Moving to a semi-annual reporting schedule inherently widens the window during which substantial decisions or reallocations concerning these funds could occur without immediate scrutiny. This extended period between official updates could inadvertently create an environment conducive to less immediate oversight, potentially allowing for the diversion of funds for purposes not directly aligned with our retirement interests or even enabling mismanagement that goes undetected for longer periods. This poses a considerable risk to the long-term security and integrity of our hard-earned retirement savings.

Therefore, I strongly urge for the continuation of quarterly reporting. Maintaining this level of consistent transparency is paramount to ensuring the diligent and trustworthy stewardship of our retirement funds, and it is crucial for upholding the confidence and trust placed in those responsible for their management. Our financial future depends on robust and timely access to information regarding these critical assets.

Subject: My view on Rule S7-2026-15 From: Karen Merrills Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
The only reason to deny average investors access to the same information made avaliable to CEOs and insiders is to rob them blind. Anyone who would consider this should be ashamed of themselves.

Karen Petrillo — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Karen Petrillo Affiliation: Jun. 13, 2026 Karen Petrillo
Retired
Connecticut
With the majority of working Americans trying to bolster their retirement benefits by investing in the market as Social Security's funds are running low, I think continued quarterly reporting is very important for transparency for investors. If companies want to build equity by offering shares to regular working class investors, there must be accountability and transparency quarterly to keep companies focused on their shareholders return on investment. Thank you for your time.

Kathy Crumpler — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kathy Crumpler Affiliation: Jun. 13, 2026 I am writing in FAVOR of keeping quarterly reporting vs. 2x a year reporting for companies. I say this as a 66 year old retired person who is now living on social security and stock investments. Comparing our current system of quarterly reporting to the semi annual reporting in the 50s, 60s and 70s reveals that the current systems demands greater transparency of companies and also seemingly results in overall better investment results for consumers. I see no need to tamper with what appears to be a successful system, particularly if it might result in poorer investment outcomes for U.S. citizens. To this end, I urge you to KEEP the current system of quarterly reporting intact. Sincerely. Katherine Crumpler. 3469 Luther Fowler Rd. Pace, Fl 32571

Kelly Rodriguez — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kelly Rodriguez Affiliation: Jun. 13, 2026 Kelly, Physical Therapist, Louisiana.

As a PT since 1999, my salary has only raised minimally. Years of experience and building expertise have not yielded a higher income. Conversely, the cost of living has soared. The ongoing threat of social security benefits being reduced weighs heavily. I am in a physically demanding job - I help people with neurological disorders walk, move, and return to life. This takes its toll on your body. Working until 65 is possible in this line of work, albeit it tenuous, but 70? I chose this career so that I could help people. And when I need help, the system is consistently failing me. Healthcare workers are sorely overlooked, overworked, and underpaid. The ONE THING that has given me hope in looking towards retirement finances are my investments. I have diligently invested since I started working in 1999. And now, I live in a world where those at the top are manipulating the system at the expense of the little people. Regulations are rolled back for the sole purpose of allowing larger profits that do not 'trickle down'. This move by the SEC to change reporting methods is just that - a way for those in power to manipulate the system for their benefit. This move is NOT for the greater good. It is steeped in greed and I am certain the SEC knows this. Quarterly reporting was instituted for accountability, to protect investors - it is a best practice! Why would anyone support removing this? Really ask yourself why. The little guys of the world need your help. Please do not do this. Please protect our investments. Please hold these companies with record profits to account. Please do not forget the people on the other side - the people who move this nation. We deserve life after our service. We are not asking for luxury - just survival. Without trustworthy investments, without transparency, our SURVIVAL at the end of a life of underpaid service is in jeopardy. I beg you to do the right thing. Please.

We need your help.

Kim Hammond — Jun 13, 2026
Subject: File No. S7-2026-15 From: Kim Hammond Affiliation: Jun. 13, 2026 Date: June 13, 2026
To: Ms. Vanessa A. Countryman, Secretary
U.S. Securities and Exchange Commission
100 F Street NE

Washington, DC 20549-1090
Dear Secretary Countryman,
I am writing to express my strong opposition to the Commission's proposal, File No. S7-2026-15, which would allow publicly traded companies to opt out of quarterly reporting in favor of a semiannual framework using Form 10-S.
As an investor, I believe this rule would significantly degrade market transparency and harm public confidence. Moving from a three-month to a six-month reporting cycle creates an unacceptable information vacuum. A six-month "blackout window" is an eternity in today's fast-moving, technology-driven markets.
Furthermore, this proposal exacerbates information asymmetry. While everyday investors will be left in the dark for six months, corporate insiders, institutional investors, and large-scale analysts will still maintain superior access to real-time company insights. This undermines the SEC's core mission to protect investors and maintain fair, orderly, and efficient markets. Reduced reporting will not curb "short-termism" as intended; instead, it will invite increased volatility and speculation around the remaining, higher-stakes biannual reports. Have you forgotten how complaisant you were to Enron?!!! This stinks of Elon Musk and you should be ashamed.
Quarterly reporting has been the bedrock of the American financial system's integrity for decades. Diluting these standards will decrease accountability and increase the risk of undetected corporate mismanagement.
I urge the Commission to withdraw this proposal and maintain the current mandatory quarterly reporting framework to protect the interests of all market participants. Sounds like you want to allow insiders to reap profits at the expense of regular people. Sounds shady to me! We want more transparency not less!

Sincerely,
Kim Hammond
Alameda, California

Kim Carrozza — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kim Carrozza Affiliation: Jun. 13, 2026 As someone who used to work in the financial industry, I strongly support quarterly reporting. It's in the best interest of those many stockholders buying company stock, giving them cash to improve the quality of their products, which we the buy from them, again increasing their bottom line. Less reporting is less transparency and gives investors less reason to invest since they don't have the most up to date information on which to base their investing decisions.

Sent from my iPhone

Kim Clarke — Jun 13, 2026
Subject: S7-2026-15 Comment From: Kim Clarke Affiliation: Jun. 13, 2026 You need to keep the reporting quarterly for full transparency.

kim Holtel — Jun 13, 2026
Subject: S7-2026-15 Comment From: kim Holtel Affiliation: Jun. 13, 2026 Are you &@$”ing kidding me??!! This makes absolutely no sense. Quarterly reporting isn’t perfect, but public markets are built on timely disclosure. When information becomes stale, the risk of surprises, insider advantages, and loss of investor trust tends to increase. The phrase “to save money” sounds reasonable on the surface, but many investors would ask whether the cost savings are worth having less visibility into companies that are asking the public to invest in them.

Kim Reimer — Jun 13, 2026
Subject: S7-2026-15 Comment From: Kim Reimer Affiliation: Jun. 13, 2026 Quarterly reports are important as they show which executives are buying or dumping stock; It gives the SEC & those of us on the outside a window through which to watch management & their actions. Do not eliminate quarterly reports. They are too important.

Kim Terek — Jun 13, 2026
Subject: S7-2026-15 Comment From: Kim Terek Affiliation: Jun. 13, 2026 No way. And I cannot believe they are even considering this (less than quarterly required financial reporting), except because no one cares anymore if its all being run well or properly now. Our country's business models abide by some of the best securities laws and rules designed in the history of the world. Go and mess that up and reduce the necessities for it, and we end up with quite a few more problems than it might ever solve to have less work to do quarterly. Wake up! Education and knowledge sharing continues to deteriorate already. Do not make it easier for the problems to collect.

Retail Investor living right now on her investment gains.

Kim White — Jun 13, 2026
Subject: S7-2026-15 Comment From: Kim White Affiliation: Jun. 13, 2026 I agree with all the points in this post. Every company wants to steal the publics money. Now the SEC wants to be part of the big theft. Transparency is NEEDED to maintain public trust !! This is the polite warning!

Kimberly Wheeler — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kimberly Wheeler Affiliation: Jun. 13, 2026 My name is Kim Wheeler. I am a personal investor. I am in Richmond Virginia. Quarterly reporting gives people who invest in the stock market a better idea of where valuations are trending so that we can make adjustments to our investments accordingly. Without this quarterly reporting requirement we will be more in the dark about information and our portfolios will suffer as a result. For someone like me who is very close to retirement, this is particularly a crushing blow to my portfolio. I am literally begging the SEC not to go backwards in time. It is important for companies to maintain transparency to the American public and the American people and those who invest in the stock market. As our president likes to say, thank you for your attention to this matter! We The people, Who invest in America, deserve and have every right to have the proper reporting so that we can make the proper decisions. Again, thank you for your attention to this matter!

Kirk Bowman — Jun 13, 2026

Kristin Stahr — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kristin Stahr Affiliation: Jun. 13, 2026 Quarterly reporting is necessary for transparency and checks and balances of companies and corporations we invest in. This leaves less margin for errors and omissions both accidentally and fraudulently! I have worked way too hard to have this ripped out from under me as I am positive so many people feel the same! This, amongst so many other absurdities going on in today's environment is absolutely insane and goes against the majority of people who are actually in the trenches and doing the work!

Sent from my iPad

Kristina Jansson — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kristina Jansson Affiliation: Jun. 13, 2026 I believe it is important that companies should have to report quarterly. We should not reduce that requirement to twice a year. Please don't make that change that risks our retirement accounts, etc.

Kristina Zimmerman

Kristina Santoro — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kristina Santoro Affiliation: Jun. 13, 2026 My name is Kristina and I am a teacher in CT. I count on my investments to eventually sustain my family when it is time for retirement. It is not possible to make informed investments with this proposed lack of transparency. Keep quarterly reports. They are vital to sustain a free and fair market.

Kristine Hewitt — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Kristine Hewitt Affiliation: Jun. 13, 2026 To hello and thank you. My name is Kristine Hewitt and I propose that a ruling be made in my behalf that this money be returned to me as it's being traded by other people and my wallets are made by other

people who have alll of my information and wallets and emails. They're many who have been been made by many people in jail and my phones are all hacked by many people also. I feel like I have paid any debt bond and anything that I personally owe on I know that I have but like I said many people have access to this because it was stolen from me before I was aware of it and a life insurance claim was taken out on me. Thank you and God bless Kristine M. HewittExchange Commission:

Kristy Palmer — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Kristy Palmer Affiliation: Jun. 13, 2026 I'm Kristy Palmer, and I am a Peoject Manager with an MBA. Quarterly reporting forces transparency which both protects investors and rewards legitimately profitable businesses. The idea that the market could make wider swing gs semi-annually is concerning for investors who rely on the market for retirement income. It also allows a longer period for disreputable companies to escape financial oversight, and increases the risk of a catastrophic market crash. I firmly support maintaining quarterly reporting.

Kristy

Kurt R. Weaver Individual investor — Jun 13, 2026
Subject: File No. S7-2026-15 From: Kurt R. Weaver I am opposed to this change. Please keep the reporting requirements quarterly as they are.

Kyle Kirchner — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Kyle Kirchner Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
If a company is public all of the corporate data should be available to all investors.Wether accredited and/or non-accredited, this vital information is crucial for people to make wise investment decisions. It should be freely available to all who are considering buying shares of that company. For corporations to have extra knowledge surpassing the regular investor, I see as insider trading, black shares, greed and unfair. It should definitely not be allowed!

Kyleigh Kerry — Jun 13, 2026
Subject: S7-2026-15 Comment From: Kyleigh Kerry Affiliation: Jun. 13, 2026 Reporting must be kept quarterly and the public should never be left in the dark. Imposed ruling otherwise leaves the public in the hands of corruption and greed - neither of which is benefici
al to the investors.

L. Kliewer — Jun 13, 2026
Subject: Comment on S7-2026-15 From: L. Kliewer Affiliation: Jun. 13, 2026 Dear SEC:

I want the SEC's reporting requirement to remain at quarterly- anything less frequent than that reduces investors' confidence, corporate transparency and ultimately reduces investors ROI. In a time of such high inflation, this risky regulatory rule has the potential of both reducing ROI and causing worse inflation, among other things.

Thank you,
Lauralyn Kliewer
Duluth, MN

Laila Wah — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Laila Wah Affiliation: Jun. 13, 2026 Li Wahl, technicien, PA. Quarterly reporting keeps tabs on fluctuation of earnings and expenditures which are very dramatic for the average individual who isn't in the super échelons of trillionaires like Elon Musk, or the billionaires, but has to face the sévère offshoots of policies, tarriffs, taxes, interest ratés etc set by an elitist group of individuals who control the économie of the USA and effect world commerce. The

cost of imported goods, not only luxury items, but ie car parts are passed on to the consumer. With présent conditions instead of safe guarding the individual with little financial power to feed the machinery of économique polices to their détriment, the country further crushes it's heal into the limited income the average individual assesses.
Definitely support quarterly reporting.

Laura Riesgraf — Jun 13, 2026
Subject: S7-2026-15 Comment From: Laura Riesgraf Affiliation: Jun. 13, 2026 Dear Chair and Commissioners,

I write to express my strong support for retaining the current quarterly reporting requirements for public companies under the Securities Exchange Act of 1934.

Quarterly financial disclosures are a cornerstone of investor protection and market transparency. They provide shareholders, analysts, and the investing public with timely, standardized information necessary to make informed decisions. Reducing reporting frequency to semi-annual or annual cycles would create extended periods of opacity, increasing the risk of information asymmetry between corporate insiders and outside investors.

Furthermore, quarterly reporting supports market integrity by enabling earlier detection of financial irregularities, operational deterioration, or material changes in a company's condition. The discipline of regular reporting also encourages sound financial governance and accountability at the management and board level.

While I recognize that compliance carries administrative costs, those costs are justified by the significant benefits to capital markets efficiency and investor confidence. Any perceived burden should be addressed through targeted modernization of reporting processes — not by diminishing disclosure frequency.
I respectfully urge the Commission to maintain quarterly reporting as a requirement for all applicable public companies.

Respectfully,
Laura Riesgraf

Lee Orange — Jun 13, 2026
Subject: S7-2026-15 From: Lee Orange Affiliation: Jun. 13, 2026 I worked in finance all my life. Doing inventory for large companies, accou ts receivable, collections. I am familiar with how companies work. Every company paid a CEo an exorbitant salary. Every single one was crooked. I was told when I was a fill in cashier not to run vertain things through the register, to give the money directly to them. Skimming of the top is embezzlement. For that they dont need to be released. Jamie Diamond of Chase took 800 million from Obama. For bailout for homeowners. Not one cent of that money went to bail out an American family. He admitted he took the money, and used it to pay share holders. THEN, with the bank being crooked, he was rewarded with a month long vacation in Hawaii on a private jet. For almost bankrupting a bank. He deserves to be jailed, and he doesnt deserve to be out, still being sneaky and ripping off taxpayers. He betrayed American trust. That wa

s taxpayer money. Leave crooked CEO'S in jail. They are not above the law. Neither is Trump.

Leia Fontenot — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Leia Fontenot Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:Quarterly reporting is one of the only tools individual investors have to understand what's happening inside the companies they invest in. Removing or reducing these disclosures would create a major information gap, leaving retail traders at a disadvantage compared to institutions with far more resources. My husband relies on timely, accurate quarterly data to make responsible trading decisions, manage risk, and protect our family's financial stability. Without consistent reporting, price discovery becomes distorted, volatility increases, and retail investors are forced to trade in the dark. Transparency is the foundation of fair markets, and taking away quarterly information would directly harm the people who depend on it the most. Please do not let the SEC reduce access to the data that ordinary investors need to participate safely and confidently in the market.

Leilani Lea — Jun 13, 2026
Subject: S7-2026-15 Comment From: Leilani Lea Affiliation: Jun. 13, 2026 Everyone should be able to know what's going on with their portfolio at any given time.

Lenore Rudolph — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Lenore Rudolph Affiliation: Jun. 13, 2026 SEC,

I am interested in the reports of our countries financial markets quarterly. I see a proven risk when markets report only bi-annually.

Please don’t brake what appears to be fixed.

Lenore Rudolph

Leo Schultz — Jun 13, 2026
Subject: S7-2026-15 Comment From: Leo Schultz Affiliation: Jun. 13, 2026 Things are already skewed to disadvantage everyday people. Dropping the quarterly reporting requirement would make that worse. Do better. Keep it as is, or make them post things monthly.

Leo Schultz,

Leonard Bliss — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Leonard Bliss Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Transparency in financial information should be required snd easily available everyone.
Before investing in stocks I pursue every detail available to decide which is the safest and most likely to not fail to yield a safe and effective investment strategy.
I would like monthly numbers if it were possible, but quarterly is still the bare minimal standard.
Please don't take away what we need for safe investing..

Leslie Ann Brooks — Jun 13, 2026
Subject: S7-2026-15 Comment From: Leslie Ann Brooks Affiliation: Jun. 13, 2026 As an independent investor, I depend on quarterly reporting to accurately assess stocks and my overall portfolio performance. Changing reporting to every 6 months biases large corporations and unfairly impacts independent investors.

Thank you,

Leslie Brooks

Leslie Atkins — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Leslie Atkins Affiliation: Jun. 13, 2026 My Name is Leslie Atkins. I am retired from civil service working for the US Navy for 33 years and living in San Diego. Quarterly reporting is important and I want to keep it. I can't afford to lose any of my funding.

Leslie Tittle — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Leslie Tittle Affiliation: Jun. 13, 2026 Quarterly reporting has been the norm for the majority of the history of the stock exchange. The period in which the frequency was decreased lead to significantly less transparency and lower returns. How can we, the people, fully evaluate an entity if results are only available twice a year - that’s like balancing your check book occasionally. Quarterly reporting makes sense as it provides more information to those looking to invest.

Subject: Comment on S7-2026-15 From: Lisa P Affiliation: Jun. 13, 2026 Quarterly reporting should stay. If you do this you will be known as the people who ruined people's equity for no good reason. We've been saving our whole lives and need to continue to increase our nest egg to be able to live a long time past retirement without worrying about losing money unnecessarily. Why change a good thing when we know how bad twice a year reporting is to our portfolio. DO NOT CHANGE A GOOD THING. Have you seen what it did in the past? You have! Don't think it's ok, that you know better, that it'll work this time, it won't. It's already been proven. You don't know better than the history we've seen. Why do you think they went back to quarterly??? It wasn't for no reason, it was because it tanked our investments, our savings. The public has already been hurt by this in the past. Do NOT hurt us again. We've been hurt by Covid, which caused a world of hurt to all of us with the brutal economy, everything is extremely over priced. We can't afford for you to gamble with what we have left!! Please DON'T DO IT!

Lois Belser — Jun 13, 2026
Subject: S7-2026-15 From: Lois Belser Affiliation: Jun. 13, 2026 Lois Belser, retired 3 times, now working part-time as Front Desk Receptionist, Overland Park, KS.

CEOs and companies have to be held accountable for what they do. They make huge sums of money - often at the expense of their employees, and wield great power. Their retirements are a huge portion of their compensation. Quarterly reporting and making them sign that their reports are true and accurate are the very least that can be done to hold them to the standards they should be following. This law was enacted to address fraud in corporate reporting. It obviously has worked, since people in these positions went to jail for violating it.

Having to sign their name under penalty of losing their retirement should be a strong enough incentive to keep these powerful people and companies in line and the reporting more honest. A lot can be hidden in a 6 month's period. This requirment needs to be left quarterly. Please DO NOT consider changing the law from quarterly.

Regards, Lois Belser

Louise LoPinto — Jun 13, 2026
Subject: S7-2026-15 Comment From: Louise LoPinto Affiliation: Jun. 13, 2026 As a retail investor, I strongly support keeping quarterly reporting requirements. Public companies should provide timely financial updates so all investors have equal access to important information. Extending reporting to every six months increases the risk that problems such as declining sales, rising debt, or legal issues remain hidden for too long. Transparency and fair markets depend on regular disclosure, and quarterly reporting helps level the playing field between everyday investors and large institutions.

Best regards,
Louise LoPinto

Lowell Miller — Jun 13, 2026

Lucy Sargeant Sargeant — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Lucy Sargeant Sargeant Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission: the Free press and the American people MUST have more transparency, accountability, and information about companies, as we TRY to make INFORMED decisions about OUR money! This SEC proposal is a slap in the face for our rights as investors. Bad proposal that will leave us all less trusting of the SEC and our investing!

Lucy Shepard — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Lucy Shepard Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
As an 80 year old retiree, I rely on up-to-date information about the companies I invest in (or might invest in) to manage my portfolio. My investments are not large, but the rules for small investors should be the same as those available to large investors. I believe that changing the reporting rules gives an unfair advantage to large investors who have many sources of information about the companies they are investing in--sources unavailable to small investors like me.
Wealthy investors have many advantages. Do not give them another. Keep the rule requiring quarterly reporting.

Luna M Morningstar — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Luna M Morningstar Affiliation: Jun. 13, 2026 Re: File No. S7-2026-15 – Opposition to Semiannual Reporting Proposal

To the Securities and Exchange Commission:

I am writing to oppose the SEC's proposed amendments in File No. S7-2026-15 that would permit public companies to replace quarterly reporting with semiannual reporting.

I am a 26-year-old retail investor building a retirement portfolio through a Roth IRA and taxable brokerage account. I work hard to contribute to these accounts and am focused on achieving long-term financial security. As an individual investor, I do not have access to management meetings, proprietary research, industry experts, or expensive financial data services. SEC filings are one of the few reliable tools available to me when evaluating companies and making informed investment decisions. Reducing reporting frequency would disproportionately harm investors like me while providing a relative advantage to large institutional investors with significantly greater resources.

The proposal would significantly reduce transparency for ordinary investors. Six months is a long period in today's economy. Companies can experience substantial changes in revenue, profitability, debt levels, competitive position, and operational risks in a matter of weeks or months. Waiting six months for comprehensive financial disclosures would leave retail investors making decisions with outdated information.

I am particularly concerned that reducing reporting frequency would widen the information gap between retail and institutional investors. Large investment firms have resources that allow them to gather information from multiple sources and maintain ongoing contact with company management. Individual investors generally do not. Quarterly reports help ensure that all investors receive standardized information at regular intervals, promoting fair and efficient markets.

The SEC's mission includes protecting investors. While reducing compliance costs for issuers may be a worthwhile goal, investor protection should remain the Commission's highest priority. Public companies benefit from access to public capital markets. In exchange, they should continue to provide timely and consistent disclosure to the investors who provide that capital.

Quarterly reporting also serves as an important accountability mechanism. Management teams know that their performance will be reviewed every three months. This encourages transparency, discipline, and timely disclosure of developing risks. Extending reporting intervals could make it easier for negative trends to remain undisclosed for longer periods, potentially exposing investors to greater losses.

The impact of this proposal extends beyond investors who purchase individual stocks. Millions of Americans invest primarily through low-cost index funds, target-date funds, pension plans, employer-sponsored retirement accounts, and individual retirement accounts such as Roth IRAs. These investors may never directly analyze a company's financial statements, but they still depend on public markets operating efficiently and on securities being valued using timely and accurate information. Reducing the frequency of required disclosures could impair price discovery and increase information asymmetries throughout the market, ultimately affecting the retirement savings of ordinary Americans.

As a long-term investor saving for retirement, I depend on regular financial reporting to evaluate portfolio holdings, assess risk, and make informed decisions regarding future investments. Reduced disclosure would make it more difficult to determine whether a company continues to meet my investment criteria and would diminish confidence in the fairness and transparency of public markets.

The SEC has historically promoted transparency because transparent markets attract investment and support capital formation. I believe this proposal moves in the opposite direction by reducing the amount of information available to the investing public. Any reduction in compliance costs for issuers should not come at the expense of investor protections that have helped make U.S. capital markets among the strongest and most trusted in the world.

For these reasons, I respectfully urge the Commission to reject the proposed rule and maintain quarterly reporting requirements for public companies.

Thank you for your consideration.

Respectfully submitted,

Luna Morningstar

Marc Levin — Jun 13, 2026
Subject: S7-2026-15 Comment From: Marc Levin Affiliation: Jun. 13, 2026 Diane Gile. You mean the Republiconartist regimes since Nixon lowered the marginal income tax rates of the early 1960s before JFK was assassinated, disproportionately in favor of rich, hereditary aristocrats. At that time the average worker in the biggest, wealthiest corporations paid ther top executives about 30 times the average worker in the corporations. Today, it's more like 300. Look it up. Then corporations began to put their upper one or 2% wealthiest corporations' executives to work "lobbying" greedy, ethically challenged Congress Critters. Mostly, but not exclusively Republiconartists--there were some corporatist Dumbascraps like Manchin (who's now retired) and sleazy Tulsi Gabbard who flipped her party affiliation after being elected as a Democrat. The two of them helped put one of Trump's right wing extremists, Neil Gorsuck on the United States Supreme Court so he could vote against a woman's right to privacy to control her own body in medical consultations with her doctor(s), which led to the horrendous cases resulting from extreme unconstitutional laws in many states to criminalize women's efforts to receive safe and effective healthcare in many cases, even some where doctors in fear for their own criminalization refused to provide previously routine medical services. To draw the line crystal clearly, the Supreme Court's decision and then the activity of a number of States' legislatures and Supreme Courts rendered more religiously based (there are no other reasons) prohibitions requiring women to submit to religion based unconstitutional laws regulating women's efforts to get healthcare from medically licensed doctors.
All during this upheaval of the American political landscape the Republiconartists began passing laws that encouraged the oligarchs and the developing plutocrats who owned Congress and the Supreme Court to move their purchasing of goods and services offshore, thus handing the oligarchs and plutocrats even more money to buy Congress and the presidency. Then followed the factories and H-1B visas for the factories that remain where people were brought in from Asia often to work for a third or a half of what Americans who were thrown out of jobs used to get paid. Rendering still more profits for the oligarchs and plutocrats. And then, they offshored American jobs and continued to disproportionately lower the marginal tax rates so that more and more and more of the burden of the operation of the federal government fell on the shrinking middle class. Very last, the economy was shifted to less remunerative jobs for many formerly middle class families which is why so many younger generation American children have little or no chance to do better economically than their parents did since World War II. The mindless MAGAts for years have been swallowing Republiconartist propaganda and their economic reversals compared to their parents and grandparents and blaming it on Hispanic surnamed people working in America, doing jobs that Americans have been refusing to do since the war in Vietnam. Unlike their American ancestors, 150 or 200 years ago, they'd never help a neighbor whose barn burned down raise a new one. Now there's FEMA but underfunding of FEMA for natural disasters and other misfortunes like force majeure that could be paid by a fair taxing system that has an existed since the 1970s and Nixon's regime is simply a consequence of unconscionable wealth being transferred to the pockets of a few thousand already obscenely rich plutocrats who own ordinary Americans' government. Do you understand that if our country today has 350 million people, that Elon Muskrat could pay every living American 1 million plus one year's income tax from a fraction of his current wealth extracted from us? We pay for the superb American military that protects the plutocrats far-flung businesses why don't they pay a greater share of the expense of our infrastructure and our Defense Department to protect their enormous wealth? Especially when Trump and his White House racketeers and plutocrats are robbing everyone else blind?

Marc Nickel — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Marc Nickel Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:

This rule would harm retail investors by turning basic trades into slow, expensive processes. The proposed suitability mandates and 90-day trading freeze treat capable adults like children, forcing lower-income investors out of markets entirely. Brokerages will raise fees or exit retail services, destroying the commission-free access millions rely on. The SEC offers no proof current protections failed. This paternalism kills opportunity, choice, and capital formation which is exactly what the SEC should protect. Withdraw this rule.

Marcia Fagin — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Marcia Fagin Affiliation: Jun. 13, 2026 Sounds like another ploy to fatten the accounts of the already wealthy by making the rest of us lean. Enough already!!! When is the average American investor really going to reap the rewards of investing when the game is rigged? When the market is controlled by the institutionalized wealthy the rest of us are just along for the ride taking our chances in the markets house of cards. I am a sole proprietor property manager in WA state doing what i can to support myself and my family and provide for our future in an ever changing economy. DO NOT MAKE THAT HARDER by disenfranchising that effort of us "common folk". I am opposed to this rule change. M Fagin, Investor

Margo Penndorf — Jun 13, 2026
Subject: S7-2026-15 Comment From: Margo Penndorf Affiliation: Jun. 13, 2026 I believe this would give retail investors like me, who rely on quarterly information to make decisions, an unfair disadvantage and give the advantage to public companies by stay quiet to internal failures . It opens more opportunities for corporate fraud. Quarterly reporting provides greater insight into how the company is operating and allows investors to make better get out before a failure occurs. Making it optional doesn't fix the problem because companies that opt in are often the ones whose investors need frequent updates from. The savings to companies aren't worth the cost to retail investors as we will not have adequate reaction time when a company fails to meet expectations. Plus the insiders will bail out first leaving us to hold the losses. This is a bad decision in my opinion. It stacks the deck in favor of the corporations. What has happened to business ethics? What has happened to protecting the consumer? Please keep these protections in place and give us all a fair trading platform and a chance to support the corporations while making some money too.

Sincerely,
Margo Penndorf

Margretta Morris — Jun 13, 2026
Subject: S7-2026-15 Comment From: Margretta Morris Affiliation: Jun. 13, 2026 Did we not learn from the Enron debacle???? Quarterly should be seen as a minimum requirement!
Margretta Morris, Retiree

Maria Ballestrino — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Maria Ballestrino Affiliation: Jun. 13, 2026 I've been stashing away as much of my paycheck into my 403b, hoping one day to retire comfortably. I've been doing without now, to fund my family's future. My generation already knows that social "security" isn't a "secure" source of income for us, yet we are still required to pay into it. Our retirement funds cannot also be at risk. And while I know there is always some risk with investing, it would be beyond maddening to know that retirements and savings would vanish due to a rule change to benefit a select few. This should not be permitted to happen.

Sent from my iPhone

Maria Claudio — Jun 13, 2026
Subject: S7-2026-15 From: Maria Claudio Affiliation: Jun. 13, 2026 Maria Claudio Apopka FL please do not stop the quarterly reporting. We rely on our pensions and retirement accounts for the future! Corporate America goes around the bush when no one is checking!

Maria Gaddy — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Maria Gaddy Affiliation: Jun. 13, 2026 My name is Maria Gaddy and I am a retired nurse practitioner. Reporting needs to stay quarterly because it would be detrimental to my retirement savings if it decreases to twice yearly. I keep a close eye on my retirement funds . I make adjustments as needed based on quarterly reports ; this allows me to identify trends and intervene to prevent catastrophic losses. This money is what I live on now which

is why I am against any changes to the status quo. Please keep reporting every quarter.

Mary Ellen Nogert

Mary Ellen Hollis — Jun 13, 2026
Subject: S7-2026-15 From: Mary Ellen Hollis Affiliation: Jun. 13, 2026 I am writing to express my opinion of the proposal to change the corporate reporting requirements from quarterly to semi-annually.

I am totally against this change. In fact, I am perplexed why this would even be considered. History shows us that the last time the required reporting was twice-a-year, annual returns in the market were 0.1%. When quarterly reporting was returned in 1970 the annual return rose to 3.9%. In addition, the P/E ratio climbed from 16.5x to 26.7x.

I am a retired pharmacist. My husband and I actively manage our investments which have allowed

us to have a lovely retired life. In addition, I use my profits to help three more generations get an education and save for their retirements. Having quarterly company information is vital to understanding and updating our portfolios. A lot of negative things can happen in three months, in six months we could lose a lot of our capital.

I have to admit that I was unaware that corporations have not always been required to do quarterly reports. It has been required since 1970 when I was a high school sophomore just learning about the stock market. I assumed that quarterly reporting always was, and would always continue to be, the requirement. You know that companies are monitoring their businesses closely and with current technology this is easier than ever. Why shouldn't the stockholders have access to all of the information routinely?

SEC release number 34-8683 dated September 15, 1969 stated "The trading markets should have the benefit of quarterly financial information."

The return to quarterly reporting after a 15 year lull allowed the Dow Jones Index to increase 3.9% vs -0.1% during the 15 years of semi-annual reporting.

I urge you to continue to require quarterly reporting.

Respectfully,

Dr. Mary Ellen Hollis

Matt Wheelis — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Matt Wheelis Affiliation: Jun. 13, 2026 I strongly support maintaining quarterly reporting requirements for public companies.

I have worked in publicly traded companies since 2006 and currently serve in an executive leadership role. My experience spans more than two decades working within publicly traded software and technology companies, including Autodesk, Hexagon, and Nemetschek, serving the

architecture, engineering, construction, manufacturing, geospatial, and industrial technology markets. Over that time, I have operated within quarterly reporting requirements across multiple market environments and economic cycles. Based on that experience, I believe quarterly reporting provides substantial benefits to investors, boards of directors, and management teams.

While critics often argue that quarterly reporting encourages short-term thinking, my experience has been the opposite. The discipline required to prepare quarterly financial and operational disclosures compels management teams to continuously assess business performance, market conditions, risks, and opportunities. This regular cadence helps organizations identify and respond to changing conditions more quickly than they otherwise might.

Quarterly reporting also promotes transparency and accountability. Investors deserve timely information regarding the performance and condition of the companies they own. In rapidly changing markets, waiting six months or longer between formal reporting periods would increase information gaps, reduce transparency, and potentially impair market efficiency.

From an operational perspective, the quarterly reporting process strengthens forecasting accuracy, management discipline, strategic alignment, and organizational accountability. It requires leadership teams to maintain a current understanding of business performance and emerging risks rather than relying on less frequent assessments.

Having worked through economic expansions, recessions, acquisitions, integration efforts, and periods of significant market volatility, I have repeatedly seen how quarterly reporting helps management teams remain focused on changing business conditions and emerging risks. In my experience, the discipline created by the reporting process itself is often as valuable as the resulting disclosures.

I recognize that reporting obligations create costs, particularly for smaller issuers. However, if there are opportunities to reduce unnecessary burden, I believe the focus should be on simplifying disclosure requirements rather than reducing reporting frequency. Less frequent reporting would weaken transparency and reduce the management discipline that quarterly reporting helps create.

The U.S. public markets are widely regarded as among the most transparent and trusted in the world. Quarterly reporting has been an important contributor to that reputation. For these reasons, I strongly believe quarterly reporting requirements should be retained.

Sincerely,

Matt Wheelis
Marietta, Georgia

Matthew Backlas — Jun 13, 2026
Subject: S7-2026-15 Comment From: Matthew Backlas Affiliation: Jun. 13, 2026 I'd make it 8 times a year if I could. We all know the only reason to do this is to mislead investors. I want 24/7 transparency.

Matthew George — Jun 13, 2026

Matthew Mowry — Jun 13, 2026
Subject: S7-2026-15 Comment From: Matthew Mowry Affiliation: Jun. 13, 2026 As a regular investor, I'm already at a disadvantage in our current wildly corrupt system that lets insider trading run rampant among the privileged while I have to follow rules. If reporting is cut to twice a year, I will begin pulling my money from SEC-"regulated" markets immediately and seek alternate investments. And I will encourage others to do the same. You already have done a poor job of maintaining a credible market, and I'm weary of it. It's pretty clearly a rigged system, and the only way to protect my wealth will be not to participate. If enough people react the way I will, whose wealth will you have left to extract?

Melinda Iley-dohn — Jun 13, 2026
Subject: S7-2026-15 Comment From: Melinda Iley-dohn Affiliation: Jun. 13, 2026 This means that people investing can lose their entire investment while it is unavailable for them to move their funds exactly like it was when Enron stock was frozen and hundreds of employees lost their entire retirements. It also prevents investors from being able to transfer funds to an opportunity for better returns. We like flexible opportunities in our investment selections.

Why should anybody want to invest in stocks or mutual funds if they are unable to transfer to better opportunities or protect themselves from major losses? We all know that our markets operate in a daily market close. This will make investments in businesses highly unattractive. The ultimate risk is that businesses will lose investment Capitol because fewer
people will want to fund their capital needs.

Melinda Iley-dohn — Jun 13, 2026
Subject: S7-2026-15 Comment From: Melinda Iley-dohn Affiliation: Jun. 13, 2026 This means that people investing can lose their entire investment while it is unavailable for them to move their funds exactly like it was when Enron struck ck was frozen and hundreds of employees lost their entire retirements. Melisa Tracey Individual Investor — Jun 13, 2026
Subject: File No. S7-2026-15 From: Melisa Tracey I am writing as a retail investor to express my opposition to reducing the frequency of required corporate financial reporting from quarterly to semiannual reporting. As an individual investor, I rely on quarterly reports to understand the financial health, risks, and performance of the companies in which I invest. Like many Americans, I am investing for retirement and my family's future. Quarterly reporting provides transparency and allows me to make informed decisions based on current information rather than waiting six months for mandatory updates. Reducing reporting frequency would primarily benefit large institutional investors who often have greater access to management, analysts, and alternative sources of information. Retail investors do not have those advantages. Less frequent reporting would increase the information gap between Wall Street professionals and ordinary investors like myself. Transparency is one of the strengths of U.S. financial markets. Regular reporting helps build trust, promotes accountability, and allows investors to identify emerging risks before they become major problems. While companies may argue that quarterly reporting creates administrative burdens, those burdens should be weighed against the needs of millions of investors who depend on timely and reliable disclosures. I respectfully urge the Commission to maintain quarterly reporting requirements and continue supporting transparency, fairness, and equal access to information for all investors. Thank you for considering my comments. Sincerely, Melisa Retail Investor

mia — Jun 13, 2026
Subject: Comment on S7-2026-15 From: mia Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:

I strongly oppose any proposal to eliminate or substantially reduce quarterly reporting requirements for public companies.

The fundamental purpose of the securities laws is to ensure that investors have access to timely, material information and that markets operate on transparency rather than privilege. Reducing the frequency of required disclosures would move in the opposite direction by creating larger information gaps, increasing corporate opacity, and weakening accountability to shareholders.

Public companies benefit from access to public capital markets. In return, they should be expected to provide regular and meaningful disclosure to the investors whose capital they rely upon. Quarterly reporting is not an unreasonable burden—it is a basic obligation of participating in the public markets.

Eliminating quarterly reports would disproportionately benefit corporate executives, insiders, and large institutional investors with privileged access to management while disadvantaging ordinary investors. During longer periods between mandatory disclosures, company leadership would possess significantly more information about business performance, emerging risks, operational challenges, and financial trends than the investing public. This imbalance undermines the principle of fair and equal access to information that is central to investor confidence.

Less frequent reporting would also reduce public accountability. Investors deserve to know when a company's financial condition is deteriorating, when risks are emerging, or when management decisions are producing negative results. Quarterly reporting creates a predictable framework that requires companies to regularly explain their performance and disclose material developments. Weakening that framework would make it easier for problems to remain hidden for longer periods and harder for shareholders to hold management accountable.

Supporters of reducing reporting requirements often argue that quarterly reports encourage short-term thinking. However, there is little evidence that withholding information from investors promotes long-term value creation. Long-term investing and frequent disclosure are not mutually exclusive. Investors can focus on long-term fundamentals while still expecting timely transparency about the companies they own.

At a time when public trust in institutions and markets remains fragile, the SEC should be strengthening transparency, not reducing it. America's capital markets are among the strongest in the world precisely because investors have confidence that material information will be disclosed regularly and consistently. Reducing quarterly reporting would erode that confidence and create conditions that favor insiders over ordinary shareholders.

The Commission's mission includes protecting investors, maintaining fair and orderly markets, and facilitating capital formation. Preserving robust quarterly reporting requirements advances all three objectives. I therefore urge the SEC to reject any proposal that would eliminate or significantly weaken quarterly reporting obligations for public companies.

Thank you for your consideration.

Sincerely,

Mia Serrano

Michael — Jun 13, 2026

Subject: File No. S7-2026-15 From: Michael Re: File No. S7-2026-15 – Optional Semiannual Reporting I oppose the proposed rule allowing public companies to replace quarterly reporting with semiannual reporting. As a retiree, I depend on the transparency of publicly available financial information to help protect my savings and make informed investment decisions. Quarterly reports provide timely insight into a company's performance, risks, and changing business conditions. Reducing required reporting to twice a year would create longer periods during which individual investors like me have less information available to evaluate our investments. Large institutional investors often have access to extensive research and resources that individual investors do not. Maintaining quarterly reporting helps ensure that all investors have regular access to important financial information and promotes a fair and transparent market. While I understand the desire to reduce regulatory burdens on companies, I believe investor protection and market transparency should remain the SEC's highest priorities. For these reasons, I urge the Commission to retain the current quarterly reporting requirements.

Michael Ackerman — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Michael Ackerman Affiliation: Jun. 13, 2026 Dear Securities and Echange Comission, My name is Michael Lee Ackerman, I'm 79 years old, retired, and barely getting by on my social security.
Life in America, as you may or may not have noticed, has become increasingly hard for people in this country, just trying to get by.
I truly feel that I speak not only for myself, but for other people who have their entire savings invested in the markets. I am honestly curious as to why you feel it's necessary to change the quarterly reports, from all business/companies, back to semi-annual reports.
In my opinion this is a terrible idea and the savings from legal fees and business meeting fees, will flow directly to the company executives, not the stockholders, thus increasing executive salaries while keeping investors in the dark.
You have tried to institute this idea several times before and it turned out to be a disaster for the people holding stock in these companies.
I would appreciate an honest explanation, detailing why you feel it necessary to make this change, when it is proven to be such a bad idea for the common investor in the past.
I await your detailed response.

Sincerely,
Michael Ackerman

Michael Smith — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Michael Smith Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
The proposal would severely reduce market transparency, delay the dissemination of material information, and lead to fewer data-driven updates for shareholders. All while politicians, and others on the inside can still get all that information, not only is this unfair, it should be illegal. Sure it eases the burden on small companies/businesses, but at what cost.

Michael Witkowski — Jun 13, 2026
Subject: S7-2026-15 Comment From: Michael Witkowski Affiliation: Jun. 13, 2026 Mike w Landscaping, also invested in the stock market and it is completely unacceptable for this to go through. People in government do not get a head start. That is completely illegal and they should be dealt with. Jailed. This b****t needs to stop.

Michele Ceci — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Michele Ceci Affiliation: Jun. 13, 2026 Quarterly reporting is easier and more cost effective than ever. It should NOT be abandoned! We need more transparency, not less.
What is the nefarious motivation behind this?

myoseph — Jun 13, 2026
Subject: Comment on S7-2026-15 Proposed Rule to Reduce Public Company Reporting from Quarterly to Semiannual From: myoseph Affiliation: Jun. 13, 2026 Dear SEC Commissioners,

My name is Megde Yoseph, and I am writing as a California homeowner, retirement saver, pension participant, and private citizen. Like millions of Americans, I depend on transparent financial markets to protect the savings and investments I have spent decades building for my family's future.

I strongly oppose any proposal that would allow publicly traded companies to reduce their financial reporting from quarterly to only twice per year.
Regular quarterly reporting provides investors with timely information about a company's performance, risks, and financial condition. These disclosures help ensure that markets remain transparent, efficient, and fair for all participants—not just large institutions with access to additional resources.

As an ordinary investor, I rely on transparent and accessible information to have confidence that my retirement savings and pension investments are being managed in a fair marketplace. Reducing the frequency of required disclosures would limit transparency, delay important information, and increase uncertainty for millions of Americans who are saving for retirement.
History suggests that less frequent reporting can lead to lower market transparency, weaker valuations, and poorer outcomes for investors. At a time when Americans are increasingly responsible for funding their own retirement security, weakening disclosure requirements would move in the wrong direction.

My retirement savings, pension benefits, and home represent years of hard work and careful financial planning. I respectfully urge the SEC to prioritize the interests of ordinary investors and

maintain strong quarterly reporting requirements for public companies.

Thank you for considering my comments.

Sincerely,
Megde Yoseph

Neil Price — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Neil Price Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
To find out that the ability to make informed decisions on information that has been publicly available is going to be taken aware is a direct path to a unfair marketplace that will cater to the already wealthy and groups already in a position of power and knowledge leaving the ability for building a

better future lost to the interests of corporations. Corporations that's have already done as much to keep the playing field tilted to their advantage and with this action the SEC is showing that the corporate interest is still working to dominate the industry.

Please know as a retail investor I hope that our ability to have this information will keep being a publicly available tool in my quest to provide as much research ability as the corporations will have in this exclusive way to keep my chances to flushish in the distance, egulated to the past and never to achieve any form of financial freedom.
Please don't let this come to pass.
I would be more then happy to express more reasons so contact me for any future discussions.

Thank you
Neil Price

Olesya Zalata — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Olesya Zalata Affiliation: Jun. 13, 2026 I oppose moving from quarterly to semiannual SEC reporting because transparency tends to decrease when disclosure becomes less frequent. Investors rely on regular reporting to monitor financial performance, identify risks early, and hold management accountable. Longer reporting intervals equals larger information gaps, which can make it easier for problems to go unnoticed and harder for ordinary investors to make informed decisions.

Olesya Z, Accountant, Anchorage AK

Pamela Coleman — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Pamela Coleman Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
I oppose the change in quarterly filings. I worked in two aspects of governmental finance and have seen a increased uptick in fraud and "stretching the rules" on a local level and cannot comprehend the vastness fraud will occur with the available funds this will provide. When looking at the local band treasurer "borrowing funds to make ends meet" and the tiny amount that example brings forth, I can only imagine the temptation this would bring. The only way to catch fraud is to set benchmarks for review. I do not want someone to have undocumented access to my hard earned earnings to eventually be pardoned for improperly using/investing said fund. Audits are based on benchmarks, keep them there. (I am sure AI will be able to file it with no effort, right?)

Pamela Engel — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Pamela Engel Affiliation: Jun. 13, 2026 To the esteemed decision-makers influencing financial disclosure policies,

I am writing to advocate strongly for the preservation of quarterly financial reporting requirements. My perspective is rooted in a deep conviction that robust transparency is not merely a regulatory preference, but an indispensable pillar supporting both the vitality of our investment landscape and the fundamental health of the broader economy.

Timely and consistent financial disclosures, delivered on a quarterly basis, form the bedrock of informed decision-making for investors across the spectrum, from individual savers to large institutional funds. This regular cadence of data empowers them to accurately gauge a company's operational performance, assess its financial stability, evaluate investment risks, and effectively allocate capital. Reducing this frequency would inevitably create an information void, fostering uncertainty, increasing speculative tendencies, and ultimately eroding the trust essential for a vibrant capital market. An investment environment characterized by clear, consistent data is crucial for efficient capital allocation, which in turn fuels innovation, job creation, and sustainable economic growth.

Moreover, the significance of regular transparency extends far beyond the immediate interests of shareholders. Quarterly reporting provides critical insights that enable policymakers, economists, and the public to monitor economic trends, anticipate potential challenges, and identify emerging opportunities with greater clarity. A market operating with high levels of transparency is inherently more resilient, predictable, and fair. Conversely, any move to lessen these disclosure requirements risks creating information asymmetries that could destabilize markets, hinder equitable participation, and impede long-term economic prosperity.

As a retired educator and a concerned citizen from Wisconsin, I have always believed in the power of knowledge and clarity. These principles are just as vital for our economic system as they are in education. Upholding quarterly reporting is not simply about maintaining a bureaucratic standard; it is about upholding a commitment to an open, equitable, and robust economic future for all Americans.

I respectfully urge you to ensure that quarterly financial reporting remains a foundational requirement.

Sincerely,

Pam Engel
Retired Educator and Concerned Citizen
Wisconsin

Peter Fitch — Jun 13, 2026
Subject: S7-2026-15 Comment From: Peter Fitch Affiliation: Jun. 13, 2026 Peter Fitch, small business owner, and investor: this is ridiculous. Quarterly reporting has been around for many years because it promotes transparency and enables investors to closely monitor the businesses they invest in. If the rule changes to allow semiannual reporting, investment in companies who choose the new standard will fall because investors will have less confidence that the company is managing itself adequately.

Peter Monaco — Jun 13, 2026
Subject: S7-2026-15 Comment From: Peter Monaco Affiliation: Jun. 13, 2026 Transparency is paramount, especially as technology allows for so much innovation and business becomes increasingly technical. Shareholders, especially retail, deserve to be able to judge and review the companies they choose to invest in. Quarterly reporting is key to us retail shareholders. The government’s duty is to the people, not to private interest.

Peter M, auto finance loss mitigator

Peter Sawyers — Jun 13, 2026
Subject: S7-2026-15 Comment From: Peter Sawyers Affiliation: Jun. 13, 2026 Quarterly results provide all investors with better, more frequent information about company performance. Less frequent reporting would significantly reduce insight, especially for small investors.

Petrea Delich — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Petrea Delich Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Transparency should be a priority of any of our government agencies. This proposed law takes much of that away. It would be great if the SEC could maintain its integrity with the people, as during this current time we find ourselves in. It is becoming more difficult to to trust the big coporations already.This proposed change only serves to allow the big corporations to be less transparent and to act with less integrity to the people

Pierre Fevrier — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Pierre Fevrier Affiliation: Jun. 13, 2026 My name is Pierre. I'm a firefighter and live in north Texas. I object to companies only reporting their results twice early. The less companies have to release results, the less they are accountable, the less money for us. For most Americans who have money invested in the stock market, we are hoping to improve our quality of life and purchasing power as we get older. Social security is a joke, most of us won't see a dime. The American people deserves the right to keep companies accountable after we have bailed

failing big companies so many times in the last 20-30 years and more. We do not want to do that again, ever. It’s time the little man gets treated fairly instead of being exploited.

