Pamela JOHNSON — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Pamela JOHNSON Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I am writing to express my fervent desire to keep SEC Reporting at a quarterly interval.
I used to work at a public company and was involved in compiling and reviewing the quarterly 10-Q Reporting. Requiring this report forces companies to reveal developments and how they will handle them. By extending the period, companies can hide or minimize the issues as there is a longer period to address them.
Conversely, delaying identification and action to address may harm consumers as they do not know these issues in a timely manner. They therefore can not make information investment decisions, potentially impacting their ling term financial health.
I do not support the change in the reporting time period.

Pam Johnson

Patricia Hartley — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Patricia Hartley Affiliation: Jun. 15, 2026 Quarterly reporting allows investors to track changes in company performance with greater frequency to enable informed investment decisions. Semi annual would leave investors in the dark too long.

Patricia Hartley, retired finance professional, St. Louis, MO

Patricia Hofmann — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Patricia Hofmann Affiliation: Jun. 15, 2026 I have read several articles before forming my opinion. I think reporting should remain as it currently is, quarterly. Returns are better for the investor, the opportunity for detecting fraud is greater, and more frequent reporting keeps investors more informed. While I did read about the benefits of semi-annual reporting, they seem to be more favorable to the company. Keeping in mind that most investors are people with a more limited income, rather than multi millionaires, I think the benefits need to stay tipped in our favor. My husband and I are retirees and we depend on our pensions, which are derived from investments, to remain healthy and productive. We live in Illinois, and our names are Roy and Patricia Hofmann.

Patrick — Jun 15, 2026
Subject: S7-2026-15 Comment From: Patrick Affiliation: Jun. 15, 2026 As someone who has been an investor for well over 40 years I've depended on those quarterly reports to make my investment decisions. I've seen companies use even the quarter to scam and steal millions of dollars. I cannot imagine the frauds and thefts that companies and individuals would do if they had two quarters to perpetrate their crimes.

When I had to do my first few quarterlies I thought they were just government overreach but now, remembering all the quarterlies I've filed and I've used, I now know how important they are for every investor. Moving the time from 3 months to 6 months is a very bad idea. I hope you would consider this carefully and decide against it. I imagine that many, if not millions, of people would be hurt by the extra time criminals would have to commit their crimes

---

Patrick Higgins — Jun 15, 2026

Anchorage, AK

Patti Simmons — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Patti Simmons Affiliation: Jun. 15, 2026 The possibility of eliminating quarterly reporting and the subsequent probability of a negative effect on the stock market is what nightmares are made of for retirees. After working and saving for decades it is abhorrent to consider changes that would have negative effects on an entire population. I urge you to study the historical data as well as the effects on a singular sector of America’s population.

Thank you,
Patricia Simmons

Paul Barribeau — Jun 15, 2026

Subject: S7-2026-15 Comment From: Paul Barribeau Affiliation: Jun. 15, 2026 Here's why I think this is a bad idea. Firstly, I make decisions on my investments and I need the quarterly reporting to make good decisions in a timely fashion. In the second place, I am not an insider in the investing industry. Those insiders had a pulse on the markets that I am not privy to. The 6 month window gives insiders an unfair advantage. While choosing the 6 month period is optional, that doesnt matter because the companies that chose the 6 month reporting are usually the ones whose investors need updates more frequently. Finally, what benefit is there in this to the small investor. The savings to companies has value to them but has absolutely no value to me. It is not worth the cost to you.

Paul Barribeau
Milwaukee Wisconsin

Paul Bedford — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Paul Bedford Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I strongly support reducing public company reporting requirements from quarterly to semi-annual reporting.

Quarterly reporting reinforces an unhealthy focus on short-term financial performance and encourages corporate leadership to prioritize immediate earnings targets over long-term investment, innovation, workforce development, and sustainable growth. Extending the reporting period would help shift incentives toward creating real economic value rather than managing quarterly expectations.

I believe private equity firms are a particularly harmful manifestation of the short-term mindset that quarterly reporting helps foster. Their business model often depends on acquiring productive companies, extracting value through debt loading, asset sales, workforce reductions, and aggressive cost-cutting, then exiting before the long-term consequences become apparent. Rather than creating new wealth, these firms frequently transfer existing wealth from workers, customers, and communities to investors.

For that reason, I view the proposed shift to semi-annual reporting as a step in the right direction. The SEC should pursue policies that reduce the incentives for short-term speculation and financial engineering while encouraging long-term ownership and productive investment. If such policies also diminish the profitability and attractiveness of private equity strategies, that would be a beneficial outcome for the broader economy.

A healthy economy should reward the creation of goods, services, jobs, and innovation—not the extraction of value from productive enterprises. I encourage the Commission to adopt policies that favor long-term economic growth over short-term financial gains.

Subject: Comment on S7-2026-15 From: Paula Pietrowski Affiliation: Jun. 15, 2026 My husband, a retired accountant, and I, a retired teacher, and have done everything right not to be a burden to our country or family in retirement . We have done this because knowledge is power and we have used knowledge to build a portfolio to make our financial circumstances independent. We have moved for work and now live in Virginia and after living in Massachusetts and New Hampshire, we are content here. We also have lived in Florida but the homeowners insurance crisis caused us to evaluate the cost of skyrocketing insurance in retirement. We used knowledge to make life changing decisions.

Why in 2026 are we trying to regulate corporate reporting back to the 1950's? What is this administration's fascination with the 50's? Should we have to loose financial independence because of this administration's desire to keep knowledge from us? I think not.

Please rule in moving forwards rather than backwards! Rule in common with everyday Americans rather than the billionaire oligarchy!

Phyllinda Painter — Jun 15, 2026
Subject: S7-2026-15 Comment From: Phyllinda Painter Affiliation: Jun. 15, 2026 Changing the reporting to a longer time will only benefit the companies. The SEC needs to look out for the little guy and not allow unfair advantages to corporate insiders. Extending the reporting would allow companies to sell their tanking stock to a consumer who is basically out of the loop. Stop giving them the opportunity to ruin people lives. It's dishonest and other countries that have switched are finding it's not the way to go!

Sent from my iPhone

Phyllis H Friedman — Jun 15, 2026
Subject: S-7-2026-15 Comment From: Phyllis H Friedman Affiliation: Jun. 15, 2026 Quarterly reporting provides critical financial information to all investors. It also reduces the possibility of fraud and/or intentional financial manipulation. Changing to semiannual reporting would be a serious mistake.

The commission of fraud has three components: character, motive and opportunity. There is no control over the first two components, only over the third, opportunity. Good internal controls help prevent the third component. Audited quarterly reports help ensure that good internal controls are in place and operating as designed, thus reducing the possibility of another Enron or WorldCom.

Regular properly designed audits are the only way that investors can gain some assurance that their investments are being properly managed, and that the reported financial data is correct. There are too many possibilities for fraud and financial manipulation as it is. Please maintain the current requirements for quarterly reporting.

Phyllis H Friedman, CPA
(And former Internal Auditor)

PJ Wiese — Jun 15, 2026
Subject: S7-2026-15 Comment From: PJ Wiese Affiliation: Jun. 15, 2026 Dear SEC,

As an investor with a finance background, I highly encourage the SEC to maintain the quarterly financial filing requirement. Removing the requirement decreases transparency for nearly all market participants. Asymmetric information is likely to come about from larger financial firms having greater access to key company personnel they analyze. This puts an inequitable disadvantage on small firms and retail investors. Decreased equity and derivative valuations would likely result from semi-annual reporting because significantly less public information would be available to adequately value a company. There will be a higher level of uncertainty for longer timeframes. Higher discount rates would need to be considered when accounting for the greater variance in financial results compared to estimates. And the greater time between reporting periods will lead to greater price volatility around reporting periods. European markets see this.

The United States has set a high global standard for its rules, liquidity and price transparency. Companies are aware of the costs and requirements prior to obtaining listing and equity investors. US public markets allow firms to obtain significant interest free capital to expand their ventures. It is the investors that bear significant monetary risk. Decreasing financial transparency will only add to

that risk for equity stakeholders. And as a final note, I find it extremely hard to believe that in the era where we are computing so much more at a much lower cost that a regulatory agency is considering skewing results to a higher skew.

If the SEC is there to protect investors, please maintain the quarterly filing requirement. Thank you.

Respectfully,,

PJ Wiese

Preston Freeman — Jun 15, 2026
Subject: File No. S7-2026-15 From: Preston Freeman I am writing as an individual investor and a member of The Motley Fool Community to oppose the SEC's proposal to allow public companies to move from quarterly to semiannual reporting. As an individual shareholder, I rely on quarterly reports to understand the businesses I own. The 10-Q is not just a compliance document. It is one of the few standardized, reliable, and regularly scheduled sources of information available to ordinary investors. Reducing required reporting from four times a year to two would create a larger information gap between corporate insiders, institutions, and individual shareholders. I understand the concern that quarterly reporting may contribute to short-term thinking. But reducing transparency does not solve that problem. If companies are overly focused on short-term targets, the better place to look is executive incentives, governance, and compensation structures — not the elimination of regular information for shareholders. Semiannual reporting would be especially harmful for smaller or less-covered companies, where individual investors already have fewer resources, less analyst coverage, and less access to management. These are exactly the companies where regular disclosure matters most. Quarterly reporting helps build trust in public markets. It gives shareholders a consistent view into financial performance, liquidity, risks, and management's explanation of business trends. Cutting that cadence in half would make markets less transparent, not more long-term oriented. The SEC should be moving toward more fairness, more transparency, and a more level playing field for individual investors — not less. Regulation Fair Disclosure was an important step in that direction. This proposal would move in the opposite direction. Please preserve quarterly reporting and save the 10-Q. Thank you for considering my comment.

Preston Godfrey — Jun 15, 2026
Subject: S7-2026-15 Comment From: Preston Godfrey Affiliation: Jun. 15, 2026 Make no changes to decrease information or transparency.

Subject: Comment on S7-2026-15 From: Regina Harris Affiliation: Jun. 15, 2026 Regina Harris Florida
Because this rule is optional, the market itself will act as the ultimate judge. If a highly complex company tries to switch to semiannual reporting and investors feel uncomfortable with the lack of transparency, those investors will sell the stock, driving up the company's cost of capital. Consequently, blue-chip companies with heavy institutional backing will likely stick to quarterly reporting because their investors demand it. Meanwhile, younger, high-growth, or specialized companies can use the semiannual option to lower their regulatory burdens, which could encourage more private companies to finally go public.

René van Bronkhorst — Jun 15, 2026
Subject: Comment on S7-2026-15 From: René van Bronkhorst Affiliation: Jun. 15, 2026 Why change course now? We already learned from the past that quarterly reporting supports transparency and healthy growth. Please leave it that way. Rene van Bronkhorst, Retired, Oregon

---

Renee — Jun 15, 2026
Subject: S7-2026-15 Comment From: Renee Affiliation: Jun. 15, 2026 Keep the reporting quarterly. This allows people who have invested to see how companies are doing and decide if they need to adjust their support before it is too late. There's no compelling reason to change except to potentially hurt investors.

Kisses from my iPhone

Renee Barker — Jun 15, 2026
Subject: S7-2026-15 Comment From: Renee Barker Affiliation: Jun. 15, 2026 The public and stockholders need to continue seeing financials quarterly in order to make sound and timely buying/selling/holding decisions. Why would we backpedal on this regulation? Surely it's not becoming a hardship with all of the new technology and AI. It makes no sense. Is somebody complaining about accountant fees, having to attest and be accountable?

Renee Barker

Renee Dugan — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Renee Dugan Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
This will hurt retail investors in three ways: First, it reduces transparency by cutting the frequency of detailed financial disclosures from four times per year to two, leaving individual investors with less timely information to evaluate company performance. Second, it may increase information advantages for institutional investors and insiders, who often have access to management meetings, industry data, and analyst resources that ordinary investors lack. Third, longer gaps between reports could lead to greater uncertainty and stock-price volatility, as significant business problems or deteriorating financial conditions may remain hidden for months before being disclosed, increasing the risk that retail investors make decisions based on outdated information.

RENEE LRMT — Jun 15, 2026
Subject: Keep it Quarterly From: RENEE LRMT Affiliation: Jun. 15, 2026 Transparency is key in making sure companies and the public are informed and companies are held accountable to the public, investors, and shareholders.

Renee Patrick — Jun 15, 2026
Subject: S7-2026-15 Comment From: Renee Patrick Affiliation: Jun. 15, 2026 We cannot allow public officials to hide their financials at any time. We need to know what kind of ability public officials have to manage the finances of the country and a piece of evidence to support this is their financials. Further it allows us to know whether they would abuse the public's trust. It is easy to become corrupt in American politics. Quarterly reporting allows us to know real time when that has happened.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

Sent from my iPad

Renee Patrick — Jun 15, 2026
Subject: S7-2026-15 Comment From: Renee Patrick Affiliation: Jun. 15, 2026 We cannot allow corporations to hide their financials at any time. We need stable and timely information to ensure companies have not become corrupt. Providing a longer window has not worked to improve things in other countries and this isn't an area where American exceptionalism applies.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

Richard Zacher Individual investor — Jun 15, 2026
Subject: File No. S7-2026-15 From: Richard Zacher This proposal to reduce reporting frequency would ultimately weaken transparency, reduce accountability, and disadvantage ordinary investors like me. Regular quarterly reports ensure that I, as an investor, receive important financial updates on a predictable schedule. Regular reporting promotes corporate accountability. Public companies benefit enormously from access to public capital markets. In return, they have an obligation to provide shareholders with meaningful information about their performance. Quarterly reporting allows me to evaluate whether management is delivering on its promises and whether a company's strategy is producing results. Quarterly reporting has played an important role in building my trust in investing in stocks. Reducing reporting frequency would provide less information to me as an investor. For this reason, I believe quarterly reporting should be preserved as an essential safeguard for transparency, fairness, and investor confidence.

Rick A — Jun 15, 2026
Subject: S7-2026-15 From: Rick A Affiliation: Jun. 15, 2026 We have been down this road before with Enron. KEEP THE QUARTERLY

Rick P. — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rick P. Affiliation: Jun. 15, 2026 I don't understand why you think quarterly reports need to go away. Just like a child, I like to know what is going on, as often as possible. I consistently seek out information, so to me this approach seems like you want to do even less. Maybe it's time the SEC has a shakeup.

Rick Thompson — Jun 15, 2026
Subject: S7-2026-15 From: Rick Thompson Affiliation: Jun. 15, 2026 Changes in business are moving forward, faster, and faster with ever increasing speed and complexity, as a result of new Technologies and communication tools. Mergers and acquisitions are happening faster; partnerships and new product introductions are happening more frequently; this is not the time to reduce oversight and increase the time span between SEC reporting requirements. We have seen through past experiences how business executives cannot be trusted with doing what is best for the community, their workers, or the public at large. Business leaders and entrepreneurs will always choose to focus on what brings the greatest financial return to their company and themselves. they are employees, shareholders, and the community in which they reside often suffer the results and are left with cleaning up the mess. Based on past experiences,Why would we ever trust business leaders to abide by the laws and do what is best for the greater good? Submitted by:
Richard Thompson,
Retired Program and Product Manager, Redmond, WA

Rick Umstattd — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rick Umstattd Affiliation: Jun. 15, 2026 My name is Rick Umstattd and I am a software deployment engineer. Nearly all of my investments are in index funds, and I know from software deployment that increasing time between reports is always bad for those that depend on those reports. Increasing the time from quarterly reporting will be detrimental to those that purchase stocks. Don't do things that will be harmful to my investments. Thank you for your consideration.

Rob Kovacevic — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rob Kovacevic Affiliation: Jun. 15, 2026 I support the proposal. Reducing to twice yearly reporting allows companies more time to focus on their core mission and adjust their business, and less time trying to make the quarter look good. Ideally, more service, less financials. Having worked and consulted in multiple industries, I've thought for a long time that the quarterly financial schedule is too frequent to allow businesses to focus. Those claiming potential for fraud have not explained how waiting 3 months is okay but 6 will foster bad practices. And if there is a negative outcome, SEC can return to quarterly. This is an idea worthy of trying.

— Rob Kovacevic

Rob Mar — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rob Mar Affiliation: Jun. 15, 2026 Quarterly reporting should be kept in place, in order to keep a more transparent view of company financials. Transparency is of the utmost importance for both public and private investors. Smaller investors rely on accurate and regular, quarterly financial reporting when investing in a company.

Robert Martufi Jr
Operations Director

Rob Slamka None — Jun 15, 2026
Subject: File No. S7-2026-15 From: Rob Slamka I think during this Administration we the public have gleefully allowed more than enough grift. Rules to prevent these potential abuses need to be expanded and enforced, not relaxed and ignored. No doubt the "option" will become the rule and lack of oversight will expand to maßsive abuse. In a world where "fraud" is being claimed everywhere, if seems evident that the do as we say crowd expects to create two sets of rules .. one for we and one for thee. Please resist the temptation to enable those who most certainly need to be overseen. Thank you.

Rob Wallace — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rob Wallace Affiliation: Jun. 15, 2026 Rob Wallace - former VP and Controller for Alliance Laundry Systems in Ripon Wisconsin. Changing to semi-annual reporting is a terrible idea.
I did quarterly filings for several companies for over 20 years. The electronic submission process is now very streamlined, but even when submitting quarterly, my accountants often had trouble remembering their own spreadsheet build-up approach. Waiting 6 months makes it that much harder to remember a process. In the proposed approach any spreadsheet build-up error won't be "fixed"

until the next filing and will affect 12 months of reporting.
There is always pressure to have the best quarterly results, with some level of thinking that we will figure out how to continue the performance trend later. There's too much opportunity to jack up the six months sales results with heavy promotions, or low advertising and marketing expenses. The current results look great and the stock price will most likely improve. When the next six months don't continue that trend or the sales decrease and expenses go back up, the stock price most likely will be negatively affected. That is technically not stock price manipulation - but the resulting whipsaw can certainly help management bonuses and hide other issues. I personally have encountered the pressure from the CEO to enhance results.
Finally, where's the reason for this change? And maybe ask why quarterly reporting was implemented in the first place.

Robert Foltz-Morrison — Jun 15, 2026
Subject: S7-2026-15 Comment From: Robert Foltz-Morrison Affiliation: Jun. 15, 2026 As an owner of publicly traded stocks, quarterly reports are an important indicator to me of how these are doing in relation to real world events. I do not want SEC to change to every six month reporting. Events, like a war or tariffs or pandemic can have immediate impact in some sectors and help me as an investor and those companies in which I am invested respond in a timely and responsible manner. We already as a nation are going through rapid changes in government policies and non-disclosure. Leave this alone. We need quarterly reporting. R.C. Morrison

Robin Caracino — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Robin Caracino Affiliation: Jun. 15, 2026 Do not allow the SEC to go back to semi-annual reporting, without better oversight we could all lose our savings. Please protect us by saying no to this!

Robin How — Jun 15, 2026
Subject: S7-2026-15 From: Robin How Affiliation: Jun. 15, 2026 Millions of Americans rely on investments for supplemental or retirement income. In the past, nefarious dealings resulted in millions of citizens losing investment and retirement funds.
Companies want public investments and the public who makes those investments should be able to with the knowledge that their money is being invested honestly and transparently. Cutting back the quarterly signatures opens the door to a lack of trust and fear that the hard earned money people have invested is once again being siphoned into the pocket of unscrupulous businessman. The quarterly signatures were implemented to restore investor confidence. In a time when corruption seems to be growing, the desired change by the SEC reeks of it also. The implemented rules should stand and the SEC should not be allowed to make any changes to it.
Robin How
32 year veteran educator Castro Valley, California

Robin Howell — Jun 15, 2026
Subject: S7-2026-15 Comment From: Robin Howell Affiliation: Jun. 15, 2026 To the SEC:

Companies need to be accountable to their shareholders, quarterly reports are the foundation of this. Investing in the stock market will be less transparent and trustworthy without quarterly reports. Our economy relies on this system. Quarterly reports must remain the standard.

Sincerely,
Robin Howell,

Rosemary Brabec — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Rosemary Brabec Affiliation: Jun. 15, 2026 Rosemary Brabec, retiree, in Braham MN. My husband and I worked for small companies that usually didn't provide any pension or matching for retirement accounts. We scrimped and saved during our working years and made investments in mutual funds that have put us in a good financial position inspite of having earned incomes well below the national average. It would be a real slap in the face for companies to be able to move away from quarterly reporting which has been shown in the past to result in lower returns for investors. Do not allow this to happen!

Rosemary Bruce — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rosemary Bruce Affiliation: Jun. 15, 2026 In this digital age there is no reason to delay reporting. And, with the growing discovery of fraud and dishonesty this will only give more opportunity to hide activities. In addition, this has been tried before and was

proven to not be beneficial for the smaller investors. No reason to do this.

Rosemary Ciotoli — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Rosemary Ciotoli Affiliation: Jun. 15, 2026 In an age of instant information, I expect to see at least quarterly reports. This is not an unreasonable request. Transparency is more important now than ever. I don't understand the reasoning behind the proposed change. Please reconsider and do what is the right thing to do.
Thank you for your consideration.

Rosemary Oberste Bergeron — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Rosemary Oberste Bergeron Affiliation: Jun. 15, 2026 If this helps small businesses, I'm all for it. We meed to support America's bussines and not foreign companies that are from places like China (that wants to kill us!) but appear to be American because they ship their goods to some middle American warehouse and then when you order it appears you are ordering from an American company. Tumu is a good example. China company that basically has " slave labor", but ships to Kansas or some MidAmerican state so it appears you were buying an American. .Foreign goods are usually less expensive, but cheaply made! Sorry , I got off the subject of Quarterly reporting. But from what I have read, I am FOR QUARTERLY REPORTING.

Rosemary Sova — Jun 15, 2026
Subject: S7-2026-15 Comment From: Rosemary Sova Affiliation: Jun. 15, 2026 Nope nope nope! We need more transparency, not less. Quarterly reporting, signed. Dont change this. It benefits thr big i estir. Shafts tbe small.

Ryan Lewis — Jun 15, 2026
Subject: S7-2026-15 From: Ryan Lewis Affiliation: Jun. 15, 2026 Quarterly reporting, post-Enron, exists for a reason and no one has articulated how the proposed rule changes will assure comparable protections to retail investors or other investors. 8ks offer limited and potentially worthless reassurances to investors under the proposed guidelines, and the intervals without certified, penalty-carrying accountability for responsible signers doubles. The existing rules have not failed us, and in fact have protected persons who count on corporate accountability for investment decisions that will affect our ability to live without additional public assistance in our old age. Current rules exists because of fraud committed in their absence. If no one can explain what has changed to make quarterly filings no longer necessary (and the right thing to do for investors) then no regulator or legislator should allow them to be removed.

Ryan Lewis

S. Gilzow — Jun 15, 2026
Subject: S7-2026-15 From: S. Gilzow Affiliation: Jun. 15, 2026 Hello,

The life savings of my husband and I are invested. It's not a huge sum of money, but we will be depending on it as we retire.

Corporations need to be held accountable, especially in this age of technology. Greed is always there, just waiting for an opening. The current proposal that will save corporations a little time, effort, and money by making reporting biannual instead of quarterly is widening the opening. Having a real person accountable for the accuracy of the numbers is a good and honorable thing. If anything, there should be more accountability, rather than less.

The SEC should be protecting us, not handing the keys to the bad guys.

Your own website says "Founded to help our country respond to the Great Depression, we’re the agency that protects investors from misconduct, promotes fairness & efficiency in the securities markets, and facilitates capital formation for those looking to hire, innovate, and grow."

So do your job.

S. Gilzow

S. Patton — Jun 15, 2026
Subject: S7-2026-15 Comment From: S. Patton Affiliation: Jun. 15, 2026 I have retirement savings tied up in the stock market. All public companies must be held to account and remain transparent with quarterly reports. We need to see how our investments are doing.
Anything can happen in 6months, investors have potential to be blindsided if poor corporate fiscal decisions are made in the dark. Stacey Patton, educator

Sabin Ray — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Sabin Ray Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission: I am a retail investor who has most of my life savings invested in the stock market. Having the ability to understand a company's quarterly updates is essential to my investing strategy and ensuring that I ultimately have the best possible companies in my portfolio. Please continue to have companies regularly report on their progress as otherwise it may be hard for me to have confidence in my investments.

Sabrina Anderson — Jun 15, 2026
Subject: S7-2026-15 Comment From: Sabrina Anderson Affiliation: Jun. 15, 2026 Sabrina Anderson, I'm disabled but also a small entrepreneur. The only reason to hide anything is because they are cooking their books! The only way to keep them honest is to have full transparency. So no! Show your books.

Sabrina Pugh — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Sabrina Pugh Affiliation: Jun. 15, 2026 Hi! My name is Sabrina Pugh, I'm currently retired. I spent 36 years teaching family and consumer sciences classes to middle school students. I began working at the age of 12 - babysitting until I was old enough to work in retail, go to college and continue working until the age of 65. Now that I'm retired I'm continuing to care for my Mom and brother and serving others through a variety of nonprofits.

I saved for retirement by investing my money - it concerns me greatly that we are not being more transparent in reporting. Allowing companies to report less often makes them less accountable to everyone. Do not roll back guardrails that keep people more open, honest and transparent. Move toward more stringent reporting not less.
Thank you,
Sabrina

Sallie Martin — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Sallie Martin Affiliation: Jun. 15, 2026 Sallie Martin - retired - Utica NY
It’s important to have quarterly information to be able to see trends and plan for any changes that you may want to make. The less information you have, the more difficult it is to know what is happing with a portfolio. Ideally, monthly would be better, but quarterly is more reasonable in getting the information out there. I watch the market regularly - the more transparency of information, the better informed you can be to make the best decisions necessary to possibly changing a course of action in your investments. It gives you the ability to respond sooner, if necessary. Information is necessary to make good, timely descisions.

Sallie

Sally Rist — Jun 15, 2026
Subject: S7-2026-15 From: Sally Rist Affiliation: Jun. 15, 2026 It is ridiculous and criminal to me to

permission ANYTHING, esp. today, that gives higher ups ("the suits,", the already super-rich, or CEOS) in ANY organization (gov't, private, et al.) to profit from falsehoods, deception, and theft of public or private monies. This is the largest problem we face today!

I'm guessing even the SEC may contain a lack of ethics and "good government"/management or business practices when it comes to the influence of the Greed-Power Complex. We, the People have always been unable to convince or change the corruption to be otherwise. If you lack responses in this effort for input from citizens, it is because I/we/they already see YOU as part of the problem with rulings that lack genuine honesty in bringing MORALITY OR ETHICS into your discussions and power decisions.

When we tell our children to be truthful, fair, honest, moral, or just plain considerate, we are actually asking them to be something as a government and a nation we are not. SEC: Try making that change and then actually justifying it in the interests of 98% of the nation…

I dare you.

Most sincerely,
Sally Rist

Sandra Smith Schilreff — Jun 15, 2026
Subject: S7-2026-15 Comment From: Sandra Smith Schilreff Affiliation: Jun. 15, 2026 My name is SS Schilreff, REALTOR. My husband's name is RK Schilreff, Aviation Mechanic. We work very hard for our money & we deserve to be updated quarterly. The fact that we have entrusted our money with several large corporations, to whom we are nothing but names on a report in their computers, is exactly why reporting needs to stay quarterly. We need to be able to hold them accountable, for OUR money.

Sandra Thompson — Jun 15, 2026
Subject: S7-2026-15 Comment From: Sandra Thompson Affiliation: Jun. 15, 2026 I am not in favor of changes to quarterly reporting by the SEC. This leaves individual investors in the dark for half the year, while insiders still have access to information required for wise investment. Please leave quarterly reporting in place.

SANDRA TOMEONI — Jun 15, 2026
Subject: S7-2026-15 Comment From: SANDRA TOMEONI Affiliation: Jun. 15, 2026 Keep Quarterly Reporting!!!

Sapphire — Jun 15, 2026
Subject: S7-2026-15 Comment From: Sapphire Affiliation: Jun. 15, 2026 Neville. Engineer.

My entire career is built around facts and most importantly, transparency around these facts. I would love my job if I went 6 months without updating my customers. Quarterly updates are critical in maintaining trust between the institutions taking money from investors like myself. If I could have monthly updates I'd prefer that, so who thinks that reducing them is the move? Cost savings? Businesses don't need additional savings. These savings won't help the business. They'll just hurt the individuals who aren't on the board.

Sara Linn — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Sara Linn Affiliation: Jun. 15, 2026 No! We the people need the safest and best rules. We have already lost too much from deregulation and could lose even more in the coming years. We can’t have you dumping more lose on us.

SEC comment — Jun 15, 2026
Subject: S7-2026-15 From: SEC comment Affiliation: Jun. 15, 2026 Do NOT change the reporting requirements from quarterly to semi-annually. The argument that it will allow corporate management the ability to focus on strategic goals is a red herring. They can ALREADY do that. That is their literal JOB. The reason postulated that many DON'T do that is from fear of short-term share price fluctuations. But it is estimated that in 2026, about 70% of total market ownership and 98% of total market trading is done by institutional investors. These are share holders that are much more sophisticated than the retail investor, and can understand strategic vs. tactical corporate programs and goals. And those institutional investors, as well as the rapidly disappearing retail investors, are entitled to be informed on NO LESS THAN a quarterly basis what the business they own is doing and why, and to be sure that their investment is being well managed. And for the retail investor, it guarantees that at least four times per year they will have access to information that is reasonably close to the information that is already available to market insiders.

Selena Bennett — Jun 15, 2026
Subject: S7-2026-15 Comment From: Selena Bennett Affiliation: Jun. 15, 2026 I have worked for several corporations and this is a VERY BAD PRACTICE TO DO EVERY 6 MONTHS!!! There is enough fraud as is in upper management. This would be a HORRIBLE IDEA BECAUSE I CAN ALREADY SEE THE NEWS IF THIS GOES IN EFFECT!

Serina Matlock — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Serina Matlock Affiliation: Jun. 15, 2026 To the

Securities and Exchange Commission:
As a consumer and investor this shift away from quarterly reporting for companies would be a detriment to individual investors. It does not allow investors to make informed decisions on how to invest their money and allows corporations an opportunity to "cheat" consumers by hiding information that helps in making the best decision about how to spend their money.

I vote no to allowing corporations to change this long standing and efficient practice. It hurts consumer investors.

Shannon Carman — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Shannon Carman Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
IF THE WORLD'S INVESTORS CAN'T TRUST THE NUMBERS, THEY WILL LEAVE, AND TAKE THEIR MONEY- TO WHERE THEY CAN !!
This would make all American companies WORTHLESS to 100% of investors. Not just in the United States, but around the WORLD.
Most investment in the United States is not American citizens It is funds from other nations.
Investors that believe that the United States SEC and the LAWS - making these PUBLICLY TRADED COMPANIES .... SHOW FULL DISCLOSURE, provides them with honest information, to make sound financial investments in the United States and its companies.
Remember the Enron deal. Remember how they were cooking the books. Remember how those fake records cost billions of dollars....
And that was one company!
Remember Goldman Sachs... fudging the books... hiding the reality. ...
That cost investors and taxpayers upwards of a trillion dollars....
And that was just one company!
There is a reason we have disclosure laws.
IF THE WORLD'S INVESTORS CAN'T TRUST THE UNITED STATES COMPANIES.... THEN THEY WILL NOT INVEST IN THOSE COMPANIES.

Shannon Hamm-Jenkins — Jun 15, 2026
Subject: S7-2026-15 Comment From: Shannon Hamm-Jenkins Affiliation: Jun. 15, 2026 My name is Shannon Hamm-Jenkins. I am a rural public school teacher. Firstly, I was in high school in Houston during the Enron collapse. I saw families and lives ruined. Every major modern accounting scandal was enabled by gaps and opacity in financial disclosure. Secondly, the actual savings from skipping a public filing are modest legal and accounting fees, and those savings flow to the company and its executives. My financial advisor and I would be flying blindly for a stretch of the year.
Thanks for your consideration,
Shannon Hamm-Jenkins

Sheridan Nice — Jun 15, 2026
Subject: S7-2026-15 Comment From: Sheridan Nice Affiliation: Jun. 15, 2026 The proposal to extend public company reporting intervals from three months to six months would significantly reduce transparency for everyday investors and undermine confidence in U.S. capital markets.

Quarterly reporting has been a cornerstone of market fairness for decades. It ensures that all investors—large and small—have timely access to the same material information. Extending this interval would create a wider information gap between corporate insiders and institutional investors, who often have alternative channels to gauge performance, and individual investors, who rely heavily on public disclosures. This imbalance risks eroding trust and could discourage participation in the markets.

Timely reporting also promotes accountability. Requiring companies to disclose financial results every three months encourages consistent performance monitoring and discourages the deferral of bad news. Moving to a six-month cycle could allow problems to go undetected longer, increasing the likelihood of sharper market corrections and volatility when information is finally released.

While reducing reporting frequency may lessen short-term administrative burdens, the tradeoff is a less transparent and less equitable market. Strong, regular disclosure requirements are essential to maintaining investor confidence and market integrity.

For these reasons, the current three-month reporting framework should be preserved.

Sherrie Buffum — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Sherrie Buffum Affiliation: Jun. 15, 2026 I would request reporting remain quarterly. I am relying on invested funds for my retirement & if I have no data I can't plan. With the current administration pushing for individual accounts and encouraging people to take

more control of their retirement, not just rely on social security, this would be an irresponsible regulation. Additionally it would weight markets in favor if inside trading & since I have lost faith in the integrity of legislators, it would seem the only goal of this is to create a wealthy class of untouchable & leave the rest of us struggling to get by.
Please continue quarterly reporting .

Subject: Comment on S7-2026-15 From: Stephen Freni Affiliation: Jun. 15, 2026 Absolutely not. Very bad idea.

Stephen Heinemeier — Jun 15, 2026
Subject: File No. S7-2026-15 From: Stephen Heinemeier The SEC appears to be making a very poorly thought through decision to allow companies to publicly report less often, lessening transparency. The SEC appears to have forgotten that money invested in a company is not free; the investment, in the form of shares, represents ownership of the company, however small or large. Ownership of the entity means the company has a responsibility to its owners, its shareholders. Less

transparency means increasing risk to the investor. The SEC appears to be considering increasing the risk to retirement funds and pension programs, at a time when Social Security is threatened with insolvency and at least one stock exchange has changed its rules to allow a grossly overvalued IPO to compensate a select few at the expense of institutional investors and index fund holders - the age-old "pump and dump." More transparency is needed, not less.

Stephen Hudspath — Jun 15, 2026
Subject: S7-2026-15 Comment From: Stephen Hudspath Affiliation: Jun. 15, 2026 This is just another way for bureaucracy to steal from the people by allowing the wealthy to have information that no one else has to keep getting richer while the ordinary citizens lose.

stephen marks — Jun 15, 2026
Subject: Comment on S7-2026-15 From: stephen marks Affiliation: Jun. 15, 2026 Repeating something that did not work is defined as insanity. If you once again harm the folks that invest in a company, eventually people stop investing. This short sighted policy does not work and is more Bad policy promoted by historically BAD people. The record of these BAD people speaks volumes. There is not one example of any policy that has actually helped the "little guy", without benefiting large corporations and extremely wealthy more by a magnitude of 10 if not 10,000 times fold. This constitutes criminal neglect of the greater population once again. I vote NO!

Stephen R — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Stephen R Affiliation: Jun. 15, 2026 I am writing as a physician in Maine and an active investor to express my concern regarding potential changes to reporting frequencies.

I strongly urge you to maintain quarterly reporting or consider increasing the frequency of these disclosures. In my view, reducing reporting to twice a year would significantly jeopardize our economy. Currently, I have little faith that the stock market is following fundamental economic principles; providing less transparency through infrequent reporting would only further erode trust in our economic system.

Thank you for your time and consideration.

Sincerely,

Stephen Ruda

Stephen St.Clair — Jun 15, 2026
Subject: S7-2026-15 Comment From: Stephen St.Clair Affiliation: Jun. 15, 2026 Dear Sir,

I'm concerned with the proposed changes to how companies report their financial records. Especially changing from quarterly to every six months.

Investors may sell their shares in companies early or dump them causing the prices to fall and the markets may collapse.

Please reconsider your reporting methods.

Regards,
Steve StClair

Sue Zakar — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Sue Zakar Affiliation: Jun. 15, 2026 We are personal investors. Our life savings is tied up mostly in these companies on the market. I expect any company that is big enough to be listed with a major exchange to be able to afford to report to its investors on a quarterly basis. If there are problems or issues that arise, they need to be found and made public quickly, so we investors can make intelligent decisions about where to put their money. 6 months between reports only enables after them to hide problems that will in the end be even more costly to those who depend on investments in those companies or their livelihood. Keep the quarter lay requirement. Don't change it. -- Susan Zakar, Baltimore MD

Sunbringer — Jun 15, 2026
Subject: S7-2026-15 From: Sunbringer Affiliation: Jun. 15, 2026 The growing economic disparity and its impact on societal fairness remain a critical topic of discussion. It is imperative that our public institutions operate with the highest degree of integrity and transparency to uphold democratic values and foster public confidence. Establishing and rigorously enforcing regular, detailed financial oversight mechanisms, particularly on a quarterly basis, could serve as a fundamental safeguard. Such consistent scrutiny would not only enhance accountability but also proactively deter potential ethical lapses and ensure responsible stewardship of public resources, thereby reinforcing the foundational principles of good governance.

Susan Crowe Whitcomb — Jun 15, 2026
Subject: S7-2026-15 Comment From: Susan Crowe Whitcomb Affiliation: Jun. 15, 2026 I worked with large corporations as a strategy consultant for many years. Much of what I did was evaluate company or industry performance. Under the current rules, reporting is a game and it requires someone with training and experience to determine actual performance.

This gaming would only increase and every six months you would have a pile of fiction so thick that accurate evaluation would be nearly impossible. In addition, long gaps create an unfair advantage for corporate insiders.

I am now about to retire and as an investor, I shudder at the thought of investing in public companies that are effectively black holes. Whatever is gained by companies under this proposed rule will severely hamper individual investors. Ultimately, this will result in people pulling their money out of stocks, stock funds and other related assets.

Susan Deane-MIller — Jun 15, 2026
Subject: S7-2026-15 Comment From: Susan Deane-MIller Affiliation: Jun. 15, 2026 NO, do not allow it. I am Susan Deane-Miller and I am retired, but this matters to everybody. We must have oversight, it is vital to keep an eye on things

Susan Mathews — Jun 15, 2026
Subject: S7-2026-15 From: Susan Mathews Affiliation: Jun. 15, 2026 I have been retired for about a decade and my income is from Social Security and investments. I feel like just about everything is going in the wrong direction in the United States and this would just add to the "wrong." If anything

were to change maybe the reporting should be bi-monthly. We need more transparency not less. More accountability, not less. Less monopolies, not more. Reducing the amount of reporting makes it easier for corporations to rip people off. They already do plenty of that, please do not reduce reporting requirements!

Susan McCollum — Jun 15, 2026
Subject: S7-2026-15 From: Susan McCollum Affiliation: Jun. 15, 2026 I had hoped we might have learned a painful lesson from the Presidencies of Mr. Trump about accountability, but evidently, we did not. We CANNOT afford one more public official who refuses to prove his financial entanglements while he enriches himself and deals against the public's interest to enrich himself.

Susan Michels-Ricker — Jun 15, 2026
Subject: File No. S7-2026-15 From: Susan Michels-Ricker Quarterly reporting is essential for investors and for ensuring business financial transparency.

SUSAN MILLS — Jun 15, 2026
Subject: S7-2026-15 From: SUSAN MILLS Affiliation: Jun. 15, 2026 My name is Ilene Susan Mills. I live in Somerville, Massachusetts. I am retired and all my (meager) savings are invested in a portfolio including stocks. I rely on a broker who uses Company Quarterly Reports for Analysis of companies held in this portfolio. As we approach a likely AI bubble in the market now, as we are forced to accept things like SpaceX valuation by Indexes before a “public offering” what we need now is more transparency, and consumer protection, not less. We are living in a highly politicized economy, during an attempted fascist takeover on behalf of an Oligarchy that has been milking the market through insider trading and disinformation. I believe transparency and fairness need to be adjusted and maintained accordingly!

susan misner — Jun 15, 2026
Subject: S7-2026-15 Comment From: susan misner Affiliation: Jun. 15, 2026 To SEC officers and any legislators,

I'm a U.S. citizen. I'm vehemently opposed to extending SEC and relevant reporting to 6-month periods. The SEC reporting must be at least every 3 months - that is, quarterly.

You know the reasons, but I and others should be better informed than being compelled to wait more than every 3 months (more than quarterly) for important information.

Sincerely,

Susan Misner

Susan Nalbandian — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Susan Nalbandian Affiliation: Jun. 15, 2026 I'm in the market for the long term. Quarterly checking lets me see if the company is doing well enough to deserve my money. If it goes back to twice a year I will probably pull out of stock market to lessen the chance of losing money. .

Susan Nemeth — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Susan Nemeth Affiliation: Jun. 15, 2026 I believe every investor deserves quarterly reports of the status of his or her investments. The only reason not to continue that practice is of benefit to the company rather than to the investors. There is no reason to change this practice other than to allow a company to act without frequent oversight that allows investors to look elsewhere for their investments in a timely manner. I strongly object to this proposal.

Susan Parker — Jun 15, 2026
Subject: S7-2026-15 Comment From: Susan Parker Affiliation: Jun. 15, 2026 Companies must be accountable to the public instead of merely feeding off it. A country that so poorly regulates business that there is a billionaire class amassing all its wealth while most people struggle to survive is not a democracy and does not serve the people. Quarterly reporting is the least the SEC can require instead of giving companies even more power than they already have.

Susan Penrod — Jun 15, 2026

Susan Snyder — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Susan Snyder Affiliation: Jun. 15, 2026 I am opposed to changing quarterly reporting to semi-annual. When that was done before it was unsuccessful, causing investors to lose money. That matters to me and other retired people who count on our investments to maintain decent quality of life. I have my retirement savings managed by a financial planner who works with me to maintain a level of money calculated to last me for the remainder of my life. If cuts in social security and Medicare are made and profits from my earning decline my lower middle class standard of living will be decimated. Just like most elderly people I worry all the time about whether I will be able to support myself for the rest of my life. I am 79. I worked all my life as a nurse. I thought I would have a less stressful retirement. My financial advisor has done a great job handling my money and advising me. How can he continue that if he does not have all the info he needs as often as is necessary. It appears to me that semi-annual reporting will only benefit the companies, not the investors.

Susan Strauss — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Susan Strauss Affiliation: Jun. 15, 2026 I need quarterly reporting on my investments. Please do NOT change reporting to twice a year.

Suzanne Gooding — Jun 15, 2026
Subject: S7-2026-15 Comment From: Suzanne Gooding Affiliation: Jun. 15, 2026 I write in opposition to the proposed semiannual reporting amendments. I am a CPA with nearly four decades in corporate finance, currently serving as Controller at a Fortune 500 company.

This proposal creates a two-tier information market. Corporate insiders, institutional investors, and sophisticated counterparties will continue receiving material financial information through private channels. Retail investors — who depend entirely on mandatory public disclosure — would wait twice as long. That is not deregulation. It is a transfer of informational advantage to those who already have the most.

Quarterly reporting is infrastructure, not burden. The 10-Q framework has underpinned U.S. capital market credibility for over 50 years. The compliance cost savings to issuers are real but modest compared to the transparency value surrendered by 150 million retail investors.

"Optional" understates the long-term risk. When enough companies adopt reduced disclosure, quarterly reporting becomes competitively untenable for those who retain it.

I urge the Commission to maintain quarterly reporting as the default standard. If smaller reporting company relief is the legitimate goal, address it through targeted exemptions — not a structural rollback applicable to all domestic issuers.

Respectfully submitted,
Suzanne Gooding, CPA, Washington

Teresa Little — Jun 15, 2026
Subject: S7-2026-15 Comment From: Teresa Little Affiliation: Jun. 15, 2026 There is no logical reason that justifies "LESS" reporting for companies to benefit while users are once again paying even more, especially with today's economy. Who does the SEC actually think this new option is good for? Surely not regular retirees! It is sickening how cos/corps find new ways to increase their profits while sticking it to average, retired folk on a fixed income. Shame on you!
Teresa Little, WI, retired

Teresa Overton — Jun 15, 2026
Subject: S7-2026-15 Comment From: Teresa Overton Affiliation: Jun. 15, 2026 These rich oligarchs don’t need any MORE LOOPHOLES - the PEOPLE NEED HELP. We cannot afford to live! And this is what you losers are worried about? No. They need to be transparent and open with what they do. They already have enough options to hide their money.

