market were to re-rate from a P/E of 26.7x down to 16.5x, my current portfolio valuation would decrease by over 38%, or approximately $95,506, and I've only been a working professional for just over a decade. Accurate and timely information is the lifeblood of financial markets and security for the economy my family and I are to weather for the next 60 years.

The evidence is clear: markets that require quarterly reporting consistently command higher valuations, while markets that rely on semiannual reporting trade at a cost to investors. The United States should continue to promote transparency, accountability, and investor confidence by preserving quarterly reporting requirements.

As an investor saving for retirement, I urge policymakers to protect the reporting standards that help maintain fair valuations and safeguard the financial futures of millions of Americans.

Respectfully,

Elizabeth Burge

Karen Russaw — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Karen Russaw Affiliation: Jun. 15, 2026 I'm Opposing Semi-Annual SEC Reporting.

Moving from quarterly (10-Q) to semi-annual reporting is a step backward for U.S. capital markets. While intended to reduce corporate burdens, it severely undermines investor protection and market efficiency.

Degraded Transparency: Six months is too long a vacuum in a fast-moving economy. Investors would lack timely data on cash flows and operational shifts, leading to massive, volatile stock price corrections when data is finally released.

Information Asymmetry: Less frequent public data widens the gap between corporate insiders and retail investors. This dramatically increases the risk of opportunistic insider trading and disadvantages everyday shareholders.

Unregulated Alternatives: Eliminating 10-Qs won't stop the demand for data. It will just shift information flow to unaudited press releases or selective updates that lack strict legal accountability.

Trust requires continuous transparency. The SEC must preserve quarterly reporting.

Karen D. Russaw

KAREN SKURIS — Jun 15, 2026
Subject: S7-2026-15 Comment From: KAREN SKURIS Affiliation: Jun. 15, 2026 Karen Skuris, Maine. Quarterly SEC financial reports are extremely important because they prevent insider trading, they ensure accurate stock pricing, and provide consistent transparency for investors. They are important in regulating the market and maintaining public trust

Subject: S7-2026-15 Comment From: Karl Schmitz Affiliation: Jun. 15, 2026 Karl Schmitz, retired, Illinois.

Quarterly reporting must remain to provide a more accurate account of details like financial statements and health of the public company. Reducing to twice a year was tried in the past and didn't work and adversely impacts investors to be able to react with action to their own best

interests.

Regards,
Karl

Retired teacher from Jacksonville, FL

Why reduce quarter reporting signed by CEOs to twice a year? They need to be held accountable regularly by signing their companies' books. It costs them nothing to sign four times per year. As an investor I want my investments and my retirement protected and twice a year signings and Form 8-K does not do that. Keep Sarbanes -Oxley intact.

Karlette Peck — Jun 15, 2026
Subject: S7-2026-15 Comment From: Karlette Peck Affiliation: Jun. 15, 2026 karlette peck, MPH; Physician Associate
Independent Public Health Professional-retired

As a retiree, my I broker needs to watch the fluctuations in the market carefully. Trends are difficult to see unless they are quarterly. Also, they cannot be compared to prior data for comparison. Because of the constant volatility of the markets it is necessary to have quarterly reports for accuracy.

Karyn Feltner — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Karyn Feltner Affiliation: Jun. 15, 2026 Quarterly reporting is important for investors to keep tabs on the companies they are invested in. Yes, I try to makes long term investments, but Quarterly reports keep everyone working for the same goal.

katharina noetzel — Jun 15, 2026
Subject: S7-2026-15 From: katharina noetzel Affiliation: Jun. 15, 2026 I am a retired process engineer. I live off a lifetime of savings and Investments.
The change will make it easier for unscrupulous companies and C-suite officers to play the books and hide malfeasance for much longer, with corresponding risks to the companies, which my retirement may depend on.
Criminals are as common among CEOs and the like as in the rest of the population, and you are giving those more time to potentially destroy the livelihood of employees and everyone relying on companies to be honest.
You will risk the financial health of countless people to give crooks more time to steal a company blind without oversight. If a company is run as it should be, above cooking books and hiding risky behavior they should not have any problem with signing every three months but be happy to prove their correct accounting by adding their names to official documents.

Kathryn Barnes — Jun 15, 2026
Subject: S7-2026-15 From: Kathryn Barnes Affiliation: Jun. 15, 2026 Kathryn Barnes, Retired Corporate Supervisor, Florida 33928

Keep Quarterly reporting!
Imagine being blinded while making daily decisions on your financial future. That's what only reporting every six months would be like.

Quarterly reports (Form 10-Q) allow investors and analysts to track earnings and catch potential issues (like declining revenue or profitability) in a timely manner, which would otherwise be HIDDEN for up to six months.

Market Accountability & Reduced Information Gaps: Regular, reviewed disclosures ensure market INTEGRITY and transparency. Without them, companies have a longer stretch of time possessing material nonpublic information (MNPI), which can complicate insider trading windows and increase

corporate fraud risks.

Our country's companies have ditched the pension and have pushed the responsibility of savings for our livelihood and retirement onto its citizens. TOOLS are needed to make good financial decisions. The stock market is a major part of the wealth building choices. Now these companies are asking for less transparency needed to make individuals and family financial decisions. Don't let this tool (quarterly reports - Form 10-Q) be stripped away!
KEEP QUARTERLY REPORTING!

Kathryn Murphy — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kathryn Murphy Affiliation: Jun. 15, 2026 There is so much fraud going on and right in the middle of this the SEC wants to change the rules in reporting..... Suspicious! Leave the rules the way they are. The more transparency the better off everybody will be, no chance to hide anything at least there will be less chance to hide things from the public.

Kathryn Toronto — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kathryn Toronto Affiliation: Jun. 15, 2026 You need to report quarterly. Alot of evil doing can happen in 6 months time. I owned a tax practice for 30 years. My clients, and friends...all of us depended on quarterly reviews

Kay Cad — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Kay Cad Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Why would you take away information that is vital for retail investors to make informed decisions? It just seems like another way to penalize and disadvantage ordinary people from being in control of their finances, and taking away their agency and power so you can profit the big boys. Quarterly disclosures help me to make informed decisions about what to do with my money. As a retail investor, I utilize this information and taking it away would leave me and may others with a huge disadvantage.

Kay Henry — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kay Henry Affiliation: Jun. 15, 2026 My name is Kay Henry. I'm 78 with only my IRA as my safety net. I need transparancy to help invest safely. Not long term ripoff To hide my choices.

Kay Jones — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kay Jones Affiliation: Jun. 15, 2026 My name is Frances Jones, of Cambridge, MA.

I am a mom, an investor, and a behavioral therapist/teacher. The proposed reporting chabge hurts investors and could leave them holding the bag when a company makes poor business decisions or is losing money. I want to know where my money is and how it’s being used by the companies I invest in. This new rule seems ripe for hiding business mistakes and/or fraud, leaving retail investors like me little opportunity to sell their shares while insiders can sell, leaving retail investors holding the bag.

Kay Krivas — Jun 15, 2026

Subject: Comment on S7-2026-15 From: Kay Krivas Affiliation: Jun. 15, 2026 QUARTERLY! Keeping Informed is invaluable. Transparency always! Never go backwards! Always go forward. Kay, retired educator, Camden County, NJ

Kay Mathias — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kay Mathias Affiliation: Jun. 15, 2026 Kay Mathias, Retired, We should require companies to continue to submit quarterly reports. The practice of reporting quarterly provides the public with greater transparency into companies and reduces the risk of fraud and market manipulation.

Yahoo Mail: Search, Organize, Conquer

Kerri LeMay — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kerri LeMay Affiliation: Jun. 15, 2026 To the Secretary of the Securities and Exchange Commission:

Re: File Number S7-2026-15

I am writing in opposition to the Commission's proposed rule allowing public companies to replace quarterly reporting with semiannual reporting.

As a financial literacy educator, I work to help students and community members understand how to evaluate investments, interpret financial information, and make informed decisions about their financial futures. A core principle of financial education is that investors deserve access to timely, accurate, and transparent information.

Quarterly reporting provides regular checkpoints that allow both experienced and novice investors to monitor a company's performance and identify emerging risks. Reducing the frequency of required reporting would decrease the amount of standardized information available to the public, potentially widening the knowledge gap between institutional investors with extensive resources and everyday investors who rely on SEC filings to make informed decisions.

Financial literacy programs across the country encourage individuals to participate confidently in the financial markets. That confidence depends on trust that information is accessible, current, and consistently disclosed. Moving from quarterly to semiannual reporting may unintentionally undermine those efforts by making it more difficult for individuals to track changes in company performance and compare investment opportunities.
While I recognize the Commission's interest in reducing compliance burdens for reporting companies, I encourage the SEC to carefully weigh those considerations against the importance of investor education and investor protection. If reporting relief is deemed necessary, the Commission should consider limiting it to smaller issuers while maintaining quarterly reporting requirements for larger public companies whose securities are widely held by retail investors.

Thank you for the opportunity to comment on this proposal. I respectfully urge the Commission to prioritize transparency and the informational needs of everyday investors by preserving the existing quarterly reporting framework.