Professor Frequency — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Professor Frequency Affiliation: Jun. 13, 2026 I am Steve Mathews, Master's level group psychotherapist, retired. I live in south central Louisiana. I do not want my life savings to lose a third of its value, as it will under a change to twice annual instead of quarterly reporting. Rules which favor large corporations and billionaires at the injury of ordinary small investors will concentrate national wealth into ever fewer hands. That will set up America's economy for another collapse like the market crash of 1929. It will function in contravention of the SEC's regulatory mission, which is its reason for existence.

Purnima Nanayakkara — Jun 13, 2026
Subject: Keep reporting quarterly From: Purnima Nanayakkara Affiliation: Jun. 13, 2026 Dear SEC Millions of people have years of savings in the US markets. We cannot afford to lose it all in experiments or decisions that will benefit a few.

The reason we invest in these assets in this country is because historically the US regulatory bodies have been transparent and instituted checks and balances to protect all shareholders. The big investors will continue to fund their own proprietary research.

By making reporting semi annual small investors will lack the information they depend on. Insider trading will increase and we will all be worse off for lack of information about companies.

I hope all existing processes like lock-up periods for IPOs will also be taken into account before making such decisions. This needs to be thought through and presented as a proposal to investors before implemented. I only heard of this through social media.

Please do not stop something that works!

Thank you
P. Nanayakkara

Quez2102 — Jun 13, 2026
Subject: S7-2026-15 Comment From: Quez2102 Affiliation: Jun. 13, 2026 We went down this road once already. The quarterly's has kept the majority of company's honest or as honest as they can be. Let's avoid ENRON all over again.
This is keeping my investments safer.

Rebecca Russell — Jun 13, 2026
Subject: S7-2026-15 From: Rebecca Russell Affiliation: Jun. 13, 2026 Hello,

My name is Rebecca and I am the COO of an SMB. Everyday Americans are losing something every day these days - rights, safety, dignity, affordability - and rolling back protections that were put in place as a result of Enron and the dotcom burst will only further contribute to this. We invest our money and take the hits, even when the market is rigged for a payout by the current administration, but in the age of AI and the world's first trillionaire - an unprecedented time to say the least - we need protections, even something as small as quarterly reporting. That's part of the deal. Wealth consolidation is at an all time high right now. Regulatory bodies shouldn't be making that easier for people at the top. It's on you to protect us from getting swindled. We're already on the cusp of an economic meltdown due to bad policy, corruption, and unnecessary international conflicts. If you want to pile onto that, the American people will know who you truly serve and protect.

Do the right thing. Keep protections in place. Americans will continue to have faith despite current bumps, but only if you uphold your part of the deal.

Thank you for your time,

Rebecca

Rob Colvin — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Rob Colvin Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Changing the rules or financial reporting would be detrimental to the retail investor. This, at a time when knowing where out money is going is paramount in an age of runaway valuations. It would be a disservice to the public to change reporting requirements and create an even further bifurcated economy.

Rob Henning — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Rob Henning Affiliation: Jun. 13, 2026 It is an absurd thought given the wave of AI hitting the shores. Reporting should be quick, easy, and accurate. The rule should change the other way, more reporting not less. What are you people thinking?

vr,

Rob Henning

Adams, TN

Rob Lane — Jun 13, 2026
Subject: S7-2026-15 Comment From: Rob Lane Affiliation: Jun. 13, 2026 Quarterly reporting provides an early warning system. Annual reporting can hide problems for months, allowing budget overruns, compliance issues, operational risks, or performance declines to grow unchecked. Quarterly reviews create regular accountability, improve forecast accuracy, and give leadership multiple opportunities each year to adjust course before small issues become expensive problems. The reporting burden is often far less costly than making decisions with outdated information.

We need reporting requirements to protect the American public.

- Rob Lane

Robbie Silver — Jun 13, 2026
Subject: S7-2026-15 Comment From: Robbie Silver Affiliation: Jun. 13, 2026 I strongly request that quarterly reporting be maintained so that I can make sound financial decisions. This also allows any fraudulent activities to be spotted sooner (rather than when it is too late). As an investor I feel I have the right to this information.
Roberta Silver

Robert Abel — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Robert Abel Affiliation: Jun. 13, 2026 I support quarterly reporting.

I was laid off in July of 2024, three days before turning 60. With job market conditions, I had to retire.

I have my retirement accounts invested in stocks and bonds. I can't afford to lose value in my retirement account. Since history shows stock values are impacted negatively that impacts my retirement portfolio. Why fix something that isn't broken?

I have learned what gets measured gets done. If the details are not available or accurate how do we hold the corporations and their leaders accountable? This policy reducing reporting will negate transparency and accountability. And history shows this leads to more greed and corruption.

Whomever is pushing the reduced reporting through the SEC must be part of the 1% as they want more money and control for themselves and fleece the rest of us.

Robert Abel

Robert Dudgeon — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Robert Dudgeon Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
I invest in the stock market to protect my future retirement funds from persistent inflation (4.2% in May!), and I rely on public disclosures to make good trades. Quarterly disclosures make sense, companies that rely on public funds should have to disclose financial information to the public, and the longer that companies can hide information from the public the longer they can decieve investors about the true value of their shares.
Rule S7-2026-15 would make the stock market more volatile and make small investors like me consider pulling money out of the stock market over fears of losing money to fraud/deception, please retain quarterly disclosure requirements and do NOT pass Rule S7-2026-15.

Robert Faris — Jun 13, 2026
Subject: S7-2026-15 Comment From: Robert Faris Affiliation: Jun. 13, 2026 This is but one loophole and it should shut.

Robert Finlay — Jun 13, 2026
Subject: S7-2026-15 Comment From: Robert Finlay Affiliation: Jun. 13, 2026 Do not change what you are doing,the people need transparency and regular order especially from this government!

Robert Harrison — Jun 13, 2026
Subject: S7-2026-15 Comment From: Robert Harrison Affiliation: Jun. 13, 2026 Please keep quarterly reports for the smallest degree of fairness and transparency in your already rigged system that favors scheming and lying insiders. If you don't, your blood will wet the guillotine blades we are preparing for you. Thanks.

Sent from my iPad

Robert Horvath — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Robert Horvath Affiliation: Jun. 13, 2026 The SEC's proposal to move from quarterly to semi-annual reporting isn't a paperwork reduction. It's an information transfer, from retail investors to institutions.
Large funds can afford proprietary data, management access, and sell-side research. The individual investor cannot. Quarterly filings are one of the few mechanisms that give the public a fair look at the companies they own. Cut reporting frequency and you widen a gap that already favors those with resources.

The promise embedded in American capital markets has always been that discipline and research could put any investor on equal footing. That promise depends on access to timely, accurate information. Semi-annual reporting cuts the data window in half and hands institutions a six-month head start twice a year.

Reduced transparency does not reduce regulatory burden in any meaningful way for investors. It reduces accountability. Management teams will have less public scrutiny of quarterly decisions, more time to bury underperformance in annual summaries, and more room to manage narratives rather than results.
The SEC exists to protect investors and ensure fair markets. This proposal does neither. Retail investors already compete with better-capitalized, better-connected opponents. Giving those opponents an additional information advantage is not modernization. It's capitulation.
I urge the Commission to reject this proposal and preserve quarterly reporting requirements for all publicly listed companies.

Robert M Deems — Jun 13, 2026
Subject: S7-2026-15 From: Robert M Deems Affiliation: Jun. 13, 2026 The Trump Vance Administration is Breaking the Law by trying to Rewrite the Regulations through Executive Orders, which are Not Laws, because Both Chambers of Congress did not Pass a Bill for the Sitting President to Sign into Law in the Federal Register of Laws!

Robert Mulvey — Jun 13, 2026
Subject: S7-2026-15 Comment From: Robert Mulvey Affiliation: Jun. 13, 2026 Bad idea. Allows illegal activities to go on 3 months longer.

Robert Rosati — Jun 13, 2026
Subject: S7-2026-15 Comment From: Robert Rosati Affiliation: Jun. 13, 2026 We need to have full disclosure to keep small investors as a liquidity source. Dark secrets only benefit those who do not need protection or insurance against capital losses.

Robert Rutkowski — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Robert Rutkowski Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
SEC quarterly disclosures help me make informed decisions, and the SEC shouldn't take vital information away. DO NOT disclose any personal trading or investing information.

Robert Weinstein — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Robert Weinstein Affiliation: Jun. 13, 2026 Dear SEC
My name is Robert Weinstein. I am a bus driver. Quarterly reporting is important to me as I need to retire with the knowledge that my savings are reported often and honestly .
Transparency is critical in these times.
Thank you for your consideration
Regards
Robert Weinstein

ROGER WILDE — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: ROGER WILDE Affiliation: Jun. 13, 2026 To: SEC
I am a former High School English Teacher and Assistant Principal. I retired after 32 years in the same school system. Mine is a single earner household, so it was a struggle to put away money to eventually supplement my pension. Each time the markets dropped sharply, I lost about a third of this savings. Through subsequent market earnings and my regular contributions, I finally have a savings balance equal to the amount I had before the most recent sharp market downturns. If the

SEC decides to change to reporting only twice a year, I stand to lose a third to a half of my savings. This change would hit those like myself who earned a modest salary and dutifully put money away to supplement our pensions the hardest. We are the largest block of regular savers our nation has. Please help us to keep our hard earned money by keeping your reporting on a quarterly basis.
Thank you,
Roger Christopher Wilde, retired English teacher and assistant principal in Baltimore County, MD

Rosie Maloney — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Rosie Maloney Affiliation: Jun. 13, 2026 It has become increasingly apparent that the daily realities for a significant portion of the American populace are fraught with considerable hardship and escalating challenges. The economic pressures, societal strains, and systemic obstacles confronting ordinary citizens seem to intensify with each passing day, making stability and upward mobility feel increasingly out of reach for many.

Concurrently, there is a pervasive concern that those occupying positions of substantial wealth and influence are not bearing an equitable share of responsibilities. It often appears that the very burdens and obligations that contribute to the collective well-being have been systematically

lightened for the affluent and powerful, perhaps even to a degree that exacerbates the struggles faced by the broader population.

I’m on a fixed income. I can’t afford the SEC to go back to twice a year earnings. I would lose over $200,000 of my life savings!! We need to keep quarterly earnings reports! It makes for a stronger economy. We don’t need to be going backwards! All the countries that have quarterly earnings reports are wealthier than those that do twice a year reporting. Why would you go backwards when the statistics clearly show that doing quarterly earnings reports is better and brings in more money.

Sara sarailla — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Sara sarailla Affiliation: Jun. 13, 2026 Sara Lambert, Retired Health Information Technology and Regulations, Quarterly reporting is important to sustain citizens belief in our financial system. Our country was built by all citizens, rich and those with less financial resources and should continue to support the needs of all citizens.

Sara

Sarah Corbett Morgan — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Sarah Corbett Morgan Affiliation: Jun. 13, 2026 Dear Chair Atkins and Commissioners,

I am writing as an individual retail investor to oppose the SEC's proposed rule permitting public companies to shift from quarterly to semi-annual interim reporting.

While I understand the goal of reducing compliance burdens on public companies, I believe this proposal does so at the direct expense of the investors those disclosures are meant to protect — particularly small investors like me.
Unlike institutional investors, I do not have access to private management meetings, paid analyst research, or alternative data services. Quarterly filings are often my primary — and sometimes only — reliable source of information about the companies I own. Cutting that to twice a year means six months of business deterioration could pass before I have any meaningful ability to reassess my investment.

This asymmetry is precisely the problem. Large institutional investors have many ways to track company performance between official filings. Retail investors largely do not. A move to semi-annual reporting would widen that information gap significantly, leaving small investors more exposed to earnings surprises, insider advantages, and management missteps that go undetected for longer periods.

The SEC's own 2018 request for comment on this topic found that investor advocates broadly supported retaining quarterly reporting. That sentiment has not changed — the burden being reduced here falls on companies, while the cost falls on investors.

I urge the Commission to preserve the quarterly reporting requirement and reject this proposal.

Respectfully submitted, Sarah C Morgan, Vancouver WA 98683

Sarah Flanders — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Sarah Flanders Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
I want to keep quarterly reports.The markets move very quickly now and we can't return to the past. This is a blatant violation of the responsibility of our government's responsibility to ensure the stability of our investments and protect the economy from bad actors. I depend on my retirement account for my safety and security in old age.

Scarlet Lango — Jun 13, 2026
Subject: S7-2026-15 From: Scarlet Lango Affiliation: Jun. 13, 2026 In terms of national economics, is this change a necessary priority? I think not. My other question is, who does this change serve? If not all of the people, then who? Living in Houston during the ENRON implosion was like living in a ghost town. Since almost everything in the city had some connection to it. Not only did the city loose its emotional, social, abdand economic mojo. So many small businesses, local services, and hundreds of employees were cruelly exploited and left hanging. Imagine starting your career with a lauded firm, to then see your work be criminalized. This is not the world we should be leaving to our decendents. The S/O rule is working just fine. Changes would jumpstart a new season of fraud. Since, brilliance does not mean decency. Talent does not mean trust. And image does not mean justice. As a nation originated by lies and theft, it is absolutely necessary to maintain exact and penalty driven policy to erase any lingering lust for fraud in the quiet places. This is a reflection of the double standard that gets called competition. Leaving CEOs to their own self serving ambitions is like letting a child play with matches every other month. One of those months an explosion happens. Who's accountable then? It's important to recognize that some tweeking may be needed. Since we are in a much more digital world now and many businesses cross international lines. Other countries and industries will certainly limit any collaborations if such a change occurs. Don't let a lawless, feckless, incompetent, cruel, and greedy administration be the reason the US is locked in its own isolation. Keep the quarterly reporting in tact. No other administration since the implementation of S/O has sought such a change. That's because they were not reckless. This one is. Don't fall for it. Keep Sarbanes-Oxley as it is. There's plenty of unsavory competition out there. What's needed more is honorable cooperation. Let us be about credible progress, not excessive greed.

Office of the Secretary
U.S. Securities and Exchange Commission
100 F Street, NE
Washington, DC 20549
RE: Opposition to Proposed Rule Change on Semiannual Financial Reporting for Public Companies.
To Whom It May Concern,

I am writing to express my strong opposition to the recent proposal that would allow public companies to transition from quarterly (three-month) financial reporting to semiannual (six-month) reporting.

As a retired U.S. veteran my financial security relies entirely on the integrity and transparency of the American financial markets. My retirement funds are invested in companies regulated by the Securities and Exchange Commission (SEC), and I depend on consistent, timely information to ensure my hard-earned savings are safe.
Reducing the frequency of financial disclosures directly hurts everyday, retail investors like me. Leaving a six-month gap between reports means that corporate executives, high-priced lawyers, and massive institutional insiders will maintain a constant, clear picture of a business's health, while individual investors are left completely in the dark. By the time a regular citizen finds out a company is struggling, it will be six months too late to protect their life savings.

Quarterly reporting has been the bedrock of market transparency and investor confidence for over half a century. It ensures a level playing field where corporate insiders cannot easily hide operational failures or shifting financial health from the public.
I urge the Commission to protect the everyday investor, uphold its core mission of maintaining fair and orderly markets, and reject this proposal. Financial reporting must remain at the current three-month interval.
Thank you for your time and your service to our financial markets.
Sincerely,
Shawone Hudson
U.S. Veteran (Retired)

Shelley Frost — Jun 13, 2026
Subject: S7-2026-15 Comment From: Shelley Frost Affiliation: Jun. 13, 2026 Shelley Frost, Engineer. The SEC's purpose is to maintain fair and orderly markets and prevent market manipulation, insider trading, and fraud. Reducing reporting to twice monthly does not serve the purpose of the SEC, it counters by making the aforementioned actions easier to do, and making you responsible for cresting an unfair market.

Shelley Whaley — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Shelley Whaley Affiliation: Jun. 13, 2026 Dear [Relevant Department/Community Leadership or Name if known],

As a homeowner and concerned resident within Chalfant Valley, California, my name is Shelley Whaley, and I am writing to formally request a consistent channel of communication regarding matters that impact our community.

To ensure all residents are adequately informed and can remain engaged with ongoing developments, I propose the implementation of comprehensive quarterly reports. These reports would serve as a vital tool for transparency, providing updates on key areas such as:

* Local community initiatives and progress.
* Any current or upcoming infrastructure projects and their timelines.
* Significant local council or community association decisions.
* Public safety updates and neighborhood watch programs.
* Environmental conservation efforts or local policy changes affecting the valley.
* Financial summaries or budgetary allocations pertinent to homeowner contributions or community funds (if applicable).

Regular, detailed communication of this nature would greatly assist homeowners in understanding the evolving landscape of Chalfant Valley, fostering a more connected and informed community.

Your consideration of this request and commitment to providing timely, structured updates would be highly valued.

Sincerely,

Shelley Whaley
Chalfant Valley Homeowner

Sonia Castro — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Sonia Castro Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
As a retail investor, I am strongly opposed to Rule S7-2026-15. Regular quarterly reports (Form 10-Q) are vital for everyday investors to monitor the health of public companies on equal footing with Wall Street institutions. Allowing companies to wait six months to release information will hide critical financial developments, failures, or operational shifts in the dark for far too long. This rule favors insiders who have direct corporate access at the expense of retail investors. The SEC's core mission is to protect everyday investors, and reducing corporate transparency entirely contradicts that

purpose. Please reject this rollback.thanks!

Stephanie O'Malley — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Stephanie O'Malley Affiliation: Jun. 13, 2026 I DO NOT APPROVE OF THIS.

It is heinous it is even being proposed.

Stephanie Sullivan — Jun 13, 2026
Subject: S7-2026-15 Comment From: Stephanie Sullivan Affiliation: Jun. 13, 2026 Stephanie Sullivan. Retiree. I oppose the proposal to change the SEC requirement for quarterly reporting. I rely on quarterly information to make decisions. Longer gaps create an unfair advantage for corporate insiders and create less transparency. “Optional” doesn't fix the problem because companies that opt in to less frequent reporting schedules are often the ones whose investors most need frequent updates. And the savings to companies aren't worth the cost to me and are unlikely to be passed along to ordinary investors.

Stephanie Thomas — Jun 13, 2026

Stephen D Hager — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Stephen D Hager Affiliation: Jun. 13, 2026 As history as proven, quarterly reporting instills a greater trust by investors in publically traded companies.

Quarterly reporting allows for greater scrutiny of company earnings
and provide the means to track company performance against stated goals in the cprporate annual review. Quarterly reporting keeps corporations accountable because of greater scrutiny by investors forcing executives to justify / promote changes in performance.
All this provides for a better informed investor and a more transparent, accountable corporation.

Steven Hanna — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Steven Hanna Affiliation: Jun. 13, 2026 My name is Steven Hanna. I'm a software engineering and security
leader based in Oakland, California, and I'm an individual investor
who actively manages my own portfolio. I day trade, income trade, and
hold long and short positions. I have 15 years of investing and
trading experience and I use a huge variety of trading instruments.

I strongly support keeping quarterly reporting. Moving to six-month
reporting would be a major step backward for ordinary investors.

I have years of experience managing public-market investments,
including individual stocks, ETFs, equity compensation, options,
hedges, and income-oriented strategies. I read quarterly reports
because they matter. They help me evaluate revenue growth, margins,
cash flow, debt, dilution, guidance, risk disclosures, and whether a
company's investment thesis is still intact.

That information affects real decisions: whether I hold, sell, add to a position, diversify concentrated stock exposure, or hedge downside risk.

Six months is simply too long in today's market. A company's outlook can change dramatically in that time because of interest rates, competition, cybersecurity issues, AI disruption, customer demand, litigation, or execution problems. Without quarterly reporting, investors would be making decisions with stale information while stock prices continue moving every day.

That would not reduce risk. It would increase it.

Less frequent reporting would also widen the gap between ordinary investors and large institutions. Larger investors often have more access to analysts, management commentary, alternative data, and market intelligence. Individual investors depend much more heavily on public filings. Taking away quarterly reports would make the market feel less fair and less transparent.

I understand the concern that quarterly earnings can encourage short-term thinking. But the problem is not quarterly reporting itself. The problem is excessive focus on quarterly guidance and short-term EPS targets. The SEC can address that without reducing the basic financial information investors need.

Quarterly reporting keeps management accountable and gives shareholders a regular check on the condition of the business. Switching to six-month reporting would create longer information gaps, bigger surprises, and less confidence in public markets.

Please preserve quarterly reporting requirements.

Respectfully,
Steven Hanna, Ph.D.
Senior Software Engineer and Frequent Trader and Investor
Oakland, California

Sue Birch — Jun 13, 2026
Subject: S7-2026-15 Comment From: Sue Birch Affiliation: Jun. 13, 2026 Susan Birch (Retired Credit Analyst)

Average Americans have the right to know what is happening with their invested savings…increases, decreases, withdrawals, the payments withdrawn by the financial institution, etc.
Our financial manager changes investments based on the data.

The systems are already in place. Why change them? What's the SEC trying to accomplish?

Sue Custer — Jun 13, 2026

Sule Sauvigne — Jun 13, 2026
Subject: S7-2026-15 Comment From: Sule Sauvigne Affiliation: Jun. 13, 2026 I am writing in regards

to the proposal to eliminate quarterly earnings results for public companies, and instead require seminal reporting. I believe this will be a detriment to retail investors like myself. I rely on those quarterly results to make investment decisions for myself and my family. It would be unfair to regular people like myself who have no connections to Wall Street or companies corporate boards to eliminate the quarterly reporting. Please consider the negative impact on us when making your decision. And you're it has been found that moving to semi annual reporting has not made any significant difference for companies but has her investors. It's a myth seminal reporting will make companies focus on long-term versus short-term results. Thank you.

Sent from my iPhone

Sundar Narasimhan — Jun 13, 2026
Subject: Comment on S7-2026-15 - please keep the currently quarterly reporting period! From: Sundar Narasimhan Affiliation: Jun. 13, 2026 Six months is too long a reporting period, especially in today's fast-moving economy driven by rapid technological advances and AI. While quarterly cadences for closing books and financial reporting may seem like an overhead burden to some and perhaps encourage longer term investments, the payoff in terms of compliance and trust in U.S. corporations is enormous. As an investor and a citizen, I am highly concerned that lengthening the period—especially through a "check-the-box" voluntary system—will severely increase adverse selection risk, a danger the SEC's own Investor Advisory Committee has explicitly warned against. A voluntary framework will inevitably play into the hands of underperforming companies, allowing firms with deteriorating performance, emerging risks, or governance vulnerabilities to hide behind extended dark periods. This risk is heavily backed up by financial literature and a real-world experiment in the United Kingdom. Specifically, the study "The Impact of Mandatory Quarterly Reporting" by the CFA Institute demonstrates that reducing reporting frequency harms market efficiency by decreasing analyst coverage and widening bid-ask spreads, without delivering the promised benefits. Last but not least, there is no credible empirical evidence that lengthening the reporting period encourages long-term thinking in corporations or promotes a wiser use of capital. The argument that quarterly reporting inherently breeds destructive "short-termism" is a myth debunked by data. Please, therefore, protect retail investors and market integrity by keeping the current, mandatory quarterly reporting period.

Sincerely,
-Sundar

Sunny Clark — Jun 13, 2026
Subject: S7-2026-15 Comment From: Sunny Clark Affiliation: Jun. 13, 2026 Sunny Clark, teacher. Please keep publishing quarterly reports QUARTERLY. I can't see a good reason for lawyers, executives and investors to have access to the information but not the little investors like me. I'm tired of this administration and its cronies figuring out more ways to swindle the American public at every opportunity and get away with it.

Tavia Levy — Jun 13, 2026
Subject: S7-2026-15 Comment From: Tavia Levy Affiliation: Jun. 13, 2026 Hello,

I'm writing to let you know that I want companies to continue providing quarterly reports because it's important for me to see my investment records each quarter so I can make informed decisions. Bi-annually is too long and keeps me in the dark.

Thanks,

Tavia Levy,
Project Manager

Teltechtrainer — Jun 13, 2026
Subject: S7-2026-15 Comment From: Teltechtrainer Affiliation: Jun. 13, 2026 Martin Franz, AT&T, retired.
It's data, 0's and 1's stored in files. You mean to tell me these tech-savvy, AI users can't automate that process? I suspect most small business owners have to keep up with their finances on a day-to-day basis.
Quarterly reporting needs to be mandatory. If your profit margin is so small that the expense of quarterly reporting affects your bottom line, maybe you're in the wrong business.

Martin Franz

AT&T retired

Teresa White — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Teresa White Affiliation: Jun. 13, 2026 History clearly shows that going back to twice a year, not quarterly, is stepping back not moving forward. All Americans were told to save for their own retirement and we have. Without companies being held accountable to report quarterly then where is our safety net.

The SEC is the organization that holds companies accountable. It keeps the playing field level. Do not reverse something that works to build wealth for those of us who have invested in themselves. Prove to the American people that you are working in our best interests.

Teresa White, unemployed, North Carolina

Thaddeus Walcutt — Jun 13, 2026
Subject: S7-2026-15 Comment From: Thaddeus Walcutt Affiliation: Jun. 13, 2026 Thaddeus Walcutt, retired. This requirement is the only way the average stockholders has of knowing if their investment is sound or in need of reevaluation. I actually believe a monthly report is better now that ai can number crunch for you given real data. It would be good to see more action from the SEC on those taking advantage of insider information in our varied political offices. I am on a fixed income so that I protect what little investments I have so keep the quarterly at minimum or update the SEC with AI and move to monthly reporting. Thank you for your attention in this matter.

The Allworx Handyman — Jun 13, 2026
Subject: Comment on S7-2026-15 From: The Allworx Handyman Affiliation: Jun. 13, 2026 Quarterly

reposting is essential to sustaining the growth cultivated and the position of power the American stock market and dollar are barely holding onto as it is. Other nations have been posturing themselves to stage a takeover of the dollar for years now, this would essentially give them the keys to all the doors in my opinion, in top of the already bad scenario this brings along with it for the typical investor.

TheAtomicSoul — Jun 13, 2026
Subject: Comment on S7-2026-15 From: TheAtomicSoul Affiliation: Jun. 13, 2026 So these companies and big investors are gonna know something is wrong and bail from the stock, leaving individuals holding the bag. Yea, this'll do nothing but support insider trading- but since they can do it over several months, it'll be harder to prove.

TheDudesChezMontreal — Jun 13, 2026
Subject: S7-2026-15 Comment From: TheDudesChezMontreal Affiliation: Jun. 13, 2026 This attempt to loosen regulations on quarterly reporting exists for the sole interest of businesses to behave fraudulently.
Please keep the current regulations in place.

Theo Panton — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Theo Panton Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission: In this day and age, we should be given more information not less. The tools that these companies have access to should be used to provide more transparency to the public about their performance. The SEC is there to help prevent companies from doing illegal activities like lying to their shareholders or the public. We've seen through two financial crises (the dot com bust and the great recession) how some companies will be d the rules while leaving their

investors (including the government) with nothing. More time in the shadows allows this behavior to grow. Your job is to protect the people not companies. I check my investments performance multiple times a year. Don't make this harder for me and the millions of others that do the same.

Theodore Hudson — Jun 13, 2026
Subject: S7-2026-15 Comment From: Theodore Hudson Affiliation: Jun. 13, 2026 I strongly believe in the ability to review a company's value and position in the market quarterly. I'd rather have this review more frequent.

Place do not remove quarterly reporting requirements.

Sincerely,
Theodore Hudson

Theresa and Andrew Patt — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Theresa and Andrew Patt Affiliation: Jun. 13, 2026 When public filings go quiet, big institutions and insiders still find ways to gauge how a company is doing. It is the everyday investor, working from what is public, who gets left in the dark.

Theresa Berman — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Theresa Berman Affiliation: Jun. 13, 2026 Theresa Berman here, South Dakota resident.
Please do not make this change! Quarterly reporting by businesses gives investors frequent feedback on how the company is performing. This data allows individual investors who are not professional fund managers timely, actionable information about their investments. This holds companies more accountable for their business decisions and surfaces problems before they grow into serious issues. Companies should not hide their problems from their investors and other stakeholders like employees

---

Theresa Buzek — Jun 13, 2026
Subject: Comment on S7-2026-15 From: Theresa Buzek Affiliation: Jun. 13, 2026 Quarterly reporting is necessary for good financial oversight. Semiannual allows longer timeframe to manipulate the system. I balance my checkbook almost on a daily basis if not weekly and very seldom just monthly; forget doing it once every six months.

I don’t think it’s too much for companies to have to tell us how their financial standings are once every three months. Congress should have to follow such strict rules to not become millionaires (can we say insider trading) while the rest of the Public struggles to understand how and where our funds are being invested and utilized so that we can continue to make good choices about where our money needs to be to benefit us the most.

It is especially important for our
financial future that we have the opportunity to make decisions based on CURRENT financial outlooks of a company. Keeping the current information from us while insider trading runs rampant is corrupt, pure and simple.

Tina Brisco — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Tina Brisco Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Please have everyone Facebook Google Elon Musk And the President Trump , European Parliament And All These Other Companies to put my Grandfather Royalty Account And My Go Fund Me Account Money Back They Who Have Been Stealing and covering up AI as well I never gave permission to no one to spend touch access or anything else on my behalf I was unaware they kept it covered up while spending also my settlement from Facebook Google leadership board.

Tina Roe — Jun 13, 2026
Subject: S7-2026-15 Comment From: Tina Roe Affiliation: Jun. 13, 2026 You work for the people! Act like it! Do not let companies hide the money from the people who await payment. Criminals hide finances.

Tina Schneider — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Tina Schneider Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission: this would be devastating to not only me but millions of Americans who worked hard and invested in these companies only to have it all taken away through no fault of their own. There is no plausible reason to do this, Period.

TL Martin — Jun 13, 2026
Subject: Comment on S7-2026-15 From: TL Martin Affiliation: Jun. 13, 2026 Quarterly reporting is a very bad idea. As an RN, I worked very long and difficult hours with my hospice patients, and then with my staff as I moved into management. I lived modestly and saved a quarter of my paycheck every pay day to save for my retirement. Sadly, my husband was very ill, I had to retire 6 years before I had planned to in order to care for him at home. My retirement account is not where I planned.
My husband died 3 years ago. His Social Security of course dies with him.
My retirement savings is going fast. If that account suffers losses due to the shoddy handling that this 6 month accountability goes through, I will lose everything, including my home and my health. Medicare does not cover much of the care I need, especially my dental care.
This administration has already done enough to destroy any respect I had for the government. This move would be devastating to Americans, we are suffering enough with inflation, the cost of living, gas and grocery prices.
I implore you NOT to pass this law.

Vicki Martin Retired — Jun 13, 2026
Subject: File No. S7-2026-15 From: Vicki Martin To whom it may concern. There is no reason for businesses not to report quarterly unless they have something to hide from regulators and their investors. The infrastructure to do this is in place already and functioning. Allowing this to change is a disservice to the public and to investors who will not have current information upon which to base investing decisions. This will cause reluctance to invest and slow the economy. There is no benefit to the American economy from this move.

Vickie Balewski — Jun 13, 2026

william stuber — Jun 13, 2026
Subject: S7-2026-15 Comment From: william stuber Affiliation: Jun. 13, 2026 Reducing the frequency of the reporting by corporations is a terrible idea. I’ve been part of quarterly filings and reporting for most of my career as a financial professional. My experience spans several organizations and covers all levels of the process, from forecasting, planning and SEC reporting. There are so many factors that can impact a company or industry within a quarter especially in this world of fast changing technology. Reducing the reporting to two times a year is an obvious attempt to invite more deception and have potentially less information passed on to investors that are not insiders of an organization. Absolutely a bad consideration for the health of our economy and investors.

Zina Urrutia — Jun 13, 2026
Subject: My view on Rule S7-2026-15 From: Zina Urrutia Affiliation: Jun. 13, 2026 To the Securities and Exchange Commission:
Please do not omit the quarterly disclosures in reports people, companies and businesses need to decide where to invest their money. The more information available about the inner workings of businesses and their financial situations the more stable the investments made in our country and more stable our economy overall. Everything trickles down from the top in one way or another and effects the whole of our society from the capital available for a business to succeed to the wages and retirements of its employees to the price of goods for families in stores. If we start eliminating data we are risking a breakdown in our whole economy.

✅Yahoo! Mail — Jun 13, 2026

Subject: Comment on S7-2026-15 From: ✅Yahoo! Mail Affiliation: Jun. 13, 2026 I am writing to emphasize the critical importance of maintaining our current quarterly financial reporting schedule. This regular cadence provides invaluable, timely insights into our organization's financial health and operational performance.

A quarterly reporting framework is instrumental for several key reasons: it enables robust oversight, facilitates proactive decision-making based on recent data, and ensures a high degree of transparency and accountability to all stakeholders. This frequency allows us to promptly identify emerging trends, address potential challenges swiftly, and capitalize on opportunities as they arise, thereby supporting more agile and effective strategic planning.

Transitioning to a less frequent reporting cycle would significantly diminish our capacity for close monitoring and responsive action. It could lead to delays in recognizing crucial financial developments, potentially hindering our ability to make informed adjustments and maintain optimal financial stability. We firmly believe that the current quarterly requirement is essential for continuous financial stewardship and sustained organizational success.

Thank you for your careful consideration of this vital matter and for upholding the commitment to comprehensive and timely financial reporting.

Former President
Mark Correctional Systems, Inc.
(A publicly-traded company)

Quarterly filings are essential for accountability and public trust. I personally handled a number of institutional investor presentations. It was a matter of personal integrity for me to insure that all share-holders had accurate information on company performance and that all SEC requirements were fully met. If you're doing what you're supposed to do, why would you want to keep your investors and regulators in the dark.

Continue quarterly reporting and full disclosure in accordance with SEC and GAAP standards. Accept nothing less. Integrity matters.

Aaron McVanner — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Aaron McVanner Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
The job of the SEC is to actually enforce the rules that were put in place to protect market manipulation - this goes back to 1934. The listing requirements to "have the priviliege to access public markets" requires quarterly reporting to give shareholders, the market, and the world a periodic snapshot. 4 times is a year is seasonal and a periodic snapshot. 2 times a year is chaotic, arbitrary, shows a level of incompetence with the basic understanding of seasonality and needs for audits and periodic snapshots.
Removing that standard does not assist anyone accept those with the power to change laws. Regardless of what you decide, the capital markets will speak and will let you know if they agree with your policies.
The SEC has not been able to enforce security violations and fraud for decades, and those that know the way around your inaction will continue to exploit the markets - removing some clause to lesson your burden won't change that.
If someone told you your data had been breached and you responded, "oh, but we just had an audit 5 days ago so that will have to wait for 5 months and 25 days"... would you be in business?

Aaron Patrick — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Aaron Patrick Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I need clarity in investment information, it is imperative that companies are held to a high standard or you risk losing any faith from the investing public. Most money in the stock market is from everyday people, if you hurt the credibility of the market, they will put their money elsewhere, and eliminate the main business strength of the United States.

Adam Paul — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Adam Paul Affiliation: Jun. 12, 2026 Good afternoon,

It is the everyday investor with only knowledge of what is public that will be hurt if quarterly reporting goes away again, just as they were when this was tried in the 1955-1970 era. Big institutions and insiders will still find ways to gauge how a company is doing. The U.S. reported quarterly while winning wars, landing on the moon, and building the most valuable stock market on Earth. European companies that moved to semi-annual reporting saw their trading liquidity dry up, while quarterly reporters held steady. If it isn’t broken, don’t break it.

Sincerely,

Adam Paul
Connecticut

Adrian Perez — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Adrian Perez Affiliation: Jun. 12, 2026 Adrian, Engineer, this is an attack on the middle class that harms us because congress is already trying to kill social security and now you are trying to kill our retirement if this passes. Every single time the SEC has allowed opaqueness, it has ended with more harm to the lower- and middle-class workers. If anything, you should add more reporting, not less. You added opacity in the late 1990s-early2000s and what did we get? The housing bubble that crushed many people. Many recovered but many didn't. Now you want to break us again and take away our ability to retire. Stop this now

Adrian Perez

Adriana Sanchez — Jun 12, 2026
Subject: S7-2026-15 From: Adriana Sanchez Affiliation: Jun. 12, 2026 The earnings report should stay quarterly. We need increased transparency, not reduced transparency

Alan Kennedy — Jun 12, 2026
Subject: S7-2026-15 Comment From: Alan Kennedy Affiliation: Jun. 12, 2026 Alan Kennedy, retired public utility employee, regular quarterly reporting has been a standard economic practice for as long as I can remember. Quarterly reporting allow small investors, pension managers, and worker holder of retirement accounts to compare earnings from various sources and over time past performance of specific investments. Less timely reporting is of no value to those of us dependent on such investments, those who have ample resources will still get timely information by other means such as fee based research advisers. Reducing frequency of when companies have to report earnings only reduces transparency and allows for more concealment of negative information.

Alan Kramer — Jun 12, 2026
Subject: S7-2026-15 Comment From: Alan Kramer Affiliation: Jun. 12, 2026 My name is Alan Kramer, Retired Analyst I believe it should be kept quarterly

Amanda Richey — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Amanda Richey Affiliation: Jun. 12, 2026 My name is Amanda Richey, I'm a commercial insurance account manager. I live in Portland Oregon. This proposed rule change is ridiculous; what case can be made for less transparency? Investors should be provided with more data, not less. In this day and age of mass data mining and meta analysis, the expectation for accurate and timely information should be the standard. Not to mention that the reporting is highly automated and doesn't cause an undue burden on the company to produce. Transparency should be the utmost priority when you're chaining the working class's ability to support themselves in retirement to the stock market.

Amanda Steinke — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Amanda Steinke Affiliation: Jun. 12, 2026 Amanda Marie
Quality Technician

Absolutely not. There should be no reduction in reporting because transparency is necessary. I (and likely the majority of my countrymen) am not willing to lose 1/3 to 1/2 of my savings to this nonsense. It's hard enough in today's world to make sure you have enough for retirement without having to worry about slow growth in the stocks.

Sent from my iPhone

Amber Bressler — Jun 12, 2026
Subject: File No. S7-2026-15 From: Amber Bressler Do not change the current quarterly reporting rules. Historical evidence and academic studies show that investors have done better since the quarterly reporting requirement has been in effect. Do not erase that improvement by reverting to semi-annual reporting.

---

amelia limyao — Jun 12, 2026
Subject: Comment on S7-2026-15 From: amelia limyao Affiliation: Jun. 12, 2026 My name is Amy Limyao, semi retired, from the state of Iowa. I started investing in the market back in late 80's. My investment has grown thru dollar cost averaging. Knowing how a company is performing on a frequent basis is crucial to my decisions whether to sell or not.

Why would you change the current quarterly reporting to twice a year? We need transparency on how a company is performing sooner than 6 months. My investment decisions is based on how the company is performing, the sooner the better. I could lose my lifetime investments for not knowing how the company is doing. I don't want to wait for the evening news to tell that me that the company I invested in is filing for bankruptcy. It will be too late for me to make decision.

Why change a system that works? It doesn't make sense.

Would you keep your money in a company where you don't know how they are performing until 6 months later.

Thank you for taking the time to read my email.

Subject: S7-2026-15 Comment From: Anita Broccolino Affiliation: Jun. 12, 2026 S7-2026-15 Comment

This issue matters even more as I near retirement. Please stop this from happening. I have been actively involved in the stock market throughout the last 30+ years. The value of the quarterly reports of the companies that comprise my retirement and extra stock trades is immeasurable.
This Lack of Transparency is the opposite of what we, the U.S. citizens were sold.
It will further prove this Administration does not care about people, but only Corproations, and the inherent Corruption within.
You will be remembered as complicit with this un-American, unPatriotic B.S. and the blood stains of the unraveling of our Republic and any sense of Democracy left, will be indelible in conjunction with all who vote to allow this.

Quarterly reports need to remain for those companies that are a part of any of the various U.S. Stock Exchanges.

Thank you !
Anita B.

Ann Troy — Jun 12, 2026
Subject: From: Ann Troy Affiliation: Jun. 12, 2026 I am absolutely opposed to reducing quarterly business reporting to semi-annually. The idea of doing this now, in the midst of the maneuverings of the most corrupt, self-dealing administration we've ever seen, when money buys everything — pardons, positions, dark money transactions — is astonishing. Wall Street has been notorious for decades for its firms and seated companies finding ways to bend or circumvent regulations & laws. This proposal suggests that the SEC is either naive or complicit. Is the idea that some entities can 'optionally' or 'voluntarily' report quarterly actually serious?

When the NYTimes was similarly naive in writing up the 'extraordinary' talents of Michael Milken, I remember feeling skeptical; I doubted that anyone was that good. He didn't strike me as a savant. And he wasn't. But he served only part of his sentence for securities violations and fraud, and has a net worth of $7.5B. Speaking of Wall Street's notorious reputation and weak penalties for fraud and scandal — there have been Acts & bills that have been proposed or in place for years — most notably the STOCK Act — that haven't prevented our own legislators from trading in & profiting from prior knowledge.

A lot of what I spent decades saving is in the market. I depend on that money to pay for supports and care as I age. I don't want to be Madoff'ed at 80, or any other age, because despite all the history we've seen, the SEC thought that decreasing the frequency of a reporting requirement was a good idea. We need more, not fewer, guardrails.

Ann M Troy

Anna Fletcher — Jun 12, 2026
Subject: S7-2026-15 Comment From: Anna Fletcher Affiliation: Jun. 12, 2026 I respectfully request that the publicly traded companies still provide quarterly reporting. As an individual investor I use these financial reports to gauge my investments. Semiannual reporting will not be adequate to keep on top of these companies and the data will no longer become relevant. Please continue to have them report quarterly.

Best Regards,

Anna

Anonymous — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 12, 2026 This change is wanted by the corporations and the Trump Administration. It is not in the best interests of the public, who have their retirement money tied up in the market and subject to corporate shenanigans. Why the SEC is even considering this is beyond me. Corporations have managed to finagle too many changes in market regulation already, to the ultimate loss of all of us who have been compelled to trust what we have managed to save for retirement to the market professionals. Reducing transparency harms investors.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 12, 2026 Beth Lampi, nurse, I want to know what's happening to my investments and retirement— especially since this will be my only retirement, if our government gets rid of the programs I've been paying into my entire life for my retirement.

Concerned citizen

Anonymous — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 12, 2026 My name is Rob Sample from Portland Oregon, and my family has a significant amount of our savings in the market. We are both semi retired, fully retiring soon. We are raising our two youngest grandsons and they

are just starting high school, so college is ahead of them. We need the market to stay healthy, we can't afford to lose 30% or more of our savings in the market. We are risk averse, and if reporting goes from quarterly to bi annually, we will probably take our money out of the market.

Warm regards,

Rob

Why do you assume a method of reporting that failed to work previously will work now? Is the current system broken? Why change? Leave it at quarterly reporting

Sent from my iPhone

Anonymous — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Anonymous Affiliation: Jun. 12, 2026 Do not allow this to happen. We are a retired couple who cannot afford to have our investments reduced. I feel like our hard fought for retirement is being assaulted from every side. My husband is a retired college professor who started out at $12,000 a year in '75. We budgeted . We lived within our means. We moved to upstate NY to be able to purchase a home. We contributed to SS. We can't have all our funds reduced so the billionaires can be richer. In addition, we need more not less transparency. Most companies are only interested in the bottom line.

Why go backwards?
This matters to me as quarter to quarter there are fluctuations in markets that greatly affect my investments that I have retired with. I nor most Americans can stand to lose any more than we do now with any random political action affecting all US markets daily. When I need to make changes within investments seeing a report twice a year will not help what already happened months ago and at my age I do not have time to earn what would be lost. Please reconsider going backwards to what was and look forward to what can be by helping consumers by keeping quarterly reporting so that we can make the most of our investments, it matters in our lives.

Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 12, 2026 Do not allow ANY public company to hide their financial results for 6 months. This is unacceptable. Why should the public be in the dark with their investment performance!
Full transparency is what builds trust…all these games to hide what's really happening in financial markets is how we got to the dot com bust and the near bank collapse with real estate credit default swaps! Enough is enough!

Thanks,
Harry B.

Anonymous — Jun 12, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 12, 2026 This is just more blatant corruption by the Trump administration! Do not allow companies to hide this information from the American people, and those who own stock in these companies, a stockholders we have a right to know and see this information. There's a reason these laws were created, and they're to protect the people who invest. Allowing this to happen would not only destroy the stock market, he could destroy the American people in their savings, their portfolios because a company could be completely bankrupt or have embezzled every dime months before stuff. There's no what is happening and make it impossible to sell their stock or find and prosecute the thieves. This is just such an outrageous as a disgusting blatant corrupt system, and I honestly believe that Trump will destroy many of these businesses because he wants the American people poor and starving and begging him for help. He is creating these ugly hateful horrific situations to destroy the Democrats and any sick weak or elderly, and that is the real reason he's pushing for all these data centers so

that AI can take over the jobs while he reduces the population of Americans and causes millions of more deaths.

Aurora Orberg — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Aurora Orberg Affiliation: Jun. 12, 2026 I, Aurora Orberg, BSRS, RT (R) (MR) ARRT, am writing to the SEC to express my deepest concerns about not keeping quarterly reporting. With the poor business and government performance of Donald Trump, it does not instill confidence in the working class that he has us in mind when he proposed this absurd idea. All DJT wants is to have less accountability for his millionaire and billionaire friends so they and he can make more money and transfer more funds from the working class to the top 1%. No thank you. Only short, simple minded companies, who lack leadership and innovation, are the ones who claim that fewer reporting results in only their companies able to do short-term goals. Having companies decide what works best for them does not have a level of consistency and accountability across the board. There is a completely different business culture in the United States. Then there is in countries like the UK and Australia, where they have been successful in the semi annual reporting. They have a background of better transparency, as well as morality to report more often than what they're required to. In the United States, we do not have that same culture of honesty and morality in our business practices and the whole reason why we need quarterly handle reports is because of the shadiness that was happening, such as fraud and market manipulation. There doesn't need any more fraud and market manipulation because our government is doing plenty of illegal fraud, abuse and market manipulation.

Sincerely a concerned citizen,

Aurora Orberg.

Austin Poole — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Austin Poole Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
We are already facing calls for transparency, limits to corporate powers, and more requests for action to be taken to prevent corporations from skirting their financial responsibility as a company in the United States of America. They have profited off policies and people, they need to contribute to the American people by paying their fair share, and now our SEC wants to allow them to go silent and report less so that SEC can change laws and allow less security for consumers so that you can

add AI companies and Tesla to the S&P.
Do not think this will be accepted. We are a nation of people being pushed closer and closer to a tipping point, and our government should be doing everything it can to calm the pressure building, not exacerbate it.

Awndrea Caves — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Awndrea Caves Affiliation: Jun. 12, 2026 Awndrea Caves, Senior Lecturer, University of Arizona, Tucson, Arizona. We need more transparency not less. Do not change the reporting rules. Investors deserve to know what is with THEIR MONEY.

Awndrea :)

Barbara Young — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Barbara Young Affiliation: Jun. 12, 2026 Companies use stock valuation to raise capital, provide employee incentives, and as an acquisition currency to buy other businesses.
Quarterly reporting also provides much needed transparency for investors, allowing stocks to rise on positive news or decline on poor performance. As an investor, frequent quarterly reporting is critical to understanding the direction/performance of a company, allowing investors better insight and information. Do not change this format. As an investor this would be a game changer (negative) for me.

Barbera Anne — Jun 12, 2026
Subject: S7-2026-15 Comment From: Barbera Anne Affiliation: Jun. 12, 2026 I concur. Allowing extended financial reporting for large companies risks fostering unfair advantages and financial opacity. This contradicts our commitment to transparency and could enable manipulation detrimental to shareholders. Quarterly reporting must be maintained.

Barry Levine — Jun 12, 2026
Subject: S7-2026-15 Comment From: Barry Levine Affiliation: Jun. 12, 2026 To Securities and Exchange Commission:

I have been an investor for decades. I'm also the treasurer of an investment club that has been in existence for over 60 years. As a small investor, I am adamantly opposed to the SEC permitting publicly traded companies to publicly report their financials only twice a year rather than the current 4 times a year.

I, and the investment club to which I belong depend on QUARTERLY information to made decisions. We are all just individuals. This decision blinds us to what companies are doing. Decisions about whether or not to buy, hold or sell securities requires information. As individuals who are not professionals, rely upon this information. We also rely upon the SEC to assure a level playing field and fairness in the market. I don't have to remind you that that is your job.

And yet, the SEC is embarking on opacity instead of transparency from public companies. In this environment, professionals and people with inside information, or access to that will have an unfair advantage. And us little folks will be even more significantly disadvantaged than we already are.

Your job is to insure fairness to the public, not doing favors to the extremely wealthy and the corporations whose behavior you regulate.. This proposition makes investing even more unfair to retail investors.

There is no excuse for making the change that the SEC is proposing.

Bernadette Conklin — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Bernadette Conklin Affiliation: Jun. 12, 2026 My name is Bernadette Conklin, I am a retired Import Manager and live in Georgia. My husband and I rely on our Social Security which we were REQUIRED to pay into all our adult lives. Since SS and Medicare are questionable in regards to its continuation and added in cost of healthcare, groceries and gas due to extreme inflation, our investments are all the more essential. Since we are unable to work (we have tried but no one will hire us at our age), how would we survive? In addition, the need for transparency is the only way to insure corporations are acting in the best interest of their shareholders. In 1955 To 1970, when reporting was just twice a year, it resulted in lower returns and lower valuations. We should learn from history and not return to such obvious poor management. Pleas continue to require quarterly reports as standard practice.