Terese Lane — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Terese Lane Affiliation: Jun. 15, 2026 Absolutely opposed to changing to less frequent reporting. I don't care if it increases expenses for traded companies, it is one of the few fail safe methods by which ordinary people who own stocks can avert personal financial disaster, by paying attention to the quarterly reports and those reports being made public via news entities. NO NO NO NO

Terese Waters — Jun 15, 2026
Subject: S7-2026-15 Comment From: Terese Waters Affiliation: Jun. 15, 2026 Transparency in this age of lying led by a president who lies more than any other in our history, is already difficult enough. There is no reason to allow companies to hide their financials from the public for an even longer period. It will be hard enough to force them to tell the truth, especially since Trump and his corruption has ensured that fighting against them is as ineffectual as possible. Far from enforcing antitrust laws long neglected, this administration has done everything it can to further consolidation and monopoly, as well as authoritarianism and oligarchy. Transparency is a protection for the public which is why this rule change is being proposed. It is inherently corrupt and completely unnecessary.

Terri Tutich — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Terri Tutich Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Investors should be able to have as much information as possible before choosing to invest. We should know who we are giving our hard earned money to and what they plan to do with it, especially in the current economy where everything costs so much more than it did even six months ago. A lot can change in six months, as we've seen. Don't allow companies to keep investors in the dark.

Terri Varnell — Jun 15, 2026
Subject: S7-2026-15 Comment From: Terri Varnell Affiliation: Jun. 15, 2026 My husband and I retired and we rely heavily on quarterly reports. Do not change this!

Terry Hashemi — Jun 15, 2026
Subject: S7-2026-15 From: Terry Hashemi Affiliation: Jun. 15, 2026 Dear SEC,

I am submitting my comments in an effort to save quarterly reporting, because it matters to me. In our seventies now, our retirement is significantly reduced as a result of investments my husband's company made in Enron with retirement contributions. This is one of the protections we have against malfeasance by those in positions of power. I simply cannot understand why SEC would even consider reducing these safeguards.This issue has affected us personally, and we did not, and cannot, recover from those loses. We now depend on our Social Security, which is constantly being threatened as well. Please continue to require quarterly reporting, so that more Americans will not experience the excruciating pain of losing money they worked years for, and then lost to a greedy scheme, which went on for far too long, because of the lack of oversight in place.Thank you for your consideration.

Terry Hashemi
Retired
Battle Ground, Washington 98604

Terry Johnson — Jun 15, 2026

The Motley Fool — Jun 15, 2026
Subject: File No. S7-2026-15 From: The Motley Fool Multiple reports ARE REQUIRED a MINIMUM of 4 qtrs for investment strategies

---

The Motley Fool Community — Jun 15, 2026
Subject: File No. S7-2026-15 From: The Motley Fool Community Do not allow companies to elect to reduce the number of public-company reports from four times a year to just two. We think that’s a mistake! At its heart, investing is ownership. When you own a piece of a business, you deserve regular, transparent communication from that business. Reducing reporting requirements weakens the connection between companies and their owners. Some argue that fewer reports would reduce costs. Maybe. Although in an age of AI and increasingly efficient disclosure tools, even that point is debatable. Others argue it would ease the pressure to manage quarter to quarter. But short-termism comes from how people react to information, not from the information itself. Taking the reports away doesn't make anyone more patient. It just makes everyone less informed. What isn’t debatable is that less information rarely creates better-informed owners. Imagine owning a business and getting updates from your managers only twice a year. It would still run every day. You'd just know far less about how it was doing. That's effectively what's being proposed here. Companies will continue operating every day. Products will be launched. Customers will be won and lost. Strategies will succeed and fail. Yet under this proposal, owners would receive only half as many official updates about the businesses they own. Less transparency doesn’t eliminate uncertainty. It increases it. And when information finally does arrive, the surprises are likely to be bigger, the reactions sharper, and the volatility greater.

The Motley Fool Community — Jun 15, 2026
Subject: File No. S7-2026-15 From: The Motley Fool Community As a recently retired professional person who now relies, in large part, to investments for my retirement income, I sometimes use 10Q reports to evaluate my investment options. In my opinion, reducing the reporting frequency by half would do a grave disservice to the public. Frankly, I cannot envision any corporation reducing the reporting frequency for their own internal needs; therefore, the motivation is more about reducing transparency.

TJ Whitaker — Jun 15, 2026
Subject: S7-2026-15 Comment From: TJ Whitaker Affiliation: Jun. 15, 2026 Comment on Quarterly Reporting

My name is TJ Whitaker, and I work in a Production Planning and Forecasting role in manufacturing.

In my experience, quarterly reporting provides useful structure for evaluating performance, but it

often encourages a short-term focus that can distort decision-making. Operational realities in supply chain and production planning don’t always align neatly to 90-day cycles, especially when demand signals, labor constraints, and inventory positioning require longer planning horizons.

That said, quarterly reporting does have value in maintaining accountability and providing stakeholders with regular, standardized financial updates. The challenge is that it can unintentionally incentivize optimization of short-term results at the expense of longer-term stability and efficiency.

From my perspective, quarterly reporting matters because it directly influences how companies prioritize production, forecasting, and resource allocation. When reporting pressure is too strong, it can lead to reactive planning instead of stable, demand-driven execution—which ultimately increases variability in the system.

tova barchaim — Jun 15, 2026
Subject: Comment on S7-2026-15 From: tova barchaim Affiliation: Jun. 15, 2026 I am a 73 year old married woman with 5 grown up children who are struggling, though working, to put food on the table, pay their rent or mortgages. My husband and I have worked our entire adult lives. I was a teacher and he worked as an insurance adjuster. We got by. We are now retired and living off of our social security and small monthly payments from my savings, of which I give alot to help my kids and to charities. I've been reading about the SEC proposal to go back to a system that didn't do much to help the economy of our country and left investors high and dry. Doing that will cause millions of people to loose a huge part of their life savings, which is totally IRRESPONSIBLE and cruel. Can

you imagine what will happen when people realize what this will do to them. You'll Gd forbid, have 1929 all over. People will be selling everything to get out of the market and pocket their money. What good will that do for our economy? Seriously, WHAT ARE YOU THINKING? Sincerely, Tova B. from Florida

Trenton Schwartz — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Trenton Schwartz Affiliation: Jun. 15, 2026 Why SEC should require quarterly financials

The SEC should maintain quarterly financial reporting requirements because they promote transparency, protect investors, and support efficient capital markets. Public companies operate in a rapidly changing environment, and investors need timely financial information to make informed decisions. Moving to semiannual reporting would create longer periods during which investors lack reliable data about a company's performance, increasing uncertainty and information gaps. Quarterly reporting helps ensure that all investors have access to the same material information at regular intervals. Without these disclosures, corporate insiders and large institutional investors could gain a greater informational advantage over retail investors, undermining market fairness and investor confidence.

Frequent reporting also improves market efficiency by allowing stock prices to reflect current business conditions more accurately. If companies reported only twice a year, investors would be forced to rely more heavily on speculation, analyst estimates, and rumors, increasing the risk of market volatility and pricing inaccuracies.

In addition, quarterly reporting strengthens corporate accountability. Regular disclosure requirements encourage management teams to closely monitor financial performance, maintain strong internal controls, and communicate openly with shareholders. More frequent reporting can also help identify emerging financial or operational problems before they become more severe. While some argue that semiannual reporting would reduce compliance costs and discourage short-term thinking, these benefits are often overstated. Most public companies already prepare financial information on a regular basis for internal management purposes. Moreover, reducing reporting frequency is unlikely to eliminate short-term market pressures, which are influenced by many factors beyond disclosure schedules.
Strong disclosure standards are one of the reasons U.S. capital markets remain among the most trusted and attractive in the world. Quarterly reporting reduces information risk, supports investor confidence, and can help lower companies' cost of capital by providing markets with consistent and reliable information.

For these reasons, the SEC should retain quarterly financial reporting requirements. The benefits of transparency, investor protection, market efficiency, and corporate accountability outweigh any potential advantages of semiannual reporting.

Valena Norton — Jun 15, 2026
Subject: S7-2026-15 Comment From: Valena Norton Affiliation: Jun. 15, 2026 Valena Norton Admin Assistant Investment Advisor & Seasonal Tax Preparer

Less reporting to the SEC is not good for the American investor nor the financial market we live in. I see this as an absolute slippery slope that we do not need to go down. We learned the hard way with Enron and Madoff. Less reporting will take away the certain amount of transparency that currently exists. Corporations have responsibilities and reporting is the most effective tool for fulfilling those responsibilities.

Valerie Federoff — Jun 15, 2026
Subject: S7-2026-15 Comment From: Valerie Federoff Affiliation: Jun. 15, 2026 My name is Valerie Federoff, former substitute teacher, keep the reporting quarterly, We Deserve to know how our investments are doing.. Keeping the data secret for too long means we don't have the information to take action.

Valerie Swalef — Jun 15, 2026

Victoria Highley — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Victoria Highley Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
Frequent disclosures allow for trust in investments in American markets- we have seen for decades how corporations will get away with bad decisions for far too long before investors get any notice or understanding of how bad things are. Keep trust in our markets by rejecting the 6 month SEC reporting proposal and kee I the quarterly reports. It's a privilege for companies to be on the public market, and they need to show proof that they won't break our trust.

Victoria Korosei — Jun 15, 2026

Virginia Loehr — Jun 15, 2026
Subject: Comment on S7-2026-15 From: Virginia Loehr Affiliation: Jun. 15, 2026 Virginia Loehr, Retired
Texas. I have worked since I was 13 yrs old. I worked for an oilfield service company for 38 years, so I could have retirement $$ to help me make comfortable in my last years. That's not happening now because the Congress & Senate has failed the American people by NOT listening to what we need. The corruption is rampant, and we pay. The economy sucks and we don't need the SEC to change reporting quarterly. We don't need or can't afford for the six month reporting. Why is the government working on us to be in poverty? Please leave it as it is.
If this happens everything I have saved will be gone and the 38 years of work was for nothing.

Virginia Newton — Jun 15, 2026
Subject: S7-2026-15 Comment From: Virginia Newton Affiliation: Jun. 15, 2026 No no no. Do not change the rules. Someone will profit but it won't be the investor

Vladimir Drozdoff, PhD, JD Chief IP Counsel (Major Research Institute) — Jun 15, 2026
Subject: File No. S7-2026-15 From: Vladimir Drozdoff, PhD, JD I'm writing to oppose the proposed rule change S7-2026-12) to allow companies to file semi-annual financial reports in lieu of quarterly 10Q reports. My work supports business development, licensing and technology transfer in fast moving areas such as biotechnology, pharmaceuticals, and artificial intelligence. Having up to date financial information is crucial to making intelligent business decisions and correctly assessing risks. We rely on 10Q reports as a major source of information to obtain reliable snapshots on performance of potential commercial partners, spot concerning trends and to support accurate industry diligence. These days, six-month old information in industries like this is relatively old and outdated and would fail to provide the value we receive and are accustomed to from 10Q reporting. Moreover, the entry of AI into work flow for finance and accounting has or will dramatically reduced the burden of quarterly reporting. Maintaining transparency and equitable access to business information should remain a priority.

---

vmbeauchamp — Jun 15, 2026
Subject: S7-2026-15 Comment From: vmbeauchamp Affiliation: Jun. 15, 2026 6 months is too long between reports. Yes , if you are the one who has to fill one out the quarterly reports, it is a pain, but it alerts you to a trend much earlier. Don't get rid of quarterly
 reporting please. That transparency is owed to your public.

walter cook — Jun 15, 2026
Subject: S7-2026-15 Comment From: walter cook Affiliation: Jun. 15, 2026 Just what Americans need more major corporate bankruptcies have wiped out billions of dollars in shareholder value, retirement savings, and jobs. Here are some of the most significant collapses in modern history, grounded in verified reporting:

1. Lehman Brothers (2008)
Cost to the public: Hundreds of billions; triggered global financial crisis
Lehman's collapse remains the largest bankruptcy in U.S. history, with $691 billion in assets at filing. Its failure set off a worldwide financial panic and erased tens of thousands of jobs.

2. Washington Mutual (2008)
Cost: Massive depositor panic; $327 billion in assets
WaMu suffered the largest bank failure in U.S. history, collapsing after depositors withdrew $16.7 billion in just 10 days. Its banking operations were sold to JPMorgan for a fraction of their value.

3. Enron (2001)
Cost: $74 billion in shareholder value; destroyed pensions
Enron's implosion exposed one of the largest accounting frauds ever recorded. Its stock fell from $90 to pennies, wiping out retirement accounts and leading to the dissolution of Arthur Andersen.

4. WorldCom (2002)
Cost: $180 billion in shareholder value
WorldCom's bankruptcy revealed $11 billion in accounting fraud, making it one of the most devastating corporate scandals in history. Over 30,000 jobs were lost.

5. General Motors (2009)

Cost: Tens of billions; massive restructuring
GM's bankruptcy was the largest manufacturing collapse in U.S. history, with $172 billion in assets. Government intervention saved the company, but tens of thousands of jobs and dealerships were lost.

6. Chrysler (2009)
Cost: Industry-wide shock; $39 billion in assets
Chrysler's bankruptcy, driven by collapsing auto sales, led to a government-backed restructuring and eventual merger with Fiat.

7. Pan Am (1991)
Cost: Loss of 7,500 jobs; end of an iconic airline
Pan Am's collapse shocked the aviation world, driven by fuel costs, terrorism fears, and deregulation pressures.

8. Toys "R" Us (2017)
Cost: 33,000 jobs; end of a retail era
Crushed by debt and unable to compete with online retailers, Toys "R" Us collapsed despite decades of dominance.

9. Blockbuster (2010)
Cost: 84,000 jobs; total market wipeout
Blockbuster's failure became a symbol of digital disruption after it dismissed Netflix's rise.

10. Rite Aid (2025)
Cost: Ongoing closures; major retail fallout
Rite Aid filed for bankruptcy again in 2025, closing stores nationwide and selling off assets as part of a long-term decline.

Wayne Rampey — Jun 15, 2026
Subject: File No. S7-2026-15 From: Wayne Rampey I oppose reducing the public company reporting requirements from once per quarter to twice per year. As a serial business founder, member of multiple board of directors on companies, active investor in public company stocks, as well as having direct professional relationships with several past senior level executives of public, fortune 500 companies, timely release of financial performance is without doubt one of the most important data streams to being an informed investor. As technology increases, so do the tools capable of improving the speed to gather, analyze and release information that is critical to the investing public. Less data due to longer time frames between financial reporting is the antithesis of what is in the best interest of the investing public. I adamantly oppose reducing the number of times per year of publishing financial results of public companies, and trust the SEC recognizes the importance of timely data necessary to make wise and prudent investing decisions.

William Webb — Jun 15, 2026
Subject: S7-2026-15 From: William Webb Affiliation: Jun. 15, 2026 Reducing financial reporting from 4 reports per year is a spectacularly bad idea. Just look at the level of corruption and insider trading in the federal government and Wall Street elites right now. Having to wait six months between reports robs the average small investor of much-needed information and greatly increases the risk of fraud, bad faith dealing, or simple mismanagement. Leave it alone. If you have to change something, limit the management's commentary and forward-looking statements to the annual reports, but leave the key quarterly financial indicators alone.
Deregulation is one thing; eliminating transparency and accountability is something else entirely.

Yao Huang Motley Fool Community — Jun 15, 2026
Subject: File No. S7-2026-15 From: Yao Huang I think that reports from public companies should be made as frequent as possible so that investors' rights can be guaranteed properly.

Yozette Collins — Jun 15, 2026
Subject: File No. S7-2026-15 From: Yozette Collins With the current extreme corruption that harms the majority, the ethical approach is to have MORE open reporting to the public, not less. I urge the SEC to KEEP QUARTERLY reporting and consider doing more to increase everyday investors' confidence in the market and the American system. Because, right now, the guardrails protecting the majority of Americans and our confidence in your protections have failed/ are failing rapidly.

Yurie Namiki — Jun 15, 2026
Subject: My view on Rule S7-2026-15 From: Yurie Namiki Affiliation: Jun. 15, 2026 To the Securities and Exchange Commission:
I strongly oppose the SEC's proposal to allow public companies to replace quarterly reporting with semiannual reporting.
This proposal would weaken transparency in public markets and shift even more power toward large, well-resourced market participants. Ordinary individuals do not have the same access to management, private research, analysts, or institutional data sources. Required quarterly filings are one of the few tools that help keep public companies accountable to the public.
As someone who saves and invests for long-term financial security, I rely on regular public disclosures to understand how companies are performing and whether their financial condition or risks have changed. Quarterly reports provide timely, standardized information about revenue, expenses, cash flow, debt, operations, and risk factors. Reducing those disclosures would make it harder for the public to make informed decisions.
Voluntary updates, press releases, and earnings calls are not an adequate substitute for required SEC filings. Companies should not get to decide when the public deserves complete and comparable information, especially when that information may be unfavorable.

Public companies benefit enormously from access to public capital markets. In return, they should be required to provide regular, reliable disclosures to the public. The SEC should not adopt a rule that increases information inequality and makes markets less fair for ordinary people.
I urge the Commission to reject this proposal and preserve quarterly reporting requirements.

Yvette Davis — Jun 15, 2026
Subject: S7-2026-15 Comment From: Yvette Davis Affiliation: Jun. 15, 2026 My name is Yvette Davis, I am a healthcare worker who has been working almost 40 years. I am very close to retirement. It is crucial that SEC remains quarterly. I need to have transparency about my money.

Adam Caswell — Jun 14, 2026
Subject: S7-2026-15 Comment From: Adam Caswell Affiliation: Jun. 14, 2026 My name is Adam Caswell. I am a nuclear engineer, and I work as a waste characterization and certification subject matter expert. Like many working Americans, I am saving and investing with the dream of funding

my own retirement one day. A critical piece to that dream is being able to take the money that I work hard to save, and invest it to take advantage of compound interest over the decades of my working life. The success of that strategy depends on being able to access accurate, up-to-date financial information to use in deciding where and how to invest that money. Allowing companies to only disclose financial reports twice a year seriously threatens working Americans ability to make intelligent, data-driven decisions about managing our investments.

I can't think of a single way that changing financial reporting rules allowing publicly traded companies to only disclose financials twice a year actually helps working Americans like me. In fact, it feels like it stacks the deck against hard working citizens saving for a better future in favor of handing even more benefits to insiders. The historical data is clear, semi-annual reporting suppresses returns and hurts working class investors. Keep reporting requirements quarterly. Keep investing fair and profitable for all Americans.

Sincerely,
Adam Caswell

EVP

Norwalk CT

TO WHOM IT MAY CONCERN AT THE SEC:

It is outrageous that there is consideration to end quarterly reporting of corporate earnings.

Americans who have put their faith and their money into the stock market deserve full transparency as to how corporate America is using their investments. It is well documented that reducing transparency will reduce profit.

It will also no doubt cause even more uncertainty in the market, essentially bringing the uncertainty that consumers feel every in their real lives nowadays into the realm of Wall Street, which so far has been immune to the damaging impacts of the Trump regime, its disastrous decisions, and its inherent weakness, on our economy.

Americans have had enough of government agencies that over the past 10 years have bent over backwards to make things better and easier for the corporate class and the oligarchy, while devastating the lives of everyday Americans in ways big and small. This move would be in lock step with everything else that has happened over the past 10 years and we are sick of it.

I personally will take all my money out of the stock market if this happens, and I am sure that there are millions upon millions of other small investors who will do the same thing.

Adrienne Waterston

Adrienne Fernandes — Jun 14, 2026
Subject: S7-2026-15 Comment From: Adrienne Fernandes Affiliation: Jun. 14, 2026 I'm very exhausted at what's going on because of the current administration. It's patently unfair that these ultra rich corporations more and more every day are making record profits while me and a lot of people like me are one check away from being homeless - literally! This madness has stop.

Adrienne Fernandes — Jun 14, 2026
Subject: S7-2026-15 Comment From: Adrienne Fernandes Affiliation: Jun. 14, 2026 The current administration has truly atrocious policies, especially when it comes to us, the taxpayers. Why is he being allowed to bend over backwards to line not just his own and his family's pockets, but the uber-rich corporations that have been making record profits. I'm literally one check away from being homeless. Please stop this despicable greedy madness.

Albert Norman — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Albert Norman Affiliation: Jun. 14, 2026 The SEC is proposing to allow every public company to stop reporting its results each quarter and disclose just twice a year. These were the rules in place between 1955 and 1970. Less transparency came with lower returns and lower valuations.
For an ordinary investor like me, this could cost me a third, or even half, of my savings. As a retired worker, this would be a devastating blow to my ability to meet my living expenses.

If you allow this change to take place, you will become the insecurity and exchange commission and millions of Americas on fixed income will be the big losers. The CEOs and Board members will have less paperwork and more profits while the rest of us suffer.

Al Norman

Alexandra Bird — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Alexandra Bird Affiliation: Jun. 14, 2026 The last thing we need to do is make it even easier for people to be fleeced. Loosening the requirements for corporations has been the mode of operations in the last few years and it has only cost the taxpayers inestimable amounts of money while lining the pockets of those who should never have had access to those funds.

We made quarterly reporting the rule for a reason. Leave it in place.
Alexandra Bird

Alexandra Harryman — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Alexandra Harryman Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I am writing to express my strong support for maintaining quarterly reporting and transparency requirements. Regular reporting provides stakeholders with timely information, promotes accountability, and helps ensure that decisions are made based on accurate and current data. In public education and other public services, transparency is essential for maintaining confidence in the system. Stakeholders deserve access to clear and timely information regarding performance, finances, and outcomes. Strong transparency requirements have long been a cornerstone of investor protection and market integrity. Maintaining quarterly reporting supports fairness, accountability, and confidence in the financial system while helping middle-class families protect and grow the savings they have worked hard to build. I respectfully urge you to preserve quarterly reporting requirements and continue supporting policies that promote openness, accountability, and public trust. Thank you for your consideration and for your commitment to transparency and accountability.

allene christenson — Jun 14, 2026
Subject: S7-2026-15 Comment From: allene christenson Affiliation: Jun. 14, 2026 Hello, My name is Allene Christenson. I'm a retired Surgical R.N. The only way I can be sure my retirement money is working for me through the quarterly reports. I keep track of the companies that are helping me to stay retired, by keeping track of the profitability of my investments. I do not want to find out 6 months later that my portfolio lost 50,000.00, when I could've made a correction 3 months earlier to rebalance, or sellout completely on a losing stock. This is crucial ! Especially for those of us completely dependent on our IRA's to stay retired and not reenter the workforce at an advanced age to make ends meet. Those quarterly reports help the everyday person who cannot afford big losses like multi millionaires. I worked 45 years for my money. I worked many holidays, weekends, nights and extra days. Missed family functions. Even at the cost of my own health. Please keep the quarterly reports so the hardworking everyday person can effectively manage their money.

Allyn Dorr — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Allyn Dorr Affiliation: Jun. 14, 2026 Hello, my name is Allyn Dorr. I am a retired financial manager living in Massachusetts. My preference is for quarterly investment reporting rather than semi annual. I understand that semi annual updates are likely to be operationally simpler but quarterly reports provide key advantages for me. First standard corporate earning cycles are quarterly and receiving updates on this same schedule allows me to evaluate my portfolio performance in real time rather than waiting half a year. Secondly, quarterly reporting provides a much healthier feedback loop for risk management. Six months is simply too long to remain in the dark in a volatile economic climate. A three month window ensures that I can more efficiently spot under performing assets, track manager style drift, and rebalance my allocations. Finally, the more frequent documentation of quarterly reporting keeps me highly engaged with my personal financial planning, budgeting, and tax forecasting. For these reasons, I request to remain on a quarterly reporting schedule.

Thank you for your consideration.

Amy Leigh Martin — Jun 14, 2026
Subject: S7-2026-15 From: Amy Leigh Martin Affiliation: Jun. 14, 2026 Dear sirs;
Quarterly reporting keeps Executives honest. I'm a retail investor, Sarbanes-Oxley is not a suggestion, and reporting should be kept quarterly to protect investors.
8-Ks and press releases carry no certification and no auditor review, so they can't substitute, and a press release is just advertising and we know there is no “enforced truth” in advertising or from the press anymore. These safeguards were written after Enron for a reason, and the SEC should explain what has changed.

Amy Leigh Martin

Amy Tarce — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Amy Tarce Affiliation: Jun. 14, 2026 I appreciate the Commission's attention to risks in digital-asset markets, but I oppose several aspects of the proposed rule S7-2026-15 because they weaken protections for retail investors and increase the risk of loss or misinformation. Below are my specific concerns and requested changes.
Reduced interim reporting frequency Concern: Allowing electing issuersto replace quarterly Form 10-Qfilings with a single semiannualinterim report reduces thetimeliness of material disclosuresand widens informationasymmetry between issuers andinvestors. Request: Require quarterlyreporting for issuers holding ormaterially exposed to customerdigital assets, or at minimumshorten the permitted interiminterval to quarterly for firmsabove a modest asset or customer threshold.

Overreliance on third-party custodianswith limited liability Concern: Contracts that capcustodial liability or restrict auditaccess will leave retail customerswith weak remedies after thefts,losses, or misappropriation. Request: Prohibit enforceablecontractual caps on custodianliability for loss or willfulmisconduct affecting customerassets; require enforceable auditand examination rights forregulators and customers'designated auditors. Valuation and disclosure flexibility thatpermits opaque pricing Concern: Allowing broadsubjective valuation methods forilliquid tokens or cross-listedassets enables optimistic ormisleading NAVs that harm retailinvestors. Request: Require standardizedprimary pricing sources, disclosevaluation hierarchies and inputs,and mandate independentvalidation for illiquid assetvaluations used in customerstatements. Insufficient frequency and scope ofproof-of-reserves and attestations Concern: Infrequent or narrowlyscoped attestations reduceassurance that customer assetsexist and are segregated. Request: Require public, standardized proof-of-reserves atleast monthly for firms holdingcustomer digital assets, withindependent SOC-typeattestations covering private-keycontrols, reconciliationprocedures, and segregation ofcustomer assets. Permissive rehypothecation, lending, oruse of customer assets Concern: Allowingrehypothecation or lending—evenwith disclosure—exposescustomers to counterparty creditrisk and complicates assetrecovery in insolvency. Request: Prohibit rehypothecationor lending of retail customerdigital assets without explicit,opt-in written consent; requireclear, prominent disclosure andstronger capital/segregationsafeguards where permitted. Delayed incident reporting and highmateriality thresholds Concern: Long allowable reportingwindows or high thresholds forreporting breaches can keep retailinvestors uninformed about lossesor operational failures. Request: Require near-real-timenotification to both the SEC andaffected customers of confirmedthefts or custodial failures (within48 hours of confirmation) andlower quantitative/materialitythresholds that trigger mandatoryreporting. Consumer contract terms that eroderemedies Concern: Standard formagreements that imposearbitration-only clauses, forumlimitations, or waivers of classremedies deny retail investorsaccessible avenues for recovery. Request: Prohibit mandatoryconsumer arbitration or class-action waivers in agreementsrelating to custody of customerdigital assets. Phased exemptions that leavesmall-provider customers vulnerable Concern: Exempting small firmsfrom core protections during aphased rollout creates

twoclasses of customers with unequalprotections. Request: Apply baseline custody,proof-of-reserves, andbreach-notification requirementsto all firms holding retail customerdigital assets, with narrowlytailored, time-limited relief only fortechnically incidental activities. Conclusion: The proposed rule contains important improvements, but several provisions would materially weaken protections for retail investors. We do not want another 2008 Market crash that will set us back 10 years financially. I worked hard and sacrificed to save for my retirement. It's irresponsible for the SEC to shirk of its responsibilities to the public. Please strengthen the rule by adopting the requested changes above to ensure timely disclosures, enforceable custodial accountability, frequent independent verification of reserves, prohibition or strict limits on rehypothecation, and consumer-protective contract rules.
Thank you for considering these comments.
Sincerely,

Amy Tarce
13311 NE 137th Place, Kirkland, WA 98034

Subject: S7-2026-15 From: Andrea Rematore Affiliation: Jun. 14, 2026 Andrea Rematore, retired, Bend, OR Oversight only works if it is enforced. Corporations must be held accountable, and quarterly reporting helps to keep them honest.

Andrea Saucedo-Martinez — Jun 14, 2026
Subject: S7-2026-15 Comment From: Andrea Saucedo-Martinez Affiliation: Jun. 14, 2026 I absolutely want to know what is happening to my money that I've invested and work hard to earn every single day, on at least a quarterly basis. 6 months without reporting and no access to financial records is not an option.

Andrea Marie Saucedo-Martinez
909.206.7711

Andrew B. Watt — Jun 14, 2026
Subject: File No. S7-2026-15 From: Andrew B. Watt You should retain signed, quarterly reporting, rather than shifting to semi annual reporting. There is probably a great deal of political pressure in modern times to simplify the reporting process. However, fraud flourishes in darkness and opacity of information. And once you establish that you only need to tell the truth once every six months, it becomes much harder to identify where mistakes occur. Frankly, whoever proposed the rule change to make CEOs less accountable, that's the person who should get locked up here. Accounting only works when it's reliable. And accounting is only reliable when it is safeguarded by third parties and the third parties find it convenient to lie — which they often do, for the sake of profit seeking — then the effectiveness of accounting and audience starts to disintegrate almost immediately. I recommend the book "the reckoning" I believe by Jacob Soll, on both the history of accounting, and the history of fraud in public accounting. At this time in American history, you should be making every effort to make American financial accounting, more reliable, not less reliable.

Anita — Jun 14, 2026
Subject: S7-2026-15 From: Anita Affiliation: Jun. 14, 2026 I see no upside to making changes to quarterly reporting. Do NOT make changes. Weakening rules only re-opens the door for bad behavior.
Respectfully, Anita Creech

Anita — Jun 14, 2026
Subject: S7-2026-15 From: Anita Affiliation: Jun. 14, 2026 I'm not sure why you think semiannual reporting is enough. C staff needs to be aware AND sign off that all is well with their books. If they aren't and they sign off, best to get caught sooner rather than wait until it is a total train wreck. Just a little tired of corporation bigheads being coddled.

Anita Farber — Jun 14, 2026
Subject: S7-2026-15 From: Anita Farber Affiliation: Jun. 14, 2026 So is the SEC saying it’s burdensome to require the CEOs who sit in large luxury offices, travel on corporate jets, and make obscene ly large salaries should not have to review the financials of their publicly traded companies and sign off on them as a good faith t effort to be upfront, honest and complete for the public who buys their stocks and places their faith and trust and the financial health of their families in these ceo’s hands or face possible jeopardy of incarceration for knowingly certifying false or incomplete or lackadaisical accounting. I don’t get it. Someone in authority or in charge needs to be completely honest and be willing to stand behind the honestly and integrity and timeliness of theinformation released. As to Enron, I’m biased. My motherinlw lost most of her life savings when she relied on false and incomplete investment advice. Based on inaccurate financials. And ended up relying on government help to get to the end of her days. And she was a widow of a proud Enron retiree which set her up to be a supporter of the company. And she was predisposed. To wanting them to do well. But she did read the financials and was a fairly astute investors so I don’t think it wasn’t her fault as as a uninformed investor. She just didn’t get the correct information Before making her investment

decisions. My personal opinion is that folks in positions of trust should work to earn and then keep that trust. And the ‘burden of a signature to certify the validity of company financial statements is not too much to ask. Anita Farber Austin Tx.

Anna Dantzler — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Anna Dantzler Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
We're now definitely in the "Information Age." The speed of information accelerated greatly over the last 250 years and the digital age has brought nearly instant data transfer. Technology now allows businesses to capture, store, transmit, and analyze their performance at unprecedented speeds. This is not the time to slow down the rate of disclosure to the public.
Reducing the frequency of these disclosures would provide more time for bad actors to act on insider information while at the same time limiting the ability of law-abiding insiders to make stock transactions legally.
I implore the Commission to support transparency and trust in our markets by maintaining the expectation of quarterly disclosure.

Anne White — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Anne White Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
My view on Rule S7-2026-15 Quarterly reporting needs to be required and kept as it is for a level playing field for institutional and retail investors. Fair is fair and to take away a tool that retail investors use to make investment decisions is providing advantages to those who already have the insider track. This proposed rule is financial discrimination by providing advantages to higher net worth individuals and that is not what an open market should be. Transparency is the key to investing and pulling the wool over investors eyes is not the way to do it.

Annette Finkelstein — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Annette Finkelstein Affiliation: Jun. 14, 2026 From: Annette Lynn Finkelstein
Retired School Librarian
Tucson Arizona
Dear Sirs or Madames:
Keep Quarterly Reporting. In 2026 we see ever more lack of transparency from financial services that is aided and abetted by politicians. This must be curtailed. Reducing investor/consumer access to financial information limits wise decision making and increases consumer risk. History shows plainly and irrefutably that doing so hurts the economy generally and smaller investors expressly. This a bad, bad idea.

Anonymous — Jun 14, 2026
Subject: File Number S7-2026-15 From: Anonymous Affiliation: Jun. 14, 2026 Dear rules committee member(s),

I would like to add my letter to those opposed to your proposal to eliminate 10-Q independently audited and management certified quarterly reporting (File Number S7-2026-15).

As an individual investor for more than 30 years, I have found company quarterly financial reports

and 10-Q filings of utmost importance in sustaining my ability to monitor the activities and progress (or lack thereof) of the companies I monitor. I also rely on publications such as Value Line and Morningstar, and analysts' consensus estimates for quarterly financial information; and these publications and estimates also rely heavily on the 10-Q reports.

I am concerned that the lack of this information provided to individual investors as a whole would put us at an extreme disadvantage to those with access to this information from inside or from the outside looking in.

I strongly encourage you to continue requiring 10-Q requirements for all public companies.

Thank you for your consideration.

Roger L. Brouse

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 14, 2026 Thomas Gonzalez - Service Associate - Transparency is the only way you can decide if a company is viable to invest in with confidence. After years of SEC rubber stamping Bernie Madoff financial reports with the with no scrutiny. You would think your agency would understand the importance of being transparent. At least with a trail of statements there is evidence to protect investors if the board engages in shady dealings.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 14, 2026 To whom it may concern,
Transparency, and accountability are always preferred to opacity and the possibility of malfeasance - unless you're a criminal organization. Or, just supporting one.
All entities, from individuals to corporations to multi-teared governments must be open, and transparent so that criminality is impaired, assets are secured, and, in case of said criminality- they can be prosecuted to the full extent of the law.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 14, 2026 My name is Amanda. For the past many years of my life I've been a caretaker but before that I worked in title insurance and home mortgaging. This is a horrible idea and alarming to read about. We're at a place where we are trying to introduce more transparency in government and those institutions that affect citizens' lives directly. Changing this well established policy of disclosure just invites the public to not only lose trust in how the system works, it makes it much easier to believe all of the scandals and talk of fraud and corruption. There is no good reason to make this change. Don't make the SEC the next big headline we read about repeatedly for years to come. Don't invite speculation and accusation.

I am opposed to reducing SEC reporting to bi-annual timing (S7-2026-15) The public has invested their personal savings into corporate investments as a means to support economic growth, which in turn supports their own personal financial future. Reducing the reporting periods allows corporate issues/losses to compound longer, directly impacting their investors' finances. This change will only feed corporate lethargy, letting problems linger longer, directly impacting their investors.

"If it aint broke, don't fix it"

Do your job to protect investors and reject this SEC proposed rule.

Anonymous — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 14, 2026 Hello,
I am writing to voice my opinion on S7-2026-15. Financial reporting should continue to be quarterly. Not semi-annually. Reporting quarterly protects the public's assets invested in these companies. It keeps companies honest & accountable.

Working for a publicly traded company I have seen first hand the importance of quarterly reporting. It makes a difference in drive & performance for a company.

We have had semi-annually reporting and it is not as effective and impacted valuations & earnings.

Thank you for your consideration.

Anthony Boyce — Jun 14, 2026
Subject: S7-2026-15 Comment From: Anthony Boyce Affiliation: Jun. 14, 2026 Quarterly reporting is needed. It gives the shareholders a snapshot of how the company is doing in a timely manner. Expanding it to 6 months will result in less time for shareholders to spot and react to negative trends.

It also keeps the company accountable, which is the reason for the reporting. The company has a duty to be upfront to their shareholders and to operate within federal guidance.

Anvitha Bogineni — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Anvitha Bogineni Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Being a retail investor having exposure to quaterly earning would help me in deciding the actual projection of my investment and derisk if the deviation is significant. If made optional, companies would delay/opt out of this disclosure, keeping retail investors like me in dark for most of the year. This keep me at highly disadvantaged position as hedge funds and institutional investor could still get the access from insider group. Being a retail investor i would be forced to fill this gap by expensive bloomberg like subscription for alternative data or estimates which is unfair considering my portfolio size. Hence I would request sec to not to make these reporting optional.

arlenappel — Jun 14, 2026
Subject: S7-2026-15 Comment From: arlenappel Affiliation: Jun. 14, 2026 I oppose changing reporting to semi-annual reports. In this age of instant information that can change the world and its businesses very quickly, there is great harm that would result in withholding corporate information for 6 months. Corporations should be held to quarterly reporting. As a lawyer and an investor, I need to have confidence in timely disclosures by publicly traded companies that keep investors informed. History has shown us the negative consequences to the US markets when reporting is only once every 6 months. Thank you for your consideration.
Sincerely,
Arlen Appelbaum, Esq.

Arnie Drozen — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Arnie Drozen Affiliation: Jun. 14, 2026 Arnie Drozen, retired, New York.

I, like millions of others, am invested in the stock market through an IRA which supplements my Social Security. Although I'm not a fan of companies being driven to meet quarterly targets instead of longer term goals, politics seem to be influencing and favoring some of our largest corporations which makes me less inclined to allow a 6 month window between public reporting. I am in favor of more transparency of corporate financials as well as more oversight of corporate boards.

Thank You.

Arnold Taube — Jun 14, 2026

ART AGUIRRE — Jun 14, 2026
Subject: Comment on S7-2026-15 From: ART AGUIRRE Affiliation: Jun. 14, 2026 Art Aguirre, retired banker, Michigan. My retired wife and I rely heavily on our investment portfolio to make ends meet. Social Security alone doesn't do it. Changing the SEC reporting requirements from quarterly to semi-

annually and the resulting, significant loss in asset value and dividend payouts will not only impact our ability to cover living expenses, but significantly increase the risk of running out of money before we die. Such a scenario across the country affects the baby boomer generation, and ultimately younger demographics that eventually may bear the cost of caring for financially challenged seniors. Therefore, the better decision is to leave quarterly reporting requirements intact.

Asha Fotos — Jun 14, 2026
Subject: S7-2026-15 From: Asha Fotos Affiliation: Jun. 14, 2026 My name is Asha Fotos and I work in an industry that commands accountability every second of every day. If I misstep it could cost me my life so with every action I take the consequences are dire. Electrical work requires knowledge, attention, and a steadfast ethical mindset.

I cannot cut corners, Jerry-rig work, or pretend in any way or circuits can overload, fires or explosions that destroy both people and equipment can happen.

If I can pay attention every moment of the day that I lay my life on the line getting power to our patrons without causing them fret or worry that I've done the job right and they will continue with their business without dying or losing all that they've built, Congress can hold the same attention just 4 TIMES A YEAR.

Congress must continue its job to be sure that the rest of us can rest easy knowing that the people we have elected to look out for our best interests will continue to hold those who don't pay as close attention to our best interests in favor of the bottom line, accountable.

We know where this goes when the pressure slips. Keep the accountability where it currently stands at 4 times a year. Please realize we know that under the same premise we could be looking at this in

a few years to drop the accountability again and again until there is none.

It isn't laws that are ruining the country. It's the lack of accountability to what is already lawful.

Unaccountability is destroying the fabric. Shore it up. Do what is right or watch what you've built crumble. All your millions will mean little when they become millions of worthless grains of sand because you took what cemented those grains together to back a fortified structure and made it a slurry.

Do better. Jeez.

Ashlee McCoy — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Ashlee McCoy Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:

To the Securities and Exchange Commission:
I am writing to express my strong opposition to the Commission's recent structural proposals, specifically the shift toward semiannual corporate reporting and the rescission of Regulation NMS Rule 611. While these changes are framed as a means to minimize regulatory burdens and streamline capital formation, they create severe systemic risks that directly undermine the safety, transparency, and fairness required by retail investors.
Eliminating mandatory quarterly financial reporting in favor of a semiannual framework severely degrades the public information ecosystem. In a high-speed trading environment, a six-month window of corporate silence is an eternity. This massive reporting gap will inevitably exacerbate information asymmetry between Wall Street insiders and Main Street investors. While institutional firms possess the resources for proprietary data tracking, retail investors rely solely on standardized, timely disclosures to monitor risk. Reducing reporting frequency will lead to sudden, high-volatility price shocks when months of accumulated material data is finally released, making the markets far more hazardous for non-institutional capital.
Second, the proposal to rescind Rule 611—the trade-through prohibition—poses a direct threat to execution quality. For decades, the Order Protection Rule has ensured a level playing field by mandating that market orders receive the best displayed price across all national exchanges. Rolling back this protection invites market fragmentation and permits brokers to bypass superior public quotes. This structure increases transaction costs, degrades price discovery, and compromises the principle that all participants deserve fair execution.
The SEC's primary statutory mandate is investor protection. Sacrificing market transparency and price integrity for corporate convenience severely weakens public trust. I strongly urge the Commission to maintain quarterly reporting and preserve Rule 611.

Becky Howell-Adams — Jun 14, 2026
Subject: S7-2026-15 From: Becky Howell-Adams Affiliation: Jun. 14, 2026 The signature is the deterrent.
Four times a year, the CEO and CFO must each put their name to the company's books, certifying

they've reviewed the report and that it contains no untrue statement of a material fact. Knowingly certify a false one: up to $1 million and 10 years in federal prison. Do it willfully: up to $5 million and 20 years. The proposal cuts those certified filings from four to two. Half as many moments when anyone at the top must stake their freedom on the truth.

becky nuttall — Jun 14, 2026
Subject: Comment on S7-2026-15 From: becky nuttall Affiliation: Jun. 14, 2026 Becky Nuttall, regulatory medical writer, Pennsylvania. I'm about to retire and I will rely on my savings which include investments. There are no pensions, unlike in the past. I still help the income of my son who struggles in today's economy. I am not an insider, so I won't get early notice on the ups and downs of companies. Switching reporting from quarterly to twice a year will negatively affect me, as well as most everyone I know. I don't know what is driving this but does it make sense to go back to a way that's been proven less beneficial? Stand up for the common people - don't try to fix something that isn't broken. Stay with quarterly reports.

Berlinda Recacho — Jun 14, 2026
Subject: S7-2026-15 Comment From: Berlinda Recacho Affiliation: Jun. 14, 2026 My name is Berlinda Recacho. I am a nonprofit grant writer. I rely on quarterly information to make financial decisions. It’s important to get regularly scheduled information because longer gaps make it harder for people who are not financial experts to see what is happening with their money. It can’t be "optional" because all companies should be required to share this information for the good of all investors—not just the experts. The savings to companies aren't worth the cost to the majority of Americans like me, who depend on quarterly reporting.

Bernadette Eyre — Jun 14, 2026

Subject: Comment on S7-2026-15 From: Beth Aramendi Affiliation: Jun. 14, 2026 To Whom it May Concern:

If the current financial reporting system isn't broken why fix it. Less oversight historically has not improved the accuracy or integrity of Financial Reporting. It is amazing what companies will do to drive a penny in results. Waiting six months to have the information is too late. We have increased reporting tools and efficiencies in data review reporting including AI why would we eliminate a reporting period this is counter intuitive.

Beth Miller Tipton — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Beth Miller Tipton Affiliation: Jun. 14, 2026 Attention SEC RE: Open Comments

I have been saving and investing for 30+ years. I have denied myself luxuries to build a nest egg and the SEC should not endanger that.

The SEC should absolutely maintain quarterly investment reporting. Reducing disclosures to twice annually weakens transparency, delays critical information, and undermines accountability. Less frequent reporting can increase market inefficiencies, reduce investor confidence, and negatively impact investment returns. These consequences extend beyond financial markets, threatening citizens' retirement savings, livelihoods, and financial security. Reduced transparency can contribute to economic instability, erode public trust, and increase the risk of wealth destruction for millions of Americans who depend on fair, informed, and efficient markets.