Sincerely,

-Kerri LeMay

Kevin Barhydt — Jun 15, 2026
Subject: File No. S7-2026-15 From: Kevin Barhydt I am writing to voice my opposition to the proposed shift toward semiannual corporate reporting. At its core, equity investing represents true business ownership. As owners, individual investors have a fundamental right to regular, transparent communication regarding the operations, financial health, and strategic direction of the companies they fund. Operating in the dark for half a year severely limits an investor's ability to make disciplined, educated allocation decisions. Taking away standard quarterly reports does not foster long-term thinking; it merely ensures that public owners are less informed about the day-to-day realities of their investments. For the health of the markets and the protection of individual investors, please preserve the current quarterly reporting requirements.

Kevin Blattel — Jun 15, 2026

This is not fair or just, no one should get information ahead of anyone else.

Kevin Heanry — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Kevin Heanry Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission
As an ordinary investor who works two jobs just to pay the bills and have a small savings built up, it is important to have more information on money. Less money will help those who have connections or premium subscriptions to access the data. Friends and family of Wall Street. Word of mouth via private events. Unfortunately, ordinary retail investors don't have this information. We don't even get invites. We just get 5% of our check removed each week hoping to retire some day. When you're trying to make markets safe and secure and need consumer confidence (lack of it is terrible), the last thing you need is less data and transparency. This will cause a bigger economic shift. In fact, some people will be concerned pulling out causing an illiquidity in currency. Currency needs to be liquid. A lack of trust in the markets likely causes consumer pull back (including investments). I know the relevancy is small but this recent IPO strong arm the banks to doing what they needed. So a space company just planted the seed that the companies call the shots, not the institutions. That it's wall streets pleasure to tenure the IPO. Not the companies 4 years of growth and profit among many other things that proves it. So in short, we need more transparency and more safeguards and less rule bending and flexibility for those in the know.

Kevin Kelly — Jun 15, 2026

Kimberly Rice — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kimberly Rice Affiliation: Jun. 15, 2026 Yet another smoke and mirrors move to keep the public in the dark at a time when they so desperately need the transparency and truth from our governments officials. We're trying to Survive, do you understand? Most of us do not have anything like the millions it requires to invest and make millions more in return. All most people can hope for is a few thousands or tens of thousands while those on the inside track have access to better, maybe timely and precise information and are able to rake in millions! Help the people who need it, not those who would make it anyways!!

Kimberly Weast — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Kimberly Weast Affiliation: Jun. 15, 2026 Kimberly Weast, retired, Oklahoma. I have saved money in an IRA my whole working life. I want the best returns and do not want to be cheated out of income.

Kimberly Zink — Jun 15, 2026
Subject: S7-2026-15 Comment From: Kimberly Zink Affiliation: Jun. 15, 2026 As someone who has retirement accounts impacted by corporate reporting, I see absolutely no benefit to the public economy to allowing corporations to hide their financial information for 6 months. Quarterly reporting keeps us informed and keeps corporations accountable. Do NOT change the reporting period term.

Kimmer Petroff — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Kimmer Petroff Affiliation: Jun. 15, 2026 SEC- What are you thinking!? Hx shows reporting 2 X per year impacts Americans and their retirement funds negatively. Hx also shows us many entities can not be trusted when reporting is limited to 2x per year.
I want to know why this decision has been suggested and the economic impact to all Americans.

Kristi Ellefson — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Kristi Ellefson Affiliation: Jun. 15, 2026 Kristi Ellison
Marketing Communications Manager
Seattle, WA

Less transparency and oversight means lower returns and lower valuations. Americans are already struggling and if the meger investors can lose a third, or even half, of our life savings the backbone of America will be wiped out. Rolling back advances and negating the progress we've made will wipe out decades of effort and progress. This is a bad path to go down and will hurt a lot of hard working families and put an addition burden on a struggling economy that is already at its breaking point.

Kristin Berken — Jun 15, 2026

Kym — Jun 15, 2026
Subject: SEC Form 10-Q From: Kym Affiliation: Jun. 15, 2026 As an investor, I strongly support maintaining mandatory quarterly reporting on SEC Form 10-Q. As an individual investor with my own hard-earned capital actively at stake in the market, I rely directly on these timely updates to protect and manage my portfolio safely. Moving to a semi-annual schedule would significantly reduce market transparency, limit crucial data points, and increase information asymmetries between institutional and retail investors.

Maintaining a quarterly rhythm is essential to ensure that the U.S. capital markets remain the most transparent and trusted in the world. A continuous flow of information protects investors and ensures proper market efficiency.

Thank you,
Kimberly Lester

Kym Dean — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Kym Dean Affiliation: Jun. 15, 2026 To whom it may concern:

Making corporations LESS accountable is NOT in the best interest of our citizens! I love how this is being endorsed by a president that has been CONVICTED of fraud on 34 counts AND banned from doing business in New York City! This is to line billionaires pockets, not support us little people.

Please do NOT allow this to happen. This is nothing I voted for. And if this goes through, my retirement in 10 years won't happen because I won't have money left in my 403b or retirement accounts if there is a big hit. We shouldn't have to work until we are dead because billionaires want to become even richer.

Thank you.

Lennett Hollandsworth Retired Finance and Accounting Professional — Jun 15, 2026
Subject: File No. S7-2026-15 From: Lennett Hollandsworth Please do not allow quarterly financial statements to be delayed to a 6 month time period. Due to the speed of current financial transactions from computerization, financial reporting should be done more frequently, not less frequently. Investors need fast reliable information, and delayed reporting in the U S stock Market could cause investors to look to other markets.

Leo DiSanto — Jun 15, 2026
Subject: File No. S7-2026-15 From: Leo DiSanto This is not a good idea. At its heart, investing is ownership. When you own a piece of a business, you deserve regular, transparent communication from that business. Reducing reporting requirements weakens the connection between companies and their owners. Some argue that fewer reports would reduce costs. Maybe. Although in an age of AI and increasingly efficient disclosure tools, even that point is debatable. Others argue it would ease the pressure to manage quarter to quarter. But short-termism comes from how people react to information, not from the information itself. Taking the reports away doesn't make anyone more patient. It just makes everyone less informed. What isn’t debatable is that less information rarely creates better-informed owners. Imagine owning a business and getting updates from your managers only twice a year. It would still run every day. You'd just know far less about how it was doing. That's effectively what's being proposed here. Companies will continue operating every day. Products will be launched. Customers will be won and lost. Strategies will succeed and fail. Yet

under this proposal, owners would receive only half as many official updates about the businesses they own . Less transparency doesn’t eliminate uncertainty. It increases it. And when information finally does arrive, the surprises are likely to be bigger, the reactions sharper, and the volatility greater.

Leo Erickson — Jun 15, 2026

Lina Latvala — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Lina Latvala Affiliation: Jun. 15, 2026 Hello,

I'm writing to voice my opinion on the idea of changing the reporting requirements for companies. I

am strongly against doing so. In my opinion, some companies already get away with as much as possible for profits, and it's much harder for an investor like myself to understand what's really happening if they're reporting less often than quarterly. The change will give people less confidence in the market. There were good reasons for changing it to quarterly, and it should stay that way.

Thank you,

Lina Latvala
Director of Administration
Cambridge, Minnesota.

Linda DeLaughter — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Linda DeLaughter Affiliation: Jun. 15, 2026 I support 100% quarterly reporting. As a retired woman, I depend on my investments in conservative funds to support me as I age. As do millions of other people. Shame on the SEC and Washington to propose disclosure to less than quarterly reports. Such a move would seriously impair trust and investments here - and frankly, I would be making a move to invest overseas if the SEC abandons quarterly reporting.

Linda Diane Pointer — Jun 15, 2026
Subject: S7-2026-15 From: Linda Diane Pointer Affiliation: Jun. 15, 2026 I had my investment account with my company matching stock erased to 0, after a wall Street suit took over as CEO of a 120 year old company. If the federal government can now watch every bank transaction , every Cash App transaction and more, of every day citizens of our great country. (spying) on all of their citizens for any transaction over a certain dollar amount, you best keep a better eye on the big money CEO’s. Because they have some explaining to do. Perhaps quarterly reporting if properly monitored and controlled by an oversight committee will build a better retirement plan for my

grandchildren and great grandchildren. And just maybe restore the confidence in our federal government, at this point in my life I believe we have the best government that money can buy.
. I have no sympathy for the ultra rich CEOs, who have basically stolen my retirement, and perhaps I would not be totally dependent on a Social Security check if the Checks and balances of quarterly reporting had been in effect.I have lived long enough to have witnessed CEOs getting away with everything except murder and possibly even got away with that, I believe firmly that they need to be held accountable on every front, and especially in financial matters. Because that is all that matters to them. Sincerely, LD Pointer, Texas retired commission sales associate of two major retail businesses of over 130 years. Stripped bare by their CEO's hold them accountable. Pro.Quarterly.