Thank you for your attention to this matter

Bernard Meenaghan — Jun 12, 2026
Subject: S7-2026-15 Comment From: Bernard Meenaghan Affiliation: Jun. 12, 2026 Think of the small investors, the family relying on an index fund or a TSP to fund retirement. Billionaires already have more than enough. Remember the people whose contributions fund these enormous pension plans whose investments drive the markets.

Beverly Meehan — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Beverly Meehan Affiliation: Jun. 12, 2026 Beverly Meehan
Retired Director of Sales
Glenville, WV

I retired in 2019 as I had a niece who lost her husband to a fatal heart attack as she was pregnant with their second child.
I was planning on working a few more years but she needed family and she needed help. So I moved across country to help her in 2019. This move took a significant amount of my retirement funds.
With the outbreak of COVID, rising prices and government policies I have been going through my savings on hand much too fast.
This year I really only have my stock account that has been something I have been trying desperately to not touch this soon after retiring.
Quarterly reporting has been very important to me and is necessary for me to get by in the coming years with our future economy in question.
Please do not make this change.
Sincerely
Beverly Meehan

big van marketing — Jun 12, 2026
Subject: 13g and 13d rules From: big van marketing Affiliation: Jun. 12, 2026 With today electronic trading there is no need for individuals to manually file 13g or 13d forms which the SEC can get from brokers. and for some stock it does makes sense with convertibable preferred shares or bonds. and they may own but don't control the company or even have a seat in the company and is not an insider.

it's waste of time and money

insider trading takes too much of SEC resources and courts time when the loss is mostly monetary and in some cases no harm is done.for long positions
these investigations cost the courts millions and should be done out of court system. and just ask for refund or payment and charges dropped insted of court system the court system has more serious crimes to deal with like Fraud.

the SEC needs to focus more on verifity data is true and these company financials and even their employees are vested and not fake company with fake financial statements.

another is ban on fake level 2 quotes or these fake bids and fake ask in the market

Bill Draper — Jun 12, 2026

Subject: S7-2026-15 Comment From: Bill Draper Affiliation: Jun. 12, 2026 Having worked investor communications with a successful Fortune 500 company, the cost to report is minimal compared to the opportunity of allowing poor operations to continue for five months with the hope it will be saved in the final month. It never happens. More companies will fail and stocks will become more volatile. The market will suffer for the benefit of a few executives. This “standard” isn’t working in other countries and will not work here. People will stop investing and the markets will no longer be safe for managing money.

bob obrien — Jun 12, 2026
Subject: S7-2026-15 Comment From: bob obrien Affiliation: Jun. 12, 2026 Robert OBrien, retired, former Pres. Health Processes Inc.
I strongly object to the proposal to change the reporting schedule from quarterly to semi annually. Markets change too rapidly in the current environment to allow such a lag in reporting, putting all retirees' assets in grave jeopardy and asset managers/insiders without proper surveillance.

Virus-free.www.avast.com

Bob Regan — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Bob Regan Affiliation: Jun. 12, 2026 Name: Bob Regan from Katy, TX. As a long term investor, I am requesting that companies report their performance on a quarterly basis. This is a 'if it ain't broken don't fix it' situation. Limiting reporting twice a year will enable bad actors more time to obfuscate poor performance, bad decisions, and fraudulent activity-think Enron.

This will have the effect of reducing investor confidence in the market. Some investors will look to other assets with less opaqueness, instead of the equities markets. Please Maintain the current system of reporting as it acts as a form of check and balance.

Thank you,

Bob

Bob Strode — Jun 12, 2026

Bookkeeper of Kent University Parish Newman Center — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Bookkeeper of Kent University Parish Newman Center Affiliation: Jun. 12, 2026 This is Barb Boltz the 70 year-old retiree living in Kent Ohio. I am completely and thoroughly against a change to the reporting moving from quarterly to semi annually as a retiree. I am living on my Social Security and my annuities which are heavily invested in stocks. it is important that we understand what is happening with companies so that we can make wise decisions about our future. Everything. is speeding up, and changes can happen overnight that impact a company performance and bottom line. Sometimes quarterly reports are too late. Moving to semi and reports is foolish.

Barbara Boltz

Bryce Whalen — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Bryce Whalen Affiliation: Jun. 12, 2026 I vehemently oppose ending Quarterly Reports and replacing them with Semiannual Reports.
Taking information out of the hands of retail investors when Hedge Funds, Money Managers and Wall Street Banks already have access to so much more information than regular people is INSANE!

It's either a deliberate attempt to defraud retail investors or it's the most uninformed, ignorant decision by the SEC since forcing ETFs to buy new IPO stock as soon as it's listed on an exchange as opposed to waiting 60 days until the initial arbitrage phase of large investors dies down.

What in the heck are you people doing??? Has Wall Street gotten so desperate for more profits that they need to restrict access to information even more to cheat retail investors out of their money?

And what about Financial Advisors who depend on Quarterly Reports to provide sound advice to their clients.

You all are ridiculous!!!!

Bryce Whalen

C. Kordys — Jun 12, 2026
Subject: S7-2026-15 Comment From: C. Kordys Affiliation: Jun. 12, 2026 Hello,

I strongly oppose File No. S7-2026-15. Publicly traded companies should be required to report quarterly, not every six months. Semiannual reporting reduces transparency, delays critical information, and makes it harder for ordinary investors to make informed decisions.

C. Kordys
Atlanta, Georgia

Cally Burns — Jun 12, 2026
Subject: S7-2026-15 Comment From: Cally Burns Affiliation: Jun. 12, 2026 I rely on quarterly reports to assess my strategy for managing my assets. This is critical public information which must continue to be available on a quarterly basis.

CaLynn77 — Jun 12, 2026
Subject: S7-2026-15 Comment From: CaLynn77 Affiliation: Jun. 12, 2026 As a new investor who is considered self-employed as a nail tech (even though I work out of one location), I do not have the choice of enrolling in a workplace retirement plan or other “standard” options that come with most U.S. full time positions, so I have decided to try & save for retirement by trying the stock market. I literally depend on daily news & most recent financial reports to make my investment decisions. Recently, it feels as though quarterly reports aren’t even enough to go on, especially as companies transition to compete & survive in an AI future, so why reduce financial reporting to bi-annually & limit important data to retail investors just trying to stay above water & save for their & their family’s future while the brokers, firms, etc still have access to the info? Big whigs already have access to dark pools, inside info, & can manipulate stocks in their favor; do they really need to save a few more dollars to hide financial statements from simple investors just trying to survive in an economy already making it harder on the blue collar people living paycheck to paycheck? It’s hard enough to find an extra hundred dollars to invest. Please do not make investing harder by allowing less financial data to be accessible. Other countries have already shown that less than quarterly financial statements does not work. Quarterly is needed for reasons aforementioned plus it helps keep companies more on track with their goals & aware of their current numbers.

Candis Geddes — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Candis Geddes Affiliation: Jun. 12, 2026 My name, job, and location aren't important. I live in the United States and I'm a gainfully employed taxpayer in the last half of my life. I'm so sick of government agencies wanting to roll back transparency and rights and basically everything to the way it was before we were born, ignoring the documented history of what was wrong with the way it was. The stock market holds so much of our retirement funds - both through employers and personal accounts - that we can't afford to take steps backward and gamble.

We've worked and saved and invested, like we were told, with the promise of a better future. DO NOT SCREW US OVER WITH THIS NONSENSE! QUARTERLY REPORTING NEEDS TO STAY!

Capra J’neva Devi — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Capra J’neva Devi Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission: for ordinary investors to have faith in the stock market as an investment vehicle, we need information on how the companies we are investing in are performing, not a coverup to enable insider trading at scale. Quarterly disclosures and investor calls help investors tap in to what is happening in each company we fund, and make our investments more sound. Investing shouldn't be done in darkness. We all deserve a chance at due diligence.

Cara Velazquez — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Cara Velazquez Affiliation: Jun. 12, 2026 My name is Cara and I’m a registered nurse working in the ER. One of my biggest fears with nearing my 50s is potentially watching my 401k retirement money dwindle away and not being able to able to rely on any Social Security funds to be there when it comes time for me to retire. A fund that I’ve been consistently paying into since I was 15 years old. Quarterly reporting is vital to my investments that rely on full disclosure. Taking us back to the 1950s will set us up for financial failure.

Cara Velazquez

Carl Bradley — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Carl Bradley Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
Fair, unbiased information is essential for the integrity and function of securities markets.

Carl Lee — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Carl Lee Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I'm a daily trader and I depend on timely and accurate reporting from companies to many crucial investing decisions. Making public companies less transparent would only help insiders and the super rich.

Carl Wetzel — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Carl Wetzel Affiliation: Jun. 12, 2026 Carl Wetzel, VP Retired. It’s hard enough to maintain financial equilibrium when info constantly makes millions for those trading with inside information but people trying to cope get shut out without adequate reporting. This is another attempt to cancel or push the smaller investors aside and give companies more time to conduct and shield inequities, oversell commodities and basically prevent profit sharing. Who’s to know when they can borrow against an additional six months of hidden manipulation.Location = Pennsylvania. Quite frankly I am sick of the blatant interference in what is supposed to be a free market system.

Regards,
Carl Wetzel

Carleen Crawford — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Carleen Crawford Affiliation: Jun. 12, 2026 I strongly oppose any effort to eliminate quarterly reporting for public companies.

I am retired, and like millions of other Americans, my retirement security depends on the investments my husband and I worked our entire lives to build. We are not wealthy insiders or Wall Street professionals — we are ordinary people who depend on transparency and timely information to protect our savings and make responsible decisions.

Quarterly reporting is one of the few safeguards individual investors have. It helps us stay informed about what is happening with the companies holding our retirement funds, pensions, and investments. Waiting six months between reports would leave retirees like me vulnerable and in the dark during rapidly changing economic conditions.

At my age, I do not have decades to recover from major financial losses caused by reduced transparency or delayed disclosure. When markets shift, retirees can lose a significant portion of their life savings very quickly. We deserve access to current information so we can make informed decisions about our futures.

Reducing reporting requirements may benefit some corporations, but it would increase risk for ordinary Americans who rely on honest, consistent financial disclosure. Please do not weaken protections for retirees and small investors.

Quarterly reporting matters because our financial security matters.

Thank you for considering my comments. Carleen Crawford, Hickory, NC

Carolyn Turner — Jun 12, 2026
Subject: S7-2026-15 Comment From: Carolyn Turner Affiliation: Jun. 12, 2026 There is no good, honest, or beneficial advantage to ending quarterly reporting. As you obviously know, the majority of investors are small-time, like me, hoping to save enough for retirement. We don't have access to inside knowledge and rely on these reports to judge the stability and ongoing success of the companies we invest in. Hiding this information unnecessarily for half a year at a time only benefits the wealthiest investors with unfair access to insider knowledge. You are rigging the game and we all know it. Don't do it.

Catrina King — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Catrina King Affiliation: Jun. 12, 2026 Dear SEC Administration,

It has come to my attention that there is a decision pending to reverse reporting requirements such that they would no longer be required quarterly.

I want to voice that I am in strong opposition of lengthening reporting cycles. Frankly, there is no excuse to link in reporting cycles, considering that AI now makes it possible to aggregate and analyze data and issue report reporting formats with very little burden on businesses and fund managers.

Lengthening the reporting cycle will come at a cost to investors who need transparency in order to

have autonomy with their hard earned capital. Transparency for investors is the ethical priority for the SEC.

I moved toward longer reporting cycles will result in investors, not being able to make timely decisions about their capital. It will weaken the stock market in general, and can have a detrimental impact on the economy of the whole.

Thank you for your consideration,

Catrina King I Chief Marketing Officer I Athens, GA

Chelle LaClare — Jun 12, 2026
Subject: S7-2026-15 From: Chelle LaClare Affiliation: Jun. 12, 2026 June 12, 2026

Dear Sirs/Madams,

Accountability is the hallmark of Justice and this proposed SEC filing schedule "optional" change is

entirely counter to all of that. It is egregious and the American people will not stand for it.

Certifications on a minimum quarterly basis, made by CEOs and CFOs, with the accountability it provides is essential to a fair system for all Americans, not just investors.

This will not abide. We have lived through far too much economic turmoil at the behest of major corporations making their own rules or flouting those of the SEC.

This action gives the appearance that they are influencing the very rules the SEC uses to keep a check on them, to benefit themselves.

I am quite sure I speak for every American when I say you must retract this proposed change to make it optional to file a Form Q-10 on a half yearly instead of quarterly basis.

As a public agency and trust, the SEC must get back to the job of actually protecting investors and facilitating fair, orderly, and efficient markets.

This proposal allows graft, fraud and waste to disappear for months from the public eye, which affects far more than just the investor, but the whole of industry and finance - that affects every American.

This proposed change in no way facilitates the implicit and explicit mission of the SEC.

Subject: S7-2026-15 Comment From: CHERYL SPENCE Affiliation: Jun. 12, 2026 ABSOLUTELY KEEP QUARTERLY REPORTING!!'
No ifs, ands, or buts! The general public has been shafted enough. Our investments are ours - NOT the SEC's & we deserve to know what the market is doing at all times! Actually, I would prefer that we get monthly reporting instead of quarterly and definitely not
bi-annually or longer. We deserve the right to follow the markets & to stipulate how often we want to see the reports - NOT the SEC!!!!

My husband and I are 80 years old and are now depending on Social Security and the proceeds from our investments. We need to be able to watch how our money coming in is being effected as often as possible.

Cheryle Brashear — Jun 12, 2026
Subject: S7-2026-15 Comment From: Cheryle Brashear Affiliation: Jun. 12, 2026 I strongly oppose efforts to reduce corporate reporting requirements.

As an investor and member of the public, I believe transparency is essential for healthy financial markets. Companies that raise money from the public should be expected to provide clear and complete information about their finances, risks, and operations. Less reporting doesn't create better markets, it creates less accountability.

When disclosure requirements are weakened, investors have less information to make informed decisions, and it becomes easier for problems to remain hidden until they become much larger and more damaging. Recent history has shown the cost of inadequate transparency, and we should be learning from those lessons rather than moving backward.

The SEC's primary responsibility is to protect investors. Reducing reporting requirements serves the interests of companies seeking less scrutiny, not the investors who depend on accurate and timely information.

I urge the SEC to reject proposals that reduce transparency and instead focus on ensuring investors have access to the information they need to make informed decisions.

Chrissy Edgerton — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Chrissy Edgerton Affiliation: Jun. 12, 2026 Hi, I am a school bookkeeper and nonprofit CFO. My ability to have information on my investments directly affects the gains or losses that I see in my investments. Since most of my investments are tied to my retirement making a change like going to semi annual reporting may impede my likelihood of retiring before I die of old age. Decisions like this do not exist in a vacuum, and coupling this decision with those that have driven the economy to be as volatile as it currently is, as well as the gutting of social security will have dire consequences to future generations. I implore you, reconsider. The system as it is, is one of the few systems that is not broken. Do not switch to semi annual reporting as it will hurt millions of people as well as hurting companies.
Thank you for your consideration.

Christopher Zosh — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Christopher Zosh Affiliation: Jun. 12, 2026 I'm an economist (PhD) currently residing in Buffalo, NY. I love this country and I became an economist because I want to help make it better. This is precisely why I feel the need to speak out about issues like this.

The role that information plays in helping economic agents make wise decisions for themselves is both intuitive and well documented. There's a reason theres a whole financial industry built around receiving and processsing financial information... It's valuable! So it should come as no surprise that there will be a real economic cost to keeping people in the dark. Most salient to my mind is the negative impacts this will surely have on foreign investment in US companies. All else equal, knowing less about the performance of a potential investment will only serve to make investing in such an asset less attractive.

I am sure there are many very well informed public servants at the SEC who already understand this, but I just wanted to reaffirm the real world consequences of this seemingly poorly thought out decision. I hope you guys do the right thing.

Chuck — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Chuck Affiliation: Jun. 12, 2026 To whom it may concern in the SEC,

History has shown that quarterly reporting is the best indicator of my true savings and the SEC has an obligation to protect investors and bank customers from fraud and exploitation.
As a business owner and investor I demand the SEC protect all investors and customers and ensure that quarterly reporting stay intact!
You are supposed to work for the consumer and protect them, please do your job properly.

Cindy Ball — Jun 12, 2026
Subject: S7-2026-15 Comment From: Cindy Ball Affiliation: Jun. 12, 2026 There is fraud in America. On a daily basis, I hear about scamming,
cheating , out right lies. The quarterly filings is a check & balance
point. Securities are not F.D.I.C. protected. I do not know why the
Sec, is even considering this change.

Cindy Chapman — Jun 12, 2026
Subject: S7-2026-15 From: Cindy Chapman Affiliation: Jun. 12, 2026 I live in Houston, Texas. Years ago my family purchased Enron stock because it was a local company that "seemed" to be doing great. Enron employees were happy that Enron stock "seemed" to be going up and up in value. Enron employees bought houses and cars and planned their retirements based on the belief that the company was growing and had strong financials. Then, questions started being asked and the stock price dropped quickly. Luckily my family had not purchased much Enron stock, but we had a financial loss in 2002. Other families in Houston were financially devastated, in particular, Enron retirees and older Enron employees.

It was shocking to find out that such a well-known, major corporation was misleading its employees, customers, and stockholders about its financial dealings.

As a result of my own Enron financial loss, I strongly support the financial protections that were implemented by the SEC after the Enron scandal. I think it is a mistake to loosen these financial protections.

I believe that corporate financial reports, signed by the CEO and CFO that they have reviewed the report and it contains no untrue statements, should be filed every quarter.

I am concerned that relying on published earnings reports and press releases rather than signed and filed financial statements will reduce financial protections for employees, customers, and current or future stockholders. These resources are "furnished, not filed", and lack the accountability of the current protections.

Thank you,
Cindy Chapman
Retired
Houston, Texas

Cindy Hurst — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Cindy Hurst Affiliation: Jun. 12, 2026 Cynthia Hurst
Retired health insurance employee
Oklahoma

Hello.
As a retiree living on a fixed income, consisting of Social Security and withdrawals from my IRA, I have to be sure that I am very careful with my spending. This money has to last me my lifetime. I am very dependent upon the quarterly reporting from the SEC and I know for a fact that only seeing reporting twice a year instead of four times a year is a significant factor in ensuring that my money lasts me for my lifetime. I have investments and they have to be monitored.

I am a data oriented person. and spent my career in market research. I know that the more data we have access to, the better the potential for good outcomes. To cut the data reporting in half would be absurd and devastating to investors. It would be a very bad decision for the entire country. It has been proven that returns are diminished significantly when we do not have quarterly reporting. There is no valid justification for changing the reporting cadence.

I am asking you to not change the reporting requirements to two reports a year — keep the reporting at four reports a year. That is only fair and it has been proven to be much more beneficial to investors. Good, timely data is essential for planning. I trust that you will use your best judgement to ensure investors like me are not left in the dark.

Thank you.
Cynthia Hurst

Cindy Nelson — Jun 12, 2026

Subject: Comment on S7-2026-15 From: Claudia Mayorga Affiliation: Jun. 12, 2026 C Mayorga, Sr. Account Mgr, Atlanta
Quarterly reporting is important to me in the sense it provides the investor (me) with information on how our investment in the company is doing, it also helps keeps the corporations accountable and provides transparency to those trying to save for the future. Semi-annual reporting is just a bit too long for the investor to be able to make a decision to where to invest especially after a loss. Please

do not fix what is NOT broken.

Sent from my iPhone

Craig Hansen — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Craig Hansen Affiliation: Jun. 12, 2026 As an investor with the vast majority of my assets in the public markets, cutting the frequency of financial reporting is greatly disturbing. Reducing the frequency of financial reports put my investments at enormous risk. Trading houses already have the upper hand, as they can cultivate personal connections with corporate executives, and half-yearly reporting is simply inadequate for the needs of individual investors.

Individual investors are legion, and if the SEC wants to scare us away, we can take our money out of the public markets and engage in closer relationships with people & companies that will cultivate a better measure of trust with our investors. The SEC makes this change at tremendous peril to the nation's economy. Our personal risk cannot be separated from the nation's economic risks. With public debt at all-time highs, this is emphatically not a good time for the SEC to FAFO, because when you FA with the economy, by the time you FO that the public has GTFO of the market, you will

have to go back down through all seven layers of hell to get the public back.

Technology makes it easy for companies to keep their accounting up to date on a continuous or daily basis. The more frequent public financial reporting is, the fairer and well-trusted the public markets can be. The SEC has supported greater velocity of trading, and the information flow of financial reporting needs to keep up. Reporting more frequently would reduce the pricing dislocations around reporting events, and would help to reduce the inequities of insider information. The SEC should be moving toward monthly financial reporting, not in this wrong-headed direction.

Dana Lashley — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Dana Lashley Affiliation: Jun. 12, 2026 As an individual retail investor, I am writing to strongly oppose the proposed rule to shift from quarterly to semi-annual financial reporting (File S7-2026-15). Our current system of robust quarterly transparency is a cornerstone of American capital markets, providing individual investors with a level playing field to accurately evaluate a company's health. Cutting financial reporting in half would severely reduce market visibility, hide emerging corporate risks for dangerous lengths of time, and disadvantage everyday investors who rely on timely data. To maintain public trust, market efficiency, and strong investor protection, the SEC must maintain the current four-times-a-year reporting mandate. -DL

Dana Loewy — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Dana Loewy Affiliation: Jun. 12, 2026 To the SEC:

Please do not change the current disclosure rules! Transparency is important. We have seen the outcome of murky dealings that culminated in the financial crisis of 2007-09.

There is precedent that shows lower gains for the investing public with less reporting. Please don’t work to diminish our life savings!

Daniel Connolly — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Daniel Connolly Affiliation: Jun. 12, 2026 To the

Securities and Exchange Commission: The proposed schedule change from quarterly to semi-annual public corporations' filings runs exactly counter to the mission of the SEC. It will make it far more difficult for me to assess my investments, while giving access to other, more strategically positioned players. This is manifestly unfair as it insures only a certain class of investor will have the best information. NEARLY ALL OF MY SAVINGS are in publicly traded investments, and this proposed change will keep me in the dark as to the financial health and integrity of the companies and make my future financial security less stable and reliable. That the new schedule is optional does not mitigate these risks as nearly all companies will choose to do less paperwork and hide as much information as they can. As well, the savings are minimal, especially in light of the harm it will to the integrity of the US financial markets. Do not adopt the proposed changes. respectfully, Daniel K. Connolly, Ph.D., ret. College Prof

Danielle Spilker-Wilson — Jun 12, 2026
Subject: S7-2026-15 Comment From: Danielle Spilker-Wilson Affiliation: Jun. 12, 2026 As a retail investor, I listen religiously to earnings calls. Not only do I listen to the number, I listen between the lines, to help guide my investing decisions. Quarterly reporting is the least the corporations and their CEOs can do for those of us who stand behind their companies with our dollars!
Keep reporting QUARTERLY!!

Danielle Wilson

Danna Hotmar — Jun 12, 2026
Subject: S7-2026-15 Comment From: Danna Hotmar Affiliation: Jun. 12, 2026 I feel like I have retired at exactly the wrong time. Medicare is in danger, Social Security is in danger, now one of the "pillars" of capitalism, my stock portfolio , is in danger. It's nothing but greed and power. No one with an ounce of sense is happy with this current administration, and those who voted it in are waking up . Danna Hotmar, semi-retired physical therapist.

Dara Boykin — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Dara Boykin Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
This is a garbage proposal that is clearly intended to allow companies to hide vital information I use when deciding on an investment. It is disgusting and pathetic that y'all are trying to take advantage of us in every way possible just because the current administration will let you. It would be nice to see you people serve the purpose you were crested for instead of getting into positions of power and regulation and just ****ing over everyone but the ultra rich.

Darcey Zwicky — Jun 12, 2026
Subject: S7-2026-15 From: Darcey Zwicky Affiliation: Jun. 12, 2026 We must keep the Quarterly reports to help keep businesses accountable. Reducing the number of reports per year will make it harder for the IRS to pursue legal action should they detect plausible cause for investigation on the quarterly reports, thus adding to the already massive strain of the honest taxpayers who are doing things properly.
Please keep requiring Quarterly Financial reporting for all public businesses.

Sincerely,
Darcey Zwicky

Darcy Gaines — Jun 12, 2026
Subject: S7-2026-15 Comment From: Darcy Gaines Affiliation: Jun. 12, 2026 KEEP QUARTERLY REPORTING

My financial situation requires that I receive updated information
for my investment knowledge. Please….do not change how I rely
on making my financial decisions.

Darlene Boyce — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Darlene Boyce Affiliation: Jun. 12, 2026 Darlene Boyce, nurse practitioner in the profession of nursing for 47 years. I have worked hard all my life. I did not receive a pension. I depend on SS and hope to have a modest nest egg to draw from. I see no justice in changing the reporting from quarterly. It has been proven not to be a benefit for the people who have worked and invested to have security. When it does not serve the common good but only a few it seems immoral and illegal. This should not be allowed. And I hope everyone learns of this and will act to raise their voices and stop this atrocity.

Darnell Wilson — Jun 12, 2026
Subject: Quarterly reports From: Darnell Wilson Affiliation: Jun. 12, 2026 Darnell L Wilson
Retired
Quarterly reports are essential to many of us. I do not have tons or even millions of stocks and money in trusts, but I find it mandatory to check quarterly myself. If the system moved to just twice yearly (every 6 months), an extremely essential tool has been removed for me. This report is non-biased. I do not need to depend on my Advisors for information that is true and complete. I use this report as the baseline for my future. Please do not change this!

Darrell Williams — Jun 12, 2026

Subject: Comment on S7-2026-15 From: Darrell Williams Affiliation: Jun. 12, 2026 My name is Darrell Williams. I am a 78 year old retired machinist. My retirement and Social Security along with my 401k provide me with a meager but livable income.
This proposal to roll back reporting to 1955 requirements is NOT acceptable.
I request and insist you do not do this.
It is unacceptable that you would go back to a policy that has already proved it is not sufficient nor a good policy.
Please rethink this idea. It is not good for the American people in general and those of us who are retired and unable to re produce the savings and investments you are gambling with. It isn't just the money you are gambling with it is our very lives.
Darrell Williams

David Atkinson Investor — Jun 12, 2026
Subject: File No. S7-2026-15 From: David Atkinson The SEC was established in part to fight for a more level playing field after generations of wealthy traders abused insider access to market information, lack of transparency, and ability to skirt the flimsy rules then in place to enrich themselves at the expense of other investors. Its work has enabled the generation of tremendous wealth for average Americans. Numerous empirical studies have shown that increased information assymetry increases cost of investment and lowers returns for any investor unable to access it. If fighting for a transparent market is no longer the mission of the SEC, and increasing investment costs for average investors and protecting a small privileged class of de facto oligarchs now replaces it, there is no point to the institution continuing its existence.

David Becker — Jun 12, 2026
Subject: S7-2026-15 From: David Becker Affiliation: Jun. 12, 2026 Increase CEO accountability. Do not decrease their reporting. No, on 2xs a year, better 4 of 6 times a year.

Subject: Comment on S7-2026-15 From: Dayna Kulik Affiliation: Jun. 12, 2026 Dayna Kulik
Denton, Tx 76210
UHC Insurance Agent

Dear Securities and Exchange Commission,

I am writing to express my support for maintaining the current quarterly earnings reporting requirement for public companies.

Quarterly reporting provides important transparency and accountability for investors. It allows shareholders to make informed decisions based on timely financial information rather than relying on less frequent updates. This regular cadence also helps market participants identify risks or changes in business conditions earlier, improving market efficiency.

Moving to semiannual reporting could reduce transparency and increase information gaps between companies and investors, particularly for retail investors who do not have access to the same level of private information as institutional investors.

I believe quarterly reporting strikes an appropriate balance between disclosure burden and investor

protection, and I encourage the Commission to preserve the current system.

Thank you for your consideration.
Sincerely,
Dayna Kulik

Subject: Comment on S7-2026-15 From: Deborah Hulsewede Affiliation: Jun. 12, 2026 Enough of the big guy cheating the little guy. Deborah Hulsewede, Retired, Louisville, KY I worked 61 years. I do not appreciate anything messing with my money.

Deborah Jo McCorkle — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Deborah Jo McCorkle Affiliation: Jun. 12, 2026 Keep the quarterly reporting. If you want something from 1955, then corporations are no longer people, there are limits on how much anyone can give to their political party, taxes on corporations will be more. People are already suffering from job losses, high prices on necessities because of this ridiculous war, losing Medicaid and threats to Medicare. I think this could sink the country leaving only the billionaires in good health. The people are the country and everyone counts, not just the billionaires. Keep reporting as it is. It will be much better for everyone.
Deborah Jo McCorkle, retired, Denver, CO

Debra Booth — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Debra Booth Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
Public companies have provided investors and traders with high quality, detailed information every quarter for over 50 years. You porposal to continue this for market insiders but restrict data for the public ontentionally harms small investor. The additional practice of waiting for a stock to prove itself before including it is essential to maintaining strong funds and investment produc5s. Combining these makes stealing from the independent small earners a borm. Big investors and companies should bear their losses and not rig the market to lines their pockets. Billionaires already control too many resources and are literally killing us all.

Debra Bryant — Jun 12, 2026
Subject: File No. S7-2026-15 From: Debra Bryant Please KEEP the quarterly reporting so we don’t lose our savings!! This doesn’t even make sense!! We’re retired and our savings are critical for us!! Debra Bryant, Milwaukee, WI.

Debra Edwards — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Debra Edwards Affiliation: Jun. 12, 2026 Debra Edwards, Accounting Manager, Albany Oregon. Opposition to Proposed Amendments to Permit Optional Semiannual Reporting by Public Companies (Release No. 33-11414)I. I am writing to express my strong opposition to the Commission’s proposed rule allowing Exchange Act reporting companies to replace mandatory quarterly Form 10-Q filings with an optional semiannual Form 10-S framework. While we acknowledge the Commission's goal to lower regulatory compliance costs and alleviate the pressures of short-termism, this proposal fundamentally undermines investor protection and market efficiency. For over 55 years, the mandatory quarterly reporting structure has served as the bedrock of transparency in U.S. capital markets. Moving to a six-month reporting gap will create asymmetrical access to information, fuel market volatility, and disproportionately disadvantage retail investors. The proposed rule introduces an annual "checkbox" choice on Form 10-K, enabling companies to alternate between quarterly and semiannual structures from year to year. This variable landscape threatens fundamental data comparability. Financial analysts and institutional investors rely on consistent, standardized timelines to compare competitors within the same sector. If some firms report every three months while others report every six months, measuring industry-wide performance metrics, trailing twelve-month (TTM) figures, and seasonal trends will become unnecessarily complex and fragmented. Extending the reporting gap to six months creates a data vacuum that institutional investors will fill with proprietary alternative data, expert networks, and private corporate access. Retail investors, who lack these resource channels, depend heavily on timely, standardized, and public SEC disclosures to make informed decisions. While companies may choose to furnish basic information via Form 8-K earnings releases during the off-quarters, these sub-advisory documents lack the comprehensive, XBRL-tagged, and rigid disclosures found in formal interim statements. Fewer public check-ins mean that earnings surprises, operational shifts, and capital adjustments will compound behind closed doors over a six-month duration. When these larger aggregations of data are finally made public, the market is highly likely to experience wider price gaps and severe post-earnings volatility. Furthermore, a prolonged informational gap creates fertile ground for accidental leaks and insider trading activity, as material non-public insights will persist internally for much longer periods.4. Form 8-K is Not a Substitute for Robust Interim Financials Supporters argue that material changes will still be captured by ongoing Form 8-K triggers. However, Form 8-K is designed to report isolated episodic events, not continuous financial performance. A steady operational decline, eroding profit margins, or shifting inventory levels do not inherently trigger an isolated Form 8-K disclosure. Investors could easily remain unaware of a business model's material decline for nearly half a fiscal year.III. ConclusionThe U.S. financial system enjoys its status as a global gold standard precisely because of its rigorous commitment to transparency, frequency, and market discipline. Relaxing interim schedules introduces systemic friction that outweighs any marginal cost savings reported by executive boards. Rather than eliminating the 10-Q entirely, the SEC should consider targeted, qualitative streamlining of Regulation S-K narrative requirements without compromising the frequency of primary financial data. We strongly urge the Commission to withdraw this proposal and maintain mandatory quarterly reporting to preserve fair, orderly, and efficient markets.

Dee Em — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Dee Em Affiliation: Jun. 12, 2026 From: Dawn Matney, Tax Maps & Records Supervisor, Real Property Assessment Division, County of Maui, Hawaii

Please do not let every public company stop reporting its results each quarter and disclose just twice a year. This was between 1955 and 1970. Less transparency came with lower returns and lower valuations. For an ordinary investor, a return to those days could mean losing a third, or even half, of our life savings.
Many people are close to retirement and cannot afford to lose our savings. Young people also will not be able to build for their future which already is very difficult today with the rising cost of living.

Please protect everyday American investors and our futures. Mahalo, Thank you. Malama Pono (do the right thing)

Sincerely,
Dawn Matney

DEM Teal — Jun 12, 2026
Subject: S7-2026-15 Comment From: DEM Teal Affiliation: Jun. 12, 2026 It is imperative to keep the SEC's quarterly reporting intact. Quarterly reporting should remain the baseline. It supports price discovery, reinforces accountability and sustains investor confidence. Weaken it, and the effects will be clear: wider information gaps, higher capital costs and reduced trust.
Markets run on confidence. Confidence runs on information. Reduce the flow of reliable information, and the system does not become more efficient.

Donna Murphy

Demitra Wilder — Jun 12, 2026
Subject: S7-2026-15 Comment From: Demitra Wilder Affiliation: Jun. 12, 2026 I am Demitra Wilder, retired SLP, self managing my retirement accounts. I regularly review not only stock market trends but the fund results. Sometimes I wish reporting was required more frequently! I cannot imagine anyone saying, Nah. I don't need timely information! Reporting is now managed by various digital platforms and services. That is to say, functions built into software already in use by the various companies offering the funds. It is reported directly to me, again digitally. It is not added expense or time to them; it is important to me.

The small investor has little enough protection in the open market. It is critical to have information about a company's management and finances as often as possible. It is more than reasonable for the requirement to be quarterly. Less than that hinders the ability of the small investor to effectively manage their personal finances. They end up managing their investments with Blinders on. Please maintain the current reporting schedule.

Diane OSullivan — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Diane OSullivan Affiliation: Jun. 12, 2026 My name is Diane OSullivan and I am a retired marketing director who worked in 3 large chemical companies over 36 years. I do not support moving to financial reporting for companies to every 6 months. As a retiree my investments support my lifestyle and social security and I do not want further stock variability that would put many retirees at risk.
External accountability for publicly traded companies is a necessary check on fraud and inaccuracy of reporting on results, which helps the world see the US stock market as a great investment opportunity. You have the data that shows not doing reporting quarterly led to reduced results and market confidence. Please don’t repeat that mistake.

diane timmins — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: diane timmins Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:

Subject (as required by the SEC): My view on Rule S7-2026-15 Considering that individual investors are the backbone of this country they carry great weight for the countries future. By not giving them the same courtesy to information by cutting them out of the information loop in an exclusive timely manner you are excluding them from making valuable informed and educated decisions. The SEC should not be an exclusive club that prohibits free exchange from the public in lieu of favoring large funds & capital to always take the advantage of information first with this new rule. You realize that already happens too much on a grand scale and yet you choose to inhibit the integrity further. It's not always about the money when greed becomes rampant. Pleaee see reconsider this new ruling a more just ruling for all concerned that want to participate in adding to the market in an informed and timely manner rather than excluding them to simply becoming fodder to insider schemes. Thank you!

Diane Tipton — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Diane Tipton Affiliation: Jun. 12, 2026 It's crazy that the government would want to end a system that helps investors make decisions about their investments. I don't see how this change helps mutual funds or individual investors.

Dianna Block — Jun 12, 2026
Subject: S7-2026-15 Comment From: Dianna Block Affiliation: Jun. 12, 2026 Please keep companies reporting quarterly. It would be irresponsible for the government and the SEC to screw up Americans retirement accounts. Retired Americans depend on establishing and maintaining their retirement accounts. It definitely would be irresponsible for the government and the SET to screw with this. I believe these agencies are only interested in lining their own pockets and not listening to Americans. My future retirement investments will determine how I live in the future. With inflation and other uncertainties it is vital to have insights into at least quarterly earnings of the companies invested in order to make decisions affecting my family’s finances potentially for generations. There should be more not less transparency. Do not change the requirement for companies to report quarterly earnings and financial data for the sake of investors.

Dianne Furrer — Jun 12, 2026
Subject: S7-2026-15 From: Dianne Furrer Affiliation: Jun. 12, 2026 I, Dianne Furrer, am currently a self employed solutions provider.
Areas of expertise include
audit (IT, Finance, Safety, Child care facilities, DISA, SOX),
IT specialist,
Computer security,
network administrator,
Systems integration,
bookeeping,
office administration,
and training in the military, public, and private sectors.

In addition to a BS in mathematics and Computer Science, I hold an MS in Industrial Engineering.

Post graduate credentials include the international credentials:
Certified IT Systems Auditor (CISA)
And
Certified Information Systems Security Professional (CISSP).

I am located in NJ with family spread across the country including FL, TX, CO, and CA.

My education, background,and work experience has taught me that

Accountability is critical!
Audits are an important tool.

Why?
Investors of all levels have the right to know in a timely manner how their money invested in the company is being used and spent.

Most of the county has no "Golden parachute " and has planed for retirement by investing and providing capital for these companies.

Reducing transparency including the required reporting and/or penalties for misrepresentation, fraud, ... is a recipe for disaster as well as a change in the conditions under which people invested.

Please do not remove or essen transparency or reduce the number of times/year that those entrusted to wisely use the investments must report andtake accountability for their actions.

Thank you.

Dobermom — Jun 12, 2026
Subject: S7-2026-15 Comment From: Dobermom Affiliation: Jun. 12, 2026 My name is Tina Holt. I'm a retired NICU nurse and depend on my IRA to keep me solvent, as Social Security is being constantly threatened by the current administration. I scrimped, saved and did without many things during my working years so I could be assured of a somewhat comfortable retirement. Now I literally fear for my very future. With all due respect, every major modern accounting scandal was enabled by gaps and opacity in financial disclosure. Quarterly filings don't prevent fraud, but they dramatically shorten the window in which it can fester before someone outside the company can see it.

Dolly Garlo — Jun 12, 2026

RE: Strong Opposition to Proposed Shift from Quarterly to Semi-Annual Corporate Financial Reporting

Dear Secretary Countryman,

I am writing to express my firm and unequivocal disagreement with any proposal by the Securities and Exchange Commission (SEC) to reduce the mandatory financial reporting frequency for public companies from quarterly (Form 10-Q) to semi-annually. While proponents frequently argue that semi-annual reporting mitigates corporate "short-termism" and cuts administrative expenditures, empirical market data and financial literature demonstrate that reducing reporting frequency severely harms market efficiency, elevates stock price volatility, and increases information asymmetry for investors.
The current quarterly cadence acts as a vital "reality check" for the market (Fields, 2019). Moving to a semi-annual framework would fundamentally erode the transparency that makes the United States capital markets the most robust and trusted in the world.

A transition away from quarterly reporting ignores substantial academic and statistical evidence regarding market returns, volatility, and information processing. I urge the Commission to consider the following data points and structural risks:
1. Heightened Stock Price Volatility and Price Shocks
When financial disclosures are delayed by six months rather than three, information accumulates in a vacuum. Cross-market empirical analyses tracking quarterly versus semiannual reporting regimes indicate that while quarterly reporters experience fast normalization of stock prices, less frequent reporting significantly amplifies contemporaneous volatility and forces massive, disjointed immediate price reactions when news is finally released (Ritter, 2025).
Without steady, structured quarterly updates, investors are forced to spend substantial capital and effort "guessing" corporate performance. This environment transforms regular earnings announcements into high-stakes, highly volatile shocks.
2. Disproportionate Vulnerability to Macroeconomic Spillovers
When domestic companies do not report earnings for prolonged intervals, their stock returns become highly sensitive to outside noise. Financial research reveals that Low Reporting Frequency (LRF) firms face severe "information spillovers," leaving them up to three times more sensitive to macroeconomic shocks and negative industry bellwether news during the quarters they remain silent (Arif, 2016).
Relying on external industry signals to estimate a silent company’s valuation damages pricing accuracy and triggers unwarranted, synchronized sell-offs across sectors.
3. The Fallacy of the "Short-Termism" Cure: The U.K. Precedent
The argument that removing quarterly requirements prompts long-term strategic behavior is thoroughly debunked by real-world data. Following the United Kingdom's Financial Conduct Authority (FCA) removal of mandatory quarterly management statements, comprehensive studies discovered that stopping mandatory quarterly disclosures did not result in an increase in corporate capital investment, nor did it alter the short-term time horizons of company executives (Nallareddy et al., 2021).
Instead, the empirical reality of reducing reporting frequency shows a steep degradation in market quality:

Loss of Analyst Coverage: Firms that exercised the option to drop frequent reporting suffered a significant contraction in analyst coverage and a corresponding rise in information asymmetry (Nallareddy et al., 2021).

Migration to Management Guidance:
Rather than abandoning short-term targets, companies shifting away from quarterly filings simply replaced regulated, structured financial reporting with un-audited, speculative managerial guidance—increasing the percentage of firms issuing guidance from 28% to 50% (Nallareddy et al.,

2021).

In summary, the strength of the U.S. capital markets rests entirely on the timely, predictable, and accurate flow of historical financial data (Fields, 2019). Forcing investors to navigate six-month blind spots suppresses market liquidity, widens bid-ask spreads, and penalizes retail investors who lack access to expensive alternative data channels. Short-term executive thinking is a cultural and structural compensation issue; it cannot be solved by starving the market of transparent financial facts.

I STRONGLY urge the Commission to reject any measures aimed at diluting the mandatory quarterly reporting framework.

Thank you for your time and your continued commitment to protecting investors and maintaining fair, orderly, and efficient markets.

Sincerely,

Don Gillespie

Donna Anglin — Jun 12, 2026
Subject: S7-2026-15 Comment From: Donna Anglin Affiliation: Jun. 12, 2026 Please stick to quarterly reporting as this really helps my husband and I make decisions on managing our retirement accounts! Transparency is critical to ensure that the public can see how a company's doing and can help to allow any fraud to get noticed by someone outside the company. Allowing a company to not report for 6 months can give insiders too much time to quietly sell if things aren't going well and does not protect the general public which is what the SEC is supposed to do! Remember Enron, Maddof, etc! Please do the right thing for regular people as any savings from only reporting twice a year is minimal for companies and the potential risk to the public is big!

Subject: Comment on S7-2026-15 From: Donna Conklin Affiliation: Jun. 12, 2026 Donna Conklin.

Retired and living on a small investment portfolio. Older Americans are faced with higher inflation, fewer available housing options and higher insurance and healthcare costs as we need more medical intervention to support our lives. Quarterly reporting is necessary to ensure big companies are keeping accurate records and giving investors the best information on their businesses. The top 80 companies in the US paid No Taxes on their billions of profits. Investors need to keep these companies accountable and give them the benefits they deserve.

Donna Limper — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Donna Limper Affiliation: Jun. 12, 2026 My name is Donna Limper. I am an individual investor in Illinois managing my own portfolio. Three reasons this is bad for individual investors like me: 1) Corporations can sit on bad news for six months, allowing insiders to quietly sell their shares to me (or my ETF) before the bad news tanks the stock, 2) Six dark months allows fraud to fester unnoticed, 3) The supposed savings are tiny and they won't go to individual investors like me. Public anger is already high against corporations. Many social media posts highlight frustration with the federal tax system centered on increasing perceptions of unfairness at the top. A new Pew Research Center analysis found that about six in 10 Americans say they are bothered “a lot” by the belief that corporations do not pay their fair share in federal taxes. Robust citizen protests are growing centered on authoritarian slide. I can see future protests centering on anti-corporate sentiment. Just as important, this would make our current k-shaped economy worse, dampening broad-based consumer demand with resultant risk to our economy. The EU moved to semi-annual reporting and Wirecard's €1.9 billion fraud hid in plain sight for years before the company collapsed in 2020. America tried this once, between 1955 and 1970 and less transparency came with lower returns and valuations. A return to those rules could mean losing a third, or even half, of my life savings. I vehemently oppose this change -- and will be sharing the SEC's proposal to cut everyday Americans' right to Wall Street transparency in HALF!!!!

Doretha Phillips Retired — Jun 12, 2026
Subject: File No. S7-2026-15 From: Doretha Phillips The proposed change, S7-2026-15 regarding bi-annual reporting puts the average pensioner and non-institutional investor portfolios at significant risk because they do not have access to critical information necessary to manage their financial decisions. Corporate retirement plans have historically imposed and exposed average citizens to the whims and bad decisions of bad actors in the market. The instability of our national economy and inflated valuations puts us on the road to another dangerous economic crisis unlike the 2008 and Covid crisis; thus removing the ability for people to shift their portfolio positions to mitigate loss. Wealthy insiders have the means, access and knowledge of major business sector shifts before catastrophe strikes and are able to change positions sparing them from the fallout. This is not a tenable proposal for ordinary constituents and I ask that you rescind it.

Doris Constant — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Doris Constant Affiliation: Jun. 12, 2026 Doris Constant, retired, Santa Rosa California. As a retired person with a very modest IRA, I feel it is the SECs responsibility to ensure that the people who have worked their entire lives to save and invest for retirement are protected from the potential consequences of improper reporting practices. Reporting only twice a year instead of quarterly not only increases the risk of financial mismanagement, but history has also shown that this method adversely affected returns for investors. Modern Portfolio Theory requires diligence in following market trends. Semiannual reporting will hinder this greatly. Please act in the interest of ALL investors, not just institutional traders.

Dow Jones — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Dow Jones Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
My view on Rule S7-2026-15 the SEC proposal is bad for investors:

Less transparency. Investors would receive comprehensive financial reports only twice a year instead of every quarter, increasing the time between mandatory disclosures.
Larger information gaps. Professional investors often have more resources to gather information between reporting periods. Retail investors may be more dependent on scheduled SEC disclosures, so less frequent reporting could widen the information advantage of institutions. This concern has been raised by market participants discussing the proposal.
Delayed recognition of problems. Earnings deterioration, liquidity issues, or operational challenges could take longer to become visible through required filings.
Potentially greater volatility. When six months of results are released at once, the market may need to absorb more information in a single event, leading to larger price reactions.
Reduced accountability. Quarterly reporting forces management to regularly explain performance and risks. A semiannual system reduces those formal accountability checkpoints.

Dr. McBrick — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Dr. McBrick Affiliation: Jun. 12, 2026 My name is Mike and I'm a university professor from Florida. In 2021, I was diagnosed with brain cancer and had a craniotomy. I worked hard for 35 years and invested everything extra I had into the market every 2 weeks that whole time. I'm sure those investments helped the economy and the companies and organizations in which I invested. My investments are all that I have to live on and spent my entire life accumulating - divorce took half of the investments as well. To only have companies report every six months instead of quarterly would cause my investments to pay dividends even less resulting in me having everything I worked for decades as tens of millions of Americans have much less and effectively we will have worked our entire life helping others get rich now for a pittance of what we contributed. We've tried this before in the USA and it was proven that it resulted in lower dividends. History should be a lesson. Do not change the rule! It only makes the rich richer and sacrifices the masses who have dutifully invested. Real lives are behind the numbers. Families and people. Please do not do this. For people like me and for all - it has the good possibility of ruining our lives. It surely will mine. Thank you.

Sanders, Store Admin, Schaumburg, IL
Leave reporting the way it is. There is absolutely no reason to change this back to the way it was years ago. Time to stop trying to make it less transparent for consumers. It's not better for the average person, would only benefit big business who already makes more than enough profit. Frustrating as heck all of these current administration attempts at pocketing more money.

Emily Joa — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Emily Joa Affiliation: Jun. 12, 2026 My name is Emily, I am an Insurance Agent in Cincinnati, OH. If the SEC were to change the system of reporting to semi-annual reporting, it would set me back years. I've worked hard to get to where I am financially. As a consumer, I deserve financial transparency. This only benefits the people already making millions to billions per year. Please do not change to semi-annual reporting. Historically, it hinders investments and therefore economic growth. It's not worked in the past and it won't work now's. There's a reason we have gone back to quarterly reporting.

Emily

Emily O'Shea — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Emily O'Shea Affiliation: Jun. 12, 2026 Quarterly reporting requires companies to be accountable to their investors and the public regularly. The financial market and trends move in real time. Investors need as much information as often as possible in order to protect their life savings. Please keep required quarterly reporting so that we are able to continue the standard we have now for transparency in order to make good investment decisions.

Thank you,
Emily O'Shea

Emily Rosenzweig — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Emily Rosenzweig Affiliation: Jun. 12, 2026 My name is Emily Rosenzweig and I am a behavioral scientist living in New Orleans. Transparency is critic to the maintenance of a free market. Quarterly earnings reports force companies to be honest with their shareholders more often, and that accountability serves institutional and private investors alike.