Be wise. Make the right decision.

bobbie dunn — Jun 14, 2026
Subject: Subject: Comment on Proposed Rule: Semiannual Reporting (File No. S7-2026-15) From: bobbie dunn Affiliation: Jun. 14, 2026 To Whom It May Concern:I am writing as an individual investor whose primary financial security relies heavily on my employer-sponsored 401(k) plan. I strongly urge the Commission to reject the proposal to replace quarterly Form 10-Q filings with semiannual Form 10-S filings.

As a participant in mutual funds and passive index funds, I rely on fund managers to steward my long-term savings. The proposed six-month reporting gap creates dangerous blind spots. It prevents fund fiduciaries from identifying material risks, sudden debt accumulation, or corporate governance failures in a timely manner.

Furthermore, reducing transparency will inevitably increase market volatility. When negative financial developments are hidden for six months and then suddenly disclosed, the resulting stock price drops will be severe. These abrupt market shocks directly threaten the stability of my retirement nest egg.

The SEC's foundational mission is to protect retail investors and maintain orderly markets. This proposal does the opposite by widening the information gap between Wall Street insiders and everyday savers. Please maintain the quarterly reporting framework to preserve market integrity.

Sincerely,
Bobbie Dunn,
Annandale, VA

BobbiYum — Jun 14, 2026
Subject: S7-2026-15 From: BobbiYum Affiliation: Jun. 14, 2026 Quarterly reporting by corporate executives keeps the game honest. Bi-annual reporting will allow corporations the time to cook the books, this is NOT a good thing for the American public that is already struggling financially thanks to the fiasco government we currently have it place.

Respectfully,

Robin Emrich

Bobby Bailey — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Bobby Bailey Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Lessening the filing requirements from 4 times per year to two gives illegal actors more time to harm investors with their illegal actions. That violates the SEC's purpose to protect investors.

Bobby Carbonell — Jun 14, 2026
Subject: File No. S7-2026-15 From: Bobby Carbonell Semi annual reporting will allow companies to spend more time planning and executing on their business plans instead of filing paperwork. Also,

quarterly reporting drives short term thinking in publicly traded companies which is leads to less stable employment and companies with shorter lifespans. In 1958, the average lifespan of a company on the Standard & Poor's (S&P) 500 Index was 61 years. Today, that tenure has fallen to roughly 15 to 20. This isn't just about reporting but I've seen firsthand working in public companies, that pressure to close deals or make moves before the next report releases leads to hasty decisions like selling a part of the business for penny's on the dollar vs investing the time to make a more profitable exit or build a better business. Long term investors will not see any material impact in my opinion. The only people complaining about this are the very small minority of short term traders and hedge funds. Do the right thing and allow public companies to make semi annual reports!

Bogdan Krzeminski — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Bogdan Krzeminski Affiliation: Jun. 14, 2026 I am writing as an individual investor to strongly oppose the proposal to allow public companies to switch from quarterly to semiannual reporting. A six-month reporting gap creates a massive blind spot for everyday investors like me. In today's economy, 180 days is an eternity. If a company's fundamentals begin to deteriorate shortly after a semiannual report, an ordinary investor could hold a failing asset for months without any official warning, while corporate insiders and institutional giants with proprietary data channels protect themselves. Bogdan Krzeminski Myrtle Beach SC 29588

Brad Beers — Jun 14, 2026
Subject: S7-2026-15 From: Brad Beers Affiliation: Jun. 14, 2026 Bradley Beers, retired, Dorr Michigan;
I am a long time citizen and investor that is experienced multiple corporate bankruptcies in my personal portfolio. I have owned both Enron and WorldCom and I've lost much hard earned-money.
By eliminating quarterly reporting you are creating an underworld and an unnecessary grace period for fraud and abuse.
This will happen!
Do not sell out every day Americans for more corporate welfare.
Kind regards,
Bradley Beers

Bradley Riley — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Bradley Riley Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
More fraud and abuse of the retail "dumb money" investors." Not surprised but if this is passed, that really is taking things too far. Retail investors are already going in blind with the tools and resources available compared to insiders, institutions, hedge funds, etc. But without quarterly reports, we may as well close our eyes and buy random companies and hope for the best.

Brandi Lowry — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Brandi Lowry Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:

I've been a retail trader since mid 2019. Trading has helped me and my family bridge the gap & ease the financial burden of being a single-paycheck household. Having quarterly financial reports enables me to make informed, profitable decisions when investing. If retail investors are unable to access this information, it would leave us trading blind, thus creating more of a financial burden. Being disabled, this is one of the only ways I can make money for my family. Please reconsider Rule S7-2026-15, as I believe this would unfairly cripple most retail traders.

Branson Family — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Branson Family Affiliation: Jun. 14, 2026 This is not fair. After wirking for my retirement and the federal government raiding social security on a we can because you won't know endangering everything citizens have put into it.
This is the only way that i could have retired and been comfortably, with in reason. The citizens who have put these funds into the market, did so with the understandingbthat their investments could be observed abd could teach theirvchildren thatvhard work pays off. By taking away, and changing how reportingvidcdone , to me seems like a slap in the face to every citizes who has used the free market. Because of this, it would force me back into the labor force to perform duties that are no longer I am not capable to do.
The work I've spent the last 50 years performing they do not want the aged to perform, andvthe skills need to be performed with skill and acuracy. As a senior, i cannot survive as comfortably and to have monies taken for an experinment is a slap in the face to ALL seniors.

Brenda Galliher — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Brenda Galliher Affiliation: Jun. 14, 2026 First we did away with guaranteed pensions because Americans should be smart enough to save and invest for their own retirement (many have not). Now we want to hamstring those who have saved by giving them less information with which to make investment decisions? This at a time when technology makes it much easier and cheaper to produce financial reports? This did not work out well for us in 1955. History is meant to teach us lessons so that we don't repeat them. Please remember the lesson and don't repeat it, many of us have worked very hard to create our retirement nest eggs and can't afford to repeat lessons already taught.

Thank you for your attention to this matter and choosing what is best for ALL Americans.

Brian Le Blanc — Jun 14, 2026

Subject: S7-2026-15 From: Brian Le Blanc Affiliation: Jun. 14, 2026 I strongly oppose eliminating quarterly or the requirement for CEOs to attest to the truthfulness and accuracy of financial reports. Such moves are in the opposite direction of where we should be heading. In fact, regulation should be moving toward complementing the currently held notion that corporations are people. Statutes should be developed for these “people” to be incarcerated for unlawful acts for which a natural person would serve time, either by allowing the CEO to serve the time, or by confiscation of earnings for the period of incarceration.

Burton Gillies — Jun 14, 2026
Subject: S7-2026-15 Comment From: Burton Gillies Affiliation: Jun. 14, 2026 All you are telling me is you think Elon Musk should have more opportunities to rob me than he has currently. No thanks! He’s robbing me blind as it is. He stole my Scottrade and TD Ameritrade accounts at the tune of $245,000. Go after that Nazi pig!!!

Buttonhead — Jun 14, 2026
Subject: S7-2026-15 Comment From: Buttonhead Affiliation: Jun. 14, 2026 I retired in 2023 after 50 years in the work force. I depend on my investments to supplement my social security income. I live in a high cost of living area in California and absolutely MUST trust the companies I invest in. SEC is here to protect investors, but how can that happen with LESS accountability?

Please protect us from our lack of control by strengthening reporting requirement of quarterly reporting so we know the truth about our investments. Working people need this protection because we aren't favored with insider information.

We have to follow the law and report our income, so companies must be supervised closely and required to report truthfully every quarter.

Byron and Mavis Selway — Jun 14, 2026

Carl Palmer — Jun 14, 2026
Subject: S7-2026-15 From: Carl Palmer Affiliation: Jun. 14, 2026 Regular, comprehensive quarterly reporting forms a crucial pillar for fostering transparency and reinforcing trust across the financial ecosystem. These periodic disclosures are instrumental in empowering investors with the timely and accurate information necessary to make well-informed decisions, thereby safeguarding their capital and ensuring equitable market participation. Furthermore, such consistent reporting significantly bolsters the integrity and effectiveness of regulatory oversight and internal governance frameworks. It enables thorough scrutiny of corporate performance, ensures adherence to compliance standards, facilitates early identification of potential risks, and ultimately upholds the highest benchmarks of accountability and ethical conduct within the marketplace.

Carla Stish — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Carla Stish Affiliation: Jun. 14, 2026 Companies and financial institutions need to continue reporting their financial status and earnings on a quarterly basis.

Quarterly reporting allows for transparency and timely mitigation of poor investment strategies and accounting mistakes. Companies owe it to shareholders and account holders to be as transparent as possible in regards to the impact of business and financial strategies on investment accounts and institutional capital and financial holdings.

Corporations often push the limits of and interpretation of financial regulations and accounting rules to be in their favor; the SEC needs to support timeliness, adherence, and oversight on reporting requirements and rules in service to the American people.

As history has shown, the corporate and financial sectors cannot reliably "police" themselves, e.g. the Great Depression (1930s), the Savings and Loan crisis (1980s), the Dot-com crash (1990s), the housing/Great Recession (2008), and COVID (2020). The SEC is the American peoples' first line of defense in avoiding future financial crises.

Carol Carey — Jun 14, 2026
Subject: S7-2026-15 Comment From: Carol Carey Affiliation: Jun. 14, 2026 Please reconsider changing quarterly reporting. I rely on, and feel more confident my portfolio is performing at the highest levels with quarterly information to make decisions. I feel that longer gaps create an unfair advantage for corporate insiders, and "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates. Lastly, the savings to corporations is minuscule in comparison to the potential cost to me.

Thank you for your consideration and pray the SEC does the right thing for portfolio investors rather than corporate interests alone.

Regards,
Carol Carey

There doesn't appear to be a good reason for cutting back quarterly reporting except the "Big Boys don't wanna". And why not? More time in the shade and shadows to muck up the works, and attempt to get away with dubious actions. Otherwise , there would be no reason NOT to be transparent. Much damage can be done in six months—America has already seen the evidence: January to June 2025, July to December 2025, January to June 2026. Keep everyone in the light of day. KEEP QUARTERLY REPORTING.

cath s — Jun 14, 2026
Subject: S7-2026-15 From: cath s Affiliation: Jun. 14, 2026 .
Quarterly reporting has proved to be essential for preventing fraud. Thanks to quarterly reports investors know how the company is performing, how management is functioning and whether or not the business is meeting goals/expectations.
Quarterly reporting ensures transparency and deters fraud by keeping companies under regular public scrutiny.
A switch to semi annual reporting would create longer time periods during which insiders possess information that the public does not have- which would increase the risk off insider trading and reduce overall market efficiency.
Transparency is why the U.S. markets are so large compared to the rest of the world (in the UK and much of Europe companies only report on a semi annual basis).
Quarterly reporting contributes to the stability of the U.S. stock market.
Overall quarterly reporting works - it deters corporate fraud by making it harder to hide material misdeeds, artificially inflate revenues or conceal liabilities for extended periods.
Why try to change something that works so well? It will only benefit those who are trying to work the system to their own (illegal) advantage.
Cathy Stogel, Ellicott City, Maryland- retired academic advisor / counselor

Cathy Hamma — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Cathy Hamma Affiliation: Jun. 14, 2026 Catherine Hamma, Retired, Arlington Heights, IL

Quarterly reports is the way to go. It keeps companies accountable for our investments.

I retired a couple years ago and my cost of living relies on the value and health of my investments. I want to know what's going on with the companies where my money is spent. Knowing a company is having problems sooner allows me to make informed adjustments to my funds. This ensures I will have the funds I need throughout my lifetime. If my funds lose their value, I may have to sell my house, or go back to work. I will no longer be able to afford the retirement I dreamed about and spent over 50 years working for.

Companies have enough ways to cheat the system. Let's not add another option for them.

Catherine Hamma

Cathy Peveto — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Cathy Peveto Affiliation: Jun. 14, 2026 It is imperative that quarterly reporting remains in place. This reporting structure allows individuals, money managers, pension funds to have confidence in the investment choices they are making.

Quarterly reporting also ensures that companies are held to a higher level of transparency.

Transparency leads to a higher level of trust in their brands and business overall.

I strongly believe that Quarterly reporting is critical for the long-term growth of our markets and our economy.

Cathy Peveto
Financial Advisor since 2012

Charles Dignazio — Jun 14, 2026
Subject: S7-2026-15 Comment From: Charles Dignazio Affiliation: Jun. 14, 2026 I am Charles Dignazio, I am retired but I use the quarterly reporting to keep up with what is going on with my stocks I don't need six months after I brought a certain stock to find out that stock should have been sold three months ago and I would be especially pissed off to find out that the money managers running that stock got rid of their shares three months ago but didn't think about their customers. So they profited off the stock and then they got out when the stock bottomed out and you think this is

fair treatment for customers that they go out of the way to attract making wild promises sometimes only to be lying through their teeth and if we have to wait six months to find out how really bad that stock was when the lawsuits start flying SEC may find itself part of such a lawsuit for allowing such a stupid ruling in the first place.

Charles Martinez — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Charles Martinez Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
My view on Rule S7-2026-15.
Bad for investors.

Charles Shirley — Jun 14, 2026
Subject: S7-2026-15 Comment From: Charles Shirley Affiliation: Jun. 14, 2026 I am your average everyday retired person who has trusted the hands of my financial advisor to ensure the decisions affecting my investments are timely and accurate. It seems to me that the longer information can stay in the dark, the more the more likely it is that the average guy will have the possibility for failed investments. I am for the continued quarterly reporting.

Where heaven and earth come together.

Charlie Wend — Jun 14, 2026
Subject: S7-2026-15 From: Charlie Wend Affiliation: Jun. 14, 2026 Keep the quarterly, signed, reporting. I'm a retired law enforcement Commander who is really bothered by attempts to obscure accuracy and honesty in American business. All Americans are hurt when dishonest people and corporations commit fraud. I live in Mount Vernon, Washington, and I am affected, as is everyone else, by fraud which affects everything from prices to investments. Keep the quarterly, signed reports!

Yahoo Mail: Search, Organize, Conquer

Cheryl Camuso — Jun 14, 2026

Subject: Comment on S7-2026-15 From: Cheryl Camuso Affiliation: Jun. 14, 2026 My name is Cheryl C, and I live in PA. I am retired, and my husband and I are making decisions today about moving to a continuing care retirement community in the coming months.

I care deeply about retaining the SEC quarterly reporting proposal. We want to safeguard the money we worked so hard to put away, often working 60 hour weeks that took me away from our children at times when they were small. The transparency for SEC quarterly reporting is critical for accountability and good money management. This happened in the 1950's, too, and people lost up to a third of their savings.

Our desire is not to be a burden on our children or on the "system" that is at the same time cratering under rising Healthcare costs and threats from the administration to reduce Medicare and Social Security. Together the confluence of these factors will exacerbate financial struggles for families, particularly retirees. The chaos and disruption of families' lives will cripple the economy, cause major civic disruptions and threaten the lifeblood of our nation even further.

Chris Flight Paramedic & Firefighter — Jun 14, 2026
Subject: File No. S7-2026-15 From: Chris I'm Chris, a flight paramedic and a firefighter in Atlanta, Georgia. Quarterly reporting provides more market insight, allowing investors to make more informed decisions. This allows the market to grow stronger. Less frequent reporting weakens the market and harms all that invest. I could lose up to 38% of my retirement if we roll back reporting

requirements to semi-annually, along with many others! Please keep the market reporting quarterly!!!

CHRIS H SMITH — Jun 14, 2026
Subject: Comment on S7-2026-15 From: CHRIS H SMITH Affiliation: Jun. 14, 2026 Please do not change corporate reporting requirements to semi annually.

My reasons for this opinion are as follows:

* Corporations are not clamoring for these changes

* If a company is doing poorly the facts of just how poorly would now be delayed for 6 months!

* Poor corporate results reported so infrequently would exaggerate stock market reactions - bigger stock price fluctuations

* There is history - we've done this before between 1955 & 1970. The results were poor.

* Corporate Fraud can be more easily hidden without required frequent reporting

* Countries with current semi-annual reporting are not world leaders

Please make no changes to our current system of quarterly financial results reporting.

Chris H Smith
Retired - former business owner (sold in 2022)
Olympia, WA

I feel changing the required reporting period is a completely unnecessary idea with the risks of making changes too overwhelming. If anything we need more corporate transparency, not less. There is enough uncertainty in our financial lives and the world in general today.

Chris James — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Chris James Affiliation: Jun. 14, 2026 Please let us stay at quarterly reporting. I'm retired, divorced, and need to keep as much of my funds as I can

Pretend I'm your Grandmother and you really do want to protect Me!
As a small time American investor, I truly need pertinent data that helps me to stay on top of activities that affect My retirement.
Do Not modify reporting requirements that have a negative effect on my ability to adjust my investments as I see fit.
Thank you, Grandmother

Christine Bronk — Jun 14, 2026
Subject: S7-2026-15 Comment From: Christine Bronk Affiliation: Jun. 14, 2026 Hello, SEC.

Companies should still report quarterly. That keeps things more fair for everyone---no insiders have knowledge for 6 months that the public doesn't. Any small savings you think will be made will not be shared with the public, so we, the general people, will see no change in that regard. This change in reporting has been done for a few companies in Europe, and they are not doing well.

Please, for the good of the companies and the good of the public, keep public companies reporting quarterly.

Sincerely,
Christine Bronk

CHRISTINE FLORY — Jun 14, 2026
Subject: Comment on S7-2026-15 From: CHRISTINE FLORY Affiliation: Jun. 14, 2026 My name is Christine Flory. I am retired, but previously how positions and the insurance industry and also in the securities industry (series 7, series 63, and series 24). I'm opposed to changing
require reporting to just twice a year from the current quarterly requirement, as to do so it impede the ability of the public, and individual investors, to make informed investment decisions. As we've seen over the past several months, the economy, and specific
industry segments, and even individual companies financial stability can fluctuate widely in the course of weeks and even days. Returning to semi-annual reporting, when leave the public, and individual investors, without the knowledge needed to protect their
life savings

Christopher Schutz — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Christopher Schutz Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
The quarterly reports allow everyone to have a chance in seeing how individual companies are doing. This also helps to prevent hiding information and to keep companies honest. Taking this away only promotes insider trading (which is illegal and should be heavily regulated). The small guy already has enough challenges to make it, making quarterly reports not maditory would make it impossible and show how greedy this world actually is.

Christopher Southwick — Jun 14, 2026

CINDI YOUNGSTEAD — Jun 14, 2026
Subject: S7-2026-15 From: CINDI YOUNGSTEAD Affiliation: Jun. 14, 2026 Quarterly reporting works. It doesn’t work for companies because it makes them more accountable. Market and world forces change in a second, and organizations adjust quickly. When shifts are not in the best interest of the investors, they need to know immediately, not in 6 months.

Cindie DeWolf — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Cindie DeWolf Affiliation: Jun. 14, 2026 Accurate and timely reporting helps with transparency in the market. Leading to less volatility. Do not change the reporting periods, keep them quarterly. The average person who holds stock in their retirement does not need this change. Cynthia DeWolf, Howell, MI

Cindy Anderson — Jun 14, 2026
Subject: S7-2026-15 Comment From: Cindy Anderson Affiliation: Jun. 14, 2026 Continue to make the corporations be transparent! And hold them accountable for their undermining of the stability of our financial system (wish we could do the same for tRump and his illegal family businesses!)

Cindy Forrest — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Cindy Forrest Affiliation: Jun. 14, 2026 I’ve been saving all my life, and while I don’t have a huge balance saved, I have enough that I can consider retiring in the 65-70 range. I’m tired. The thought of what lower transparency could do to my savings at tgis point is horrifying.

I work in collections, and I can see that the quarterly reporting keeps my company more healthy as well. It’s a chance for us to true up and it’s a chance for us to catch mistakes we’ve been making over the prior quarter before they snowball. While quarterly reporting takes some work, it’s how our company is organized - and it is much healthier for us.

Sent from my iPhone

Cindy Grimes — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Cindy Grimes Affiliation: Jun. 14, 2026 This means way less transparency meaning lower returns and lower valuations for the people! For an ordinary investor, a return to those days could mean more than a third less money! What is wrong with you that you’re screwing over the average citizen with less return and easier for businesses to cheat?!!

Sent from my iPhone

Cindy Hemm — Jun 14, 2026
Subject: S7-2026-15 Comment From: Cindy Hemm Affiliation: Jun. 14, 2026 Corporations notoriously commit fraud against consumers on a daily basis. They MUST be held accountable financially, and while quarterly reports don't prevent fraud, it reduces it. At least in theory. Americans are tired of millionaires and billionaires making their own rules.

Cindy Hendrix — Jun 14, 2026

collese dahlberg — Jun 14, 2026
Subject: Comment on S7-2026-15 From: collese dahlberg Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:

I am writing to oppose the proposed change that would allow public companies to stop filing quarterly reports and instead report only twice a year.

I am a retired individual investor. My retirement savings are invested in S&P 500 index funds, which means my financial security depends on the transparency and integrity of U.S. public markets. I do not have access to private meetings with executives, institutional research teams, or non-public company information. Like millions of ordinary retirement savers, I depend on the SEC’s public reporting framework to make sure the market receives timely, consistent, and comparable

information.

Quarterly reporting is not just a paperwork exercise. It is one of the main ways investors, analysts, pension funds, retirement plans, and the market as a whole can evaluate whether a company's condition is improving or deteriorating. Reducing required reporting to twice a year would leave longer gaps between meaningful disclosures. That could allow financial problems, declining sales, debt concerns, liquidity problems, or management mistakes to remain hidden for months longer than they do today.

I am especially concerned that this change would disadvantage ordinary investors while benefiting corporate insiders and large sophisticated investors. Large institutions may still have better access to management, private research, industry data, and expensive analytical tools. Small investors and retirement savers rely much more heavily on standardized public filings. Less frequent required reporting would widen that information gap.

I also object to making quarterly reporting optional. If some companies continue to report quarterly while others report semiannually, investors will lose consistency and comparability across companies. That inconsistency could make broad index investing less transparent as well. An S&P 500 index fund holds hundreds of companies. If many companies choose reduced reporting, index investors would have less timely information about the businesses that make up their retirement savings.

I understand the argument that quarterly reporting can be costly and may encourage short-term thinking. However, the solution should not be to reduce transparency for investors. If the SEC believes reporting requirements are too burdensome, it should look for ways to simplify or streamline quarterly filings while preserving timely disclosure. Investor protection should remain the priority.

The U.S. public markets are trusted around the world because they are relatively transparent, regulated, and information-rich. Weakening regular disclosure requirements risks undermining that trust. For retirees and long-term savers, transparency is not a luxury. It is a basic protection.

I respectfully urge the SEC to reject this proposed change and maintain mandatory quarterly reporting for publicly traded companies.

Sincerely,

Collese Dahlberg
yelm, WA

Connie V Stinson — Jun 14, 2026
Subject: S7-2026-15 From: Connie V Stinson Affiliation: Jun. 14, 2026 Enron was a lesson in how important it is to keep things transparent, up to date, and honest. Corporations are out of control with lobbying laws to give them powers they shouldn't have. Every law that maintains the keeping of the vital laws we already made, still to be done, is steps in the best direction. Things are skewed in favor of Big Corp already, time to reign it back into balance. Reporting and verifying the information quarterly is necessary. Better yet, decentralization of all business back into mom and pop small business and restrengthening anti Monopoly laws to assist in quarterly reporting is needed also. Rehauling business in America is getting rid of the few owning everything and no integrity. Star Trek future, not Matrix.
Thank you,
Connie Stinson

Subject: Comment on S7-2026-15 From: Curt Robinson Affiliation: Jun. 14, 2026 Roll tax rates back to 1955
Hiding information or limiting it does not translate into real benefits for the general public.

CWL — Jun 14, 2026
Subject: S7-2026-15 From: CWL Affiliation: Jun. 14, 2026 As an Internal Auditor, I believe the current law works as intended and protects stakeholders. I recommend keeping the quarterly reporting in place. The CFO and CEO know they need to keep on top of every department as it is their signature on the financials. Once we move to semi-annual and once we lower the large accelerated filer from

2billion to 1billion there will be many other opportunities for fraud in public company reporting. Don't change something that works so well.
Clark Lowery
Manager Internal Audit
Safety Insurance

Cyndy Bradfield — Jun 14, 2026
Subject: CEO transparency with quarterly reports. From: Cyndy Bradfield Affiliation: Jun. 14, 2026 My father- in-law lost all his retirement savings with Enron. Oversight is necessary these CEO's know every trick in the book. Trump gives them pass after pass and then pardons all his billionaire criminal friends.

Cyndy Bradfield — Jun 14, 2026
Subject: S7-2026-15 From: Cyndy Bradfield Affiliation: Jun. 14, 2026 Profits report quarterly, advisors are paid quarterly. Much illegalinsider trading has happened under Trump. These wealthy investors and executives need to be held accountable they have certainly benefitted from the criminal activities and insider trading for copying up to illegal actors. Transparency is important for stock holders and brand signatures. Trust has been broken our money has been stolen. PAC money runs Congress and the American taxpayers are not represented. Churches that are tax exempt have me say in government than the taxpayers money who supports it. Oversight is for our protection they already have tax loopholes and Congress people in their pockets.

Cynthia Adams — Jun 14, 2026
Subject: Keep Quarterly From: Cynthia Adams Affiliation: Jun. 14, 2026 Keep the quarterly signatures. Keep the controls in place. I don't want to go through more corruption and dishonesty by greedy, lying thieves again. Cynthia Adams

Subject: Comment on S7-2026-15 From: Cynthia Elia Affiliation: Jun. 14, 2026 Stop putting rules in place to destroy the middle class. Who's going to buy your products if everyone is poor?

Cynthia Gefvert — Jun 14, 2026
Subject: S7-2026-15 From: Cynthia Gefvert Affiliation: Jun. 14, 2026 Quarterly reports are necessary. Enron's executives claimed ignorance of their own books, so Congress made ignorance impossible to claim. Every quarter, the CEO and CFO certify that they personally designed and evaluated the controls that surface bad news, and that they reported any weaknesses or fraud to the auditors. The law claws back executive bonuses even without proof the boss was personally involved. Halve the filings, and you halve the quarters where "I didn't know" is off the table.
Do the right thing for investors. Keep quarterly reports as they are now!

Cynthia Marine — Jun 14, 2026
Subject: S7-2026-15 From: Cynthia Marine Affiliation: Jun. 14, 2026 Good morning
With all that is going on in the world transparency is of the upmost importance. Lay people should not get hoodwinked. There’s no reason why this should be cut back to two times a year if there is nothing to hide.
Should the SEC change this law then they are no better than the lying , cheating, fraudulent CEOs, CFOs, and any other C_O sitting at the board table.

Should there be pressure from the stockholders, shame on them. We need to stand tall, strong, and diligent. T’is truly sad when doing the right thing is wrong.

I hope that you, the SEC grow some backbone and not bend to pressure.

Sincerely
Cynthia M.

Darren Patrick — Jun 14, 2026
Subject: File No. S7-2026-15 From: Darren Patrick I am an active investor and nearing the last years of full time work. I rely on companies' quarterly results as part of a broader set of criteria when deciding to buy, hold or sell individual securities. Besides my own investing, I believe public companies, as significant contributors to most retirement and pension plans as well as endowments, should be held to an extremely high degree of transparency to the public. Further, with the price to earnings reaching such a high level, short term financial changes may be the only safety valve to guide savvy investors to shed companies making ridiculous business decisions.

Darryl Green — Jun 14, 2026
Subject: S7-2026-15 Comment From: Darryl Green Affiliation: Jun. 14, 2026 My name is Darryl Green, and I am an independent contractor and small business owner.

I support quarterly reporting because regular financial updates give everyday investors better visibility into how public companies are performing. Without quarterly reports, smaller investors may be left in the dark longer while insiders, institutions, and large investors still find ways to access better information.

Quarterly reporting helps keep companies accountable. It allows investors to spot problems earlier, compare performance over time, and make more informed decisions about where to put their money. While I understand that some companies may feel pressure to focus too much on short-term results, I believe the answer is not to reduce transparency. The answer is to improve how companies explain both short-term performance and long-term strategy.

As a retail investor, this matters to me because I do not have special access to management, analysts, or private briefings. Public filings are one of the few tools regular people have to evaluate companies fairly. Reducing the frequency of reporting would make the market less transparent and could put small investors at a greater disadvantage.

David Campbell — Jun 14, 2026
Subject: Comment on S7-2026-15 From: David Campbell Affiliation: Jun. 14, 2026 To whom it may concern,
Quarterly reporting is necessary for keeping executives and corporations accountable to the shareholders and people they serve. These regulations were put into place because executives from companies like Enron caused much damage to communities and retirement accounts of the people who thought their money was being used wisely when it was being siphoned off corruptly. Quarterly reporting helps those on the outside of the boardroom hold those on the inside to account for their actions. Don't change the regulation, because going back to twice yearly reporting will only encourage another Enron-type meltdown sooner than later, as executives feel free to gamble with investors' money.

I'm getting old enough to see retirement on the horizon and my retirement accounts are heavily invested in companies in which this regulation applies. I don't want my retirement to be damaged because some executive has a gambling problem with the money I and many other people have invested.

david duncan — Jun 14, 2026
Subject: Comment on S7-2026-15 From: david duncan Affiliation: Jun. 14, 2026 The idea of switching from quarterly to semiannual reporting by publicly traded companies is ridiculous. If one invests in a company's stock, one needs to have the most current financial information possible

concerning the company's financial performance and condition. Receiving financial reporting only once in six months leaves investors, even large ones, at a loss as to how to evaluate the pricing of shares in the company. It occurs to me that semiannual reporting will inevitably lead to huge swings in stock prices because investors will be at the mercy of rumors intended to drive the share prices up or down.

Subject: S7-2026-15 Comment From: David Lundquist Affiliation: Jun. 14, 2026 Why would the SEC make it hard for regular traders? This sounds like an obfuscation of major information to muddy the waters for Major companies.

Regards,

David Lundquist

TAO vs. DAO

TAO can accommodate audio and data on the same disc, but turns the laser that records the information on and off between tracks. This might cause problems when creating a master CD intended for duplication.

The DAO process burns audio in one continuous block from start to finish, which is the preferred format for commercial duplicators.

David McGlasson — Jun 14, 2026
Subject: S7-2026-15 Comment From: David McGlasson Affiliation: Jun. 14, 2026 --Quarterly reporting brings accountability for investors. Public companies have been providing it for 70 years or more without undue burden. The benefits of semi-annual reporting are very small, given today's electronic accounting systems where production of a detailed financial report is a keystroke away. The harm to investors is substantial. Please leave the system alone, and leave quarterly reporting in place.

Corporate greed has already taken over public companies just like our government, as the SEC is already is greatly aware of. This corruption is growing stronger every day and benefits the top leadership at the expense of their employees. We must have accurate information for our retirement accounts, stocks, investments etc so that these CEO's, VP's etc cannot hide more information to the public than already is happening.

DEB ABEL — Jun 14, 2026
Subject: S7-2026-15 From: DEB ABEL Affiliation: Jun. 14, 2026 Do not water down what is already in place. If nothing else, you can always make it more strict and transparent. Fraud and corruption will always try to find a way. Never let up…. These are criminals who need to be dealt with severely

Deb Ingles — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Deb Ingles Affiliation: Jun. 14, 2026 Deborah Barnes-Albany NY Retired teacher/ I wish to implore you to keep the transparency that quarterly reports provide. I see no real benefit to what is being proposed and many reasons not to change what is now working. I have saved carefully and informed all my working life to insure a comfortable retirement and am concerned that this change to semi- annual reporting would affect my investments negatively and cause uncertainty in my financial situation. I think this is of concern to Senior Citizens, adding to the concern of possible cuts to Social Security. I worked hard to have a decent standard of living in my later years and absolutely disagree with any policy that would jeopardize my future!!!!

Deb Tunning — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Deb Tunning Affiliation: Jun. 14, 2026 I believe quarterly reports should be required for all publicly traded compnies. It is one of the the tools that allows everyday consumers to be informed when they decide to invest their money. Transparency is a key factor in keeping the public and investors informed of how the company is doing financially. Without

transparency, companies could potentially hide losses from investors to the point that small investments are wiped out entirely. There was a valid reason for the SEC to require quarterly reporting when it was instituted. It would not be prudent to return to past inefficiencies that created issues. Please review this decision carefully. Sincerely,
Debora Tunning
Accountant, West Virginia

Deborah Boryenace — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Deborah Boryenace Affiliation: Jun. 14, 2026 As a person whose career was working for Corporate Controllers in Finance and Accounting Departments, I understand the frustration and expense of keeping up with the constant work demands of the always looming and unforgiving deadlines of the extremely detailed and labor intensive quarterly report. As the Administrative Assistant to the Controller, I was only the person who typed these monsters, and that alone was a hair raising experience. Much worse though, was the human toll on my esteemed coworkers and the department executives. Outsiders would not believe the insanity of putting these things together. The pressure of getting the numbers right is overwhelming and everchanging. It takes months to produce these reports and then the next one is due. In Corporate America it is not an option to file late, it simply is unacceptable. This creates horrendous pressure that other corporate employees do not experience. The employees in Finance and Accounting Departments around this country work endless hours for salary pay, no overtime. It is thankless work. To make these filings semi-annually would improve their lives immensely and provide substantial savings to the companies. I realize investors wouldn't like it but the decreased burden on companies of fewer filings means less paperwork, lower compliance costs and less pressure to obsess over short term numbers every three months. Thank you for your consideration in this matter.

Deborah Sitarski — Jun 14, 2026
Subject: S7-2026-15 Comment From: Deborah Sitarski Affiliation: Jun. 14, 2026 I am opposed to relaxing ANY reporting criteria for corporations.

The mandate of the SEC is to protect and oversee. How can this be effectively done only twice a year?

As a stockholder, taxpayer, and stakeholder I rely on relevant, time,y and accessible statistics.

remember the ENRON FIASCO? Let's recognize that politicians, crypto folks and secret foreign funding is not made up of angels. Their goal is PROFIT. I am an elderly widow- I rely on the SEC to provide oversight and guidance. Please do not cut quarterly reporting by 50%. This would not be appreciated by taxpayers or small investors !!

Cordially,
Deb S.
Resident of a Indiana and a lifelong voter and taxpayer.

quote from his banned book, NIGHT: "I swore never to be silent whenever and wherever human beings endure suffering and humiliation. We must always take sides. Neutrality helps the oppressor, never the victim. Silence encourages the tormentor, never the tormented."—Elie Wiesel, Holocaust Survivor and Nobel Laureate

Debra Adams — Jun 14, 2026
Subject: S7-2026-15 From: Debra Adams Affiliation: Jun. 14, 2026 As a retired CPA, I vehemently oppose reducing reporting from quarterly to semiannually. Quarterly reporting keeps public companies honest. Since Enron in 2002, every CEO must personally certify their numbers every quarter, with significant fines and federal prison on the line for signing a lie. This results in half the jail risk for shady CEOs and double the risk for our savings. This proposal is just another way to shelter the multimillionaires and billionaires from accountability.

Debra Adams
Retired CPA
Candler, NC

Debra Bridwell — Jun 14, 2026
Subject: S7-2026-15 From: Debra Bridwell Affiliation: Jun. 14, 2026 They must be held fully accountable. It would be terribly wrong to change the original ruling. They caused a large number of people terrible financial harm. They were responsible for destroying the Arthur Anderson accounting firm. Please do not change the ruling no one should have to encounter this type of illegal handling of finances again. My name is Debra Bridwell, Senior Technical Project Manager, Chicago Il.

Debra Fox-Newman — Jun 14, 2026

for public companies. The only reason that this requirement would be removed would be to facilitate corrupt dealings, and Lord knows we have too much of that going on these days! Please - DO THE RIGHT THING AND KEEP THE QUARTERLY REPORTING PROCESS IN PLACE!!!!!

DM

Dee Rains — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Dee Rains Affiliation: Jun. 14, 2026 My name is Danielle Rains, and I'm an accountant. It is critical that companies be required to make at least quarterly reports regarding financial standing for the protection of the public. Given the increase in technology available to manage these types of records and the level of importance this information has for the public, quarterly reporting is not an unfair burden to businesses. The stability of the markets and people's faith in contributing to well managed retirement funds requires clarity about what is happening within publicly traded businesses. This information cannot be not a private matter for only those in particularly privileged circles. If we expect people to privately monitor and invest for their own retirements, then we must ensure the information is available for both them and their representatives to properly do so.

DEE-ANN BURDETTE — Jun 14, 2026
Subject: S7-2026-15 From: DEE-ANN BURDETTE Affiliation: Jun. 14, 2026 Quarterly reports are necessary to protect the interests of the individual investors. If investors aren't regularly informed about how their funds are doing, the potential for fraud increases dramatically. Protect the individual investors!
Sincerely,
Dee-Ann Burdette

Deeann DeConink — Jun 14, 2026

Dena and Michael Constantine — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Dena and Michael Constantine Affiliation: Jun. 14, 2026 My name is Dena Constantine and I live north of Seattle in Washington state. I am currently retired due to medical issues.

I believe that less transparency goes hand-in-hand with lower returns and lower valuations if the public is only informed bi-annually regarding the performance of the investment vehicles that we trustingly deposit our hard earned money in. For an ordinary investor, a return to this type of reporting could mean losing a third, or even half, of their life savings. Quarterly reporting allows people to assess their financial decisions and make adjustments where necessary. The majority of Americans are not billionaires, we don’t have the luxury of losing our hard earned retirement funds because we have not been informed of performance issues in a timely manner.
The only reason I can see for change like this to be made is for the rich to get richer and the poor to get poorer.

Thank you for your time and consideration.

Sent from my iPhone

Denise Burke — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Denise Burke Affiliation: Jun. 14, 2026 Quarterly reporting is absolutely necessary for most companies primarily due to trust issues. Between a company's leadership and a revolving door of senior managers and directors, quarterly reports are more likely to hold most companies accountable to their business plan in a timely manner. Please continue with quarterly reports.

Donna Sullivan — Jun 14, 2026
Subject: S7-2026-15 Comment From: Donna Sullivan Affiliation: Jun. 14, 2026 From: Dr DL Sullivan.

US exceptionalism and economic development is under attack lack of regulatory oversight in data centers, that contracts on energy and SpaceX exploration and I explosive national debt threaten the US future. This administration, squashes data and transparency, but the truth will reveal our economic demise in time. Do not support obfuscation and misinformation. The SEC needs to support the US economy and citizens.

Donna Weinstein — Jun 14, 2026
Subject: S7-2026-15 From: Donna Weinstein Affiliation: Jun. 14, 2026 Please stop the steal! The signature is the deterrent.
Four times a year, the CEO and CFO must each put their name to the company's books, certifying they've reviewed the report and that it contains no untrue statement of a material fact. Knowingly certify a false one: up to $1 million and 10 years in federal prison. Do it willfully: up to $5 million and 20 years. The proposal cuts those certified filings from four to two. Half as many moments when anyone at the top must stake their freedom on the truth.
02
Enron's defense was "I didn't know." Congress closed it.
Enron's executives claimed ignorance of their own books, so Congress made ignorance impossible to claim. Every quarter, the CEO and CFO certify that they personally designed and evaluated the controls that surface bad news, and that they reported any weaknesses or fraud to the auditors. The law claws back executive bonuses even without proof the boss was personally involved. Halve the filings, and you halve the quarters where "I didn't know" is off the table.
03
8-Ks don't come with handcuffs.

The SEC says current reports and press releases will fill the gap. Read the fine print: earnings releases ride on Form 8-K as "furnished," not "filed." That category exempts them from the automatic liability filed reports carry. No outside auditor reviews them, and no certification is required even when an 8-K contains financial statements. The SEC's own proposal concedes the problem. The 8-K may contain information, but it lacks any accountability.
04
We watched the signature crack a $2.7 billion fraud.
Sarbanes-Oxley became law on July 30, 2002. Six days later, HealthSouth's CFO tried to quit rather than certify numbers he knew were fake: "he just couldn't sign the certifications." Months later he went to federal prosecutors and became the first of fifteen executives to plead guilty in a $2.7 billion fraud. A certification costs an honest executive nothing to sign, it just exposes the fraudsters. Why roll them back?

Edith Duling — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Edith Duling Affiliation: Jun. 14, 2026 Based on the history of semi-annual reporting and the current comparisons with countries which use that system, I cannot understand why you would consider returning to semi-annual reporting. Coupled with the unstable state of our country it's likely going to be a disaster. I am a widow living on social security and my savings and investments and I cannot afford to take the risk of losing a large portion of my money. I'm sure many people are in the same situation. Thank you!

Edith Duling, Retired, Pennsylvania

Eileen Ferre — Jun 14, 2026
Subject: S7-2026-15 Comment From: Eileen Ferre Affiliation: Jun. 14, 2026 One more underhanded cut in our protections. This administration seems to want any oversight removed so they can hide their dirty deeds. Just like when, in 2007 the banking industry nearly destroyed our economy. The banks were bailed out, but the people were left decimated. These greedy, dirty, dishonest people who hide behind their power don't give a **** about this country, they just want more money. Well, you want government out of your business? Well I would like government out of my bedroom, out of my body, out of my children's bedrooms. I realize how hard it is for you to stop being money grubbing jerks but could you please try this time?

EILEEN JOYCE — Jun 14, 2026
Subject: S7-2026-15 Comment From: EILEEN JOYCE Affiliation: Jun. 14, 2026 Let’s leave the reporting as is! Makes me want to know who wants to hide what? Yes, corporations have fostered distrust and skepticism.

Elaine Brennan — Jun 14, 2026
Subject: S7-2026-15 From: Elaine Brennan Affiliation: Jun. 14, 2026 It is an important protection for the millions of us with investments in retirement accounts
that the CEO and CFO must each continue to put their name to their company's books, FOUR times a year, certifying they've reviewed the report and that it contains no untrue statement of a material fact.

They must continue to be reminded, FOUR times a year, that to knowingly, certify a false one will result in up to $1 million and 10 years in federal prison; to willingly certify will result in up to $5 million and 20 years.

This proposal cuts those certified filings from four to two - they will only be reminded to be honest, twice a year. History has shown that individuals in these positions NEED reminding, regulation.

Elaine Sanchez — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Elaine Sanchez Affiliation: Jun. 14, 2026 Elaine Sanchez,

Retired Librarian, Investor, Austin, Texas. So much economic turmoil can happen in even just one month. Our economy is especially volatile now, our national debt is in the trillions of dollars, climate change is real and world economic and social conditions are deteriorating because of this, as well. Quarterly reports convey vital data that keep investors current. Changing to semi-yearly reporting won't be timely enough to be useful for wise and informed investing. If it's too hard, then give people the option to choose online reports, and save that way. Keep them quarterly.

Ellen Kretsch — Jun 14, 2026

Subject: S7-2026-15 From: Ellen Kretsch Affiliation: Jun. 14, 2026 The quarterly reporting rule was implemented for a very valid reason. Unfortunately we have little reason to trust the leaders of industry and government. We need timely financial information
reports to protect pension plans, shareholders and those who depend on honest managers to shepherd their retirement funds. Past practices leave us with little trust and sadly fewer alternatives than these plans to take us to a healthy retirement. I am retired,
but I strongly oppose loosening of current requirements. I hope you will consider the impact even a few dishonest financial managers can have on potentially millions of future retirees. If you aren't old enough to remember Enron and the many failed pension
plans from only a few decades ago, do your research! Many of those affected are still feeling the pain. Thank you, Ellen Kretsch, Globe, AZ

Eric Dany — Jun 14, 2026
Subject: S7-2026-15 Comment From: Eric Dany Affiliation: Jun. 14, 2026 The proposal for six-month reporting is a terrible idea.
First, the opportunity for fraud increases significantly and fraud could be hidden over a longer time.
Second there would be 50% less information available to base company valuations on. Individual investors without relationships with companies would be at a significant disadvantage to professional investors who would be making more contacts with companies.
It is a bad idea. If anything, reporting should be more often, not less.
Respectfully,
Eric Dany

Erica Zacharie — Jun 14, 2026
Subject: Rule S7-2026-15; Objection to Semi-Annual Reporting and Formal Request for Expanded "Plain Language" Quarterly Reporting From: Erica Zacharie Affiliation: Jun. 14, 2026 Dear SEC Rulemaking Committee:

I am writing to express my dismay at the introduction of proposed Rule S7-2025-15. This rule, among other outrageous clauses, is an attempt to increase the obfuscation and omission of critical information from the public regarding their investments in a timely manner by moving from quarterly 10-Q's to bi-annual reporting.