Linda Lundquist — Jun 15, 2026
Subject: S7-2026-15 Comment From: Linda Lundquist Affiliation: Jun. 15, 2026 To require less than quarterly reporting is anti-American. To require less encourages hiding reality from investors & the public, “cooking the books” and generally getting into the kind of trouble irresponsible businesses were getting into prior to the 2008 crash & massive bailout. DO NOT RELIEVE BUSINESSES OF QUARTERLY REPORTING!

Subject: Comment on S7-2026-15 From: Linda Worman Affiliation: Jun. 15, 2026 Information is power. Don't let them take anymore power, and still use my money.

LindaBurgy — Jun 15, 2026
Subject: S7-2026-15 Comment From: LindaBurgy Affiliation: Jun. 15, 2026 I oppose letting public

companies report every six months instead of quarterly. Quarterly data is essential for retail investors to make informed decisions, and longer gaps give corporate insiders an unfair advantage while leaving the rest of us in the dark. The modest compliance savings for companies don't justify the cost to investor transparency, and there are other ways to reduce reporting burdens without hurting the people the SEC is meant to protect.

Lisa E. — Jun 15, 2026
Subject: S7-2026-15 Comment From: Lisa E. Affiliation: Jun. 15, 2026 Dear Sir or Madam,

Are you kidding? Reduce corporate reporting to twice per year? This does a disservice to all of us trying to make decisions with our life savings. Life -and finances- are fluid; things happen quickly. Reducing reporting responsibilities only benefits corporations and the very rich..... not us. Please drop this ridiculous idea.

Thank you for listening.

Lia Eresman

Lisa Engebretson — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Lisa Engebretson Affiliation: Jun. 15, 2026 At a time when we are awash in data centers and advanced computer software, it is simply ridiculous to accept that corporations should not report their financials four times a year. We know they are looking at these same numbers internally with great scrutiny to make decisions on how to run their companies on an ongoing basis. There is no rational reason to reduce reporting from quarterly to semi annually except to hide underperformance and malfeasance from the public investors. The insiders will have all of the data and can trade accordingly. I imagine I will not be the only investor to pull my money out of the market.
Do not allow this change to go forward. What we have is working fine. Why fix something that is not broken? The only answer is to benefit an elite group who are pushing for this change. The vast majority of American investors have not asked for this and do not support it. Please act as fiduciaries in the best interest of the larger population rather than catering to a small group of elites.

Liz Boika — Jun 15, 2026
Subject: S7-2026-15 Comment Against Ripping Off The People From: Liz Boika Affiliation: Jun. 15, 2026 I am Liz, a data analyst living in NYC. I have personally seen the effects of keeping information out of the hands of people who are forced to make choices blind, and it isn't pretty. By what possible logic is it better for anyone but shady companies with something to hide to allow even less frequent reporting? This is just another pathetic and frankly insulting attempt to leave those who aren't in the club holding the bag for bad financial decisions made by multimillionaires. Taxpayers have bailed out enough failing corporations as is. There is absolutely no need to make it even easier for them to profit off innocent and hardworking Americans. How much more can this country get on it's knees for Wall Street? Enough protecting and benefiting people who wouldn't spit on their own employees if they were on fire. Mandated reporting any less than quarterly is the law of criminals in action.

Liz Gold — Jun 15, 2026
Subject: S7-2026-15 Comment From: Liz Gold Affiliation: Jun. 15, 2026 Kathryn Gold, retired, live in New Mexico. I am an investor, and I want a fair deal. Don’t let companies hide their financials, so insiders can make fortunes off our backs! This is unfair and un-American. I am sick of the superwealthy making money off of the rest of us. Please keep quarterly statements required!

Kathryn Gold
Chimayo, NM

Liz H — Jun 15, 2026
Subject: S7-2026-15 Comment From: Liz H Affiliation: Jun. 15, 2026 Quarterly reporting keeps companies honest and ensures shareholders and potential shareholders have a clear view of what they're investing in and how those business are doing.

Lengthening the time in which public companies can keep their books private puts investors at risk and heightens the potential for fraud. I stand firmly against anything that reduces the corporate financial reporting responsibilities.

Best,
Liz James

Liz Kashurba — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Liz Kashurba Affiliation: Jun. 15, 2026 In today's society, the world changes it milliseconds. I encourage you not to fall back to the twice a year reporting as it will not be able to keep up with the changes happening so rapidly . Transparency is needed. Thank you.

Sent from my iPhone

Liz Rochefort — Jun 15, 2026
Subject: S7-2026-15 Comment From: Liz Rochefort Affiliation: Jun. 15, 2026 My name is Elizabeth Rochefort and I have worked hard for 40+ years to save and invest my hard-earned money to fund my retirement and provide for my family now and in the future, just like the American dream we were sold.

But there is too much corruption, greed and incompetence threaded throughout corporations and our financial systems for us to stop shining a quarterly light on their activities.

The so-called savings to companies from a semi-annual filing would be modest at best, and allow fraud and poor decisions to severely impact the investors and employees these companies serve.

I use quarterly filings to make investment decisions and ensure that my hard-earned money works for me and my family. Being close to retirement age, this is literally how I and millions of other Americans will afford housing, food, medical care and transportation so I am not a burden on the government or the next generation.

Semi-annual filing is not a global standard - countries that have tried this are learning the hard way that volatility and secrecy are damaging their markets and returns.

A change to semi-annual reporting benefits no one but those who seek to keep investors in the dark about problems and fraud, and you, as the entity that is legally charged with protecting investors, must do your fiduciary duty and not allow secrecy to negatively impact the economy and individual investors' accounts.

Thank you for your consideration.

Liz Rochefort

LK — Jun 15, 2026
Subject: Comment on S7-2026-15 From: LK Affiliation: Jun. 15, 2026 Lesli Kwiatkowski, former CPA, SEC Reporting Manager. Quarterly reporting is the only true standard for transparency and requires robust accounting and reporting systems for the simplest to the most complex businesses. Moving to a 6 month requirement would reduce the confidence of investors and therefore reduce the capital accessibility of firms. This proposed change would be irresponsible as the regulatory body overseeing fair, orderly and efficient markets and protecting investors.

LLB — Jun 15, 2026

Loria Hubbard — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Loria Hubbard Affiliation: Jun. 15, 2026 Loria Hubbard, AARP Tennessee East Associate State Director, Outreach and Engagement.

I have worked for nonprofit organizations for most of my career. These jobs have not paid the best but have provided deep satisfaction. I have struggled to save for retirement. Right now, I have a fair little nest egg to help cover expenses in retirement. If you change to a semi-annual reporting, and I lose 1/3 of my savings that will be devastating. Please do not do this. I suspect it will somehow benefit billionaires. However, the majority of voters who will all lose money through this approach, are not billionaires. Shame on you.

Lorraine Caldwell — Jun 15, 2026
Subject: S7-2026-15 From: Lorraine Caldwell Affiliation: Jun. 15, 2026 It's imperative that quarterly

reporting remains in affect. I worked in accounting for a large corporation and they are looking for any chance to make things look better than they are.

Lorraine Hightower — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Lorraine Hightower Affiliation: Jun. 15, 2026 Lorraine Hightower, Procurement Manager, Arizona. Research shows that quarterly reporting provides investors with more context and perspective when interpreting corporate earnings. It is the "lifeblood of financial markets," keeping a level playing field between insiders and outside shareholders. Investors receive timely updates on shifts in business strategy, new executive hires, or product launches. This prevents major issues from compounding over a six-month period before the public is alerted. The frequency of 10-Q filings supports greater investor confidence and allows institutional investors to continually reassess market risks and opportunities. Please don't change the frequency.

Lorraine Kay — Jun 15, 2026
Subject: S7-2026-15 Comment From: Lorraine Kay Affiliation: Jun. 15, 2026 Lorra K. I'm a retired teacher and I rely on my investment acct to sustain me through my remaining years. If I'm not updated at least every quarter, there may be signs I will miss that may change how I want to invest or if I should make changes. Every six months is detrimental to every investor and also the brokers. One negative occurrence could put both in jeopardy. This change must not be approved. KEEP QUARTERLY REPORTING!

Louis Rueda — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Louis Rueda Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I oppose Rule S7-2026-15 as written, but I would support an exemption for small-cap and emerging growth companies. Smaller companies often face disproportionate compliance costs, while larger public companies have the resources and investor base that justify quarterly reporting. A targeted exemption would reduce regulatory burdens on small businesses without sacrificing transparency and accountability for most investors.

Louise Phetteplace — Jun 15, 2026
Subject: S7-2026-15 Comment From: Louise Phetteplace Affiliation: Jun. 15, 2026 Dear SEC, I believe the rule of quarterly reports has served the financial community very well since it was put in place. The world changes at a an ever quickening pace with the internet and information networks around the world communicating constantly. The Public needs to know at a minimum quarterly of what is going on in each company so we can better plan our own finances. I know other companies like actuaries for insurance companies use this information. The more I think about it, the more I realize things change so fast, maybe they should increase the reports to once a month. Do not change this. Please ....why break something that's not broken?

Love and Peace,
Louise

Lowry Brott — Jun 15, 2026

Lucy Asher — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Lucy Asher Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
It is imperative that as a regulatory agency, you safeguard transparency. Regular Americans will be most impacted should the passing of this proposal allow fraud to go on longer than usual.