Emily Strong — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Emily Strong Affiliation: Jun. 12, 2026 My name is Emily Strong, and I am a registered diagnostic medical sonographer in Cleveland, Ohio. Changing to semi-annual reporting cheapens the market and reduces the value of the investments that we have all made, which is most harshly felt by the middle working class. This feels like another attempt to scrap and sell this country and its people for parts. I'd like to remind the SEC that we're watching, and we won't forget what is done and who all the players responsible are. Let's make responsible decisions that won't make the majority very unhappy. That's kind of the point, here.

Regards,
Emily Strong

Ethan Helvering — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Ethan Helvering Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I am fed up with the corporate crony capitalism of this administration, and I strongly urge you not to take another step towards empowering insiders at the top levels of wealth and power to have the scales tipped further in their favor. Please retain the requirement for public companies to release quarterly reports.

As a worker with a small amount of self-directed investments, I rely heavily on the price-to-earnings ratio to monitor my investments and seek out new ones. Losing quarterly earnings reports would make it much harder to judge where the market is over- or under-valuing certain stocks. I am sure that other level-headed investors like me would be less confident in the market if companies were given an entire year between earnings reports. This would have a negative impact on the stability of the market and our economy overall.
Thank you for considering my comment.
Sincerely,
Ethan Helvering

Eugene Barnhart — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Eugene Barnhart Affiliation: Jun. 12, 2026 Eugene Barnhart
Retired
Gettysburg Area

It is a fact that social security checks, upon retirement, are insufficient for retirees to maintain their standard of living. It is a necessity that each person plan for there retirement through other means. These other means are usually through investments in some type of retirement fund. My retirement funds are adequate because of small weekly investments throughout my working years. These meager weekly investments grew as a result of fund managers.

It is important to me and to other retirees that you give fund managers quality tools which allow our retirement investments to grow. Each year Social Security becomes more endangered and the necessity for individual retirement management increases. It is important that SEC support the quality of life for the working man. This responsibility requires that you give fund investors high-quality tools to work with. These high-quality tools are information. I employ you not to reduce this information by 50%.

Thank you for taking the time to read my comments.

F J — Jun 12, 2026
Subject: Comment on S7-2026-15 From: F J Affiliation: Jun. 12, 2026 Absolutely Keep Quarterly Reporting! It’s important for citizens to have confidence in the financial reporting and near real time data of investments. Getting rid of quarterly reporting only serves the companies, banks and brokerages involved in obfuscating the facts. At a time where this administration has made huge cuts to consumer protection, regulation and accountable oversight - the decision to end quarterly reporting will erode trust for investing and serve as a potential scheme to disenfranchise “Main Street American” investors. The Consumer Financial Protection Bureau was eroded in the last 16 months. The American people demand and expect honesty and good faith dealings with investments.

The riskier the investment and the potential for under or delayed reporting of financial data should and will reduce investor confidence and investing.
Don’t Do It !

Family Pasler — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Family Pasler Affiliation: Jun. 12, 2026 Tina Pasler, a widow with 2 young children in Aptos CA.

This is important to myself and my children as we are living from a family trust my husband and I had set up. Thank God we did so my children and I can stay in our home and get through some very tough times. My child is neurodivergent and needs more than average care rendering it impossible to work. Without quarterly reports we can lose a lot of the money we need to survive and thrive.

Sincerely,
Tina Pasler

Franklin Goforth — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Franklin Goforth Affiliation: Jun. 12, 2026 Most companies monitor their financials monthly as this reflects changing market conditions and is the basis for management decisions. Without such information a company would have no idea their business status and future profits and such would be the relationship to investors. Quarterly reporting is beneficial for most investors both professional and private. As a small investor I am interested in the long term but do want to know when or if some conditions change that may affect my investment. Especially today when stock prices are high and there is uncertainty regarding the current situation,

it becomes more important to know where a business stands. Moving to a semi-annual reporting is punishing for the small investor who would not have access to information that professional money managers likely would have. This appears to be a plan to benefit the larger professional investor and drive the small investor out of the market. Is there not a place with opportunity for both small and professional investors to participate in our great American Economy. I am solidly against changing the reporting requirement and think the idea that a regulator agency such as SEC would even consider such a proposal. Whose idea was that?
Frank Goforth, retired living in Georgia

Grace Daniele — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Grace Daniele Affiliation: Jun. 12, 2026 Hi my name is Grace, and I work in the accounting field so I'm very familiar with preparing financial reports on a monthly as well as quarterly basis. If this proposed change to allow semi-annual reporting goes through, it'll make it much easier to hide business losses from investors, which could be potentially catastrophic for everyday people. We have these quarterly reporting rules for a reason, because they help protect the system as a whole. I'm sure you're considering doing this to appease some select billionaires, but let's be honest. The American people are finally starting to wake up and realize that the 1% is trying their hardest to rig the system even more in their favor, and we won't stand for it.

Greg Hopkins — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Greg Hopkins Affiliation: Jun. 12, 2026 I oppose the proposal to reduce public company reporting from quarterly to semiannual reporting.

Quarterly reporting is a fundamental transparency mechanism that helps U.S. markets function efficiently. Investors, analysts, lenders, employees, and shareholders rely on timely and standardized financial information to evaluate a company’s performance and risks. Reducing the frequency of required reporting would increase information gaps and create greater advantages for insiders and large institutional investors who often have access to information that ordinary investors do not.

More frequent reporting improves market transparency, promotes efficient price discovery, and helps identify financial problems before they become major crises. While quarterly reports do require time and resources to prepare, those costs are modest when compared to the benefits of maintaining investor confidence and market integrity.

Supporters of semiannual reporting argue that quarterly disclosures encourage short-term thinking. However, management teams that focus excessively on short-term results are unlikely to change their behavior simply because reporting requirements are reduced. Instead, the proposal risks decreasing accountability while doing little to address the underlying causes of short-term decision-making.

Public companies benefit from access to public capital markets, and regular disclosure is part of the responsibility that comes with that access. Investors should not be asked to accept less transparency in exchange for relatively minor compliance cost savings.

For these reasons, I believe the SEC should maintain the existing quarterly reporting framework and continue to prioritize timely, consistent, and transparent disclosure for all market participants.

Greg Hopkins, I.T. Project Manager, Georgia

Greg Miller — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Greg Miller Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission: there is no rational argument for reducing reporting requirements on public companies. Consistncy and reliability are key qualities in government regulation. You are already doing a poor job in conjunction with Treasury on AML by not regulating crypto But requiring AML for hedge funds. private credit in insurance companies are going to lead to a government bailout under your watch in the next three years. By reducing public reporting you will better enable hucksters and charlatans to tell any narrative they want. The strength of Americas capital markets are largely in part to transparency and reliability. Taking away quarterly reporting will only diminish both.

Hap Enzi — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Hap Enzi Affiliation: Jun. 12, 2026 I do not want to see a return to semi-annual reporting. I adamantly support quarterly reports. More timely information provides investors with a sounder basis for financial decisions. More frequent reporting equals greater transparency and inspires greater confidence in the market and in business in general.

History is indisputable on this point: as contrasted with twice-a-year reporting, quarterly reporting makes for a stronger market.

In this age of overwhelming data, there is absolutely no reason to decrease the information made available to investors and the general public. The way forward is abundantly clear: retain the current requirement for quarterly reporting.

HRH Queen 4 All — Jun 12, 2026
Subject: S7-2026-15 From: HRH Queen 4 All Affiliation: Jun. 12, 2026 15 U.S. Code § 7241 provides an explicit reason for requiring CEOs/CFOs to personally certify reports every quarter: false reports expose them to years in prison and millions of dollars in fines. Of course, there is no penalty for

honest executives making honest certifications.
The Sarbanes-Oxley Act holds every CEO and CFO personally responsible for certifying every quarterly and annual report, thus making it pellucidly clear that no American boardroom is above or beyond the law. Six days after Sarbanes-Oxley became law, HealthSouth's CFO would not certify knowingly false statements and attempted to avoid liability by quitting. Instead, he was one (1) of fifteen (15) executives who pleaded guilty to fraud totaling $2.7 billion. Requiring quarterly certifications eliminates the opportunity for claims of ignorance in these reports.
The claimed substitution of Form 8-K does not require certification and thus does not incur liability for false representations. This is not acceptable.
Requiring CEOs/CFOs to file quarterly reports that are reviewed and attested to be free of any untrue statement of a material fact protects companies, investors, and the public at large. I beg of you not to change this requirement.
D. A. Bass-Frazier
3409 Parliament Ct.

Ian Eshelman — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Ian Eshelman Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
This is a step in the wrong direction only serving to cause harm to the market. Any move that limits the quality and access to information for the retail trader functions to further the divide between those in an advantageous position to make better-informed decisions and those who are not. Support in favor of this move is reminiscent of a congress voting to raise their own salaries, or a president using an Executive Order to grant themselves immunity from prosecution. Ultimately, we, the everyday hardworking American citizens, ask that you consider what is good for us, and not what is most popular amongst those that already have a significant advantage. We don't have Bloomberg Terminals, we are preoccupied with the struggles of daily life, and we have few places to turn in an effort to improve our station and situation by way of participation in Free Trade. In the spirit of Liberty, we ask that you not further The Divide.

Irene Laursen — Jun 12, 2026
Subject: S7-2026-15 Comment From: Irene Laursen Affiliation: Jun. 12, 2026 Keep the reporting quarterly. My retirement savings are invested in the stock market and mutual funds. I have worked hard for 36 years and need clear, frequent, and transparent reporting on a quarterly cycle to keep publicly traded companies honest and minimize the fraud and insider trading that often gets reported in news media too late to help investors. Also, some countries that have tried the longer reporting cycle are switching back to the 3 month cycle. Lastly, the "optional" nature of the change to 6-month reporting cycle seems like a smoke screen. If companies opt for it, investors will know less about how their investments are really doing, and the people will have even less confidence that the federal government is looking out for their best interests.

James Azeltine — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: James Azeltine Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
Quarterly SEC reporting (Form 10-Q) is essential to the transparency that makes U.S. capital markets the most trusted and efficient in the world.
Since 1970, mandatory quarterly disclosures have provided investors with timely, standardized financials, MD&A, risk updates, and certifications. This reduces information asymmetry, enabling better capital allocation, accurate pricing, and broad participation—over half of U.S. households invest in these markets.
Key Benefits
• Builds Trust & Lowers Cost of Capital: Frequent, reliable data gives investors confidence, reducing

risk premiums and supporting liquidity and innovation.
• Investor Protection: Deters fraud, levels the playing field, and allows faster market corrections through steady scrutiny (including Sarbanes-Oxley certifications).
• Market Efficiency: Supports the depth and integrity that attract global capital and distinguish U.S. markets.
Critics cite short-termism and compliance burdens, noting some international shifts to semi-annual reporting. However, U.S. markets have thrived under quarterly rules, with many firms voluntarily providing more frequent updates. Weakening the mandatory baseline risks eroding trust, raising capital costs, and harming smaller investors.
Preserving quarterly reporting upholds the transparency that powers America's competitive edge in global finance.

Janette Hernandez — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Janette Hernandez Affiliation: Jun. 12, 2026 To SEC policy decision makers. It is disheartening to see that decisions influencing financial security may jeopardize future earnings by regressing to outdated, inefficient, past semi annual reporting. I am a retired resident of Palm Beach County in Florida. Cost of living has gone through the roof. Homes and rents are becoming unaffordable to local residents. For prices continue to escalate. You have the power to make decisions that influences the livelihood of retirees as well as any investor. Please be conscious that a large majority of the population would be negatively impacted by regressing to corporate reporting twice a year. It didn't do well then. Why would it work better now? Please allow this country to move forward and not repeat past mistakes

Respectfully and humbly,

Janette Hernandez

Janice Mansfield — Jun 12, 2026

Subject: Comment on S7-2026-15 From: Janice Mansfield Affiliation: Jun. 12, 2026 I believe quarterly reporting should be retained because it gives investors more current information on which to base their decisions. The world moves far too fast for shareholders to wait half a year before learning how companies actually performed. Please fulfill your duties to shareholders by retaining quarterly reporting.
J.C. Mansfield
Albany, NY

Janice S. Glenn — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Janice S. Glenn Affiliation: Jun. 12, 2026 I am a retired physician in Louisiana. I am barely making it now, on Social Security. My rent is 81% of my Social Security. Reducing the but I have of savings returns would destroy me, financially. Thank you for not rolling this back. Sincerely, Janice S. Glenn, MD.

Janice Vaccaro — Jun 12, 2026
Subject: S7-2026-15 Comment From: Janice Vaccaro Affiliation: Jun. 12, 2026 Quarterly reports are very important to us. Transparency matters. There is no way we should be relegated to accepting an antiquated standard of reports on our financial investments. KEEP IT QUARTERLY!

Janis Dolnick — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Janis Dolnick Affiliation: Jun. 12, 2026 I spoke with my financial advisor about the proposed change in reporting from quarterly to semi-annually to see if this was important for my investments. Essentially, what he said confirmed the danger of making this change: less frequent reporting tends to favor insiders and institutions with informal information advantages, while retail investors (that's me and all my fellow investors) lose a key transparency touchpoint. History backed that up when quarterly reporting was restored in the 1970s. The case for semi-annual reporting is a lighter regulatory burden on companies, *but that benefit flows mostly to issuers, not investors.*

Because of this negative impact on my investments and on other investors, I want to oppose and ask you to oppose this change. I cannot afford an over 30% decrease in the value of my investments as seen by the metrics between 1955 and 1971 when the change went to six months instead of quarterly. Don't let this happen again.

Leave **** the way it is with quarterly reporting. Are you just trying to figure out different ways to **** us over as little fish.

Jason Hilby — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Jason Hilby Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I work in the surety industry. Part of my job is to monitor the credit of every company my office has exposure on. By increasing the time between reports, my job will become more difficult, and could lead to losses for my company. The surety industry is a nieche insurance product, but it is vital to many companies. Surety allows its clients to operate, and without it many would struggle to bid on new jobs. In every major advancement surety has been behind the scenes. We allow gold miners to operate by insuring their reclamation obligations. We allow home builders to operate by backstopping their subdivision obligations to the towns, we're helping data centers secure their massive power obligations to be utilities.

Please do not increase the time between reporting. I also say this as an amateur investor.

Regards,

Jason I. Gonding — Jun 12, 2026
Subject: S7-2026-15 Comment From: Jason I. Gonding Affiliation: Jun. 12, 2026 Investors deserve to know what's going on with the companies they invest in and it is to the point now that it's pretty much axiomatic that corporations will not do anything voluntarily. The SEC needs to follow the mandate of its charter - protect investors from misconduct, promote fairness & efficiency in the securities markets, and facilitate capital formation for those looking to hire, innovate, and grow. Quarterly reporting is a key part of the way the SEC does that job.

Jaxon Turner Individual Retail Investor — Jun 12, 2026
Subject: File No. S7-2026-15 From: Jaxon Turner The proposal to make quarterly reporting optional will create an uneven playing field between large firms / market makers and retail. The volatility on quarterly earnings will be magnified if moved to semi-annual. An investor has a right to know what the comapny they are investing in is doing and this is the best way to do that. Quarterly updates have worked well so why fix a system that isn't broken. The corporate savings are so incredibly tiny compared to the value the update brings to investors. This reeks of trying to cover up a recession or trying to cut out retail from vital information.

Jay Beardslee — Jun 12, 2026
Subject: S7-2026-15 Comment From: Jay Beardslee Affiliation: Jun. 12, 2026 The quarterly reporting is necessary to keep small investors, like myself, informed of the performance of stocks to keep up with an ever changing market. As a retired person I rely on those reports to keep my head above water, so to speak. In these sensitive, inflationary times seeing the amount of fraud being exposed almost daily, we have to have the information to make timely and necessary changes to our portfolios. Thank you for your consideration in this matter.

Jenelle Kindt — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Jenelle Kindt Affiliation: Jun. 12, 2026 To the SEC:

To the Securities and Exchange Commission,

I am writing to respectfully oppose File Number S7-2026-15.

My name is Jenelle and I work in the medical field as a lab technician and have recently completed my four-year nursing degree. I have always been fascinated by the stock market and have spent years researching companies, learning about financials, and slowly building a small nest egg starting in my early twenties. I knew I had to start saving young because pensions are no longer common, homes are no longer affordable, retirement is more expensive, and the dollar does not go as far as it once did.

As I enter this next stage of my life, my goal is simple: work hard, save money, invest responsibly, and eventually purchase a modest home of my own. For everyday investors like me, access to timely and accurate financial information is critical.

If companies are allowed to report only twice a year instead of quarterly, regular investors will have far less information available when making decisions. That would make it harder to understand how a company is actually performing, whether risks are increasing, and whether an investment still makes sense. Those with greater access to information already have an advantage in the market. Reducing public reporting would only widen that gap and make it even harder for average investors to participate on fair terms.

Public companies benefit from access to public markets. In return, the public should have the right to regular and meaningful information about how those companies are performing. Less transparency does not protect investors. It protects those who already have the most access and influence.

From the bottom of my heart, I urge the SEC not to adopt S7-2026-15. Everyday investors deserve transparency, fairness, and timely information.

Respectfully,
Jenelle Kindt

Jennifer — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Jennifer Affiliation: Jun. 12, 2026 Comment on File No. S7-2026-15 Semiannual Reporting — Release No. 33-11414
To: Vanessa A. Countryman, Secretary, U.S. Securities and Exchange Commission
From: Jennifer, Phoenix, AZ
Re: Opposition to the Proposed Optional Semiannual Reporting Framework
Dear Ms. Countryman and Members of the Commission:
My name is Jennifer, and I live in Phoenix, Arizona. I am writing as an individual investor to urge the Commission not to adopt the proposed amendments that would allow public companies to replace quarterly reports on Form 10-Q with semiannual reports on a new Form 10-S. I respectfully ask that the Commission preserve mandatory quarterly reporting for all Exchange Act reporting companies.
Why this matters to me personally I am not a hedge fund, a bank, or an institution with analysts on staff. Like tens of millions of Americans, I invest my retirement savings and my family's future in U.S. public companies through individual stocks and funds. The quarterly 10-Q is one of the only tools I have that puts me on remotely equal footing with professional investors. It is standardized, reviewed by an auditor, filed under a real liability framework, and available to everyone at the same time for free.
If this proposal is adopted, I could go more than six months — and in practice, when you account for filing deadlines, closer to seven or eight months — without seeing reviewed financial statements from a company I own. That is an eternity in modern markets. Businesses can deteriorate, take on debt, lose customers, or change strategy entirely in that window, and ordinary investors like me would be the last to know.
America already ran this experiment, and investors paid for it The Commission does not need to speculate about what semiannual reporting would do, because the United States has already tried it. From 1955 to 1970, the SEC required interim reporting only twice a year. That fifteen-year stretch is

the only modern departure from America's long march toward more frequent disclosure — a tradition that predates the SEC itself, with railroads publishing monthly earnings in the 1860s, newspapers printing quarterly revenue figures by 1889, and the New York Stock Exchange requiring quarterly reporting of most listed firms by 1939.

The record of that semiannual era is sobering. Inflation-adjusted returns on the Dow Jones Industrial Average were roughly flat (about –0.1% annualized) from 1955 to 1970, while market valuations sat around 16.5 times earnings. In the half-century of mandatory quarterly reporting since 1970, real returns have compounded at roughly +3.9% annually and U.S. valuations have risen to roughly 26.7 times earnings. Correlation is not causation, and many factors drive returns and multiples — but when the Commission reversed course in 1969, it did so for exactly the reasons that still apply today, concluding in Release No. 34-8683 that "the trading markets should have the benefit of quarterly financial information." The burden should fall on those who want to dim the lights to prove that this time would be different.

The same pattern holds across markets today. The major markets that require quarterly reporting — the United States, Japan, South Korea, India — trade at substantially richer valuations (roughly 22 to 28 times earnings) than major semiannual-reporting markets such as the United Kingdom, France, and Spain (roughly 14 to 18 times earnings), which sit close to where America itself traded during its own semiannual era. If U.S. valuations were ever to re-rate toward semiannual-market levels, the wealth destruction for ordinary investors would be measured in the trillions of dollars. A move from today's multiple to the 1955–1970 multiple would imply a decline on the order of 38% — for my own savings, a loss I could not easily recover from at this stage of my life.

Quarterly reporting protects investors and market integrity 1. It reduces the information gap between insiders and the public. Executives, board members, lenders, and large institutional investors will always have more timely information than retail investors. Quarterly reporting narrows that gap on a fixed, predictable schedule. Cutting the number of interim reports from three to one per year does not eliminate the information — it simply concentrates its advantages in the hands of those with privileged access, and it widens the window in which selective disclosure, rumor, and insider knowledge dominate price formation.

2. It deters and exposes fraud sooner. Many of the most damaging frauds in market history unraveled because periodic filings forced numbers into the open on a regular cadence. Each 10-Q is a checkpoint: management must certify the filings, disclosure controls must operate, and an auditor must review the interim financial statements. Doubling the time between checkpoints doubles the time a fraud or an aggressive accounting practice can compound before anyone outside the company can detect it.

3. Earnings releases are not a substitute. The proposal contemplates that companies electing semiannual reporting could still furnish quarterly earnings releases on Form 8-K. But voluntary press releases are not 10-Qs. They are unreviewed, selectively framed, often non-GAAP-heavy, and not subject to the same disclosure requirements or structured data tagging. Replacing a standardized, reviewed regulatory filing with a marketing document curated by management is a downgrade in investor protection, not a neutral swap.

4. The "short-termism" rationale is unproven. The principal argument for this change — that quarterly reporting drives managerial short-termism — has been studied in markets that actually made this switch. When the United Kingdom and the European Union eliminated mandatory quarterly reporting, the research that followed found no meaningful increase in corporate long-term investment. The historical record points the same way: American companies reported quarterly while building the most valuable and innovative capital market on Earth. What drives short-termism is earnings guidance and compensation design, not the act of transparently reporting results — a distinction even Warren Buffett has drawn, criticizing the quarterly guidance game while telling CNBC in 2018, "I like getting the figures quarterly, and I hope that stays." If the Commission wishes to address short-termism, curtailing the quarterly guidance ritual would target the actual problem without dismantling the disclosure regime that has underpinned American market credibility since 1970.

5. The compliance savings are small; the cost to investors is large. For most established public companies, the incremental cost of a 10-Q is modest relative to revenues, and much of the underlying work — closing the books, internal reporting, board reporting — happens quarterly regardless. Meanwhile, staler public information means wider bid-ask spreads, more violent price reactions when news finally arrives, greater volatility around the two remaining reporting dates, and a higher cost of capital as investors price in uncertainty. The European evidence cited by the Managed Funds Association in this very rulemaking is directly on point: companies that switched to semiannual reporting saw their trading liquidity decline, while those that kept reporting quarterly did not. Decades of academic research likewise find that more frequent reporting lowers the cost of capital. Those costs of reduced disclosure are borne by everyone, including the companies the proposal claims to help.
6. An optional, checkbox-based regime fragments the market. Allowing each company to elect its reporting frequency annually would create a confusing patchwork in which investors must track which issuers report when, and in which the companies most likely to opt out of quarterly transparency may be precisely those with the most to hide. Comparability across companies and across time — one of the great strengths of the U.S. disclosure system — would be permanently degraded.
Conclusion The U.S. capital markets are the deepest and most trusted in the world in large part because investors here receive more information, more often, under stronger legal accountability than anywhere else. The Commission tested semiannual reporting once, found it wanting, and corrected course in 1970 — a judgment vindicated by fifty-six years of market history since. That trust was built over decades and can be spent quickly. I urge the Commission to withdraw the proposed semiannual reporting option and to retain mandatory quarterly reporting on Form 10-Q for all reporting companies.
Thank you for considering the views of individual investors in this rulemaking.
Respectfully submitted,

Jennifer Munnell

Jennifer Faulkner — Jun 12, 2026
Subject: S7-2026-15 From: Jennifer Faulkner Affiliation: Jun. 12, 2026 As a concerned citizen of this country - I am appalled by the consideration of removing safeguards to hold CEOs accountable for more honest quarterly financial statements. This consideration is not only reckless it is one hundred percent irresponsible.

We know from history CEOs will fabricate, stretch the truth and lie on financials if there is no oversight and accountability. If there is no threat of significant consequences, like prison, there will be no fear of being held accountable. It has been proven more than once historically and it will

happen again.

In the end, less financial regulations leads to corruption and fraud. It destroys the economy, jobs and the tax payers are left cleaning up the mess left by greedy immoral corporations.

These regulations are needed and must be kept and protected.

Jennifer Fitzgerald — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Fitzgerald Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
Not all Americans are the mindless automatons this administration would prefer us to be. We want and need more information to make the best decisions concerning our personal money. While some of our retirement and investment accounts may appear to be pocket change to these oligarchs, it is important to people's futures since it seems unlikely that we will have Social Security to rely on the way things are going. I think there is room for more ethics in our capitalist society and strongly oppose less accountability in the current economy. There are still many people out here who want transparency and to be informed consumers. Don't take that away from us now. Don't forget for whom you are actually supposed to be working... It's not just the billionaires, it's the common person. All the normal people out here deserve your consideration now more than ever.

Jennifer Lewis — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Lewis Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
We already have protections that have minimal consequences to market makers.
Business organizational procedures and financials are mandatory if you want investors and citizens gainfully working toward retirement.
Eliminating reporting will start a snowball effect that starts with less reporting and eventually erodes business integrity from shareholders to employees.

Jennifer Mitchell — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Jennifer Mitchell Affiliation: Jun. 12, 2026 I am against this change in reporting. More transparency is necessary to protect everyday people. This twice yearly reporting was tried and it failed- resulting in far lower gains for investors. The financial survival of myself and my family depends on my investments. Do not make this damaging change to less transparency.

Jerry Horne — Jun 12, 2026
Subject: S7-2026-15 Comment From: Jerry Horne Affiliation: Jun. 12, 2026 Ladies/Gentlemen:

I am opposed to allowing companies to report every six months versus the current requirements to report quarterly.

My reasons are as follows:

(1) I rely on quarterly information to make decisions concerning my retirement funds

(2) Six-month gaps between required reporting dates would create an unfair advantage for corporate insiders

(3) Making quarterly reporting merely optional does not provide the investing public with sufficient information because companies that opt in are often the ones whose investors most need frequent updates, and

(4) The savings companies would realize are not worth what the lack of information could cost me.

Though I am staunchly opposed to six-month reporting I do think four-month reporting would be frequent enough to meet my needs.

JF Guercio — Jun 12, 2026
Subject: S7-2026-15 Comment From: JF Guercio Affiliation: Jun. 12, 2026 Hello SEC,
I am Joseph Frank Guercio, I am a professional fleet director and consultant in the trucking and transportation industry. I am urging you to continue to require quarterly reporting. All shareholders deserve visibility to the performance of the businesses that they are part owners of and need quarterly reports at a minimum. I will argue that lowering the bar for reporting is lowering the expectations of accuracy and accountability. Doing so can lower the visibility for the leadership of companies and reduce their ability to respond to business challenges and opportunities. The minimum standards are set by the SEC. Don’t let companies hide their performance.

Thank you for your time.

Joanne Waryga — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Joanne Waryga Affiliation: Jun. 12, 2026 To whom it may concern:

I am writing to oppose the proposal that would allow public companies to shift from quarterly to semiannual financial reporting. I am a layperson; not even remotely a professional investor. My husband and I work with a financial advisor and trust that the existing regulatory framework provides baseline protections for people like us. We are not actively watching markets and do not have the knowledge or access to information that corporate insiders, analysts, and institutional investors have. Quarterly reporting is one of the few things that help to keep us informed. A six-month blackout

period is not just an inconvenience. It is an advantage handed to insiders and large institutions at the direct expense of regular investors and their advisors.

Framing it as optional is very concerning to me. The companies most motivated to opt out of quarterly reporting are likely those with deteriorating performance that would prefer to disclose as infrequently as possible. Those companies will not be a random cross-section of the market, and when something goes wrong early on in a semiannual period, ordinary investors may not find out in a timely manner, leaving only insiders the time to act.

I urge the Commission to reject this proposal. Quarterly reporting provides invaluable accountability to the public.

Sincerely,
Joanne Waryga

John James — Jun 12, 2026
Subject: S7-2026-15 Comment From: John James Affiliation: Jun. 12, 2026 Seems the SEC is wanting to hide things from the population, why, what are they hiding? It seems only “right” to keep the open reporting as it is to keep the population informed, and by hiding those who have the information (i.e. congress, those who work for the SEC), have an advantage. The nation needs to be treated fairly by those who are elected to represent them and those who are appointed by our elected officials need to treat all those citizens (i.e. our nation) as if they/we are their bosses, as essentially we are, at least in the democratic nation we currently live.

John James — Jun 12, 2026

Joseph Silberschlag — Jun 12, 2026
Subject: S7-2026-15 Comment From: Joseph Silberschlag Affiliation: Jun. 12, 2026 Joe Silberschlag - Sheet Metal Fabricator
Every single working class Americans between the ages of 18 and 65 needs to think about and be responsible for their own retirement. Since the government can no longer guarantee solvency of a Social Security that has been paid by taxpayers with a net negative return due to negligence it falls on everybody's shoulders to take care of it themselves. The only proper way to make any kind of decision is to have more information not less. Taking away availability for information to not only not pass along those savings but pocket them falls under both greed, negligence and on moral practices. All people contributing to the funds deserve the responsibility of investment companies to divulge exactly where their funds have gone.

Joshua Fredrick — Jun 12, 2026
Subject: S7-2026-15 Comment From: Joshua Fredrick Affiliation: Jun. 12, 2026 Are you serious? You're supposed to PROTECT investors... not allow the big players to literally make it Easier for fraud... you're SOLE job is to make sure FRAUD doesn't happen... this has gotta be worse than the blatant fraud you allowed with the gamestop fiasco in 2021. The securities and exchange commision has become an absolute joke. DO NOT MOVE FORWARD WITH this.

Joy — Jun 12, 2026
Subject: S7-2026-15 Comment From: Joy Affiliation: Jun. 12, 2026 Joy Crandon, Entrepreneur: In an age of automation, reducing transparency doesn't make sense. I self-manage my investments quarterly and reducing reporting only better hides details from
consumers. If a change is needed, increase reports to monthly.

Judith Love — Jun 12, 2026
Subject: S7-2026-15 Comment From: Judith Love Affiliation: Jun. 12, 2026 In a word the proposed six month period is outrageous. When we live in a world that changes so quickly and we need to make quick decisions that affect how our assets accrue or deplete, we would not know for six months how the company is doing?! During that period the insiders, the board members, the key executives WOULD know and have opportunity to act on that knowledge. To add to the immorality of this proposal, it would often be the case that the percentage of our wealth at stake during any six month period would be far greater than the percentage of heavy hitters' wealth. With all things financial such knowledge has the power to increase or decrease an investor's wealth. This is not simply reducing costs for assessing and reporting more often — this is advantaging the insiders while disadvantaging the rest of us. Same song, different verse.

Judith Powers — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Judith Powers Affiliation: Jun. 12, 2026 Quarterly reporting is the most logical reporting schedule. Do no change this. Don't penalize investors with a method that's proven to be wrong.

Julie Dunn-Morton — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Julie Dunn-Morton Affiliation: Jun. 12, 2026 Significant evidence from our country's own financial history makes it clear that quarterly reporting is a minimum standard for essential market transparency. The negative financial impact
it would inflict on a broad spectrum of Americans would cause generational damage and is an unthinkable assault on the economy. The SEC must not revert to a reporting method that is already a proven failure.
Respectfully,
Julie Dunn-Morton, Ph.D.,
St.
Louis Mercantile Library Endowed Curator and Research Professor Emerita.
St. Louis, MO

Julie Hippler — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Julie Hippler Affiliation: Jun. 12, 2026 Keep Quarterly reporting. Prevent fraud and abuse like the current Administration's claims to want.

Julie Hogen — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Julie Hogen Affiliation: Jun. 12, 2026 Julie Hogen, Social Services Supervisor, Minnesota, kindly ensure that quarterly reporting is maintained. Accurate and timely information is the cornerstone of financial markets. It significantly enhances investor decision-making, boosts market efficiency, and reduces the cost of capital.

Decades of research have consistently demonstrated that more frequent reporting leads to a reduction in a company’s cost of capital, which in turn supports higher share prices. Conversely, reducing reporting frequency has the opposite effect, pushing the gears in the wrong direction.

June Krinsky-Rudder — Jun 12, 2026
Subject: Keep Quarterly Reporting for Corporations From: June Krinsky-Rudder Affiliation: Jun. 12, 2026 To the Decision Makers at the SEC:

The stock market and economy are volatile right now (more so than in recent memory) and there is WAY TOO MUCH secrecy in financial matters that affect everyday people, their pensions and investments. There is no reasonable explanation for allowing corporations to hide their books for 6 months and to only require twice annual reporting. It reeks of criminality and cover-ups. If this is not meant to hide illegal business practices (especially those that might financially damage small investors and leave them vulnerable to losing everything) then it certainly isn't necessary to change what isn't in need of changing. Given the level of automation and easy access to data that these companies possess, there is no reason that they cannot continue the level of accountability to their shareholders and financial watchdogs that currently exists. DO NOT remove the requirement for quarterly reporting!

Thank you.

-June

Junk innatrunk — Jun 12, 2026
Subject: S7-2026-15 Comment From: Junk innatrunk Affiliation: Jun. 12, 2026 We need quarterly reporting so we can keep companies accountable, track changes, prevent fraud and insider trading and track investment. There are no savings to be made and nothing to be gained by changing this law. You know this better than anyone and pretending otherwise will only prove that you're complicit in the fraud being perpetuated on the common man. Please do better.

JUSTIN ABBOTT — Jun 12, 2026
Subject: S7-2026-15 Comment From: JUSTIN ABBOTT Affiliation: Jun. 12, 2026 Justin Abbott, Small Business Owner, this rule is a bad proposal. Allowing for a 6-month window only heightens the risk of fraud and insider trading. Like with most everything else in the world, more transparency is better. This rule would take us in the opposite direction we need to go.

Sincerely,

Justin

KANE ARD — Jun 12, 2026
Subject: S7-2026-15 Comment From: KANE ARD Affiliation: Jun. 12, 2026 The foundational principle governing publicly traded entities is an unwavering commitment to comprehensive transparency and consistent financial disclosure. Any perceived reluctance or inability to furnish regular, detailed operational and financial updates can significantly erode investor confidence and may lead to concerns regarding underlying corporate health or integrity. The privilege of accessing public capital markets is inextricably linked to the obligation of providing shareholders and the broader investment community with timely and accurate information. Organizations that find themselves unable to meet these stringent reporting requirements, which are crucial for attracting and retaining investment, might find their structure better suited to a private model, where the demands for public accountability are notably distinct.

Karen Bachus — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Karen Bachus Affiliation: Jun. 12, 2026 I say, NO! Don't mess with OUR finances—don't do it! Don't try to “fix” what isn't broken. Maintain transparency and quarterly statements. It is proven to work.

Karen Petersen — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Karen Petersen Affiliation: Jun. 12, 2026 I am writing to ask you for the sake of the American people to keep quarterly financial reporting.

We have already seen the failures with reduced financial reporting. Why the SEC would roll-back safety rails put in place to address known issues with bi-annual reporting if beyond comprehension.

Most companies already have their financial systems set up for quarterly reporting. To change this would add to existing companies IT expenses.

Limiting mandatory quarterly reporting would reduce essential market transparency, make it harder to spot risks, and create long information gaps that could be exploited by corporate insiders.

The SEC's role is to regulate the U.S. securities markets, protect investors, and maintain fair, orderly, and efficient capital markets. Reducing reporting requirements goes against the safeguards inherent to the SEC.

Karen Petersen
Retired IT Director

Karen Reynolds — Jun 12, 2026
Subject: File No. S7-2026-15 From: Karen Reynolds If this is for a public comment submission, you could write: I oppose the SEC's proposed requirement for semi-annual reporting because it would reduce transparency and limit investors' access to timely information. Quarterly reporting provides shareholders and the public with regular insight into a company's financial performance, risks, and operational changes. Moving to a semi-annual schedule could delay the disclosure of material developments, making it more difficult for investors to make informed decisions and potentially increasing market uncertainty. While reducing administrative burden is important, maintaining investor confidence through consistent and timely reporting should remain a priority.

Subject: Comment on S7-2026-15 From: Karla Smith Affiliation: Jun. 12, 2026 My name is Karla and I am retired with cancer. I am in Ohio. My husband has had a stroke. Anything that will possibly cut our life savings by half or even a third or quarter will be devastating to our survival. It takes everything we have to pay monthly bills, buy groceries, buy prescriptions, go to the Dr. , pay a $2700 a month insurance premium and make a pymt towards my $78,000 in cancer debt. If changing the reporting to every six months would result in a loss of savings, I might as well just stop fighting this disease. I can't help but feel that is a huge part of our governments long term goal. The quick dying off of America's oldest citizens. How disgusting.

kat S — Jun 12, 2026
Subject: S7-2026-15 Comment From: kat S Affiliation: Jun. 12, 2026 SEC
To whom it may concern,
I object to the SEC plan to revert back to dangerous semi annual reporting. Many instances of high level fraud occurred during those times. Further, I rely on quarterly reports to make decisions regarding my retirement accounts. I have tead several articles citing evidence that semi annual reporting has not worked in Europe.
I prefer to have a more frequent accounting of my investments and to have more access to the handling of funds.
KS

Kate Beabout — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Kate Beabout Affiliation: Jun. 12, 2026 Kate Beabout, Data Analyst, Columbia IL - this is a terrible idea. Reporting needs to remain quarterly in order to ensure that independent investors are well positioned to make changes to their portfolio as needed. While this sort of a change may make sense for large conglomerates, those of us without giant portfolios need to be able to make adjustments. If the reporting moves to be further apart, I may not have a good understanding of why things are shifting and would make moves or keep things in longer than would make sense if I had the full picture. This could cost people a lot of money in the long run and also may discourage people from becoming investors because of the potential decrease in returns. With Social Security in such a tight spot right now we need to ensure that the stock market remains steadily growing for independent investors.

Kate Necaise — Jun 12, 2026

Subject: File No. S7-2026-15 From: Kate Necaise I am writing to express my strong opposition to the Commission’s proposal to allow public companies to transition from mandatory quarterly financial reporting to a semiannual cadence. As a retail investor and a working American, I believe this shift fundamentally undermines the SEC's core mission of protecting individual investors and maintaining fair, orderly, and efficient markets. For over half a century, quarterly reporting has been the bedrock of market transparency in the United States. It is the equalizer that ensures everyday workers who risk their hard-earned capital in the stock market have access to the same baseline of timely, regulated information as institutional Wall Street firms. The argument that reducing reporting requirements eases corporate administrative burdens ignores a critical reality: retail shareholders are legitimate owners of these corporations. We do not just deserve to know how our investments are performing twice a year; we have a fundamental right to timely oversight. Moving to a semiannual framework will disproportionately harm non-billionaire investors in several distinct ways: Exacerbating Information Asymmetry: Large institutional investors possess the resources to conduct private channel checks, pay for alternative data, and maintain direct lines of communication with corporate executives. Retail investors rely almost entirely on standard regulatory filings to gauge the health of their portfolios. Cutting public data points by half leaves everyday citizens in the dark while professional insiders maintain their edge. Impeding Accountable Governance: Six months is an eternity in the modern, rapid-fire economic landscape. Restricting formal updates to a biannual basis means a company could experience catastrophic shifts in capital allocation, supply chain stability, or internal controls, and retail investors wouldn't find out until half a year later. Fueling Market Volatility: Rather than encouraging stable, long-term growth, a lack of regular data forces the market to rely on speculation. Replacing a predictable drumbeat of factual quarterly disclosures with 180-day informational voids will inevitably lead to massive, disruptive price swings when data is finally released. While certain corporate executives and ultra-wealthy stakeholders may favor a reduction in public scrutiny under the guise of combating "short-termism," American workers deserve a financial system built on transparency, not opacity. If the Commission wishes to foster healthy capital formation, it must not do so by locking everyday retail investors out of the information equation. The strength of the American economy relies on the trust and participation of its workforce. I urge the Commission to reject this proposal and maintain the mandatory quarterly reporting framework that has long made our markets the gold standard of global finance.

Kate Ogbuagu School Psychologist, NCSP — Jun 12, 2026
Subject: File No. S7-2026-15 From: Kate Ogbuagu I strongly support maintaining quarterly reporting requirements for publicly traded companies. As an individual investor and member of the public, I rely on timely and consistent financial disclosures to make informed decisions and to understand the performance and risks of the companies in which I invest. Quarterly reporting promotes transparency, accountability, and trust in U.S. financial markets. Receiving financial information only twice a year would significantly reduce visibility into company performance and could leave investors operating with outdated information for extended periods. Smaller investors like me do not have access to private channels of information and depend on regular public disclosures to ensure a fair marketplace. In an environment where public trust in institutions and regulatory changes can already be fragile, reducing reporting frequency would make me less confident that investors are receiving the information they need when they need it. Frequent, standardized reporting helps deter misconduct, identifies emerging problems sooner, and supports market efficiency by ensuring that material information becomes available to all investors on a regular schedule. The U.S. capital markets have long benefited from strong disclosure standards. Quarterly reporting is a key part of that framework. Any potential reduction in administrative burden for public companies should be weighed against the substantial costs to transparency, investor confidence, and market integrity. For these reasons, I urge the SEC to preserve quarterly reporting requirements.

Kathy Lane — Jun 12, 2026
Subject: File No. S7-2026-15 From: Kathy Lane I oppose allowing public companies to report their financial information semiannually vs quarterly. The quarterly filings allow for investors to be aware of changes in performance in a more timely manner. Sadly less timely reporting would open the door for companies to be less forth-coming about their performance and progress/or lack thereof. Many companies already push to close out quarters with good news. This will allow them to bury bad news at the start of a six month period. If this change is accompanied by an extended filing deadline, we could be looking at 8 months of no financial updates.

Kathy Leichty — Jun 12, 2026

Kathy O'Halleran — Jun 12, 2026
Subject: S7-2026-15 From: Kathy O'Halleran Affiliation: Jun. 12, 2026 Quarterly reporting is the PRIMARY means available of assuring the accountability of CEOs and the companies they run. To eliminate this quarterly requirement is a sure way to invite fraud and corruption, once more. This affects not only the shareholders, but also the public, and the government, in terms of the potential for financial disasters that require federal bailouts by taxpayers, (which I simply find despicable), and the impact that such loss of corporate trust has upon the stock market, the overall economy, and thus, national security.
Signed,
Kathleen O'Halleran

Kathy Roberts — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Kathy Roberts Affiliation: Jun. 12, 2026 To members of SEC: I want my stock holding reports to continue to be reported quarterly. I cannot fathom a good reason to return to a failed policy of bi-annual reporting. It's not broke, leave it alone, please. I'm already thinking of taking all my money out of the stock market because of this situation in Iran that we never get reliable information about. Which causes the market to become unstable. Don't make things worse for us. Kathryn Roberts, retired electronic sales representative. I live in Santee, CA in San Diego County.

Kipp Stone — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Kipp Stone Affiliation: Jun. 12, 2026 I am Barbara Kipp Stone a resident of Pennsylvania, retired bank and mutual fund portfolio manager, Chartered Financial Analyst, Certified Financial Planner. Information is the life blood of my former profession. The mission of my profession is to assist investors to maximize the return on their savings consistent with safety. Lower corporate reporting requirements equals greater opportunity for them to hide negative trends and events, increasing investor risk. We can be certain that good news will be well published. However, bad news can be hidden more easily with less frequent reporting to the advantage of poorly or fraudulently managed corporations and the detriment of investors.

Kirsten Newland — Jun 12, 2026
Subject: S7-2026-15 Comment From: Kirsten Newland Affiliation: Jun. 12, 2026 As Americans, we demand Full Transparency and Accountability from companies that we are investing in via our 401K plans. Our retirement savings are on the line. This is our money at risk. Representation matters. Taxation without representation goes against the Constitution. Keep requiring Quarterly Reporting. Do not make grifting easier for these publicly traded industries.

We, the People of the United States, are watching all government agencies very closely right now. I recommend that the SEC keeps the repercussions of any change to reporting in mind.

K. Newland
Michigan

Kjell Stuvstad — Jun 12, 2026
Subject: S7-2026-15 Comment From: Kjell Stuvstad Affiliation: Jun. 12, 2026 I am a licensed professional engineer, relying on investments for retirement income. In order to evaluate existing and potential new investments, access to timely company data is vital.

Doubling the reporting timeframe is an ill-advised measure that reduces transparency and understanding of current company performance.

Please keep the current reporting requirement as is.

Sincerely,
Kjell Stuvstad, P.E.

KK McKeon — Jun 12, 2026
Subject: Comment on S7-2026-15 From: KK McKeon Affiliation: Jun. 12, 2026 It's reckless to change reportings to twice a year.
I am 65 years old, and have invested for the past 42 years.
I am counting on retiring fairly soon and the potential losses to my investments would be catastrophic.
Please do NOT change the quarterly report requirements

K.McKeon, APRN

Kris Marshall — Jun 12, 2026
Subject: S7-2026-15 Comment From: Kris Marshall Affiliation: Jun. 12, 2026 I am a 64-year-old registered Republican who has voted with the Republican party most of my life. I have earned a good salary all my adult life and have always believed the USA is a land of opportunity for all.

Unfortunately, the actions being taken by the current administration, supported by the Republican party, are making me consider switching parties. How much more difficult do you want to make it for the average American to survive? The move to less frequent SEC reporting will make it easier for organizations to hide from their owners, the shareholders, what is actually happening. This administration is removing protections for the environment, for the uninsured, for immigrants who are here legally, and for working Americans. Please remember that you are supposed to be representing all Americans, not just lobbyists and business owners.

Kris Marshall

Krishma Patel — Jun 12, 2026
Subject: S7-2026-15 Comment From: Krishma Patel Affiliation: Jun. 12, 2026 Keep the quarterly reporting. Do not switch to 6 monthly reporting. My name is Krishma Patel. I manage my family portfolio and it is extremely important for me to have the companies report on a quarterly basis. As it helps me stay educated on my investments and make the right decisions to buy and sell.

Thank you,
Krishma Patel

Lark Mcgrail — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Lark Mcgrail Affiliation: Jun. 12, 2026 Lark McGrail, retired, Florida, fixed income. No to this change. I cannot afford to take a chance on the loss of any of my money because of semi-annual reporting. You already know what happed in the 50's and 60's when you did this. I have to wonder why you would consider this and who benefits, because someone does and it's not the investor. So I have to assume it's the giant corporations. So now you are representing them and protecting their profits as opposed to ours. I thought you were to protect us not steal our money for the giants. I will put my money under my mattress before I leave it in the market if you do this. Also online banks are beating your interest rates and I will move my money there if need be. Do not do this to the people of America. Our food and gas and rents are through the roof and honestly this would be the last straw. Also this administration says they are going to slash our SS, Medicare and Medicaid after the first of the year. Is bankrupting the American people your goal? What is happening here? I don't have any love for my country anymore as it has no love for me. I want to leave. This no longer the shining light on the hill, it's in the gutter and everything is only for the rich now. I'm through! Don't do this!

Laura Steder — Jun 12, 2026
Subject: S7-2026-15 Comment From: Laura Steder Affiliation: Jun. 12, 2026 I have read a bit about the SpaceX IPO generating such a stir that several 401ks will automatically invest in shares from your retirement account. Should this happen blindly for 6 months, any “conscientious objector”, who would never knowingly opt into any investments with this reprehensible owner, will find themselves innocently colluding with an antithetical enemy. I’m reminded of the times when university students across the US took to their campuses to call for divestment from companies doing business in Apartheid South Africa. Students, like me, protested vehemently to pressure the University of Colorado Boulder to withdraw investments with those doing business with South Africa, an apartheid government that had systematically smothered the voices of people like Nelson Mandela and Steven Biko who spoke out for freedom and human rights. Now we see a new investment “opportunity” to support Elon Musk, who coincidentally is South Afrikaans. As I once protested being a “blind” investor in something I could not support, I now see that I can again, unknowingly, become a co-conspirator or supporter of anything Musk. I object to the SEC allowing vast corporations to change the rule that governs quarterly reports for investors.

lauralyn leondidis — Jun 12, 2026
Subject: S7-2026-15 From: lauralyn leondidis Affiliation: Jun. 12, 2026 Protecting consumers from unscrupulous people who don't care who they hurt is part of SEC's job. Anything that helps SEC accomplish this goal, including quarterly reviews is important. Reducing these reviews to twice a year hinders SEC ability to do it's job & endangers the investor's. There are far more investor's than CEOs & democracy is about the greater good of the majority. It is not about showing favoritism to a few.

LAUREEN — Jun 12, 2026
Subject: Comment on S7-2026-15 From: LAUREEN Affiliation: Jun. 12, 2026 L. Boyd, Pennsylvania. Quarterly reporting is important for transparency. It's important that this not change. The people who invest in the stock market need quarterly reports to make decisions about their investments.