As an investor, a FINRA Arbitrator, and a financial literacy educator, this is yet another betrayal of the SEC's regulatory oversight and fiduciary duty to the public. A public that is currently under siege from volitile and grossly over-valued tech and AI securities offerings led by megalomaniac executives who wish to "pump and dump" these high-risk instruments into the passive retirement funds of unsophisticated working class retail investors.

Quarterly reporting is often the only early warning sign that everyday Americans have to protect themselves and their precious retirement and investment funds. In the land of accredited investors, what seems like a compliance burden could be life and death for a retail investor trying to earn enough to survive into old age.

As an American, I am truly appalled at how rapidly fairness and ethical principles are being stripped from our markets by a financial elite who seem to have forgotten that their vast wealth is built on the labor of everyday citizens. You have no legal basis or moral right to strip US Citizens of their right to the liberty of their earnings in a free and fair market. That liberty depends on timely access to information.

This proposed rule must NOT be implemented as it is contrary to the very fabric of the American economy. Quarterly reporting must not only be maintained, but it should be expanded with more "plain language" provisions so that retail investors can better manage their hard earned returns.

Respectfully submitted,

Erica

Erin Dawson None — Jun 14, 2026
Subject: File No. S7-2026-15 From: Erin Dawson Do not change this rule. Quarterly reports keeps everyone informed of the financial health of their investments. This is not a fair rule to private citizens with investments in these companies. Investors deserve public reports every three months so they can make informed decisions about how to invest funds. Semiannual reports just allows theses companies to fail for longer and hide losses from their investors. Do not allow this rule change. Keep reporting transparent as promised by The President. He promised us a transparent government. This rule change would be another lie told to voters. Keep the reporting quarterly.

Erin Keller — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Erin Keller Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I buy no means am a millionaire. I'm a hard-working citizen that scrimps and saves to invest measly amounts of money into companies that I hope will bring a decent future to my family. I depend on those quarterly reports to make the best decisions that hopefully afford me the ability to not waste my hard earned money on badly performing companies. The SECs proposal would make the act of participating in investment far too risky to trust my family's financial safety to. And it's the millions of us measly investors that truly carry these companies.

Esther Read — Jun 14, 2026
Subject: S7-2026-15 From: Esther Read Affiliation: Jun. 14, 2026 As someone who's family worked on the New York stock exchange, and in New York banking and real estate, I know how important quarterly reporting is to make informed financial decisions and for responsible fiscal management. Unless you want 1929 all over again and a decade long depression, don't stop quarterly reporting. It keeps the economy healthy and allows us to make money.

Faye J — Jun 14, 2026
Subject: S7-2026-15 Comment From: Faye J Affiliation: Jun. 14, 2026 This is robbery! What's the purpose of changing the rules, to allow fraud to run without eyes on what's happening? Seems like this administration enjoys fraud in all forms! Why?

Get Outlook for Android

Faye Steinhauser — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Faye Steinhauser Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission: there is absolutely no good reason for this change. Transparency will go down and fraud will go up. Millions of everyday investors rely on this reporting to have some chance of making wise investment decisions, while insiders will continue to profit. This is an absolutely ridiculous change to long-term policies in place to protect the confidence we have in the stock market overall.

---

felderwest — Jun 14, 2026
Subject: S7-2026-15 From: felderwest Affiliation: Jun. 14, 2026 I see no harm done by quarterly reporting and therefore no reason to change it. Semi-annual reporting doubles the amount of time for financial mischief and ability to hide criminal trading.

Henry VanDyke

Gayle Weber — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Gayle Weber Affiliation: Jun. 14, 2026 Returning to semi-annual reporting by public companies is unacceptable. It may have been practical fifty years ago, in a time when computers and digital communications were in their infancy,, but given the sophistication of today's technology, the ONLY reason to return to the dark ages of corporate reporting is to let companies slide, hide, and bide their sweet time before they have to be open to public scrutiny. That's right, public - as in PUBLIC corporations. With today's technology, we could actually speed up reporting to monthly.

Less frequent reporting could harm market transparency, increase volatility, grease the wheels for insider trading, erode trust in markets and reduce capital market participation and liquidity,

I know the I that our current president is behind this movement. You need to have the courage and tenacity to stand up to him and, in the words of Barbara Bush, JUST SAY NO. Quarterly reporting is good for the public, and what's good for the public is good for the economy. Semi annual reporting would allow a lot of dirty, underhanded dealing. Don't do it. Vote no.

Gayle Weber

Subject: S7-2026-15 From: GHAZZAL DABIRI Affiliation: Jun. 14, 2026 Hello,

This comment is in relation to S7-2026-15:

It seems these days our government is actively seeking corruption and lawlessness for the wealthy leaving the rest of us to pay for it.

I'd like my government to be my watch dog, protecting me from exploitative corporate predators.

Keep the Enron rule which was instituted for good reason.

Thank you for your time.

Ghazzal Dabiri
Fort Lauderdale, FL.

Gina K — Jun 14, 2026
Subject: S7-2026-15 From: Gina K Affiliation: Jun. 14, 2026 Do not remove the quarterly reporting requirements!!

Gingerken — Jun 14, 2026
Subject: Do not change quarterly reporting From: Gingerken Affiliation: Jun. 14, 2026 To whom it may concern,

Ordinary investors cannot afford lax reporting on our hard earned investments! As a single mothe, I worked hard for decades to be able to put savings away so that I could be self-sufficient once I retired. I cannot afford to have that jeopardized, and there are so many others like me in the same or similar situations!

The SEC should not be allowed to reduce the frequency of reporting. We need to have the reports continue to be available quarterly

Regards,.

Mary Kenney

Ginny Antoniotti — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Ginny Antoniotti Affiliation: Jun. 14, 2026 I absolutely want to have quarterly earnings reports. The original experiment of reducing frequency to semi-annual reporting from 1955- 1970 was a time when many individuals lost a huge portion of their portfolio valuation due in part to a lack of knowledge about their investments! Sounds to me like a great way to defraud investors, and the mere possibility of that happening angers me!
Retired investor, Virginia Antoniotti Kalamazoo, Michigan.

Glenn Hays — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Glenn Hays Affiliation: Jun. 14, 2026 Keep Quarterly Reporting for businesses and Stock Market Evaluations.
I'm retired now. No time to make up the lost money that going to semi-annual reporting risks.
Looking at History, and current international markets, taking us back to the 1950's for corporate reporting is HIGHLY LIKELY to destroy Millions of Americans (including Retirees) Retirement Accounts/Funds
With Social Security already facing bankruptcy, why would any Socially Elected Official set up their Constituents to take a fall like that ?
And Appointed Officials, there is no difference. The US Government is here to govern for the protection of its citizens. Not to sacrifice them on the alter of protecting corporations and business owners, Special Interest Groups. This will likely devastate the Economy. More Homelessness. More people struggling to pay necessities. More people who Can't
Don't Do This.
Sincerely, Glenn Hays

Gloria Anthony RETIRED — Jun 14, 2026

Subject: File No. S7-2026-15 From: Gloria Anthony *Gloria Anthony, Retired, Southern Pines, NC. As Retirees, quarterly investment reporting is very important because we rely on our investments to maintain a comfortable and healthy but not extravagant means of living. Further, having quarterly investment reports accurately calculates our cost basis for taxes, verify unauthorized transactions, and track portfolio progress against your financial goals. They are vital, timely proof of our investments until comprehensive annual summaries are generated . Maintaining these records provides several distinct benefits:Audit Readiness: The Internal Revenue Service (IRS) requires documentation for all buy/sell transactions in taxable accounts. Quarterly statements provide a clear timeline of our cost basis and capital gains . Performance Tracking: We can easily monitor how our asset classes and funds performance against established market benchmarks . Transaction Verification: Financial Industry Regulatory Authority (FINRA) stresses that reviewing regular reports helps safeguard your funds against unauthorized withdrawals or errors.

Gordon Lunde — Jun 14, 2026
Subject: S7-2026-15 Comment From: Gordon Lunde Affiliation: Jun. 14, 2026 Why? Unless there’s something to hide, there’s no reason for this. In fact it should be monthly.

Sent from my iPhone

Gordon Richardson — Jun 14, 2026
Subject: S7-2026-15 From: Gordon Richardson Affiliation: Jun. 14, 2026 The big question for me on this is Why?!!!! Less accountability means less protections for the public, especially potential investors not as savvy as more experienced investors. The fact that
this law is required in the first place tells us why it is needed and so important. Less signatures means more chances for wrongdoing to occur AND less chances to catch wrongdoing and nip it in the bud. Reducing the reporting requirements is moving in exactly
the wrong direction. G. Richardson, supervisor, Bklyn, NY.

If anything, the SEC should be working to ensure current reports are more legitimate and accurate, not putting investors further in the dark.

please excuse brevity, sent from mobile

Harold Cunningham — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Harold Cunningham Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Hello, I was born and have lived in Tennessee most of my life. I am proud to be a US citizen, and I am proud that our country was founded on principles including freedom and individual opportunity. While I utilize company-managed retirement accounts, my personal, private investments provide me with true freedom regarding financial decisions.
Rule S7-2026-15 would directly reduce my freedom in financial decision making. I am so grateful to live in a country where I can have confidence in financial reporting, guaranteed by the justice of the SEC and other organizations. However, without quarterly filings, I will be hindered in determining how companies respond to the more rapidly changing economic world. This potential dirth of information would cause myself and other private investors to lose individual opportunity.
I am not a financial institution, and I do not want financial institutions to be the sole deciders of my financial future. I want to have access to information with which I can personally reason to make my own financial decisions. Quarterly reports are one of these important informational tools. I want to continue to have the freedom through information which allows me to personally invest in companies which inspire me and align with my values.
Without transparency, there can be no justice. I am grateful for the work and dedication of the SEC and other government organizations, but Rule S7-2026-15 is antithetical to the spirit of our establishments, and our dignified United States of America!
Thank you for reading.
-Harold Cunningham

Harold Gerrior — Jun 14, 2026

Subject: S7-2026-15 Comment From: Harold Gerrior Affiliation: Jun. 14, 2026 If this rule passes I will never ever vote Republican again and I will contribute to all Democratic candidates permanently! Harriet H Langford — Jun 14, 2026
Subject: S7-2026-15 From: Harriet H Langford Affiliation: Jun. 14, 2026 What is a boomer pushing 80, retired educator doing commenting on the SEC? We as a group have more time to read, watch and see what the country has come to...in short, wealth and power madness. I have no qualms about protesting any action that will allow CEO's a break. This country has never been perfect, but in my lifetime I have seen some of the worst and the best of human behavior. As your elder, I insist on bringing ethical leadership of the country, retain oversight, follow the rule of law, and serve... for the good of the whole country. Throwing out regulations and oversight to enrich already grossly overpaid CEO's in most cases is a hallmark of our times. STOP IT. The free for all immature greedy leadership is on its way out and rational behavior is on the way again. Do you not read the citizens' mood? And there are voters who cannot wait until November.

Harry Easterling Retired, private investor — Jun 14, 2026
Subject: File No. S7-2026-15 From: Harry Easterling No! I am not in favor of this at all.

Harvey Lange — Jun 14, 2026
Subject: S7-2026-15 Comment From: Harvey Lange Affiliation: Jun. 14, 2026 Payroll is automated. It is already being reported quarterly. When I purchasesomething, the money is almost immediately withdrawn from my account, yet when I'm owed money, it can take days formeto receive that money. The two events are not directly connected, but that activity results in someone making money from that activity and allows "thing" to get shuffled around, like playing a shell game with that money. Switching from quarterly to semi-annual reporting is just another version of that shell game. Keep it like it is and don't provide another way to hide poor performance and potentially shady activity. Because it is automated, I don't see why it isn't monthly.

Have a nice day,
Harvey A. Lange

Timely reporting is very important for making informed decisions, especially when investing in the market. Quarterly reports gives the entities a chance to evaluate their positions and pivot. If they do not, it gives the investor a better understanding of their positions and whether to stay invested or sell.

Sent from my iPhone

Heather Jimmerson — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Heather Jimmerson Affiliation: Jun. 14, 2026 Moving back to semiannual reporting would be a step away from accountability. Public companies benefit from public trust, and that trust depends on timely transparency. If quarterly reporting is a problem, the issue is definitely not the reporting.

Heather M. Jimmerson

Heather Riley — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Heather Riley Affiliation: Jun. 14, 2026 Dear SES,
I am a retired teacher and depend on my quarterly statements to help me make financial decisions. I do take the time to read the perspectives and reports. Shareholders are a valuable part of a company's success. Please do not allow them not be less transparent in their business decisions that will affect their stockholders. I think doing this reporting less frequently will give corporations more leeway and will consequently may provide more time for financial damages to occur verses nipping it in the bud. We all know that we could possibly lose our interest in the company, but companies depend on the cash from investors and should remain at the same accountability level as is.
Sincerely,
Heather Riley
Retired Special Needs Teacher

My view on RileS7-2026-15
I am one of those that will take the biggest hit. There will be no information for six months. That makes it harder to know how to invest. There will be less transparency which invites fraud and allows it to go on longer before it could be caught.
This will hurt investors. Do not change the rule.
Thank you.

Helene Noyer — Jun 14, 2026
Subject: S7-2026-15 Comment From: Helene Noyer Affiliation: Jun. 14, 2026 Continue Quarterly Reports. As a stockholder, I believe it is critical that we have clear, transparent and frequent information from the companies who make up our investment portfolios. We choose our Brokerage on a level of trust. Do not provide a path for them to do less than was contracted for nor hamstring their competitiveness into a compromised agency. Do not join this Administrations efforts to kill America’s “joy de vivre” in self advocacy!

hulk7399 — Jun 14, 2026
Subject: Comment on S7-2026-15 From: hulk7399 Affiliation: Jun. 14, 2026 I feel that if we went to semi reporting. The earnings that I have worked so long and hard for needs to be frozen until the potential change is up and running smoothly. Why should I take a HUGE hit to what I have worked so hard for because YOU feel a need for change to the whole system. I'm in my early 50's looking towards retirement and wanting to be able enjoy some of that time and if I take a HUGE decline in my savings it really would piss me off. Unlike the "rich" I don't have the luxury of excess of fund. I live paycheck to paycheck! Plus how will all the companies be held accountable for any actions that are illegal or unconstitutional if this is a way for corporations to get even richer then I'm not at all for it.

Jacob L. — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jacob L. Affiliation: Jun. 14, 2026 Jacob Lee
Project Manager - Central Connecticut

Quarterly reporting allows me to better align what i'm investing in. Is a company changing course? Is it following through on it's plans? Is the strategy panning out the way they forecasted?

All of these types of questions and more and important in a long-term investment strategy. Keeping companies honest, communicating, and showing the numbers keeps me informed as an investor and enables me to invest more when the companies I'm buying shares in are doing what they envisioned.

Not having this type of reporting is dangerous for seasoned professionals, day traders, casual investors and those simply managing a retirement fund for themselves. This will put real people's money at risk and the market as a whole will be impacted. More risk = Less investing = Less money for everyone.

Jacob Purcell — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Jacob Purcell Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
"Better Markets/Take Action" are paying to get people to falsely put in requests that Quarterly Reporting be retained. I'm using this platform to undercut their undercutting. Please burn Quarterly Reporting to the ground with holy fire. It is the #1 reason stagflation has ruined the lives of so many of my friends and family. If I could, I'd make a rule to ensure that plans need to extend a full 2 financial years into the future, to revitalize American business and stomp out what have become pure speculative gambling markets with PE ratios to insane proportions.
Thank you for your attention to this matter.

Jacob Sullivan — Jun 14, 2026

Jan Heiland — Jun 14, 2026
Subject: S7-2026-15 From: Jan Heiland Affiliation: Jun. 14, 2026 As a hard-working American, and even someone who has been an entrepreneur and a CEO… And as an American, who respects not only our laws, but was raised with the integrity to do, what's right even when no one‘s looking. I am so beyond angry with the corruption that power and money can bring.

Nobody is above the law and I'm just tired of rich people just running the country and running our reputation and our integrity, as a nation into the ground.

CEOs in particular and leadership overall needs to lead by example not by selfish greed. The reason we have laws in this country and the reason we have rules is so that when somebody breaks them and conducts major fraud or hurts people because they were selfish or greedy, they should go to jail. So as you sit and you confer about this subject, please remember that they are in jail for a reason and they belong there. Especially people in power they need to pay the price just like everybody else. We're all American citizens and nobody's above it. Thank you.

Janet Armour — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Janet Armour Affiliation: Jun. 14, 2026 Re: SEC File No. S7-2026-15

To the Securities and Exchange Commission:

I am writing to respectfully object to SEC File No. S7-2026-15.

I am a 62-year-old woman and between my husband and I, we have approximately $1 million invested in the stock market. I am a long-term investor, not a professional trader or large financial institution. My savings represent a lifetime of work and are intended to support my retirement, healthcare needs, and long-term financial security.

From the standpoint of an intelligent, prudent investor, I am concerned that this proposal may do more to benefit large and sophisticated market participants than ordinary investors like me. The SEC's role is to protect investors, maintain fair, orderly, and efficient markets, and facilitate capital formation. Any proposal that increases complexity, reduces transparency, weakens price discovery, or creates new structural advantages for major firms should be approached with extreme caution.

For investors nearing retirement, market fairness is not an abstract policy issue. It has direct consequences for financial security. At my age, I do not have decades to recover from market disruptions, reduced protections, or rules that make public markets less trustworthy. A million dollars may sound substantial, but it is not unlimited wealth. It must last through retirement and withstand inflation, healthcare costs, and market volatility.

Benjamin Graham's concept of the intelligent investor emphasizes discipline, preservation of capital, and protection from unnecessary risk. In that spirit, I urge the Commission to reject this proposal unless it can clearly demonstrate that it will improve transparency, fairness, and protection for ordinary long-term investors.

If the SEC cannot show that this rule will strengthen market integrity for retail investors and retirees, it should not be adopted. At a minimum, the proposal should be delayed and revised to ensure that the interests of ordinary Americans are placed ahead of the interests of the largest and most sophisticated market actors.

Thank you for considering my comment.

Sincerely,
Janet Armour

Janna Mauldin Heiner — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Janna Mauldin Heiner Affiliation: Jun. 14, 2026 My name is Janna Heiner, a retiree with two teens at home. Our family of four is currently living off our careful retirement savings and investments. I am writing to express my strong support for retaining mandatory quarterly reporting for public companies.

While I understand the goal of reducing administrative burdens and minimizing short-term pressures on management, semiannual reporting will make it harder for investors to make decisions and will reduce their confidence in the market. Mandatory quarterly reports provide the information that people rely on to guide their investment decisions. Moving to semiannual filings would result in an unacceptable gap in information, which would increase market volatility and make it much harder for stakeholders to monitor material changes in a company's financial health or internal controls.

This model was used between 1955 and 1970, and the effect was to slow investment growth, restrain investing, and undermine trust in the stock market. Comparing reporting requirements in various countries also shows that those with more frequent reporting have stronger investment and returns.

In an era of increasingly rapid global markets, maintaining high-frequency, regulated disclosures is a vital tool for protecting everyday shareholders. I am concerned about my family's financial future. If this change leads (as both our own history, and the comparison of reporting requirements in other countries across the world, suggest it will) to a more volatile market and less information with which to navigate it, we could lose a significant part of our living, despite careful retirement planning over my husband's almost 40 year career.

I respectfully urge the Commission to maintain the quarterly reporting requirement as a universal standard for public companies. Thank you for your time and the opportunity to comment on an issue of concern to me and my family.

Sincerely,
Janna Heiner

Jean Ellison — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jean Ellison Affiliation: Jun. 14, 2026 Jean Ellison
Retired

Please DO NOT STOP the reports from becoming available each quarter (three months) of the year. These reports keep us informed of the progress (or lack thereof) of our finances. Too much can stay hidden if we only receive the information twice a year. This is why we need to get them quarterly.

The SEC is proposing to roll back financial reporting to the way it worked in 1955. Less disclosure then meant lower returns and lower valuations. A repeat could erase a third of my savings. Being an elderly, retired, widow, my attention must be held to my finances.

Thank you for being understanding for myself and for the very people in my social status.

Jean Ellison

Jean Franklin — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jean Franklin Affiliation: Jun. 14, 2026 Leave it as it is! Just another thing the Trump administration is doing to distract from the Epstein files. The regular People need to have the same information that the wealthy have access to, not information that is 6 months or more, old and outdated. This is ridiculous that you would consider changing the reporting . Make it monthly, if you want to change anything for the better. STOP THE NONSENSE!

Jean Hazelwood — Jun 14, 2026
Subject: S7-2026-15 From: Jean Hazelwood Affiliation: Jun. 14, 2026 From:
Jean Hazelwood
Staff Accountant.
Topeka, KS.

I have dual degrees in accounting and business management . I know how important transparency and accountability are in upholding ethical business practices. Quarterly reporting is a reasonable level request so investors, shareholdeds, and other external decision makers and stakeholdersd can evaluate trends and identify red flags or areas of concern earlier.

As fraudsters and bad actors use cutting edge technology to manipulate data and results, less accountability sets the stage for new, and potentially more costly, accounting scandals.

Please retain quarterly accounting requirements.

Best regards,
Jean Hazelwood

Jeanne Saddler — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jeanne Saddler Affiliation: Jun. 14, 2026 I want quarterly reporting to continue. I dont check my accounts daily or even weekly because it causes me anxiety with fluctuations in the market that typically work themselves out. Receiving a quarterly report allows me to stay on top of the general market flow and make adaptations if it seems merited. Every 6 months is too large a gap.

Additionally, when semi-annual reporting was tried in the USA, overall losses were far greater. The return to quarterly reporting improved gains. Let’s not repeat a proven mistake!

Jeff Burger — Jun 14, 2026
Subject: S7-2026-15 Comment From: Jeff Burger Affiliation: Jun. 14, 2026 Jeff Burger - Author & Investor
Absolutely unacceptable. I expect MORE oversight and transparency, not less! It puts the investors you count on in a much riskier position and makes them exponentially more vulnerable to fraud, deception and loss. If it makes it too risky for some, your loss of those investors may very easily outstrip any savings you intend to gain. Stupid idea.

Jeff K — Jun 14, 2026
Subject: File No. S7-2026-15 From: Jeff K I do not support reducing the frequency of the reporting. Please do not approve this proposed change.

Jeff Kolber — Jun 14, 2026
Subject: S7-2026-15 Comment From: Jeff Kolber Affiliation: Jun. 14, 2026 Have background in finance and technology. Corporations already pay no taxes. And those that are considered financially critical get bailed out doing times of distress since the government
and the people's tax dollars pay for that. There is no reason that the big businesses should get any more latitude in their operations, given the propensity to scam the public. Example Enron Corp. This is especially so for high-powered financial institutions
where profits can be made in an instant and transmitted to other locations for undisclosed business ventures. The SEC is obligated to assure that risks are kept to a minimum. 6 months is a long time to hide information and move money. I urge you to reconsider
for the benefit of the average consumer and average investor. Thank you

JK @Yahoo Mail

Jeffrey Bosworth — Jun 14, 2026
Subject: S7-2026-15 Comment From: Jeffrey Bosworth Affiliation: Jun. 14, 2026 I am retired and rely on Social Security and my investment income to carry me through what is supposed to be the "golden years". I monitor my investments closely. I want to know that the companies I have entrusted to produce positive results for me are performing. By the quarterly reports I can see exactly how the company is doing and if not I can make appropriate changes. By going to a six month reporting criteria, only to find out a company or companies are not performing, then I stand to loose a significant amount of my investment(s). I strongly feel that quarterly reports serve two purposes, to keep investors informed on a companies profitability and to keep them honest. I strongly oppose going to a six month reporting cycle. The minimal cost to the company is not that significant. If they feel it is then I recommend cutting the exorbitant salaries and benefits of the top officers in the companies to offset the additional cost of quarterly reports.
Jeffrey Bosworth, Retired person

Jeffrey Burt — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Jeffrey Burt Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Quarterly reports are the only way that retail investors have visibility into management actions and results. Moving to a bi-annual reporting requirements will allow publicly traded companies to keep critical information about their operations shielded from public view. Honestly we should be focused on INCREASING transparefor investors, not on reducing it!
Best regards,
Jeffrey Burt

Jeffrey Mitchell — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jeffrey Mitchell Affiliation: Jun. 14, 2026 Do not change quarterly reporting. Past numbers prove that it is not going to have a positive impact. My name is Jeffrey Mitchell and I am a UAW/Ford worker in Kansas City, Missouri. This matters greatly to me so my retirement funds that I have worked hard for are not in jeopardy.

maintaining my investment allocation.

Please do not revert to the previous era of semi-annual reporting.

James Anderson, retired Systems Analyst, Wisconsin.

Jim Bailey — Jun 14, 2026
Subject: S7-2026-15 From: Jim Bailey Affiliation: Jun. 14, 2026 James Bailey, retired, Clovis, CA. Quarterly reporting is critical to understanding a company’s stock viability.

Sent from my iPhone

Jim Curtis — Jun 14, 2026
Subject: S7-2026-15 Comment From: Jim Curtis Affiliation: Jun. 14, 2026 It’s irresponsible to end quarterly reporting. If you do, I will advise everyone I know to dump all their stocks and invest only in CDs and conservative bonds. I have a degree in business administration and a second one in accounting. Conservatives always want to remove accountability and guardrails, which is followed by crashes like 1929 and 2008. We the people will not submit to more taxpayer bailouts or corporate welfare again!

Sent from my iPhone

John Volpe — Jun 14, 2026
Subject: S7-2026-15 From: John Volpe Affiliation: Jun. 14, 2026 Quarterly reporting has been a successful financial reporting tool that has kept investors up to date on corporations' financial results. The change was implemented from semi-annual to quarterly in order to force corporations to report their results on a more timely basis., hopefully reducing the incidents of fraudulent or misleading financial reporting. Restoring financial reporting to semi-annually will increase the potential for late reporting of unfavorable financial results which would adversely affect investors and the general public.

John Volpe

John WILLIS — Jun 14, 2026
Subject: Comment on S7-2026-15 From: John WILLIS Affiliation: Jun. 14, 2026 I like knowing every 3 months what's happening, every 6 months would be devistating to wait and see if you made money or no just to fi d out its almost gone, no not a good idea.

Jon Markey — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jon Markey Affiliation: Jun. 14, 2026 As a retiree dependent on a lifetime of savings invested mainly in the stock market, I am opposed to lowering the reporting requirement from quarterly to semiannually. The risk of wiping out a good deal of accumulated earnings, and possibly principal, for myself and millions in my situation, is not worth whatever benefits this may provide to corporations.

Jon

Jonathan — Jun 14, 2026
Subject: S7-2026-15 From: Jonathan Affiliation: Jun. 14, 2026 Jonathan Reilly, Los Angeles, CA

I care very deeply about this issue as monitoring and accountability are critical in any regulated industry. As as lead auditor for the medical device industry, I know first hand how easy it can be for an organization to try hide things. Often, accountability is only a fine that is trivial in comparison to how much money they made by cheating. Routine and regular monitoring is also critical to prevent this.

My retirement and all my assets are sunk into mutual funds, index funds, and the like. Reducing

monitoring frequency will increase risk, lower confidence, and depress the market. DO NOT DECREASE MONITORING FREQUENCY. The proposed change does not make things better in any way.

Jonathan Boan — Jun 14, 2026
Subject: S7-2026-15 From: Jonathan Boan Affiliation: Jun. 14, 2026 Jonathan, retired, the ability to allow removal of quarterly reporting would drastically changebthe cadence of trading and would chnage the landscape back to a time where we saw limited growth. We need to keep the current system to allow investors to be informed as to the health of the company.

Joseph Janiga — Jun 14, 2026
Subject: S7-2026-15 From: Joseph Janiga Affiliation: Jun. 14, 2026 My name is Joseph F. Janiga and I am a retired educator. I presently reside in East Haven , Connecticut. As a teacher I impressed on my students the importance of honesty and following the letter of the law. The use of quarterly reporting by business and industry enforces good business practices. Over the years we have witnessed that certain individuals have a propensity to lie , steal and cheat in the name of profit. Quarterly reporting is a way to keep unscrupulous business people in line .When you weaken the law you create an opportunity for graft and corruption. We have seen this happen repeatedly over time. Quarterly reporting to the SEC is a way to keep the unscrupulous in check.

Joseph Kesselman — Jun 14, 2026
Subject: S7-2026-15 Comment From: Joseph Kesselman Affiliation: Jun. 14, 2026 My God, why would you _want_ to permit companies to hide relevant data from their investors for an additional 3 months? The disruption to the market from loss of trust would far outweigh any savings achieved by reducing the reporting burden. It's not as if the companies don't have to gather the information either way, after all; preparing it for release is usually automated these days, and actually releasing it in electronic form has essentially zero cost.

Joy A Frazier — Jun 14, 2026
Subject: File No. S7-2026-15 From: Joy A Frazier I do not support the proposed rule change. Investors deserve transparency through quarterly reporting.

Joy Atkins-Miller — Jun 14, 2026
Subject: S7-2026-15 Comment From: Joy Atkins-Miller Affiliation: Jun. 14, 2026 Personally I think they should report monthly but realize quarterly is feasible because of the lack of personnel due to DOGE's idiocy. Or is it because of cuts that's behind this? Considering the lack of trust citizens have in federal government now because of the bribes/"donations," it looks like SEC is being furtive, covering up for business, putting citizens second yet again.

Joy Cleveland — Jun 14, 2026
Subject: S7-2026-15 Comment From: Joy Cleveland Affiliation: Jun. 14, 2026 I'm a senior citizen who needs my retirement account for the future. If companies only report twice a year that opens the door to fraud. Less information means I could lose much of what I worked for to maintain my independence. Reporting only twice a year makes me extremely uneasy.
Thank You

Joy Inskeep — Jun 14, 2026
Subject: S7-2026-15 From: Joy Inskeep Affiliation: Jun. 14, 2026 I am utterly fed up with the SEC continuing to fail dramatically to protect the economy we all live with. Learn the lessons of past history. You have been taking is right back to the Robber Baron era, the era of the Great Depression, & Enron. You also need to get far tougher on businesses that buy out or takeover companies. Protect the consumers & employees because I have been through that multiple times. These quarterly reports also should be written in plain English, not full of jargon. You are supposed to be a watchdog protecting the public. All you do is serve the exhotnatantly wealthy & choke the economy. The SEC has become disgusting, keep this up & we will discover a whole new meaning of economic collapse.

Judy Caesar — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Judy Caesar Affiliation: Jun. 14, 2026 Please do not allow semi annual reporting.

I am retired - without a pension. I still have my IRA in the market - invested so that I have sufficient earnings to help with the taxes I have to pay on my monthly withdrawals. The taxes are a burden at this point in life. (The IRA selling point to baby boomers that our tax burden would be lower in retirement proved untrue.)

The quarterly earning reports are crucial to investment decisions for me - and that information adds stability to the entire US market.
The only ones to benefit if you ease the reporting requirements are the corporations and their already overpaid executives.

But we, the investors who rely on transparency in the market, would pay the price.

You will lose the trust of the investors if you allow this proposal to go through.

Judy Caesar
Calabash, NC

Judy Wood — Jun 14, 2026
Subject: S7-2026-15 Comment From: Judy Wood Affiliation: Jun. 14, 2026 I am a retired school administrator. I am widowed and have only my IRAs and Vanguard account. The quarterly reporting allows me to see how my investments in the different companies are doing with my funds. It also allows adjustments on the parts of individual companies and more importantly by me as an investor to be made .

Jules Martin — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Jules Martin Affiliation: Jun. 14, 2026 Julie Martin - Church Administrator - Central Kansas. Why on earth would the SEC change the reporting rules when we know, from history, that reducing quarterly reporting ultimately results in losses for ordinary investors? Who benefits from this change? NOT the middle class investor who will be relying on

retirement investments to LIVE.
Even Warren Buffet knows that quarterly Reporting is good for investors, and has been since the 1970s. Do not take us back to the 1950s.

Julia Brannon — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Julia Brannon Affiliation: Jun. 14, 2026 Why return to a system that did not work well to begin with? We need to reevaluate what works for the country and not just for the few. We do not need to under value the reporting of the revenue of businesses. We are already losing serious tax revenue from the “One big beautiful cheat on taxes for the wealthy” and can not afford to lose any additional tax revenue. Keep the system as it is and rewrite the tax code fairly! Economists across America predict the country’s current budget deficit is only worsening as it is. Why can’t government be forward thinking this time!! We need to learn from our history and do what will enable this once great country to increase economic opportunities for everyone. Thank you.

Julia Planes — Jun 14, 2026
Subject: S7-2026-15 Comment From: Julia Planes Affiliation: Jun. 14, 2026 There is no upshot to reduced reporting for the public. We have enough issues with insider trading and unethical financial behavior without making it easier to accomplish.

Julianna Guy — Jun 14, 2026
Subject: S7-2026-15 From: Julianna Guy Affiliation: Jun. 14, 2026 I am an accountant in Portland Oregon. Controls and federal regulations exist to prevent fraud. Enron was a watershed moment that showed the need for tighter regulations and more accountability. There is no reason to remove these guardrails, companies already produce all the reports, and CEOs must be accountable to the people providing the capital for them to operate. It would be lovely if we could just trust people to be honest and forthcoming, but controls and regulations exist so we don’t have to, from the bottom to the top of every organization. Companies and leadership with nothing to hide don’t need lax regulations. Julianna Guy

Julie Ball — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Julie Ball Affiliation: Jun. 14, 2026 Quarterly Reporting please! Retirement household here! Former Corporate treasurer!
Quarterly is what the system is set up for and has done well gor investors and Corporations alike! Being able to navigate trends is part of maintaining a strong foothold on decision making with swings being noted before it moves in any gross majority or minority to the bottom line!

Julie Brizes — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Julie Brizes Affiliation: Jun. 14, 2026 Julie M Brizes, Retired, Concord Township, Ohio. My opinion on quarterly reporting is that we need to keep this system active and report quarterly for ongoing accountability. If the numbers tank at the beginning of a reporting period, an investor is sitting on a leaky inner tube cruising down a river without knowing they are soon to drown. If you know about things you can research and respond. Ignorance is not a financial strategy. Please keep quarterly reports!!!!

Julie Dominian — Jun 14, 2026
Subject: S7-2026-15 Comment From: Julie Dominian Affiliation: Jun. 14, 2026 The oligarchs are already escaping the existing laws and regulations. The SEC should NOT be making it easier to fool any investors about the financial wellbeing of a company trading on the exchanges.

Kaitlin scaggs Creative director — Jun 14, 2026
Subject: File No. S7-26-18 From: Kaitlin scaggs There should be MORE accountability, not less. CEOs and executives make exponentially more money than other employees. They should be held accountable to the highest letter of the law for any attempt to mislead or defraud the public. If OSHA regulations are written in blood, SEC business rules are written in the bankruptcies of families.

Karan Shapiro — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Karan Shapiro Affiliation: Jun. 14, 2026 My husband and I worked hard our entire lives. We saved and put money away so we could try to enjoy our retirement eventually. We live in Connecticut, where my husband is a bank manager and I am a Sonographer. We do fine - we can afford small splurges from time to time. What is being proposed could make it impossible for us to retire. We stand to lose an awful lot of hard earned, and saved, money should this move forward. We both vote and have never missed even a local election. Please consider this when making decisions about these things.

Karen — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Karen Affiliation: Jun. 14, 2026 My name is Karen Clarke. I am a retired nurse from suburban Chicago. The only reason to loosen reporting requirements on corporations is to make it easier for them to conceal their true financial
status. This is not ethical, and it should not be legal.

As in the past, when corporations only had to report semi annually, investors will be at risk of losing up to half of their investments if this new rule goes into effect. This could be catastrophic
to small investors who count on these funds to support them in retirement.

Please do not loosen corporate reporting rules.

Karen Clarke

Karen McNally — Jun 14, 2026
Subject: S7-2026-15 Comment From: Karen McNally Affiliation: Jun. 14, 2026 Karen McNally - software project manager in the Financial sector
I strongly disagree with this change proposed by the SEC. I don't see how this change is fair for the smaller companies and individual investors (like myself). While I can see how the change will benefit larger companies and corporate insiders, it does not provide critical information that smaller investors need to stay competitive. Also, if there are issues that would appear in the reporting, waiting longer to make those visible means the risk is greater, especially to smaller investors. Making this change will force individual investors into a mode of "reactive" response to try and stay ahead of the swings that will only be seen every 6 months, rather than being able to make "proactive" course corrections over a quarter. All companies, large or small, need to be held accountable to all their investors in a timely manner. Please do not enact this change

---

Karen Peyser — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Karen Peyser Affiliation: Jun. 14, 2026 Quarterly reporting helps the small investor manage their portfolio better - because every penny saved must hopefully grow to be more when it's invested - if I lost 38% of my savings I'd be ho less. It's hard enough now with prices skyrocketing - the least this administration can do is keep its hands off our savings

Karla McMaster — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Karla McMaster Affiliation: Jun. 14, 2026 My name is Karla McMaster and I am co-owner of a small framing business with my husband. This business supports our community and earns some small amount of money, but we are mainly dependent on our withdrawals from investment accounts for our living expenses, which have increased dramatically in recent months.

It is of extreme importance to us that we are able to maintain our investments portfolio using quarterly reporting. In this increasingly dynamic world, decreasing the number of public report filings required would make it more difficult to adjust investments accordingly. This could result in large losses and increase our dependence on social services (e.g. social security and Medicare) at a time

when these services are under direct attack.
Please do not allow this to happen. Keep the reporting quarterly. Thank you.

Regards,
Karla McMaster

Subject: Comment on S7-2026-15 From: Kate Snelling Affiliation: Jun. 14, 2026 Catherine Snelling
June 14, 2026
Gloucester, Va

To the Securities and Exchange Commission,

I am writing to express my support for the measure to increase business transparency and accountability. Allowing businesses to determine their level of disclosure is a significant step toward ensuring corporate integrity.

As an educator, I have observed a shift in how values such as accountability are perceived. In an environment where traditional consequences have diminished, many individuals now evaluate actions through the lens of risk versus consequence rather than objective right or wrong. It is essential that our financial institutions adapt to this reality.

I agree that implementing a framework where the consequences of misconduct outweigh any potential financial gain is necessary to maintain ethical standards.

Sincerely,

Catherine Snelling, M. Ed.

Katherine Greene — Jun 14, 2026
Subject: S7-2026-15 Comment From: Katherine Greene Affiliation: Jun. 14, 2026 Quarterly reporting needs to continue. This shift to 6 months is for the benefit of the companies, not the average US citizen that is investing. We are entitled to quarterly reporting of financials so that companies are less able to commit fraud and hide information. We cannot afford to lose our life savings and/or our retirements because of companies that want to make money off of us by being dishonest and unethical.

Katherine Greene

Katherine Kubicek — Jun 14, 2026
Subject: S7-2026-15 From: Katherine Kubicek Affiliation: Jun. 14, 2026 My aunt and uncle worked for an Enron subsidiary basically their entire lives, doing good and wholesome blue collar work. They lost everything, their entire retirement savings gone over night.
Making it easier for white collar criminals to destroy the lives of real people is seriously evil business.

Kay House — Jun 14, 2026
Subject: S7-2026-15 Comment From: Kay House Affiliation: Jun. 14, 2026 I worked for seventeen years as a legal aid attorney, and was in private practice before that. I was disabled at 47 by chronic daily migraine, which continued until after my retirement date. While I saved some while at legal aid, its retirement benefits were low, and so was my salary. The work was fulfilling as long as I was able to do it, but the disability left me with inadequate savings for retirement. Now, at 72, I can't work any full time job, so I have to make my money work for me. Quarterly reporting is important to me. It gives me financial information on my investments that I could not possibly get without the required quarterly reports. When I worked, I had to make monthly reports. I think the companies are getting off light with quarterly reports. I do understand that for large companies, too many SEC requirements would be burdensome. Quarterly has been traditional for hundreds of years, back into our history as a colony of the UK. Quarterly is moderate and reasonable, while monthly would be better, I find quarterly a reasonable compromise. It allows me to see what companies are working well and which ones have market or management problems. If I don't get quarterly data, I could find myself trying to live on my social security benefits, which, with a top salary just under $60, even as an executive director, did not allow me as much room to put away savings. In private practice, before my career in legal aid, I was the partner who paid the staff's withholding, our part of their social security, and all those other taxes we had to pay for our two employees. Then I had to prepare the firm tax return and my and my partner's K-2 form. Easy? No, but not in any way impossible for someone with a JD.

If even well informed people don't get quarterly data, they won't be able to manage their savings appropriately. Please, keep the quarterly rule.

Thank your for your time in reading my concerns.

Very sincerely,

Kay Warren — Jun 14, 2026
Subject: S7-2026-15 From: Kay Warren Affiliation: Jun. 14, 2026 Kay Warren, Business owner, investor. Accountability matters, all filings must be signed with penalties for "mis-statements & omissions". No penalty, no detergent, & these people will absolutelt steal anything they can. Too many people lost everything for us to take these risks.

Kayvon Khosrowpour — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Kayvon Khosrowpour Affiliation: Jun. 14, 2026 To SEC,

I'm writing to share my perspective on maintaining quarterly reporting requirements. From where I stand as an individual investor, quarterly reports play an important role in keeping the market transparent and accessible.

Having updates every three months helps me stay informed without needing to rely on speculation or incomplete information. It creates a steady rhythm of accountability that makes it easier to understand how a company is actually performing over time, rather than trying to piece things together from irregular disclosures or annual summaries.

I also think quarterly reporting helps level the playing field. Not everyone has access to private insights or constant analyst coverage, so consistent public updates give everyday investors a fair chance to make informed decisions. Without that structure, it feels like the advantage would shift even more toward insiders or large institutions.

At the same time, I understand the concern that quarterly reporting can encourage short-term thinking. But from my perspective, the issue is less about how often companies report and more about how performance is communicated and evaluated. Investors can still take a long-term view while benefiting from regular, reliable data points along the way.
Overall, quarterly reporting strikes a practical balance between transparency and frequency. It provides enough information to stay informed without being overwhelming, and it supports a market environment built on trust and consistency.

Thanks,

Kayvon Khosrowpour

Keegan Mueller — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Keegan Mueller Affiliation: Jun. 14, 2026 Hi, my name is Keegan Mueller and I am a bookkeeper at a local high school. I like receiving my quarterly reports so I can track my investments and make sure my retirement is on track. The only reason to change

the reporting is to hide losses from investors and that's unacceptable.

Thanks,
Keegan Mueller
Clarksville, TN 37042

Keenan Henderson — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Keenan Henderson Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:I respectfully oppose the proposed rule because it would reduce the frequency of required public disclosures and weaken investor protections. Quarterly reporting provides investors with timely, reliable information that is essential for evaluating company performance, identifying emerging risks, and making informed investment decisions.
A move to less frequent reporting would create a greater information gap between company insiders and ordinary investors. In my view, that would reduce transparency, make markets less fair, and increase the likelihood that important developments are not disclosed until after investors have already been harmed.
The current quarterly reporting framework serves an important public interest by promoting accountability and market integrity. For these reasons, I believe the SEC should preserve the existing requirement rather than adopt a rule that would limit investors' access to timely information.

Keister Abby — Jun 14, 2026
Subject: S7-2026-15 From: Keister Abby Affiliation: Jun. 14, 2026 Quarterly reporting is critical to keeping accountability a priority. It's incredibly important with all the corruption occurring in the current administration.

Kelly Doolittle — Jun 14, 2026
Subject: File No. S7-2026-15 From: Kelly Doolittle I'm retired and I live in upstate New York. Corrupt

and fraudulent CEOs cost us ALL money in the long run, but especially hardest hit all the folks who are already struggling - working class and working poor and retirees like me who are on a fixed income, who already can't afford the high prices inflation caused by government mismanagement has inflicted on us, which are even higher when corrupt CEOs allow price gouging in their businesses and stores that offer the essentials that those struggling people rely on - gas, health care, cheap clothing, groceries…truly, the only Americans that would benefit from taking away quarterly reporting are those that are already wealthy and corrupt. Is that really what you want for the American people? I have to wonder what our founding fathers would've said about that. Certainly it's not a patriotic thing to do. In fact, it's a fraudulent act in itself to make it easier for the corrupt rich to get even richer. Please think twice before you take take yet another urgently needed regulatory act away from the American people.

Kelly Hull — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Kelly Hull Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Quarterly statements help us underdtand better and allow us to make more informed decisions about what type of potential our investments could have. Taking them away would be like using public investors as chum for the shark of wall street or whoever has the money to most manipulate the market for their favor.