Lucy Chen — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Lucy Chen Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I am writing to oppose the proposed rule (Release Nos. 33-11414; 34-105368; File No. S7-2026-15) that would allow public companies to shift from quarterly to semiannual reporting.
For over 50 years, quarterly disclosures have been the foundation of a fair and transparent U.S. capital market. They give ordinary investors the timely, reliable information they need to make informed decisions about where to put their money. This proposal would cut that information flow in half — leaving retail investors without key financial data for six months at a time.
The stated goal of reducing compliance burdens on companies is understandable, but the cost is borne by everyday investors. While institutional investors and large funds have direct relationships with management and access to investor relations teams, individual investors depend entirely on public filings. A six-month gap in mandatory disclosure creates a two-tiered market: insiders and institutions who can obtain information informally, and everyone else who must wait.
The 2018 public comment process on this same question showed that the investor community broadly supported retaining quarterly reporting. Those concerns remain valid today. The Commission should protect investor access to information — not reduce it in the name of corporate

convenience.
I urge the Commission to reject this proposal.

Lucy Long — Jun 15, 2026
Subject: S7-2026-15 Comment From: Lucy Long Affiliation: Jun. 15, 2026 Quarterly reporting is necessary to be accountable. That done correctly and efficiently on time hopefully assures us that you are taking care of business honestly and that you care about integrity. This skirting of laws and accountability so you can profit is an insult to citizens. We all are watching now so heads up!

Lucy Wolfe — Jun 15, 2026
Subject: S7-2026-15 Comment From: Lucy Wolfe Affiliation: Jun. 15, 2026 I'm a public school employee and I need to know how my retirement dollars are being invested. Companies should be transparent in their dealings so investors know what the are investing in. If they are not being transparent how will investors know if they are putting their capital behind a trustworthy company? I can not afford to lose money from corruption in a company.
Sincerely,
Lucy A. Wolfe

Luther Harris — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Luther Harris Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Quarterly disclosures are one of the most important tools I use when making investment decisions. They provide timely updates on a company's financial performance, business risks, cash position, and management's outlook. As an individual investor, I rely on this information to evaluate whether a company is executing on its strategy and whether my investment thesis remains valid.
Reducing or eliminating quarterly disclosures would make it harder for everyday investors to access current, transparent information and would increase the advantage held by large institutions with greater resources. Regular reporting helps create a fairer market by ensuring all investors have access to the same material information at the same time.

Luz Diaz — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Luz Diaz Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Continue to help us novices understand what we're investing our hard earned money into. With quarterly reports it is easier to decide if the plan is correct for our retirement planning.

Lyndon Froud — Jun 15, 2026
Subject: S7-2026-15 Comment From: Lyndon Froud Affiliation: Jun. 15, 2026 Lyndon Froud. CEO of my retirement portfolio. Information is paramount to good decision making when investing. The more information I have and the frequency I have access to it is critical for determining the future of each of my holdings. The longer the period between reporting allows for corporate fraud to go undetected for longer or for critical corporate financial information to reach me that affects my buy and sell decisions. The insiders with access to Trump's war/no war rhetoric prove how successful having access to information in trading can be. This proposal does the opposite…keeps the average investor in the dark longer which will cause them to hold poor companies longer and incur more significant losses. When do the insider trading indictments of Trump's cronies start dropping, by the way?

m lloyd — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: m lloyd Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Just have companies be transparent, and with almost realtime dissemination of information via blockchain powered financials accessible realtime, (slight lag, eg. 1-10mins), or publish running figures as they are generated, reviwed and authenticated, to secure site with individuals allowed access. More TRANSPARENCY is going to be the differentiator. And full corp. reports can be buoyed with quarterly.mini-updates. Crikey, all these Billions in AI invested and corps. can't leverage and authenticate data feeds to give the average Joe/Jane some current figures on how things are going with those (the companies) who are the key factor in the protection and growth of their hardearned savings /investments?
If co's want 6months between financial.updates, go private and take all the time you want.

M McManus — Jun 15, 2026
Subject: S7-2026-15 Comment From: M McManus Affiliation: Jun. 15, 2026 With all of the tech advances being made, some at extreme environmental and community cost, quarterly reporting is not too much to ask from publicly traded corporations. I personally prepared quarterly reports for a private mortgage banker for NYS as their full charge bookkeeper and HR administrator. There is no public benefit to this and may even result in job losses and increased opportunity for fraud. Mary McManus, NYS Senior Auditor

Maggie Rico lira — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Maggie Rico lira Affiliation: Jun. 15, 2026 When does the grift stop with the Trump administration? This regime will stop at nothing in their redistribution of wealth from the average American to Trump's wealthy friends/corporations. As most Americans suffer due to the Trump inflation, yet again we, the voters, are being blindsided into losing more of our hard earned money because of policies like this that promote less clarity. Quarterly reporting protects everyone and keeps businesses honest. What is this administration trying to hide? Historically 6 month reporting has helped the rich get richer by taking away from the rest of us. As a voter and as a worker, I can definitely see that Trump and his minions do not help me or others like me as they keep coming up with more policies that hurt not help the American people. Do not change this rule because I will definitely remember this when I go vote. There are more and more people who are dissatisfied with this administration for policies like this that only help the top 1-5% and totally disregard the majority of voters.

Marco Guzman — Jun 15, 2026
Subject: S7-2026-15 Comment From: Marco Guzman Affiliation: Jun. 15, 2026 In today's market where companies can rise and fall within weeks or months, having timely information to make an informed decision is key for the sustainability of the market. Furthermore, we are seeing how markets overreact to the slightest uncertainty even in the current environment. Making reporting requirements semiannual would create another layer of uncertainty that would make the investors "guesstimate" the financial results of companies, thus creating a change in the way news are assimilated by the markets. Further, we should also look at the impact it would cause since the US is the leader in the Global markets, so there is a ripple effect that our decision would have on the markets globally, amplifying the impact of any change we make.

Marcus Green — Jun 15, 2026
Subject: S7-2026-15 Comment From: Marcus Green Affiliation: Jun. 15, 2026 Plain and simple, quarterly reporting must remain! Accountability is of the imperative. When there's less accountability and less reporting there's more opportunity for fraud.
Quarterly reporting increases greater transparency.

Marcus L. Green

Marg Gotwald — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Marg Gotwald Affiliation: Jun. 15, 2026 They tried this twice before and it didn’t work. Is Trump really trying to bankrupt this country? He has put this country into a terrible hole already with his stupid illegal war and other decisions that were made. This country elected a man who declared bankruptcy five or six times? Don’t do it.

Sent from my iPhone

Margaret Casey — Jun 15, 2026
Subject: S7-2026-15 Comment From: Margaret Casey Affiliation: Jun. 15, 2026 Transparency is essential for stakeholders. If there's nothing "wrong" with the quarterly reports, then why take them away? And if there is something wrong with them, isn't that a reason for disclosure? Keep them quarterly and transparent.

Margaret Daly — Jun 15, 2026
Subject: S7-2026-15 From: Margaret Daly Affiliation: Jun. 15, 2026 M. Daly, Retired, Florida. The

reports need to remain quarterly to keep these CEOs honest. They've already stolen enough from us. Also, they need to pay thier part of thier taxes, not try to have someone put it on the middle class.

Margaret Damage — Jun 15, 2026

Mark Atkinson — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mark Atkinson Affiliation: Jun. 15, 2026 There seems to be a large movement in corporate America toward NDAs and other means of hiding their business practices from the public. Does the SEC represent big corporations and billionaires or the American people? Your decision on quarterly reports will not go unnoticed. This could reverberate in elections for many years to come.

Mark Atkinson

Mark Deaton — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mark Deaton Affiliation: Jun. 15, 2026 To Whom it May Concern:

I don't like the idea of less transparency when it comes to the companies I rely on for my retirement

investments. As I understand, this longer reporting period hasn't worked out all that well in the countries that have tried it. It may be voluntary, but I'd imagine that those most motivated to hide problems are most likely to opt in to this. As a retiree, I keep up on my quarterly reports. I want to be able to see problems coming before they arrive. Please don't make this change.

Thank you,
Mark Deaton

Mark Hendrix — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mark Hendrix Affiliation: Jun. 15, 2026 Mark Hendrix, Head of Partnerships

As an investor who works outside the financial industry, I rely on regular information to help me understand what’s going on in my portfolio and the broader market. This rule change would cause me to invest in other opportunities away from the American market where I have a greater opportunity to trust that my investments are handled legally and ethically. In short, I believe this role change would erode confidence in the market and hurt investors and legitimate businesses from accessing the capital they need to grow.

Thanks,

Mark Hendrix

Mark Kendall Treasury Services Manager and CTP — Jun 15, 2026
Subject: File No. S7-2026-15 From: Mark Kendall Greetings. I strongly opposed changing from the quarterly reporting. The economy and global markets change so quickly that more reporting is needed, not less, in order to discern changes in the success of corporate strategy. Corporate leaders need to stay accountable. Frequent reporting also reduces stock price volatility and the potential of insider trading. Please leave the reporting schedule as is. Corporate America also doesn't need another big change to process and systems. Fight for reducing taxes and regulations, but leave reporting alone. Thank you.