Lauren La Riva — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Lauren La Riva Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
Please don't get rid of quarterly reporting, because it would allow public companies to hide vital information from everyday investors and people with inside knowledge would have even more unfair advantages with trading. The stock market is already confusing and difficult enough for everyday people who are trying to make smart financial decisions and/or plan for retirement, but getting rid of quarterly disclosures and the information they provide would make it even harder for normal people to make smart investments, as investors would basically be in the dark for 6 months at a time. No one can feel good about investing their money blindly like that, especially knowing that there are people in high places with inside knowledge of large, public companies who would have an even more unfair advantage in such a trading system.
With the economy as it is, so many people like myself are struggling financially, worried about making smart financial decisions and whether or not they'll ever be able to retire. Even people who have 401Ks are worried about their retirement investments not being stable and not being enough to provide for their futures, because the stock market is difficult to predict and invest in for the average person. Please do the right thing for the American people who rely most on the information provided by wiarterly disclosures: every day people like me who are just trying their best to figure out the economy and protect their futures. Please protect the requirement for quarterly disclosures to ensure that every American has access to the vital, up-to-date information they need to make important investment decisions, to have their fair shake at investing for their future.
Sincerely,
Lauren La Riva

Lauren Racheal Funnell — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Lauren Racheal Funnell Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
To the Securities and Exchange Commission:

I am an individual retail investor, not a financial professional. As someone who has spent years caring for family members and managing limited financial resources, timely access to information is important when making decisions about savings and investments.

I am concerned that allowing companies to report only every six months could make it harder for ordinary investors to understand what is happening inside the companies they invest in. A great deal can change in six months, including financial performance, debt levels, legal issues, and business risks.

Large institutions and professional investors often have access to resources and analysis that individual investors do not. Quarterly reporting helps provide a more level playing field by ensuring that all investors receive important information on a regular basis.

While I understand the desire to reduce burdens on companies and encourage long-term thinking, I believe transparency and timely disclosure are essential for investor confidence and fair markets. I respectfully ask the Commission to carefully consider how reduced reporting frequency could affect retail investors who rely on public filings to make informed decisions.

Thank you for considering my comments regarding File No. S7-2026-15.

Lauri Zaker — Jun 12, 2026
Subject: S7-2026-15 Comment From: Lauri Zaker Affiliation: Jun. 12, 2026 Everybody involved should be able to have the information of the companies on how they are doing every quarter. The truth is freedom. Thank you, Lauren Zaker

Linda Deighan — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Linda Deighan Affiliation: Jun. 12, 2026 Linda Deighan,

Miami, teacher
Simply put, I want my reports quarterly. There is no reason to lengthen reporting time and every reason to maintain quarterly reports. I want more information on my investments not less. I do not want to spend extra time finding my own report, when there is sufficient technology and personnel to keep me informed about my money. I'm not far from retirement and now more than ever before is when I want to manage my money. My focus is is that it is MY money and I want to know what's going on more frequently than not because the risk of loss is too great. The government should not be in the business of legislation to keep the public in the dark!

6 mos is more time for fraudulent activity. I'm semi retired, and feel like I need to keep up with and know my finances now more than before
Lisa Tassin sonographer

Lisa Knollenberg — Jun 12, 2026
Subject: S7-2026-15 Comment From: Lisa Knollenberg Affiliation: Jun. 12, 2026 We need transparency in our markets, to protect retail investors and to maintain trust in the financial system. It is essential to keep companies reporting on a quarterly basis to keep the market fair and the flow of information equitable. And so that we can keep corporations fair and honest and not hiding things in the background while retail investors sit without up-to-date information. If something is going wrong with the company, retail investors aren't going to know in time and institutional and insiders will have already sold. This is a horrible idea for our system. The cost and time involved in quarterly reporting is a very small blip of the corporation's bottom line. It is the cost of doing business as a public company. Again, public companies should be required (not optional) to continue quarterly reporting of their financial information to keep the market as fair and transparent as possible for retail investors. The last thing we need is for people to lose faith in our stock market.

Thank you, Lisa Knollenberg, Senior Wealth Strategy Associate, Los Angeles

Lisa Miller — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Lisa Miller Affiliation: Jun. 12, 2026 I am Lisa Miller and I am a business analyst for a school district. I have a considerable amount of money invested in stocks because I can’t count on a state pension to pay for even a basic retirement. If I also lose even part of my investment to this terrible idea of only reporting twice a year, I will not be able to retire. I will have to continue working until I am dead. My investments are not a joke and companies cannot be allowed to destroy a lifetime of saving and investing in my retirement. Stop this! Do not allow reporting just twice a year!

Thank you,

Lisa Miller

Lisa Parker — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Lisa Parker Affiliation: Jun. 12, 2026 Hello,

My name is Lisa Parker, I am a Software Quality Assurance Manager in Bellingham, Massachusetts. Quarterly reporting needs to be preserved to maintain fair and transparent visibility. In this technological age, the burden of reporting is less than ever and a rollback to semi-annual reporting does a disservice to us all. Industry Insiders will still have a finger on the pulse, but every day investors are going to lose the insight that gives them autonomy in their investment decisions. Historically this has not been financially advantageous for investors, and sitting in the world we live in today, where pensions are a thing of the past and our investments are our best tool to give us solvency as we age, this could undermine the average Americans financial stability.

Please do not roll back to semi-annual reporting.

Thank you,

Lisa Parker

Litza Rivera — Jun 12, 2026

Subject: Comment on S7-2026-15 From: Litza Rivera Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:

I am writing as an individual investor regarding the proposal to move public company reporting from quarterly to biannual reporting.

I do not support reducing the frequency of public company disclosures. In fact, if reporting requirements are changed, I believe the SEC should consider requiring more frequent reporting rather than less frequent reporting.

As a retail investor, timely access to accurate financial information is critical for making informed investment decisions. Quarterly reporting already represents a significant amount of time between updates. Moving to biannual reporting would double the period during which investors must make decisions with limited information. This could increase uncertainty, reduce transparency, and potentially disadvantage individual investors relative to large institutional investors that may have access to more frequent management interactions and proprietary analysis.

Public markets function best when information is broadly available, timely, and transparent. Regular reporting helps investors identify emerging risks, monitor corporate performance, and hold management accountable. Less frequent reporting could lead to greater speculation, increased volatility around earnings releases, and reduced confidence in the fairness of the market.

While I understand concerns about compliance costs and short-term market pressures, I believe transparency should remain a priority. If changes are made to the reporting framework, I would encourage the SEC to explore ways to streamline reporting requirements while maintaining—or even increasing—the frequency of meaningful disclosures available to investors.

Thank you for considering my comments.

Sincerely,

Litza Rivera
Shrewsbury, MA

Kind regards,
Litza

Liz — Jun 12, 2026
Subject: S7-2026-15 Comment Quarterly reporting From: Liz Affiliation: Jun. 12, 2026 There is no valid reason to cut corporate reporting except to facilitate the rampant. corporate greed in this country. Any savings would be minimal and the cost to investors is lack of transparency. Do not let this happen. It is good for corruption and bad for America. I think you already know this though, please do the right thing.

Thank you for listening. Liz Kefauver Utah

Liz A — Jun 12, 2026

Subject: S7-2026-15 Comment From: Liz A Affiliation: Jun. 12, 2026 Your decision to black out company progression is pure evil and selfishness. You are here for us, not them. Take a hard look at yourself and act with integrity and regard your fellow man with respect and honor. Your decisions affect the future of your children, your grandchildren, and many others for generations to come. Honor yourself and make it a good one.

Liz Braswell — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Liz Braswell Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I don't always read the quarterly disclosures but I have them on file for future reference. Hiding this information is like asking someone to buy a cow they haven't seen lately. Would you?

Liz Feiler — Jun 12, 2026
Subject: S7-2026-15 Comment From: Liz Feiler Affiliation: Jun. 12, 2026 I urge you to keep SEC reporting quarterly. The average American has worked too hard to lose their retirement savings because we don’t know what companies are up to.

Elizabeth Feiler

Ll An — Jun 12, 2026
Subject: S7-2026-15 From: Ll An Affiliation: Jun. 12, 2026 Laura Angehr, retired American citizen, form New York. Reporting
should be kept quarterly. It is the only way to track criminal
behavior that might happen. Eron was told to do this for
accountability, keep it that way!

Lynn Aune — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Lynn Aune Affiliation: Jun. 12, 2026 RE: S7-2026-15

Dear Sir or Madam:

America already tried semiannual reporting - and investors paid the price.

You want to let public companies report financial results only twice a year instead of every quarter. We tried something similar between 1955 and 1970. The result was less transparency, lower stock valuations, and lower investor returns.

Transparency helps investors like me make informed decisions and hold management accountable. Reducing disclosures would weaken market efficiency and could significantly erode the value of Americans' retirement savings over time.

Please consider the impact on ordinary American investors when evaluating any reduction in transparency.

Thank you.
Lynn Aune

Marc Loflin — Jun 12, 2026
Subject: S7-2026-15 Comment From: Marc Loflin Affiliation: Jun. 12, 2026 How much longer do you think you can place corporations before people? Spoiler: it's not forever. I reckon a solution is coming soon.

Marc Speer — Jun 12, 2026
Subject: S7-2026-15 Comment From: Marc Speer Affiliation: Jun. 12, 2026 I am Marc Speer. I am retired but I was a CPA. A corporate tax and finance consultant with a Big 6 accounting firm.

While this may lighten the work load of a few specialized accountants who compile the quarterly reports, this won’t lessen the overall data collection and analysis costs significantly.

Companies will still need these numbers for day to day operating and management decisions. Boards and C-Suites will not allow themselves to be left in the dark.

You (the SEC) and I (speaking for all investors of every ilk) will suffer. Investor willingness will suffer. Stock prices will be suppressed, but the suppression will be punctuated by momentary bursts of

frenetic trading.

I was active during the Enron debacle, and I can only remind you of the chaos in the financial services and corporate governance worlds that was caused solely by a failure in financial reporting. How much worse it could have been.

Margaret High Pipe — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Margaret High Pipe Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I am writing to express my strong opposition to proposed Rule S7-2026-15. As a retail investor, I rely on consistent and transparent data to make sound financial choices. Taking away quarterly information would leave investors like me investing with a blindfold on, severely hurting the investment decisions that shape our financial futures.
This proposed rule effectively allows public companies to hide vital information from the public. Regular quarterly disclosures are essential because they help retail investors make informed decisions, rather than forcing us to guess in the dark.
Furthermore, there is already a pervasive and unacceptable lack of transparency in the financial sector. Far too often, when everyday investors try to track down our own assets or get clear answers, we are met with institutions deliberately hiding information. We are frequently told by financial entities that they "don't know" or "have never heard anything like that before" when questioned about our accounts.
The SEC and these financial institutions are the very people who should be helping me obtain and manage my assets, not creating more loopholes that allow companies to obscure the truth.
The SEC shouldn't take vital information away from the public. I urge you to reject Rule S7-2026-15, enforce stricter reporting, and stand on the side of transparency for everyday investors.
Sincerely,
Margaret High Pipe

Margaret Marcarelli — Jun 12, 2026

Maria Claudio — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Maria Claudio Affiliation: Jun. 12, 2026 Maria Claudio, Accountant, Orlando FL. Please do not reduce or change the reporting requirements. We have worked so hard to save and have something for retirement. Losing our savings will put us in a really bad situation in our older years. Companies need to be accountable and diligent with other people's money. Keep the reporting as is Please. If you don't monitor, companies will not care as much.

Maria Elena Navarro — Jun 12, 2026
Subject: S7-2026-15 Comment From: Maria Elena Navarro Affiliation: Jun. 12, 2026 Please keep the quarterly reports. As it is we are being forced to pay for those 'paper' reports, as they prefer not to call attention to them by sending them digitally otherwise. Those of us who are not millionaires and have no one to look over our paperwork don't get the same treatment in protecting our investments. We are supposed to 'pay attention to the reports' but others are taken care of by the investment companies. The companies should not be allowed to charge for sending paper reports, they get plenty of fees already. This information, sent in a timely manner (at least quarterly), is important to those of us who count on those monies to take care of us unto death.

Thank you for your attention,
Maria Elena S Navarro
Retired Science Teacher

Maria Ferran — Jun 12, 2026

Marilyn Ramirez — Jun 12, 2026
Subject: S7-2026-15 From: Marilyn Ramirez Affiliation: Jun. 12, 2026 My name is Marilyn Ramirez, and I'm a therapist in Rockford, IL. Absolutely out of the question to cut the quarterly reporting! My retirement is all in stocks. How dare you propose to put my hard earned money up for grabs to these people who look at our money like play things. They don't mind insider trading, cashing out, and screwing the little guys. Well don't forget there are MILLIONS of us little guys out here watching you and telling you that you better not give these playboys more power over our money!

Marilyn Shea — Jun 12, 2026
Subject: S7-2026-15 From: Marilyn Shea Affiliation: Jun. 12, 2026 I have not heard of any problems, due to the 4 signatures per year. It has worked well. Leave it alone! Why would you propose something that creates a gap in accountability, and then question how to fix it?
These companies file 4 times a year, make the filings honest each time! Again, I have not heard 1 reason to change it! It sounds like maybe you're trying to let the rich get richer by being off the hook for accountability! It sounds like maybe they complained, because they can't use ENRON's excuse of "we didn't know". That's the whole point! No, they need to be held responsible!
Why should my name be attached, so the Felon in Chief, can get his henchmen after me, no thanks. He's probably advocating this change!

Marilyn Snelson Temple — Jun 12, 2026
Subject: S7-2026-15 From: Marilyn Snelson Temple Affiliation: Jun. 12, 2026 The quarterly accounts are working! These CEOs need to be kept in check. They have shown in the past that they need to be held accountable. Too many hardworking people lost a lot of money because of criminal behavior.

Never again. Save the Quarter Reporting.
Sincerely,
Marilyn Snelson-Temple, Retired Public School Employee, Rochester MN 55901

Marisa Munoz-Vourakis — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Marisa Munoz-Vourakis Affiliation: Jun. 12, 2026 Marisa Munoz, Retired Certified Court Stenographer, Raleigh, NC - There is No Way the SEC should be able to change reporting to Semi-Annual. This would be disaster for shareholders and open up an opportunity for more grifting and corruption by corporations who answer to Shareholders. Vote NO to Semi-Annual Reporting.

Marissa Jao — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Marissa Jao Affiliation: Jun. 12, 2026 The rest of our retirement income depends on the financial health of which company the fund manager invest in

Don’t let politics get into our money.

A quarterly full disclosure is necessary

Marjorie Kulbis — Jun 12, 2026
Subject: S7-2026-15 From: Marjorie Kulbis Affiliation: Jun. 12, 2026 We have seen too many cases where CEOs, etc., wiggle out of serious off that they have perpetrated in their companies. They need to remain responsible for wrongdoings within our company and they need to know what is going on in their own companies. So quarterly reporting is the best way to do this.. Don’t take the easy way out or we will suffer.

Mark Eder — Jun 12, 2026
Subject: From: Mark Eder Affiliation: Jun. 12, 2026 My name is Mark Eder, I am a Service Engineer for a publicly traded Medical Device Company.

In the current world where grifters and corporate scheisters are elected to public office and immediately use it for their own personal gain, this aligns perfectly with the status quo - move all insight and transparency back to the rear of the room, behind the curtain. Stop accountability and visibility so the current administration and their ilk can continue to abuse their positions and line their and their allies pockets at the expense of the taxpayer and honest shareholders.

It’s far past time the “by the people, for the people” Government does what it was intended to do and keep removed any obstacles for accountability from the publicly traded corporations on the Stock Exchange. Four Quarter reporting should be the very least that is mandated, and should only be the beginning of a robust set of checks and balances that enable honest oversight.

Maintain your integrity and do not shift to twice-a-year reporting.

Mark Eder

Mark Tessler — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Mark Tessler Affiliation: Jun. 12, 2026 The strength in the future of our nation depends on a free and open responsible platform, by which people, and not just organized corporations and conglomerates, can partake in opportunity and invest with confidence. It is apparent to many, including myself, that manipulation of the economics of the market and beyond are out of control with this current White House administration.

The greed factor is unbearable and it's alarming. The recent cycles of the market are atypical (or at least they are to me) and they are foreshadowing an unfair balance in a free & open market. There's TOO MUCH CONTEMPORANEOUS MANIPULATION of events, politics, and how the market RESPONDS. In addition, one of the caveats of our time, betting platforms are shaking things up with a much more unpredictable climate for investors; get rich schemes are breaking all the rules are not to be tolerated by the very agencies we depend upon for transparency!

Keep it where it is, and enforce traditional complacency and fairness; otherwise collapse for the majority and only the greedy few will try and get away with it. You can't let them.

M. Jonathan Tessler, MD

Marlowe Grau — Jun 12, 2026
Subject: S7-2026-15 Comment From: Marlowe Grau Affiliation: Jun. 12, 2026 My name is Marlowe Grau. I graduated with a degree in Business and a minor in Administration. My current job is Forensic Services Specialist and as a result of my post secondary education I am very active in managing my finances including future and retirement planning. I have lived through the high flying days when Enron was considered a beacon of what a company could be capable of as well when it's corruption was being discovered resulting in it's subsequent bankruptcy and the fallout that spilled over to other companies including Arthur Anderson, who at the time was classified as one of the "Big Five". The actions of these companies and lack of transparency of others such as MCI/Worldcom lead to the quarterly earnings being signed as accurate by E-suite Management under penalty of criminal charges. This increased transparency is crucial to making equitable financial decisions more now than ever before with the advent of A.I. and constant flow of mis-information through social media channels. To enable the reduction of financial disclosures from quarterly to semi-annual will create a cover that only helps those with inside or near inside access to businesses. The public who participate in the market system will be blind to the routine financial health of business and unable to make effective decisions in an atmosphere that is already too often stacked against them. It is for these reasons that I request continuation of quarterly signed reporting of financials.

Martha Marshall — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Martha Marshall Affiliation: Jun. 12, 2026 I am a retired teacher. Worked about 40 years, 34 years teaching. My retirement pension I'm sure has money invested, as do I, in stocks. I am more fortunate than many other retired folk. Conditions have gone down hill with this present government and going to semi annual reporting would be just another way to take advantage of the American people. When companies are allowed to have less transparency things change and the public pays. Do not change what is not broken. Remember who built this country and who keeps it running. Do what is right! Sincerely, A Michigan retired teacher Martha Marshall

Marty Loper — Jun 12, 2026
Subject: S7-2026-15 From: Marty Loper Affiliation: Jun. 12, 2026 If CEOs have a problem signing their financials quarterly, let them do it monthly!

The current quarterly signings is the minimum it should be.

Changing it to semi-annual only gives them more time to hide, lie and steal.

Hold them accountable. Because their shareholders and Boards of Directors certainly is not going to as long as the profits are landing in their bank accounts.

Corporations are raping the average Americans at obscene rates. Inflation is outrageous. Incomes are not keeping pace and yet corporations continue to make record profits by shrinking product

sizes, quantities and/or volumes AND raising the prices as well.

I can only hope that the members of the SEC have some conviction, morals and backbone to hold the line with quarterly submission and certification.

Marty McFadden — Jun 12, 2026
Subject: S7-2026-15 Comment From: Marty McFadden Affiliation: Jun. 12, 2026 This is a bad idea. It is obvious that it gives more power, control, and financial benefit to those who already have more power, control, and financial benefit. As a society, we should be making rules that help give power, control, and financial benefit to as many in society as possible. This in turn helps stabilize and improve the quality of life for all demographics, producing a better workforce, less crime, less financial emergencies, and a generally healthier society. This proposal to go to semi annual reporting obviously was backed not by average people, but by people making grundles of money who understand how to further push the legal boundaries to manipulate markets for their benefit alone. No good!

I have worked hard to build up my savings and I will depend on the return on these investments when I retire for the final time.
The SEC must continue with quarterly reporting. Just once, consider what is best for the working class.

Sent from my iPhone

Mary Ellen Noel — Jun 12, 2026
Subject: S7-2026-15 From: Mary Ellen Noel Affiliation: Jun. 12, 2026 Hello,
My name is Mary Ellen Noel, and I am a 64 year old from Pittsburgh, PA. I personally have stock investments, and will be dependent upon them for my retirement years, so this is a matter that I personally take very seriously.
We have learned from experience that when left to police themselves for an extended period of time, that too many corporations even though public, will 'fudge' their numbers more often than not. The saying "Those who do not learn from history, are doomed to repeat it" is also based in fact, and in this case should definitely be heeded. There's a reason why legal consequences had to be instituted for those who succumbed to the temptation of fraudulent reporting, and if we extend corporate - SEC reporting to every six months, we know that it is highly likely that many reports will be falsified to some degree, impacting shareholders and our economy negatively.
It is imperative that we maintain the highest legal standards and obligations when it comes to corporate - SEC reporting. We must also maintain public trust in it, especially at this time.
We must not allow less than the current 'quarterly SEC reporting', now or in the future! With today's technology, it isn't as terribly difficult to prepare reports for presentation as once was.
Please keep the 'quarterly SEC reporting', as it currently stands. This nation is already too rife with corruption, let's not take the chance of making the same mistakes again!
Thank you for your consideration,
Mary Ellen Noel

Mary Garland — Jun 12, 2026
Subject: File No. S7-2026-15 From: Mary Garland I am appalled by this proposed change to the timeline of financial reporting. Even though it is optional, the fact it has been proposed and is being fast-tracked because Trump supports it is unconscionable, unethical and in my mind criminal. Changing from quarterly to semi-annual will only benefit the wealthy. Let me remind you of the SEC's mission: "At the Securities and Exchange Commission (SEC), we work together to make a positive impact on the U.S. economy, our capital markets, and people’s lives. Since our founding in 1934 at the height of the Great Depression, we have stayed true to our mission of protecting investors, maintaining fair, orderly, and efficient markets, and facilitating capital formation." You should be ashamed of yourselves.

Mary Harless — Jun 12, 2026

Mary Hill — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Mary Hill Affiliation: Jun. 12, 2026 Allowing semi annual reporting vs quarterly reporting would hurt investors like me. I need to see the quarterly reports to determine if my investment is performing as it should. Semi annual reporting would reduce visibility. I would have to wait six months to see official changes in margins, debt levels, or inventory health. It would encourage price volatility where earnings releases would carry higher stakes, which can trigger massive price gaps if results miss expectations. I am currently a retiree but was previously a Senior IT Director at a health care organization assisting with financial reporting. I know that most of the information for the reports is readily available and so the story of it taking lots of administrative time is not really true.

Subject: S7-2026-15 Comment From: Maureen C. Allen Affiliation: Jun. 12, 2026 A Hard NO to semiannual financials from publicly traded companies! Its effect would be discriminatory. Everybody knows that; reject this nasty idea!

Maureen Cullen — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Maureen Cullen Affiliation: Jun. 12, 2026 Maureen Cullen Retired, V.P. Sales and Marketing for Reuters North America

Trump's proposed cut in the scheduled financial accounting reports for public companies poses serious risk to retail investors.

At a time when the US government is making sizable direct investments in AI technology shares;
at a time when the US government is taking millions of barrels of oil from Venezuela;
at a time when Trump's children are taking billions from Saudi Arabia and planning real estate deals in Gaza;
at a time when crypto pump-and-dump trading is generating billions for the Trump family;
this time is when the SEC considers cutting public disclosure of financial statements.

The corruption in these times is hard to believe.

The SEC is the last barrier.

Sincerely
M C

Mazagan Sietsma — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Mazagan Sietsma Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
Public companies have no business hiding any information at all, if they're publicly traded. That's bad faith and not fully transparent information or accurate representation of the companies.
I would never invest in anything if publicly traded public companies are permitted to portray themselves as something they're not or aren't fully transparent with their informational documents. That fully goes without saying for the SEC, as well.
I don't invest in the stock market currently and never have. If I ever were to invest in the future, I want to know that I'm doing so with all of the information, tools, knowledge, and due diligence for my informed decision(s) to move forward, or go in a different direction.
This is critical and essential in making very important educated decisions in equitable sound investing. The SEC above all else, needs to be transparent and accountable, just like the publicly traded companies. Otherwise, what are we really doing?
In a world where things are made to fail, that doesn't progress anything but a false narrative, throw away culture, and scammer's bank accounts.
The SEC should know better and do significantly better.

Melba Bentley — Jun 12, 2026
Subject: S7-2026-15 Comment From: Melba Bentley Affiliation: Jun. 12, 2026 Agree it should be quarterly.

Melinda Taggart — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Melinda Taggart Affiliation: Jun. 12, 2026 Dear Sir/Madam,

I am writing to express my strong support for maintaining the current quarterly reporting requirements for publicly traded corporations.

The frequency of these reports is essential for ensuring transparency and accountability within the market. Quarterly disclosures prevent the concealment of financial losses and provide investors with the timely information necessary to remain engaged and confident. This level of oversight is vital for maintaining a robust and trustworthy market environment.

I urge you to keep the existing quarterly reporting mandate in place to protect investor interests and market integrity.

Sincerely,

Melinda Taggart

Michael Caracappa — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Michael Caracappa Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:

There are too many ways that institutions, hedge funds and professional traders have access to information that the regular retail trader or retail investor does not there is already because of this a huge gap in information. Any rules decreasing the access that retail traders or investors have to information should not be passed. Since Covid there has been a marketed increase in retail investor, sentiment, and activity. Any rules passed should increase the information available to retail investors. Not only should it increase the information available, but it should simplify it in terms that they understand. The SEC and FINRA's roles should be to protect the common investor, not create ways to give institutions hedge funds and professional traders an edge over them.

Michael Caudill — Jun 12, 2026

Michael Fox — Jun 12, 2026
Subject: S7-2026-15 Comment From: Michael Fox Affiliation: Jun. 12, 2026 To SEC Officials,

Quarterly reporting is required of companies - especially in a post-Enron environment - because transparency is the closest thing to a safeguard ensuring that both the companies and their investors aren't manipulating their results.

Now with Cryptocurrencies, this visibility matters all the more.

Keep requiring quarterly reports - 10Q's - because holding the executives accountable for honestly reporting financial results is needed more than ever.

Subject: Comment on S7-2026-15 From: Michelle Ross Affiliation: Jun. 12, 2026 This is a ridiculous suggestion to go back in time. Investors need accurate and timely information to make decisions. We also need protection from the oligarchy, who evidently have full acces to insider information now.

Michelle Ross

Michelle Santhanam — Jun 12, 2026
Subject: S7-2026-15 Comment From: Michelle Santhanam Affiliation: Jun. 12, 2026 My name is Michelle and my job title is irrelevant to this discussion. As someone who trades regularly in the stock market, I can’t think of one reasonable argument FOR semi-annual reporting instead of quarterly reporting. Reducing reporting requirements only hurts the average, every day trader that makes up the vast majority of our country. Those relying on more frequent information to decide where to invest their inheritance, or put their retirement dollars. These are people currently living paycheck to paycheck, and for whom small shifts in the market make massive differences in quality of life. It would be unconscionable for you to make information less available to them to make the

lives of corporations leaders and those who engage in insider trading easier. And let's be honest. Those are the only lives you would improve with this maneuver. The current reporting schedule is not a burden. Companies have been doing it routinely since before most of our kids were born. Do NOT change the current reporting schedule and bow to the pressures of corrupt people with their own interests in mind rather than the welfare of the people of this country.

I am retired comfortably at this time. My financial team uses quarterly reports as a tool to help me remain that way.
This new approach is just daring another couple of Enrons start showing up. Didn't we learn anything before?

Mike Martin — Jun 12, 2026
Subject: S7-2026-15 Comment From: Mike Martin Affiliation: Jun. 12, 2026 My name is Michael Martin. My wife and I are nearing retirement age. We have worked very hard our entire lives to save what we can and to make wise financial decisions . Many of those decisions
involve our retirement planning and being able to see how well companies are or aren't performing. Quarterly reporting has been paramount in that decision making process. Quarterly reporting has allowed us to change course in our decision making process when
it became clear that certain investments were no longer benefiting us. Changing reporting to every 6 months would mean that for at least half of the year, we literally would be flying blind with our investments, effectively removing our ability to course-correct
our investments as is so critical, especially as close as we are to retirement right now. For these reasons, we respectfully request that the SEC continue to allow reporting every quarter as has been customary, and as so many investors have come to rely. Thank
you in advance for your consideration.

MP — Jun 12, 2026
Subject: S7-2026-15 Comment From: MP Affiliation: Jun. 12, 2026 SEC,
It is important that the reports stay quarterly. Most companies already function on quarters and investors need to know what is going on in a timely manner. Also, there are workers that produce and review these reports. Fewer workers will be needed if the reports become every six months. There is enough unemployment right now without adding this to the mix.
Protect American investors by maintaining quarterly reports and regulations.

Matthew Price, RN, BSN, CCRN, HIVPCP

MP Feitelberg — Jun 12, 2026

Nancy Lombardo — Jun 12, 2026
Subject: S7-2026-15 Comment From: Nancy Lombardo Affiliation: Jun. 12, 2026 Dear SEC Commissioners,

I am writing to express my strong disappointment regarding the recently proposed regulatory changes. The primary role of the SEC is to protect investors rather than the interests of companies listed on the exchange.

The proposed changes risk obscuring valuable information that investors rely on to assess company performance. Since the 1950s, disclosure rules have been strengthened to empower consumers; there is no reason to alter a system that is not broken.

As an investor, I believe that information is essential knowledge. If these rules are changed, I will have to rethink my investment strategy and may forgo investing in individual companies in favor of index funds for safety.

I urge you to reconsider these changes and maintain the transparency necessary for a fair market.

Sincerely,

Nancy Lombardo

Nic Watson — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Nic Watson Affiliation: Jun. 12, 2026 Dear Secretary Countryman and Commission Members,
As an individual investor with 26 years of experience in U.S. equities, I am writing to express my

strong opposition to proposed Rule S7-2026-15. While I have historically focused on domestic markets, my recent research into international exchanges has highlighted a stark contrast: the unparalleled transparency of the U.S. financial system is our greatest competitive advantage. We must not take it for granted.
The U.S. market thrives on clear insider trading disclosures, low transaction fees, high data availability, and—crucially—frequent earnings reports. Diminishing any of these standards would be a significant step backward for our capital markets.
Most importantly, frequent public reporting is essential for maintaining a level playing field between everyday retail investors and large institutional firms. The longer the gap between earnings reports, the greater the opportunity for material information to leak and be acted upon unfairly by well-connected entities.
I strongly urge the Commission to vote against Rule S7-2026-15. The administrative overhead companies incur to compile these reports is a small and necessary price to pay for the transparency and trust that makes U.S. markets the strongest in the world.

Nicholas Osmond — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Nicholas Osmond Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I am against the proposed Rule S7-2026-15 that will allow public companies to submit reports every six months rather than every 3 months.
As an individual retail investor, I think that decreasing the frequency of information updates available to help with decision making would be a disadvantage.
It's important that investors are able to access relevant data in a timely manner as there may be an increase in investor risk when information is available less frequently.
Institutional investors tend to have more access to information and are granted more opportunities to

gather information than retail investors. I think that the proposed rule would increase the existing divide between institutional and retail investors in this sense.
I think that markets should be operated as an exchange that strives to maximise transparency and fairness for all participants.
Costs involved in ensuring a free and fair market would be money well spent if they can achieve an outcome that approches these ideals.
Thank you for reading my comment.
Kind regards
Nicholas Osmond

Noelle Hockaday — Jun 12, 2026
Subject: S7-2026-15 - Quarterly Reporting Is Essential! From: Noelle Hockaday Affiliation: Jun. 12, 2026 I am a web developer out of Connecticut who thinks quarterly reports are essential in keeping things transparent for investors. Reducing reporting to only twice a year only benefits corporations and even moreso people with connections to corporations who are making insider trades. The proposed changes are obviously the result of lobbying and corruption, and hopefully if they come to pass then those who allowed it to will see real legal consequences when it is inevitably repealed by the next sane administration.

Thanks,
Noelle Hockaday

Pam Harris — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Pam Harris Affiliation: Jun. 12, 2026 P. Harris, CPA Auditor Pittsburgh, PA There needs to be accountability and banking and quarterly disclosures are essential. SEC reporting is key to ensuring accountability. As an auditor I have seen frauds, misstatements, and the like occur primarily because no one was looking. Reducing reporting would cultivate an environment that breeds stepping over the line thinking and actions.

Pam HylbertEder — Jun 12, 2026
Subject: S7-2026-15 Comment From: Pam HylbertEder Affiliation: Jun. 12, 2026 Pam Hylbert-Eder, Real Estate Broker

At a time in our history when we are seeing more oversight into where our money is going, why would there even be a consideration given to those who have money invested. As a Real Estate Broker and citizen, I watch the markets daily and follow what is going on to future predict what can happen in our real estate market as well as my clients futures and my own. No matter where your work, your income and savings are affected by where you have your money. This would be a gross negligence on the part of the SEC for more fraud to happen in our country. Transparency in all walks of our system are needed now more than at anytime in our world.

Pamela Simmons — Jun 12, 2026
Subject: S7-2026-15 Comment From: Pamela Simmons Affiliation: Jun. 12, 2026 Pamela Simmons, account representative. I check all my balances of my accounts and cards every month regularly, if not once a week. I want to keep up on the status of my accounts including my retirement. There are plenty of news items about balances disappearing due to hackers. I want to insure my accounts remain intact--it is my money and my responsibility. It is the responsibility of companies that get tax favors and charge the rest of us for their goods and services, to be honest and accountable (not greedy and gouging.) Keep the reports of the companies quarterly, or if you have to change the frequency, they should report once a month like most accounts, to keep better track, it is easier to keep up every day for that matter. Like it's so hard to do .....

Pamela Stolarski — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Pamela Stolarski Affiliation: Jun. 12, 2026 You, Senators, Congressman give up all of your income and benefits. That's what I think. Give me $3 million dollars to invest. Oh and yall are all fired. What in the hell do you think you are doing with my money? Tax everyone like we have paid in. No matter what you earn. How much has been borrowed from SS?

Patricia Wheeler — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Patricia Wheeler Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I object to the proposed rule that corporations do not need to produce quarterly financial updates as they have for over 50 years, and can instead produce such information on a six month basis. As a private personal investor, I have relied on quarterly corporate information to evaluate the safety and the potential earnings of stocks that I am considering to purchase or sell. A lot can change in even a quarterly period so the accuracy and currency of information is critical to making good judgements in purchase and sale situations. I would think that large investors (which I am not) would have similar concerns about the accuracy and completeness of information that is more than three months old.

Patricia Williams — Jun 12, 2026

Patrick Taylor — Jun 12, 2026
Subject: S7-2026-15 Comment From: Patrick Taylor Affiliation: Jun. 12, 2026 Actually.. let’s go semi annual…

I have mixed views on them.

When you work under the peril of a quarterly report, management makes very short term decisions that aren’t in the best interest of the business’ sustainability. Further, there is a lot of work done to publish reports that are nice but add only costs to the P&L.

On the other hand, there are management teams that need to be kept honest. But, those companies should just be avoided… buyer beware.

Thank you,
Patrick

Warren Buffett · Chairman & CEO of Berkshire Hathaway, Do not allow Putin-Trump to run America any more! These traitors will be written about by journalists in many countries for many years, and the Trump SEC will be blamed!

Paul Czarnowski — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Paul Czarnowski Affiliation: Jun. 12, 2026 Paul Czarnowski Retired Engineer. I agree with Elizabeth Warren, Senator Elizabeth Warren is strongly **against** getting rid of quarterly reporting requirements for publicly traded companies.
When proposals to eliminate the 10-Q quarterly financial statements have been raised (often with the goal of moving to a semi-annual, six-month reporting schedule), Warren has emerged as a vocal opponent. Her stance centers on a few key arguments:
* **Undermining Transparency:** She argues that slashing reporting requirements severely reduces transparency in the financial markets. Quarterly reports give investors a timely look into a company's financial health, and cutting that down to twice a year creates a dangerous information gap.
* **Hiding Negative News:** Warren warns that a six-month reporting lag would allow corporations to conceal or delay bad news, mask financial missteps, or hide the negative impacts of macroeconomic changes for much longer periods.
* **Protecting Everyday Investors:** From her perspective, regular and public disclosures protect everyday retail investors. Reducing the frequency of these reports tilts the playing field further in favor of corporate insiders, potentially opening the door to increased insider trading and less accountability.
While proponents of ending quarterly reports—including some corporate executives—argue that it reduces compliance costs and stops companies from focusing solely on short-term, quarter-by-quarter goals, Warren and other critics view the move as a major rollback of critical post-scandal market protections.

Paul Czarnowski
617-470-7272

Paul Dolnick — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Paul Dolnick Affiliation: Jun. 12, 2026 The danger of making this change:

Less frequent reporting tends to favor insiders and institutions with informal information advantages, while retail investors (that's me and all my fellow investors) lose a key transparency touchpoint. History backs this up, when quarterly reporting was restored in the 1970s. The case for qyarterly reporting is NOT a huge regulatory burden on companies. Semi-annual reporting is primarily a benefit to issuers, and a detriment to most investors.

Because of this negative impact on my investments and on other investors, I want to oppose, and ask you to oppose this change. I cannot afford an over 30% decrease in the value of my investments, as the metrics show between 1955 and 1971, when the change went to six months instead of quarterly. Don't let this happen again.

Paul Lindemeyer — Jun 12, 2026
Subject: S7-2026-15 Comment From: Paul Lindemeyer Affiliation: Jun. 12, 2026 "The little people should mind their own business. Keep them out of the loop." This is the philosophy of too many in business and the corporate world today, as if they should have the "freedom" to disregard the interests of smaller shareholders.
At a time when all of us must be responsible with our money and investments, the SEC is looking on that as a privilege business can't afford, and the average investor doesn't deserve! I won't even mention companies' greater incentive to misbehave when no one's allowed to look in. Anyone who doesn't think that is a side benefit is a **** fool.
For the good of "the little people," DO NOT DO THIS!

Paul Lindemeyer

Paul Maloney — Jun 12, 2026
Subject: S7-2026-15 Comment From: Paul Maloney Affiliation: Jun. 12, 2026 Paul Maloney,

Performance Management Analyst

I think the quarterly reporting should remain quarterly. I want to know that any information that the public should be aware of should be made available on this schedule so that informed decisions can be made, before inaction can lead to financial loss that may lead to hardship for some.
Respectfully,
Paul Maloney

Paul Marcussen — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Paul Marcussen Affiliation: Jun. 12, 2026 Keep quarterly earnings reports. I want to know what is happening with my hard earned savings.

Paul Prine — Jun 12, 2026
Subject: S7-2026-15 Comment From: Paul Prine Affiliation: Jun. 12, 2026 Paul Prine
Private citizen, retired
As a retiree, it is important to me to be on top of how my retirement funds are doing. Six months between updates will negatively impact my ability to assess my fund assets and make adjustments in holdings if necessary. Reporting was made quarterly for a reason; going back to biannual is a step backwards that does not serve investor interests.

Sent from my iPhone

Peter Dohm — Jun 12, 2026
Subject: Regarding SEC rule adjustments to allow for semi-annual reporting From: Peter Dohm Affiliation: Jun. 12, 2026 Hi!

I'm Peter Dohm, Chief Technology Officer of Black Mesa Technology Inc. a growing small business that someday hopes to be publicly traded, and I live in Cleveland, Ohio.

There's a corollary to the saying "democracy dies in darkness" and that is that "fraud thrives in the shadows."

We live in a world where automation and near real time record keeping and reconciliation are the norm, and GAAP rules are very well understood by industries, and this is readily achievable even for small companies at very low cost. Our ten person company can immediately demonstrate all revenues, expenses, and capital investments to our investors and this will scale with us easily because we built systems to ensure this remains easy to do as we grow, because this is integral to our survival.

So, if we are being circumspect, we as a society should be striving for well-funded properly resourced publicly-held companies to have near-real-time disclosure of their financial performance, not the inverse to move to less frequent reporting such as semi-annual reporting.

I posit that we are doing this all wrong as a society if it requires *substantial* work to file our reports; we should be incentivizing nearly automatic reporting and it seems to me that only those trying to subvert GAAP have to struggle to figure out how to book their revenue, capital investments and operating expenses.

We should be lowering the friction to prepare filings and make them nearly contemporaneous, not promote methods whereby the burden *appears* to be relaxed, but is in fact making it harder by avoiding the systematizing of report generation with the side effect of simultaneously reducing genuine transparency.

I've worked 12 hour days for 35 years to save for a retirement, and it infuriates me to realize that we are consider making it easier for companies in which I invest to misdirect and trick shareholders. History will not look kindly upon attempts to reduce transparency by relaxing filing rules to allow for semi annual filings…

Peter Dohm

Peter durkee — Jun 12, 2026
Subject: S7-2026-15 From: Peter durkee Affiliation: Jun. 12, 2026 The SEC should have the CEO sign all mandatory reporting, and that reporting should be at least quarterly.

Peter F — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Peter F Affiliation: Jun. 12, 2026 I strongly oppose any effort to reduce the reporting frequency of publicly traded companies from quarterly to semiannual disclosures.

Transparency is the foundation of healthy capital markets. Investors make better decisions when they have timely access to accurate information, and markets function more efficiently when information is broadly available rather than concentrated among insiders and large institutions.

We have already experimented with less frequent reporting in the past. The historical record does not persuade me that investors benefited from reduced transparency. If anything, less frequent reporting increases uncertainty, delays the discovery of problems, and weakens accountability to shareholders.

Some argue that quarterly reporting encourages short-term thinking. I disagree. Poor management decisions are not caused by the availability of information. The solution to short-termism is better leadership and better governance—not less disclosure.

In fact, I believe the long-term direction should be toward more timely reporting, not less. Modern technology has dramatically reduced the cost of collecting, analyzing, and disseminating information. Investors today should have greater visibility into the companies they own than investors had decades ago.

Public companies enjoy access to public capital. In return, they should provide regular, timely, and transparent reporting to the owners of that capital.

For these reasons, I support maintaining quarterly reporting requirements and oppose any move toward semiannual reporting.

Regards,
Peter Feinstein
602-206-7533

You have the seeds of greatness within you; not for the power you can exert over others, but for the love you can extend to them.

Peter Horsfield — Jun 12, 2026
Subject: File No. S7-2026-15 From: Peter Horsfield In this time when companies are asking for the markets to relax their rules for bringing companies in faster. This is not the time to also be relaxing rules to allow companies to take longer to report their finances. The two are not compatible.

Peter Jesunathadas — Jun 12, 2026
Subject: File No. S7-2026-15 From: Peter Jesunathadas Please do not change what has been working well. Rarely does government have a public facing rule that is well liked by all members of the public. Quarterly reporting is one of them. It is an accepted fact that semi-annual reporting benefits no one except the companies and the ETFs/Mutual funds; it is disgusting that the SEC is attempting to enable massive fraud (remember Enron??). This proposed rule will cause the public to lose faith in the markets and only the mutual funds and ETFs will survive. Please DO NOT change to semi-annual reporting. Thanks.

Peter Nieuwkoop — Jun 12, 2026
Subject: S7-2026-15 Comment From: Peter Nieuwkoop Affiliation: Jun. 12, 2026 My name is Peter Nieuwkoop I am a USPS mail carrier. Companies should continue to be required to report quarterly so that investors like myself can evaluate the company and know that the company isn't hiding bad news for up to 6 months. SMCI is perfect example of required fileing bringing inside information to the public sooner making it harder for a company to hide bad news from investors. 6 month filing also gives insiders within The company to additional time to profit while ordinary people like myself are in the dark about new information. Keep quarterly filing a requirement.

Phil Killerlain — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Phil Killerlain Affiliation: Jun. 12, 2026 It should stay on the 3 month schedule! That way the companies have to answer to shareholders. If they are not doing their jobs properly it shows up m. In time for investors to to sell or call for a board meeting

Owner and Manager of a small
Business
McKinney, TX

I am a 60 year old widow five years from retirement. Still have one child in college. I am a CPA by training and worked in financial planning and reporting for 20 years in public companies.
Reporting needs to be kept quarterly so that we the investors continue to have a timely view to the corporations we are invested in. We already have fewer companies going public on a timely basis which is leading regular investors to have lower returns (ex SpaceX vs say Google or Apple in the past). By changing reporting you will further reduce the returns available to the general investing public.

Randall Kobetich — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Randall Kobetich Affiliation: Jun. 12, 2026 American

economy and growth should be built on trust do not return to 1955 All reporting should be done quarterly and if I had it my way monthly because only with clear transparency on what is going on in a business can people rationally invest and not worry about a business collapse and losing their money. It sounds simple and like no big deal but there are plenty of problems and shenanigans incorporations with the current rules and they'll be even more if you can make it 6 months they can hide more

Ray Anderson — Jun 12, 2026

Subject: File No. S7-2026-15 From: Ray Anderson Dear SEC, My name is Ray Anderson, and I am an investor and Research Scientist in Riverside, CA. Given the increased potential for insider trading and the evidence of it, I believe quarterly reporting is more critical than ever to ensure market transparency. This is especially important for investors in retirement (such as me) who need maximum returns to build a sufficient nest egg. There is a clear correlation between semi-annual reporting and market underperformance. Why would we jeopardize this? I believe the concerns about "short-termism" are overhyped. If short-term thinking driven by quarterly reporting was driving suboptimal economic performance, why would we see a strong and opposite correlation? Thanks, Ray

Raymond D Franco — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Raymond D Franco Affiliation: Jun. 12, 2026 Quarterly returns are an important investors tool to monitor the progress towards management's goals set at beginning of the year. It also allows to monitor management effectiveness on an ongoing basis to reach the business economic goals for that year. This should continue to be available to American investors, economist, and the general public. Today's reporting tools, which include AI have made the cost of reporting dramatically reduced, and the amount of effort to produce such reports has been minimized. As a citizen investor, I exhort the Sec to continue requiring quarterly reports from publicly traded companies.

Richard M. Boothe None — Jun 12, 2026
Subject: File No. S7-2026-15 From: Richard M. Boothe I oppose voluntary semi-annual reporting

because investors need timely information. In fact, the SCE needs timely information, too, to monitor corporations for "funny business." So does the public. To those who say quarterly financial reporting takes time, effort, and money, I say, that's the cost of doing business in the USA, so knuckle down and file reports quarterly. Quarterly reports keep companies honest, and makes it harder to hide problems that certain corporations would prefer not come to the public's attention.

Richard Norris — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Richard Norris Affiliation: Jun. 12, 2026 My name is Richard Norris. I reside in Oklahoma and work as the treasurer for our church. We invest surplus funds in a variety of funds from which periodically withdraw for humanitarian purposes. Eliminating quarterly reporting would reduce our ability to review the performance of the companies in which we invest and thereby compromise our ability to fulfill our commitment to service. I encourage the SEC to continue requiring public companies to report quarterly as a matter of transparency for investors.

Richard Wohl — Jun 12, 2026

Rick Gonzalez — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Rick Gonzalez Affiliation: Jun. 12, 2026 My name is Richard Gonzalez and I am a retired federal employee. My retirement is significantly dependent on my stock investments and changes to the way companies are required to report earnings as the SEC is proposing will be very detrimental to managing these investments and determining the financial health of a given company. This is clearly a case of " if it's not broken, don't fix it". As citizens and investors, I strongly believe we are entitled to complete transparency and accountability of any company offering shares on the open market. I would urge the SEC to abandon the proposed change to annual or semiannual financial reporting and maintain the current quarterly reporting. This just makes good common and financial sense while maintaining the fiduciary responsibility a company has to its shareholders.

Respectfully,

Richard Gonzalez

Rick Schwein — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Rick Schwein Affiliation: Jun. 12, 2026 My name is Richard Schwein. I'm a retired computer systems manager living near Philadelphia, PA. I know that businesses would like to do less reporting to save money, but longer gaps between reports opens the possibility of sloppy management practices going unnoticed.

Rick Sheehan — Jun 12, 2026
Subject: S7-2026-15 Comment From: Rick Sheehan Affiliation: Jun. 12, 2026 Public companies benefit from the investment that we give them. The ability to be able to see significant trend lines and up to date information helps investors stay informed on the health of their investments and assist both individual investors, institutional investors and their management teams give good recommendations. This 'relax and just trust me' approach will undermine confidence in the US Securities Market.

Warmest Regards,

Richard Sheehan

Roberta Shoemaker-Beal — Jun 12, 2026
Subject: Comment regarding S7-2026-15 From: Roberta Shoemaker-Beal Affiliation: Jun. 12, 2026
Dear SEC Staff,

Are current “financial reporting actions of corporations” being considered that could be a step toward making “official #InsiderTrading” look more legal?
The Securities and ExchangeCommission needs to look into any such possible legislative changes as defined and discussed by the KeepItQuarterly.org group, which is focusing its attention on reporting such financial changes, now required by law.

Thank you for your attention to these curious changes in financial accounting that look suspicious to this aware and concerned citizen.

Thank you for your attention to these proposed actions very quickly. Please inform a wider number of concerned citizens.

Please keep me informed, at this email address, as to any official posted announcements of actions regarding S7-2026-15.
Thank you.
Dr. Roberta Shoemaker-Beal

Roger Davidson — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Roger Davidson Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
There is already a significant gap between retail and institutional investors as far as access to information to make investment decisions. Quarterly information ensures that the most stale information a retail investor can have is only three months old while this new proposal would broaden that gap to six months. The burden placed on companies to report quarterly instead of biannually is not significant compared to the loss of information to retail investors. Our U.S. markets are the pride of the world because people think they are buying and selling on a fair playing field. Don't harm our markets.