Kelly Sherman — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Kelly Sherman Affiliation: Jun. 14, 2026 Please don't push families who have to save their own retirement into poverty. US citizens are being squeezed from all sides. This will only hasten to the decline of our society.

Kenny Holzemer — Jun 14, 2026
Subject: S7-2026-15 From: Kenny Holzemer Affiliation: Jun. 14, 2026 Each of these subjects are essential to every stockholder's decisions on whether to buy, sell or keep stocks, and they must be made available quarterly.

Quarterly reports from publicly traded companies include
Financial statements-
• Balance Sheet: Displays the company's assets, liabilities, and shareholders' equity at a specific point in time.
• Income Statement: Shows the company's revenues, expenses, and profits over a specific period.
• Cash Flow Statement: Details the cash inflows and outflows from operating, investing, and financing activities.
• Statement of Shareholders' Equity: Reflects changes in equity, including retained earnings and dividends paid.
• Notes to Financial Statements: Provides additional context and details about accounting policies and specific line items.
• Management Discussion and Analysis (MD&A): Offers insights from management on financial performance and future outlook. Quantitative and Qualitative Disclosures About Market Risk.

• Controls and Procedures to protect the company and its investors.
• Legal Proceedings
• Unregistered Sales of Equity Securities and Use of Proceeds. Unregistered sales refer to transactions that are not officially recorded or reported to tax authorities. These sales often occur in cash, making them harder to trace and monitor. They can involve goods or services that are not declared for tax purposes. Unregistered sales may lead to tax evasion and legal consequences for businesses. They can create an uneven playing field, disadvantaging compliant businesses. Monitoring and regulating unregistered sales is crucial for maintaining fair market practices.
• Defaults Upon Senior Securities (which are paid before the average stockholder's in case of financial distress.)
• Mine Safety Disclosures.

Kenny Mckee — Jun 14, 2026
Subject: S7-2026-15 From: Kenny Mckee Affiliation: Jun. 14, 2026 Have we learned nothing since the days of rampant cheating on corporate finance statements? ENRON wasn't the first but it was certainly one of the worst examples of how destructive these lies can be. So now a corporations can hide what it's doing, then hopefully take time to clean it up all the while our markets become less safe to insider trading. If Congress and the President can use the inside knowledge to trade and with earnings not reported for six months what chance do average Americans have in safe guarding their assets? We should not be changing rules that benefit one class against the other when it's the shareholders who will be most vulnerable.

Guy Mckee

Kerri Covey — Jun 14, 2026
Subject: We need to continue quarterly reporting! From: Kerri Covey Affiliation: Jun. 14, 2026 We must continue to have quarterly reporting to protect the small investor who often has no choice about where their funds are invested. The possibility of fraud increases when companies are allowed to go dark for 6 months at a time. This is unacceptable and unAmerican.

Do the right thing and stop shortchanging the American people.

Kerri Covey
Ypsilanti, MI

Kevin Adams — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Kevin Adams Affiliation: Jun. 14, 2026 Kevin Adams, Systems Engineer in Texas wants the quarterly reporting policy in place for past 50+ years to remain as is, and not loosened to once every 6 mth. Simply put, the inherent risk of such change does not outweigh the risk. This attempt to shift transparency towards opaque law will only foment instability of the US markets, reduce trust and international ratings. It will simply encourage more problems with US financial markets impacting its citizens while allowing more corporate waste, corruption and fraud. And would trigger more US bailouts paid for by tax dollars. Please stop the steal!!

- Kevin

Kevin B Hudson — Jun 14, 2026
Subject: S7-2026-15 From: Kevin B Hudson Affiliation: Jun. 14, 2026 My name is Kevin Hudson, I am a private citizen living in the 76950 zip code.
You will be derelict in your duty to the US citizens if you allow quartely reporting to be reduced to bi-annually.
Cutting personally certifiable reporting from four times a year (Form 10-Q) to twice a year (new Form 10-S) allows companies to hide adverse financial information for a longer time, increasing the window for bad actors to manipulate stock prices, conduct insider trading, and cover up accounting fraud.
Do the right thing.

KEVIN CULBERTSON — Jun 14, 2026
Subject: Comment on S7-2026-15 From: KEVIN CULBERTSON Affiliation: Jun. 14, 2026 Dear Securities and Exchange Commission, I am writing to express my support for maintaining quarterly reporting requirements for publicly traded companies. Like many Americans, I have spent years working, saving, and investing for retirement. The ability to access timely and reliable information about the companies in which my retirement savings are invested is essential to my financial security and peace of mind. Quarterly reports provide investors with regular updates on company performance, financial condition, and potential risks. Without these reports, investors would be forced to wait much longer for important information that could affect their retirement accounts and investment decisions. Increased gaps between disclosures would create greater uncertainty and reduce transparency in our financial markets. As an individual investor, I believe consistent reporting helps create a level playing field by ensuring that all investors have access to current information. Transparency builds trust, and trust is one of the key reasons U.S. capital markets remain among the strongest and most respected in the world. While I understand the desire to reduce regulatory burdens on public companies, I do not believe that reducing transparency is the right solution. Investors should not have to sacrifice access to important financial information, particularly when so many Americans depend on the stock market to fund their retirement years. I respectfully urge the Commission to maintain the current quarterly reporting requirements and continue to prioritize transparency, accountability, and investor protection. Thank you for your time and consideration. Sincerely, Sheila Culbertson West Chester, PA

Kim Fischer — Jun 14, 2026

Subject: My view on Rule S7-2026-15 From: Kim Fischer Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I am writing as a retail investor and a former investigative journalist who has spent years helping the public understand how information flows, and how it gets withheld.
Quarterly disclosures are not a bureaucratic formality. They are the minimum standard that allows everyday investors to monitor the health of companies they hold, catch early warning signs before they become crises, and make informed decisions between annual reports. Six months is a long time. A lot can change, and has.
If this passes, sophisticated institutional investors with direct access to management will continue to receive material information through earnings calls, analyst briefings, and voluntary releases. Individual investors who rely on mandatory disclosures will not know, without checking, whether the company in their portfolio chose quarterly or semiannual filing. That asymmetry favors the well-connected.
I urge the Commission to maintain quarterly reporting as the standard. The burden argument belongs to companies and their accountants. Transparency belongs to the public.

Kim Gillenwater — Jun 14, 2026
Subject: S7-2026-15 From: Kim Gillenwater Affiliation: Jun. 14, 2026 Don't help them cheat. We need quarterly reporting.

Kim Jordan — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Kim Jordan Affiliation: Jun. 14, 2026 My name is Kimberly Jordan. I'm a personal development coach in Cary, North Carolina, and like most US citizens, I am concerned about my financial future, especially since the current administration, who claimed they would drain the swamp, have done none but enrich themselves. The firings by DOGE, tariff wars, ongoing war in Iran, favoritism toward AI data centers and AI in general, threats to social security and medicare, other reckless actions are all causing financial hardship and anticipatory financial anxiety. So, it is imperative that the SEC keep financial reporting quarterly. We, as hard working citizens, need our investment income to be protected. Thank you.

Subject: S7-2026-15 Comment From: Kirsten West Affiliation: Jun. 14, 2026 My name is Kirsten West. I work as a Speech-Language Pathologist clinical supervisor and adjunct professor. I do not support the recommended change to semi-annual investment reports as quarterly information allows more informed investment decisions and longer gaps create an unfair advantage for corporate insiders.

Kirsti Kjome — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Kirsti Kjome Affiliation: Jun. 14, 2026 Kirsti K., Retired, Utah
I worked 40 years in the public sector of emergency medicine, police, fire, & dispatch. I worked hard to earn my retirement within the state system that utilizes earning on the market to pay retirement checks. This would be devastating to my monthly income & savings, knocking me lower into the poverty line then ever.
This decision is ludricus, benefitting only the upper levels in the finance market. The average person who has dedicated their lives to public service are going to be slammed by this decision. At present, they are supporting themselves.....enacting this will drop them into the public assistance needed lines.
Please rethink this decision.... We earned what we are getting, this will destroy it.

Kit Taylor — Jun 14, 2026
Subject: S7-2026-15 Comment From: Kit Taylor Affiliation: Jun. 14, 2026 Kathleen Taylor, retired,this matters to me because corporations should be accountable to those who are invested in them. They don't deserve a free ride.

Kit Taylor — Jun 14, 2026
Subject: S7-2026-15 Comment From: Kit Taylor Affiliation: Jun. 14, 2026 Dear [Recipient Name],

My name is Kathleen Taylor, and I am writing to express my views as a retiree and investor.

I believe it is essential that corporations remain accountable to those who invest in them. Accountability is a fundamental responsibility, and no organization should be exempt from the oversight of its stakeholders.

Thank you for your time and for considering my perspective on this matter.

Sincerely,

Kathleen Taylor

Kit Taylor — Jun 14, 2026
Subject: S7-2026-15 From: Kit Taylor Affiliation: Jun. 14, 2026 Dear [Recipient Name],

I am writing to express my firm belief that corporations must be held accountable to those who invest in them or support them. As a stakeholder, I believe it is essential for organizations to maintain transparency and responsibility toward their supporters.

I look forward to hearing your perspective on how this accountability is being upheld.

Best regards,

Kathleen Taylor

klc217 — Jun 14, 2026
Subject: S7-2026-15 From: klc217 Affiliation: Jun. 14, 2026 As an investor, Sarbanes-Oxley is not a suggestion, and reporting should be kept quarterly. Please do not change it!

Koby Klug — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Koby Klug Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
To make a good informed decision you need to be aware of all the facts. How ever valuable or pertinent to the decision. The thing is you dont even try to deny that you are doing this to mentally physically and emotionally hurt people. To cheat and fraud people out of everything. It's not funny you are not clever the blaton disrespect is disgusting. Monopoly laws are a joke 4 companies own everything. All the people and offices hired to do a job of protecting and looking after the citizens of the US and their welfare have been paid to do the exact opposite. The funny part is all the people in on this whether they were aware of the evil they were conned into doing it. You have not gotten away with anything. Our FATHER in heaven has the real ledger and eternity is along time to be paying for temporary illegally and fraudulently gained profit! You go on with your bad self. Im all for justice but this time I wont be watching it get dealt out. You know what you are trying to do is wrong!

Kris Anderson — Jun 14, 2026
Subject: S7-2026-15 Comment From: Kris Anderson Affiliation: Jun. 14, 2026 Keep the reporting quarterly; we need to be aware of what our finances are doing. Semi annually may be too long to make adjustments especially in today's environemt.

Regards,

Kris

Kuttush Lambu — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Kuttush Lambu Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
We (my spouse and I) are heavily invested in US securities through stocks, ETFs, index funds, and some bonds. We regularly invest, and while doing such investing, we rely on all the quarterly and related information that we get. Without such information, we will not be able to make proper investment decisions. And that might lead us to lose a lot.
We are not rich people. We are not Warren Buffett, Trump, Musk, or such investors with billions/ trillions of dollars in our pockets. We work hard day and night, save and invest. And, we rely on trustworthy information to choose our investment products. We are ordinary people who cannot afford financial planners or investment advisors.
So, please do not take that away from us. If you take that away, then people like us will not be able to make sound investment decisions. We might lose a lot; we might not be able to save enough for retirement. And, the ultimate result might be disastrous -- millions of Americans with not enough saved for retirement because of wrong investment decisions, because they could not gather detailed, important, and trustworthy information about investment products. And, that is NOT THE WAY TO MAKE AMERICA GREAT.
So, I hope you will look into this and will NOT stop producing the financial information every quarter.
Thank you,
Kuttush

Kym Loos (kloos) — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Kym Loos (kloos) Affiliation: Jun. 14, 2026 Kym Loos, M&A Manager, San Jose CA

I disagree with semi-annual reporting because.

Prevents Fraud and Manipulation: Frequent reporting acts as a constant check against insider trading, corporate mismanagement, and market manipulation by keeping material, nonpublic information in the open.

Aids Investor Decision-Making: Regular data drops provide a reliable stream of information, allowing investors and analysts to accurately evaluate a company's financial health, predict future earnings, and make informed buy, sell, or hold decisions.

Promotes Market Transparency: Routine updates help establish a fair, transparent, and efficient market by ensuring that all stakeholders (from institutional funds to everyday retail investors) have access to the same baseline data.

L Joye Socha — Jun 14, 2026
Subject: Comment on S7-2026-15 From: L Joye Socha Affiliation: Jun. 14, 2026 Investments are the only retirement plan for most people. Please do not take away the quarterly reporting. It is already built into a company's cost and business model. We need to continue this transparency.

MY NAME IS LARS PETTER SVANOE, SOON TO BE RETIRED, MADISON Wi 53716

DO NOT REDUCE THE QUARTERLY REPORTING CURRENTLY.
This changes does not serve the investing public in any way. It will not allow enough transparency in a volatile investment marketplace. In an age of increasing the number of data points constantly being available this will intentionally obscure the health of companies to the very investors they are serving.
It is a case of "less is less" NOT "less is more"

Laurel Pope Boone — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Laurel Pope Boone Affiliation: Jun. 14, 2026 Quarterly reporting requirements for publicly traded companies is absolutely necessary to hold fraud at bay. Transparency protects investors and the economy itself. If people do not have faith in investments, they will be more and more likely not to invest. Our main securities regulations were put on the books as a reaction to the 1929 crash. It was obvious to all that transparency was good for investors and therefore the economy itself. A security is only worth what someone is willing to pay. Transparency builds confidence. A whole lot of fraud can go undetected for half a year.
Laurel Boone

Lesile Stone — Jun 14, 2026
Subject: S7-2026-15 From: Lesile Stone Affiliation: Jun. 14, 2026 Dear SEC Commission:

My name is Leslie Stone, I am a retired banker. I live in Stuart, Florida.

Quarterly reporting is vital for the public interest. It's not a hardship on any bank. I worked in many different banks throughout my career. The customers of institutions need to know the financial status of the place where they are keeping their money. Quarterly reporting gives them more peace of mind. It also helps our economy by having laws and regulations in place to keep companies solvent. Changing this quarterly reporting to semi annual reporting does not help the public. It may help corporations hide malfeasance. Why would you want to do that? I do not want you to do that.

Sincerely,
Leslie Stone

Lex Alexander — Jun 14, 2026
Subject: From: Lex Alexander Affiliation: Jun. 14, 2026 Dear SEC:

As a self-employed person of retirement age in Greensboro, N.C., I am reliant on my investments for the bulk of my income. I absolutely rely on public documentation of financials for my investment decisions.

Events in recent years have shown that corporate CEOs have been more than willing to mislead investors as to the financial condition of their companies. Making them personally responsible for those reports, on pain of prison, has sent many unscrupulous CEOs to prison. More importantly, it has protected retail investors like me.

Currently, CEOs must sign on as personally responsible for the accuracy of their companies' financial data quarterly. That requirement should stay in place and not be altered. Having to sign that statement quarterly is a timely reminder to CEOs of their duty not to mislead investors. That reminder is valuable and should remain in place.

Thank you for your attention to this matter.

Sincerely,

Hooper "Lex" Alexander IV
Greensboro, N.C.

Subject: S7-2026-15 From: Linda Boone Affiliation: Jun. 14, 2026 Linda Boone, retired teacher

Accountability when dealing with money is extremely important. I think quarterly reporting should remain so that companies and their executives will be held accountable for income, expenditures, taxes, and transparency. Please do not reduce the number of times per year that this reporting is mandatory. We are currently in a period of perceived and real corruption in business and government. Reducing the number of times for this type of reporting will only encourage corruption and secrecy on the part of businesses and government. Thank you for offering this opportunity to respond to this possibility for change.

Linda Bosford — Jun 14, 2026
Subject: S7-2026-15 Comment From: Linda Bosford Affiliation: Jun. 14, 2026 Having worked hard to establish my "nest egg" and manage my investments I would NEVER want anything less then quarterly statements. It is vital to have those to determine whether you will or not meet your needed goals. I am not one for extremes, impulse buying or selling. That is what would happening if I didn't have those quarterlies!
Thank you for your attention to my concern.

Linda Mayberry — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Linda Mayberry Affiliation: Jun. 14, 2026 I am writing to express my concerns regarding the potential shift from quarterly to semi-annual reporting in the United States.

Given the historical context of similar practices between the 1950s and 1970s, as well as the outcomes observed in other countries that have moved away from quarterly reports, I am questioning the rationale behind considering this change again.

What are the specific reasons for revisiting this reporting structure despite previous experiences and international precedents?

Best regards,

Linda Mayberry

Linda Mayberry — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Linda Mayberry Affiliation: Jun. 14, 2026 Why would the US even consider going to semi annual reporting??? Are we just too dumb or naive to learn not only from our previous mistake of doing this -1950s-1970s, but other countries results after moving from quarterly reports???

Linda Mayberry — Jun 14, 2026
Subject: From: Linda Mayberry Affiliation: Jun. 14, 2026 Why would the US even consider going to semi annual reporting??? Are we just too dumb or naive to learn not only from our previous mistake of doing this -1950s-1970s, but other countries results after moving from quarterly reports???

Linda McColgan — Jun 14, 2026
Subject: S7-2026-15 Comment From: Linda McColgan Affiliation: Jun. 14, 2026 This change makes no sense to me as an investor. Is this another way to make the rich richer? I SEE NO BENEFIT FROM THE INVESTOR SIDE.

Either way, the security and exchange commission should find better ways to protect the investor. I also have to say the recent change to allow SpaceX IPO into the NASDAQ sooner is very classic example of making the rich richer. I do NOT want SpaceX in an index. HOW DID THIS CHANGE GO THROUGH UNDER THE RADAR?

I appreciate the opportunity to comment, Linda McColgan

government lets corporations run us into the ground financially. Stop taking advantage of taxpayers. This is ridiculous.

Lisa Frankel Valera — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Lisa Frankel Valera Affiliation: Jun. 14, 2026 Quarterly reporting is important now that individual investors are more prolific in the marketplace. Twice yearly reporting would lead those individuals to make more frequent swings in brokerage accounts. Individual investors would then try to game the system more in trying to anticipate the future rather than responding to actual market conditions. The same holds true for employer-held retirement accounts in terms of seeing more volatile swings on a larger scale.

Lisa Housand — Jun 14, 2026
Subject: S7-2026-15 From: Lisa Housand Affiliation: Jun. 14, 2026 Keep transparency and continue with quarterly reporting. I like the idea of keeping corporations accountable by signing their financials quarterly and penalties for lying!! It works.

Lisa Hull — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Lisa Hull Affiliation: Jun. 14, 2026 We need quarterly reporting to save for retirement. Pensions no longer exists. Social Security is going away. How else are we supposed to save? My parents live on $2000 a month. This is not sustainable and is inhumane. Give us options to save for a retirement. Otherwise I need protection that I can work until I die.

Lisa Lauterbach — Jun 14, 2026
Subject: S7-2026-15 From: Lisa Lauterbach Affiliation: Jun. 14, 2026 The SEC says current reports and press releases will fill the gap. Read the fine print: earnings releases ride on Form 8-K as "furnished," not "filed." That category exempts them from the automatic liability filed reports carry. No outside auditor reviews them, and no certification is required even when an 8-K contains financial statements. The SEC's own proposal concedes the problem. The 8-K may contain information, but it lacks any accountability.

Lisa LeClaire — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Lisa LeClaire Affiliation: Jun. 14, 2026 Lisa LeClaire
Product Manager
Bonney Lake, WA

As a member of the millennial generation, we have no confidence that social security will continue to pay benefits into our retirement years. Investment portfolios are the surest way to protect our futures, and we need to do everything we can to maximize our returns. Please protect transparency and accountability by preserving quarterly reporting standards.

Sincerely,

Lisa

Lisa Melby — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Lisa Melby Affiliation: Jun. 14, 2026 Lisa Melby, retired teacher, St. Paul, MN

Returning to semi-annual reporting could have devastating effects on the accounts that have my and my husband's retirement investments. It's bad enough that we have a president working so hard to wreck our economy for his ego and vanity, and caring more about the 1% than the 99%. And the Social Security we paid into all of our lives is being gutted too. Those of us that have our retirement from our employers in the stock markets can't afford to have it diminished when we need it most. We literally can't afford to go backwards.

Lisa Shab — Jun 14, 2026
Subject: S7-2026-15 From: Lisa Shab Affiliation: Jun. 14, 2026 My name is Elizabeth Shab, Sr. Reporting Analyst, New Milford, CT. The SEC must keep to quarterly reporting. Especially now, with markets as volatile as they have been, and with trust in our institutions diminishing at a rapid rate, it is important to not do anything to further test that trust, such as by reducing the reporting to only twice per year. We saw what happened before - the scandals, the failures to self-regulate. So there is a strong need for the quarterly reporting. Perhaps we should be asking it to be upped to monthly instead. No. Do not change this to twice a year. Too many sins can be covered in that time. Stick to quarterly please.

Lisa Taylor — Jun 14, 2026

Lisa Thurston — Jun 14, 2026
Subject: S7-2026-15 Comment From: Lisa Thurston Affiliation: Jun. 14, 2026 Dear SEC,
My name is Lisa Thurston and I am an academic dean at a small private school in Scranton, PA. As I approach retirement, I believe it is important for me to be able to track the progress of my investments quarterly. I make informed decisions with my wealth manager about my investments, which will become my income later this year. As I have invested in public corporations, I believe that they should honor my faith in their company (I loaned them my money after all) and continue to report to me quarterly, not biannually.
Thank you,
Lisa Thurston

Lori Varady — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Lori Varady Affiliation: Jun. 14, 2026 I have worked 45 years in a publicly traded eight plus Billion packaged foods business; Twenty of those years in Investor Relations. I worked along side our communications, marketing, legal, treasury and a myriad of business professionals to compose and refine our Quartetly results. I know how these results are managed and tweaked before being made available to the Investing public. Quarterly Reporting must be maintained to allow financial professionals and investors to manage their portfolios. Six months is too long for downward trends in stock performance to be revealed to the investor. Not to mention other critical issues that can impact the stock price. The typical investor does not have insider information that business executives and others possess. Sadly this information is also available to the President of the United States, Congress and many others in the inner circle in Washington DC and beyond. Ethics and compliance have evaporated if they exists at all in the current Administration. Please let the working person maintain the slightest bit of control over their hard earned dollars! Not everyone is oblivious to how it works.

LYNN SEREBIN — Jun 14, 2026
Subject: Comment on S7-2026-15 From: LYNN SEREBIN Affiliation: Jun. 14, 2026 We have worked our entire lives to have financial stability in our retirement years. This administration is hammering us like no other. Between taxing the poor and giving everything to the rich, and the inflation caused by military actions, wars of choice, and multiple other factors imposed on us by the Trump dictatorship, we will have to find jobs in our 80s. DO NOT let corporations have yet another way to rob us of our savings. Continue requiring quarterly reporting!

I am concerned about this issue for a few reasons, first my husband and I are nearing retirement and will rely on our investments to carry us through. Second, we have a son and I don't want his financial future screwed up because corporate boards are concerning more about themselves then their investors. Lastly, it would be disastrous for economy. Quarterly reporting is one of the only tools investors have to determine whether the company's leadership is acting honestly. We must keep it in place. Remember Enron? How about the stock for crash in 1929? Rolling back to twice a year is not in the best interest of the investor. It only benefits the the board and can hide too much until it's too late.

🌸Aloha,
Lynne

Lynnette Vyles — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Lynnette Vyles Affiliation: Jun. 14, 2026 As an American citizen about to enter retirement in 5 years, I am already facing the challenge of Social Security not providing anything and now, you want to let companies steal more from me by not reporting quarterly. This is a bad idea as we all know there has been extensive fraud and theft in big business. The CEOs of companies make millions of dollars every year while the rest of us are barely making it due to rising food, housing, and fuel costs. We are needing to pull money from savings just to get through, without any "extras".

Giving companies more time to hide their theft, deception, and fraud is not a wise choice and I, as an older American, strongly opposed this. My retirement accounts have seen extreme losses over the past few years and to let companies hide more of their deception is wrong. You are playing with MY money and I want to continue to see quarterly reporting.

M Blair — Jun 14, 2026
Subject: File No. S7-2026-15 From: M Blair As an individual investor approaching retirement, I rely on timely and transparent financial reporting to make informed decisions about my retirement savings and investment portfolio. Quarterly reporting provides investors with regular insight into a company’s financial performance, risks, and operational trends. Reducing required reporting to a semiannual basis would decrease the frequency of information available to investors and could make it more difficult to evaluate changing business conditions in a timely manner. While I understand the desire to reduce administrative burdens on companies, investor transparency and access to current information should remain a priority. For those of us who have spent years building retirement savings through disciplined investing, consistent and reliable financial reporting is an important safeguard. I encourage the SEC to carefully consider the potential impact on individual investors before making changes to the current quarterly reporting requirements. Thank you for

considering my comments

M D — Jun 14, 2026
Subject: S7-2026-15 From: M D Affiliation: Jun. 14, 2026 I survived the Worldcom crash, but Enron completely f*cked over my portfolio (147K to 9K). Those guys should've gone to jail and banned from trading for the rest of their lives. Now I have to fight to maintain the second portfolio I built going into retirement. Keep holding the SEC's feet to the fire and maintain the quarterly reports. Otherwise, this becomes another form of money laundering in my book.

Maria Gillett — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Maria Gillett Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Please do not proceed with the proposed rule of eliminating the quarterly reports for investors. This will increase insider trading and promote fraud, and decrease transparency and fairness for all investors. It will decrease trust in the system and the SEC and would make investors more cautious and will have ramifications for the economy. Retain the quarterly reports and disclosures.
M.G.

Maria Pedraza — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Maria Pedraza Affiliation: Jun. 14, 2026 Not liking this change from quarterly to semiannual reporting. I want to know what is happening with my investments more often than twice a year.

Marialejandra Laureano — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Marialejandra Laureano Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I am writing as a student who is actively learning about financial markets, investing, and how ordinary Americans can participate in economic growth.
As I have studied investing, one theme appears repeatedly: markets function best when participants have access to reliable information. Transparency is often discussed as a regulatory requirement, but I have come to view it as something more fundamental. It is one of the reasons people are willing to participate in the first place.
Many Americans are not born into wealth. They are students, recent graduates, first-generation professionals, small business owners, and workers trying to build a better future through saving and investing. For many of us, the stock market represents one of the few opportunities to participate directly in the growth of American businesses. Yet participation requires trust.
When experienced investors evaluate a company, they may have access to research reports, professional networks, financial advisors, and years of experience interpreting financial information. Someone just beginning to learn about investing often has none of those advantages. They are told

to do their research, understand the company, and make informed decisions. Public disclosures are one of the primary tools available to them.

Imagine a college student opening their first brokerage account. They are trying to compare two companies in the same industry. One reports quarterly. Another reports semiannually. The student is already learning how to read financial statements, understand earnings, evaluate debt, and assess risk. Now they must also navigate different reporting schedules and different levels of available information. The barrier to understanding becomes higher.

Or consider a young professional contributing to a retirement account for the first time. They may not actively trade stocks, but they are placing trust in public markets as a vehicle for long-term wealth creation. That trust depends on confidence that public companies operate within a framework that values transparency and accountability.

As I read this proposal, I found myself agreeing with some of its goals. I understand that preparing quarterly reports requires time, money, and resources. I understand the Commission's desire to reduce unnecessary compliance burdens and support capital formation. The proposal estimates that companies electing semiannual reporting could reduce annual direct compliance costs associated with interim reporting.

What I struggle with is whether the projected savings justify the tradeoff.

The proposal acknowledges that some companies may continue quarterly reporting because they believe more frequent disclosure supports liquidity, valuation, analyst coverage, and access to capital. The Commission also recognizes that a market containing both quarterly and semiannual reporters may reduce comparability and increase the cost of obtaining information, potentially affecting liquidity, analyst coverage, and forecast accuracy.

Those acknowledgments raise an important question.

If transparency contributes to investor confidence, and investor confidence contributes to participation in public markets, have we fully considered the long-term value of that transparency?

The discussion surrounding this proposal often focuses on whether companies should have the option to choose their reporting frequency. My concern is slightly different. I question whether market forces alone will preserve the level of transparency that has helped make U.S. capital markets trusted and accessible.

The decision may be optional, but investors do not make that decision. Management does. Over time, competitive pressures may encourage more companies to reduce reporting frequency in pursuit of cost savings. Even if each individual decision appears reasonable, the cumulative effect could be a market that becomes more difficult for ordinary participants to understand and evaluate. For a large institutional investor, that may be an inconvenience. For someone just entering the market, it may be a reason not to participate at all.

There is also a broader consideration that extends beyond reporting frequency.

Public confidence in capitalism depends, in part, on the belief that ordinary people have a meaningful opportunity to participate and succeed. Most Americans understand that markets will never produce identical outcomes, nor should they. What they expect is a fair opportunity to access information, evaluate risks, and make informed decisions.

When people feel that the rules are transparent and that information is broadly available, they are more likely to invest, save, start businesses, and participate in the economy. When they perceive that access to information increasingly favors those with greater resources, expertise, or connections, confidence can erode.

As a student learning about markets and financial systems, I believe transparency serves a purpose far beyond compliance. It helps build trust. It helps create confidence. It encourages participation from people who are still learning how the system works.

The strength of American capital markets has never been solely that they generate wealth. It is that millions of ordinary people believe they have a chance to participate in that wealth creation. Transparency is one of the foundations that makes that belief possible.

For that reason, I encourage the Commission to carefully consider not only the projected compliance savings associated with reduced reporting frequency, but also the long-term effects on investor

confidence, financial education, market participation, and public trust.
Thank you for your consideration.

Marian — Jun 14, 2026
Subject: S7-2026-15 From: Marian Affiliation: Jun. 14, 2026 I do not trust any CEOs and the more oversight, the better! Keep the reporting quarterly. If they're doing nothing illegal, they have nothing to worry about.

Marlita Burford — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Marlita Burford Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
The average investor that does not sit on the board needs transparency that the quarterly earnings report provides. If a company doesn't want to comply they should remain privately held and utilize their own funds to support their business. If they want access to market funds they need to report to the market on a quarterly basis. As you start to relax other standards, transparency drives accountability and needs to remain in place.

Marsha Switzer — Jun 14, 2026
Subject: S7-2026-15 Comment From: Marsha Switzer Affiliation: Jun. 14, 2026 Ending quarterly reports removes transparency and accountability. My funds from money I've earned working long hours should be part of a timely informational loop. Businesses must frequently review profit and loss to remain solvent; sharing that data every three months is not a burden. They already have the information in front of them to share with stakeholders. - M. Switzer, M.Ed.

Marshalaa — Jun 14, 2026
Subject: S7-2026-15 Comment From: Marshalaa Affiliation: Jun. 14, 2026 Marshalaa Wagner Retired
I use quarterly detail to manage my income stream and for future planning.
I also use it for my father as his guardian and POA and to manage college fund investments for his grandchildren.
This change doesn’t allow enough timely information to minimize negative impact and maximize growth and income
We need the information as we are getting it now.

Mary Ann Porter — Jun 14, 2026
Subject: S7-2026-15 Comment From: Mary Ann Porter Affiliation: Jun. 14, 2026 My name is Mary Ann, a retired disabled senior. Disabled because someone pulled out in front of us I'm a busy highway and my husband was killed and I came very close. Quarterly reporting is more time sensitive for those not in the know, which is just about everybody that is not in a government position. It's not fair that some people know and some people don't. The GOP is trying to be make your reports release down to twice a year as opposed to four times a year allowing "some" people a secret time to invest while others are left in the dark. You need to vote with the people as you are not supposed to be an extension of the government, but a separate entity. Please vote with the people, this regime is putting the people at the bottom (bottom feeders by their choice). Thank you for your time in this very important matter of equality for the American people. 🇺🇸

Mary Glasgow — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Mary Glasgow Affiliation: Jun. 14, 2026 I am requesting that reporting remain quarterly. This ensures timely details are provided for informed decisions in the market. It also keeps the US Markets strong and competitive while protecting the consumer from shady back door trades that will tank the investment portfolios of the average American investor. The current admistration is already handing everyone's money to the 1% and destroying the middle class. A strong middle class is needed to support this country. We've seen how the weakening of the middle class under trumps administration has caused irreversible damage putting America last not first. Our economy is a joke proped up on Trumps manipulation of the stock market to profit him his family and cronies. He has had to manipulate it to prevent total chaos. This would be his nail in the coffin of the the American economy.

Subject: Comment on S7-2026-15 From: Mary Lasley Affiliation: Jun. 14, 2026 Thumbs up on quarterly reporting.
Quarterly reporting gives the consumer understand what’s going on.
Thumbs down on semi-annual reporting. It keeps blinders on the consumers and could allow corporations to cheat.

Sent from my iPhone

Mary Linda Palmer — Jun 14, 2026
Subject: S7-2026-15 Comment From: Mary Linda Palmer Affiliation: Jun. 14, 2026 A change in rules fails to protect investors.
Quarterly reporting protects investors. Longer gaps between required reporting cycles gives too many options for insiders to unfairly dump their stock. It also means that companies that negative activities on a company's books can compound significantly more before investors have an opportunity to make a move.
Given that these reports will still need to be made twice a year, savings are likely minimal, and will not be passed along to shareholders.

Mary Moren — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Mary Moren Affiliation: Jun. 14, 2026 Yes, we need quarterly earnings to be reported! Keep the companies honest and don't cook the books. Retired now but worked for a CEO at a Fortune 500 company in Silicon Valley in the 1990s. My CEO didn't take a salary and never initiated any insider trading! Keep the quarterly earnings! I don't want to lose any of my investment portfolio! Mary Moren

Mary Nelson — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Mary Nelson Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Quarterly disclosures are the bedrock and investment management because they provide regular predictable window into a company's financial health, operation performance, and strategic direction. Without these timely updates, investors would essentially fling forcing them, Tree Line outdated metrics or unreliable details.
Eliminate quarterly disclosures would be highly detrimental, it would drastically reduce market, transparency, and widen the information gap between institutional insiders and everyday retail investors.
Furthermore, a shift to less frequently reporting would increase market volatility as any unexpected corporation news would hit the market like a shockwave rather than being digested and manageable intervals.
Ultimately removing these disclosures would erode investors confidence, introduce unnecessary risk, and cripple our ability to make proactive well time adjustment to portfolios.
I respectfully ask that you decline and do not move forward with something that would be so detrimental to the people of this country.

Mary Pertzborn — Jun 14, 2026
Subject: S7-2026-15 Comment From: Mary Pertzborn Affiliation: Jun. 14, 2026 This is a dishonest

policy that puts American citizens and their savings at risk. Quarterly reports are essential information for investors. Reducing important financial information to twice annually is counterproductive and destabilizing to our economy.

Mary Remmel Wohlleb — Jun 14, 2026

Matthew Everett — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Matthew Everett Affiliation: Jun. 14, 2026 Public companies need to report quarterly. We, the consumers need real transparency, which has not been a Hallmark of the president or Congress.

Matthew J Gray MD — Jun 14, 2026
Subject: Request to keep Quarterly reporting From: Matthew J Gray MD Affiliation: Jun. 14, 2026 To whom it may concern,

As a parent of two young children, I am deeply concerned about the financial outlook for their

generation. I am writing to implore you to maintain quarterly reporting requirements.

Based on historical data, a shift to semi-annual reporting is associated with a higher likelihood of lower returns and catastrophic market collapses. Frequent reporting is essential for the transparency and stability our financial future depends on.

Sincerely,

Matthew J Gray, MD

Matthew Kell — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Matthew Kell Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission: This rule would leave the little retail investors in the dark. Corporations and institutional investors will have a leg up on obtaining information. This will force retail investors to utilize institutional management to acquire information and seek investment advice. Leaving the rules quarterly allow retail investors to research and obtain the information at hand to make informed financial decisions. If you change the rules, so many people will be affected and it looks like you are being bought by the corporations and institutional investors. Loss of confidence will take place with the SEC.

Matthew Martin — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Matthew Martin Affiliation: Jun. 14, 2026 To Whom it May Concern:

I am opposed to any change that will result in less frequent reporting and less transparency. We, the shareholders, deserve transparency and accountability that comes with reporting. This proposed change serves no purpose but to save a pittance in financial reporting staff costs and to obfuscate management decisions. My stance is clear: NO rolling back reporting requirements.

Matthew Martin
Columbus, OH

Matthew O'Connell — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Matthew O'Connell Affiliation: Jun. 14, 2026 Matthew O'Connell, nurse consultant. Having a return to semi-annual reporting would be a potential catastrophe for my planned retirement. So far, all of my calculations are set up from the standpoint of quarterly reporting which has assisted in my movement within my portfolio for over a decade. The ability for companies to dump underperforming stocks well ahead of time sounds extremely shady, in my opinion. There has been many cases of insider trading under the current system, what is going to be the new normal? As an individual investor this will cause myself and millions of others to lose close to our entire investment portfolios. I strongly disagree with this plan not only for myself but for the many millions of people that will directly impacted by this direction change.

Maynard McKillen — Jun 14, 2026
Subject: S7-2026-15 From: Maynard McKillen Affiliation: Jun. 14, 2026 I am Maynard McKillen, a retired Wisconsinite. The SEC proposal to reduce reporting frequency is yet another idiotic notion, calculated to benefit a miniscule number of investors and business executives while disguising their activities from public scrutiny and oversight. It seems the SEC desires to demonstrate ideological fealty to long-discredited notions of laissez faire, supply-side Capitalism. For. No. Sane. Reason. The desire to inoculate this miniscule number of personality-disordered members of the business and finance sector from yet more accountability, when in fact they need exactly that, more accountability, smacks of would-be elitists enabling the already-entitled. The proposal is risible, ridiculous, exactly the wrong move, in a nation where the business and financial sector have far too much influence over the economy, and over the operations of federal, state and local governments. Consign this brainfart of an idea to the dustbin of history. The nation has already endured an era of sociopathic robber barons. Do not foment a new one.

McGorry — Jun 14, 2026
Subject: S7-2026-15 Comment From: McGorry Affiliation: Jun. 14, 2026 To the SEC:
I am preparing for retirement in the next 10 years. There are several reasons why I believe the SEC must maintain quarterly reporting: (1) as I mentioned, I am preparing to retire soon andI rely on quarterly information to make decisions on my investments (2) longer gaps create an unfair advantage for corporate insiders, (3) "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates, (4) the savings to companies aren't worth the cost to consumers and individual investors. Do the right thing.. please maintain quarterly reporting. After all, the mission of this organization is to to protect investors; maintain fair, orderly, and efficient markets; and facilitate capital formation. Thank you for your time. Sue McGorry MBA, PhD, professor

Michael Clark — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Michael Clark Affiliation: Jun. 14, 2026 There is no doubt blatant corruption happening at multiple levels of markets and government. Corporate interest in politics is at its highest of all time and returning to something that was tested and didn't do well should prove enough: companies require quarterly supervision and accountability and the public as a whole is the least partisan way to do that. They put their money where their mouth is.

Michael Croyle — Jun 14, 2026
Subject: S7-2026-15 Comment From: Michael Croyle Affiliation: Jun. 14, 2026 Moving away from quarterly reporting only favors the insiders and the already wealthy who have other means of obtaining information. The average investor will remain in the dark. Americans including myself have grown tired of government rule making designed to favor the wealthy. I am one of those small investors who will be harmed by this rule. Capitalism only works when there are controls in place to keep the playing field level for all. Capitalism fails when the government puts rules in place to favor certain players. This is an example of rules favoring chosen players.

Yahoo Mail: Search, Organize, Conquer

Michelle — Jun 14, 2026
Subject: S7-2026-15 From: Michelle Affiliation: Jun. 14, 2026 To the Commissioners of the Securities and Exchange Commission:

I am writing to strongly urge the Securities and Exchange Commission to maintain its rigorous standard of mandatory quarterly reviews and reporting for public companies and their CEOs. In recent discussions regarding regulatory modernization, some have argued that shifting away from quarterly disclosures would alleviate corporate burdens. However, corporate oversight is not a burden; it is a fundamental pillar of market integrity.

Corporate fraud does not just impact abstract balance sheets—it directly harms the American economy and puts the livelihoods of everyday people at risk. When executives manipulate financial data or obscure the true health of their organizations, the consequences are felt on Main Street. Hardworking Americans lose their jobs, families see their retirement accounts evaporated, and

public trust in the financial system is deeply fractured. Regular, predictable, and thorough oversight is our frontline defense against these catastrophic failures.

Accountability is a direct responsibility that comes with the privilege of success. Leading a publicly traded company and managing capital provided by everyday investors is an immense privilege, not an entitlement. Consequently, ensuring transparency should never be viewed as an administrative hurdle to minimize, but rather as the foundational cost of doing business in a free and fair market.

Frequent reporting ensures that CEOs remain actively accountable to their shareholders and the public. Extending the time between mandatory reviews would only create longer windows of opacity, making it easier for financial irregularities to go unnoticed until it is too late.
For the protection of everyday investors, the stability of our workforce, and the health of the American economy, I urge the SEC to reject any proposals to scale back quarterly reviews. We must champion transparency and ensure that those who enjoy the privileges of corporate success remain fully accountable to the public that powers it.

Thank you for your time, your consideration, and your ongoing dedication to protecting investors and maintaining fair, orderly, and efficient markets.

Michelle Beason — Jun 14, 2026
Subject: Release No. 33-11419 — Public Company Reporting Framework From: Michelle Beason Affiliation: Jun. 14, 2026 Dear Securities and Exchange Commission, I am writing to express my strong support for maintaining the current requirement that all publicly traded companies file quarterly financial reports
(Form 10-Q). I urge the Commission to reject any proposals that would reduce or eliminate this reporting obligation. Quarterly reporting is a cornerstone of market transparency and investor protection. It ensures that shareholders and the public have timely,
accurate information about a company's financial health, enabling informed investment decisions. Reducing this requirement to semi-annual or annual reporting would create significant information gaps that could expose investors to undue risk and undermine
confidence in U.S. capital markets. Furthermore, quarterly disclosures serve as an important check on corporate management, encouraging accountability and reducing the likelihood of financial misconduct going undetected for extended periods. The integrity
of our markets depends on this consistent flow of information. I strongly encourage the SEC to uphold quarterly reporting standards for all companies listed on U.S. stock exchanges and to resist pressure to weaken these critical investor protections. Thank
you for your consideration of my comments. Respectfully, Michelle Beason, PE 2459 Sky Rd Walnut Creek micbeason@yahoo.com

Michelle Hutchinson — Jun 14, 2026
Subject: S7-2026-15 Comment From: Michelle Hutchinson Affiliation: Jun. 14, 2026 I believe that the quarterly reporting standard must be upheld. It's too easy to become lax even on a six-month basis, and details can be blurred - or lost - in that additional 3 months. Larger corporations will be tempted to take more chances when they think they can keep certain things hidden for an additional 3 months. I worked for Worldcom, and was among those gutted when the false reporting was brought to light - don't make it easy for cheaters to win!

Michelle LaBreche — Jun 14, 2026

Subject: Comment on S7-2026-15 From: Michelle LaBreche Affiliation: Jun. 14, 2026 Why is this even a thing? Oh right, this is so the average American investor stays a little more in the dark about what's happening in the stock market and other areas of investing. This is really all for the rich. Once again, these billionaires are moving the goal posts and we as middle class earners and tax payers who support this country, try to invest and save in order to retire and yet the last time this happened we lost. So please, think twice about this because when democrats are back in office, Things will be changing so you might as well not change them now because things will only get worse when they have to be changed back. The bottom 99% have had it with this authoritarian regime and the billionaires that run this country and the manipulation of everything else that benefits them. So tired of all of this! Billionaires should be taxed out of existence so we can get out federal budget back on track.