Mark Kennedy — Jun 15, 2026

Mary Ann Yale — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Mary Ann Yale Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I appreciate the opportunity to invest when I feel that I can however it seems that Wall Street and high end investors get the better chance first. It makes it a rush to get in before any profits can be realized. Insider trading is another problem. Sometimes one is not always able to jump in at first notice of a buy. There is always a rush to beat those in the know before all the profits are gone, and the information doesn't come out until much later than to others. It has always been unfair on my opinion.

Mary Anne Morrone — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Mary Anne Morrone Affiliation: Jun. 15, 2026 I am writing to advocate strongly for the preservation of current quarterly financial reporting requirements for publicly traded companies. This regulatory standard is not merely a formality; it is a cornerstone of investor protection, market transparency, and sound financial stewardship.

The dynamic nature of global markets dictates that critical financial shifts can unfold rapidly. Allowing a six-month interval between official disclosures would expose individual investors to undue risk, as their personal financial positions could be severely compromised by unforeseen corporate developments or market volatility. Investors entrust their hard-earned capital to companies with the reasonable expectation of timely and comprehensive insight into how their resources are being utilized and managed. This fundamental principle of accountability demands more frequent updates than semi-annual reports.

Furthermore, professional financial planners and advisors rely on consistent, granular data to

perform accurate trend analyses, assess corporate health, and make informed recommendations to their clients. Diluting the frequency of reporting would significantly hinder their ability to safeguard client interests, adapt investment strategies, and contribute to overall market efficiency. A transparent flow of information empowers investors to adjust their support for a company based on real-time performance rather than outdated figures.

I also wish to address the common assertion that quarterly reporting presents an excessive administrative burden on companies. As a retired cost accountant with extensive experience in a major corporate environment, I can confidently state that, with modern accounting systems and well-established internal processes, the compilation and dissemination of quarterly financial statements is a standard and efficient operational task. It is a reasonable and attainable expectation, not a prohibitive cost or an insurmountable challenge for any company committed to responsible governance and shareholder engagement.

Therefore, I urge that the existing quarterly reporting requirements be maintained. They are indispensable for fostering investor confidence, ensuring corporate accountability, and promoting a healthy, well-informed financial ecosystem.

Sincerely,

Mary Anne Morrone
Lakeland, Florida

I am retired and rely on savings and investments.

Mary Hart — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mary Hart Affiliation: Jun. 15, 2026 Mary Hart, Investor
Human nature drives us to be either the best or the worst. By allowing companies NOT to file quarterly reports opens the door to all sorts of bad practices. As a consumer and investor, quarterly reports are my way to know what company management is doing and how they are doing it. It is a big way to keep management honest. There is precious little honesty in our government currently and this is giving rise to dishonesty in our corporations, as seen in the rules change for the SpaceX IPO.
Do the right thing and keep quarterly reports required for ALL publicly traded companies.
Sincerely
Mary Hart

Mary Kay Bolger — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mary Kay Bolger Affiliation: Jun. 15, 2026 Mary Kay Bolger - retired. Quarterly reporting provides accountability and transparency to investors - there is nothing onerous to companies in providing this reporting - why would the SEC be in favor of LESS

transparency for the public? The SEC is tasked with PROTECTING investors and maintaining fair and efficient markets - doing away with quarterly reporting seems to be in direct opposition to the very definition of what the federal agency is tasked to do - is this another symptom of our broken Presidency?

Marybell Rizzo — Jun 15, 2026
Subject: S7-2026-15 Comment From: Marybell Rizzo Affiliation: Jun. 15, 2026 I, Mary Rizzo, am writing to respectfully convey my substantial concerns regarding the proposed alteration from quarterly to biannual investment reporting. With over three decades of dedicated service as a nurse and a military veteran, I have diligently managed my finances and meticulously saved for my foreseeable retirement.

Throughout my career, I have relied on quarterly investment reports as an essential instrument for maintaining critical financial transparency and ensuring diligent oversight of my long-term savings. The current economic climate, characterized by significant volatility and unpredictable market fluctuations, underscores the paramount importance of timely financial information. A transition to biannual reporting would considerably diminish investors' ability to monitor the performance of their portfolios, identify emerging trends, and make informed adjustments necessary to safeguard their retirement assets effectively.

Maintaining robust transparency through quarterly reporting is not merely a preference, but a fundamental requirement for sound financial stewardship and fostering investor confidence. I respectfully urge you to thoroughly consider these points, along with the feedback provided by other concerned stakeholders, before implementing any changes that could negatively impact the financial security of individuals who have dedicated their lives to service and prudent saving.

Thank you for your time and serious consideration of this vital matter.

Marybeth Harvey — Jun 15, 2026
Subject: S7-2026-15 Comment From: Marybeth Harvey Affiliation: Jun. 15, 2026 This invites

Matthew Koppelman — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Matthew Koppelman Affiliation: Jun. 15, 2026 I write as a Certified Financial Planner and co-founder of a financial planning firm affiliated with LPL Financial, serving individual investors and retirees. My practice is built on a fiduciary standard, and my comments here are offered from that perspective: what serves the best interests of the investing public.
I appreciate the Commission's stated intent to reduce compliance burdens and encourage longer-term corporate thinking. Those are legitimate goals. However, I am not convinced that reducing disclosure frequency from quarterly to semiannual achieves either one -- and I am concerned it may meaningfully harm retail investors.
My primary concern is that less frequent mandatory disclosure widens the information gap between corporate insiders and public shareholders. Non-public information becomes more valuable precisely when it is disclosed less often. The retail investors I serve (the ones without Bloomberg terminals or access to institutional relationships) are the most exposed to that asymmetry. They are also the investors least able to absorb the valuation surprises that would arrive in concentrated, twice-yearly disclosure events.
The coexistence of quarterly and semiannual filers will also introduce comparability challenges for investors and analysts accustomed to a uniform reporting cadence across industries and peer groups. This fragmentation of the disclosure landscape creates its own costs, many of which will be borne by investors rather than issuers.
I would encourage the Commission to consider whether technology-enabled continuous or more frequent disclosure could better serve both goals simultaneously: reducing the outsized market reaction to any single reporting event while expanding, rather than contracting, the information available to the public.
The goal should not be to make public companies look more like private ones. It should be to give all investors (not just insiders) a fair opportunity to understand what they own.
Thank you for the opportunity to comment.

All the best,

Maureen Horan — Jun 15, 2026
Subject: S7-2026-15 Comment From: Maureen Horan Affiliation: Jun. 15, 2026 Keep Quarterly Reporting a requirement.

I am an educator, and quarterly reports matter, and not just to hold teachers accountable.

Quarterly reporting matters because it creates a regular, standardized checkpoint for measuring performance, identifying problems, and making decisions before a full year has passed—in every industry.

Think of it this way: if you only checked your bank account, your grades, your health, or your business once a year, you could be headed toward a disaster for months before noticing it. Quarterly reporting provides feedback every three months.

The Downside: "Quarterly Capitalism"
Critics argue that quarterly reporting can create excessive short-term thinking.
A CEO may:
* Cut research spending
* Delay maintenance
* Reduce staffing
* Prioritize immediate profits

simply to make the next quarter's earnings look better.

This criticism is especially common when discussing publicly traded companies.

In Any Organization Quarterly reviews help answer:

* Are we meeting our goals?
* Are revenues, costs, or productivity changing?
* Are there emerging problems?
* Do we need to change plans?
* Are resources being used effectively?

Examples:
* A school district reviews quarterly budgets to avoid overspending.
* A nonprofit checks donations and expenses.
* A manufacturing company monitors production and defects.
* A family might review spending every quarter to stay on track for savings goals.

The key benefit is **course correction before small problems become large ones**.

Why It Matters So Much in Finance and Economics is because Finance is fundamentally about expectations of the future. Investors, lenders, regulators, and policymakers need frequent information.

1. Investors Need Current Information
Public companies release quarterly earnings reports showing:
* Revenue
* Profit or loss
* Debt levels
* Cash flow
* Future outlook

For example, if a company expected $10 billion in sales but only made $8 billion, investors may reassess its value immediately.

This is why stock prices often move dramatically after earnings reports.

2. Markets Need Transparency because Without regular reporting:
* Executives could hide problems for longer.
* Fraud becomes easier.
* Investors would have less confidence.

Major scandals such as those involving Enron helped reinforce the importance of frequent financial disclosure.

3. Governments Monitor Economic Health & Many key economic statistics are reported quarterly:
* GDP growth
* Corporate profits
* Business investment
* Productivity

For example, quarterly GDP reports tell policymakers whether the economy is:
* Growing
* Slowing
* Entering recession
* Recovering

Central banks such as the Federal Reserve use this information when considering interest-rate decisions.

4. It Influences Tax Revenue and Budget Planning helping Governments estimate:
* Income tax collections
* Payroll tax collections
* Corporate tax collections

Quarterly data helps officials adjust spending and borrowing plans rather than waiting until year-end.