Rose Bet — Jun 12, 2026
Subject: S7-2026-15 From: Rose Bet Affiliation: Jun. 12, 2026 Rose Bet, Commercial Sales Manager, FL

Quarterly Reports are necessary for Transparency of Actions taken by the Officers of the Company and to Verify the Company's Actual Status and Viability.

Why give them more opportunities to do wrong? Haven't we learned from the past? ENRON, anyone??? Do we really want to have a 2.0 of that fiasco happen again?? If anything we need it to be monthly reporting with harsher penalties for any wrongs they commit like skimming off the top or insider trading or profit vs income manipulation. Why give the rich any more opportunities to become richer at the expense of the poor people's backs? Please please please do not pass this new policy!! I do not agree to this!

Rose Griffiths — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Rose Griffiths Affiliation: Jun. 12, 2026 Retired after 38 years of grueling work. Keep it QUARTERLY! There is too much at stake and now more than ever people need to be monitored for safety.

Ruth Votaw — Jun 12, 2026
Subject: S7-2026-15 From: Ruth Votaw Affiliation: Jun. 12, 2026 We need transparency. Delaying financial reporting delays transparency. Imagine if CEOs hid the crash of 2008 an extra 6 months.

Ruth Willson — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Ruth Willson Affiliation: Jun. 12, 2026 I am not a Wall Street insider. I am an ordinary person who believes the rules should protect everyday investors, not make it easier for corporations to hide problems until it is too late.
This change would not protect investors. It would weaken transparency. Public companies benefit from access to public markets, and with that privilege should come the responsibility to keep the public informed on a regular basis. Less frequent reporting could
make markets less stable. Investors rely on current information to make decisions. If companies only report once or twice a year, bad news may build up longer before the public learns about it. That could lead to bigger surprises, sharper market reactions,
and less trust in the system. The argument that quarterly reporting is too burdensome does not outweigh the need for transparency. If a company is asking the public to invest in it, then the public deserves regular updates. Reducing reporting requirements
may help corporations, but it puts ordinary investors at a disadvantage. I urge you to oppose any effort that weakens public reporting standards. Investors deserve more transparency, not less.
Sincerely, Ruth Willson

Ruth Ziel — Jun 12, 2026
Subject: S7-2026-15 Comment From: Ruth Ziel Affiliation: Jun. 12, 2026 My name is Ruth Ziel, retired RN. I am an investor through a financial institution. I look at those quarterly reports. Why should only insiders have access to this information more frequently than me? These reports help me be better informed when I meet with my financial advisor. Just recently we took our RMD early because the market was at a high point. Without this information we would not have known.

Ruth Ziel

s Falcone — Jun 12, 2026
Subject: S7-2026-15 Comment From: s Falcone Affiliation: Jun. 12, 2026 It is a foundational tenet of a participatory democracy that its citizens are not merely observers, but active, informed stakeholders in the decisions that shape their collective future. For this engagement to be meaningful and effective, access to pertinent information, delivered on a timely and consistent basis, is absolutely paramount.

Our capacity as individuals and as a community to consider and implement appropriate actions is directly proportional to the transparency and promptness with which critical developments are communicated. This principle becomes especially salient when addressing matters of economic or fiscal consequence. When significant financial information, which directly impacts household budgets, investments, and long-term planning, is subject to delays stretching for as long as six months, it creates an untenable situation. Such prolonged opacity not only fosters an environment of uncertainty but actively obstructs sound financial stewardship, potentially leading to missed opportunities, avoidable losses, and significant personal distress.

The ramifications of withholding vital data extend beyond individual inconvenience; they erode public trust, diminish accountability, and ultimately hinder the collective progress of our community. We advocate for a comprehensive commitment to proactive disclosure and a robust framework for timely communication, ensuring that all citizens are adequately equipped to make informed choices and participate constructively in their governance.

S Falcone Broomall, PA

Sam & Janice Penny — Jun 12, 2026
Subject: S7-2026-15 Comment From: Sam & Janice Penny Affiliation: Jun. 12, 2026 I find it appalling that the SEC would even consider semi-annual statements rather that quarterly statements for public companies to report their financial results to these who have investments with those companies. In a world where markets change quickly, consumers need to have a regular accounting of how their investments are performing and the ability to act upon those changes when they receive notice. Not everyone uses the internet to access that information. My bank sends me monthly statements as do all my utilities, phone providers and credit cards. The public companies who handle a major part of my financial future - including my retirement funds have to track those funds on a day to day basis and can certainly afford to continue with formal quarterly statements to their customers. Samuel Penny - Retired Electronic Technician.

Sam Stedman — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Sam Stedman Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I manage my own investments, and I have done pretty well the last few years, despite all the craziness. Hiding what companies are making and losing means only insiders are investing, the rest of us are just gambling. Deny this rule, or little guys like me will just pull our investments and go for hard assets and foreign stocks.

Samantha Carr — Jun 12, 2026
Subject: S7-2026-15 Comment From: Samantha Carr Affiliation: Jun. 12, 2026 You will be harming all but the very few who will use insider information to trade. Insider trading is illegal and should remain so and under control by reporting regularly. It is the minimum.
Samantha Carr

San Panteleone — Jun 12, 2026
Subject: S7-2026-15 Comment From: San Panteleone Affiliation: Jun. 12, 2026 confidence in the stock market is accomplished by making sure that all have access to the same information. Scott Crowe — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Scott Crowe Affiliation: Jun. 12, 2026 Dear SEC,

I am writing to express my strong support for maintaining the current quarterly financial reporting requirements for publicly traded companies.

As an investor, I believe these reports are essential for effective portfolio management and transparency. Given the concerns regarding the long-term stability of Social Security and the challenges many face in saving for retirement, it is vital that individual investors have access to regular financial data. Removing these regulations would force investors to manage their savings without the necessary information to make informed decisions.

I urge you to keep the quarterly reporting requirement intact to protect the interests of those who entrust their financial future to the public markets.

Best regards,

Scott Crowe
Huntley, IL

Scott Currey — Jun 12, 2026
Subject: S7-2026-15 From: Scott Currey Affiliation: Jun. 12, 2026 I strongly support reporting each quarter and keeping CEO's accountable. I employed you to keep the current reporting standards.

Scott Kochenower — Jun 12, 2026
Subject: S7-2026-15 Comment From: Scott Kochenower Affiliation: Jun. 12, 2026 If anything we need more reporting from companies, quarterly is a bare minimum to maintain onsite on the health of a company
In today's world of computers running the financial reports is not that difficult so maintaining the requirement to report these numbers every 3 months is not a burden. Companies are already running the numbers far more frequently to be able to make adjustments so asking for transparency 4 times a year is not to much.

Scott Kochenower

Shari Neu — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Shari Neu Affiliation: Jun. 12, 2026 Shari, technical trainer and curriculum writer. Rochester, ny. There really isn't any reason to change it. It's working just fine and if anything perhaps make it monthly. When you have high frequency disclosure it allows markets to gradually adjust to emerging risks rather than facing sudden shocks.

Regards,
Shari

Sharon — Jun 12, 2026
Subject: S7-2026-15 Comment From: Sharon Affiliation: Jun. 12, 2026 Please do what is best for the American people, not what will make the rich richer. Do what is best for American taxpayers, the people whose income supports the USA in so many ways. I have been paying into our system since before 1963, when I graduated college and began my first full-time job in the music world at a NYS public school. Through the years, I and my children have invested in American industry and businesses, reaping the benefits of their successes. I see the SEC move as a way to lessen their

workload, while continuing to be paid at a constant rate. Why withhold information from us, unless that action benefits the SEC? This is the attitude I have on this issue with the little information that is dribbling through from the top. FIX IT to help all Americans, not just yourselves! I applaud President Trump for taking the initiative to involve the families of newborns with making a first, $1,000 investment, using taxpayer funds instead of wasting the same amount of money on some of the bogus programs that have been unearthed by DOGE. And my last point is that I like following my money quarterly, thank you very much.

Sharon Barnett — Jun 12, 2026
Subject: S7-2026-15 Comment From: Sharon Barnett Affiliation: Jun. 12, 2026 Sharon Barnett, CEO.. The SEC should not consider or allow the change to the rule.. The change would give room to too much fraud then we would fine the billion dollar companies and they will pay pittance fines, and not care as they do now. Then, continue to commit the fraud as they do now and the SEC allows it now.

This is the most corrupt and ignorant administration in my lifetime.

I want a quarterly report not some maga bs.

Sent from my iPhone

Sharon Gold — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Sharon Gold Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
It seems you may have forgotten why your organization was created. The U.S. Securities and Exchange Commission (SEC) was created by Congress in 1934 to restore public confidence in capital markets following the 1929 stock market crash. Removing access to this information would hurt public confidence.

It would also impact the ability of students to study and learn about markets. While I was studying for my MBA I used the quarterly reports regularly and without them it would have been very difficult to learn and practice important skills in business.
Public Confidence is already being shaken by the changes to IPO requirements even though the S&P walked back the change the NASDAQ significantly lowered the safeguards for retail investors.

Transparency is paramount

Sharon Moore — Jun 12, 2026
Subject: S7-2026-15 From: Sharon Moore Affiliation: Jun. 12, 2026 My name is Sharon Moore. I live in Mississippi. I am 72 years old and my husband is dieing of cancer. We don't have the money to take him to MB Anderson. I always thought I was middle class at 25,000 income a year. God didn't make me rich but he will save me from hell. Will he save all of you rich people? The Bible says. "IT is easier for a camel to get through the eye of a needle than to get into heaven. Your money and your greediness will send you straight to hell. You can't buy your way out of it. God sees you and knows every thought you have. Take your money and repent and give it to the poor. Satan has your soul. You will be punished for your love of money and your indifference to the poor. Doesn't the fact that you just can't get rich enough show you what a fool you are?

sharon parsch — Jun 12, 2026
Subject: S7-2026-15 Comment From: sharon parsch Affiliation: Jun. 12, 2026 We, the consumers, need oversight and transparency in the SEC. Regulations were put in place to curb corruption. The recent dismantling of those safeguards are a precursor to more corruption. My brother was a broker, who actually approved of those safeguards. He believed he had a sacred trust from his investors to be ethical. His clients.gained, he gained, He would be disappointed that the SEC is being taken over by the corruption instead of the duty it was created to uphold.

Shawn Magill — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Shawn Magill Affiliation: Jun. 12, 2026 My name is Shawn Magill of Camp Hill, PA. I oppose a shift from quarterly to semi-annual reporting. Investing requires data on company performance as frequently as possible. Relaxing this reporting puts the investor at increased risk. If anything, considering the world of electronic capture of of most elements of the balance sheet, it would make more sense to increase reporting to bi-monthly. Companies already have the tools and processes in place, and the two additional reports tightens things up for all involved.

Silvio Terrazano — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Silvio Terrazano Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:

I am deeply concerned about this proposed rule change, as a Certified Financial Planner, guiding my clients through their personal investment portfolios is challenging work that you would now remove transparency from. Six months before I can see what landmarks are hit, what valuations may be overly optimistic, even what types of returns or losses I can predict with any kind of certainty?
This may benefit someone, but it isnt the retail investor. I strongly object.

Simon Ng — Jun 12, 2026
Subject: S7-2026-15 Comment From: Simon Ng Affiliation: Jun. 12, 2026 Hello, my name is Simon Ng, and I am an active duty USAF Healthcare Administrator.

I am vehemently against your proposed public company financial reporting frequency. As a “main street investor,” I believe that transparency helps protects us and our investments, especially now, during an inflation-growing economy.

Time and time again, we have seen that American society has focused on individualistic growth and success, rather than the benefit of the entire society (just look at societal policies and norms in the USA versus Japan). This focus on self will most definitely permeate into focus on company more than it already is, and foul play will have opportunity to run rampant. Companies’ profits aren’t suffering like our checking accounts are, and yet, the SEC is perceived to wish to move the needle of improvement on companies rather than the average American with this current proposal to lessen quarterly financial statements to bi-annual.

Please consider this a plea to maintain what little accountability is left in these current times. Don’t change the standard, focus on something more important like addressing insider trading instead.

V/R,

SIMON P. NG

Sonya Youngblood — Jun 12, 2026

Subject: My view on Rule S7-2026-15 From: Sonya Youngblood Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
You are here to serve the PUBLIC - the people & protect them. That is your function - this is why the SEC exists. Do not let the investors fly blind without the proper information.

I believe, if you do this, very soon the DOJ will be restored to an agency operating within the laws of Congress & Constitution, and you will be prosecuted for changing disclosures to serve the wealthy.

---

sorsary — Jun 12, 2026
Subject: Comment on S7-2026-15 From: sorsary Affiliation: Jun. 12, 2026 Companies' financial reporting needs to continue to be quarterly in order to maintain transparency and to keep these companies accountable. Companies can hide behind semi-annual reporting, which has been proven to reduce returns. This cannot be allowed to happen. Without quarterly transparency, how can investors know exactly what is happening in the companies they invest in? As an investor, i am sure this would only result in the loss of returns, losses which I cannot afford. This pattern has been proven in the fifties and sixties, and it cannot be allowed to return. Preserve quarterly reporting! This will not only preserve investors returns, but encourage the entire country to move forward profitably.

Stacey L — Jun 12, 2026
Subject: My view on Rule S7-2026-15 From: Stacey L Affiliation: Jun. 12, 2026 To the Securities and Exchange Commission:
I appreciate quarterly disclosures and transparency by investment companies. I don't always understand the implications, but I can talk to my financial advisor about any questions I have or

other local professionals to protect myself from scams and dishonest advertising targeting vulnerable populations of people.
I get tired of the deceptive advertising regarding grocery cards without disclosing the States they are valid in or the medicaid eligibility requirements. They just offer a blanket statement to all seniors on medicare parts A and B with an onslaught of marketing calls. The person I am caregiver for already has the best possible plan and the grocery benefits for over the counter meds would cost far more than he receives. The people who accept the grocery benefit may not yet have a diagnosis that nullifies this deceptive benefit and ultimately costing thousands more.
There is too much deceptive marketing that goes unchecked. Not enough transparency, too much bull dozing, and too many representatives beholden to investors instead of constituents. The job market is flooded with sales jobs and for people to push deceptive products on others. It is also flooded with fraudulent jobs that get people to learn AI if they will give the company "power of attorney over them" That violates a person's right to life liberty, and personal property. Being expected to pay for a multitude of things without owning any of it. Thats not freedom, its extortion.
Stacey Thompson

Stacey Michael — Jun 12, 2026
Subject: S7-2026-15 Comment From: Stacey Michael Affiliation: Jun. 12, 2026 I just retired at age 71 after working for 60 years. I worked largely for nonprofits, none of which offered retirement accounts, and which didn't pay enough for me to save for retirement on my own. Finally in the last 11 years I got work in higher eductian and have been building up my retirment savings to a point where I won't just be living on my Social Security. My gains have been small but steady. But in this environment of rampant insider trading, I and my retirement advisors need as much information in as timely a fashion as they can get to help me make good investment decisions. Please don't cut in half the number of updates they get from the SEC!!!! I

Please please help me understand the rationale behind this as it is likely to hurt us little people!

Sue Hansen
Make it a great day!

Susan Hellmann — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Susan Hellmann Affiliation: Jun. 12, 2026 In my opinion, the old adage applies here "If it ain't broke, don't fix it "

I have yet to see any evidence that this change will bring about any benefits to our country's financial stability or help consumers keep tabs on the state of our economy.

Both for profit and nonprofit organizations report financial reports to their leadership teams and their boards of directors/trustees on at least a quarterly basis. It is a long established "best practice" for successful management.

I urge the SEC to support Quarterly Reporting as has been the norm since the 1950's.

Thank you for consideration of my comment.

Suzanne Cantrell — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Suzanne Cantrell Affiliation: Jun. 12, 2026 Companies make their profits from the people, who should know how those corporations run their business. If they are being managed well, investing and growing or slowing down, failing, or planning sell outs. If they want us to invest in them, we should be aware of their operations.

Suzanne Dwyer — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Suzanne Dwyer Affiliation: Jun. 12, 2026 The Commission's May 5, 2026 proposal to permit domestic reporting companies to substitute semiannual reports on new Form 10-S for quarterly reports on Form 10-Q is framed as a matter of flexibility and modernization. SEC Chairman Atkins has described it as enabling companies to determine "the reporting frequency that best serves their business needs and investors." That framing, while appealing in principle, obscures a more troubling reality: this proposal would systematically reduce the flow of material financial information to the investing public, widen information asymmetries between corporate insiders and ordinary shareholders, and undermine foundational protections that have supported the integrity of U.S. capital markets for generations. We respectfully urge the Commission to withdraw the proposal or, at minimum, impose significantly stronger guardrails before any final rule is adopted.

Proponents of the rule argue that because adoption is optional, no investor will be harmed — companies will self-select rationally, and the market will price the disclosure gap accordingly. This logic is flawed on two levels.
First, the choice is made by management, not by investors. A company's board and executives decide whether to shift to semiannual reporting, often with interests that diverge from those of public shareholders. Reduced disclosure frequency benefits insiders who already have continuous access to financial results; it does not benefit the retail investor checking a brokerage account. The institutional investment community — including Citadel, Fidelity, Two Sigma Investments, D.E. Shaw, and the Managed Funds Association — has raised concerns that less frequent reporting means more room for information asymmetry, which is to say corporate insiders would know things the rest of the market does not.
Second, "optional" regimes have well-documented adverse selection dynamics. Companies with deteriorating fundamentals, emerging liabilities, or management misconduct have the strongest incentive to reduce transparency. If semiannual reporting becomes a culturally normalized alternative, the signal value of electing it — and the stigma attached — will erode over time.

A central assumption underlying this proposal is that Form 8-K obligations for material events would fill the information void created by removing two quarterly filings per year. This is inadequate for several reasons.
Form 8-K is triggered by discrete, definable events: a merger, a departure of a key officer, a restatement. It was never designed to substitute for the comprehensive, audited (or reviewed) financial picture provided by a 10-Q — a document that includes balance sheet data, income statements, cash flow statements, management's discussion and analysis, and disclosure of known

risks and uncertainties. Six months is a long time in the life of a business. Earnings can deteriorate, inventory can accumulate, debt covenants can be stressed, and litigation can develop — none of which necessarily triggers a Form 8-K requirement, but all of which would be visible in a quarterly report.
The Commission itself has historically recognized this distinction. The 10-Q and 10-K framework exists precisely because management's discretion over what constitutes a "material event" is insufficient protection for investors who are making ongoing allocation decisions.

The Commission has pointed to foreign private issuers (FPIs) — which are not currently subject to quarterly reporting — as evidence that semiannual reporting is workable. While it is true that FPIs are not subject to the domestic Form 10-Q regime, U.S. exchange rules typically require at least semiannual financial information, and many FPIs voluntarily provide more frequent updates where home-country rules or market expectations demand it. The comparison is thus misleading: FPIs that report less frequently often operate in markets with different investor bases, legal regimes, and ownership structures than U.S. domestic issuers.
More pointedly, the United Kingdom's experience with a voluntary quarterly reporting framework — which moved from mandatory quarterly reporting in 2007 to optional reporting in 2014 — has been the subject of peer-reviewed research that warrants the Commission's attention. Researchers constructed a hedge portfolio strategy based on semiannual reporters during their non-disclosure quarters, and that portfolio generated a statistically significant return at the time of subsequent earnings announcements — suggesting that markets systematically misprice semiannual reporters during blackout windows, and that this inefficiency is exploitable. The effect was found to be most intense for semiannual reporters during their non-disclosure quarters, and equities showed roughly twice the sensitivity to negative earnings news as to positive — compounding downside risk for uninformed investors. These are not theoretical concerns. They are empirical findings from a real-world experiment the Commission appears not to have fully engaged.

Critics of the proposal have argued that the change would impair investor ability to monitor company performance and reduce comparability across companies that elect different reporting schedules. This concern is practical, not abstract. Equity analysts construct models, peer comparisons, and sector analyses that depend on synchronized data across companies. A market in which some large-cap companies report quarterly and others report semiannually creates an uneven analytical playing field that disadvantages retail investors most, who lack the resources to reconstruct missing data or access management directly.
The problem extends beyond equity markets. Many companies have contractual obligations under syndicated credit agreements and bond indentures that require quarterly financial reporting. Companies moving to semiannual reporting may need to negotiate amendments to these obligations, and the change could also affect access to debt financing. The downstream contractual complexity this proposal introduces into lending markets has received insufficient attention in the proposing release.

A frequently cited justification for reducing quarterly reporting is that it promotes "short-termism" — that executives are forced to manage to quarterly earnings targets rather than long-term value creation. This argument, while intuitively appealing, has weak empirical grounding as a policy basis for this specific rule.
The academic literature on short-termism is mixed. Many governance scholars have noted that short-termism, to the extent it exists, is driven primarily by executive compensation structures, activist shareholder dynamics, and analyst incentives — not by the mere existence of quarterly disclosure obligations. Eliminating quarterly reporting does not eliminate quarterly earnings guidance, quarterly earnings calls, or the quarterly pressures that compensation consultants and boards impose. Notably, today's proposal would not affect the frequency of a company's earnings calls and earnings releases, which are and will continue to be determined solely by the company. In

other words, a company that elects semiannual reporting may still hold quarterly earnings calls — it would simply do so without the verified financial statements that give those calls their accountability structure.

The Commission should not adopt this proposal as written. If the Commission proceeds, it should at minimum:
1. Limit eligibility to smaller reporting companies and emerging growth companies, where the compliance cost argument has the most force, rather than extending the option to all domestic filers regardless of size or market capitalization.
2. Require enhanced Form 8-K obligations for companies electing semiannual reporting, including mandatory disclosure of summary financial metrics (revenue, operating income, liquidity) on a quarterly basis even when a full 10-Q is not filed.
3. Mandate investor notice and consent — or at least a supermajority shareholder advisory vote — before a company may elect semiannual reporting, rather than allowing the board to make that election unilaterally on the annual Form 10-K.
4. Commission a rigorous economic analysis of the UK experience and other international natural experiments before finalizing any rule.
The Commission's mandate is to protect investors and maintain fair, orderly, and efficient markets. Feedback on the SEC's 2018 request for comment on this subject was mixed, with commenters representing the investor community generally supporting retention of the existing quarterly reporting framework. That signal should not be dismissed. The investing public — including the millions of retail investors who own public equities through retirement accounts and mutual funds — did not ask for less information. They deserve more, not less, transparency from the companies they own.

Tami knopf — Jun 12, 2026
Subject: S7-2026-15 From: Tami knopf Affiliation: Jun. 12, 2026 KEEP IT QUARTERLY.
It has been working the way it should so therefore it's trusted. Why change it if it's not broke. Corporations get enough breaks with little oversight and our country suffers because of that. Keep in place the process that keeps them somewhat honest. We are already living our days, weeks, and months on edge in this horribly political arena of corruption and to just even suggest this just pushes our buttons past the point of staying silent. It's just more corruption and We The People are fed up.

Tammie Busch — Jun 12, 2026
Subject: S7-2026-15 Comment From: Tammie Busch Affiliation: Jun. 12, 2026 Tammie Busch is Self-employed. It is unnecessary for the SEC to change the way things are being done now. Leave our 401k's alone. Your agency does far too much meddling into American 's financial assets for Congress than Congress knows what's good for them. Congress needs to stop trying to figure out more ways to seize our future income for themselves and spend more time working on making America a place where there is no poverty. 🙄

Tammy Brinkley — Jun 12, 2026
Subject: S7-2026-15 Comment From: Tammy Brinkley Affiliation: Jun. 12, 2026 I am Tammy Brinkley, Business Development Manager with Gilcrest Hospice. Living a life supporting my family

after my first husband died at 53 years old, of Multiple Myeloma after an 8-year fight.
We had little money saved before he died. At 62, I need to save efficiently to enable successful retirement. This requires informed decisions, which rely on timely delivery of information.
DO NOT ALLOW a reduction of timely delivery of information necessary, and reporting that informs our nation of performance of companies we invest in! It could be catastrophic to those like me.

Thomas Foss — Jun 12, 2026
Subject: S7-2026-15 Comment From: Thomas Foss Affiliation: Jun. 12, 2026 My name is Thomas and I’m an older Millennial that has been investing for over 10 years now. My job title is irrelevant here but for in terms of income, I’m in the lower middle class of America, or what’s left of it. Companies have been reporting their financials on a quarterly basis for a century now. They expect the American public to place their hard-earned money into the stock market to invest into them. Yes, they benefit by investing for their future retirement. However companies need to keep in mind that by supporting the reduced financial reporting, they are admitting to the American public that they are cash cows to fatten up a company’s stocks. They are admitting they don’t see Americans as real humans beings that need to adapt and survive to changing economic circumstances, which are lately driven by the twisted desires of billionaires and the top 1%. Finally, they are saying they don’t respect their own investors. By robbing American investors of the knowledge of financial information, they are purposefully taking away their freedom to build a brighter economic future for themselves and their families. There is little to no benefit for doing this, and much to lose.

Thomas Olano Private Investor — Jun 12, 2026
Subject: File No. S7-2026-15 From: Thomas Olano I strongly urge you not to make this dangerous reduction in corporate accountability. As an investor, I need to know how the companies I invest in or might invest in are doing. Any legitimate company on solid financial footing will already be tracking these numbers continuously, this is just allowing them to stop sharing that information at just a quarterly cadence with their investors. Companies use stock offerings to raise funds to use for the growth of the company, and the incremental cost to report how the company is actually doing to the stockholders is a small concession compared to the benefit our funds provided them. Even when those stocks are later traded after the public offerings, those stockholders are still owed accurate and **current** financial information on the health and profitability of the business. The fiction that i would be optional is just that. No company is going to willingly report more than they have to to their stockholders, and we private investors that make up such a large part of the nations economy rely on the SEC to ensure companies have to do accurate and **timely** reporting. Do not take that away!

Thomas Peel — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Thomas Peel Affiliation: Jun. 12, 2026 There are very intelligent people that are problem solvers. They have no need for the filth of politics or the singling out to be harmed by the viscous. Both parties are lost and the solutions needs honesty, of which there is little. If these administrations don't stand down and allow the solutions it will get viscous.

Thomas Spain — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Thomas Spain Affiliation: Jun. 12, 2026 Thomas M. Spain Retired Dept Head with the City of Henderson, NC 27536
WE NEED QUARTERLY REPORTING!!
With companies handling this much money and much of it being for retirees quarterly reporting is

critical. We cannot afford to lose 1/4 to 1/2 of our investments at this period in our lives. With the concern on how to fund Social Security the last thing someone close to retirement or retired needs is slower information on the stock market performance? You forget we can not set up a 1.8 Billion Fund Like Trump is trying to do and benefit on the insider trading rampart in our government. I am showing some sarcasm but I do not apologize. There is too much important important information being hidden from the American citizens today
Sincerely,
Thomas M Spain

Tim Kaczocha — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Tim Kaczocha Affiliation: Jun. 12, 2026 Submitting Comments on Proposed Rule: Shortening the Financial Reporting Cycle To: U.S. Securities and Exchange Commission
Subject: Opposition to Proposed Shift to Semi-Annual Reporting (File No.S7-2026-15)
Dear Secretary:
I am writing to express my strong opposition to any proposal that would replace the current quarterly reporting framework (Form 10-Q) with a semi-annual schedule. Reducing the frequency of required financial disclosures would severely harm individual investors, compromise market efficiency, and increase volatility.
Maintaining a three-month reporting cycle is critical for several key reasons:
Information Asymmetry: Shifting to a six-month cycle creates prolonged periods of silence, disproportionately disadvantaging retail investors who rely on timely, public disclosures to make informed decisions. Increased Volatility: Lengthening the time between official reports will inevitably lead to massive, unpredictable market swings when six months of accumulated financial data are suddenly released at once. Rise of Speculation: In the absence of official quarterly data, the market will rely more heavily on rumors, unofficial leaks, and third-party speculatory analysis, undermining the integrity of public markets. Corporate Accountability: Quarterly reporting forces management to maintain disciplined financial oversight and provides timely transparency regarding operational shifts, supply chain disruptions, or fiscal distress. While minimizing administrative burdens for corporations is a valid consideration, it should not come at the expense of market transparency and investor protection. The current quarterly system ensures a continuous, reliable flow of information that keeps American capital markets the most transparent and trusted in the world.
I urge the Commission to maintain the current quarterly reporting requirements.
Thank you for your time and consideration of these comments.
Sincerely,

Tim Kaczocha

Tina Bull — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Tina Bull Affiliation: Jun. 12, 2026 No lack of current information is not better. Leave the quarterly requirements in place. We want to know and see what is happening and no hiding for 6 months which can limit our ability to evaluate how well or badly it is doing. Do not change by taking a step back to the 50s with computers and AI it should be changed to every month soon will take no time to prepare and make available not more time. We need clear information that is current and visible. Do not change!!!

TinaMaria Martell — Jun 12, 2026
Subject: S7-2026-15 Comment From: TinaMaria Martell Affiliation: Jun. 12, 2026 Just as the people on Wall Street track daily stats, the people whose lives are invested in mutual and index funds for our retirement deserve full disclosure in the form of quarterly reporting.

Quarterly reporting ensures we can make an informed decision about our investment.

We live in a country where pensions are nearly non-existent, the social security system that we contribute to always seems to be under threat of dissolving entirely.
When we invest in products traded on Wall Street, we expect and deserve timely disclosure so that we can make decisions about the allocation of our money.
We deserve the choice because our money is being used to keep these funds alive.

Tod Sorensen — Jun 12, 2026
Subject: S7-2026-15 Comment From: Tod Sorensen Affiliation: Jun. 12, 2026 Absolutely not on bi-annual reporting. Keep it the way it is.

Varrick Nunez — Jun 12, 2026
Subject: Keep Quarterly Reporting From: Varrick Nunez Affiliation: Jun. 12, 2026 TWIMC,
I am invested in the larger stock markets, and I am retired from the military and public service.

I don’t see the need for changing quarterly reporting. The huge downside would be a longer period for mismanagement and malfeasance.

I recommend the SEC work to remove the requirement for actually printing and mailing financial reports, and require investors to accept electronic reporting.

Also technology has advanced, it makes more sense for the SEC to consider monthly financial reports. The technology exists.

Varrick Nunez
Lakeland, Florida

Vickie Fadness — Jun 12, 2026
Subject: File No. S7-2026-17 From: Vickie Fadness I am writing in opposition to SEC Release No. 33-11414, the proposed optional semiannual reporting rule, which would allow companies to reduce financial disclosures from quarterly to semiannual. If passed, this would restrict information on my retirement funds, while allowing insiders and large institutional organizations access to that information. This increases opportunities for executives, well-connected investors, and insider traders to profit before I am aware of changes. Less frequent disclosure creates larger information gaps, leading to sharper price swings and increased market volatility. As a retired investor I rely heavily on SEC filings, whereas institutional investors, hedge fund managers, and members of Congress — many of whom are not subject to the same trading restrictions as corporate insiders — would retain informational advantages unavailable to ordinary investors. I am deeply concerned about the insider trading implications of extending the disclosure window to six months. I ask that this change not be made. Keep reporting on a quarterly basis.

Vickie Holland — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Vickie Holland Affiliation: Jun. 12, 2026 My husband and I are retired and have investments that we rely on for our income. We need quarterly reports of our investment performance so that we can track and react in a timely way. 6 months is too long to wait for reports, as poor performance could result in hidden losses.

Vickie Holland

Vincent Van Gogh — Jun 12, 2026
Subject: S7-2026-15 Comment From: Vincent Van Gogh Affiliation: Jun. 12, 2026 Having actively participated in the stock market for the past four decades, my investment decisions are significantly influenced by the quarterly reports of publicly traded companies. I strongly advocate for the continued requirement of quarterly reporting for all companies listed on U.S. Stock Exchanges.

I am concerned that what may initially be presented as an optional measure could gradually become standard practice, as the path of least resistance often prevails. Such a shift in reporting requirements rarely remains optional for an extended period.

The potential economic repercussions of delayed or insufficient information are substantial, particularly for individuals whose 401(k)s, IRAs, or college funds are invested in these stocks. Furthermore, it is important to note that mutual fund investors, who do not directly hold individual stocks, would also be disadvantaged, as they would lack the necessary transparency to assess the performance of underlying assets.

"If you hear a voice within you say, 'You cannot paint,' then by all means paint, and that voice will be silenced."

Viviane Galloway — Jun 12, 2026
Subject: Comment on S7-2026-15 From: Viviane Galloway Affiliation: Jun. 12, 2026 I have worked for the largest international charitable organization, one of the most highly esteemed department stores in New York City, and a private investment firm owned by a billionaire. I've also worked for tiny nonprofits in rural areas. I've come to realize that the greater the transparency, the more successful the organization and the more satisfied those involved with the organization are. In all of those cases I have seen that the greater the transparency and the frequency of reporting, the more profitable and successful the organization was. With less reporting and oversight, I saw a business that should not have failed slip into bankruptcy, I saw embezzlement that was not apparent right away because of the lack of proper reporting, and other disturbing situations that affect both the organization and those who invest or trust in it. Please maintain the quarterly reporting requirement for firms to minimize disruption within the market, losses to investors and eventually failure of many companies. Thank you, Viviane Galloway, retired executive assistant, Rensselaerville New York

Wayne A. Thorp p.p., CEO, BetterInvesting — Jun 12, 2026
June 12, 2026
Vanessa A. Countryman
Secretary
U.S. Securities and Exchange Commission
100 F Street, NE
Washington, DC 20549-1090
Re: File No. S7-2026-15
Proposed Amendments to Permit Optional Semiannual Reporting by Public Companies
Release Nos. 33-11414; 34-105368; 39-2563; IC-36140
Dear Ms. Countryman:
BetterInvesting is a 75-year-old nonprofit investment education organization serving approximately 22,000 paying members across the United States. Our mission is to equip everyday investors to invest wisely and independently. Our members are retail investors. Most are fundamental, long-term stock pickers who read 10-Q filings.
BetterInvesting opposes the proposed amendments to Exchange Act Rules 13a-13 and 15d-13 that would permit reporting companies to elect filing semiannual reports on new Form 10-S in

lieu of quarterly reports on Form 10-Q.
The proposal would cut in half the number of reviewed, certified, liability-bearing interim financial reports the U.S. disclosure regime produces each year. Voluntary earnings releases would fill the gap. Voluntary earnings releases do not carry interim auditor review, Sarbanes-Oxley Section 302 certification, or Section 18 liability in the same form as a periodic report. The empirical literature on this exact question, including work the proposing release relies on, indicates that the trade would widen information asymmetry, raise the cost of equity capital, fail to deliver the long-term investment benefits the Commission asserts, and fall hardest on retail investors. The Commission already took comment on this question in 2018 and convened a roundtable in 2019.1 It declined to act then. The proposing release does not explain what has changed in the empirical or investor protection landscape since 2018 to justify revisiting the question on different terms now.
1Request for Comment on Earnings Releases and Quarterly Reports, Release No. 33-10588; 34-84842; File No. S7-26-18 (Dec. 18, 2018); Roundtable on Short-Term/Long-Term Management of Public Companies, Our Periodic Reporting System and Regulatory Requirements, U.S. Securities and Exchange Commission (July 18, 2019).
1. The proposal would widen information asymmetry between retail and institutional investors and reduce the legal weight of interim disclosure.
Institutional investors do not depend on the 10-Q the way retail investors do. They have access to alternative data feeds, credit card panels, satellite imagery, channel checks, expert networks, and direct corporate access. Retail investors rely on standardized, periodic, reviewed filings. When companies stop filing quarterly, institutions retain their information edge. Retail investors would lose half of the standardized data they have today.
The Commission's own published data establish how unevenly this loss would be distributed. Senate testimony delivered by the Director of the Division of Trading and Markets in 2015, drawing on September 2013 ownership data, reported median individual ownership of 89.1 percent for exchange-listed companies with market capitalizations under $50 million, 80.1 percent for companies between $51 million and $100 million, and 68.7 percent for companies between $101 million and $250 million.2 Institutional ownership became the majority only at market capitalizations above $500 million. Institutional ownership of smaller companies has trended upward since the data were collected, primarily through passive index fund growth, but the relative concentration of retail investors at smaller market capitalizations remains a durable empirical relationship, and the Commission has not published an updated comprehensive breakdown contradicting these figures. The proposal, as drafted, permits the largest practicable reductions in disclosure in precisely the segment of the market where, by the Commission's own data, retail investors are the dominant owners.
This is not a theoretical concern. Fu, Kraft, and Zhang examined a comparable natural experiment using U.S. firms that transitioned between annual, semiannual, and quarterly reporting between 1951 and 1973. They found that higher reporting frequency reduces information asymmetry and reduces the cost of equity capital.3 Pozen, Nallareddy, and Rajgopal, in research supported by the CFA Institute Research Foundation, report that UK firms voluntarily issuing quarterly reports before the 2007 mandate had lower bid-ask spreads and higher share turnover than firms that did not.4 Both findings identify the same channel through
2Stephen Luparello, Director, Division of Trading and Markets, Testimony on "Venture Exchanges and Small-Cap Companies," Before the United States Senate Subcommittee on Securities, Insurance, and Investment, Committee on Banking, Housing, and Urban Affairs (March 10, 2015), Table 1.
3Renhui Fu, Arthur Kraft & Huai Zhang, Financial Reporting Frequency, Information Asymmetry, and the Cost of Equity, 54 Journal of Accounting and Economics 132 (2012).
4Robert C. Pozen, Suresh Nallareddy & Shivaram Rajgopal, Impact of Reporting Frequency on UK Public Companies, CFA Institute Research Foundation (March 2017). The bid-ask spread and turnover finding for voluntary quarterly reporters is reported at page 4, note 2, citing

Cuijpers and Peek (2010).
which retail investors benefit from quarterly reporting today, and the same channel that would be weakened by the proposed rule.
The proposing release argues that voluntary earnings releases will fill any gap left by eliminating two of four interim filings per year. This conflates information flow with legal protection. Form 10-Q financial statements are subject to interim review under AS 4105. The 10-Q carries CEO and CFO certifications under Section 302 of the Sarbanes-Oxley Act. It triggers liability under Section 18 of the Securities Exchange Act. The proposed Form 10-S would retain those standards for the semiannual period but would not provide them for the two interim periods that 10-Qs cover today. Voluntary earnings releases furnished under Item 2.02 of Form 8-K do not carry equivalent legal protections; they are furnished rather than filed precisely to limit issuer liability.
The Commission would be replacing two reviewed, certified, liability-bearing interim filings per year with corporate communications that carry materially weaker legal protections. Retail investors are the constituency most dependent on those protections, and as the Commission's own data show, they hold the most stock in the companies the proposing release identifies as the principal intended beneficiaries of the new regime.
2. The empirical record on reporting frequency does not support the proposal.
The Commission's premise, that less frequent reporting will reduce managerial short-termism (i.e., the corporate myopia hypothesis) and improve long-term outcomes, is testable, and the literature has tested it. The leading U.S. paper cited in support of the Commission's premise is Kraft, Vashishtha, and Venkatachalam, which finds that increased reporting frequency among U.S. firms between 1950 and 1970 was associated with reduced corporate capital investment, which the authors interpret as evidence of managerial myopia.5 Three points limit the weight this finding should carry in this rulemaking, and the more recent natural-experiment evidence cuts uniformly against the proposal.
First, the dependent variable is capital investment by the firm. The Commission's statutory mandate is investor protection, not capital expenditure levels. A decline in corporate capital investment associated with more frequent reporting is not the same as a decline in long-term shareholder welfare. The myopia hypothesis assumes that the forgone investments would have been positive net present value (NPV) projects whose abandonment harms shareholders. The literature does not establish that. The forgone investments may have included negative-NPV projects whose abandonment benefits shareholders, or positive-NPV projects whose abandonment harms shareholders, or some mix. Until the literature distinguishes between these
5Arthur G. Kraft, Rahul Vashishtha & Mohan Venkatachalam, Frequent Financial Reporting and Managerial Myopia, 93 The Accounting Review 249 (2018).
cases, the myopia channel does not justify reducing investor disclosure on the basis of preserving issuer capital expenditure levels.
Second, the more recent natural experiment cuts the other way. Pozen, Nallareddy, and Rajgopal exploited the United Kingdom's adoption of mandatory quarterly reporting in 2007 and its repeal in 2014.6 They found no statistically significant differences in capital expenditures, research and development, or net property, plant, and equipment between mandatory switchers and voluntary adopters in the years after 2007. They reached the same finding for stoppers compared to continuers after 2014. The frequency of financial reporting did not materially affect corporate investment levels in either direction. The myopia channel that the Commission's proposing release relies on does not replicate in the modern UK natural experiment.
Third, the UK experience produced findings that directly contradict the proposal's premises about investor outcomes. The introduction of mandatory quarterly reporting in 2007 was associated with a 21.5 percent increase in the average number of analysts following mandatory switchers, from 2.79 to 3.39, and a 26.5 percent increase for voluntary adopters, from 3.77 to 4.78. Analyst forecast accuracy improved more for mandatory switchers than for voluntary adopters. When the mandate was repealed in 2014, companies that stopped reporting quarterly

experienced a statistically significant decline in analyst coverage.7 Each of these findings undercuts the rationale for the proposed rule. Quarterly reporting brought analysts to the market. Less frequent reporting drove them away.

Fourth, when the UK gave companies the option to drop quarterly reporting in 2014, fewer than 10 percent of UK public companies in the Pozen study sample (45 of 471) did so by the end of 2015.8 More than 90 percent continued quarterly reporting even with no requirement to do so. The proposing release cites the UK repeal as a policy precedent for this rulemaking. The release does not mention the 90-plus percent retention rate. The companies most exposed to the alleged costs of quarterly reporting voted with their filings to keep it.

BetterInvesting acknowledges that Pozen, Nallareddy, and Rajgopal, while finding no support for the move from quarterly to semiannual reporting, do recommend reform of the existing quarterly reporting framework. They favor streamlined quarterly reporting with sector-specific guidelines and key performance indicators rather than the current 10-Q format. The Commission's proposal addresses reporting frequency, not reporting content. The Pozen analysis supports the latter, not the former. If the Commission is interested in reducing the compliance burden of the current 10-Q while preserving its investor protection function, the path forward is content reform, not frequency reduction. The two are not interchangeable, and the empirical record cited above does not support treating them as such.

6Pozen, Nallareddy & Rajgopal, supra note 4.

7Id.

8Id.

The empirical finding most directly relevant to the Commission's investor protection mandate, that higher reporting frequency reduces information asymmetry and lowers the cost of equity, comes from the same historical natural experiment Kraft, Vashishtha, and Venkatachalam use and rests on the same underlying data.9 The Commission cannot selectively rely on one half of that older literature while ignoring the other half and the more recent UK evidence that uniformly runs counter to the proposal.

The proposing release also cites a 2019 Nasdaq survey in which 75 percent of 183 responding listed companies indicated that they or their investors would benefit from semiannual reporting. That is a survey of issuers, not investors. Asking companies what they think investors want is not the same as asking investors.

Investor-side survey evidence on this question exists. In 2019, the CFA Institute surveyed 28,204 chartered financial analysts worldwide and reported the results.10 Among the 768 respondents, 91 percent reported that quarterly reports contain incremental financial information beyond what earnings releases provide, 75 percent reported that the incremental information in a quarterly report can affect their views about a company, and 72 percent rejected the "supplemental approach" under consideration at the time that would have permitted earnings releases to substitute for the financial content of a Form 10-Q. Based on that member survey, the CFA Institute formally opposed any move to semiannual reporting. The Council of Institutional Investors, representing pension funds and other long-term institutional investors with member assets of approximately $4 trillion, separately characterized quarterly reports as "a critical element of the robust disclosure infrastructure that is so important for investors" and warned that less frequent reporting "would likely lead to greater share price volatility, and more intense investor focus on short-term share price fluctuations."11 This investor-side record speaks to the same question the Commission is now revisiting and runs against any move to semiannual reporting.

3. Comparability and trend analysis across companies would degrade.

If some companies elect semiannual reporting while others continue quarterly reporting, retail investors face a fragmented disclosure landscape. Comparing two competitors in the same industry becomes harder when one reports quarterly and the other twice a year. Sector analysis,

9Fu, Kraft & Zhang, supra note 3.

10CFA Institute, The Case for Quarterly and Environmental, Social, and Governance Reporting

(2019). The survey was administered to a random sample of 28,204 CFA Institute charterholders employed as quantitative analysts or portfolio managers from February 27 to March 10, 2019, with 768 useable responses, a 3 percent response rate, and a margin of error of plus or minus 3.5 percentage points at a 95 percent confidence level.

11Council of Institutional Investors, Comment Letter to the U.S. Securities and Exchange Commission on Earnings Releases and Quarterly Reports, File No. S7-26-18 (2019).

peer benchmarking, and the screening tools that retail investors and the educational organizations that serve them rely on all depend on consistent reporting intervals.

This concern compounds for investors using fundamental analysis methodologies that rely on multi-period data. BetterInvesting teaches the Stock Selection Guide, which requires investors to evaluate trends in sales growth, EPS growth, pre-tax profit margins, return on equity, and debt levels across multiple periods. Eight quarters of data per two-year window is the foundation of credible trend analysis. Four data points per two years materially weaken the statistical foundation for the kind of patient, fundamental analysis that long-term retail investing depends on.

4. The proposed Regulation S-X amendments would permit materially stale financial statements in primary offerings.

The proposing release indicates that Regulation S-X would be amended to address the age of financial statements for semiannual filers, including changes intended to prevent semiannual filers' financial statements from being deemed stale under existing rules built around a quarterly framework. The fact sheet describes this as a simplification and consolidation of the staleness rules.

The age-of-financial-statements rules in Regulation S-X exist to protect investors who purchase newly issued securities. A retail investor buying shares in a follow-on offering or an IPO is entitled to make that decision based on reasonably current financial information.

If the Commission relaxes the staleness window to accommodate semiannual filers, retail investors purchasing in primary offerings from those filers will be pricing the offering off financial statements up to seven months old at the time of issuance. That is a substantively weaker level of disclosure than what investors in primary offerings receive today. The Commission should not modify the Regulation S-X staleness framework in a way that converts financial statements that are stale by current investor protection standards into financial statements that are no longer stale by definition.

Recommendations

1. The Commission should not adopt this proposal. The empirical record, including the Commission's own data on retail ownership concentration in smaller companies and the UK natural experiment that the proposing release cites as policy precedent, does not support the proposed change. The size-tiered alternative that some commenters may propose, under which the semiannual election would be limited to smaller filers, would compound the harm to retail investors rather than mitigate it: the Commission's data establish that retail ownership is most concentrated at smaller companies, and the same Pozen, Nallareddy, and Rajgopal research cited above explicitly warns against size-tiered reporting cadence on the grounds that it would reduce liquidity and raise the cost of capital for smaller companies.12 A size threshold is not a remedy. The cleanest course is to preserve the existing framework.

2. If the Commission proceeds with this rulemaking notwithstanding the empirical record, it should retain the current Regulation S-X staleness framework for primary offerings. Any company conducting a registered offering should be required to include financial information no older than that required of a quarterly filer, regardless of the issuer's elected interim reporting cadence. The trade-off between issuer compliance burden and ongoing periodic reporting differs from the trade-off between issuer compliance burden and the freshness of information available to investors at the time of a primary offering. The Commission should not bundle them.

Quarterly reporting is not an administrative burden the Commission should be eager to lift. It is the architecture that has given American retail investors enough standardized, certified information to participate in U.S. capital markets on something approaching equal footing with sophisticated investors for more than half a century. The empirical record, including the Commission's own data, indicates that weakening that architecture would impose its largest costs on the constituency the Commission exists to protect. BetterInvesting urges the Commission not to do so.
Thank you for the opportunity to comment. I would welcome the chance to discuss these concerns with you or your staff at any time.
Sincerely,

A Spencer — Jun 11, 2026
Subject: S7-2026-15 Comment From: A Spencer Affiliation: Jun. 11, 2026 Our government and corporations are already perceived by average citizens as horribly corrupt - in favor of the uber rich. This plan would let small stakeholders make investments in failing companies, essentially throwing their money away, while insiders sell and make even more money, knowing full well they are selling

near worthless or devalued shares. Does anyone have any ethics anymore? I'm sure not, as long as it is the rich getting richer. Prove us wrong, and dump this idea. Otherwise, I truly hope this won't lead to a "let them eat cake" moment in history.

A. Spencer, retired clerical worker

To wilfully blind retail investors while members of Congress and the Senate are able to ILLEGALLY make millions with inside information is preposterous. The little people keep publicly held companies going and the money invested is not done so lightly. Our bottomlines MATTER.

Adrienne DeRan — Jun 11, 2026
Subject: S7-2026-15 Comment From: Adrienne DeRan Affiliation: Jun. 11, 2026 Adrienne DeRan, Field Technician

Keep it Quarterly
It is important to continue quarterly financial reporting for the present and in the future, for apples to apples comparisons of market trends and growth. Investors should be more informed and knowledgeable than less aware of financial information. Less regular reporting enables longer obfuscation of wrongdoing.

Agnes Wozniak — Jun 11, 2026
Subject: S7-2026-15 Comment From: Agnes Wozniak Affiliation: Jun. 11, 2026 As a retiree dependent on my savings account, I have to carefully manage my investments and avoid risky ones. Semiannual reports would delay information critical to managing my investments . It is not right that "insiders" would be aware of this information while the public isn't. I view it as highly unethical.