Morena Beal — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Morena Beal Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I respectfully submit this comment regarding proposed Rule S7-2026-15.
I oppose the proposal because I believe reducing the frequency of public financial disclosures would make it more difficult for everyday investors to make informed investment decisions.
While I understand the desire to reduce administrative burdens for public companies, quarterly reporting serves an important function in maintaining transparency and investor confidence.
Individual investors already operate with fewer resources than institutional investors, professional analysts, and large investment firms. Less frequent reporting risks increasing that information gap.
Regular disclosures allow investors to:
Evaluate company performance over time Identify emerging risks Compare investment opportunities Make informed decisions using current information Transparency is particularly important for long-term investors who are building wealth through ownership of public companies, dividend-paying securities, and real estate investment trusts (REITs). Access to timely financial information allows investors to better understand the businesses and assets they own.
The SEC’s mission includes protecting investors and maintaining fair, orderly, and efficient markets. I believe those goals are best served through consistent and accessible disclosure practices. While concerns about short-term market pressures deserve consideration, reducing the frequency of public reporting may unintentionally limit access to information for the very investors the SEC seeks to

protect.
Financial literacy and investor participation depend on access to information. We cannot encourage broader participation in public markets while simultaneously reducing the frequency of disclosures available to the public.
Ownership is one of the few pathways available to ordinary Americans to build long-term wealth, and ownership becomes significantly more difficult to understand when access to information is reduced.
For these reasons, I respectfully urge the Commission to reject the proposed reduction in reporting frequency and preserve quarterly reporting requirements.
Thank you for your consideration.
Sincerely,
Morena Beal

Nancy Gangloff — Jun 14, 2026
Subject: S7-2026-15 Comment From: Nancy Gangloff Affiliation: Jun. 14, 2026 The SEC must continue quarterly reporting for financial markets as the reports provide a level playing field for investors. Quarterly reports hold a company's CEO accountable to their company's financial data. To do otherwise merely opens the door for many unscrupulous companies' financial data and market trading.

Nancy Gilliam — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Nancy Gilliam Affiliation: Jun. 14, 2026 Quarterly reporting should continue to be required. It does an investor a disservice as well as the companies to review this only twice a year. Investors as well as companies will be operating in the dark. As an investor quarterly reports allow you to change direction maybe even stop company investing. It would allow companies to mismanage their finances for a longer time without investors knowing.

Nicole Farrell — Jun 14, 2026
Subject: S7-2026-15 From: Nicole Farrell Affiliation: Jun. 14, 2026 To Whom It May Concern,

I am writing to advocate for maintaining the current quarterly reporting requirements. This policy was established in response to executive actions that negatively impacted many individuals, and the conditions that necessitated these guardrails remain unchanged.

It is in the best interest of the public to require frequent reporting from those in leadership positions. Maintaining this level of oversight ensures a necessary balance and protects society from the potential harm that can occur in the absence of such accountability.

Respectfully,

Nicole Farrell

Nicole Marro — Jun 14, 2026
Subject: S7-2026-15 Comment From: Nicole Marro Affiliation: Jun. 14, 2026 I am a Trusts and Estates attorney in Rochester, NY, and we represent clients as fiduciaries of estates and trusts as well as beneficiaries of estates and trusts. It is critical that we know the current holdings as well as cost/expense ratio and all transactions currently so as to advise our clients. Waiting six months for financial information will be detrimental to clients.

Noreen Walsh — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Noreen Walsh Affiliation: Jun. 14, 2026 My name is Noreen Walsh. I am retired from federal service. I live in the Denver area. I strongly object to your proposal to reduce the current frequency of reporting to less than quarterly. The system in place works well, and provides me and others with timely data to influence investment decisions that impact my family. Anything less is too infrequent to be of service.

More transparency is always helpful, and in this case it assists me greatly to know about the current financial health of a company when contemplating buying or selling their stock. Quarterly reporting has been in place for many years, companies have established protocols for gathering data, as well as timeframes for reporting, and the system works well. There’s no reason to change it, and change could very likely significantly negatively impact many small investors like myself.

Your proposal is bad for investors and smacks of impartiality. The current system works. I urge you to not spend time and money on an unnecessary proposed change that will benefit industry and harm small investors.

Noreen Walsh

Obiamaka Ude — Jun 14, 2026
Subject: S7-2026-15 Comment From: Obiamaka Ude Affiliation: Jun. 14, 2026 To those who it may concern,

I am a the first to invest in my family. I am a graduate student in California, navigating our public markets on my own. My motivation for doing so is to transform my family's financial future. I rely on quarterly reporting to inform myself on the direction of the companies I am invested in. Quarterly reporting keep these firms responsible to their shareholders. We must insist that they remain answerable to the public. People think that investing is just gambling and doubt that they can engage in markets with clarity about the companies we invest in. We need to continue to maintain trust in our markets and the quarterly SEC review maintains confidence in our markets. A 6 month blackout period encourages insider trading and opens the gates to misconduct. Please do not allow the poor example of political and economic lawlessness of our contemporary moment keep you all from regulating. It is in times like these that we need strong regulators to hold the line and maintain a sense of trust in our public markets. This is not private equity and these lines should not be blurred.

I urge you to maintain our quarterly mandate and protect small retail investors!

- O. Ude, a concerned Californian citizen.

olga Cline — Jun 14, 2026
Subject: Comment on S7-2026-15 From: olga Cline Affiliation: Jun. 14, 2026 Dear Secretary,
My name is Lydia. I am a Californian Conservative business owner. I ask that you respectfully stand with us in the matter of Quarterly Reporting.
For far too long we have been ignored while the Elite’s, yourself included, continue to make decisions not only on this subject but many others against what the majority of the American People want, against what benefits us as a whole. It is time that you do what is right. We are tired of being ignored. We are tired of the bad decision making within our Government that does not align with what is right. Changing the reporting requirements keeps us the American People in the blind while all of you certainly are not.

Best Regards

Olga Lydia Cline

Pam Corning — Jun 14, 2026
Subject: S7-2026-15 From: Pam Corning Affiliation: Jun. 14, 2026 A certification costs an honest executive nothing to sign, it just exposes the fraudsters. We need our Corporate leaders to be responsible for the validity of the information they provide. Formal, Quarterly filings protect investors and taxpayers whose taxes often go to support these companies in the form of special consideration at both the state and federal level. We need accurate representations about the companies we invest in and support. Personally confirming validity of quarterly submissions is not a hardship. It is necessary for effective decision making by those impacted by businesses. These leaders get paid exorbitant sums and need to have a process in place to hold them accountable on a quarterly basis.
Sincerely,
Pam Corning Retired IT Director Bantam Ct

Pamela Toleikis Retired director Hanesbrands, Manager Saralee Corporation — Jun 14, 2026
Subject: File No. S7-2026-15 From: Pamela Toleikis I strongly feel that reporting should stay quarterly. Having retired from both a fortune 50 & a fortune 500 company I see the value of quarterly reports. You focus on what you said & what can be delivered. It promotes business growth & innovation rather than slugginess & not fixing problems. Six months is too long to report given the speed of business these days.

Pamela Volk-Cone — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Pamela Volk-Cone Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:

Public companies have provided investors and traders with high quality, detailed information every quarter for over 50 years.
This new rule would give an unfair advantage to the already wealthy and big institutional investors. Quarterly disclosures help us make informed decisions. The SEC shouldn’t take vital information away from us. DO NOT disclose any personal trading or investing information.

A stable economy comes from all having equal access to information to make informed decisions. Ultra wealthy don't contribute to a stable economy and better quality of life for all. Instead they hoard their wealth and deprive others of resources.
Allowing others from different economic levels to make informed decisions and protecting their vital information helps to contribute to the over all wealth of an economy and country. Plus those people tend to improve quality of life for others which raises everyone up, not just a greedy few who won't pay taxes or help others. They tend to drain a country's resources without contributing positively. Thus destabilizing an economy.

Pat Barnett — Jun 14, 2026
Subject: S7-2026-15 From: Pat Barnett Affiliation: Jun. 14, 2026 Quarterly reporting is a common practice in industry. Changing that would remove important safeguards. There is no justification for this and it will further erode the public’s trust in federal agencies like yours that appears to be siding with industry over consumer protection.

Pat Barnett, JD

Paul Constantine — Jun 14, 2026
Subject: S7-2026-15 From: Paul Constantine Affiliation: Jun. 14, 2026 The law was put in place for a reason. Cutting the requirements serves no reason except for corporations. LEAVE IT ALONE!!!

Paul Donner Investor — Jun 14, 2026
Subject: File No. S7-2026-15 From: Paul Donner SEC: If and when you move us back to semi-annual reporting, the place to get a better return will be in Japan, Korea and India vs. the United States. This is based on historical fact. Semi annual reporting will slow down growth because the less frequent numbers drown motivation in investing and perceived validity of market/corporate growth numbers. This will put another arrow in China's economic quiver to overtake the US economically sooner than the current estimated mid 2030s. Go ahead, ignore documented history and add complexity to the US economy by reducing visibility. This is not the time to reduce confidence of US and foreign investors in publicly traded companies.

Paul Hayes — Jun 14, 2026
Subject: S7-2026-15 From: Paul Hayes Affiliation: Jun. 14, 2026 The work that is required is worth it to be a prevention of actions that would be detrimental to people's savings.

Pete Thiel — Jun 14, 2026
Subject: S7-2026-15 Comment From: Pete Thiel Affiliation: Jun. 14, 2026 With respect,

I am writing to request that we maintain our current reporting standards. Please keep the quarterly reporting as it stands, or ideally, increase the frequency to a monthly basis.

All of my other financial records—including bank accounts, loans, credit cards, and utility bills—are provided monthly. In a data-driven world, frequent and transparent reporting is essential. Reducing the frequency of these reports would be a step backward from the transparency that modern data standards provide.

Best regards,

Pete Thiel

We're retired and depend on our interest income. Quarterly reporting protects the investor, i.e. "Jane and Joe Citizen". A strong middleclass protects the economy.

Biannual reporting gives corporations and banks more opportunities to **** around with our money, and find ways to pocket it for themselves. Allowing biannual reporting shows that you're representing corporations and the Epstien class, rather than the bulk of the American people, and the economy

Do your job and protect the wider American economy, not just the billionaire class, and keep your

job.

Phavahg — Jun 14, 2026
Subject: S7-2026-15 From: Phavahg Affiliation: Jun. 14, 2026 Dear SEC Comment Section:
I am very disappointed to learn that the agency is considering a rollback of quarterly CEO financial reporting. My reasons are as follows:
1) quarterly reporting is hardly an inconvenience for the person filing as they have vast staffs to prepare the document.
2) All companies are used to filing quarterly (or even more often) reporting earnings.
3) such data is needed to help prevent insider trading, which has become a rising problem in recent years.
4) For capitalism to work for the benefit of all citizens (not just the very rich), the curtain needs to be pulled open and sun let in.
5) we're a republic, not a plutocracy. This reporting helps keep it that way.
Regards,
R. Steven Brown
Lexington, KY

Phil Crank — Jun 14, 2026

Phyllis Wilkes — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Phyllis Wilkes Affiliation: Jun. 14, 2026 I am writing to express my significant concerns regarding any potential shift away from quarterly financial reporting

to a less frequent schedule. As a retired individual and an investor residing in Topeka, Kansas, I believe that consistent, timely information is the bedrock of market transparency and prudent decision-making for all stakeholders.

Quarterly reporting provides an essential, regular pulse on a company's financial health and strategic direction. In today's dynamic economic environment, where market conditions can pivot rapidly, access to detailed financial updates every three months is not merely a convenience, but a necessity. This frequency empowers investors, particularly those managing their life savings, to conduct thorough assessments, effectively manage risk, and make informed choices about their portfolios. The principle that "the more you know, the better decisions you can make" is critically pertinent in navigating complex financial landscapes.

My own investment journey, regrettably, offers a stark illustration of the consequences of insufficient information. There was a period where I experienced substantial financial setbacks, losing nearly half of my invested capital within a couple of years. This was, in large part, due to the inability to react swiftly to market shifts and company developments that unfolded far too quickly for less frequent reporting cycles to capture. Critical events can transpire in mere weeks, and waiting six months for updated financials can leave investors vulnerable and unable to make timely, protective adjustments.

The original transition to quarterly reporting was, undoubtedly, a considered decision rooted in a clear understanding of market realities and the imperative to foster a more equitable and informed investment climate. It acknowledged the challenges faced by both individual investors and even major institutional players when comprehensive data was not regularly available.

Therefore, reverting to a semi-annual reporting cycle would, in my assessment, constitute a significant regression. Such a move would disregard valuable lessons learned from past experiences and risks reintroducing the very uncertainties and vulnerabilities that quarterly reporting was established to mitigate. History has already demonstrated the detrimental effects that less frequent financial disclosures can have on investor confidence and market stability.

I strongly urge you to uphold the current standard of quarterly financial disclosures, prioritizing the long-term confidence and security of the entire investment community.

Sincerely,

Phyllis Wilkes
Retired Investor
Topeka, KS

Pietro Monteleano — Jun 14, 2026
Subject: S7-2026-15 Comment From: Pietro Monteleano Affiliation: Jun. 14, 2026 To whom it may concern,
My wife and I as long term investors strongly opposed elimination of the 10Q. Quarterly financial reporting and disclosure is imperative to keep retail investors informed in a already unfair securities market . Insider information, silence on negative material events, misleading or outright fraud continues to "favor" Institutional and insiders.
As a former ERP , Financial Reporting consultant modern accounting systems make SEC reporting semi-automatic. Let's be real. Most of the man hours to produce 10Q's are company mgt reviewing, "massaging the numbers" not compiling the results.

While you guys are at it how about enforcing and penalizing Failure to Deliver and Naked Shorting rules?
Require change of auditors at least every 3 years.
As a experienced Accounting consultant I've witnessed the shenigans and outright fraud .
Would love to see the SEC and other regulators be proactive instead of reactive.
Had my share of pennies on the dollar settlements YEARS after the fraudulent acts.

Eliminate of the 10Q is a major step in the wrong direction in my opinion.

Thank you for the opportunity to express our view.

Respectfully yours,

Peter and Siobhan Mantell

R G — Jun 14, 2026
Subject: S7-2026-15 From: R G Affiliation: Jun. 14, 2026 Why would we cut the numbers of times we expect to hear the truth from CEOs? We invest in their companies based on the information we receive, and quarterly declarations keep all of us informed and better off for it.

Fewer reporting periods give CEOs more time to play with the numbers. We know from experience (like with Enron) that "accounting in the sunshine" at least hampers their ability to lie, and increases their motivation to provide honest information.

R Turvey — Jun 14, 2026
Subject: S7-2026-15 Comment From: R Turvey Affiliation: Jun. 14, 2026 I support keeping quarterly financial reporting because I rely on timely information to make informed investment decisions. Longer gaps between reports give corporate insiders an unfair advantage over ordinary investors who don't have access to the same information. Making quarterly reporting optional doesn't solve the problem, since the companies that choose not to report as often may be the very ones whose investors most need regular updates. Any cost savings for companies are outweighed by the value of transparency, fairness, and investor confidence.

R. Greene — Jun 14, 2026
Subject: Comment on S7-2026-15 From: R. Greene Affiliation: Jun. 14, 2026 Hi,
I highly suggest you keep the quarterly reporting. I can keep making informed choices with frequent reporting. This transparency, which leads to: Higher stock valuations Better liquidity Lower cost of capital More informed investors Smaller information advantages for insiders.

Randy — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Randy Affiliation: Jun. 14, 2026 Washington wants to let every public company stop reporting its results each quarter and disclose just twice a year. We tried this once, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of your life savings. I do NOT support this rule change!

Thank you for your attention on this matter!

Sincerely,
Randall W. Howard

RBX 9219 — Jun 14, 2026
Subject: S7-2026-15 From: RBX 9219 Affiliation: Jun. 14, 2026 I lived through the Enron fiasco, and felt the anger for those whose investments were lost as well as the embarrassment that a Texas firm could act so recklessly. When public traded companies can't be counted on to do the right thing, regulators must step up to hold them accountable. Quarterly reporting and assurances do not burden these firms.

I am the retired County Auditor for a large county in Texas, and I strongly urge you to reconsider this issue.

With regards,
Linda R Breazeale

Rebecca Ehrenbeck — Jun 14, 2026
Subject: S7-2026-15 From: Rebecca Ehrenbeck Affiliation: Jun. 14, 2026 Quarterly Reporting is critical to create oversight and transparency for investors. Rules and good oversight are the reasons that people invest money in the USA.

When the rules gets watered down and accountability is lost then consider that investor confidence is also lost. If the SEC waters down rules and softens reporting requirements investments become less appealing to investors. Investors can and will diversify their investments to more stable countries. Unless your actual plan is to drive investments to other countries, don't assume people won't comprehend the consequences of reducing oversight.

Subject: Comment on S7-2026-15 From: Rebecca Wingard Affiliation: Jun. 14, 2026 Quarterly reports must be kept. It's obvious industry cannot be trusted on their own. Why is the SEC siding with industry so much instead of protecting the American people?

Rebecca L Wingard

Reggie Goodwin — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Reggie Goodwin Affiliation: Jun. 14, 2026 My opinion is that those who are pushing the narrative that quarterly reporting from the SEC is "excessive" are planning a high tech heist of resources, raiding the investments of those of us who are not "trillionaires": we just want to retire with enough money to live comfortably, pass on wealth to our children and not burden them with our burial expenses. "Elysium" was a fantasy - the natural projection of Ayn Rand's philosophy (who ended up taking public welfare). Doing this would put us on the path to total "Idiocracy," and the grand theft artists/oligarchs who want to do this will find themselves eating the same scraps we'd all be subjected to after they collapse the SEC.

Rhonda Stephens — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Rhonda Stephens Affiliation: Jun. 14, 2026 To whom it may concern,

As an investor and patriot it concerns me that consideration is being given to shifting to semi-annual reporting. History has proven that this is not in the best interests of investors and this country.

Quarterly reports allow individuals and corporations to analyze where to shift monies to keep their businesses viable. Our economy works better when these quarterly analysis is in place. As a former business owner and now an investor in the stock market for my retirement, I need to see when to

shift my money. Doing that on a semi-annual basis could be disastrous for me as for other retirees.

Keep the quarterly reporting, please. We should have learned from past experiences that it is the best way to conduct business.

Thank you for giving great consideration to this matter.

Rhonda M Stephens, Temple, GA

Ric Johnson — Jun 14, 2026
Subject: S7-2026-15 From: Ric Johnson Affiliation: Jun. 14, 2026 I strongly believe that the SEC should maintain quarterly reporting. Our system is already too biased towards the wealthy and a reduction in reporting will only worsen the situation.

Dear Sirs.
After more than 50 years of continuous work and industrious saving, I am dependent on my investments to sustain my lifestyle in retirement. I use my quarterly reports to guide my conversations with my financial advisors.
During my working life, those quarterly reports were regular report cards on the fiscal health of the company or important reminders of corrective action needed. Changing this reporting to bi-annual is not indicative of the volatility of today's markets and the transparency necessary to investors. Please accept my input and keep reporting on a quarterly basis. Thank you

Richard "Rick " Orr
From my phone

Rick S — Jun 14, 2026
Subject: S7-2026-15 Comment From: Rick S Affiliation: Jun. 14, 2026 As Small investor, I think quarterly reporting should be the minimum. Only insiders and senators and Representatives will benefit from a half-year reporting schedule. S7-2026-15 will further erode confidence in the market, and adversely affect the value of my retirement savings.
Please do not enact this rule.

Sincerely,

Subject: Comment on S7-2026-15 From: Rita Painter Affiliation: Jun. 14, 2026 The current administration is already manipulating the market. They don't need another tool to continue this. Those of us investing without insider knowledge deserve to have quarterly reporting.

Rita Reisman — Jun 14, 2026

Subject: Comment on S7-2026-15 From: Rita Reisman Affiliation: Jun. 14, 2026 I became interested in investing in college when I sat in a seat next to a young man who was checking his stocks in the WSJ. That's when I realized I wanted to be an investor.

I didn't know how to get started until my sister told me (many years later) she was thinking of starting an investment club. (She never did.)
I asked her what that was and she told me it was a group of people who get together on a monthly basis to discuss the few stocks they chose the previous month to consider investing in.

I am now in an investment club, and I value the quarterly information from each company that they have to publish. I would be lost without that consistent information.

The SEC is now thinking about cutting that information to twice a year.

That would a be a hardship on all the small investors who will lose a large part of the value of their stocks, (based on actions taken by different countries over time) while all the wealthy investors will most likely still have access to that information through expensive newsletters or emails.

I'm writing this letter to you to ask you to consider instead of twice a year, either leaving it as it is OR changing it to every two months. Whatever issues are affecting a company's stock, the information will be much more accurate and give EVERY investor a chance to make better decisions. Most assuredly, smaller investors (like me and the six other members of the club) will suffer more than wealthy investors if you make the change you are proposing. As a senior citizen on social security, please consider increasing the quarterly information, rather then diminishing it.

Rita Reisman

Robin Jepsen — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Robin Jepsen Affiliation: Jun. 14, 2026 Leave reporting alone. We, as investors have the right to know monthly how our money is doing so changes can be made as necessary. I'm retired, need to supplement my SS, so knowing how my money is doing is essential. It's important to be a good steward of our investments no matter how big or small. Concerned citizen, Robin Jepsen, Texas

---

Robin Vanover — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Robin Vanover Affiliation: Jun. 14, 2026 Dear SEC,

History tells us that semi-annual reporting is dangerous for majority of citizens with investments and savings. Quarterly reporting has proven MUCH higher returns for investors, due to increased transparency.

Semi-annual reporting is associated with financial losses for the citizens whose hard-earned money is what they depend on. Creating less transparency only hurts the citizens who have been good stewards of their money and carefully planned for retirement.

The semi-annual reporting is more likely to lead to losses for the typical American instead of the historical overall growth experienced with quarterly reporting and the transparency that goes along with it. KEEP quarterly reporting . Citizens investing THEIR money have a right to at minimum a quarterly report on how their money is doing. Nothing about semi-annual reporting is good for typical Americans.

Hiding financial performance for six months at a time is wrong and the SEC needs to ensure quarterly reports remain the law and standard. My husband is close to retirement and it is unfair and unbelievable that semi-annual reports regarding personal investments and their growth or loss of money we are counting on, are even being considered instead of quarterly reports. Shame on anyone who votes to decrease reporting to people about their own money. What do companies have to hide? People deserve to be regularly informed with quarterly reports their investments as the minimum. Please vote NO on changing required reports from quarterly to semi-annually.

Sincerely,
Robin Vanover

Rodney Hinson — Jun 14, 2026
Subject: File No. S7-2026-15 From: Rodney Hinson This is a bad policy for a number of reasons. Twice as long to fester Bad news gets up to six months to build before you ever see it. When the truth finally lands, the surprise and the sell-off can be far sharper than it would have been with a quarterly heads-up. The insider’s edge widens Executives and big institutions don’t wait for filings. They have other channels. Longer gaps between public reports widen the gap between what insiders know and what you know. The market gets thinner European companies that moved to semi-annual reporting saw their trading liquidity dry up, while quarterly reporters held steady. Thinner markets mean worse prices for ordinary sellers. Cheaper truth, dearer money Decades of research find that more frequent reporting lowers a company’s cost of capital, which supports higher share prices. Cut the reporting, and you push the gears the other way. “Short-termism” never stopped America. The U.S. reported quarterly while winning wars, landing on the moon, and building the most valuable stock market on Earth. The corporate “myopia” blamed on quarterly reporting is, in the words of one finance scholar, simply not supported by the evidence. If it isn’t broken, don’t break it.

Roger Boyer — Jun 14, 2026
Subject: Proposed Reporting Rule Change From: Roger Boyer Affiliation: Jun. 14, 2026 I am completely against a roll back of reporting requirements to that of the 1950s. & 1960s. Why change something that is not broken ?? Most retirees depend on returns from companies for their income. Such a return to less transparency will be a disaster. Keep reporting requirements as they are today.

Ruth Marion — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Ruth Marion Affiliation: Jun. 14, 2026 To the SEC:
Please do NOT roll back financial reporting to the way it worked in 1955. Less disclosure then meant lower returns and lower valuations. A repeat could erase a third of one's savings. I have worked for a public company, and I know how essential it is to require frequent reporting. Before making this decision the SEC must keep in mind the history that has led to quarterly reporting being required.

Corporate regulation began as a response to business scandals. As regulators continue to deter massive scandals, businesses typically resist regulation, and the public calls for justice following massive scandals, so that businesses will make necessary reforms. For the past century, American corporate regulation has consisted of periodic, dramatic regulatory interventions by federal lawmakers, together with more nuanced ongoing regulation by the states. Indeed, the history of major corporate scandal dates to the Civil War, when Philadelphia banker Jay Cooke made fortunes by selling government bonds to raise money for the Union army. After the end of the war, he similarly sold bonds to raise money for the Northern Pacific Railroad. Because of his stature, Cooke “had been regarded as a pillar of financial stability”, comparable to the stature of modern financial icons Bill Gates and Warren Buffet. In fact, Cooke ignored warning signs when railroad building far outstripped demand, but he continued to invest money in railroads. The subsequent implosion of both Cooke’s bank and the railroads led directly to the economic depression of the Panic of 1873. Public outrage erupted even from those who had no financial stake in the railroad. The extensive advertising to sell bonds to raise money for the railroads impacted not only the rich, but also people of far more moderate means who had invested in the bonds. Soon afterward, details of blatant corruption, self-dealing and bribery emerged, and the Mail Fraud Statute became the first federal law to protect Americans from fraud, scams and scandals. In addition, Congress enacted statutes to better regulate the railroads, including the Interstate Commerce Act of 1887, soon followed by the regulation of monopolies with the Sherman Antitrust Act of 1890.
Public anxiety continued to heighten about the power, reach and lack of accountability for the corporate giants of the early 20th Century. This era of growing corporate power and influence, coupled with the rise of those who sought to expose the ills of society brought about by corporate robber barons, caught Teddy Roosevelt’s attention. Recognizing that the states were either unable or unwilling to sufficiently regulate corporations, Teddy Roosevelt sought to balance corporate power and economic interests with public interests and the welfare of its citizens. He thought that the way to accomplish this was through centralized government regulation of business activities. On December 2, 1902, in his second State of the Union Address, Teddy Roosevelt set the tone for the century of federal corporate regulation that would follow, by building on the delegation of power bestowed by the Interstate Commerce Act and the Sherman Antitrust Act. Teddy Roosevelt said, "We can do nothing of good in the way of regulating and supervising these corporations until we fix clearly in our minds that we are not attacking the corporations, but endeavoring to do away with any evil in them." Today, there is plenty of reason to believe that any reduction in the government's regulation of businesses, and in this case, public corporations, will have serious, negative impacts on our economy and on people's ability to earn a good income, support the funding of savings accounts, and ensure that all people have access to high-quality education, health care and child care.

Sincerely,
Ruth A. Marion

Ruth Miale — Jun 14, 2026
Subject: S7-2026-15 From: Ruth Miale Affiliation: Jun. 14, 2026 There needs to be a bottom line of honesty in business. If we as a country cannot enforce that then why do we have a government? Everything in business, taxes, investigations into fraud, fairness to consumers, everything relies on honest bookkeeping and executives who are accountable for the truth. These quaterly requirements have served us well for over a score of years.
Who, but a criminal enterprise would want to get rid of this requirement to certify?

Let our congress and senate NOT be part of a criminal enterprise.
Just as the C-suite need to be accountable for the accuracy of the books of their own firms--the engines of their own personal wealth and the investments of countless Americans under your jurisdictions--so must congess and the Senate, who HAVE THE RIGHT TO OVERSEE BUSINESS, WHO HAVE THE POWER AND RESPONSIBILITY TO REGULATE-- must protect the American consumer AND - let this be included - the families and other dependents of those Executives who would cheat, lie, and embezzle or permiit it. We can't easily track the quid pro quo that may go on inside the businesses, but we can hold them accountable to their books at the least. That is a significant bar to meet. Any, any, government entitiy that wants to remove oversight, is suspect in my eyes.
Who would you purport to be if you are not looking out for those of us who do not have the advantage you have of holding office?
Regulate. Get those quaterly signatures. Do your job.

Sally Price — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Sally Price Affiliation: Jun. 14, 2026 To the SEC,
We've done this before; please do not make this mistake. Companies absolutely need to be accountable and transparent every quarter (not twice a year).

I worked for a company, Powin Energy LLC, that went bankrupt in 2025 and the even with the quarterly reporting, finances were not transparent enough.

I'm currently job hunting and would want to work for a company with honest, transparent, frequent (quarterly) accountability in their finances.

As I approach retirement age, I also would not want the risk of greater losses in my portfolio.

Thank you,

Sally Price

Santiago Caraballo — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Santiago Caraballo Affiliation: Jun. 14, 2026 Santiago Caraballo
Managing Director/Regional Manager
Houston, TX

Transparency in markets is critical to investors of all types making informed decisions. That is true for me professionally as bankers in my need to determine the credit worthiness of borrowers and also true for me as a retail investor as I look to make investments in the stock market. Quarterly reporting is necessary to protecting investors and maintaining the current level of transparency in the markets. The nature of financial reporting already makes it so investors are looking at dated financial data by the time it is released via SEC reporting requirements which is a risk to investors. Increasing the amount of time that investors would have to wait to gain transparency into the operations, balance sheet and cash flows of an organization, represents greater risk for all investors and likely risks making the stock market less efficient. I am strongly in favor of maintaining quarterly reporting requirements on public entities.

Best regards,

Santiago Caraballo

Sara Elizabeth Miller — Jun 14, 2026
Subject: S7-2026-15 From: Sara Elizabeth Miller Affiliation: Jun. 14, 2026 This is bonkers. Quarterly reporting needs to continue. Our economy is being shredded right now from all the other (illegal) shenanigans. Please do not add to the death of our global reputation and economic standings. I do not understand why the SEC is ending quarterly reporting. The SEC used to be an institution that garnered the respect and fear of the finance sector. It is now complicit with those it supposedly regulates, and we will all suffer because of it. Please go back to being the strong government watchdog that prevents bad actors from devastating whole sectors of the economy. Sara Miller, bank employee, Athens GA.

Sarah Hadskey — Jun 14, 2026
Subject: S7-2026-15 From: Sarah Hadskey Affiliation: Jun. 14, 2026 Dear SEC,

Accurate, truthful, quarterly financial reporting is extremely important for proper market and economic operation. It helps companies perform better and catch mistakes or new trends earlier. It helps investors and those managing investments make timely decisions for their portfolios.

Businesses make plans based on certainty of both regulations and in market trends. Stability is a very big deal. Please keep truthful, CEO signed, quarterly reporting.
We need much less corruption, not more.
We need more people to have incentives to do the right thing.

Savanna Borne — Jun 14, 2026
Subject: S7-2026-15 From: Savanna Borne Affiliation: Jun. 14, 2026 To the Honorable SEC Chair:
The data from earlier decades strongly supports keeping the financials reporting of companies quarterly.
This is important for me as I try to survive through retirement. But this is way more important for the younger generations and for the United States of America as a whole. We must not allow this large loosening of accounting add to the slippage of our strength and wasting of our resources going on now. Mental strength and clarity at all levels is required of a great nation. Some are letting go of that, preferring autocratic rule when the autocrats are not disciplined thinkers with the benefit of the entire United States as their goal.
Please keep financials reporting of all companies quarterly.

Savanna Borne
Roseville MN 55113

Scott Dale — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Scott Dale Affiliation: Jun. 14, 2026 Scott Dale
Disabled
San Marcos, TX
The stock market is the ONLY place where I actually have any liquidity. The social security provides me a whole $1200 to live off of per month. I have epilepsy and I have to buy up to 11 different drugs in a month. Then I am expected to pay for my utilities, gas, food, phone bill, and my internet. This is an extremely stressful situation that I'm not sure I'll make it out of because once the medical bills start to arrive I have no money to pay for them. So if changing the policies to semi-annual reporting has proof that it is going to devalue my stock investments and everyone else's I am wholeheartedly against this. I mean it really doesn't make sense to do this at this point in life unless you and companies are struggling to hide something.

Shannon — Jun 14, 2026
Subject: S7-2026-15 From: Shannon Affiliation: Jun. 14, 2026 Shannon Hyland, CPA Washington State. To roll back a much needed safety feature such as this is reckless. To allow the removal of CEOs signing the Quarterly Reports is paramount to allowing the billionaires to get richer on the backs of those who are relying on those investments to someday retire. Corners will be cut, there will be no oversight, and the CEOs will not be held accountable. This has the potential to send the stock market into a downward spin again, as happened with Enron; the trust in the stock market will decrease and affect investments for years afterwards. The investor cannot rely on "good faith" that a CEO will put their investors' first. Do not eliminate this much needed reporting.

Shannon Hyland CPA

Shannon Donahue — Jun 14, 2026
Subject: S7-2026-15 From: Shannon Donahue Affiliation: Jun. 14, 2026 Keep the reporting quarterly. To do otherwise especially with this Regime simply means the SEC is intentionally making it easier for the ENRON style theft to be repeated. The SEC failed to protect our national economy in the past. The SEC is now attempting to repeat their failure. How much money are SEC executives planning on getting in kickbacks? What is the buy in for this losing scheme? I am saying No Don't you dare, change the current reporting to semiannual. Any amount of common sense would be enough to send alarms through the agency. Apparently no on in charge at the SEC has any common sense. Alternatively, those running the SEC are planning on getting very wealthy on the dirty money promised for changing the reporting timelines.
This is one of the most ignorant attempts at ripping off the People, that I have seen in a long time. Any attempts to accomplish the goal of semi-annual reporting will result in deep dive investigations of all those involved. Remember: the Election is only 5 months away. Any changes to reporting will be immediately reversed by the newly elected representatives. Those involved in any changes will face charges. Anyone involved will serve federal prison time. Based on, who will be in charge, I can guarantee there will be no prison camps in the offing.
Shannon Donahue, Retired, Rhode Island

Shannon Hamrysky — Jun 14, 2026
Subject: S7-2026-15 Comment From: Shannon Hamrysky Affiliation: Jun. 14, 2026 Why should you get to hide anything for 6 months? What do you need to hide for the 6 momths?

Shannon J. Behara Individual investor — Jun 14, 2026
Subject: File No. S7-2026-15 From: Shannon J. Behara I was proud to work at the SEC from 2001-2005 and am well aware of its mission of investor protection. Therefore I struggle to comprehend the rationale behind this semi-annual reporting. Investors require accurate and timely information to make decisions on their investments. If anything, I would argue that in this technological and Information Age, companies should be able to easily produce financial statements monthly rather than quarterly. Yes, I am well aware of how much work goes into quarterly reporting and still find no excuse for a reduction. There is no rational reason to have less transparency than we have required in the last 50 years from registrants. Reducing frequency of reporting has proven in other jurisdictions to allow for insider manipulation, and less confidence in those markets. One of the reasons our markets are respected and setting the standard for international markets is our commitment to open and transparent information. We cut those requirements and that confidence

goes with it. The slope is not steep, it is a cliff. Individual investors deserve accurate and timely information about companies they invest in, directly or indirectly. Do not reduce the information available to make informed decisions.

Shawna Mysak — Jun 14, 2026
Subject: S7-2026-15 Comment From: Shawna Mysak Affiliation: Jun. 14, 2026 Shawna M. Hospital Employee I care because this has the potential to negatively affect the future quality of life of the true working class citizen and there are a lot of us. I would honestly prefer even more frequent reporting in an effort to completely stamp out fraud and insider trading. I am against changing the current requirement for quarterly reporting unless the change is to increase the frequency.

Sherri — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Sherri Affiliation: Jun. 14, 2026 To Whom It May Concern: I am writing to express my strong opposition to any proposal that would allow public companies to reduce their financial reporting from quarterly disclosures to only twice a year.

Such a change would represent a significant step backward for investors and would undermine the transparency that American citizens have relied upon for decades. Quarterly reporting has been a cornerstone of our financial markets since the late 1970s, providing investors with timely information needed to make informed decisions about their hard-earned savings and retirement investments.

Reducing disclosures to only semiannual reports would leave investors in the dark for extended periods, increasing uncertainty and making it more difficult to assess the financial health and performance of publicly traded companies. Individual investors like me would be placed at a substantial disadvantage, with fewer opportunities to identify problems before significant losses occur.

My family has worked hard, saved diligently, and invested responsibly. A reduction in reporting requirements could have serious financial consequences for families like mine. We stand to lose a significant portion of our savings if transparency is diminished and important information is delayed. Investors deserve more disclosure and accountability, not less.

America's capital markets are the strongest in the world because they are built on transparency, trust, and access to information. Weakening reporting requirements would move us in the wrong direction and resemble an era when investors had far less visibility into the companies they owned.

I urge you to reject any effort to reduce reporting frequency and to preserve the quarterly reporting system that has served investors well for generations. Better yet, policymakers should focus on strengthening transparency and investor protections rather than reducing them.

Please do the right thing for the millions of American citizens who have worked hard, saved their money, and depend on fair and transparent markets.

Thank you for taking the time to read and consider my comments.

Respectfully,
Sherri Lutwyche

Sherry Menton — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Sherry Menton Affiliation: Jun. 14, 2026 I am the beneficiary of generational wealth. My parents began investing in the 1970s, which enabled them to raise me comfortably upper-middle class. Paying for their own needs late in life meant I could save for my own family instead of needing to support them. We're not the top 1% or even the top 10%, but we're comfortable despite the current inflation that's hurting so many families, and I'm fully cognizant of how fortunate that makes me. My financial planner has done very well for us, and that's because he has access to information that investors lacked between 1955 and 1970.

Please continue to require corporations to report quarterly, so investment professionals can continue to serve us, the investors, with the discernment we've learned to take for granted over the last 56 years.

Stacey Roberts — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Stacey Roberts Affiliation: Jun. 14, 2026 Stacey Roberts, business owner from Iowa. I intend to see my accounts quarterly as intended. Do not make this change! We are hard working small business owners and have poured everything we have into providing for our retirement. Knowingly taking away our right to quarterly access feels unethical! Please do not consider this change.

Stacie Kornegay — Jun 14, 2026
Subject: S7-2026-15 From: Stacie Kornegay Affiliation: Jun. 14, 2026 It’s ridiculous to even consider lessening reports and accountability for anyone. People manage to manipulate accounts, records, etc. , even when there is reporting. Cheaters find ways to cheat and profit. Please don’t give them more chances and easier systems to take advantage of the public at large.

Stacy Chambers — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Stacy Chambers Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission: This is a way for commercial (that is, BIG) investors to steal from retail investors. Not only is this government decimating Social Security and other safety nets--it's now set to take away the very thing it has encouraged people to do, which is invest.
Don't let Wall Street steal from us like this. Do the right thing and keep quarterly reports on the books.

Stacy Drake — Jun 14, 2026
Subject: S7-2026-15 Comment From: Stacy Drake Affiliation: Jun. 14, 2026 Keep reporting Quarterly. There is an abundance of methods to communicate today and absolutely no reason to extend the duration between reporting. In the time of record profits and AI, companies have no excuses of hardship to complete this task. Individual and retail investors should have the same information as executives and industrial investors. Level the playing field.

I am a hard-working public school teacher who wants a fair deal. I want my retirement to be funded to its maximum and I want my children to have opportunities to build wealth over their lifetime. Information is power. If the ones who hold the keys, also hold early access to the information the regular worker, person, american is at a significant disadvantage.

Stacy Drake

Stacy Hegge — Jun 14, 2026
Subject: S7-2026-15 From: Stacy Hegge Affiliation: Jun. 14, 2026 Please continue to protect the public, we need to hold those who seek to defraud accountable. This is only attainable if regulations are stringent. Regulations protect the small investors and keep people paying taxes without getting over their head. The only people who gain from less regulation is the rich never the average tax payer.

Stephanie Boyer — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Stephanie Boyer Affiliation: Jun. 14, 2026 My name is Stephanie and I'm from Colorado, working in auto claims for a Big 5 insurer. We the people are entitled to regular reporting and information as stakeholders. The longer between reports, the longer any adjustments needed actually occurs. This puts everyone in financial danger for the sake of corporations-AGAIN. Stakeholders should get to decide what changes constitute reason to sell stock, not the business itself who is incentivized and rewarded for hiding this information in hopes it "goes away" before the next reporting cycle. KEEP QUARTERLY REPORTING. Stop removing

guardrails for consumers just to benefit corporations, who already have the disproportionate amount of power and money.

Stephanie Garcia — Jun 14, 2026
Subject: S7-2026-15 Comment From: Stephanie Garcia Affiliation: Jun. 14, 2026 Stephanie Garcia, MSN, AGPCNP-C, Nurse Practitioner

I support maintaining quarterly reporting while continuing to explore ways to reduce unnecessary administrative burdens on companies. Timely financial disclosures provide important transparency for investors and help maintain confidence in U.S. markets. Rather than eliminating quarterly reporting, I believe the better approach is to simplify reporting requirements where appropriate while preserving regular access to material financial information.

Stephanie Kitchen — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Stephanie Kitchen Affiliation: Jun. 14, 2026 My opinion is don't mess with our system. There is no reason to change it. Unless its to make sure you control the information to control the people and their money. We've work and invested I don't want this nonsense to wipe it out by greedy men who control the information.
Stephanie Kitchen

Steve Abbott — Jun 14, 2026
Subject: S7-2026-15 From: Steve Abbott Affiliation: Jun. 14, 2026 I understand that children might not recall 2008's financial crisis and how insufficient oversight of corporations that make up large parts of our economy resulted in widespread unemployment and loss of billions of $$ in individual wealth. A disappointing chunk of that money was mine. Retired now, I'm not in as good a financial position as I was then to recoup some of those losses.

But adults? Informed people who lived through it and retain enough of their memory should have the good sense—and sense of responsibility—to maintain the important protections that the Dodd-Frank bill provides. Yes, PROTECTIONS. More recent examples such as Wells Fargo's scamming of customers, financial "advisors" like Sam Bankman-Fried making off with people's life savings, and the opaque operations of Bitcoin and various cryptocurrencies make clear that past problems are not past. The contemporary drive for, and investor expectation of, ever-higher profits add even more temptation and greater risk, not just to individual citizens but to our nation's economy.
According to Cicero, the ancient Roman consul and judge Lucius Cassius, in considering financial disputes, was known to ask, "Cui bono?" ("Who benefits?"). The same question should be asked now. Loosening financial reporting requirements now serves only one purpose (corporate profit), not "the general welfare" that appears in the Preamble to our Constitution.

Steve Reid — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Steve Reid Affiliation: Jun. 14, 2026 Keep Quarterly Reporting.

In the current environment we need more transparency, not less. Quarterly reporting is not a burden as all reporting companies have finely tuned processes and staff to meet the current requirements. I don't believe that the proposed change to reporting every six months will yield significant cost savings for these companies but it will adversely impact the investing public.
Please don't try to fix something that is not broken. Thank you.

Sincerely,
Steven Reid

steve trujillo — Jun 14, 2026
Subject: S7-2026-15 From: steve trujillo Affiliation: Jun. 14, 2026 NO CHANGE IN THE RULES. CERTIFICATION MUST HAPPEN. STOP KISSING THE ASSES OF THE EPSTEIN CLASS, INCLUDING THE PEDOPHILE IN THE WHITE HOUSE.

STEVE WINGBERMUEHLE — Jun 14, 2026
Subject: Comment on S7-2026-15 From: STEVE WINGBERMUEHLE Affiliation: Jun. 14, 2026 I wholeheartedly support and ask that the current quarterly reporting criteria be maintained. While quarterly reporting has an administrative cost, that pales in comparison to the potential for abuse under a six month window. As someone who lost over $1M as a result of a white collar crime perpetrated during the acquisition of my then employer, I want to support whatever steps can be taken to prevent others from the loss of their retirement portfolio. While the two officers of the acquiring company responsible for the fraud were convicted in federal court and received sentences of 12 and 15 years they were ultimately released early for “good behavior” without me or any of the other employees receiving any restitution and left to depend on Social Security for the majority of our retirement. The majority, myself included are still working at more menial jobs into their 60’s and 70’s to get by. Please continue our current policy of quarterly accountability to better safeguard Americans’ financial futures and protect individual investors.

Respectfully,

Steve A Wingbermuehle

Steven Schwanke — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Steven Schwanke Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
To the Securities and Exchange Commission:

S7-2026-15 is antithetical to the SEC mission of maintaning a fair and free market. Quarterly reporting was instituted to reduce fraud and corruption in the first place. Allowing publicly traded companies the option to report semi annualy exposes the whole world to that fraud and corruption all over again.

Do Not pass this proposed rule change.

Steven Whitman — Jun 14, 2026

Sundar Vedantham — Jun 14, 2026
Subject: Public Comment on S7-2026-15: Opposing Extensions to the Quarterly Reporting Period From: Sundar Vedantham Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I am writing to formally object to the proposals in File No. S7-2026-15 that seek to lengthen the current corporate reporting period. In today's fast-moving, AI-driven economic landscape, stretching disclosures to a six-month cadence would severely compromise market transparency.
A voluntary or flexible reporting system invites severe adverse selection. It allows struggling or poorly governed firms to shield operational vulnerabilities from the public during extended dark periods. This isn't theoretical; the CFA Institute's study, "The Impact of Mandatory Quarterly Reporting," detailed how a similar experiment in the United Kingdom directly degraded market efficiency by widening bid-ask spreads and reducing analyst oversight.
Moreover, data has thoroughly debunked the premise that quarterly cadences breed corporate "short-termism." Regular reporting provides the transparency required to build public trust and ensure robust compliance. We are not currently suffering from markets deteriorating badly that needs a boost of some kind.
I urge the SEC to heed the warnings of its own Investor Advisory Committee. Please defend retail investors and preserve market stability by retaining the mandatory quarterly reporting framework.
Best regards,
-sundar.