Why Quarterly Reporting Matters for Social Security because policymakers track:
* Payroll tax collections
* Benefit payments
* Trust fund balances
* Demographic trends

Regular reporting helps identify whether revenues and expenditures are diverging and how quickly trust fund reserves are changing. Waiting until annual reports would make it harder to respond to emerging financial pressures.

The Big Picture
Quarterly reporting exists because
**three months is frequent enough to spot trends and problems early, but not so frequent that organizations spend all their time reporting instead of operating.
**It is a compromise between real-time monitoring and annual accounting, providing a rhythm for accountability, planning, and informed decision-making.

Keep Quarterly Reporting a Requirement.

Kind regards,
Maureen Horan

Me — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Me Affiliation: Jun. 15, 2026 I think that rolling back reporting transparency would make voters further distrust the government at a time when we are already disgusted with the fraud and lies we are being told. SEC reporting needs to be held to the same standards as we expect from banking and other entities. It is disgusting enough that I have paid into social security at the max for nearly 40 years to be told I will not be getting the amount I

was promised, but as I get closer to retirement age I am now also in danger of losing the money I have invested as well? I cannot believe in a world of AI reporting availability that the SEC would even propose going with less transparency

Subject: S7-2026-15 Comment From: mehlnon Affiliation: Jun. 15, 2026 My name is Megan Horn, and I am a member of the Florida Bar in good standing (admitted to practice in 2012). I encourage the SEC to keep the current regulations that require corporations to report their earning and the "health" of their financial standing on a quarterly basis. This reporting is imperative for investors, wealth managers, and the health and integrity of the American Stock Exchange. Quarterly reporting also enables the SEC to do its job properly, by providing a means of continuing oversight and verification. Please continue to enforce and require quarterly reporting. Thank you.

Mezchelyn Ellis — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Mezchelyn Ellis Affiliation: Jun. 15, 2026 To the

Securities and Exchange Commission:
I oppose SEC File Number S7-2026-15 because I believe reducing reporting frequency from quarterly to semiannual reporting would harm ordinary investors.
Most Americans work hard throughout their lives and invest their savings so they can retire with dignity, remain independent, and avoid becoming a financial burden on their families. Those investors depend on timely, reliable information to make informed decisions about their retirement accounts and investments.
Public companies benefit from access to public capital markets. In return, investors deserve regular transparency. Moving from quarterly reporting to semiannual reporting would double the amount of time investors may have to wait for detailed financial information. In today's fast-moving economy, six months is a long time for investors to be left with less visibility into a company's financial condition and risks.
While large institutions often have access to management meetings, analysts, and other resources, individual investors rely heavily on SEC filings. Reducing the frequency of required reporting would disproportionately disadvantage retail investors and could increase information gaps between ordinary shareholders and sophisticated market participants.
I am also concerned that less frequent reporting could make it more difficult to identify financial problems, governance issues, or deteriorating business conditions in a timely manner. Transparency is one of the foundations of investor confidence in U.S. markets.
The SEC's mission includes protecting investors. In my view, requiring less frequent disclosure moves in the opposite direction. The burden of preparing quarterly reports should not outweigh the importance of providing investors with the information they need to make informed decisions about their savings and retirement security.
For these reasons, I urge the Commission to reject the proposed rule.

MFA, AIMA, SIFMA Asset Management — Jun 15, 2026
June 15, 2026
Vanessa A. Countryman
Secretary
Securities and Exchange Commission
100 F Street NE
Washington, DC 20549
Re: Request for Extension of Comment Period for Proposed Rule on Semiannual Reporting (Rel. Nos. 33-11414; 34-105368; File No. S7-2026-15)
Dear Ms. Countryman:
The undersigned associations (the "Associations")1 write to request that the Securities and Exchange Commission ("SEC" or the "Commission") grant an extension of 60 days of the comment deadline, from July 6, 2026 to September 4, 2026, for the above-referenced rule proposal regarding semiannual reporting (the "Proposal"). The Proposal would allow reporting companies to elect to file semiannual reports on new Form 10-S in lieu of quarterly reports on Form 10-Q.2
The comment deadline falls on the first business day following the nation's commemoration of the 250th anniversary of the signing of the Declaration of Independence: a milestone the White House has described as "the most important milestone in our country's history."3 Market participants, issuers, investors, and their advisers will understandably be occupied with events and commitments surrounding this historic occasion.4 The Commission has also recognized in prior rulemakings that extensions are
1 Descriptions of the Associations are included in Appendix A.
2 SEC, Semiannual Reporting, Sec. Act Rel. No. 33-11414, 91 Fed. Reg. 24968 (May 7, 2026),

avail. at https://www.govinfo.gov/content/pkg/FR-2026-05-07/pdf/2026-09095.pdf.
3 The White House, Freedom 250, https://www.whitehouse.gov/freedom250/ (last visited June 15, 2026). avail. at https://www.whitehouse.gov/freedom250/.
4 See Mark T. Uyeda, Comm'r, SEC, Statement on Reporting of Securities Loans (Oct. 13, 2023) (criticizing the Commission's reliance on abbreviated comment periods, including comment windows overlapping major holidays, as insufficient to permit meaningful public engagement on complex, interrelated rulemakings), avail. at https://www.sec.gov/newsroom/speeches-statements/uyeda-statement-securities-lending-101323; see also Hester M. Peirce, Comm'r, SEC, Rat Farms and Rule Comments appropriate where proposals raise complex and interrelated issues. Providing additional time here would be consistent with that practice and would facilitate a more complete and informative comment record.

A. Importance of the Proposal to market participants

The Associations' memberships include a diverse set of investment advisers and fund managers, servicing institutional, high-net worth, and retail clients. Investment advisers' strategies depend on timely, consistent, and comparable public company disclosure, including disclosure of financial information. The Proposal would fundamentally restructure a disclosure framework that has required quarterly reporting by U.S. public companies for more than 55 years.

If adopted, the proposed reforms will have profound consequences for issuers, investors (both institutional and retail), and the functioning of U.S. capital markets. It would alter the frequency with which investors receive material financial information and fundamentally change the information environment upon which investment decisions are made. Accordingly, the Proposal raises significant issues for the Associations' members and their clients, including the timeliness and completeness of information available to market participants, the comparability of issuer disclosures across reporting regimes, and the functioning of public markets that have relied upon regular, quarterly disclosure.

B. Need for additional time to synthesize member views and develop empirical data for the Commission

The Proposal raises complex legal, economic, operational, and market-structure questions requiring consultation across investment, risk, compliance, and operational functions. The current comment period does not provide sufficient time to fully solicit and synthesize the member views of each Association or provide the Commission with a comprehensive industry perspective.

More fundamentally, the Proposal raises important empirical questions regarding the role quarterly reporting plays in promoting market transparency, price discovery, capital formation, and investor protection. Meaningful comments on the Proposal require more than anecdotal views; they require empirical analysis, consultation with market participants, and careful evaluation of the extensive academic literature regarding the effects of reporting frequency. A 60-day extension would allow the Associations and their members to develop data-driven evidence regarding the importance of quarterly reporting (Dec. 10, 2021) ("Short comment periods are particularly problematic when they coincide with holidays, end-of-year operational obligations, or other periods in which commenters' staff are likely to be unavailable or occupied with other time-sensitive obligations."), avail. at https://www.sec.gov/newsroom/speeches-statements/peirce-rat-farms-rule-comments-121021.

and the potential implications of reduced reporting frequency. Additional time would therefore materially improve the quality, depth, and usefulness of the comment record available to the Commission.

C. The Commission's broader work on disclosures

The SEC has undertaken a number of initiatives to assess disclosure requirements.

It has been suggested that the SEC may need to consider some of these issues in conjunction with one another.5
For example, in May 2026, the Commission issued two significant, foundational proposals addressing: (I) registered offering reform, including expanded Form S-3 eligibility and related disclosure mechanics; and (ii) expanded “emerging growth company” accommodations and a revised filer status framework (the “Registered Offering and Filer Status Reform proposals”).
6 The Registered Offering and Filer Status Reform proposals
would meaningfully affect the scope and content of issuer disclosures, while the Proposal would affect the frequency and timing of those disclosures. The combined effect of these initiatives will determine whether investors continue to receive information that is timely, comparable, and decision-useful.
The Associations support strengthening the U.S. public markets through a thoughtful review of the public company disclosure framework. Because these proposals collectively address the scope, content, and timing of issuer disclosures, however, they should not be considered in isolation. At a minimum, commenters should be afforded sufficient time to evaluate the Proposal alongside the Registered Offering and Filer Status Reform proposals and assess their combined effects on investors and the capital markets.
If the compressed comment schedule is maintained, commenters would face significant challenges to comment meaningfully not just on the Proposal but on the Registered Offering and Filer Status Reform proposals as well. We appreciate recent questions about whether the cadence of issuer financial reporting should be considered in conjunction with the Commission’s broader assessment of disclosure requirements.7 A reasonable extension is therefore warranted so that market participants can provide the
5 Hester M. Peirce, Comm’r, SEC, A Quarter for your Thoughts: Remarks at the Meeting of the SEC Investor Advisory Committee (June 4, 2026), avail. at https://www.sec.gov/news/speech/peirce-remarks-investor-advisory-committee-060426.
6 See SEC, Registered Offering Reform, Sec. Act Rel. No. 11418, Exch. Act Rel. No. 105513 (May 19, 2026), avail. at https://www.sec.gov/files/rules/proposed/2026/33-11418.pdf; SEC, Enhancement of Emerging Growth Company Accommodations and Simplification of Filer Status for Reporting Companies, Sec. Miami Gardens Living — Jun 15, 2026
Subject: S7-2026-15 Comment From: Miami Gardens Living Affiliation: Jun. 15, 2026 Greetings,

Businesses, investors, and consumers have long relied on quarterly reporting as the standard framework for evaluating corporate performance and making informed financial decisions. Quarterly

reporting provides timely transparency, allowing stakeholders to assess a company's financial health, operational performance, and emerging risks on a consistent basis.