Alecia Best — Jun 11, 2026
Subject: S7-2026-15 Comment From: Alecia Best Affiliation: Jun. 11, 2026 I am a tax attorney and I strongly object to the removal of quarterly reporting. If corporations want the public to invest, their rights as shareholders must be protected. Cutting the annual reporting requirement in half will do nothing but disadvantage the public whose money is being used to make these companies profitable. Quarterly reporting should remain the standard- publicly traded companies have entire accounting departments for this very reason. It is not an undue burden. If a company wants the option not to disclose their finances, they can go private and remove themselves from the stock exchange.

Cordially,

Alecia D. Best, Esquire

Allyson Cosgrove — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Allyson Cosgrove Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I am writing today to voice my strong concerns about the increasing lack of transparency in these rigged markets and the proposal to change quarterly reporting to biannual reporting.
Your function is to protect the American investor by ensuring free and fair markets through regulation and enforcement of the law. You have failed in this task whether through ineptitude or collusion. You have continued to ensure that the market is rigged against the retail investor in favor of the market makers and hedge funds that bleed the American financial markets dry and pass on their losses to investors. The bill for this failure will come due and I hope each and every member of the leadership at the SEC who has directly or indirectly allowed this wholesale looting is held criminally liable and prosecuted for their role in this
You continue to allow for the widespread abuse of dark pools which is continuously exploited by market makers (a fact that they have gleefully and publicly owned up to). Continuing to allow more and more obfuscation by reducing reporting requirements is at best complicity and if the SEC goes against the wishes of American investors to aid market makers, you will have ruined the free and fair marketplace you were obligated to protect. I will support any political candidate that systematically and retroactively charges every member of the SEC for their abetting those bad actors in the marketplace. We need more transparent markets not less. Shame on you.

Altha Armstrong — Jun 11, 2026
Subject: S7-2026-15 Comment From: Altha Armstrong Affiliation: Jun. 11, 2026 Our organization is deeply committed to upholding the highest standards of professionalism and integrity across all our operations. We are dedicated to transparent and consistent financial management, ensuring thoroughness and accountability in our reporting cycles.

Fundamentally, our ethos is built upon a profound dedication to ethical conduct and respect for every individual. Amanda Bernhardt — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Amanda Bernhardt Affiliation: Jun. 11, 2026 My name is Amanda Bernhardt. I'm a copy editor in Silver Spring, MD.

I am against permitting public companies to report their results just twice a year instead of quarterly. We tried this once, between 1955 and 1970. Less transparency came with lower returns and lower valuations. For ordinary investors, a return to those days could mean losing a third, or even half, of their life savings.

Amanda Dillen — Jun 11, 2026
Subject: S7-2026-15 Comment From: Amanda Dillen Affiliation: Jun. 11, 2026 Continue quarterly schedule.

Sent from my iPhone

Amanda Mcmurrey — Jun 11, 2026
Subject: S7-2026-15 Comment From: Amanda Mcmurrey Affiliation: Jun. 11, 2026 As a former fraud investigator for the government, quarterly is the bare minimum.

So many people have gone to saving for retirement through these investments because companies either don't or won't fund their retirements properly, or have gone belly up, slinking away with the money they had promised their employees for retirement. Even the government has forced its employees into the private sector for their retirements. Seniors are the least able to make up that gap when their retirements are botched or frittered away.

It's appalling that this administration wants to practically strip away any legislation geared at ensuring people's money is administered in a fiscally responsible manner. When this goes sideways, and it will because people with money can't help themselves, no amount of prosecution will get those people's money back; time in jail for the ones who mismanaged the cash will be cold comfort

for the retirees who have no means to afford housing, food, and medications.

Amanda McMurrey

Amy Stevens — Jun 11, 2026
Subject: S7-2026-15 Comment From: Amy Stevens Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:

I strongly oppose the proposal to allow public companies to reduce financial reporting from quarterly to semiannual disclosures.

The foundation of a fair market is transparency. Investors, employees, retirees, and ordinary Americans rely on timely financial information to make informed decisions. Less frequent reporting means less accountability and a greater opportunity for financial problems, risks, or poor management decisions to remain hidden for longer periods.

Supporters argue that reducing reporting requirements may lessen short-term pressure on companies. However, the solution to short-term thinking is not less transparency. Publicly traded corporations benefit from access to public investment and should therefore maintain a high standard of disclosure to the public.

As an ordinary citizen, I do not believe corporations should be trusted to voluntarily provide less information while investors assume more risk. History has repeatedly shown that strong disclosure requirements help expose problems before they become crises. Delaying financial reporting by months benefits corporate management far more than it benefits shareholders or the public.

The SEC's mission includes protecting investors and maintaining fair, orderly, and efficient markets. Reducing the frequency of required financial disclosures moves in the opposite direction. Investors deserve more transparency, not less.

I urge the Commission to reject this proposal and preserve quarterly reporting requirements for public companies.

Thank you for considering my comment.

Andrea Anixt — Jun 11, 2026

Andrew Morosky — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Andrew Morosky Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Do not reduce the number of required filings from four per year to two. This will allow companies to shield bad news or delay the release information to investors that would otherwise help investors make informed decisions about their investments.
It's a bad idea to limit the disclosure of news, whethergood, bad or indifferent.

Andrew Opferman — Jun 11, 2026
Subject: S7-2026-15 Comment From: Andrew Opferman Affiliation: Jun. 11, 2026 This proposal is bad for literally 99% of the population. Do not move away from quarterly reporting.

Anonymous — Jun 11, 2026
Subject: File No. S7-2026-18 From: Anonymous S7-2026-18 Regarding the proposal to change Quarterly reporting to Bi-Annual reporting. It is not transparent for financial advisors and investors. It

would take so long to catch a problem; like a failing company. It could potentially cause twice as great financial loss (an extra quarter passing) for everyone that is invested in the failing company's stock! This is very detrimental to those who have invested for decades as supplemental retirement income. I'm to old for experimentation that was deemed a failure in the '70's! Companies should not be able to hide financial stability and declines for an entire quarter! We need transparency with quarterly reporting to protect investors! I don't want to worry about my investments! With AI there is already more risk with the markets! If there is a lack of guardrails in place for AI and quarterly reporting, it will change the way people invest. It won't be good for the market. You the SEC, know this is a very bad idea!! Don't allow the Bi-Annual reporting option!

Anonymous — Jun 11, 2026
Subject: S7-2026-15 Comment From: Anonymous Affiliation: Jun. 11, 2026 Keep the quarterly reporting.
If I had my say corporations would also have to submit their next quarter projections based on their current information in a realistic manner. You can't judge performance without knowing expectations.

Ashley James Poole — Jun 11, 2026
Subject: S7-2026-15 Comment From: Ashley James Poole Affiliation: Jun. 11, 2026 Ashley Poole Senior Technical Consultant

Without quarterly reporting, the fair value determination of a company will become difficult as a lack of financial information will not allow the people to know what is happening with their investments. This will cause volatility and incorrect pricing of equities.

This is not fair to people investing their hard earned money, and will cause huge volumes of trades and volatiltiy in the immediate time of publication. Quarterly helps the market to determine the fair price. It is not magic, it is not a waste. The investors need to know what is happening with their investments.

Please keep the people informed, the valuations accurate, and the uncertainty reduced.

Thanks!

Ashley

Audrey

Austin J. Hunt — Jun 11, 2026
Subject: File No. S7-2026-15 From: Austin J. Hunt I oppose the proposed rule that would allow companies to drop quarterly reporting in favor of semi-annual filing. Quarterly reports are essential for investor protection, market efficiency and regulatory oversight. The SEC's duty under §13 requires continuous disclosure of material information. Quarterly filings provide timely, comparable data; removing them creates a material gap that can mislead investors during fast-moving periods. Empirical studies show quarterly earnings announcements drive the bulk of normal price reactions. Eliminating quarters would dampen price discovery, widen bid-ask spreads and increase transaction costs. Small and mid-cap issuers already spend a large portion of resources on Form 10-Q. Consolidating quarterly data into one semi-annual filing does not lower total cost; it merely increases per-period effort while providing no clear benefit, disadvantaging these firms in investor portfolios. 65 % of institutional traders rely on quarterly reports for risk management and algorithmic strategies. Removing them would reduce liquidity and delay price adjustment to new information. Most global markets continue to require quarterly reporting, so U.S. companies would lose comparability with foreign issuers. This is a terrible idea. I strongly oppose this proposal.

Austin McDaniel — Jun 11, 2026
Subject: S7-2026-15 Comment From: Austin McDaniel Affiliation: Jun. 11, 2026 As the speed of everything else goes up, we need more frequent information. This ruling is a move againt the future, and will lessen transparency.

Barbara Tyson — Jun 11, 2026
Subject: ⚖️Taxpayer public comment🧐⚖️🚔🚓 From: Barbara Tyson Affiliation: Jun. 11, 2026 🧐⚖️Offset to the Illinois General Assembly’s passed House Bill 5024 is grassroot federal government movement by exercising imminent domain of a home, apartment complex, school, day care center, park, forest preserve, cemetery, or place of worship within 1,500 feet of U.S. Immigration and Customs Enforcement that will be locating, constructing, or operating new detention or processing facilities.🚔🚓IL Dems advance ICE detention centers restriction bill | Illinois Politics | wandtv.com https://share.google/AobrQB87p7zBxBoPL

🚫Yes, the Illinois General Assembly passed House Bill 5024 during its spring session, which restricts the locations where the federal government can build or operate immigrant detention centers. The legislation was sent to Gov. JB Pritzker's desk for signing.Key Details of the LegislationThe 1,500-Foot Rule: The bill prohibits federal immigration authorities (such as U.S. Immigration and Customs Enforcement) from locating, constructing, or operating new detention or processing facilities within 1,500 feet of a home, apartment complex, school, day care center, park, forest preserve, cemetery, or place of worship.Not Retroactive: The restrictions do not apply to existing detention facilities, such as the ICE processing center located in Broadview, Illinois.Budget

Context: While the measure was passed alongside the state's budget package, it is a standalone piece of zoning and public safety legislation rather than a direct budget restriction, as federal entities are generally exempt from state zoning laws.

Subject: Semiannual Reporting, File No. S7-2026-15, Release No. 33-11414 — Comment in Opposition to Proposed Amendments From: Beth Handzo Affiliation: Jun. 11, 2026 June 10, 2026
The Honorable Paul S. Atkins
Chairman
U.S. Securities and Exchange Commission
100 F Street, N.E.
Washington, D.C. 20549
Re: Semiannual Reporting, File No. S7-2026-15, Release No. 33-11414 — Comment in Opposition to Proposed Amendments
Dear Chairman Atkins and Commissioners:
I write to you as a private citizen and as a former corporate finance professional with twenty-five years of experience in financial reporting, audit oversight, and fiduciary compliance at a Fortune 100 company. I also manage a substantial personal portfolio of equities. I am deeply concerned by any proposals or discussions to reduce or eliminate the mandatory quarterly reporting requirements (Form 10-Q) for public companies, and I urge the Commission in the strongest possible terms to retain these requirements in their entirety.
Professional Background and Perspective

Over the course of my twenty-five-year career in corporate finance, I served in roles spanning financial planning and analysis, external reporting, internal audit, and CFO-level advisory work across multiple industries. I have had direct, firsthand experience preparing, reviewing, and relying upon quarterly financial disclosures. I have seen how these disclosures function not merely as a bureaucratic formality, but as a critical mechanism of accountability — one that protects investors, disciplines management, and preserves the integrity of our capital markets.

I can speak to this not only in the abstract, but from direct personal experience. At one point in my career, I was called as a witness in a regulatory investigation — not as a subject of inquiry, but as someone with knowledge of the financial operations under scrutiny. That experience gave me an uncommon and sobering window into how quickly financial misconduct can metastasize when oversight mechanisms are weak or infrequent. Separately, I inherited ownership of a critical sub-ledger cash management system. Through the implementation of rigorous controls, disciplined reconciliation processes, and a culture of accountability, we transformed a dismal prior record entirely, passing subsequent audits and disaster recovery reviews with no findings. I do not speak about the importance of audit controls and financial disclosure as a matter of theory. I have lived both sides of it.

The Indispensable Role of Quarterly Reporting in Investor Protection

Quarterly reporting serves as the backbone of informed investing and market efficiency. It provides shareholders, analysts, creditors, and the broader public with timely, standardized, and auditable financial data. This cadence of disclosure enables investors to make informed decisions, hold management accountable between annual meetings, and detect deteriorating conditions before they become catastrophic. Reducing reporting frequency from quarterly to semi-annual or annual would create dangerous information gaps during which corporate conditions — cash flow erosion, increasing leverage, deteriorating margins, or outright fraud — could be concealed from the shareholders the Commission is mandated to protect.

Audit Controls and the Discipline of Regular Disclosure

One of the most underappreciated benefits of quarterly reporting is the internal discipline it imposes on corporate management and finance teams. The requirement to close the books, reconcile accounts, and prepare disclosure-ready financial statements every ninety days creates a cadence of internal controls review that is fundamental to sound financial governance. In my experience, companies with robust quarterly close processes consistently demonstrate stronger internal control environments. Eliminating or reducing this cadence would weaken the very audit discipline that prevents errors from becoming fraud and irregularities from becoming scandals.

The Predictable Consequence: Greater Abuse of the Corporate Veil

I can envision no circumstances under which reducing mandatory financial disclosure would produce a beneficial outcome for shareholders or the investing public. The argument that reduced reporting relieves a burden on smaller companies must be weighed against the well-documented history of corporate misconduct that flourishes in the absence of transparency. Opacity is the enabling condition for corporate shenanigans. When management knows that its financial decisions will face scrutiny within ninety days, behavior is moderated. When that scrutiny is delayed by six months or a year, the window for manipulation, self-dealing, misrepresentation, and the strategic misuse of the corporate veil expands dramatically.

The historical record is instructive. The regulatory reforms that followed Enron, WorldCom, and the 2008 financial crisis were each, in part, responses to disclosure failures — to the harm that accumulates when investors lack timely, accurate, and complete financial information. Rolling back disclosure requirements does not simplify the regulatory environment; it recreates the conditions under which the most serious corporate abuses have historically occurred.

The Commission has framed this proposal as voluntary, suggesting that companies may simply choose the reporting cadence that best suits them. This framing should not obscure the practical reality. Voluntary standards in corporate disclosure have a well-documented tendency to become de facto norms when they offer a competitive or cost advantage. If semi-annual reporting becomes a widespread election, the informational baseline of the market degrades for all investors — including

those invested in companies that continue to report quarterly. Market comparability, analytical benchmarking, and systemic risk monitoring all depend on a consistent and universal disclosure cadence. “Optional” opacity is still opacity.
Shareholder Accountability Requires Timely Information
The Commission’s mandate under the Securities Exchange Act is, at its core, the protection of investors through the maintenance of fair, orderly, and transparent markets. Quarterly reporting is not a relic of a prior era — it is an essential instrument of that mandate. Shareholders cannot exercise meaningful oversight of management decisions, vote on proxy matters with full information, or assess the stewardship of their invested capital on the basis of stale, infrequent disclosures. Reducing reporting frequency does not reduce the burden on companies; it shifts the burden — unfairly and unjustifiably — onto the investors those companies are obligated to serve.
I respectfully urge the Commission to reaffirm its commitment to robust, regular, and meaningful financial disclosure by retaining the quarterly reporting requirement without reduction or modification. The integrity of our capital markets and the trust of millions of American investors depend upon it.
Respectfully submitted,
Beth Handzo

Bobbi Perrin — Jun 11, 2026
Subject: S7-2026-15 Comment From: Bobbi Perrin Affiliation: Jun. 11, 2026 Quarterly reporting has worked for the SEC for almost half a century. Changing to twice a year could be catastrophic for 401K and investors who are not insiders. Who is sponsoring this change and "WHY" needs to be answered in depth and examine worst case scenarios of this proposed change. If it ain't broken, don't fix it. I forsee corporations hiding serious financial issues by moving to reporting every 6 months. We need corporations to be transparent about their financial health and debt burden on a quarterly basis. This benefits the corporations and disenfranchises everyone who is not an insider.

Thank you.

Brad Bowman — Jun 11, 2026
Subject: S7-2026-15 Comment From: Brad Bowman Affiliation: Jun. 11, 2026 Brad Bowman, investor.
All companies must keep a quarterly filing so that it is fair to those investors that helped make that company what it is. There is already way too leniency on corporations at this time. More time to manipulate the truth means more time allows to cheat or “alter” reality.

Best Regards, Brad Bowman

Brad Heckman — Jun 11, 2026
Subject: File No. S7-2026-13 From: Brad Heckman To Whom It May Concern,I am writing as an individual retail investor to express my strong opposition to the SEC's proposal allowing public companies to opt out of quarterly financial reporting in favor of a semi-annual schedule. While I understand the Commission's goal to reduce compliance costs and curb short-term market focus, this rule shifts an unacceptable amount of financial risk onto everyday investors who do not have institutional resources . Reducing the frequency of official financial disclosures harms retail investors in several critical ways:Creates Dangerous Information Gaps: A six-month "dark period" is simply too long in modern, hyper-fast financial markets. Waiting half a year for verified financial statements makes it incredibly difficult to track sudden changes in a company's debt, cash flow, or inventory levels, leaving retail investors blind to operational decay until it is too late . Exacerbates the Problem of Adverse Selection: High-performing, stable companies will likely continue reporting quarterly to maintain investor confidence. The companies most incentivized to switch to a semi-annual schedule are those facing financial distress or seeking to shield poor performance from public scrutiny. This rule inadvertently creates a structural hiding place for struggling businesses . Widens the Retail vs. Institutional Gap: If official SEC disclosures dry up, institutional funds will easily bridge the gap by purchasing expensive alternative data—such as satellite imagery, private credit card tracking, and proprietary data feeds. Retail investors cannot afford these tools and will be left trading at a severe information disadvantage . Amplifies Market Volatility: Eliminating the steady cadence of quarterly updates means six months of market expectations will accumulate at once. When financial results are finally released, the earnings "surprises" will be significantly larger, triggering extreme, erratic stock price swings that punish long-term retail portfolios . Increases Insider Trading Risks: Widening the gap between public reports leaves a massive window where corporate insiders know exactly how the business is performing while the public remains in the dark. This creates a fertile environment for information leaks and unfair trading advantages before the semi-annual report is released . The current quarterly reporting framework is a cornerstone of American market integrity and transparency. Making it optional degrades the quality of public data and forces retail investors to take on unnecessary, uncompensated risks. I urge the SEC to withdraw this proposal and maintain the mandatory quarterly reporting schedule that protects all market participants equally . Thank you for your time and consideration of my comments. Sincerely, Brad Heckman Teacher, retired Missouri

Brenna Berquam — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Brenna Berquam Affiliation: Jun. 11, 2026 Brenna Berquam, Attorney, North Carolina

June 11, 2026

To the U.S. Securities and Exchange Commission:

I am writing to express my strong opposition to any proposal that would reduce public company

reporting requirements from quarterly to semiannual reporting.

As an attorney and investor, I believe quarterly reporting plays a critical role in maintaining transparency, accountability, and investor confidence in U.S. capital markets. Timely disclosure of financial information allows investors to make informed decisions and helps ensure that all market participants have access to current information regarding a company's performance and financial condition.

Reducing reporting frequency would decrease transparency and leave investors with less information for longer periods of time. The investors most harmed would likely be ordinary Americans whose retirement accounts, pensions, and personal savings are invested in public markets. Less frequent reporting could increase uncertainty, widen information gaps, and make it more difficult for investors to evaluate risk.

The United States has long maintained the most respected and transparent capital markets in the world. With the exception of two disastrous experiments in our past. Moving from quarterly to semiannual reporting would represent a step backward from that tradition and could undermine investor confidence. We already have history to look at showing us of the dangers of less reporting.

Even Warren Buffett, widely regarded as one of the greatest investors of our time, has supported the continued availability of regular financial information to investors. While reasonable efforts should be made to reduce unnecessary regulatory burdens, those efforts should not come at the expense of transparency and investor protection.

I respectfully urge the Commission to preserve quarterly reporting requirements and continue promoting the transparency that has helped make U.S. capital markets the strongest in the world.

Respectfully,

Brenna Berquam
Attorney, North Carolina

Bret Gove — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Bret Gove Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I am a recently retired personal trainer. I have been investing in the stock market for over 25 years. Over that time I have mostly invested in individual stocks.
I am flabbergasted that the SEC is considering reducing reporting requirements from quarterly to semi-annual. Obtaining quarterly updates on the various public companies whose stock I invest is vital to me as an investor in order to make informed individual stock buy/sell/hold decisions. Leaving me in the dark for a full 6 months between reports on a public company does not allow me to make

timely investment decisions that effect my retirement nest egg and related income.
Thank you for your consideration of my request to maintain quarterly public company updates.

Brian Cook — Jun 11, 2026
Subject: S7-2026-15 Comment From: Brian Cook Affiliation: Jun. 11, 2026 Dear [Recipient Name],

I am writing to express my concern regarding the proposal to move away from quarterly mandatory reporting. Six months is too long a period between reports, as significant changes can occur within that timeframe.

Extending the reporting interval may allow companies to obscure issues that would typically be transparent in a quarterly report. I urge you to maintain the current quarterly reporting schedule. If the administrative burden is considered too high, I suggest identifying specific modifications to the quarterly process that could reduce that burden without compromising investor protections.

Best regards,

Brian Cook

Brian Fairlie — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Brian Fairlie Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
You must not approve this change. Quarterly reporting must be maintained. We know how this plays out, because we tried this proposed change once before, decades ago, and it was a disaster.
This rule change is absurd and will only further hurt the average American. Furthermore, it will reduce faith in the American stock market as companies hide away their regular reporting, this is all the more important as companies with shady records enter the stock market.
Let's not be fools and repeat history! Do not approve the change! Quarterly reporting must remain in place!

Regards,
Brian Fairlie

Brian Hanson — Jun 11, 2026
Subject: File No. S7-2026-15 From: Brian Hanson There is zero benefit to investors to reduce the reporting requirements of companies, especially with the advances in technology where the speed of information dissemination has increased exponentially since the previous era when semi-annual reporting was enacted. I strongly disagree with moving to semi-annual reporting for publicly traded companies.

Brian Kane — Jun 11, 2026

C Thomas — Jun 11, 2026
Subject: S7-2026-15 Comment From: C Thomas Affiliation: Jun. 11, 2026 Crystal Thomas from Charlotte, North Carolina -

A lot can go wrong in half a year. Failed product launches, ballooning debt, lawsuits, vanishing customers.

More time for fraud to grow. Quarterly filings don't prevent fraud, but they dramatically shorten the window in which it can fester before someone outside the company can see it.

"Optional" is a trick. The framing is voluntary, but the dynamics aren't. Once large companies start filing twice a year, smaller competitors face pressure to follow. They can't justify "more compliance than the bigger guy." Investor expectations adjust downward. What started as a choice quietly becomes the new normal. Almost no rule like this stays optional for long.

The supposed savings are tiny, and they don't go to me. Companies still have to keep their books. They still have to brief their boards. The actual savings from skipping a public filing are modest legal and accounting fees, and those savings flow to the company and its executives. The cost of worse information falls on you, the person whose 401(k), IRA, or college fund holds the stock. That's a bad trade for ordinary investors.

Carl DeBaun I'm a Diagnostic Radiology Technologist and Clinical Educator — Jun 11, 2026
Subject: File No. S7-2026-15 From: Carl DeBaun I'm a Diagnostic Radiology Technologist and Clinical Educator. Quarterly reports should be... Quarterly. Companies already hide and do shady things. Enron? 08? The impending AI bubble? Come on, we're sick of the elites robbing us blind. We're not going to stand for it anymore. This is clear collision of government and enterprise to steal as much as they can from the people. That era is over. The people know we have the power now.

Carl Hoopingarner — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Carl Hoopingarner Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
The SEC directive is to protect investors. This proposed rule change makes it harder for investors to garner a clear picture of their investment's status, thus harming investors. The current reporting requirements are not asking too much, if anything, they are asking too little. It is rule changes in the favor of blinding the public investor like this proposal that creates fear in the market, thus causing it to lose it's integrity.

Carl Korsgaard — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Carl Korsgaard Affiliation: Jun. 11, 2026 Don't make changes now. There is a reason d trump wants this so we must do the opposite. Carl from Montana.

Carol Schmidt — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Carol Schmidt Affiliation: Jun. 11, 2026 In this volatile economic environment, people need information to be current. Going back to the days of infrequent reporting will greatly harm many people. Not just the wealthy anymore. Average people are trying to build retirement based on the stock market. This will hurt average people! Please reconsider the idea of going back to what did not work before, and will not work again! This matters to me because I got my son involved in the stock market very young and in today's world it is really the only way to hope of building a fund for retirement. It also could affect my retirement which is not far away!

Cary Raffle Individual Investor — Jun 11, 2026
Subject: File No. S7-2026-15 From: Cary Raffle Subject: Comment on Proposed Rule S7-2026-15 (Optional Semiannual Reporting)To the Securities and Exchange Commission I am writing as an individual, middle-class retail investor who is rapidly approaching retirement. The vast majority of my life savings is held within my IRAs. I am deeply concerned that the proposal to eliminate mandatory quarterly reporting in favor of semiannual reporting will severely harm everyday investors while providing unfair advantages to institutional elites . Quarterly reports (Form 10-Q) serve as a vital equalizer in our financial system. They ensure a level playing field by forcing public companies to disclose material financial data transparently and regularly . Eliminating these reports will widen the information gap between Wall Street and Main Street. Large institutional investors and professional firms possess sophisticated resources, private data feeds, and direct access to management that allow them to track a company's performance in real time. Everyday investors like me do not have these luxuries. We rely strictly on standardized, regulated public filings to make informed decisions about our savings . Waiting six months for comprehensive financial updates will leave retail investors in the dark. It increases the risk of sudden, high-volatility market corrections when bad news is finally disclosed. As someone entering retirement, my portfolio cannot absorb major market surprises caused by delayed information . While I understand the desire to reduce corporate administrative burdens, it should not come at the expense of market integrity and investor protection. I urge the SEC to reject this proposal and maintain mandatory quarterly reporting to protect the financial security of retail investors. Sincerely, Cary Raffle

Cat Lan — Jun 11, 2026
Subject: S7-2026-15 Comment From: Cat Lan Affiliation: Jun. 11, 2026 To Whom It May Concern,
My name is Catherine Lan Wynen, and I work as an editor. I respectfully urge the SEC to retain quarterly reporting requirements for public companies. Reducing mandatory disclosures to once every six months would significantly decrease transparency for ordinary investors while giving corporate insiders a greater information advantage. Timely financial reporting helps ensure that all market participants have access to current information and promotes fair price discovery. Retail investors like me rely on regular disclosures to make informed decisions about their savings and retirement investments. Extending the reporting interval could increase uncertainty, reduce accountability, and undermine confidence in U.S. capital markets. The SEC's mission includes protecting investors and maintaining fair, orderly, and efficient markets. Keeping quarterly reporting is consistent with that

mission and supports equal access to material information.
Thank you for considering my comment. Sincerely, Catherine Lan Wynen Editor

Charlotte Mayhew — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Charlotte Mayhew Affiliation: Jun. 11, 2026 I am writing regarding the potential changes in SEC regulations that govern reporting frequency. It is a grave mistake to allow banks and other large financial institutions to only have to report twice per year, instead of the current requirement of reporting every quarter. Too many financial institutions play fast and loose with the money they hold for their investors and clients. The current rate of reporting is the bare minimum needed for investors and clients to keep up with what is happening with their money. Financial institutions should accountable to their customers, and one way to aid this is to continue to require financial institutions to report every quarter. This matters to me because I, like so many Americans, would like the money that I have worked so hard to earn, and save, to be there for me when I need it.

Sincerely,
Charlotte Mayhew
(Michigan)

Chelsea Watson — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Chelsea Watson Affiliation: Jun. 11, 2026 My name is Chelsea Watson. I am a 32 year old mother in Bethlehem, PA. Reverting to semi-annual reporting would significantly hurt the average American's returns and savings. This was how reporting was done in the past, and the numbers don't lie. Quarterly reporting improves returns. I do not support changing the Quarterly reporting requirements. The financial situation in this country is frankly horrific for the average American. Very few of us have any disposable income. The small amount we can afford to invest is vital to our ability to pay off debts, purchase a home, have an emergency fund, or have any hope of retiring someday. I do not support any change to reporting requirements that have the potential to negatively impact the average American's chance at financial security and stability.

Cherunda Fox — Jun 11, 2026
Subject: S7-2026-15 Comment From: Cherunda Fox Affiliation: Jun. 11, 2026 Transparency Matters. Time is of the Essence. Financial Environments were this doesn’t exist breeds unbridled corruption. Save yourself further prosecutions, leave the quarterly period in tact. Cherunda Fox

Christian Reiter — Jun 11, 2026
Subject: S7-2026-15 Comment From: Christian Reiter Affiliation: Jun. 11, 2026 This is totally absurd and would lead to a lot of fraud. Have we not learned anything from the prime mortgage lending disaster in 2007? That economic disaster nearly pulled the world into bankruptcy. Top investment firms, banks that had been Wall Street stalwarts for decades were wiped out. Tons of people, people who had nothing to do with the disaster lost their jobs. I remember sitting through rounds and rounds of layoffs hoping I would have a job tomorrow. We have enough fraud in the markets, if this rule went forward economists and people using earnings reports to understand the direction of the economy would be flying blind, not to mention the danger this would pose to retirement funds and individual investors. This is bad policy and a prescription for disaster.

Thanks.

Christina Ellzey — Jun 11, 2026
Subject: S7-2026-15 Comment From: Christina Ellzey Affiliation: Jun. 11, 2026 There needs to continue to be quarterly reporting. The world of business moves so quickly that 6mo is a lifetime for investors to be in the dark.

christine hayden — Jun 11, 2026
Subject: Comment on S7-2026-15 From: christine hayden Affiliation: Jun. 11, 2026 This sounds like a win for corporate executives, not everyday investors. Large institutions can afford analysts, industry contacts, and proprietary research. Most individual investors depend on public filings to understand how a company is performing. Cutting reporting from four times a year to two doesn’t reduce the information gap—it increases it. Transparency isn’t a burden; it’s one of the protections that helps keep the market fair for everyone.

Christine Hayden

Christine K W — Jun 11, 2026
Subject: S7-2026-15 Comment From: Christine K W Affiliation: Jun. 11, 2026 It is imperative that all reporting in financial matters be available to the whole public to make wise decisions . To change the

accountability would allow far too much backroom behaviors with no public accountability.

Christopher Borriello — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Christopher Borriello Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
This rule is mild-to-moderately unfair at best and a nightmare in practice at worst. It will do nothing but benefit insiders in the short term, and in the long term, everyone's fortunes will collapse from the lack of certainty, integrity, or stability. Even as far as you think it'll benefit the people you ACTUALLY care about, it will only do so for a year at most before EVERYONE is fearful to invest due to insider trading run amuck, and then markets will deflate massively. This is a terrible move and WILL hurt YOU and your partners in the long run too. Said long run being, again, the very, very near future. Do not implement this change. For all our sakes AND your own.

Christopher Inclima — Jun 11, 2026
Subject: S7-2026-15 Comment From: Christopher Inclima Affiliation: Jun. 11, 2026 As a small business owner, we're expected to file quarterly. Why are this only applicable to public companies?? This is unjust for every small business owner, the backbone of the US. Fraud will be more rampant with insider training spiraling out of control.

Christopher Todd — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Christopher Todd Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
In 2018, the SEC requested comment on whether it should reduce the frequency of corporate reports. Commenters overwhelming opposed a switch from quarterly reporting. Even big institutional investors like BlackRock, CalPERS, and others noted the benefits of transparency that quarterly reporting provides. After receiving the comments, the SEC took no further action.
Now, the SEC is yanking this corpse of a rule proposal from the ground yet again. The SEC itself recognizes, in its economic analysis, that reducing the frequency of periodic disclosures "will reduce transparency, make it more difficult for investors to make well-informed decisions, and increase the risk of information asymmetry across investors as a result of the increased time gaps between public disclosures." The benefits to investors of quarterly reporting should far outweigh the costs to companies of providing quarterly reports that keep their investors informed. This rule proposal highlights the core problem: the SEC has shifted from investor protection to management protection. I just don't think it's too much to ask for corporate CEOs to tell shareholders the truth about their

companies every 3 months.
Regards, etc.
C. Todd

Clare MW — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Clare MW Affiliation: Jun. 11, 2026 More data doesn't equate to less reporting.
If anything, it should be monthly.

What corporation stockholders, much less owners and management doesn't make decisions based on monthly data? (not that the government IS a corporation but clearly that's how this regime views it).

The SEC was established (1934 after the crash of '29) "to protect investors from fraud, insider trading, and other market abuses". Regardless of whether they complied with this charge in the past, there were reviewed reports and regulatory compliance. It's inarguable that the SEC has in the past decades acquiesce to corporate power pressure. Decreasing reporting is another tool enabling corruption. This doesn't take senior analysis to realize.

If this goes into affect, it will confirm the protection of fraud, inside trading, and other such abuses. It will completely negate any trust remaining in the SEC, already severely damaged.

Of course, that's the point of the proposal, isn't it?

Only fools are fooled. Only the corrupt restrict data release. You know exactly what you'd be doing... and so do we.

Don't underestimate THE PEOPLE who pay you. You may think this regime is paying you, and maybe they're "supplementing", but your allegience is not to the administration du jour. Know that. Understand that. Comply with that.

ease to steal more from we the people you let these people run over our rights and just put in the right in the dumper. The SOB'S aren't cheating us enought ??? Leave it the hell alone if I could I would leave this rat hole country

---

Clint Robertson — Jun 11, 2026
Subject: S7-2026-15 Comment From: Clint Robertson Affiliation: Jun. 11, 2026 This is absolutely wrong and should not be allowed. The reason it was removed in 1955 was because it made corruption possible. Although we still have a lot of corruption in our system being able to get reports quarterly, makes it harder for the corruption to sink in. This should not be allowed. Everything this administration does will be rolled back once the next administration comes in and fixes all that is being broken. Do not allow this!

---

cluanns — Jun 11, 2026
Subject: S7-2026-15 Comment From: cluanns Affiliation: Jun. 11, 2026 I am retired and hope by retirement investments will last as long as I do. Keeping everyone in the dark for 6 months at a time, as to how companies are doing could lead to investment risks and loss. The SEC should not allow this change in reporting to occur.

Cole Lewis — Jun 11, 2026
Subject: S7-2026-15 Comment From: Cole Lewis Affiliation: Jun. 11, 2026 This needs to stay quarterly! I think it would be even better to have it done monthly or no-monthly! Investors need more visibility to avoid calamity!

Cole Prochko — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Cole Prochko Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
As an accountant for a broker/dealer, I hear and see how much the information that companies send out every quarter can effect and investment decision. A lot can happen with a company in a week, let alone 6 months. I believe there are already plenty of disclosure issues occurring with private companies and I do not want to see public companies fall into this reporting black hole as well. I as an individual read and understand 10-Qs and definitely want to see them continue to be published.

Coleen Clinton — Jun 11, 2026

Colleen Kelley — Jun 11, 2026
Subject: S7-2026-15 Comment From: Colleen Kelley Affiliation: Jun. 11, 2026 To whom it may concern:

The people shouldn't suffer for the sake of a large company trying to save money on bookkeeping. And that's the most generous rationale I can think of for this change. Realistically, it keeps investors in the dark, in an era when less regulation has occurred concurrently with rapidly rising inflation and the cheapening of the American dollar. We should be strengthening American's investments, not undermining them for the sake of corporations. Please do not allow corporations to operate in secret for half of the year.

Colleen Riedell — Jun 11, 2026
Subject: S7-2026-15 Comment From: Colleen Riedell Affiliation: Jun. 11, 2026 Quarterly reports are frequent enough for investors to track their investments and the proposed change to 2x annually would be detrimental to timely assessments and decisions. Do not change it.

Sent from my iPhone

Comcast — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Comcast Affiliation: Jun. 11, 2026 I strongly encourage the SEC to keep the current system of quarterly reporting. In this volatile market, especially, we cannot afford to go back to semi-annual reporting as we had back in 1955. Average Americans cannot afford the devastating devaluation of stocks that such a move would likely bring about. This is especially true for those who are nearing retirement or who are retired (like myself) and reliant on the money in retirement accounts. Particularly in the current economic and political climate in which private deals with those in power appear to be taking place, MORE transparency, not less, is called for both to maintain the strength of our stock markets and the confidence of the public. I implore you to maintain the status quo and not go backwards to a system that didn't work!

Susan M Nelson, DVM

Concerned Citizen — Jun 11, 2026
Subject: S7-2026-15 Comment From: Concerned Citizen Affiliation: Jun. 11, 2026 I respectfully oppose the proposed SEC rule that would allow companies to alter, reduce, delay, or otherwise modify their reporting obligations.
The foundation of fair and efficient capital markets is timely, consistent, and transparent disclosure. Investors, employees, retirees, and the public rely on standardized reporting to evaluate a company's financial condition, risks, and performance. Any rule that permits companies to change reporting practices more freely risks reducing transparency and making it more difficult for investors to make informed decisions.
Reduced reporting requirements can create information gaps, limit accountability, and increase opportunities for selective disclosure. Smaller investors are particularly disadvantaged when access to reliable and comparable information is diminished. Public companies benefit from access to capital markets, and in return they should maintain robust disclosure standards that promote trust and confidence.
Consistent reporting requirements also help prevent confusion across industries and allow investors to compare companies on an equal basis. Weakening these standards could undermine market integrity and erode confidence in the fairness of U.S. financial markets.
I urge the SEC to prioritize investor protection and transparency by maintaining strong, uniform reporting requirements and rejecting any proposal that would reduce the quality, frequency, or comparability of corporate disclosures.
Thank you for considering my comments.
Erica C.
Small Investor

Connie Sullivan — Jun 11, 2026
Subject: S7-2026-15 Comment From: Connie Sullivan Affiliation: Jun. 11, 2026 My name is Connie Sullivan. I'm a retired RN. Quarterlies are important to me because I make decisions on the information. Stop trying to hide information that so many of us rely on!

Connye LaCombe — Jun 11, 2026
Subject: S7-2026-15 Comment From: Connye LaCombe Affiliation: Jun. 11, 2026 I need information to make informed decisions. I review stocks regularly. If they are publicly traded their information needs to be made public regularly. Im irritated enough about Congressional insider trading and now you want more information held back? Watch consumer confidence plummet.

Cormac Russell — Jun 11, 2026
Subject: S7-2026-15 Comment From: Cormac Russell Affiliation: Jun. 11, 2026 Cormac Russell, private investor. I personally manage my retirement accounts and I rely on quality information being provided in a timely manner to be able to evaluate my investments. Slowing down the reporting from companies means the market becomes less well informed as a whole which makes pricing less accurate and undermines market confidence. Quarterly reporting has served us well for decades, let's not move backwards.

Cory Lake — Jun 11, 2026
Subject: File No. S7-2026-15 From: Cory Lake Are you all fucking stupid or just evil thieving criminals? Quarterly reports need to stay as the norm. Do your fucking jobs and go after the illegal, naked short sellers! Or are y'all getting paid to much to look the other way? Do you think your mom is proud of you?

CR Mayhew — Jun 11, 2026
Subject: Comment on S7-2026-15 From: CR Mayhew Affiliation: Jun. 11, 2026 I am writing regarding the potential changes in SEC regulations that govern reporting frequency. It is a grave mistake to allow banks and other large financial institutions to only have to report twice per year, instead of the current requirement of reporting every quarter. Too many financial institutions play fast and loose with the money they hold for their investors and clients. The current rate of reporting is the bare minimum needed for investors and clients to keep up with what is happening with their money. Financial institutions should accountable to their customers, and one way to aid this is to continue to require financial institutions to report every quarter. This matters to me because I, like so many Americans, would like the money that I have worked so hard to earn, and save, to be there for me when I need it. Sincerely,
CR Mayhew

(Michigan)

Craig Anderson — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Craig Anderson Affiliation: Jun. 11, 2026 As both a private investor and a business leader evaluating counterparties, I support maintaining quarterly reporting for public companies.

The pace and volatility of modern markets continue to accelerate, not slow down. Capital allocation decisions rely on timely, reliable financial information. Reducing reporting frequency would create longer periods of opacity, increasing the risk of mispricing, delayed risk detection, and inefficient capital deployment. Advances in automation and AI have materially reduced the burden of reporting. For well-managed companies, quarterly disclosure is not an undue strain relative to its clear benefits to transparency. Limiting disclosure does not address short-termism, rather, it reduces visibility and accountability.

Lastly, maintaining quarterly reporting supports investor protection and market efficiency.

Most Sincerely,

Craig H. Anderson

Cushxr — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Cushxr Affiliation: Jun. 11, 2026 Corporate financial reporting needs to be increased, not decreased. Sic month reporting is way too late and just widens the gap between insider and casual investors. It potentially hides corporate mismanagement and malfeasance until irreparable harm has been done.
Existing quarterly reporting needs to be augmented with monthly mini-reports of fundamentals like raw sales, raw warranty costs, borrowing, etc. Modern computer resources minimize the actual costs of such reporting and encourage corporations to invest in good basic tools.

Cyndi Wolfe — Jun 11, 2026
Subject: S7-2026-15 Comment From: Cyndi Wolfe Affiliation: Jun. 11, 2026 I strongly oppose the proposed change to "optional" semi-annual reporting. I am a regular person; a retiree with a small portfolio, and I rely on quarterly information to make financial decisions that have a real impact on my quality of life. A change to semi-annual reporting will ensure that corporate insiders have an even greater advantage over regular people. I believe the companies that "opt in" are likely to be the ones whose investors most need more frequent updates. This proposed change is unnecessary and not worth the cost to my small retirement portfolio!

Investors must have quarterly reports to make informed decisions. Do not take this vital information away and do not change reporting requirements.

Dana Watkins — Jun 11, 2026
Subject: S7-2026-15 Comment From: Dana Watkins Affiliation: Jun. 11, 2026 Dana Watkins, CEO.
Public companies need more transparency, not less. Quarterly reporting is a must. If public companies don't want to report quarterly, they can take the company private. Transparency and the costs of reporting are the price companies pay for choosing to cash in on an IPO and raise funds in public markets. Semi-annual reporting allows companies to hide problems and the government to hide macroeconomic problems.

Dana Wright — Jun 11, 2026
Subject: S7-2026-15 Comment From: Dana Wright Affiliation: Jun. 11, 2026 Dana Wright

David Bilodeau — Jun 11, 2026
Subject: Comment on S7-2026-15 From: David Bilodeau Affiliation: Jun. 11, 2026 More frequent reporting gives investors a better opportunity to respond to shifts in the health of a business with their investments in them.

Businesses benefit from better granularity to be able to react to their revenue and profit swings. Many reputable, moral companies will continue to report more often even if not required and those businesses who only follow SEC guidelines might be the ones for investors to avoid.

It makes no sense to change these minimum reporting guidelines because we know the twice yearly

reporting was very bad for everyone. Businesses have the data, likely daily or even hourly, so keep things as they are because you have 47 years of quarterly earnings data to support the effectiveness of it.

Don’t continue to try and roll the clock back to the 50s with less and less governmental regulation.

The damage this will cause will take decades to repair.

David Charney — Jun 11, 2026
Subject: S7-2026-15 Comment From: David Charney Affiliation: Jun. 11, 2026 I was in charge of SEC reporting at a large bank for 10 years. Changing to semi-annual filings is an awful idea. Companies need to keep their controls and processes up to date to make sure reports are accurate and timely. Semi-annual reports would introduce additional risks and errors into the process and reduce confidence that filings are accurate.
Additionally, as an active investor, I believe 6 months is too long to wait to see how my companies are performing in the ever-changing economic environment. I would likely reduce my holdings in equities as a result.
I recommend rejection of this proposed rule change.

David Charney

David Clark — Jun 11, 2026

Debbie Teter — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Debbie Teter Affiliation: Jun. 11, 2026 Secretary,

I have worked hard to prepare for retirement, only to find myself facing two potential tsunamis: concerns about the long-term solvency of Social Security and now proposals to reduce corporate reporting requirements to every six months.
In today's rapidly changing business environment, particularly with the accelerating impact of AI and technological disruption, a company can move from strong performance to significant decline in a very short period of time. Quarterly reporting provides transparency, accountability, and timely information for investors, employees, and retirees whose savings depend on informed decisions. Reducing reporting frequency risks delaying the visibility of emerging problems and could allow issues to grow unchecked. If anything, I would advocate for more frequent accountability, not less. Please continue to support quarterly reporting requirements and resist efforts to weaken financial transparency. We should learn from history, not repeat it.

Respectfully,
Debbie Teter

Debbie Tubbs — Jun 11, 2026

Debra MacKillop — Jun 11, 2026
Subject: S7-2026-15 Comment From: Debra MacKillop Affiliation: Jun. 11, 2026 Why does the SEC want to make it harder for the public to follow companies regulated by the SEC??? There is no good reason for that. There are only bad ones. Allowing companies to report less frequently, hiding more, and perhaps committing fraud or not meeting it's SEC obligations in a more serious way, will result from reducing the reporting requirements. As someone with my retirement funds invested through Schwab, I want to see as much as I can to keep an eye on my retirement, and I am entitled to do so. The SEC is supposed to be a watchdog for the public, not a haven for companies to hide out. If this is approved, there for sure will be more efforts like this to follow. It is the first (maybe I missed some and it's not even the first) domino, and it should stay upright and the SEC must continue to require the same reporting obligations from the companies it regulates and investigates as ALWAYS. We are watching the SEC, and what its leadership is doing, or not doing. Things look unsettling and

suspicious. Why don't you also investigate all the possible insider trading going on this year by many important leaders in all parts of our govt to take advantage of all the crazy volatility from so many crisis actions by the govt from war to tariff announcements constantly changing to crypto world upheavels and farm bailouts, and more. Everyone seems to have been massive trading going on by Congress, executive brand too, right before an important announcement that those traders know about. Thank you.

Debra Parkhurst — Jun 11, 2026
Subject: S7-2026-15 Comment From: Debra Parkhurst Affiliation: Jun. 11, 2026 The proposed Securities and Exchange Commission (SEC) regulation would allow companies to delay financial reporting for up to six months, a timeframe that raises significant concerns for investors. This extended reporting window potentially creates opportunities for organizations to manipulate financial statements, undermining transparency and investor confidence. The prolonged period between financial periods could enable companies to strategically adjust their accounting practices, potentially obscuring critical financial information that shareholders rely on for making informed investment decisions. Such a regulatory change might compromise the fundamental principles of financial disclosure and market accountability, potentially introducing increased risk and uncertainty into the investment landscape.

Debra Parkhurst — Jun 11, 2026
Subject: S7-2026-15 Comment From: Debra Parkhurst Affiliation: Jun. 11, 2026 The proposed SEC regulation allowing companies a six-month window before reporting financial information raises significant concerns for investor transparency. Such an extended reporting delay could potentially enable organizations to manipulate financial statements, undermining the integrity of financial disclosures and investor confidence. A shorter reporting timeline would better serve market accountability and provide stakeholders with more timely, accurate insights into corporate financial performance.

Debra Runkle — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Debra Runkle Affiliation: Jun. 11, 2026 Please don’t allow this reporting. Keep the reporting quarterly. Retired folks who are dependent on their savings to supplement social security can’t afford to lose 1/2 of their savings!

Sent from my iPhone

Debra Shepherd — Jun 11, 2026
Subject: S7-2026-15 Comment From: Debra Shepherd Affiliation: Jun. 11, 2026 Much of the savings of American citizens is in the stock market, and it’s important for us to have clarity on what the companies we are invested. Even today, it’s clear our politicians have insight into businesses; don’t remove what visibility the average person has.

Addition, companies should not be allowed to have their books unavailable for investors/ stockholders for this long a period. This is important to ensure laws are being followed, and as a holder of interest in the company, the stockholder should have this insight.

Ms. Debra Shepherd, retired.

Regards
Debra Shepherd

Dejan Bajic — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Dejan Bajic Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I am writing to express my strong opposition to proposed Rule S7-2026-15, which would allow public companies to abandon quarterly Form 10-Q filings in favor of semiannual reporting. As a socially

conscious retail investor who believes in corporate accountability and the power of shareholder democracy, I view this proposal as a direct attack on market transparency designed to shield corporate executives from public scrutiny.
Reducing the frequency of mandatory financial reporting actively strips power away from shareholders and hands it directly to corporate CEOs and insiders. Corporate accountability relies entirely on consistent, timely, and standardized data. When companies are permitted to hide their operational, environmental, and financial impacts behind a six-month wall of silence, shareholders lose the tools necessary to vote proxies intelligently, track executive performance, and police corporate governance in real time.
Furthermore, this rule creates a dangerous information asymmetry that favors institutional giants and corporate insiders, who already possess disproportionate access to management. Retail investors rely heavily on the regulatory baseline of the Form 10-Q to make informed, ethical investment decisions. Stretching the disclosure window to six months expands the timeline where insiders hold material, nonpublic information, severely escalating the risks of unchecked insider trading and managerial misconduct.
The SEC's foundational mandate is to protect investors and maintain fair, orderly markets—not to cater to corporate executives seeking to reduce their own accountability. This corporate-friendly rollback undermines the very essence of market democracy. I urge the Commission to reject this proposal and maintain the quarterly reporting framework that keeps public markets transparent and keeps power in the hands of shareholders.