Dr. Sundar Vedantham

Susan — Jun 14, 2026
Subject: S7-2026-15 Comment From: Susan Affiliation: Jun. 14, 2026 Americans need MORE transparency, not LESS. It seems very unethical to keep such things from the public. Secrecy breeds corruption and mistrust of government. There is so much already, do we need even more? I don't want my country turned into a country like Russia or Commie China. It's a slippery slope. Sincerely, Susan Ballarini, retired Corrections officer, security guard, and licensed chemical dependency counselor intern.

Susan Agrella — Jun 14, 2026

Suzanne Anderson — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Suzanne Anderson Affiliation: Jun. 14, 2026 Suzanne Anderson
Administrative Assistant
Philadelphia PA
Quarterly reporting is important because it keeps corporations accountable. If my money is invested in a company whether through a stock portfolio or individually, I have the right to know what said company is doing in terms of its finances. The only logical explanation is what are these corporations trying to hide by not reporting quarterly.
Most people have worked their entire lives and saved for retirement. It is unethical to rob people of their right to retire.

suzanne farrington — Jun 14, 2026
Subject: S7-2026-15 From: suzanne farrington Affiliation: Jun. 14, 2026 I am a healthcare provider in western Massachusetts. I have seen increasing lack of oversight of corporations in the last ten years, and as mergers and acquisitions accelerate, it is a fact that corporate behavior affects every American every day.

This country is on the precipice of descending into lawlessness, and should filings be required only every six months, that’s twice the time for CEOs to indulge in wrongdoing if they choose to. Six months per year more time to ask for forgiveness after the fact, instead of abiding by laws. Less accountability has never served the public or any positive metric, except to give thieves income and extra time to cover their tracks. If you allow this change, the general public will 1) see this body for its transactional nature, abiding by no laws except those it chooses; and 2) it will further erode trust and further political and social instability. Choose wisely.

Teresa Wuebker — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Teresa Wuebker Affiliation: Jun. 14, 2026 The state of the world and US economies is ever changing. Businesses can go north or south quickly ! Not every investor has the time or expertise to follow developments on a daily, weekly or monthly basis . Many have mutual funds or a mix of investments which also makes it difficult to keep up with what is happening in their accounts. As you know at least 40% of accounts invested in the stock market are retirement accounts. Their future security depends on how well the companies are doing A quarterly report can give them a sense of how their investments are performing. Only 35% of people in the US have a financial advisor who would normally take care of that …. I appreciate being able to follow the developments and finances of companies in my portfolio I don't think relaxing these filing requirements will increase public offerings. Not everyone wants to turn over ownership of their company to strangers who may choose to interfere with their operations . Thank you for accepting my input

Timothy Mann — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Timothy Mann Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
I strongly urge the SEC to maintain mandatory quarterly reporting (Form 10-Q). As 62% of Americans are now invested in the stock market (Gallup 2025), protecting the frequency of standardized disclosure is essential for retail investor protection and retirement security.
1. US is Not Short-termist: The argument that quarterly reporting discourages long-term innovation is decoupled from reality. Generally Accepted Accounting Principles (GAAP) provide ample options to support long term investment, and the U.S. technology and biotechnology sectors have seen unprecedented R&D investment under the current quarterly mandate. There is no empirical evidence that reducing transparency fosters innovation; rather, it merely reduces management accountability.
2. The Information Supply Chain: Most retail investors rely on financial advisors, analysts, and market pricing that all depend on the 10-Q as a ground truth. Moving to semi-annual reporting would leave this ecosystem reliant on stale data for more than half the year creating heightened volatility that disproportionately harms retail investors (average Americans), who lack the resources to acquire expensive "alternative data" used by institutional insiders.
3. Fraud Deterrence: Quarterly filings are a critical deterrent to corporate malfeasance. Standardized, frequent intervals make it harder for companies to sustain "earnings management". A half year reporting gap provides a dangerous window for financial deterioration to be obscured. It also increases the volatility around reporting events creating greater incentives for insider trading.
Conclusion: The U.S. markets are the global gold standard because of our commitment to transparency. Reducing reporting frequency would prioritize marginal corporate cost-savings over the fundamental protection of the American public. I urge the Commission to maintain the mandatory Form 10-Q.

Timothy Murphy — Jun 14, 2026
Subject: S7-2026-15 Comment From: Timothy Murphy Affiliation: Jun. 14, 2026 I'm opposed to the rule change The proposal is a gift to insider traders, because their advantage over the information the public has will be even greater. It is anti consumer.

US Citizen

Tobias Kreidl — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Tobias Kreidl Affiliation: Jun. 14, 2026 Dear SEC,
Corporations owe it to shareholders as well as the public at large to maintain quarterly reports. The effort for the corporations to do what they have been doing already for many years is not asking for much since they need to track their own internal revenues and expenditures anyway, plus it also is essential for financial analysts and consultants to help manage investment portfolios using more up-to-date data.

History has shown negative impacts during the relatively brief time the U.S. went to a semi-annual reporting schedule. I fear my own investments will be adversely impacted should this change be instituted.

In short, I strongly oppose any measure that deviates from a quarterly reporting schedule.

Regards,
Tobias Kreidl

Todd Almond Executive Vice President, TransCore — Jun 14, 2026
Subject: File No. S7-2026-15 From: Todd Almond Transparency is foundational to trust. Trust should be a pillar of every publicly traded business. History has shown that our businesses and consequently to stock markets have performed better during periods of more frequent reporting. This increased scrutiny is healthy for companies and provides investors more frequent insight to the health and management of the businesses they own via their stocks and mutual funds. It is critically important to all involved that this reporting frequency remains quarterly.

Todd Binenstock — Jun 14, 2026
Subject: S7-2026-15 Comment From: Todd Binenstock Affiliation: Jun. 14, 2026 Most investors rely on Quarterly reports to understand how their investments are working out abs how companies are scythe performing along critical metrics and under condition that change by
the quarter. More transparency means greater accountability and understanding which leads to a more efficient, less risky markets and fewer major surprises that could cause panic selling and crises. The quarterly filing requirement should stay.
Thank
you.

America must never stoop to this **** and play their games. It's as much RESPONSIBILITY of the low IQ Uniparty RINOs as Dems, all promised more laundered money and power.

They're really gonna be surprised when they get purged, which has happened every time in history when the morons learn they were the useful idiots.

Todd Pittard — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Todd Pittard Affiliation: Jun. 14, 2026 To the Securities and Echange Commission:
We count on quarterly reports to evaluate investments options. By eliminating the quarterly reports, you place retail in a blindfold for 6 month periods at a time, and materially limit our ability to pick

investments. A 6 month period is a lifetime in business where a lot can change.
you are making the market less transparent and ripe for more fraud. We have been witnessing fraud on a daily basis with naked short selling and the SEC does nothing to protect retail, and this rule change puts retail in an even worse situation.
we implore you to not pass this rule change, and do your job, protect retail.

Tom and Karen Stefanski — Jun 14, 2026

Tom Strohl — Jun 14, 2026
Subject: S7-2026-15 From: Tom Strohl Affiliation: Jun. 14, 2026 As a licensed financial advisor, I and the investors I serve rely on the availability and integrity of quarterly disclosures from public companies and the financial analysis based on this quarterly information to attempt to make sound investment decisions. At this point, in a world already challenged by trust issues heightened by the emergence of AI, what kind of message does it send to CEO's of public companies and to the investing public to reduce the flow of information and only require semiannual attestation from CEO's. It seems that this idea to eliminate quarterly reporting would serve to reduce accountability and give those CEO's who might be inclined to bend or break the rules, more latitude to do so. Investing in public companies has enough risks to the investing public. It doesn't make sense to take away a long held practice designed to provide reliable information at reasonable intervals with which to help judge the health of public companies and determine one's course of investment action. Why is the SEC even considering this? What is the true agenda here?

Tony Pyle — Jun 14, 2026
Subject: S7-2026-15 From: Tony Pyle Affiliation: Jun. 14, 2026 Mary Pyle , manufacturing inspector at Essilor. If the SEC was mandated by a judge to have quarterly reporting, that should be enough! Common sense should not be thrown out now, this is what's keeping our savings safe , if it costs the institutions more to finance quarterly reporting, so be it! It a part of doing business, fairly, legally, something it seems a lot of business has thrown aside! It seems it's time to investigate exactly who is responsible for trying to bring this up again after all the problems that arose from the Enron disaster. And what their motives are. (Like we don't know!)

Sent from my iPhone

Tony Walton — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Tony Walton Affiliation: Jun. 14, 2026 Yo SEC, companies know what the hell is going on financially every **** day!
Accounting ledgers keep all their transactions recorded.
Technology is constantly streamlining the process of producing financial statements for realtime decision making.
The boss knows what's up any and all the time. Each month accountants close the accounting cycle and produce income p & l statements as well as a butt ton (technical term) of reports and analysis so decision makers can make decisions to run the ****eded company.
Zero reason they can't share that data with us regularly as well.
They don't have to do full-on TED style talks every quarter (that's just the industry setting their own lofty standards on themselves always trying out-do each other's showmanship)-- not necessary.
We just need a basic quarterly financial statement to peruse.
You could compromise by forcing the companies to provide the basic required financial reporting in the most bare minimum cost effective way for shareholders twice a year (to level the playing ground on reducing costs) and they can go balls out twice a year with all their fancy conference calls and graphics and other razzlemedazzle.. and whatnot
and as far as SEC burden to receive these reports, let's say you have to accept them 4 quarters, and keep them electronically on file, but review just every other quarter or once a year even??? Do you guys even have the burden of reviewing the filings or aren't they just submitted "for the record?"
Up the accountability for false reporting and hang a few more executives proper hardcore for cheating the public then you could maybe loosen up the reigns a bit if they have the proper fear of the SEC..?

Tonya Phillips — Jun 14, 2026

Tuong Khanh Lam — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Tuong Khanh Lam Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
The integrity of the nation is imperative, and our economic solvency is crucial. To make better informed decision for our future, americans need transparency. We should know if what the TRUE risks we're assuming as individual investors of our own doing, and/or entrusting brokers & bankers of what our mutual funds, and portfolios stand.
PLEASE, PLEASE, PLEASE protect the finanial futures of young and old americans. Do not let the retirement plans of older generation disinegrate by the mishaps of investment brokers & individuals due to misinformation, or omissions by so many companies. Lies are lies either by false statements, or omission. DO NOT let the greed of one party hurt an entire culture. Let's try to uphold the integrity of everything, hold companies accountable for to everything!

Sincerely,
Tuong Khanh Lam

used again — Jun 14, 2026
Subject: Comment on S7-2026-15 From: used again Affiliation: Jun. 14, 2026 Donna Frye, retired Accountant PCB Florida. Reports must be compiled quarterly and a switch to semi-annually didn't work before and it won't work now. Being able to detect trends and how businesses are operating is vital to investing. Would you rather find cancer 3 month into it or 6? Of course 3 months, because you can take corrective action sooner in the hopes of a better outcome. I do not even understand how this can even be in consideration, as it's absurd.

Val Sasser — Jun 14, 2026
Subject: S7-2026-15 Comment From: Val Sasser Affiliation: Jun. 14, 2026 Hi SEC:

As a regulatory agency, you should not bend rules as you did for SpaceX's S1, full of absolutely dangerous issues to this country that should not be approved. You should continue as it is: quarterly reporting of revenue, profits and losses!

With the upcoming IPOs of the AI companies, which you probably will approve, we will be in a territory of absolute uncertainty, non-profitability, unproven success, and "faith" trading (faith as in the ability to believe in what is unproven).

Your duty to all of us, SEC, is to promote transparency to us about the stocks and companies trading (gambling). You are NOT paid to protect companies but the public, and failing to protect the USA's stock market is our ruin as a country, as a market. And a definitive and announced negligence on your part. And treason.

Keep the reporting as it is: quarterly.

Sincerely,

Valeria Sasser

VALERIE DEVINE — Jun 14, 2026
Subject: Comment on S7-2026-15 From: VALERIE DEVINE Affiliation: Jun. 14, 2026 We tried this once before, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of our life savings. I do not approve of this move.

Valerie Mccarthy — Jun 14, 2026

Victoria Williams — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Victoria Williams Affiliation: Jun. 14, 2026 I'm a manager in the financial services industry in Arizona and learned that the SEC is looking to roll back the required quarterly public earnings reports that we investors depend upon to know where we want to invest our hard earned money. Pensions are gone, SSI gets used to fund projects that they were not intended for, and we're told that the funds taken out may not be there when we're eligible. To allow publicly traded companies less acruriny or oversight os NOT going to benefit the already pinxhed investor. Please, maintain the quarterly required reporting. For the love of God and the people of this country. We are sick and tired of being robbed by corporate interests and the wealthy.

Thank you for taking our commentaries into your deliberations. I hope that you'll sleep well in doing the right thing for "everyman'- those of us who sustain this nation.

Sincerely,

V W

Vince Fusconi — Jun 14, 2026
Subject: Comment on S7-2026-15 From: Vince Fusconi Affiliation: Jun. 14, 2026 Quarterly Reports benefit the investor.... who are the people. we lend them our money. WE DESERVE TRANSPARENCY. Do not experiment with our money. Keep quarterly reports.

Viola Pando — Jun 14, 2026
Subject: S7-2026-15 Comment From: Viola Pando Affiliation: Jun. 14, 2026 The idea of a quarterly reporting is abysmal. What kind of moron would support that who also has an 8 to 5 job. The attorneys and team members on this rule are profound idiots. Idiots shouldn't be making laws. This rule would destroy what's left of the little than Trump has left standing.

Viper9087 — Jun 14, 2026

Subject: Comment on S7-2026-15 From: Viper9087 Affiliation: Jun. 14, 2026 To Whomever It concerns at the SEC, My name is Christopher Toth, I am a small business owner, in Fairfield, CT.
I strongly believe that companies should report quarterly, not bi-annually, even as a small business I am required to report quarterly sometimes even monthly for sales tax revenue, and this reporting is made frequently for a reason. Transparency...
As an investor we cannot make wise investments with limited information, this gives an larger and unfair advantage to insiders. The last time we tried bi-annual reporting, the market showed what a mistake it was, Less transparency came with lower returns and lower valuations. Since switching back to quarterly reporting, The market and America has prospered. Other countries still doing bi annual reporting are falling behind on economic growth and stability. The trading markets should have the benefit of quarterly financial information and this benefit is apparent in every market where quarterly reporting is mandatory. I will not go further on detail, but there was a reason the SEC chose quarterly reporting in the past and it's the same reasons we need it still today.

Thank you for hearing my voice.
-Christopher Toth

WeTouchAll DBM — Jun 14, 2026
Subject: Comment on S7-2026-15 From: WeTouchAll DBM Affiliation: Jun. 14, 2026 -Monique Neugebauer
-Retired from: Substitute Teaching/Architecture Design/Aerospace Ergonomic Engineer
-past Co-Owner of a National Environmental Consulting Firm
-Residing in: Las Vegas, NV

I have worked in various fields but the Substitute Teaching was the fallout job from the Bernie Madoff

Mortgage Economic Implosion. I was seriously disgusted with lack of ethics and transparency at ALL levels in this Ponzi Scheme which derailed my efforts at becoming a successful architect! It forced my father to sell his custom designed/built home at a loss while we were trying to take care of each other after my mother's at-home hospice time (he lost thousand$$$ in the stock market and was forced to move in with my brother in another state which was the beginning of the end for him) which now is being resold at & $2.6 million for someone else's profit.

I own stocks now and have helped my daughter invest, and I/we will NOT be sidelined on the timely consistent information that I/we must have to make informed decisions about my/her money and well being!!!!

I am also living on a fixed income which is really not meeting the quality of life I had planned for (having lost so much in the many manufactured and avoidable downturns in our economy) so had to move in with my daughter after Dad had sold his home AT A LOSS & HAVING TO LOSE ALL HIS TREASURES FROM AROUND THE WORLD IN A HURRY(and yes it is crowded with a new baby and hard on all of us).

Everyone must have a clear budget that they can manage to be able to meet the demands of our lives. I/We, and businesses, must be able to meet our everyday needs, weather the challenges, and not just survive, but grow. That is how a successful life and robust economy is sustainable. Everyone follows the Golden Rule and is ethically/humanely professional at the highest levels.

Transparency, timely frequent and consistent financial reporting is critical for myself and everyone else to know how to invest, how/where/when/what I/we have to plan for, like work, live and play as well as the all the medical and wellness challenges that must be addressed!
DO NOT GO BACK TO THE UNETHICAL AND INHUMANE BUSINESS MODEL of LIMITED FINANCIAL REPORTING & CONSTANT OBFUSCATION!!! THIS COUNTRY IS ALREADY BEING PULLED AT LIGHTENING SPEED DOWN THE BLACK HOLE!!!

yvette hill — Jun 14, 2026
Subject: S7-2026-15 From: yvette hill Affiliation: Jun. 14, 2026 We need to watch CEO's, if you thought that their criminality was overt before, with the biggest criminal, our president leading the charge, they are going to commit bigger crimes with no reprocussins.
This is not what Americans need, America provides opportunity to make money but most of us will not accept blatant criminality, this is not Russia.

Yahoo Mail: Search, Organize, Conquer

Yvonne King — Jun 14, 2026
Subject: S7-2026-15 Comment From: Yvonne King Affiliation: Jun. 14, 2026 Yvonne King, retired Administrator LSU HSC. Especially with the current uncertainty of our economic situation, it is vital for those of us who watch over our retirement accounts to get frequent updates.

Zachary Christy — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Zachary Christy Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
We need a strong SEC to actually enforce transparency and legality in these large companies. Giving companies months of opportunity to hide information from retail investors is doing nothing but funneling more money to the richest, most well connected players.

Ziv Tzvieli — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Ziv Tzvieli Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
Taking away quarterly reporting requirements would leave retail investors like me at a severe disadvantage when investing in the stock market. While large institutions and hedge funds have near endless connections to board rooms, executive suites and the pay-to-play financial media, retail investors are dependent on the SEC enforcing transparency in financial disclosures.
Please do not curtail this tool that is essential to democratizing market access.

Zonía Moore — Jun 14, 2026
Subject: My view on Rule S7-2026-15 From: Zonía Moore Affiliation: Jun. 14, 2026 To the Securities and Exchange Commission:
The stock market is already stacked against your average person. Don't make things more unfair and allow more wealth to accumulate at the top.

Jr. John Bolognini — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Jr. John Bolognini Affiliation: Jun. 13, 2026 My name is John Bolognini, Jr.. I'm a retired real property appraiser from NY. I am in favor of keeping reporting quarterly. I'd prefer daily reporting! My point is I need the most timely data available to make educated trades in the markets. Prior to 1955 companies volunteered this information. 6 months is the difference between a profitable year and a disaster. I oppose semi annual reporting strongly. It is

thought I could lose 38% of my portfolio if this becomes practice. Stale data is bad data. Don't do it.

Thank you in advance
John Bolognini, Jr.

Sarah Kusler — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Sarah Kusler Affiliation: Jun. 13, 2026 Hello,

My name is Sarah Kusler. I reside in Texas. We need quarterly reporting to guide our financial decisions. The plan to use semi-annual reporting hurts families who are working so hard to invest part of their savings. Businesses benefit from Maximizing investors. We need to protect the investors from financial hardship that occurs when they provide semi annual reporting. We have already seen what happens under semi annual reporting schemes. Investors lose up to a third of their savings. We lose investors with semi annual reporting. Stop the proposal, we need to continue receiving quarterly reporting.

Sincerely,
Sarah Kusler

Sr. Gregory Franzoni — Jun 13, 2026
Subject: S7-2026-15 Comment From: Sr. Gregory Franzoni Affiliation: Jun. 13, 2026 Gregory J. Franzoni, Sr., retiree. As a retiree with an IRA and a Variable Rate Annuity, I like to keep close tabs on my accounts and Quarterly Reports are valuable to me and my wealth management advisor to evaluate performance and maximize gains. Please retain quarterly reporting. Thank you.

1&1-M6d3d3.general — Jun 13, 2026
Subject: S7-2026-15 From: 1&1-M6d3d3.general Affiliation: Jun. 13, 2026 Keep the Quarterly Reporting. I'm sure the majority of businesses that report are reporting accurately. However, for the minority that attempt to "cook the books", they need to be found and "Face the Music" and pay their rightful amount plus any fine for falsifying business records.

Alex Xavier — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Alex Xavier Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Now more rhan ever we need transparency- time and time again many have been mislead due to like whom many have stated- underhanded backroom deals and many other types... a great deal of those can happen in a period of six months. Like on mentioned in another entry, keeping transparency can reduce the shady practices from certain companies...Institutional investors already have a grand advantage, hiding information does nothing but make those investors even more favored, as they already hVe power to persuade/manipulate the market, breeding more mistrust from personal investors, like myself, causing many of us to steer clear of individual companies' securities. the companies' clients and consumers, causing dropped values of their securities, or possible complete collapse with some. Transparency will keep these companies at least closer to honest.

Alexander Blais — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Alexander Blais Affiliation: Jun. 13, 2026 My name is Alexander Blais. I work in the Financial Services Industry in San Antonio, TX. The savings and financial security of everyday Americans is already under extreme stress given the rollout of AI and high prices on even the most-basic of goods. Removing the quarterly requirement of these firms could potentially wipe out 1/3 of retirement savings. This would be catastrophic when people are already struggling. The last thing we need is to loosen the rules in businesses at this time. This does not benefit Main Street it only benefits Wall Street and it is shameful. Do better.

Sent from my iPhone

Alexandra B — Jun 13, 2026
Subject: S7-2026-15 Comment From: Alexandra B Affiliation: Jun. 13, 2026 We deserve quarterly reporting. Investors deserve truth.

We also deserve for people making money off essentially insider trading to be prosecuted to the fullest extent of the law. No president, senator, representative, or anyone working along side those that are making decisions that will affect stock prices should EVER be allowed to profit from their votes.

-A. Burton, MSW

Subject: S7-2026-15 Comment From: Amilcar Blake Affiliation: Jun. 13, 2026

Amilcar Blake — Jun 13, 2026
Subject: S7-2026-15 Comment From: Amilcar Blake Affiliation: Jun. 13, 2026 To whom it may concern:

There’s far more risk of financial malfeasance in the current environment than there had been before. The dollar is quickly losing status as the world’s reserve currency due to politics, which means we’ll have much less room to maneuver in the next 5-10 years. Now is not the time (if ever there were) to relax reporting requirements on public companies. And, yes, I know the proposed rule

would only reinstate a reporting interval we had had before. That's not the point. The point is that this will hasten an adverse international monetary environment in which our traditional advantages no longer hold, with second-order effects on our domestic and international capital markets. I like the old saw, "A drop of forethought spares rivers of regret."

Respectfully,

Amilcar Blake

Amit Kumar — Jun 13, 2026
Subject: S7-2026-15 Comment From: Amit Kumar Affiliation: Jun. 13, 2026 Quarterly reporting is mandatory to be able to dictate the trajectory of a company for the next coming years. This allows individuals not considered insiders have minimal losses in their investments.

Ann Wilson — Jun 13, 2026
Subject: S7-2026-15 Comment From: Ann Wilson Affiliation: Jun. 13, 2026 I am a retired investor so keeping up with stocks is important and a quarterly report makes sense. In my experience, the old saying has been generally true; when the cat is away, the rats come out to play. Reducing reporting from four times a year to only two only makes sense only if you want to communicate less, and it starts a trend downward. Why not go to only yearly reports...or even none at all? And why would you want to do that? Hard not to jump to the conclusion there is something to hide. Keep the Quarterly Reports coming.

Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 13, 2026 Lisa Ellram, Professor of Supply Chain, PhD, MBA, BSB in Accounting. Oxford, OH.

As a long time stock market investor, former financial analyst and current supply chain expert, I understand the importance and the intrinsic value of quarterly reporting. Things like organizational liquidity , inventory levels, inventory turnover, accounts payable, and accounts receivable can shift very rapidly in challenging times. Allowing companies to forego quarterly reporting does a disservice to investors, as well as to the companies themselves as firms will be able to hide problems longer, that's OK delay, addressing problems,and there will be terrible shocks and surprises to the stock market, damaging valuations, retirement accounts and portfolios.

I am very much against this proposed change. I am not sure who it benefits, but it certainly doesn't benefit the stakeholders of the organization. This goes beyond stockholders and employees to include community members, suppliers, and customers. I strongly urge you to reconsider this proposal. The long-term applications are extremely negative and will disadvantage US companies. The short term implications include more surprise bankruptcies.

Thank you for considering my comments.

With high regards,

Lisa Ellram.

Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 13, 2026 Marko Stojsavljevic, Retail Manager, Cleveland Ohio. This is the first time in a long while that I have done something like this. I'm 69 years old and really shouldn't even care about stuff like this anymore. Hell, I don't even know if this will see the time of day once I hit the send button. Well here goes. We need more transparency not less. With the world running and turning faster and faster every day and the upcoming AI and the boom and changes it will bring, even tremendous changes can and will occur in as little as a quarter let alone just twice a year. Quarterly also helps with accountability. What we really need to do is to not cut back but to expand this to government at all levels. We haven't had a balanced budget, we haven't even had a budget in ages. We've run our country on contuining resolutions. I believe if we expand transparency, expand reporting good things will come out of it. Even if we get very little out of it as some say, it costs companies nothing, zilch, nada, zero. Costs are passed on to the consumer or purchaser and as a consumer I am more than fine with that. I vote that we also hold the Federal and all governments to the same standards, rules and regulations that these governments hold their corporations, companies and people to. Maybe if we did we wouldn't have " learning " centers, be 39 trillion dollars in debt (not counting unfunded liabilities) also piling up 2 trillion more on a yearly basis with no end in sight. This might just be a small move but even small moves in the right direction help. To much in never enough applies here. Thank you for your time. Hoping I am doing a small part for something right. Subject: S7-2026-15 "Semiannual Reporting" Comment From: Anonymous Affiliation: Jun. 13, 2026

To: U.S. Securities and Exchange Commission
Thank you for providing the opportunity to comment on S7-2026-15, “Semiannual Reporting”.
The SEC should keep the requirement for quarterly financial reporting. Quarterly reports, which I and others I know rely on, are a valuable tool for both individual and institutional investors. Going to semiannual reporting increases the risk that fraud and general corporate malfeasance will happen in the shadows. Investors and potential investors will be denied the ability to identify suspicious actions and unexpected financial results on a timely basis. It facilitates opportunities for insider trading. Information that helps investors make informed decisions - important decisions that affect their household finances, retirement accounts, and retirement planning - will be stale and outdated by the time investors read or hear about company actions, market risks, legal filings, leadership and employee changes and other pertinent developments.
Making quarterly reporting optional will incentivize and allow companies with something to hide to hide it for as long as possible, something that the SEC would be directly facilitating with the proposed rule change. If the SEC adopts this change, it shifts the costs and risks from companies to individual, institutional and other investors. This would be irresponsible.
I strongly urge the SEC to keep quarterly financial reporting as a requirement, and not allow semiannual reporting.
Sincerely,
Carol H.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 13, 2026 My name is Dr Laura Wold. I am writing to urge you to vote NO on changing the rules requiring quarterly reporting by public corporations.
As an investor, I an my financial advisors rely on quarterly information to make sound investment

decisions, Many things can happen in a 6 month time period and investors have a right to know and corporations have an obligation to investors to report and keep us up to date. Period. Longer gaps in reporting create an unfair advantage for corporate insiders as they have access to information the public doesn't have. This cannot become an optional time table. The meager savings to companies aren't worth the cost to me as an investor. Vote NO on this proposed change in reporting frequency.

Sent from my iPhone

Anonymous — Jun 13, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 13, 2026 Keep the quarterly reports. And by the way when are you ever going to do anything about the illegal trading practices by hedge funds such as citadel securities? End dark pools, end naked shorting and FTDs. We all can see the corruption and we can also see that the SEC does nothing about it.

Anonymous — Jun 13, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 13, 2026 Marshall Wheaton , business owner. My view is that quarterly reporting is important, but it is not the only way to make a stock market fair. It helps by giving investors regular, comparable information so large insiders do not have an information advantage over ordinary shareholders, and that transparency is a core part of market fairness.

Quarterly reports reduce uncertainty by forcing companies to disclose recent financial results, cash flow, and major changes on a predictable schedule. That regular cadence makes it harder for management to hide bad news for long periods and gives all investors a common baseline for deciding whether a stock is priced fairly.

It also supports trust. When investors believe they will get timely updates, they are more willing to put capital into public markets, which is one reason frequent reporting is often linked with stronger market confidence.

Anthony Canton — Jun 13, 2026
Subject: S7-2026-15 Comment From: Anthony Canton Affiliation: Jun. 13, 2026 Quarterly reporting is essential to the small investor. Without timely disseminated financial information regarding significant transactions that have occurred along with new contingent liability exposures, the investor can’t make timely intelligent investment decisions.

Regards, Anthony Canton

Anthony Carrillo — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Anthony Carrillo Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Hello, To the Securities and Exchange Commission:
I'm writing as an individual investor to express concern about the proposed rule allowing public companies to switch from quarterly (Form 10-Q) to semiannual (Form 10-S) reporting.
As someone who manages my own portfolio, quarterly reports are one of the only windows I get into how a company is actually performing between annual filings. Doubling that gap to six months means I'd be making buy, hold, and sell decisions with materially less current information than I have today. Markets move on information, and when disclosure slows down, the people most likely to lose out are retail investors like me—not the institutions and analysts who have other channels (earnings calls, investor relations contacts, alternative data feeds) to fill in the gaps.
I'm also skeptical of the cost-savings rationale. Most public companies already maintain their books on a rolling basis for internal management purposes and to satisfy auditors and lenders. The incremental cost of packaging that information into a quarterly filing is small compared to the value that timely disclosure provides to the market as a whole. If anything, less frequent reporting could increase volatility around the twice-yearly filing dates, as six months' worth of news gets digested all at once.
Finally, this proposal would make it easier for problems—accounting issues, deteriorating fundamentals, governance concerns—to go undetected for longer. The quarterly cadence isn't just a paperwork requirement; it's a discipline that keeps management accountable to shareholders on a regular schedule. Stretching that out doesn't modernize the system, it weakens one of the basic tools investors rely on.
I urge the Commission not to adopt this rule as proposed.
Respectfully submitted,
A.C.

Anthony Jimenez — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Anthony Jimenez Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:

Arjun Sundar — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Arjun Sundar Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Investors and the larger market place depend on quarterly reporting and disclosures to monitor, track and measure performance, pricing and progress on key deliverables. Making this more infrequent would not only blind the investors but also make non-trendy stocks less attractive.

Arlene Haessler — Jun 13, 2026
Subject: S7-2026-15 From: Arlene Haessler Affiliation: Jun. 13, 2026 There are many reasons why we have quarterly reporting for CEOs. While I do not know all of them, as someone who has been self-employed for over 30 years, I know my life and business runs better when I look at the numbers and regularly and accurately pay my quarterly tax estimate. Any business runs better when held accountable with accurate and timely reporting. Frankly, I would have been more successful over the years if I had been better at this.
An efficient and accountable business is better able to serve the needs of its staff and its customers and by so doing can grow and/or maintain its company to the best result for all concerned.
Thank you for your attention.
Arlene Haessler, MLIS and small business owner.

Audrey Dunne — Jun 13, 2026
Subject: S7-2026-15 Comment From: Audrey Dunne Affiliation: Jun. 13, 2026 To whom it may concern,

Please keep quarterly financial reporting mandatory. As someone who has always worked for a non-profit and had a modest wage, I rely on index funds in a 403(b) for my retirement savings. Corporations need to be kept accountable for their finances for the sake of all stakeholders, including those with the smallest shares.

Sincerely,

Audrey Dunne, non-profit employee

Aurora Mireles — Jun 13, 2026
Subject: S7-2026-15 Comment From: Aurora Mireles Affiliation: Jun. 13, 2026 My name is Aurora Mireles and I am a teacher. It is ridiculous and upsetting that my interests are not being represented nor protected. My retirement investments would be in jeopardy and so would that have millions of ordinary people like me. I work hard and trust that my investments are safe. But with this proposed change I am not confident that they will be. Giving companies 6 months to disclose any failures gives them an opportunity to offload shares before any bad news tanks the stock. This affects my bottom line. There is also more opportunity for fraud to spread. Having quarterly filings would minimize this “opportunity.” Please keep the quarterly filings- it protects the majority of people like me who count on these investments for retirement or to be able to send our kids to college. We deserve better.

Ava Sark — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Ava Sark Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:

B MAUL — Jun 13, 2026
Subject: Comment on S7-2026-15 From: B MAUL Affiliation: Jun. 13, 2026 Quarterly reporting is absolutely necessary. It provides financial information in a timely fashion, which allows us to make informed decisions about where and how they invest our hard-earned money. Personal financial losses would be inevitable, and most gains would go to the companies, who wouldn't have to report problems or devaluations for up to 6 months. I've been a retiree for 22 years. I have some personal savings. However, I'm already facing the threat of losing much of my Social Security. My pension has also been frozen. I'm getting the same amount as I received 20 years ago. Imagine living on what you earned 20 years ago! Allowing semi-annual reports would just give corporations the chance to earn more (or lose less), while the investor is kept in the dark, unable to make informed decisions, and perhaps losing much of her capital. Inflation is also on the rise. How are Americans to achieve, maintain, or improve their financial standing? This has been the promise of America for generations of Americans -- that if we work hard and invest wisely, we will live a good life. Why are we contemplating making that more difficult? Why are we favoring corporations over people? Please maintain Quarterly Reporting. Beverly Maul, NH.

Barry C — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Barry C Affiliation: Jun. 13, 2026 DO NOT CHANGE from company quarterly reporting to semi Annually!!!! Past history has proven the results of semi annual reporting lead to the erosion of The average investors portfolio…and that's a huge negative especially for me…a retiree who depends on the growth of savings in index funds. Washington and Trump have done enough damage to this country and the average American! Leave things as they are I'll be watching this like a hawk now that I know what's happening.

You id***s are going to get away with only so much before your drummed out of office.

Barry Canning

Betheen Groepper — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Betheen Groepper Affiliation: Jun. 13, 2026 We have historical data showing us every 6 months investors lose money due to lack of transparency and time to fix it. Why even consider changing it? The quarterly reports keep businesses and corporations honest. I would lose my life savings that I have worked hard for when I retire. It would create chaos for everyone, life savings lost, and a huge gap between the ultra rich and the working poor more so than it is today. I do not understand or trust any reasons why you would want to change it. Who does it really help? Certainly not working people like me. This is deeply suspicious, disturbing and concerning. Please leave it at quarterly reporting.

Betsy Beckman — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Betsy Beckman Affiliation: Jun. 13, 2026 Please continue with the quarterly reporting, it is so important that this information remain transparent, to avoid mishandling and fraud. The working class cannot afford to be ripped off , which is becoming the norm ! We have worked so hard for our money and we deserve to be certain it is safe ! I am a retired senior citizen who has saved since the age of 13. For years I worked full time and remodeled houses on the weekends and evenings, to use as rentals. I cannot afford to waste any of it! Please safeguard our future, we are counting on you to do the right thing . I live in Newark, Ohio and got my strong work ethic from watching my Dad, who was employed by the US Postal Service.

Betsy Beckman

Betsy Davis — Jun 13, 2026
Subject: S7-2026-15 From: Betsy Davis Affiliation: Jun. 13, 2026 Corporations have to pay

estimated taxes quarterly. It shouldn't be much trouble for the CEO to sign a report quarterly. The report is being generated anyway. Let's keep it the way it is now, QUARTERLY. Thanks!

Betsy D. Illinois.

Betsy Fischer — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Betsy Fischer Affiliation: Jun. 13, 2026 Why would you do this? What possible benefit could there be for reducing the availability of data? Reverting back to a policy from 1955 flies in the face of our technological advancements. It’s easier than ever before to produce the data and provide it to the public. Why would you want to hide data for so long? Who would benefit from this? Certainly not the public. I am totally opposed to this proposed change. Your primary role is to protect investors. It’s the first thing listed under your mission on your website. Reducing the information available to investors undermines this role of protection. Do not make this change.

Brandon Tibbetts — Jun 13, 2026

Subject: S7-2026-15 Comment From: Brandon Tibbetts Affiliation: Jun. 13, 2026 Brandon T. - Director, IT -
More frequent financial disclosure strengthens market transparency, giving investors a clearer, timelier view of a company's performance and risks. This reduces information gaps, curbs speculation, and promotes fair pricing by ensuring all participants operate with up-to-date data. Regular reporting also encourages stronger internal controls and accountability, ultimately supporting long-term investor confidence and healthier capital markets.

No. Just no.
Accountability matters.
I work too hard to invest my money only to watch corporations avoid responsibility when things go wrong. Investors, employees, and customers all pay the price when accountability disappears.
We cannot afford to repeat the mistakes of the past. History has shown what happens when warning signs are ignored and responsibility is pushed aside.
Transparency matters. Responsibility matters. Accountability matters.
We should expect better, demand better, and refuse to allow history to repeat itself.

Bruce Clarke — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Bruce Clarke Affiliation: Jun. 13, 2026 Keep Quarterly Reporting at least for all securities with $10,000,000 market caps or more.
Bruce H Clarke, P.E. Business owner.
I am semi retired and will be dependent on my investments within a few years, especially if Social Security is reduced. I actively monitor and adjust my investments and rely on quarterly reporting for key input data in my investment decisions. I expect annual reports to be more comprehensive, but quarterly reports help me understand the success of securities moving forward and dealing with rapidly changing market conditions. Semi-annual reporting is to lax, especially as technology changes occur so rapidly now and the rate of change is accelerating. Reducing securities reporting requirements while technology is making the process of producing those reports less burdensome would clearly be a detrimental move for most investors, big and small. Seems like a move to benefit wealthy insiders and hurt smaller investors. Investing is already too prone to corruption and manipulation by large investors with the leverage to influence the performance of individual and sectors of securities.

Carol L — Jun 13, 2026
Subject: S7-2026-15 Comment From: Carol L Affiliation: Jun. 13, 2026 Carol Lippoli, retired CPA Keeping the requirement for quarterly reporting to the SEC should not be chnaged. Quarterly reporting is essential for timely information to be received and reviewed by the public. Alot of both good and bad things can happen to a corporation in a short period of time. Reducing reporting to twice a year significanlty increases the risk to anyone investing and especially to our retirement accounts as all of these are tied to the markets. It is an important reporting obligation for compaines to keep their invetors informed of their financial postion. Accordingly the reporting requirements should not be changed.
Respectfully
Carol Lippoli

I am appalled that this is even being considered, much less planned to be done. I will be searching to find the motivation for this action. Who is it supposed to serve better? It is obviously not meant to serve “we the people”! As “one of we the people”, I am speaking out to say there is a huge problem now and I have no understanding of the current workings of our government and economic systems that are quickly changing our society into an oligarchal regime and consequently turning the rest of society into masses of poor. This seems to be sowing the seeds for revolution. Please do not make this change. Allow the people to speak, then listen to the voices. You have no right to take away what little we have.
I will be sharing this with as many people as I can to let people know that something is being proposed that will only hurt us, and I question who is projected to win in this scenario???

Charles Goodwin — Jun 13, 2026
Subject: File No. S7-2026-15 From: Charles Goodwin Subject: Comment Letter on Proposed Rescission of Rule 611 (Regulation NMS) and Proposed Rule S7-2026-15 (Semiannual Reporting) To the Securities and Exchange Commission: I am writing as an individual retail investor to provide my feedback on the Commission's recent proposals to rescind Rule 611 (the Order Protection Rule) and to transition public company reporting from a quarterly to a semiannual framework (Rule S7-2026-15). While I support the Commission's goal to modernize aging rules, reduce unnecessary connectivity costs, and adapt to today's highly advanced electronic markets, I strongly oppose the outright elimination of these foundational investor protections. Completely deleting these frameworks introduces market opacity and leaves everyday retail investors exposed. Instead of a wholesale rollback, I urge the Commission to pursue targeted modernization that leverages technology without removing critical baseline safeguards: 1. Modernize Rule 611 Instead of Rescinding It: I agree with the Commission that the 2005 implementation of Rule 611 is outdated for today's high-speed

electronic trades. However, a complete repeal risks harming price discovery and compromising the integrity of the National Best Bid and Offer (NBBO). Rather than deleting the rule, the SEC should modernize it—for example, by introducing a market-share threshold for protected quotes to prevent the artificial proliferation of small, illiquid trading venues while continuing to legally guarantee that retail orders are executed at the best available price. 2. Implement a Tiered Reporting Framework (Rule S7-2026-15): A complete shift to semiannual reporting leaves retail investors in the dark for too long. The SEC should preserve quarterly reporting (Form 10-Q) for large accelerated filers who have the automated corporate infrastructure to produce this data easily. Financial relief and semiannual reporting exemptions should be reserved strictly for small, emerging, and micro-cap businesses where compliance costs genuinely hinder growth. 3. Strengthen Best Execution Backstops: If the Commission scales back the explicit requirements of Rule 611, it must concurrently strengthen and clarify a broker's core duty of best execution. Investors need clear, enforceable, and updated electronic-trading guidelines to ensure that broker-dealers cannot route orders to suboptimal venues for their own financial benefit. Market regulations must evolve alongside algorithmic and electronic trading technology. However, true modernization means upgrading our market architecture to be more efficient, not removing the structural scaffolding that ensures a fair and level playing field for retail investors.

Chisel Monkey — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Chisel Monkey Affiliation: Jun. 13, 2026 Melissa Lahr, Founder, Atlanta GA: for a heavy investor and a business owner this is a terrible idea. While I understand this eliminates considerable overhead for companies who are looking to slim down costs around quarterly fiscal reporting, this is also what holds them accountable. With the rise of AI use within tech, and systemically across many businesses, there is no legitimate reason to eliminate quarterly reporting. In fact, this should be an easier ask for companies to provide with Ai tools automating many forecasting and revenue reporting activities. Quarterly reporting allows transparency for stakeholders and the ability for investors to make smart decisions about where our money is invested, in-line with the speed of the market. Removing half of the opportunity to understand how companies are performing hurts investors and limits small IPO confidence and new investment prospecting. I urge you not to move forward with this move. In a time of global market and financial instability this is NOT the time to throw a new wrench on the machine.

Chris Weller — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Chris Weller Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:

I am writing to object to proposed Rule S7-2026-15 regarding semiannual reporting.

As an individual investor, I believe this proposal would reduce transparency and make the market less fair for ordinary investors. Quarterly reports are one of the few reliable, standardized sources of information that everyday investors can access at the same time as everyone else. Removing or weakening that requirement would likely benefit large institutions, hedge funds, and professional investors who already have access to expensive research, alternative data, private meetings, and sophisticated analysis tools.

For retail investors, six months is a long time to wait for updated financial information. A company's revenue trends, debt levels, margins, cash flow, risks, or business conditions can change significantly in that period. Without quarterly 10-Q reporting, ordinary investors may be forced to make decisions based on incomplete information, rumors, press releases, or management-selected updates rather than consistent SEC filings.

I understand the argument that quarterly reporting can create short-term pressure on companies. However, the solution should not be to reduce the information available to investors. Companies can already choose how they communicate long-term strategy. Investors should not have to give up transparency in order for companies to think long term.

This proposal could also make it harder to compare companies. If some companies continue quarterly reporting while others move to semiannual reporting, investors may face an uneven and confusing disclosure landscape. The companies with the most concerning short-term results may be the ones most likely to reduce reporting frequency, which would make the problem worse.

The SEC's mission includes protecting investors and maintaining fair, orderly, and efficient markets. In my view, this proposal moves in the wrong direction. Less frequent reporting means less accountability, more information gaps, and a greater advantage for sophisticated market participants over ordinary investors.

I respectfully urge the Commission not to adopt Rule S7-2026-15 as proposed. Public companies that benefit from access to public markets should continue providing regular quarterly financial disclosures to the investing public.