Moving to a semi-annual reporting structure would significantly reduce the frequency of material financial disclosures and could result in stakeholders making important investment and financial decisions based on outdated information. While such a change may reduce reporting burdens for companies, it also increases the risk that investors, employees, retirees, and other market participants will lack access to current data necessary for sound decision-making.

Quarterly reporting aligns with established business practices, as strategic planning, performance evaluations, budgeting, forecasting, and operational adjustments are commonly conducted on a quarterly basis. Reducing reporting frequency creates a disconnect between how businesses operate internally and the information available to the public.

Transparency and timely disclosure are foundational principles of efficient and fair markets. Any reduction in reporting frequency should be carefully evaluated against the potential harm to investors and consumers who depend on accurate, current information to make informed financial decisions.

Thanks for your consideration,

Dr. Carla Bryan-Sheard
Broker-Associate

Michael Hoyson — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Michael Hoyson Affiliation: Jun. 15, 2026 As a small-business owner and investor, I strongly oppose any effort to reduce public company reporting from quarterly to semi-annual. Markets function best when investors have access to timely and consistent information. Less frequent reporting benefits insiders and large institutions who often have greater access to information, while individual investors are left with less visibility into company performance.

Transparency builds trust. Accountability drives performance. Quarterly reporting helps protect ordinary Americans who invest through retirement accounts, pensions, and personal portfolios. The SEC should prioritize investor protection and market transparency by keeping quarterly reporting requirements in place.

Subject: S7-2026-15 Comment From: Michael Ragozzino Affiliation: Jun. 15, 2026 You guys have abandoned any sense of obligation or duty to the American people. You’re going to do whatever makes you or your wealthy colleagues richer anyway, so the point of this comment is to say, we see you. We know you’re corrupt. We know you have no shame and are simply pretending. Drop the pretense. It’s embarrassing. Plus, what do you care? You’re getting all the money, right? Moral crises don’t hit as hard on private islands.

Michael Reckowsky — Jun 15, 2026
Subject: S7-2026-15 Comment From: Michael Reckowsky Affiliation: Jun. 15, 2026 This message was sent by a university retiree.

I am Mike Reckowsky, consultant on retainer for Virginia Tech. I am a first generation college graduate. I was on lunch subsistence in middle school and high school. I always felt it true that if you work hard you can move up in class in the US. As I've grown older, there are moments in time, perhaps watershed events, where the rich and ruling classes
try to ensure no one can compete to better themselves and certainly ensure they don't suffer loses like everyone else. Congressmen and women becoming millionaires due to inside knowledge is a most despicable practice and I equate this proposed SEC rule to be exactly like it! Power brokers can see corp health and buy or sell long before the general public can learn of it's performance or lack thereof and make moves to protect themselves. Meanwhile the normal everyday investor staking their retirement takes more risk. Without regular reporting the investment market will lend itself to become more volatile for everyone but the insider. By withholding reporting, the values would lend itself to gains and more importantly losses to the general investor. This must not happen!

Please keep quarterly profit reports.

Sincerely,
Mike

Michael Reitz — Jun 15, 2026
Subject: S7-2026-15 Comment From: Michael Reitz Affiliation: Jun. 15, 2026 Hi,

My name is Michael, I'm a photographer, and the owner/operator of Michael Reitz Photography. If a S-Corp of any size has to do quarterly estimated tax payments, then publicly traded companies should absolutely have to provide quarterly reports to investors. If the rules are changed to semi-annually, I will be much more hesitant about investing in companies.

The bottom line is that I'm simply not going to make investment decisions based on data older than three months. I suspect that many investors will be much more hesitant about putting their money into companies if there is less information available. I cannot speak for other investors, but I would like more information, not less. Quarterly reports is a good enough compromise.

Thank you for taking a moment of your time to read this. I hope that the rest of your day is smooth sailing.

Mike

Subject: File No. S7-2026-15 From: Michael Vail Financial transparency is essential. Increased transparency is needed today. This proposal favors business entities over US citizens and that is unacceptable. A no vote is on this S7-2026-15 proposal is necessary for US citizens.

Michael Ward — Jun 15, 2026
Subject: S7-2026-15 From: Michael Ward Affiliation: Jun. 15, 2026 Franklin D. Roosevelt's first of his famous "Fireside Chats" on March 12, 1933 saved our national economy, because of Roosevelt's sincerity, believability and track record of honesty leading up to that infamous sink or swim moment in American history.

Roosevelt convinced the American people to not only trust in him and our government and it's banking system but also to invest in it, as well as trust in our government to do what they're supposed to do and that is govern for the people, in the best interest of the people.

Anything that rocks that trust, is not just an erosion to the trust we have in our economy, but an erosion in people's trust in using U.S. based banking establishments and other investment companies.

The U.S. economy and people's retirement plans rely on the trust we have in our government to oversee the operations and practices of the people we are supposed to trust those same retirement investments with, that are the cornerstone of the U.S. economy, without which the U.S. economy is bound to fail.

Ask yourselves if you think the American people would be that easily convinced to believe in the words of the current administration.

You and every voting taxpayer in this country know the answer to that.

We are asking the government to govern, nothing more.

Trust in our government to act in our best interest should be absolute, because the expectation of that should be implied.

Our country's future depends on it.

Please act like it!

Most Sincerely
Rev. Dr. Michael C. Ward

Subject: Comment on S7-2026-15 From: Mike Rooney Affiliation: Jun. 15, 2026 Mike Rooney, retired businessman, Belton Missouri. I have a money management company handle my retirement portfolios, and obviously they need all of the information on investments as soon as possible in order to decide when to invest and when to divest. With the stock market volatility as is currently, going up or down substantially daily, we need maximum transparency and letting companies report earnings or losses anyttime less than quarterly would not allow investors transparency. This could cause my money manager to make incorrect decisions causing me to lose money. I need every Penney of my retirement to live a decent life and not keeping quarterly reporting will put my savings and investments in danger. Quarterly reports are a necessity to all investors, and give more transparency of the companies.

Ming Tseng Upper School English Teacher, Bullis School — Jun 15, 2026
Subject: File No. S7-2026-15 From: Ming Tseng Dear SEC, Please maintain quarterly reporting. As a teacher with no pension, and comparatively low salary, I am counting on investing for my retirement and that requires companies and private investors to play fair. I need mandatory quarterly reporting to hold companies accountable for running businesses well, to not hide developing financial problems or give time for inside trading to occur. The SEC has helped safeguard a tremendous generator of wealth, both for the average citizen like me, as well for wealthy private citizens. Please keep the investing system more fair for us all by maintaining mandatory quarterly reporting. The small cost savings to companies does not compare to the damage it can do to trust.

Miranda J. Brunett — Jun 15, 2026
Subject: S7-2026-15 Comment From: Miranda J. Brunett Affiliation: Jun. 15, 2026 Don't stop quarterly reporting. This is only good for the millionaires, and not the everyday schmos like us that need to keep up with our quarterlies. Our retirement depends on it. The rich have stolen everything else. Don't let them take this too.

Miranda Brunett, Solutions Architect, WV

Mitch Crawford — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mitch Crawford Affiliation: Jun. 15, 2026 My name is Mitch

Crawford, Lead Electronic Repair Tech. Reporting should be more frequent, not less. This is so corrupt. America used to have better values. We are better than this. Shame on those representatives who would support semiannual reporting. I fear there's too much corruption, and we may be circling the drain.

This doesn't make us great... This hurts the economy overall.

Yahoo Mail: Search, Organize, Conquer

Mitchell McKinney — Jun 15, 2026
Subject: S7-2026-15 Comment From: Mitchell McKinney Affiliation: Jun. 15, 2026 Mitchell Mckinney Assistant Quarterly reporting is necessary to ensure financial transparency, maintain regulatory compliance, and allows investors (like me), as well as. Company management to evaluate a company's financial health, short-term performance, and progress toward annual goals. Regularly tracking these three-month intervals yields several specific advantages: 1. Regulatory Compliance: Publicly traded companies are legally required by financial authorities, like the U.S. Securities and Exchange Commission (SEC), to file comprehensive disclosures. 2. Investor Confidence: Providing consistent Form 10-Q updates prevents information gaps, builds trust, and helps stakeholders make informed decisions to buy, sell, or hold stock. 3. Goal Tracking & Course Correction: Management teams use these checkpoints to measure key performance indicators (KPIs), identify seasonal trends, and adjust operations if sales fall short. 4. Risk Management: Disclosures highlight potential risks, pending legal proceedings, or defaults that stakeholders must be aware of. Thank you for your time. Remember the old adage, "If it's not broke, don't fix it.!" Removing quarterly reporting does not benefit investors.