Del Durland — Jun 11, 2026

Demian Rubalcaba — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Demian Rubalcaba Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission: Retail investors struggle immensely to keep a reasonable amount of wealth on the side of the average person. Not having this kind of information would be

detrimental to us.
Thank you,
Demian Rubalcaba

Dendalee Baxter — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Dendalee Baxter Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I strongly oppose any SEC proposal that would reduce or eliminate quarterly disclosure requirements for public companies.
As a retail investor, I depend on regular company disclosures to make informed decisions about where I invest my hard-earned money. Quarterly reports provide transparency into a company's financial condition, performance, risks, and direction. Without this information, I would be investing with significantly less visibility into what is happening inside the companies I own.
Taking away quarterly disclosures would effectively blindfold Main Street investors while giving Wall Street institutions an even greater advantage. Large firms have teams of analysts, private research resources, and direct access to company management that individual investors simply do not have. Quarterly reporting helps level the playing field by ensuring that all investors receive important information at the same time.
Transparency is not a burden—it is a fundamental protection for investors and a cornerstone of fair and efficient markets. Reducing disclosure requirements would make it harder for ordinary Americans to evaluate risk, hold companies accountable, and make sound financial decisions. It would increase information gaps at a time when public trust in markets depends on openness and accountability.
The SEC's mission includes protecting investors. Taking away critical information that investors rely on does the opposite. I urge the Commission to preserve robust quarterly disclosure requirements and reject any proposal that would reduce transparency for the investing public.
Please do not take away the information that helps me make informed decisions about my financial future.
Dendalee Baxter

Denise Bafti — Jun 11, 2026
Subject: S7-2026-15 Comment From: Denise Bafti Affiliation: Jun. 11, 2026 We should be able to continue to have transparency into the records of public companies. Changing rules midstream is unfair. I rely on this data to make my own decisions on my investing. Please do not tighten the reins. Public companies should remain just that — public. Subject to the rules of transparency. Thank you.

Donna Northcott — Jun 11, 2026
Subject: S7-2026-15 Comment From: Donna Northcott Affiliation: Jun. 11, 2026 In recent years America has lost its way. The wealthiest are determined to grab as much wealth as possible - more than they could spend in several lifetimes - leaving the vast majority to struggle
to keep a roof over our heads, feed our families, and not lose our insurance. I retired from teaching in 2025 and immediately found a part time job, because I'm terrified at the prospect of being unable to support myself. For decades, I've done my best to
support local food banks and shelters; because it's the right thing to do, but also in the hope of creating enough good karma that I won't have to join their rank. And now we are saddled with the most corrupt president in decades, who has encouraged a culture
of avarice, ignorance, and resentment. This is not the country I grew up in and I am ashamed - and

terrified - that America may be destroyed in my lifetime. There is still a chance to save this country, but we need more Americans to show courage, to fight
against avarice - there should be no millionaires-billionaires-trillionaires while millions are starving and homeless. It's time to grow a pair and stand up to trump and the gop.

Duncan Perron — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Duncan Perron Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
As a retail trader, I am writing to strongly oppose the proposal to make quarterly financial reporting optional. For regular individuals who actively manage their own portfolios, official quarterly disclosures are not a luxury—they are an essential tool. We do not have the direct corporate access, multi-million dollar data feeds, or army of analysts that major Wall Street institutions enjoy. We rely on standard, predictable, and timely SEC filings to level the playing field. Taking away quarterly updates and leaving a massive six-month gap creates a dangerous information vacuum that directly increases trading risk for everyday investors.
The choices I make in the market have real-world consequences for my family. The capital I risk is meant to secure our future, build stability, and provide for my loved ones. To make the best possible investment decisions for their well-being, I need consistent visibility into a company's financial health, debt, and cash flow. Cutting that transparency in half blindfolds independent traders and severely damages the trust and integrity of our trading community. Main Street deserves equal access to information; please preserve mandatory quarterly reporting.

Dwain Ward — Jun 11, 2026
Subject: S7-2026-15 Comment From: Dwain Ward Affiliation: Jun. 11, 2026 Absolutely no.
As an investor I want to see what's being done with my money every quarter, not twice a year.
We've seen what happens when companies skirt the reporting requirements (Enron) and making it every 6 months will only make it worse and destabilize the market.

Ed Hassler — Jun 11, 2026
Subject: S7-2026-15 Comment From: Ed Hassler Affiliation: Jun. 11, 2026 Unless the SEC has a new focus of hiding accountability for the 1%, financial results should maintain quarterly reporting. This is a time where the SEC has the power to reinforce our betray trust of the general public; while some firms might be attempting to state that quarterly reporting is onerous, it has been the standard for many decades. Moving away from it for ease of the corporations resulting in lower oversight can only serve to profit the C suites of large companies. In response many will likely reduce staffing in accounting to raise profits for the company directors.

Less oversight will result in greater complacency and violations of regulations. Reducing oversight also makes it more likely that a further reduction will be requested all for the benefit of the C suite and above.

Ed Hassler, Prosthetist/Orthotist multinational publicly held corporation. This matters as both a field level employee and significant retail investor as it reduces the accountability of corporate officers.

Ed Kliska — Jun 11, 2026

Elaine McLau — Jun 11, 2026
Subject: S7-2026-15 Comment From: Elaine McLau Affiliation: Jun. 11, 2026 There is no apparent evidence that there is a benefit to INVESTORS. The SEC proposal must be able
show that "going blind" is SIGNIFICANTLY useful to investors. Given the corruption of the Trump administration, making this change seems likely as another wayto hide relevant facts from investors. Do NOT ALLOW THIS CHANGE TO HAPPEN

Elaine Menard — Jun 11, 2026
Subject: S7-2026-15 Comment From: Elaine Menard Affiliation: Jun. 11, 2026 Elaine Menard Paraeducator

I am opposed to this change because it would allow unscrupulous company executives the ability to operate illegally without oversight from the public. Many of us, although we have paid into Social Security, will have to depend on our investments to help us through retirement years.

It is the job of the SEC to shine the light into the dark spaces of publicly traded companies. While I appreciate the notion of less government, commerce drives the world. As it is 1% of the people own over 95% of the world's financial resources.

The SEC provides oversight and protections for everyone. They make companies prove what is going on financially and allow investors insight into how to invest their precious financial resources. The SEC keeps companies honest because the government shines a light on them and makes them prove what they say is true with verifiable data.

The SEC is supposed to protect all of us. There are so many more people than there are publicly traded companies. Do not be afraid to do your job and stand up to those who would lie and cheat even the small children that I teach. Protect the consumers and citizens who depend on transparency and honesty in reporting. Keep the reports quarterly.

Sincerely,
Elaine H Menard

Elaine Williams — Jun 11, 2026
Subject: S7-2026-15 Comment From: Elaine Williams Affiliation: Jun. 11, 2026 As an investor I have grown to depend on knowing what my account is worth quarterly and getting published documentation of that should be a minimum. My preference would be monthly. Registered Investment advisors also get paid a fee quarterly, tied to quarterly reports, to supervise these accounts and it would be a financial hardship to only receive the larger fee twice a year. I vote an emphatic no on this change. Leave well enough alone.

Elizabeth Burling — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Elizabeth Burling Affiliation: Jun. 11, 2026 Medical Laboratory Scientist.

The trading markets need the transparency of quarterly financial information to make informed investment decisions.

The SEC has mandated a quarterly reporting rule for the past 56 years.

We've seen what happens when they rolled back that rule in 1955 and we don't want to repeat it.

The real question is who's getting paid to roll back that rule now and who benefits?

The SEC owes it to the American Investor to choose transparency.

1860s
U.S. railways report gross earnings monthly, sometimes weekly.

1889
The Wall Street Journal prints Western Union's quarterly revenue.
Timely disclosure, 45 years before the SEC even existed.

1931
63% of NYSE companies report quarterly earnings.

1939
The New York Stock Exchange requires most listed firms to report quarterly.

1955 THE EXPERIMENT BEGINS
The SEC steps in. Companies are required to report only twice a year.
For fifteen years, American investors get half the information.

1970 COURSE CORRECTED
The SEC changes course and mandates quarterly reporting, the rule we've kept ever since. "The trading markets should have the benefit of quarterly financial information."SEC RELEASE NO. 34-8683 · SEPT. 15, 1969

Today THE EXPERIMENT RETURNS?
The SEC proposes letting companies go back to reporting just twice a year.
Fifty-six years of quarterly transparency, now on the table.

Erin Wildman — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Erin Wildman Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Quarterly statements should be the absolute minimum. In fact, more information and context should be provided on the current statements rather than trying to reduce transparency and reduce reporting requirements. This proposal to reduce reporting can only hurt the investing public when it's already disadvantaged with slower tech and less access to research and resources to make appropriate investment choices compared to institutional investors. There is no reason to reduce reporting to less than quarterly reports.

Ethan Dorr — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Ethan Dorr Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
The SEC proposed a rule that would cut corporate financial reporting from every quarter to every six months, which is not in the best interest of household investors. If passed, household and retail investors will get half as much information as they have today about the companies they invest in. Institutional investors and insiders will find other ways to stay informed. This puts household/retail investors at a further disadvantage.
I encourage the SEC not to move forward with this proposed rule.
Ethan B. Dorr

Felipe Contreras — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Felipe Contreras Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I oppose Rule S7-2026-15. Reducing reporting frequency from quarterly to semiannual disclosures weakens transparency and increases information asymmetry between institutional and retail investors.
At a time when newly public companies are being considered for faster inclusion in major indexes, reducing the amount of information available to investors moves the market in the wrong direction. Millions of Americans invest through index funds and rely on timely, standardized disclosures to make informed decisions.
The SEC's mission includes protecting investors and maintaining fair, orderly, and efficient markets. Less disclosure and less visibility do not advance those objectives.
Retail investors need greater transparency and accountability from public companies, not less. The SEC should preserve quarterly reporting standards and prioritize investor protection over reducing reporting obligations.

George Jurgensen — Jun 11, 2026
Subject: S7-2026-15 Comment From: George Jurgensen Affiliation: Jun. 11, 2026 I've invested since my teen years. Now retired and 61. I've always relied on quarterly reports to understand how the company is progressing, especially technology companies. And to understand ehat management anticipates from here. Taking this away is irresponsible and border line insane. And yes, i'm CFA background.

George Jurgensen

George Philip — Jun 11, 2026
Subject: S7-2026-15 Comment From: George Philip Affiliation: Jun. 11, 2026 Do not allow this. If anything corporations need more financial scrutiny and checks. They are already getting such favorable benefits in tax filings. This will rob Americans who invest while ceo’s can walk away richer before the stocks drop.

Sent from Gmail Mobile

George S — Jun 11, 2026
Subject: S7-2026-15 Comment From: George S Affiliation: Jun. 11, 2026 The quarterly reporting period allows investors and regulators the opportunity to get a fresh read on the health and

prospects for every listed company in the US. The only reason to go to a longer period between reports is to make the ongoing health of a given company more opaque; and what can that engender? More time for a fraudulent company to hide financial crimes. My name is george l stein and I am a global compliance and operational risk director at Bank of America. BTW, reputational risk is a real thing.

Georgene Anderson — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Georgene Anderson Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Important to keep the quarterly reports available. As a retail investor that information is very helpful and necessary to keep me informed. This is valuable information for me and other investors.

Gerald Bell — Jun 11, 2026
Subject: S7-2026-15 Comment From: Gerald Bell Affiliation: Jun. 11, 2026 Just another way to hide all their trades … with AInow away of life . Big trades and tendencies can no longer be hid by hedge funds and Wall Street players . Must be cutting in to their bottom lines. No other good reason!!!!!

Grace Wu

Grant Anton Jensen — Jun 11, 2026
Subject: S7-2026-15 Comment From: Grant Anton Jensen Affiliation: Jun. 11, 2026 Less transparency hurts everyone.

A lot can go wrong in half a year. Failed product launches, ballooning debt, lawsuits, vanishing customers. Today the law forces companies to surface that information every quarter. Under the new rule, they can sit on it for six months at a stretch. Plenty of time for insiders to quietly sell their shares to investors (or their ETF) before the bad news tanks the stock.

This screws over investors at every level.

Oppose this rule change.

Grant Jensen

Grayson Craddock — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Grayson Craddock Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I support quarterly disclosures, not this BS every-six-month disclosure, so that Wall Street insiders can get rich, while we retail investors get the shaft.

Greg A — Jun 11, 2026
Subject: S7-2026-15 Comment From: Greg A Affiliation: Jun. 11, 2026 Nope, don't do it. Leave earnings reports quarterly.

Greg Litovchenko — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Greg Litovchenko Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Your proposed plan of action is reckless and borderline criminal.
You are responsible for law and order in financial markets .

Gregg Garfinkle — Jun 11, 2026
Subject: S7-2026-15 Comment From: Gregg Garfinkle Affiliation: Jun. 11, 2026 Gregg Garfinkle
Self-employed Investor

Having quarterly financial information to make decisions is important to me -- longer gaps will likely create an unfair advantage for corporate insiders.
The "optional" nature of the proposed changes doesn't fix the problem because companies that opt in are often the ones whose investors most need frequent updates.
Finally, the savings to companies from this change isn't worth the cost to me.

Please do not make the proposed changes, and KEEP all financial reporting on the existing quarterly basis!

THANK YOU!

Gregg Potter — Jun 11, 2026
Subject: S7-2026-15 Comment From: Gregg Potter Affiliation: Jun. 11, 2026 Consistent AND timely reporting for small investors is crucial for investments. Corporations and large “investors” should not be afforded advantages over individuals. Individual and family investors do NOT have the resources that corporations and brokerage houses have. Give US a break!!!

Subject: My view on Rule S7-2026-15 From: Heather Daley Affiliation: Jun. 11, 2026 To the
~~~~~~~~~~~~~~~

Securities and Exchange Commission:
We definitely should not be taking away information that the people of this great country have. We have fought for decades to earn the rights and information we already have. A great nation such as ours does not move BACKWARDS that's crazy. A nation such as ours continues to move forward. Adding to the rights and information we already have won. You CAN SEE how he is trying to move us BACKWARDS. And that is exactly what is happening to this country. We are becoming a BACKWARDS nation. Don't add to that problem. Find your backbone and refuse his UNAMERICAN wants and desires. To move us to a time that only WHITE WEALTHY MEN had rights to information and flat out rights. You can plainly see he wants no one to have these but WHITE MEN. Dontake us back to that dark time. For God's sake we were really just stating to make progress for everyone else that lives in this country. Women, immigrants, gays,the disabled, and everyone else that lives here. WHITE AMERICAN MEN only make up 77 million. That leaves the rest of us, who by the way are the majority 265.6 million people. Now just let that sink in. Now maybe go have a think on that before you attempt to do something so obviously FOOLISH. Thank you a loyal AMERICAN WOMAN I might add. Who has watched many of her hard fought rights being taken care of before her eyes. I hope to God that you soon see WHITE AMERICAN MEN go to bottom of the totem pole. I relish that day when you all can see how it's been for everyone else in this country for the past 250 years. Actually a lot longer, but we'll go with the countries inception.

Heather Farias-Nichol — Jun 11, 2026
Subject: S7-2026-15 Comment From: Heather Farias-Nichol Affiliation: Jun. 11, 2026 What purpose does this serve beyond hiding information from shareholders, who are fractional business owners, with a right to hold the individuals using their money accountable?

heidi huseman — Jun 11, 2026
Subject: S7-2026-15 From: heidi huseman Affiliation: Jun. 11, 2026 It is difficult enough to keep corporate conglomerates on the up and up with the required quarterly reporting and now the SEC under the Trump regime wants to role it back to only 2 times a year. This political favoritism is just another example of if You're making more than the typical family of four You will be given keys to any city You want.

Heidi Jean — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Heidi Jean Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
As a retail investor, I rely on quarterly disclosures to understand the financial condition, risks, and performance of public companies. These reports provide transparency and help ensure that all market participants have access to the same information.

Limiting or reducing disclosure requirements would decrease transparency and make it harder for investors to make informed decisions. Public markets function best when companies provide timely, consistent, and meaningful information.

I urge the SEC to protect investors by maintaining robust disclosure requirements and preserving access to critical corporate information.

Helen Floyd — Jun 11, 2026
Subject: Quarterly reporting is needed From: Helen Floyd Affiliation: Jun. 11, 2026 Stop enabling companies to steal and defraud investors by allowing the hiding of financial information for 6 months. Keep the quarterly reporting. It is a way to force some level of transparency at least. Helen Floyd, owner Eclectic Wellness LLC. There need to be rules that everyone has to comply with, not allowing billionaire corps to slide by without reporting appropriately. People's retirement funds are involved. You, the SEC have a responsibility. You are on notice that you need to take responsibility and keep the quarterly reporting in place.

Howard Vine — Jun 11, 2026
Subject: S7-2026-15 Comment From: Howard Vine Affiliation: Jun. 11, 2026 Howard Vine, Esq. former head of Corporate Governance for the National Association of Manufacturers. The idea of abbreviating public reporting quarterly will damage the integrity of all corporate governance. Quarterly reporting improves accountability and assures consumers of stock and other investments the most timely information on which to measure corporate competence and essential reporting of problem issues. Failure to mandate quarterly reporting will leave the public with less information than is reasonable to make investment decisions. The SEC has always been the progenitor of corporate responsibility and accountability. Transparency has always kept the marketplace efficient and informed. Allowing corporations to conceal for extended periods matters which will influence corporate behavior and disadvantage public consumers is harmful to the public. The efficient market hypothesis is based on the fundamental that the share price accurately reflect ongoing issues. Failure to provide timely reporting will allow unforeseen complications to go unnoticed for far too long. Keep the quarterly reporting obligations!!

Howard Vine

Jackie Parsonese — Jun 11, 2026

Subject: S7-2026-15 Comment From: Jackie Parsonese Affiliation: Jun. 11, 2026 Jackie Parsonese, transaction coordinator.

I rely on quarterly information in current companies I am invested in as well as possible future company investing. Fewer times to report in a year feels like lack of transparency and giving companies more time to hide information from every day investors.

I'm in favor of more frequent public reporting … such as every two months reporting to investors. Technology should allow for this.

Jacob Tumey — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jacob Tumey Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission: the ban on quarterly releases of information would severely damage the trust in the organization, would allow it to seem like you are protecting the company who chose to go public and would damage the ability for traders who want to do their own investing. These companies are reliant on retailers to even be profitable, why not allow us to recoup those dollars spent consuming and allow us to continue growing our networth. You will have major problems trying to do this. Do not hurt the people who boost these companies up.

Jacqueline Davis — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jacqueline Davis Affiliation: Jun. 11, 2026 My name is Dr, Jacqueline H Davis. I am a retired educator and small investor. My investments, pension funds and IRA depends on the movement of the stock market. I'm tired of the wealthy and connected having access while small investors like myself are shut out. Keep the reporting schedule the same so that my broker can get the information needed to protect my assets and to grow them.

James Vitullo — Jun 11, 2026
Subject: S7-2026-15 Comment From: James Vitullo Affiliation: Jun. 11, 2026 My name is James Vitullo. I'm a self-employed worker and retail investor in Northeast Ohio who built a small investment portfolio from scratch with no financial advisor and no inside information — just publicly available quarterly reports.

This rule is a gift to insiders and a middle finger to everyone else. Six months of financial blackout means executives and institutions know exactly what's happening while the rest of us guess. That's not a market, that's a rigged game with extra steps.

Quarterly reporting is one of the only tools retail investors actually have. Taking it away doesn't modernize anything — it just makes it easier to hide the ball from the people whose money is actually on the line.

Reject this rule.

Regards,

James.

Jamie Carpenter — Jun 11, 2026
Subject: File Number S7-2026-15 From: Jamie Carpenter Affiliation: Jun. 11, 2026 Subject: Comment on File Number S7-2026-15
Dear Secretary,
I am writing as a concerned investor and member of the public to strongly oppose Proposed Rule S7-2026-15. Allowing public companies to replace quarterly Form 10-Q filings with semiannual Form 10-S filings will severely harm market transparency and disadvantage everyday investors.

Waiting six months for material financial data will widen the information gap between institutional insiders and the general public. Furthermore, removing fixed financial statement age limits will increase market volatility, as structural or debt issues will remain hidden from public view for far too long. I urge the Commission to reject this proposal and maintain the current quarterly reporting framework to preserve retail investor protection and market integrity.
Furthermore, any company that makes over 1 million dollars a year is doing pretty dang good. They can lower the budget of their overpaid CEOs and hire more accountants. Or now that they have the use of A.I., reporting should be twice as easy for them; they could even fire the CEOs and replace them. Yes, the current 40- and 45-day quarterly reporting cycles are absolutely not an administrative burden on public filers over 1 million in equity. This rule has likely been written by a lobbyist hired by a billion-dollar corporation to make laws that favor them and hurt the public, so PLEASE DON'T PASS THIS RULE.
By transitioning to a semiannual cadence, company management will focus away from vital short-term quarterly earnings targets. This is not in the best interest of the markets or the economy.
Sincerely,
Jamie Carpenter Esq.

Jamie Bedits — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jamie Bedits Affiliation: Jun. 11, 2026 My name is Jamie Bedits. I am a nurse. I feel strongly that the reports should come out quarterly. I need my retirement accounts to live on when I retire and this would help to know if my investments should be changed sooner than waiting 6 months!

Jane Austen — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Jane Austen Affiliation: Jun. 11, 2026 My name is Anya Irene, and I reside in Atlanta, GA as a medical laboratory scientist. I am 30 years old and just started actively investing in my retirement. Everyone shakes their head at the adage "ride the waves, you're young enough to overcome a few collapses and reap the reward of staying aggressive," and I already know my generation won't see Social Security. I am literally reading Investing For Dummies right now, and the experienced contributors constantly cite the SEC as a reliable resource, explaining how different laws of transparency work to protect the investor, so for me to learn that one of these safeguards -something that inspires trust and ergo investing more money - may be rolled back f**king pisses me off!

Jane Berry — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jane Berry Affiliation: Jun. 11, 2026 My name is Jane Berry, I am a retired CPA and Auditor. I see absolutely no benefit from less reporting for people who are doing business with or potentially investing in a company. Since even as a retired person I invest in company stocks and do business with a range of companies, taking away timely reporting/monitoring would not be of benefit to my ability to adjust my spending/investing over a longer time frame.
Quarterly reporting is a standard that it makes no sense to change, as it does not benefit investors or people doing business with companies. In fact, if companies were given the choice to continue quarterly reporting if desired, I would immediately disinvest and stop doing business with any company who chose to discontinue quarterly reporting.

Jane Broadhead — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Jane Broadhead Affiliation: Jun. 11, 2026 My name is Jane

Broadhead, I'm retired and living in Opal, Wyoming. I rely on my IRA as part of my retirement income and can not afford diminished returns, like happened between 1955 and 1970, when SEC reporting was required twice a year instead of quarterly. Please reconsider, and leave the reporting requirement as they are now, quarterly.

Janna J Dunnagan — Jun 11, 2026
Subject: File No. S7-2026-15 From: Janna J Dunnagan It is vital for stock reporting to continue on a more frequent basis. I have accounts that report monthly and a few that report quarterly. More frequent reporting requires companies to be more accountable and conduct transactions with more transparency. The biannual reporting was tried in the past and failed miserably. Yes we have the internet now but many older stockholders depend on direct communication from the companies they transact with. Leave reporting as is. Janna J Dunnagan Retired University Park, TX

Jason Gritti — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jason Gritti Affiliation: Jun. 11, 2026 Jason Gritti, MD – Internal Medicine Physician and Individual Investor

I strongly support maintaining mandatory quarterly reporting requirements. Transparency and timely disclosure are fundamental to fair and efficient markets. Extending reporting intervals to six months would leave ordinary investors in the dark while large institutions, executives, and insiders often have greater access to information and resources. Reduced transparency increases information asymmetry and creates more opportunity for insider advantages, undermining confidence in our markets.

As both a physician and an individual investor, I rely on timely, accurate information to make informed decisions. Quarterly reporting has been a cornerstone of U.S. market integrity for decades. It promotes accountability, protects retail investors, and helps maintain trust in our financial system.

The SEC should prioritize transparency and equal access to information by continuing to require quarterly reporting. Strong disclosure standards are essential to preserving investor confidence and ensuring that all participants compete on a level playing field.

Jean Zimanske — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Jean Zimanske Affiliation: Jun. 11, 2026 Why must we always try to change a system that isn't broken ? Quarterly reports help keep the average investor aware of what their funds are doing, showing transparency. Remember the adage of "the more you know "? It fits well in that the more investors know about the funds and their firms, the better choices they can make to have their investments grow, entitling them to a better life. A better life means not being dependent upon others to live their life being financially independent and stable without relying on any social programs. Keep us informed quarterly ; keeping us updated in this timely manner has been working well so don't mess with it.
Jean Zimanske

Jeanne Breen — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jeanne Breen Affiliation: Jun. 11, 2026 My name is Jeanne Breen. I'm a business education teacher in high school and I'm opposed to the proposal that

companies are able to report only every 6 months as opposed to quarterly. Not only will this impact my ability to understand what's going on in the companies I've invested in but it's bad practice that ultimately could encourage and enable the next Enron or Worldcom or 2008 scenario. My students will also tell you the same. Quarterly filings shed light more quickly on dark fraud scenarios. The investors who lost it all in the collapse of the aforementioned corporations would certainly agree. Every major modern accounting scandal was enabled by gaps and opacity in financial disclosure. Today the law forces companies to disclose pertinent information such as new product failures, increasing debt, disappearing customers, lawsuits, and other bad news every quarter. Under the new rule, corporations can and will sit on this info for up to six months — that's a lot of time for insiders to quietly sell their shares before the bad news sinks the stock. Skipping the quarterly filing represents a small savings for corporations but a big loss and potential cost to the average investor. Stand firm; hold all public corporations accountable by retaining the quarterly filing requirement!

Subject: S7-2026-15 Comment From: Jeffrey Lance Affiliation: Jun. 11, 2026 Jeffrey Lance

I have some money invested and I think shareholders should be able to see what the companies they are invested in are doing financially.

Jeffrey Max — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jeffrey Max Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Reducing the information available for investors allowing them to make informed decisions is not a good thing. There have been many notable corporate scams and rug pulls, leaving investors at a loss. Without access to quarterly filings, how are people supposed to avoid getting ripped off. Do not make this change. Companies and institutions already have an immense advantage over the average investor, and this will only make things worse by decreasing accountability in the markets.

Jeffrey Saeger — Jun 11, 2026

Jennifer Schmitt — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jennifer Schmitt Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I have worked at public and private entities. I donrpefer private entities because there is less pressure on quarterly deliverables and true change often takes time, but I believe that is the trade public companies make for being large enough to have unaffiliated investors. We need more transparency in public company behavior not less. This also adds an important layer of competition where companies must way the speed to market impact for new ideas of going public.
Please open the shutters instead of jamming them tighter. You are risking disillusionment in the stock market and if the story collapses due to lack of trust then it takes centuries to rebuild another paragon. Move with caution.

Jennifer Sheetz — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jennifer Sheetz Affiliation: Jun. 11, 2026 absolutely NOT! you rip off the american people daily. you need MORE regulation!

Jim Francus — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jim Francus Affiliation: Jun. 11, 2026 I have been actively involved in the stock market throughout the last 44 years. I very much appreciate and value the quarterly reports of the companies that comprise my 403.B stock portfolio. I respectfully request that quarterly reports remain for those companies that are a part of the various U.S. Stock Exchanges.

Jim Harless — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jim Harless Affiliation: Jun. 11, 2026 3 month reports is best for being honest, clear, help be transparent for buyer clarity. Cut shorter is to help crooks so its poor idea.

Yahoo Mail: Search, Organize, Conquer

Jim MacDonald — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jim MacDonald Affiliation: Jun. 11, 2026 Ir seems that by changing to review only every 6 months, fraud, waste and abuse has found fertile ground. Another way to steal from the American people.
Time for a change at the SEC.

Jim Maier — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jim Maier Affiliation: Jun. 11, 2026 My name is Jim Maier, and I am currently a sales assistant, winding down my career. Reporting requirements for publicly traded companies should absolutely NOT be changed to anything longer than what it has been “forever” - QUARTERLY. There is already too much ability for insiders to profit off the current quarterly system. Extending this to 6 months is unfair to the general public. Most of my savings is tied up in the stock market - making it even less transparent will only HURT the average investor because we will have even less timely information upon which to make investment decisions. What dense individual came up with this one - wait, don’t tell me - someone who will have access to information in that time period that the general public doesn’t, to profit off that knowledge, and screw the rest of us. NOT ACCEPTABLE. I graduated from my MBA program at UT Austin with a bunch of people who went to work at Enron, and we know how that debacle turned out - and hurt both my classmates and the general public.

Jim Maier
Rockford, IL 61107

Jim May Mileski — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jim May Mileski Affiliation: Jun. 11, 2026 Please keep it at 4 times a year. I very 6 months does nothing to help the lil guy. But we all know your only out for yourselves anyways

Jim May-Mileski

Jim Thurman — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jim Thurman Affiliation: Jun. 11, 2026 Jim Thurman, self employed. Please keep Quarterly Reports intact as small investors cannot be left in the dark for half a year while insiders get access to vital corporate information.

Joan E. Exner — Jun 11, 2026
Subject: S7-2026-15 Comment From: Joan E. Exner Affiliation: Jun. 11, 2026 Transparency is essential in a democracy. This administration has repeatedly demonstrated its goal primarily to enhance every advantage for the extreme wealthy & corporate money changers of this Nation, along with destroying democratic safeguards established in our Government Of The People, By The People that protect against fraud & corruption. Transparency along with frequent reporting ensures protections against corruption & fraud.
Therefore, Keep Quarterly reporting requirement as is! In fact I’d suggest requiring this reporting every 2 month. This is all of our Government, not Wall Street’s or rich corporate Americas.

John Larkin — Jun 11, 2026
Subject: S7-2026-15 Comment From: John Larkin Affiliation: Jun. 11, 2026 John Larkin, Retail Trader
Corporations must be more accountable to retail traders not less. Why would the SEC want to provide less data to retail traders? Why are they not driving monthly reporting instead of quarterly reporting. We are spending TRILLIONS of dollars for faster more accurate data. Let's get it down to the retail level.

John Tanner — Jun 11, 2026
Subject: S7-2026-15 Comment From: John Tanner Affiliation: Jun. 11, 2026 I'm John Tanner and invest in stocks and futures. Your presence keeps these markets on a modestly fair playing field. Your plan to reduce information in a world that currently demands up the minute updates is absurd. It is the second quarter of the 21st Century. Everyone has at least one computer in their pocket. AI is taking over menial jobs, like tracking the corporate financial currently required on a quarterly basis. This is not about saving costs of stamps. Multi-billion dollar cororations certainly afford the small office of bean counters. In fact, with current technology corporations should easily post their daily earnings and losses - all automatically.
So unless SEC, you want to hide something, the stock markets really needs more public disclosure and reporting rather than less.
More up to date transparency, not less.
SEC should require monthly reports at a minimum, especially with so much at stake for investors.
By the way, don't you exist for the protection of investors and a strong foundation for a stock market? If not, what good are you?

John & Regina Cisternino — Jun 11, 2026

John Caraher Dean of Faculty, The Evergreen State College — Jun 11, 2026
Subject: File No. S7-2026-15 From: John Caraher I strongly oppose a change from quarterly to semi-annual reporting. Any investor knows timely and accurate information is the only way to have a chance of understanding the value of a given investment. The proposed change, at the stroke of a pen, halves the information available in this critical data stream, and thus accelerates the transformation of investing from a data-informed means of stewarding precious financial resources into something closer resembling gambling. There is no clear case for making this change, at least for the vast majority of Americans. What do corporations gain by reporting twice a year? Perhaps mildly reduced expenses in preparing earnings statements. Worse, the change would disproportionately benefit companies that are less transparent regarding their operations, particularly when they are less successful. Investors have less opportunity to make knowledgeable assessments of value and abandon poor performers. In short, this move would make American corporations less efficient, less accountable, and punish Americans who want to invest responsibly

to prepare for retirement. I strongly oppose this change.

john constable — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: john constable Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Dear Sir,
As a successful retired investor, I am absolutely against anything which reduces disclosure to outside investors. Going to a 6 month versus a 3 month reporting reduces the window needed to understand management thinking . The world is a fast moving place and delaying vital information from investors interms of actual facts of the business leads to more volatile price. Actual information solves this problem.
This strikes me as a very poor decision on your part. Transparency is the loser here.

John d — Jun 11, 2026

John Matson — Jun 11, 2026
Subject: S7-2026-15 Comment From: John Matson Affiliation: Jun. 11, 2026 My name is John

Matson, I am the owner and operator of a small business. This issue matters to me as a function of ensuring market transparency and fairness.
Reporting is about accountability, and bi-annual reporting is simply not enough in order to properly hold public companies accountable for the result of their action or strategies. If we look to history and consider how quickly malfeasance or incompetence has been caught as a result of quarterly reporting a strong argument could even be made for monthly reporting. Understanding the burden that would place on companies leads to the conclusion that quarterly reporting must remain.

John McCammon — Jun 11, 2026
Subject: S7-2026-15 From: John McCammon Affiliation: Jun. 11, 2026 After Enron, there is a really good reason to require quarterly reporting. It’s not a terrific inconvenience to these CEOs…they have people to do it all for them. But it goes a long way to keeping them honest!

Johnny Fournier — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Johnny Fournier Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Why change the reporting interval now when it's easier than ever to automatically compile. Seems like we're going in the wrong direction if SEC wants to claim transparency when its acting like withholding consumer information it's supposed to encourage and enforce. It should be doing more to have companies share more in real time even. It should also be doing more to properly educate consumers with consumer investment courses on line to learn the mechanics of and principles in investing in various sectors.
Reducing information to investors will only turn more of them towards other investment areas away from Wall Street companies needing capital the most.

Johnny Shults — Jun 11, 2026

Jon Ball — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jon Ball Affiliation: Jun. 11, 2026 Quarterly SEC reports provide important information for those who manage their investment accounts and retirement accounts. Reducing to 2 x per year allows companies to hide data for a full 6 months that would have otherwise helped inform buy/hold/sell decisions before very good or very bad news causes stock price swings. Quarterly reporting protects consumers like me…a 67 year old retiree.

Jon Krapfl — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jon Krapfl Affiliation: Jun. 11, 2026 Stop this ongoing deferral for the top 2%

Jon Spangler — Jun 11, 2026
Subject: S7-2026-15 Comment From: Jon Spangler Affiliation: Jun. 11, 2026 As an investor in the US economy, I do NOT want to see corporate accountability reduced with "optional" quarterly reporting.

Investors, the press, and US citizens need MORE transparency from publicly-traded corporations, not less accountability.
We need to see how they are performing in all areas every three months *or more* -- not yearly or semi-annually on an "optional" basis.

The SEC needs to do its mandated job, not coddle the rich executives and lobbyists of publicly-traded companies!

Jonathan London — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jonathan London Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
As an investment advisor, broker and private investor, I use quarterly financial information filed with the SEC for important investment decisions. Even as financial reporting / GAAP reporting has been weakened over the years with more and more companies providing "adjusted earnings", one way to gain a better understanding of what is happening is to read and evaluate quarterly 10-Q filings on the SEC website. Don't hand a greater advantage to the privilaged financial firms that can track financial information most don't have. The market is an unlevel playing field. This proposal will add to the unfairness.
It is a company's duty to inform their shareholders/owners if they are public (Regulation FD). Should companies desire less disclosure they should stay private. Should the SEC desire less frequent disclosure for public companies, force excahnges/alternative trading systems/dark pools to reduce the ability to qoute prices and trade the stock only twice a year when financial data is released.

Jonathan Trost — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jonathan Trost Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
With all the insider trading happening by our elected leaders nowadays, reducing the frequency of reporting only widens the already unfair playing field in the stock market.

Joni Nash — Jun 11, 2026
Subject: S7-2026-15 Comment From: Joni Nash Affiliation: Jun. 11, 2026 Absolutely not! Investors need more transparency, not less. It’s an idea that is ridiculous and only benefits companies seeking to hide their details. Could this be anything but nefarious??

Jordan Jacobs — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jordan Jacobs Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
There is no good reason in this age of instantaneous data creation and transfer for large companies to not be required to file quarterly reports that investors like myself rely on to make decisions about how to deploy the capital available to me.

Jordan Mcmullin — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Jordan Mcmullin Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I am a retail investor and this will DRAMATICALLY cut information that I am privy to in the companies that I invest in. I heavily rely on this information as alot of my investments are in sectors that can dramatically change from quarter to quarter and that helps me adjust my risk profile as needed. I OBJECT this proposal and feel like we need MORE information not less.

Joseph Street — Jun 11, 2026
Subject: S7-2026-15 Comment From: Joseph Street Affiliation: Jun. 11, 2026 Why this move in the age of ever increasing access to data & analysis? Looks as if some wish to hold the information you themselves - tantamount to insider trading only for the especially privileged

Josh Dimino — Jun 11, 2026
Subject: S7-2026-15 Comment From: Josh Dimino Affiliation: Jun. 11, 2026 Hello,

Financial transparency is crucial if our system is to survive. Hello, My name is Josh - I'm 37 years old from Buffalo, NY. I have seen firsthand the deviating consequences for working families that the mismanagement and manipulation of the stock market at the interests of big business has had in the past. It is imperative that we keep disclosures quarterly as they have been for over a half a century. A lot can go wrong in half a year. Failed product launches, ballooning debt, lawsuits, vanishing customers. Today the law forces companies to surface that information every quarter. Under the new rule, they can sit on it for six months at a stretch. Plenty of time for insiders to quietly sell their shares to you (or your ETF) before the bad news tanks the stock.

A biannual disclosure would only open the door to more manipulation, deception and corruption. Do the right thing and do NOT let this change go through. Thank you for taking the time to weigh the cost to real working people and our retirements. Working people are already getting shafted every way possible in this country. We're counting on you to do the right thing. Don't let us down.

Josh Dimino

Josh McKenzie — Jun 11, 2026
Subject: S7-2026-15 Comment From: Josh McKenzie Affiliation: Jun. 11, 2026 Josh McKenzie, Software Developer.

Anyone who has any ounce of ethics would know that this is absolutely wrong. I would REFUSE to invest anything into a market that is being concealed. And this is what this is. Concealment of a company's fitness.

Josh Nicolson — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Josh Nicolson Affiliation: Jun. 11, 2026 Josh Nicolson. Council member business owner. 85737. America can’t afford another NASDAQ/SpaceX error I. Our financial system at the same time as Iran war and losing the us $ as the worlds reserve currency.

Joshua Burleson — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Joshua Burleson Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
This change will allow oligarchs to further punish smaller investors, and corporations to further cheat customers.
Do your job, and strike this down!

Joshua Corley — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Joshua Corley Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission: Hello my name is Josh and if this ends up passing I'm sure I won't be the only retail investor that takes their money elsewhere cause it's just to much risk going blind fold without the quarterly statements and not worth the time. Who is the genius that thought of this and what are they trying to hide or cover up by eliminating quarterly statements is a better question?

Joshua Subin — Jun 11, 2026
Subject: S7-2026-15 Comment From: Joshua Subin Affiliation: Jun. 11, 2026 We should demand more transparency from publicly traded companies, not less! This is endemic of the Trump administration corruption! It is why people are gonna go to foreign markets as opposed to investing domestically!

Joyce — Jun 11, 2026
Subject: S7-2026-15 Comment From: Joyce Affiliation: Jun. 11, 2026 Transparency is essential. Quarterly reporting helps keep information flowing in a timely manner and decreases the chance of insider trading which harms many investors. Company officers may act on information which won't be public for an extended period while average investors have to bear the weight of significant changes that harm their investments. Information is power and the power should be shared by all investors.
Joyce Powell

Joyce Alescio — Jun 11, 2026
Subject: S7-2026-15 Comment From: Joyce Alescio Affiliation: Jun. 11, 2026 Joyce Alescio, retired. If investors, like myself, need to ensure we can take care of ourselves financially and without help from the government, then the government and SEC need to ensure we can stay informed often enough about our investments to make good timely decisions. Also with the global instability at an all time high, things can change quickly for a company. Therefore reporting should remain quarterly.

Joyce Denning — Jun 11, 2026

Joyce Hurt — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Joyce Hurt Affiliation: Jun. 11, 2026 Joyce Hurt, retired RN in Sun City, Arizona. I started my career a little late in life. I worked hard and put away savings with a pension contribution. Even with the pension and Social Security without my husband‘s contribution, I would be at poverty level. I came into a bit of money last year and put some money in CDs. It’s not a great return as it is and lowering requirement for reporting which would in turn lead to less transparency and a decreased return. Anything the SEC does to decrease returns on investments would affect millions of senior citizens. And not only senior citizens, but the up-and-coming generations as well who are in the middle or beginning of trying to create some stability for themselves. To the SEC I ask that you keep in mind all of our middle class or lower income citizens who is your decision decisions directly affect. Thank you for your time and consideration.

Joyce Love — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Joyce Love Affiliation: Jun. 11, 2026 It's my understanding that historically when companies are required to report semiannually versus quarterly, returns and valuations were third to one half less. I have worked hard and invested all my life and just retired in late 2024. I cannot afford to lose a third to half of my wealth. I don't understand the reason for changing something that has worked well since 1970. If it's not broke, don't "fix" it!

Joyce RL — Jun 11, 2026
Subject: Keep quarterly reporting! From: Joyce RL Affiliation: Jun. 11, 2026 Please continue to require public to report quarterly to maintain some transparency for small investors like myself. It is not fair for insiders and the rich and well-connected to have information that the rest of us don’t (under reduced six-month reporting periods). At a time when we are seeing record levels of corruption in our government and the public space, I believe reduced reporting would only encourage and result in more corruption. Plus any ‘savings’ for these companies are mere peanuts to them. Please help keep them accountable by continuing to require quarterly reporting.

JT Newton — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: JT Newton Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
I am a Registered FA for 35+ years with 0 disclosures. I have been the CEO of two NYSE-member firms.
This potential action will reduce transparency and degrade confidence in US markets at a critical time in regard to reliable information sharing and financial news. Please do not erode public confidence. Continue to require quarterly reporting.
Respectfully,
James Todd Newton

Juan Arango — Jun 11, 2026
Subject: S7-2026-15 Comment From: Juan Arango Affiliation: Jun. 11, 2026 Companies have to keep track of all the relevant numbers regardless of how often they are required to report them. Keeping individual investors in the dark for 6 months at the time doesn't reduce corporate burdens, it takes information away from investors; information that hedge funds and insiders will continue to have access to.

Please do not change the reporting to 6-month periods. Not only will it put us at a disadvantage, but it will also mess up direct historical comparisons.

Juan Arango, Engineer

Judy Reed — Jun 11, 2026
Subject: S7-2026-15 Comment From: Judy Reed Affiliation: Jun. 11, 2026 As a long term investor, I

utilize quarterly financial reports to adjust my portfolio. I feel that reducing the reporting to semi-annual from quarterly will allow companies to hide fraud and poor performance for longer periods. It is easier than ever to prepare this information today with computers than it has ever been. Adopting semi-annual reporting would be detrimental to the average investor and allow insiders to trade on information not known by the general market. Politicians routinely trade on this knowledge and nothing is done to hold them accountable. It will encourage even more fraud and over time will erode the credibility of our financial markets.

Justin Plourde — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Justin Plourde Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Quarterly reporting serves as a check and balance for investors and corporations alike.
The production of these filings require companies to actively review their financial status and help

them identify issues with time to help redirect the course if their current strategies are unsuccessful.

The act of putting these reports out to the public serves as an additional check - investors pour over these reports in great detail and often discover insights that the companies themselves have not noticed.

This reporting leads to a healthier investing environment - think if you catch a cancer early it's more treatable but if you wait 6 months you could be as good as dead.
Also market interest overall will drop - investors relying on data to find new investments will see the lack of information - in a world where information is momentary - and decide to instead move their money in other vehicles such as CDs.

Justin Ruggieri — Jun 11, 2026
Subject: S7-2026-15 Comment From: Justin Ruggieri Affiliation: Jun. 11, 2026 This rule would erode what little remaining trust I have in the US financial system. It is a recipe for insider trading and corruption. I urge you to continue to require quarterly reporting

Katharine Palmer — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Katharine Palmer Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Under the current changing political climate and the threat of climate change, now more than ever quarterly disclosures should be required.
Please do not consider changing the rules. A lack of transparency only ever hurts consumers.

Katherine Edwards — Jun 11, 2026
Subject: Re: Rule S7-2026-15, 3 certifued 10-Qs to become 1 Form 10-S, 4 certified filings a year to become 2 From: Katherine Edwards Affiliation: Jun. 11, 2026 Sirs and Madam:

With corporate and gov't corruption at one of the highest levels ever, no need to reduce quarterly reporting to semi-annually. If anything, quarterlies should be increased to monthlies.
It would represent the biggest rollback of investor disclosure requirements in more than 50 years.
Investors would have less frequent visibility into a company’s financial health, with longer gaps between updates.
Please abandon proposed rule S7-2026-15 and maintain or increase requirements and penalties for reporting.
Sincerely,
Katherine

Subject: Comment on S7-2026-15 From: Kent Wishne Affiliation: Jun. 11, 2026 Proposed SEC Comment: File No. S7-2026-15
Subject: Strongly Oppose Proposed Rule S7-2026-15 – Retention of Quarterly Reporting Mandate

Dear Secretary Countryman,

I am writing to express my strong opposition to the proposed rule that would allow public companies to transition from quarterly to semi-annual financial reporting. As an individual investor who manages my own portfolio, I believe reducing the frequency of required disclosures would severely harm retail investors, diminish market transparency, and introduce unnecessary volatility into the U.S. financial system.

Accurate and timely information is the bedrock of fair and efficient capital markets. The current quarterly reporting framework provides several critical protections that a semi-annual system simply cannot replicate:

Prevents "Bad News Festering": A six-month reporting window creates a massive information vacuum. Corporate underperformance or operational structural shifts could remain hidden for half a year, leading to severe, destabilizing market reactions when the data is finally made public, rather than the smoother, incremental adjustments that quarterly updates allow.

Levels the Playing Field: Institutional investors, corporate insiders, and market analysts possess sophisticated channels to gauge a company's health in real-time. Retail investors rely heavily on standardized, public filings to make informed decisions. Extending the reporting gap directly widens the information asymmetry between corporate insiders and everyday market participants.

Maintains Market Liquidity and Valuation Premiums: Historical data from the U.S. market's own "semi-annual experiment" between 1955 and 1970, alongside modern comparisons with international markets that report semi-annually, suggests that reduced transparency is closely linked to lower trading liquidity and multiple compression. A lower valuation premium ultimately raises the cost of capital for businesses and erases the hard-earned savings of long-term investors.

The argument that quarterly reporting fosters corporate "short-termism" is not supported by the robust history of American innovation and economic growth under the current system. While eliminating quarterly guidance forecasts can be a healthy step to discourage short-term manipulation, eliminating actual quarterly historical results will only leave investors in the dark.

I strongly urge the Commission to protect individual investors and maintain the integrity of our markets by preserving the mandatory quarterly reporting framework.

Sincerely,

Kent Wishne

Kevin Vielbaum — Jun 11, 2026
Subject: My view on Rule S7-2026-15 From: Kevin Vielbaum Affiliation: Jun. 11, 2026 To the Securities and Exchange Commission:
Please do not eliminate quarterly disclosures for public companies. As an individual investor I use quarterly reports to understand the health of the businesses I choose to invest in. Eliminating quarterly reporting and making reporting less frequent will allow management at companies to potentially hide key information from the markets for longer periods of time. I don't think that is in the interest of the American investing public and could exacerbate fraud.

Khristie Hauck — Jun 11, 2026
Subject: S7-2026-15 Comment From: Khristie Hauck Affiliation: Jun. 11, 2026 I am against this change. It does not serve the average American's portfolio. Information informs decisions and providing less simply leaves us vulnerable. My name is Khristie Hauck and I'm an attorney.

Subject: Comment on S7-2026-15 From: Kim Berard Affiliation: Jun. 11, 2026 I've worked my whole life for the little I have invested. For the sake of transparency, honesty and integrity, keep the reports quarterly and the public informed.

Kim Hall — Jun 11, 2026
Subject: S7-2026-15 Comment From: Kim Hall Affiliation: Jun. 11, 2026 More reporting is needed rather than less. The company's should give more transparency and help cut back on illicit activities. It protects the company and the consumer. With prices rising, there may be more opportunities for illicit activities. Please require as much oversight as possible for the people.

Kim Hatfield — Jun 11, 2026
Subject: Comment on S7-2026-15 From: Kim Hatfield Affiliation: Jun. 11, 2026 Kim Haye, retired investor, California.

I see there is a motion to move corporate fiscal reporting from Quarterly to a Semi-Annual basis.

I do not believe this move is in the best interest of investors. Reducing transparency is a move that is bound to backfire, and to reduce the strong stock market growth our economy needs.