Sincerely,

Chris Weller

christopher young — Jun 13, 2026
Subject: S7-2026-15 Comment From: christopher young Affiliation: Jun. 13, 2026 I'm Tyler Young, a Biomed equipment technician specifically in the Dialysis healthcare sector, and day trader of stocks, etfs, options and also a long term investor in the market. The importance of quarterly reports for the retail investors in the market cannot be understated, access to this information is fundamental to the everyday "average joe" looking for a stock to invest their hard earned money in, with the hopes that they will be able to sell that asset in the future for a profit. It may be an investment for their future retirement or they could be a custodian of a account for their kids that they intend to use as a way to give their kids a leg up on their future, whatever the case may be any retail or even institutional investor needs access to this information on a quarterly basis to make the most informed decision possible on the stock they are going to choose to put their money into with the hopes of growth. The average investor working a 40hour plus work week in a time when the disparity between pay and the cost of living has even six figure earners living paycheck to paycheck and the majority of investors are not able to afford fancy and expensive software that pushes them the most up to date news on individual specific companies so they rely on these quarterly filings to make the most informed investment decisions they can possibly make and taking that free information away from the retail investor will impact the ability to make an informed decision that will directly affect the future of their savings. Let's just be honest about the whole situation, because ultimately this will directly damage

the ability of the retail trader to make informed decisions and ensure they make the best decision on their investments, while the institutions will still have all this information available to them because they are literally the banks holding the profits of the companies they are buying stocks in or are in contact with the other institutions that have the software capabilities to run the numbers of any of the companies they wish to buy shares in, while retail will be in the dark. The system that has been in place for decades requiring quarterly reports to be provided is not broken and extending the reports to six month periods will not fix a problem that does not exist. If anything shorten the reports to monthly, but to leave everyone in the dark for six months is absolutely absurd and I can't believe anyone thought this was somehow a good idea to change this rule, unless some lobbying person is lining the pockets of anyone who would agree this is a good idea. Don't fix what isn't broken.

Kind Regards,
Tyler Young

Constance Schneider — Jun 13, 2026
Subject: S7-2026-15 Comment From: Constance Schneider Affiliation: Jun. 13, 2026 My name is Constance Schneider; I am a retired teacher and I rely on my invested savings to pay my bills. I need quarterly reports so I can make wise decisions about my investments before drastic changes can lessen the value of those investments. Longer gaps create an unfair advantage for corporate insiders, "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates, and the savings to companies aren't worth the cost to me and my investments. Please keep the quarterly reporting as it is.
Constance Schneider

David & Sue Lasater — Jun 13, 2026
Subject: S7-2026-15 From: David & Sue Lasater Affiliation: Jun. 13, 2026 Comment Letter to the Securities and Exchange Commission

Re: Maintenance of Quarterly Reporting Requirements (Form 10-Q)

To the Members of the Commission:

I am writing to strongly advocate for the preservation of the current quarterly reporting framework for public companies. As a financial professional holding both CPA and CFA designations, with extensive experience in public accounting—specifically in the preparation and compliance of quarterly financial statements—and as both an institutional and individual investor, I believe reducing the frequency of reporting would be a detrimental step backward for market transparency and investor protection.
Every three months, the dissemination of audited or reviewed financials provides imperative data that drives disciplined investor decision-making. Transitioning to a semi-annual reporting model would obscure the timely visibility required to accurately assess a company's ongoing financial health. A six-month reporting gap creates significant blind spots, leaving investors vulnerable to sudden shifts in performance and market dynamics.
Furthermore, historical precedents like the Enron scandal and other high-profile corporate failures demonstrate that frequent, rigorous disclosure is a vital mechanism for deterring and detecting fraudulent activity. While I am acutely aware of the operational effort and resources required to compile and report financial statements on a quarterly basis, the administrative burden does not outweigh the systemic risks. Reducing reporting requirements introduces an unacceptable risk of increased fraud and eroded market confidence.

Maintaining the quarterly reporting cadence is essential to ensuring the transparency, integrity, and efficiency of our capital markets. I urge the Commission to uphold the current standard.

Sincerely,
Sue Lasater, CPA, CFA

David Cottrell — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Cottrell Affiliation: Jun. 13, 2026 I have been actively involved in the stock market throughout the last 44 years. I very much appreciate and value the quarterly reports of the companies that comprise my 403.B stock portfolio. I respectfully request that quarterly reports remain for those companies that are a part of the various U.S. Stock Exchanges.

David Eriksen — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Eriksen Affiliation: Jun. 13, 2026 I can’t believe the SEC wants to violate the public trust by creating a reporting structure that effectively creates a form of insider trading—a set up that provides an advanced time-leveraged advantage to a minor set of stake holders over the majority. Surely this rigging of the investment structure violates existing law—if not explicitly. If this move sits arguably against the word, if not the spirit of the law, those drawing up and implementing this change in reporting will go to jail.

David Hatton — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Hatton Affiliation: Jun. 13, 2026 Insiders Already have huge advantages in the investment community…. The small decrease in reporting costs will be more than offset by increased fraud and bankruptcies with much greater impact… and increased litigation and court costs.

David Jones — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Jones Affiliation: Jun. 13, 2026 As a private investor, I rely on quarterly statements to help make my investment decisions. Please keep them and not make our lives harder! This rule change will not improve things in any way for anyone. Of than for the well connected insiders.

Thank you
David Jones

David Kingsley — Jun 13, 2026
Subject: S7-2026-15 From: David Kingsley Affiliation: Jun. 13, 2026 Extending the time between Reporting Financials, seems to Imply that Bought Politicians are Sucking Hind Teat on Bribes.
At the VERY LEAST Keep the Reporting on a Quarterly Basis.
Better Still, Decrease the Reporting time to Monthly

David Kueckels — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Kueckels Affiliation: Jun. 13, 2026 While, personally I wouldn't mind the reduction in volatility that this change would likely create, I think the idea of having the public flying blind in terms of having Hard Data for 6 months is a very questionable idea. Especially at this moment in economic history! Investing has become hard enough with the introduction of all the additional derivatives lately. You might want to throttle those Day Options back if you want to make things less volatile!

David Kueckels, Cincinnati Ohio 45208

David Lamp — Jun 13, 2026
Subject: S7-2026-15 From: David Lamp Affiliation: Jun. 13, 2026 Do not change this rule, quarterly

reporting is very important and necessary for average investors. It also cuts down on corruption and theft!

David Lamp
Campbellsport, Wisconsin

David Stroebel — Jun 13, 2026
Subject: Comment on S7-2026-15 From: David Stroebel Affiliation: Jun. 13, 2026 No! I don’t agree with it. Corporations can hide negative/impactful events that can trick investors into investing money thinking the corporation is healthy when it is not. I will pull my money out and put it in real estate

---

David Thompson — Jun 13, 2026
Subject: Comment on S7-2026-15 From: David Thompson Affiliation: Jun. 13, 2026 Having less information about the performance of the companies, literally less transparency, would be bad. It would invite more attempts at fraud and hide potential problems at companies longer. If the companies want to be allowed to sell stock to, in effect, borrow our money, they should continue to be required to tells us how and what they are doing with it quarterly. If they don't want the onerous duty, then let them secure fully private financing and go private.
Thank you, David Thompson

David Tikkanen — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: David Tikkanen Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Full disclosure to all..... You need to make it a quarterly report of full disclosure for all so we all have a fair chance earning money....
The world is so screwed up with the wealth disparity between the haves and have nots...

David Underwood — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Underwood Affiliation: Jun. 13, 2026 Quarterly reporting is necessary to keep a playing field more level for small investors like me. Don’t cave to the mega-rich!

David Vance — Jun 13, 2026
Subject: S7-2026-15 Comment From: David Vance Affiliation: Jun. 13, 2026 As an investor and citizen, a semiannual reporting structure will cloak company financials from the public who needs the quarterly information to make investment decisions. Therefore, the only benefits of this rule change are not in the public interest but corporate. Thus, I strongly oppose the rule change for these reasons: (1) I rely on quarterly information to make decisions, (2) longer gaps create an unfair

advantage for corporate insiders, (3) "optional" doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates, (4) the “savings” to companies are minor compared to the investor’s interest which is paramount.

Thank you,
David Vance

ddfish — Jun 13, 2026
Subject: S7-2026-15 Comment From: ddfish Affiliation: Jun. 13, 2026 Companies still have to keep their books. They still have to brief their boards. The actual savings from skipping a public filing are modest legal and accounting fees, and those savings flow to the company and its executives. The cost of worse information falls on you, the person whose 401(k), IRA, or college fund holds the stock. That's a bad trade for ordinary investors.

A lot can go wrong in half a year. Failed product launches, ballooning debt, lawsuits, vanishing customers. Today the law forces companies to surface that information every quarter. Under the new rule, they can sit on it for six months at a stretch. Plenty of time for insiders to quietly sell their

shares to you (or your ETF) before the bad news tanks the stock.

Debbie — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Debbie Affiliation: Jun. 13, 2026 Debbie Musumeci, retired OTA, Fort Smith AR. Quarterly is better for all. The general population would be left blinded having major companies silently selling ETF before it gets out to the public and we loose our stocks and finds. Financial scandels will happen and you know it will, as proven in 2008 Enron and many others. Quarterly disclosure make it a little harder and the Ability of shister thieves to cook their docs twice a year leaving us out of the loop and the real losers . Ordinary investors are the life blood of stocks and like everything else we don't seem to matter in the long term but you will lose too when there's nothing left. I totally for keeping quarterly reporting.

Debbie Musumeci.

Debbie Del Signore — Jun 13, 2026
Subject: S7-2026-15 Comment From: Debbie Del Signore Affiliation: Jun. 13, 2026 I have been actively involved in the stock market throughout the last 44 years. I very much appreciate and value the quarterly reports of the companies that comprise my stock portfolio. I respectfully request that quarterly reports remain for those companies that are a part of the various U.S. Stock Exchanges.

Respectfully,
D. DelSignore

Deborah Alexander-Gioello — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Deborah Alexander-Gioello Affiliation: Jun. 13, 2026 Deborah Alexander-Gioello (retired teacher/entrepreneur), Winston-Salem North Carolina We should continue quarterly reporting, as it provides more transparency and information pertinent to investors' decision-making. Returning to semi-annual reporting , as occurred 1955-1970, would have an even more detrimental impact for ordinary, everyday investors today, than ocurred during that period. Now, many more Americans are exposed to the risks of investing, personally and by large-scale effects on national and global economic stability. Lack of transparency and information, inherent in semi-annual reporting, would most likely lead to losses on a scale massive enough to cause

significantly negative impact on our economy. We need to retain quarterly reporting for these reasons.

Deborah Carley — Jun 13, 2026
Subject: S7-2026-15 Comment From: Deborah Carley Affiliation: Jun. 13, 2026 Keep this information quarterly and do not leave hard-working Americans
In the dark about their own accounts and assets. This can lead to full-scale corruption on the American people.
I am a retired American citizen.

Deborah Coffin — Jun 13, 2026

Quarterly reporting is essential fur investors, large and small, to maintain knowledge and control of your investments. It is also the best way to have fiscal accountability.

Diane Smith

Diann Suttle — Jun 13, 2026
Subject: S7-2026-15 From: Diann Suttle Affiliation: Jun. 13, 2026 Quarterly reporting needs to stay before this administration try’s to cheat with falsehoods. There isn’t a ‘real’ reason for this to change!!!

Diann Yambor — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Diann Yambor Affiliation: Jun. 13, 2026 Keep as is! Do not change!

Diann yambor

Dianne Bryant — Jun 13, 2026
Subject: S7-2026-15 Comment From: Dianne Bryant Affiliation: Jun. 13, 2026 It is a wrong intention of the SEC to reduce the obligation of these people, these financial institutions, they must sign and review their responsibilities to their clients in each quarter of the year.
Money has too great a power over people. That is why these safeguards were instituted! The people who are doing this work may have good intentions going in to this work. But life is tough, temptation is a real problem. All of these people are largely good people. But every human is susceptible to temptation at one point or another.

Sincerely,
Dianne Bryant

Dianne Lindeman — Jun 13, 2026
Subject: S7-2026-15 Comment From: Dianne Lindeman Affiliation: Jun. 13, 2026 Former CFO now retired. What a terrible idea to move from quarterly reporting to semi annual. There are very few pensions given these days. All investment risk is now placed on employees many of whom have very little experience and need as much information as possible to protect their investments. Information is key for decision making. Don't reduce it. It would not be a fair deal to those whose money is at risk.

Edkotras — Jun 13, 2026
Subject: Quarterly Reporting From: Edkotras Affiliation: Jun. 13, 2026 Sirs/Mams,
I'm a retired person who is an active investor.
I rely on those quarterly reports to make my decisions.
Going backwards to the 50's type of reporting is asinine.
I started investing in the late 60's and have watched the investment industry improve.
When I started the industry was definitely tiled away from the little investor.
Today the little guy/gal has a better chance of succeeding in the investment industry.
People have been encouraged to invest, especially in retirement programs.
Now the big boys/girls want to screw it up so they can make more money.
Government should keep the playing field level and not tilt it to favor a group.
Sincerely
Ed Kotras

Elizabeth Henyey — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Elizabeth Henyey Affiliation: Jun. 13, 2026 My name is Elizabeth Henyey. I live in Seattle. My husband and I have worked for years to build up our savings so we could invest it and live comfortably in our retirement. Reporting quarterly will historically reduce our earnings. I feel this is another way for the government to lower the income for the middle class. The 1% will not notice it. So what if they lose a few thousand? They have more than enough and won't notice a drop. For the middle class it is a huge percentage of their income. This is a very bad idea and I urge you to think again. With computers it is no more work to submit quarterly. Saying it is too much work, if that is the argument, is very disingenuous. It has worked for 75 years. I am against eliminating quarterly reporting.

Elizabeth Henyey

Elizabeth Jennings — Jun 13, 2026
Subject: S7-2026-15 From: Elizabeth Jennings Affiliation: Jun. 13, 2026 We have been relying on certified filings of 8-Ks four times each year since this regulation was put into place after the Enron scandal. Why would you reduce this to twice a year? Executive signoffs quarterly hold those in control accountable. Protect the savings of hardworking Americans and save quarterly reporting.

Ellen Weber — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Ellen Weber Affiliation: Jun. 13, 2026 I oppose anything less than quarterly reporting.
I will be watching gir the names of all responders and hiw s ach one votes. I will vote accordingly. And I always vote. I will tell everyone I see about this terrible idea.

Ellie Sutton — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Ellie Sutton Affiliation: Jun. 13, 2026 Why on earth would you want to send us back to the dark ages??? Quarterly reporting is working leave it ALONE!!!

Ely — Jun 13, 2026
Subject: S7-2026-15 Comment From: Ely Affiliation: Jun. 13, 2026 Elizabeth - Caregiver

I need access to this information to protect my investments. I don't want to be in the dark about said investments. I would rather sell my stock and not invest in these companies.

Any loss to me at this age is unrecoverable and not worth the small savings for a corporation.

Stop helping the rich while hurting the poor. Keep the reporting as is - quarterly please.

Emily Baker — Jun 13, 2026
Subject: S7-2026-15 Comment From: Emily Baker Affiliation: Jun. 13, 2026 Sounds like fraud in the largest sense. What crook thought of this…..or is responsible for even bringing this “to the floor”?? The SEC is just like our government / crooked as HEll!!!

Eric Clarke — Jun 13, 2026
Subject: S7-2026-15 Comment From: Eric Clarke Affiliation: Jun. 13, 2026 Dear SEC,

I’m not privy to all of the rationale promoting the idea of scrapping quarterly reporting. As an individual investor however my faith in the markets begins to plummet the moment I hear forces are at work to provide less information, not more about what is influencing my investment’s performance, potential and solvency. I’m thoroughly skeptical that the net effects proponents tout are solely in the net efficiencies and cost savings.

To summarize, I oppose this proposed rule change.

Eric S. Clarke
Retired electrical engineer

Park Ridge, Illinois

Eric Julstrom — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Eric Julstrom Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Investors deserve to know how their companies are performing. Shares are ownership, and owners deserve to know if their companies are well run! Elimination of quarterly reporting is a bad idea, eliminates information markets and owners deserve, and clearly advances the culture of cronyism and lack of accountability that is the hallmark of this administration. We depend on the SEC stand up for owners and fair markets!

Eric Marshall — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Eric Marshall Affiliation: Jun. 13, 2026 Please keep quarterly reports we need transparency.

Eric Vincent — Jun 13, 2026
Subject: S7-2026-15 Comment From: Eric Vincent Affiliation: Jun. 13, 2026 I like my quarterly reports. I don't want to have follow it that close. The only people I can see that it would be a advantage to would be financial advisors

Erin Johnson — Jun 13, 2026
Subject: S7-2026-15 Comment From: Erin Johnson Affiliation: Jun. 13, 2026 Quarterly reporting is absolutely necessary for investors.

Erin Smith — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Erin Smith Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission: As a private investor, I value the information that is required to be reported by companies on earnings and quarterly returns, management decisions, etc. This information helps me make educated decisions about where to invest my money, encourages

transparency in the market, and encourages honest competuition between companies who must strive to continue to make a better product. That is the heart of capitalism. Taking this in formation away from the people makes investing harder for the general public, and makes it easier for companies to lie and cheat about their company profiles. It's bad for our economy and bad for America.

Estela Minaya — Jun 13, 2026
Subject: comment on S7-2026-15 - keep quarterly reporting From: Estela Minaya Affiliation: Jun. 13, 2026 Dear SEC Staff,
Please vote against the proposed rule.

Esther Forrester — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Esther Forrester Affiliation: Jun. 13, 2026 Do not change the reporting frequency from quarterly reporting to semi-anual reporting! Respectfully, Esther Forrester; retired; Oregon; This matters because people work hard for the money, deny themselves in order to save, expect it to grow for their retirement years, and it hits them hard if this change to semi-anual reporting would rob them of what they've worked so hard to set aside....besides, history has proven that it's not a good idea. Other countries using semi-anual reporting leave retirees with much less value as our own '55 to '70's experience showed. Thank you for listening!

Ethan Petree — Jun 13, 2026
Subject: S7-2026-15 Comment From: Ethan Petree Affiliation: Jun. 13, 2026 Dear SEC staff, Three months makes more sense and more transparency is better.

Eve Mathews — Jun 13, 2026
Subject: S7-2026-15 From: Eve Mathews Affiliation: Jun. 13, 2026 Companies need to maintain all transparency guidelines and not be allowed ways to defraud their investors and employees for executive financial gain. We are seeing a move to allowing unfettered company malfeasance which negatively impacts our economy. With the loss of pensions and move to the stock market for retirement accounts that performance directly impacts people who are often not directly choosing to invest in a specific company. And that doesn’t address potential job loss for employees of these companies when poor performance causes layoffs or downsizing.

Keep the quarterly reporting!!

E. Mathews, Vice President, Atlanta, Georgia

Evelyn Silverman — Jun 13, 2026
Subject: S7-2026-15 Comment From: Evelyn Silverman Affiliation: Jun. 13, 2026 This is a flagrant invitation to commit fraud and keep vital information away from the ABSOLUTE MAJORITY of individual investors. It could easily cause millions of 'small' individual investors to lose their life savings. It is an abomination and violates every common principal of keeping investors informed. Quite possibly the worst proposal I've ever seen since the early days of no regulatory safeguards for individual investors, especially those who do not have access to investment advisory services. The SEC was created because of the 1929 stock market crash, and is supposed to oversee the nation's securities industries - it is responsible for protecting investors, maintaining fair and orderly markets, and facilitating capital formation.
Evelyn Silverman

FLO SAMUELS — Jun 13, 2026
Subject: S7-2026-15 From: FLO SAMUELS Affiliation: Jun. 13, 2026 I am a retired woman whose work history included government and private industry budget and programming development and analysis. I do not own stock because I have seen too many people lose their shirts when markets fell. I also am disgusted at how "shareholders" have used their power to ravage the environment, destroy the economy for the common laborer and eliminate upward mobility for many college graduates.

One method of destruction is fraud. While current rules don't eliminate fraud, they help keep it under control.

The ONLY reason I can see for the proposed SEC change is SEC members have seen how Trump and his tribe have ripped off the American people and they want the same ability to do their own rip-off. This proposed change is just one more knife in Americans' backs and should not be allowed.

Garry Elliott — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Garry Elliott Affiliation: Jun. 13, 2026 Garry Elliott, financial analyst (GG-0501-13) I am opposed to the idea of removing the requirement for quarterly reporting. In today's environment, reporting is less burdensome on companies and given the amount of fraud that has been uncovered in the past several years, full transparency to investors and taxpayers must

be a priority. As an investor, quarterly earnings reports are vital to giving me tools to evaluate the company's financial position and determine my expectations and estimate what I think is a fair price. Public companies have a fiduciary responsibility to their investors and any actions that make it more difficult for investors to evaluate whether they are meeting that responsibility are wrong and should not be tolerated. I expect that the SEC will not move forward with any rule to remove the quarterly reporting requirements, and will instead support transparency and act in the best interests of investors and taxpayers.

Thank you
Garry Elliott

Garry Iman — Jun 13, 2026
Subject: S7-2026-15 Comment From: Garry Iman Affiliation: Jun. 13, 2026 Dear Rule Maker.

I am writing to express my strong dissatisfaction with your proposed investment reporting procedure. Exploiting smaller investors is unsustainable, and we will pursue other opportunities if these conditions persist.

It is clear that larger entities already hold significant advantages; however, these recent actions feel like a direct theft of our resources. Please reconsider your approach to ensure a fair partnership moving forward.

Regards,

Garry

Garydisrael — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Garydisrael Affiliation: Jun. 13, 2026 As a retired auditor who participated in Sarbanes-Oxley (SOX) implementations since its inception, I find it difficult to reconcile a move to semiannual reporting with the transparency goals that led to SOX in the first place.

SOX was enacted to restore investor confidence through timely and reliable disclosure, and demonstrable internal controls over reporting in the wake of the disastrous Enron and Worldcom scandals. While companies would still be required to maintain SOX controls and certifications, reducing mandatory reporting from four times a year to two times a year means investors receive less timely information and have fewer opportunities to evaluate a company's performance and risks. This affects most citizens through their market investment - both personal portfolios and retirement plans.

Thank you

Subject: S7-2026-15 Comment From: ginger duran Affiliation: Jun. 13, 2026 The current quarterly filing time should be preserved.. It promotes transpareny for the investor and levels the playng field between large and small companies. There is no pressing reason to change what has been working well for decades.

Ginny Moore — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Ginny Moore Affiliation: Jun. 13, 2026 Dear Sir, Madam,

It is my opinion that the past gives clues to the future. As a small investor who at 71 and my husband at 75, both still working, who have invested, saved, lost, made great decisions, bad decisions, and plan to fully retire within a year or 2, I believe quarterly reporting are a must! Personally, going through a situation with a business partner who began to hide and construe numbers and spent almost 2 million dollars of others people money by hiding it with slow or non-existent reporting, I can see the potential for a semi-annual reporting on a huge scale could occur. Investors can't go 6 months without knowing what is happening with the company, the growth, the challenges, leadership, etc.

Since the past has shown the facts as well as other countries who are currently using the semi-annual reporting, I as an American can't loose 1/3-1/2 of my investments now that I am reaching a time to slow down and focus my energies elsewhere. Accountability is of utmost importance in every endeavor, what you expect you inspect. If we leave anything for 6 months without knowing no inspection, a lot can and will go wrong! I believe your job is to find ways for the smaller companies to have paths to report without huge burdens each quarter while making adjustments for those in growth modes or cycles. I am not smart enough to offer anything in that arena, but there are plenty of people smart enough to plan for their companies growth and be compliant. As an American taxpayer, we all do that every day and year and the companies we invest in should do this as well. Steady on! We all depend upon you!

Gordon Spath — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Gordon Spath Affiliation: Jun. 13, 2026 Absolutely not
At least quarterly reports
Even monthly as hedge fund managers and stock traders manipulate funds up and down, buying short

It will lead to margins being used more
And zero disclosure after the fact
With no regard to an average investor who actually works another job not doing research to police those who they should be able to trust

Gregory Barlow — Jun 13, 2026
Subject: S7-2026-15 From: Gregory Barlow Affiliation: Jun. 13, 2026 In a world of reality that is held to a higher standard than, apparently the upper echelon of the corporate universe appears to be, it makes more than common sense to demand a brighter light be directed upon the extremely monumental appeal to take advantage of the American Economy every chance it's available, simply to avoid unnecessary criminal inducements to do so.
Corporate criminal behaviour cannot be encouraged by leaving any gate wide open to do so by our own regulatory functions and the officers in government that have taken Oaths to protect this country from enemies within and without our borders, as federal officers are responsible to protect this Nation's financial, physical welfare by requiring responsibility from corporateering at Taxpayer Expense.
To do so can only be regarded by America as intentional felony neglect by those trusted to defend America, especially at our backdoor in the dark also, because that is where the opportunity for bribery of all sorts is conducted against the integrity and honor of this country and every working man or woman, who also casts votes at the ballot box, can lose trust in our government as the greatest Steward of Freedom and Liberty we can rely on.
Please be responsible to reduce and/or eliminate chances for taking advantages whenever possible because, America's prosperity is at highest risk, where CEO's already earn tens and sometimes hundreds of times more than their employees before they run for the shadows to avoid Justice, scrambling to locations that shelter such criminality with their Golden Parachutes.
Don't place yourselves in jeopardy for what are pittances compared to the treasures stolen from your own American Brothers and Sister Americans. Close the loopholes because you are our trusted defense.

Gregory Myers — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Gregory Myers Affiliation: Jun. 13, 2026 Gregory Myers, Retired Airline Pilot and Engineer, Northern California.
Why would anyone consider a move to semiannual reporting when the history of semiannual reporting versus quarterly reporting shows such a difference in stock valuations, both in the past and performance currently among countries that require it. When one sees the benefits of legally forced quarterly transparency, especially when a longterm retrograde "experiment" was conducted, it

makes sense not to give an inch to those who have determined that it is in their best interest to hide financial data. Fraud is more concealable over longer timelines or a coarser reporting net, so why make it easier for them? They certainly have the conputing power nowadays to make all the data necessary collectable & collateable for their investors to see if they are honest and proud of their operations.

Home — Jun 13, 2026
Subject: Comment re: SEC File No. S7-2026-15 From: Home Affiliation: Jun. 13, 2026 Respected Commissioners,

I strongly oppose the reduction of financial reporting to semi-annual reports.

I am an individual investor who trades regularly and depend largely on the data supplied by the companies I am researching. Six month old data is insufficient for me to evaluate the current health and future trajectory of any company, large or small. There are too many financial and market variables, each of which change regularly, that I depend on. Timely, complete and accurate, reviewed and certified, information is required to keep and grow my retirement portfolio.

I believe the opaqueness that this potential change allows will be far more damaging to all investors than to the public companies who are requesting it.

Of course, one of the goals of all companies is to drive down the costs of doing business. However, companies do not grow by reducing cost, they grow by investing wisely. And like private investors, companies cannot make wise investments if their information is old and inaccurate. Would an OEM buy a new machine if their quote for said machine is six months old? What would happen if both the design specifications and the price of the machine changed in the six months since it was quoted? This potential SEC change in quarterly reporting puts investors in the same position.

Please do not pass this rule change.
Thank you.

Home Email — Jun 13, 2026
Subject: S7-2026-15 Comment From: Home Email Affiliation: Jun. 13, 2026 It's more difficult to report quarterly but it keeps transparent. Put curbs after reporting to avoid large sell offs or gains. Quarterly reporting should never be gotten rid of.

Jan Sockness — Jun 13, 2026
Subject: S7-2026-15 Comment From: Jan Sockness Affiliation: Jun. 13, 2026 Jan Sockness, Retired. I depend on accurate, transparent, and timely information from companies to make informed decisions on my investments. Six months is too long a gap period not to know details and introduces too much uncertainty. Less frequent disclosures will lead to less transparency because companies could withhold important information for up to six months. Quarterly reports give investors and regulators four checkpoints each year to evaluate company performance. Moving to semiannual filings would cut that visibility in half. With fewer data points, it becomes harder to spot early warning signs, like slowing revenue growth, ballooning debt, or rising costs. Individual investors could be left at a disadvantage, relying more on rumors, speculation, or expensive research services between official updates. A weak quarter buried inside a six-month report could lead to sudden, severe stock price corrections that might have been softened if revealed earlier. Longer gaps create more room for accounting irregularities, aggressive revenue recognition, or off-balance-sheet liabilities to go unnoticed. By the time problems are disclosed in a semiannual report, damage may already be done, and investor losses could be much larger. Optional six month reporting doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates. Three months won't make any difference to long term strategy, the reason being given for the change. Executive pay is based on short term strategy and earnings. The savings to companies are minimal and not worth the cost of not receiving timely information.

Jane Wilson — Jun 13, 2026
Subject: S7-2026-15 From: Jane Wilson Affiliation: Jun. 13, 2026 My name is Jane G. Wilson from Bowling Green. KY. I worked at Merrill Lynch as a financial advisor for 6 years. Quarterly financial reports were important for advisors, clients, and the companies in which we invested. There was a period of time from around 1955 to 1970 where financial reporting was cut to twice a year. The returns on the stock market were lackluster compared to the results seen since the quarterly mandate was established. For what reason is the SEC looking to change this requirement? Who exactly would benefit from this change? Corporations and their leaders should be accountable to their shareholders. Please keep the requirement for quarterly financial statements. Thank you.

Janet Garabedian — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Janet Garabedian Affiliation: Jun. 13, 2026 My husband and I are retired and have worked full time 45 years full time and managed to save money for retirement. The last two years have already taken a large chunk of savings away because of the rising costs of everything. We can't afford to lose any more. The change to semi annual reporting will make it too easy for companies to get away basically with stealing. Trump tax cuts for the corporations have been a boon for their profits. Please fight for the rest of us who need to be able to trust the government to work for the many, not the few. We need your help, they don't. Thank you.

Janet Garabedian

Janet Groth — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Janet Groth Affiliation: Jun. 13, 2026 I believe that quarterly reporting should continue. Twice a year reporting has been tried before, and it did not work, costing investors a large percentage of their portfolio. I am a retired teacher in far West Texas and have built up enough money for my retirement. If my portfolio declines significantly, either my children would have to take care of me financially in my old age or, as a woman over 70 years old, a septuagenarian, I would have to return to work. The twice a year policy is dangerous and unnecessary. Please do not make the change.

This policy changes, particularly frightening, given the current state of the economy and rising inflation, which is already cutting into my financial well-being

Janet Groth
Fort Stockton, Texas

Janet Laufenberg — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Janet Laufenberg Affiliation: Jun. 13, 2026 I am 74 years old and I am still working as a psychotherapist in private practice. I am strongly opposed to a regression like the one suggested by our current president- to return to a semi annual reporting vs our current quarterly reporting. In the past this has had very negative results for those of us depending on our savings which took a huge loss between 1955 and 1970. Please do not approve this change. I plan to retire soon and need my modest savings to provide for myself and to help my family who are struggling financially.
My name is Janet Laufenberg and I currently reside in Missoula Montana.

Jean Bigley — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Jean Bigley Affiliation: Jun. 13, 2026 As a retiree, I depend on my invested asets to protect me during emergencies - and possibly through 22% cuts in Social Security, not to mention potential Medicaid cuts.

Sounds like a decent precaution? Maybe not, if business' quarterly financial reporting is reduced to semi-annual reporting. The countries that currently do this have lost a lot of transparency - and a LOT of value of their stocks, compared to the US.

The US experimented with semi-annual reporting from 1955 to 1978, when they reverted to requiring quarterly reporting. During the experiment, stocks "underperformed" compared to the before and after periods.

Please don't play around with my retirement protection, not with your own, not with your children's. Companies had no problem reporting quarterly from the mid-1800s till 1955, and from 1978 til now. Any complaints from businesses are suspect in this day of no integrity.

Thank you in advance for cancelling this initiative -
Jean Bigley, Retired

Subject: S7-2026-15 Comment From: Jessica Blackburn Affiliation: Jun. 13, 2026 As an auditor and just as a not completely corrupt and ****ty person, hiding information is never the way to go. One way or another the money trail is revealed. Keep releasing quarterly reports and stop being shadey, big boy.

Jessica Burlingame — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Jessica Burlingame Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Do not reduce transparency for publicly traded companies. The current relaxing of the rules for entry into the market is already very alarming, investors do not need to lose any more insight into the performance of the companies they are putting their money in.

Jessica Cremer — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Jessica Cremer Affiliation: Jun. 13, 2026 Jessica Cremer,

Chemist, in Ohio. Quarterly reporting of critical data allows for consistent monitoring of long-term effect materials. When there is constant fluxuation in a data set, that time point (quarterly) will show the meaningful movement and allow for appropriate adjustments. This gives individuals both the big picture and a snapshot of data. If switched to every 6 months, notification may be too late to adjust without major consequences.
Jessica Cremer

Jessica Green Salinas American Montessori Society — Jun 13, 2026
Subject: File No. S7-2026-15 From: Jessica Green Salinas I directed, administered, and taught at a 61-student daycare from Reagan to Trump. Investing allowed me to retire, because capitalism as far as early childhood education goes, didn't. So the information playing field should be fair and equal. Can this be proved before we change the rules?

jillian minarich — Jun 13, 2026
Subject: Comment on S7-2026-15 From: jillian minarich Affiliation: Jun. 13, 2026 My name is Jillian Minarich. I work at The Center for Contemplative Science and Conpassion-based Ethics in Atlanta, GA. I was a classroom teacher for 18 years before that. I have worked hard to build my retirement. The proposal to let every public company stop reporting its results each quarter and disclose just twice a year is irresponsible and damaging to the American economy. We tried this once, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of your life savings. I have parents I need to support, children I need to support, and as an American I have a right to be able to do that. Damaging my life savings at the whim of a dementia-ridden man is anti-American.

In Peace,

Jillian Minarich

Jim Branch — Jun 13, 2026
Subject: S7-2026-15 Comment From: Jim Branch Affiliation: Jun. 13, 2026 The SEC jas already sanctioned the Nasdaq's capitulation to Elon Musks Space X fantasy so 1/4 reporting is more important than ever. necessary.

Joan Magnuson — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Joan Magnuson Affiliation: Jun. 13, 2026 I am asking the SEC to make sure that financial institutions keep reporting to investors on a quarterly basis. As we know, reporting on a semiannual basis drives earnings down for investors. I am sure it benefits the financial institutions, as corporations and the wealthy are all this administration cares about. My husband and I are retired and have a substantial amount in investments to last us for the remainder of our lives and cover expenses that will surely come up. If we see a substantial drop in those investments due to the proposed lackadaisical reporting (along with the Republican plan to reduce or eliminate Social Security and Medicare), our standard of living will decline along with the funds we worked all our lives for. This is another self-serving move proposed by the Heritage Foundation and the sycophants in this administration. For once, think of the people whose interests you are supposed to be upholding. John Donovan — Jun 13, 2026
Subject: Comment on S7-2026-15 From: John Donovan Affiliation: Jun. 13, 2026 Please don’t lower the requirements for reporting financial gains and losses. Investors, employees and the general public need this information to ensure financial stability and health. As a retired investor I don’t have the luxury of sequence of returns risk. “There’s a concept called sequence of returns risk, and it’s the single most underappreciated threat to a retirement. Here’s the idea: When you’re still working and adding money, the order of your returns barely matters. A bad year means you’re buying cheap. But once you stop adding and start withdrawing, the order becomes everything. A steep drop in the first few years of retirement, while you’re pulling money out to live on, can permanently cripple a portfolio even after the market recovers.”
John Donovan, Retired

John S Miller — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: John S Miller Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
I am a former public company CFO (Workiva, NYSE:WK). Semi-annual reporting is a bad idea for three related reasons.
1. Quarterly reporting is not a burden. Public companies already report monthly internally. The infrastructure for quarterly reporting is no different than for semi-annual reporting. Reporting externally on a quarterly basis is a trivial difference in the amount of work.
2. Increased opportunities for insider trading. Semi-annual reporting will provide insiders with material non-public information for a longer period of time, resulting in more risk of insider trading.
3. More volatility. Reduced frequency of reporting will result in more surprises, causing more volatility of stock prices. Higher stock price volatility makes it harder to price new issues of equities. When the Vix is high (>20), new issues slow down/stop. Keeping the capital markets open to new issues should be a key responsibility of government regulators.

John Tyler — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: John Tyler Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
We are tired of corporations screwing over the working class and all the corruption in DC. Politicians are obviously doing insider trading and now you want to further obfuscate information for working class people to invest wisely? If our votes no longer matter and government is not beholden to the population, I worry it will be pitchforks in the streets once this market collapses. It's just a matter of time when you let the foxes run the hen house.

Subject: Quarterly Filings From: jonathan ortgiesen Affiliation: Jun. 13, 2026 Jonathan Ortgiesen
I'm an operator for a local utility.

The quarterly filings currently in place are already lacking in disclosure, a lot of bad can happen in 3 months much less 6 month period! Insider trading will never go away completely, I understand this but your telling me that doubling that time to file is going to HELP the fraud and abuse of power? Please don't do this and keep things at quarterly.

If you feel you must make a change, do something that will loosen the hold the companies have on information.

Jonathan Wessel — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Jonathan Wessel Affiliation: Jun. 13, 2026 This change cannot be allowed. If anything, there should be an increase in how much and how often publicly traded companies must provide full performance and financial disclosures. For that matter, stop allowing private companies to cheat the system by leveraging EBITDA that’s so easy to manipulate to lure in buyers. Do the right thing, more scrutiny and disclosure, not less.

Jonathan Wessel
Regulatory Compliance Manager

Subject: S7-2026-15 Comment From: Josean Terrón Affiliation: Jun. 13, 2026 No need for secrecy periods. It's our money not theirs. They are just safekeeping. A gard has no possession or ownership of what they guarding. The owner should always know where his possession is!!!!

Joseph Bennet — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Joseph Bennet Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
The ONLY people that benefit from this are the already rich and powerful. The retail investor will be completely in the dark. Additionally, you KNOW (from empirical data) that the negative volatility is exaggerated with negative reports after six months and very MODEST positive response to "good" news every 6 months.
This proposed change has NOTHING but pain and suffering for the retail investor. You should be ashamed of yourself.
Joseph Bennet
Texas.

Joseph NewYork — Jun 13, 2026
Subject: S7-2026-15 Comment From: Joseph NewYork Affiliation: Jun. 13, 2026 The retail investor should have access to monthly detailed financial reports. Quarterly reports are the minimum timeframe investors require. Do Not Change the Current Reporting.
Thank you.

Juan Colon — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Juan Colon Affiliation: Jun. 13, 2026 Juan A. Colon, Retired Federal Government, Civilian industry and Military Employee, Austin TX. After decades of trying to build enough of a nest egg to survive the political wind shifts on our hard earned funds, It appears that someone is trying to take us back to the bad old days of corporate secrecy and wipe out our savings. Please reconsider the effect of this Quarterly Reporting policy change on the small investors. Individually we may not mean much to this administration, but collectively we are a significant portion of the investment market and we depend on corporate transparency to protect our assets. As a group we vote to protect our savings! It is very important for your political, and our physical, survival that you reconsider keeping Quarterly corporate reporting.
Thank you for your attention to this matter.

Juan R. Reyes None — Jun 13, 2026
Subject: File No. S7-2026-15 From: Juan R. Reyes To let companies report every 6 months or on a semi-annual manner is a very unfair and corrupt way to suppress information from investors that would leave the retail investor holding a bag after the insiders have got rid of their worthless shares.

Julia Brisbane — Jun 13, 2026

Subject: S7-2026-15 Comment From: Julia Brisbane Affiliation: Jun. 13, 2026 There should be more accountability and transparency instead of opaqueness. It’s time to be open, honest and forthright to not erode people’s trust. That priceless “commodity” when abused will take decades to recover from. From Citizens United to dark money in corporations and politics the losing part of the equation are the people. Let’s get back to standing up what is right and not create an opportunity for abuse. I question why not the opposite and provide monthly reports. That provides more transparency and would better impact ratings and financial stability.

Julia Nichols — Jun 13, 2026
Subject: S7-2026-15 From: Julia Nichols Affiliation: Jun. 13, 2026 Dear Sir or Madame,

The rule concerning corporate reporting four times a year must continue. It is the only way to ensure corporate accountability. Otherwise, CEOs are free to lie with impunity about their profits and losses. The American people deserve honesty.

---

Julie Kennedy — Jun 13, 2026
Subject: S7-2026-15 From: Julie Kennedy Affiliation: Jun. 13, 2026 Julie A Kennedy, Esq. Attorney Brick, New Jersey Quarterly reporting is imperative to allow people to make an informed decision. Rolling these requirenents back will only harm the American people. Just like gutting all of the programs, foreign and domestic, that are supposed to promote the general welfare of the citizens of the United States of America. Corporate responsibility is nil and without this requirement what would stop a corporation from enticing unsuspecting people from putting their hard earned money into a failing overvalued corporation. The timing is extremely suspect given all of the changes allowed for investors in the space x ipo. Frankly with his trillions now no amount of money charged against that CEO would ever matter, but this removal of a certification requirement gives carte Blanche for any unscrupulous CEO to dupe shareholders and prospective shareholders with zero ramifications and no accountability. It's clear that that's the whole point for rolling back this rule. The role of government and the purpose of this

government in particular is to establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings
of liberty to ourselves and our posterity. Instead, there is greed and corruption on gross display. It seems like we're at the end of the game of monopoly and the people with the most are putting the hotels up so the people who are just hoping to make it
to go, unlucky enough to land anywhere but a free space, will be required to mortgage it all. The truly disgusting thing is that all of these companies have gotten rich off the tax cuts, grants, and public contracts afforded them by taxpayer funds and the
present government has the unmitigated gall to praise them for their hard work and turn around and call social security an entitlement program, somehow forgetting that the American people have been paying the taxes and paying into Social Security while corporations
get tax credits, and bail outs. Keep the quarterly reporting so that the American people can make an informed decision about their investments without being duped by unscrupulous CEOs and MNCs.

Yahoo Mail: Search, Organize, Conquer

Julie Siniard — Jun 13, 2026
Subject: S7-2026-15 Comment From: Julie Siniard Affiliation: Jun. 13, 2026 Why shouldn't the public have information to make important decisions about our finances. As an Independent voter, this administration is quickly breaking apart the communication between government agencies and the American people. Without quarterly information and up-to-date checks & balances, this administration will commit fraud and make illegal decisions. Actually, both republicans and democrats can't be trusted. You have given Congress the inside track and most have taken advantage of that inside trading. There are so many things bleeding the American taxpayers dry. The student loan debacle, taxing the little guys out of their homes, the high cost of living and now talking about changing social security and Medicare for older Americans is leading to a huge sense of unrest. Don't do something that will add the SEC to the list of untrustworthy government agencies. The SEC is supposed to be an ethical agency, don't do anything to damage the nations trust. This seemingly small change will cause way too much damage.

Julie Wasmer — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Julie Wasmer Affiliation: Jun. 13, 2026 Social security doesn't cut it financially, so retirement survival is tied up in the markets. Quarterly reporting seems sad enough when you see a bite out of your income. Quarterly reporting allows for more confidence in using the market as a financial retirement tool instead of real estate or other hard assets. My lack of confidence in the market means I want my money out of the game. The. Game has been working well enough to hold my attention but all the changes point to get your money and run. Moody's is already impacting opportunities for borrowing and investment. More oversight not less! Quit triple rigging the system against the many and mighty small investors if not we might just invest in South Korea instead.

Karen Gervasoni — Jun 13, 2026
Subject: S7-2026-15 From: Karen Gervasoni Affiliation: Jun. 13, 2026 After Enron, the law forced CEOs to personally sign their financials four times a year, with prison on the line for signing a lie. Cutting that in half by eliminating quarterly reporting will result in fewer signatures and less accountability. As a retired actuary, who was required to sign and certify every reserve filing I produced, I can attest to the fact that putting my name on a document under penalty had a sobering effect on my work. I encourage you to NOT DECREASE REPORTING REQUIREMENTS that protect regular Americans as investors and hold corporate top management insiders responsible.

Karen Green — Jun 13, 2026
Subject: S7-2026-15 Comment From: Karen Green Affiliation: Jun. 13, 2026 It has come to my attention that a transition from quarterly to semi-annual reporting for our retirement funds is being considered or implemented. I feel it is imperative to voice strong concerns regarding this proposed change.

Reducing the frequency of these vital financial updates from every three months to every six months significantly diminishes transparency and oversight. Quarterly reports provide essential, timely insights into the performance, allocation, and overall health of our investments. This regular visibility is absolutely critical for maintaining accountability and enabling beneficiaries to stay informed and promptly identify any potential discrepancies or issues that might arise.