Best regards,

Mitchell Mckinney

Nancy Pouliquen
Bookkeeper
Virginia Beach, VA

The SEC should NOT roll back financial reporting to the way it worked in 1955. Less disclosure means lower returns and lower valuations. It has to remain quarterly and not revert back to the semi 1955 method. This allows for quicker reaction times for companies and provides investors a better pulse on their investments.

Namcy Pouliquen

Nathaniel Williams — Jun 15, 2026
Subject: S7-2026-15 Comment From: Nathaniel Williams Affiliation: Jun. 15, 2026 I honestly think that the SEC should add to the quarterly reporting by letting the public know about ALL violations big or small. This country needs to stop slapping these companies on the wrist and increase their fines. If a company fails, don't save it.

Nathaniel Williams

---

nathespitz — Jun 15, 2026
Subject: S7-2026-15 Comment From: nathespitz Affiliation: Jun. 15, 2026 The SEC should not permit companies to only report every 6 months. This is our money and we need to know what companies are doing so we catch those who are acting in bad faith, failing or acting fraudulently quickly. We have seen what companies like Enron and investors like Madoff have done. There are always some bad fliers and it is the obligation of the SEC to act in good faith and report quarterly so

this is caught before it gets worse. Also shifting to less frequent reporting will not save investors money. Do not do this.
Anne Spitz

Navin Goel — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Navin Goel Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Any information insiders and institutional investors are getting should be available to the General public as well. Giving them the information before the general public is getting it put the market at the risk of being manipulated.

---

nbosley621 — Jun 15, 2026
Subject: S7-2026-15 Comment From: nbosley621 Affiliation: Jun. 15, 2026 The SEC must keep Quarterly reporting. Hiding reports from retail investors allows insiders to trade without the general investors having up to date information. This should not and cannot change. As a retired person I rely on current, accurate data to analysis my investments.

Thank you for your attention to this matter.

Subject: File No. S7-2026-15 From: Nicholas Dutton Semi-annual disclosures will reduce confidence in businesses who take advantage, making US companies less valuable investment targets.

Nicholas H — Jun 15, 2026
Subject: S7-2026-15 Comment From: Nicholas H Affiliation: Jun. 15, 2026 Nicholas Hanley Financial Representative
In the age of information, I can think of no valid reason why we would want to reduce the availability of said information. Any limiting of transparency merely kicks the can down the road for the time of accountability to come due. Then what might have been small corrections become magnified, and the market as a whole suffers. Do not approve the rule S7-2026-15.

Nicholas Horvath IT PROFESSIONAL - Accounting processes — Jun 15, 2026
Subject: File No. S7-2026-15 From: Nicholas Horvath Learned about this from The Motley Fool. This is a bad idea. Less information would create larger variances on how people react to this information with far longer market correction time.

Nick Hankins — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Nick Hankins Affiliation: Jun. 15, 2026 As an individual investor, I strongly support maintaining quarterly reporting requirements for public companies. Regular financial disclosures provide transparency, accountability, and timely information that helps investors make informed decisions about where to invest their savings and retirement funds.

Reducing reporting to only twice per year would increase the information gap between corporate insiders and ordinary investors. Public markets function best when all participants have access to consistent, reliable, and current information. Quarterly reporting helps identify risks earlier, improves market efficiency, and builds confidence in the integrity of our financial markets.

While companies may argue that less frequent reporting reduces administrative burden, investor protection and market transparency should remain the SEC's highest priorities. As someone who invests for my family's future and retirement, I believe maintaining quarterly reporting requirements is essential to preserving trust in the U.S. capital markets.

Nick Johnson — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Nick Johnson Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Removing public information on companies that are automatically traded through indexes on retirement funds removes the average Americans ability to update their investments based on company profits and losses. The new rules for NASDAQ already force retail investors to throw money into a failing business reporting billions in losses but still somehow clears a quarter of a trillion dollar evaluation. The more regulations that are removed the higher the chances of pump and dumps ruining the economy for those without insider knowledge. Please keep the information that is already expected public and allow for everyone to make money while investing, given they do their research.

Nick Voudouris — Jun 15, 2026

Subject: File No. S7-2026-15 From: Nick Voudouris I am against the proposed semiannual reporting rule, as this would render us, investors, less informed and more detached from the companies we give our money to.

Norman Campbell — Jun 15, 2026

Subject: S7-2026-15 From: Norman Campbell Affiliation: Jun. 15, 2026 Norman W. Campbell, retired church pastor and adjunct professor in Indianapolis, Indiana.

I insist that the SEC maintain standards of integrity by continuing to impose the quarterly reporting requirement on corporate CEOs. Too many CEOs have engaged in demonstrably criminal behavior and must be held to account.

To remove checks on CEO conduct would invite a return to the criminal excesses of the ENRON, Bear Stearns, and Lehman Brothers scandals that nearly destroyed the U. S. economy in years past.

My wife and I have invested our life savings into the U.S. markets and to lose those hard-earned funds would be devastating to us and millions of our fellow Americans.

Please do the right and honorable thing by maintaining rigorous reporting standards on corporate CEOs.

The Rev. Dr. Norman W. Campbell

Noureen Wallani — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Noureen Wallani Affiliation: Jun. 15, 2026 As a social worker and retail investor in Minneapolis, MN, I am writing to express my strong opposition to the proposal allowing public companies to transition from quarterly to semi-annual reporting.

My profession centers on advocacy, accountability, and protecting vulnerable populations. From this perspective, I see corporate transparency not just as a financial metric, but as a pillar of community stability.Reducing financial disclosures to a six-month cycle creates dangerous information gaps that harm both communities and everyday investors.

First, quarterly reporting serves as a critical early-warning system. When a corporation faces distress, the fallout directly impacts local employment, regional economic health, and community safety nets. Waiting half a year for a financial update means corporate mismanagement or instability could go unnoticed until the damage to workers and local economies is already done.

Second, this shift deeply undermines investor protection by worsening market inequality. Institutional Wall Street firms possess the capital to buy expensive alternative data, satellite tracking, and private research to monitor a company's health in real time. Everyday retail investors, like myself, rely strictly on timely, mandatory SEC filings to plan for our financial futures. Stripping away two quarters of verified data puts average citizens at a severe information disadvantage.

Public trust requires continuous corporate openness, not part-time compliance. To fulfill its core mission of protecting investors and maintaining fair markets, the SEC must maintain mandatory quarterly reporting.

Sincerely,

Noureen Wallani
Social Worker
Minneapolis, MN

Omar Alexander — Jun 15, 2026

OneArabianHorse — Jun 15, 2026
Subject: Comment on S7-2026-15 From: OneArabianHorse Affiliation: Jun. 15, 2026 0919091Investors need more reporting on earnings, not less. Investors own part of companies, and it is the companies' fiduciary responsibility to be beholden to ownership of a company.

Less transparency creates a lack of trust in leadership, and it does not allow investors to determine appropriate investment strategies.

The US government should be pushing for more transparency. Messaging they have run in for decades. Insider trading and government trading would sink most Americans, who will always be “too late to the party” to grow investment portfolios and sell on a level playing field. A field that doesn’t seem all that level now based on Washington insider trading on policies before they are released to the public.

We want more transparency, not less.

P.H. PH — Jun 15, 2026
Subject: S7-2026-15 Comment From: P.H. PH Affiliation: Jun. 15, 2026 1000023028.jpg

How do i reject this new sec rule? What do i say?? This is horrible

The screenshot is referring to a real SEC proposal that would allow public companies to choose semiannual reporting instead of filing three quarterly reports each year. It is still a proposal, not a final rule. The SEC is accepting public comments before making a decision.

If you oppose it, the most effective thing you can do is submit a public comment to the SEC before the deadline. The SEC specifically created a comment page for this proposal. SEC Public Comment Page (File S7-2026-15)

You do not need legal jargon. A concise, respectful letter from an individual investor often carries more weight than a long rant.

You could write something like:

Re: File No. S7-2026-15 – Semiannual Reporting

I strongly oppose this proposal.

As an individual investor, I rely on quarterly reporting to make informed investment decisions. Reducing required reporting from quarterly to semiannual would decrease transparency and make it more difficult for ordinary investors to evaluate a company's financial condition in a timely manner.

Large institutional investors often have access to resources and information that retail investors do not. Quarterly reports help level the playing field by ensuring that all investors receive important financial information on a regular basis.

Less frequent reporting may increase information gaps, reduce market transparency, and weaken investor confidence. I urge the Commission to retain mandatory quarterly reporting requirements.

Thank you for considering my comments.
